ROVER.

FINEST BLACK IRISH WATER SPANIEL EVER IMPORTED.

And the best bred in the United States, will be allowed to serve a few good bitches.

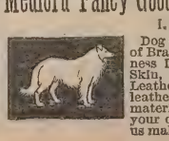
STUD FEE, $25.00

THEODORE PREDMORE'S KENNEL, Forked River, N. J.
Photograph can be seen at 111 B'way, Room 85.

Yorkshire Toy Terrier.

The English bench winner **Bradford Harry,** Described in all show reports as "best Yorkshire in America." Photos 50c. Pedigree and winnings free. P. H. COOMBS, 1 Exchange Block, Bangor, Me.

IN THE STUD.



Llewellyn setter dog GUN (champion Gladstone—Bay B.), grand field dog; also Young Gath, by Dan (Rake—Phyllis) out of True Blue (Gath—Gem). Price reasonable; address with stamp, CHARLES YORK, 9 and 11 Granite Block, Bangor, Me.

MIDDLESEX KENNELS.

Imported English beagle Blue Boy, sire of Belle of Woodbrook and other 1st prize winners. Magnificent field dog. Fee $10. A few choice puppies for sale. Address GEO. ENGERT, 480 Broome street, New York City. ap11,3mo

Medford Fancy Goods Co., New York City,

I. BREMER, Pres. & Treas.

Dog Collars and Furnishing, made of Brass, Copper, Silver, Gold, Harness Leather, Seal Skin, Alligator Skin, Morocco, Calf Skin, Patent Leather, and fifty other varieties of leathers and metals; any special material, sent to us or through your dealer in these goods, to have us make up.

FOREST AND STREAM.

A WEEKLY JOURNAL OF THE ROD AND GUN.

TERMS, $4 A YEAR. 10 CTS. A COPY. SIX MONTHS, $2.

NEW YORK, MAY 9, 1889.

VOL. XXXII.—No. 16. No 318 BROADWAY, NEW YORK.

CORRESPONDENCE.

THE FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. Communications on the subject to which its pages are devoted are respectfully invited. Anonymous communications will not be regarded. No name will be published except with writer's consent. The Editors are not responsible for the views of correspondents.

ADVERTISEMENTS.

Only advertisements of an approved character inserted. Inside pages, nonpareil type, 30 cents per line. Special rates for three, six, and twelve months. Seven words to the line, twelve lines to one inch. Advertisements should be sent in by Saturday previous to issue in which they are to be inserted. Transient advertisements must invariably be accompanied by the money or they will not be inserted. Reading notices $1.00 per line.

SUBSCRIPTIONS

May begin at any time. Subscription price, $4 per year; $2 for six months; to a club of three annual subscribers, three copies for $10; five copies for $16. Remit by express money-order, registered letter, money-order, or draft, payable to the Forest and Stream Publishing Company. The paper may be obtained of newsdealers throughout the United States, Canadas and Great Britain. For sale by Davies & Co., No. 1 Finch Lane, Cornhill, and Brentano's, 430 Strand, London. General subscription agents for Great Britain, Messrs. Davies & Co., Messrs. Sampson Low, Marston, Searles and Rivington, 188 Fleet street, and Brentano's, 430 Strand, London, Eng. Brentano's, 17 Avenue de l'Opera, Paris, France, sole Paris agent for sales and subscriptions. Foreign subscription price, $5 per year; $2.50 for six months.

SUPERINTENDENCY OF THE NATIONAL PARK.

IT is reported that Captain Moses Harris and his troop of cavalry are to be transferred from the National Park, and that another officer is to be ordered there to take his place. This ought not to be done. Captain Harris has been stationed in the Park for several years, and has made a faithful, energetic and efficient Superintendent. He and the men under him have learned the needs of the reservation and must of necessity be more competent to carry on the work of protecting and caring for it than any one who has not had this experience can be. Another officer sent there would be hampered for a long time by his ignorance of the region and its needs, and while he was learning his duties great damage to the reservation might result. The position of Superintendent of the National Park is one which calls for hard work, the exercise of great judgment and great firmness. It is not an easy position, even during the height of the season of travel, while for six or eight months the post is almost altogether cut off from the world.

By his management of the Park, Captain Harris has made the rules and regulations established by the Secretary of the Interior respected. Visitors to the Park know what to expect there under his management, and understand that the regulations must be obeyed. It will be a great misfortune if by the transfer of Captain Harris all this should have to be gone over again, and the public should be obliged to adapt itself to the idiosyncracies of a new Superintendent.

If there were any law in existence for the Government of the Park, the matter would be one of less importance, but there is no law, and everything depends on the competence of the Superintendent.

Captain Harris has conducted the affairs of the Park with exceptional ability and he should now be allowed to remain there and to receive the credit for the organization which he has completed. We earnestly trust that no change will be made.

THE DOMESTICATED BUFFALO.

IT will be remembered that last year when the Bedson herd of domesticated buffalo was purchased by Hon. C. J. Jones, of Kansas, a feeling of keen regret was expressed by the residents of Manitoba that the herd should have passed out of the hands of a resident of the Province to be taken to the United States. This sentiment, which was very general, found strong expression in a letter of a correspondent printed in this journal in January last. Since that time we understand that the feeling has taken a definite shape, and that the Province of Manitoba has offered Mr. Jones all the land he may desire for a buffalo ranch on a lease to run ninety-nine years and at a nominal rent of a dollar. The Manitobans took great interest in the herd of buffalo, feeling, and rightly so, that the location in the Province of the only considerable herd of domesticated buffalo in the world was a great advantage to them and a cause for just pride.

The action of the provincial government of Manitoba is not without interest for the dwellers in the United States. The buffalo has always been regarded as distinctly an animal belonging to our country. While its range extended beyond our territorial borders on the north and on the south, the true home of the buffalo lay almost wholly within our borders. At present the only domesticated buffalo known are owned in the United States, and by our own citizens, some of whom are expending time, effort and money to demonstrate the practicability of establishing a new race of domestic cattle, which will be more useful than those we have at present.

It would be a pity, it would almost be a national misfortune, to have the only considerable herd of these animals moved out of the United States into our sister country, Canada. We should feel pride in retaining within our borders the few survivors of this otherwise vanished race. But aside from any question of national pride, is the one of pecuniary advantage to the agriculturists and stock raisers of the West. If, as now seems probable, the buffalo is in the near future to prove an important factor in the beef-raising industry in the West, the proper place for a breeding herd is in the central West, not far from where Mr. Jones's herd is now located. This location is adjacent to the great stock ranges of the West, and is perfectly accessible.

We understand that Mr. Jones is seriously contemplating the acceptance of the offer of the Manitoba government, and may remove the part of his herd now in Kansas back to Manitoba, where a large number of his pure bred buffalo still remain. As a citizen of the United States, and a typical Western man, he would naturally prefer to retain the herd in his own country, but we take it that Mr. Jones desires to carry on these experiments at as little cost as possible, and that his patriotic pride will not be allowed to interfere with the integrity of his pocket. Therefore we think it likely that he may move his buffalo into Canada.

To carry on the experiments in buffalo crossing on a large scale a considerable tract of land is needed, and this land must be fenced. The cattle can be turned loose on the prairie, but the buffalo cannot. Not because these latter will run away, but because the average pilgrim or settler from the States would, on seeing these tame buffalo, promptly kill all of them that he could. A township of land properly fenced would afford ample room for this herd, but the United States land laws do not allow any individual to acquire so large a body of land from the general Government.

It would seem that it might be worth the while of the State of Kansas to make to Mr. Jones a long lease of a large tract of State land within its borders, or, if this is impracticable, a long lease of a township in some unoccupied portion of the Indian Territory or in No Man's Land might be made by the general Government. It is not an unusual thing for a town to give a large manufacturing establishment land on which to erect its buildings providing the corporation will move its works to its borders. It is a common practice for towns in the West to offer the railway companies which pass through them free building sites, if they will move their shops and round houses to them. The present case is not very different from such an one.

There is good reason to believe that a new and valuable race of cattle will be established through Mr. Jones's experiments. That a definite advantage will accrue to the people of these United States by the establishment of this new breed of cattle in their limits can not be doubted. Is not the matter of sufficient importance and is the advantage to the country not sufficiently promising to make it worth while for the State or the Federal Government to depart from its rules and lease Mr. Jones a tract of land which he can use for a ranch for buffalo breeding?

ARBOR DAY.

THE first Arbor Day was celebrated with more or less ceremony in every county in the State of New York. The object of setting aside a day to be observed as Arbor Day was to encourage the planting of trees in groves, arbors and waste places, to familiarize the people, more especially the young, with the methods of tree planting, to afford experimental evidence that it is attended with no difficulties but such as can be readily guarded against; and to surround the important labor of tree planting with pleasant associations.

Full effect was not, and indeed could not have been given to these objects in the city of New York. Like Hamlet with the ghost left out; there was no tree planting. In almost every other county of the State a number of trees were planted; in some cases several hundred, and even in New York where from lack of available land, or it may be from lack of ideas on the part of the direction, the practical task of tree planting was set aside for an imposing and interesting ceremonial intended to symbolize it, the observance of the day as a holiday will inevitably bear practical results by and by. The difficulties of finding land and trees to plant is purely imaginary, even in this city of New York. The Park Commissioners cause numbers of trees and shrubs to be planted every year, and this work might well be done by the school children under proper direction on Arbor Day. The holiday appears to have taken hold and promises to bear good fruit, but an important matter not to be overlooked is to afford the children opportunities of noting the progress made by their trees.

SNAP SHOTS.

THE announcement that the President has appointed Hon. Theodore Roosevelt of this city a member of the Civil Service Commission will be received with general satisfaction. To the readers of FOREST AND STREAM Mr. Roosevelt is known as an ardent sportsman, a prolific writer on sport in current literature and author of two very charming books on outdoor life. The friends of civil service reform will rejoice at this appointment, for Mr. Roosevelt's record in politics is that of a man of great energy, of uncompromising integrity and of unswerving devotion to reform. We need in our political places more men of this type, and it is an encouraging sign of the times when such appointments as this one are made.

In the discussion of George Washington and his times there has been much comparing of the old order of things with the new in the political and material phases of the country's development, and the comparison might be carried further into the domain of nature and the game supply. What more suggestive, for instance, than the record of one of Washington's hunts when he killed five buffalo on the Little Kanawha River in West Virginia? This reads like fiction in these days, when for generations the buffalo has been unknown in the East, and the bleached bones of the bisons of the West are gathered on the plains and shipped by car loads to mingle with the ship loads of bones of Egyptians in the mills of fertilizer factories.

During the spring months most of the gun and fishing clubs and game protective associations hold their annual meetings for the election of officers and for other business, for the spring months either close up the shooting or open the fishing season. Club secretaries should send in to us reports of these meetings as speedily as possible that their results and the officers for the ensuing year may be announced in these columns.

The season has thus far been a most favorable one for the woodcock. The mildness of March and April, unbroken by severe cold snaps, furnished excellent conditions for the nesting, and next autumn's supply should show the effect in increased abundance. The new law just adopted by New Jersey retains July woodcock shooting,

The Sportsman Tourist.

A NOVA SCOTIA REMINISCENCE.

AS the true angler grows older he cares less and less for large baskets of fish, and more for associations connected with the fishing. I do not mean by this that there are any of us who do not like to have our efforts well rewarded—else we might as well fish in a bathtub—but what I do mean is that much enjoyment is to be derived from pitting your skill against the sagacity of some old mossback, whom years of experience have taught that the flies which drop so alluringly over his resting place have stings in their tails.

I well remember one such encounter with an old trout, whose home was the deep clear pool of a New Brunswick brook.

When I first caught a glimpse of him, he was surrounded by a number of his kin possessed of less body and intellect. Well concealed by the bushes, I succeeded in hooking him at the first cast, but so lightly that I lost him. For weeks afterward, as I passed up and down the brook, he lay in the same pool moving his fins and apparently engaged in deep reflection, from which no wile of mine could awaken in him the desire to rise again. In vain I tempted him with all the changes that my fly-book offered; there he lay in full view, fanning away with his pectorals so sullenly that I almost yielded to the temptation to jig him. That trout got to haunt me, his capture seemed beyond my skill, and as I looked at him from day to day his size increased.

Just at dusk on the last afternoon of my stay, I crept up to the pool where my old fish lay; the white-miller dropped within 6in. of his nose—a swirl, and I had him well hooked, and three minutes later he was flopping in my creel. I need not add that I was more proud of that one trout than I would have been of twenty that had not cost me the effort.

This brings me back to my subject, a trip that I made last August with my friend Harry S., one of the keenest and most successful sportsmen in the Province, to one of the sea trout rivers on the Atlantic coast of Nova Scotia. Out of courtesy to those who so kindly invited us to share their sport, I must refrain from mentioning the name of the stream. Harry and I did not much enjoy our long journey by stage to reach the village where our friends lived, but one Saturday afternoon found us at our destination, and before evening we had met the various members of the Inland Fishing Company (Limited), as they have facetiously named their club. That night, in spite of the heavy rain, the club gathered in large numbers about the stove in the office of the genial president, better known to the club as the Colonel, or for short "Kern." Pipes and fish stories were the order of the evening. It was arranged that on Monday the Colonel and Mr. Austen were to accompany us to their favorite pool and camping ground, and that the start was to be made in time to enable us to have the evening fishing. Enos, with his ox team, was to be at the mouth of the river to convey the boats and dunnage to the pool. It was planned that on Monday morning we should fish a large lake that lay close to the road leading to the river.

We spent Sunday in quiet chat and in walks about the pretty town, along the beach and upon the cliffs.

Monday morning bright and early we were on our way to the lake. Mr. Johnson, one of the club, acted as our pilot and showed us where all the good spots for fishing were. No one could have been more eager for our success than he, nor more delighted when we hooked a good trout. "You have him and he's a posy," Johnson would exclaim. We had fine sport fishing from the boat and killed twenty sea trout, weighing from ¾ to 2lbs. each. This lake has connection with the sea and the trout work their way up to it to fatten on the young herring that swarm in the waters of the lake; some of those that we caught were fairly crammed with them. These lake fish differed in many respects from those we caught later in Nameless River. They had short blunt noses that kept their width to the end; in color, though much lighter than the ordinary run of brook trout, they did not present the silvery appearance of the Nameless River trout. In fact the latter had the form and color of salmon in miniature and seemed to take the fly in much the same way—just beneath the surface. The high water in the river, however, may have had something to do with that circumstance. The flesh of both lake and river fish was of a bright salmon color.

About three o'clock shouts from the shore announced the presence of the Colonel and Austen; so, leaving J. to complete the string, we were soon ashore, and on our way. Enos was on hand at the mouth of the river; so, leaving him to follow with the boats and traps, we pushed on with rods and landing nets. A five-mile walk brought us to our camping ground, and a more lovely spot could not well be imagined. The pool is about 300yds. in length, and from 25 to 75yds. in width, with quite a heavy fall pouring into it at the upper end; the banks on either side are well wooded to the water's edge. We were not long in getting our rods together. Unfortunately, recent rains had swollen the river very much, and the outlook for good fishing was not very promising. However, H. and I were soon at it, but only succeeded in raising one or two little fellows; but we smothered our disappointment, and, trusting that luck would change in the morning, all set to work to fix up camp for the night.

Austen prides himself on his camp cookery, and I doubt if many people in Nova Scotia sat down to a better meal, with better appetites, than we did that night. When the time came for pipes Enos washed the dishes and entertained us with quaint recitals of personal adventures. I should like to tell the story just as he did, of how he happened to become a prohibitionist; but the tale would lose its pungent flavor if related by another.

Tuesday morning we were awakened by the patter of rain upon the tent. How it poured! Once in a while between showers we crept out into the cold drizzle, baled the boats, paddled out upon the stream and tried a cast or two. Harry insisted that there must be grilse in such a river. Once, during a lull in the downpour, he stole out by himself and we saw nothing more of him for some time. At last, however, back he came, fairly pale with excitement. "You say there ain't any grilse in that pool; I know better. I hooked one in the eddy under the fall, and an old whale he was, too. He made three rushes, and I reeled him in. I saw his whole length, and if he didn't weigh 6lbs. I don't know anything about fish. I was just slipping the net under him when that beastly old boat swung round, and I'll be blamed if he didn't run away with fly casting line and all."

"Oh," said the Colonel, "he's only one of Johnson's posies. If we only had some decent weather we would carry home six or seven dozen such." In the afternoon we caught quite a number of fish, mostly river trout, which we had Enos fry for supper. Both of our friends thought that the fish had gone further up stream, and that we would find a school of sea trout in a pond five miles further up. It was determined that next morning early we should pack our traps and go up to it.

We had a long and very wet walk, passing through a number of swamps. One who has never traversed a Nova Scotia bog can have little idea of it. The ones we crossed that day were covered with moss, with here and there clumps of hardhack and an occasional stunted hackmatack. Near the latter one will always find the deepest slough; the neighborhood of these trees, therefore, must be studiously avoided. In walking you sink half way to your knee at every step, and feel the whole mass of moss beneath your feet yield, and see it wave in front of you, reminding you of the time when as a boy you used to play "tickly-bender" on the ice. If you break through this fibrous float it is uncertain how far you will go before reaching bottom, but you can safely reckon on getting wet to your waist. The oxen broke through a number of times but succeeded finally in getting across alive.

The upper pool looked promising, but the fish weren't there. Enos suggested that we should float down in the boats next morning fishing as we went, and in this way be sure to meet the fish somewhere. The plan seemed good, so arranging with Enos to pack up and meet us four miles below, we started on our journey. All went well until we had accomplished about half of the distance, when we came to a rapid, the looks of which neither Harry nor I liked; but the Colonel and A. led the way while we stopped at the head of the rapid to watch them.

Both boats were light, flat-bottomed punts. After going down about 30yds. both of our friends dropped their paddles and clutched frantically the overhanging bushes, at the same instant the current rushed over the stern and the men tumbled out on the bank pretty thoroughly soaked. The rushing waters caught the abandoned skiff, whirled it around like a straw and left it bottom up on a rock in mid stream. I shall never forget the comical expression of the Colonel's face, as with bulging eyes he clung to that bush, though they said I duplicated it a few minutes later. In our boat there was an anchor fastened to some cod line, but unfortunately the latter was not made fast, so that when Harry seeing the catastrophe ahead and wishing to avoid a similar one, dropped his oars and jumped ashore with the mud-hook, there was nothing left for me to do but to sit in the bottom of the boat holding my much-loved rod and to float down stream in as dignified a manner as possible, amid the jeers and laughter of the three on the bank. I soon brought up standing on a rock, whence I was rescued by the united efforts of my friends.

To make a long story short, Enos was headed off, brought in his team and took us back to our first camping ground. Here we had the best fortune of the trip. In a little cove of the pool we struck and brought to net some heavy fish. It was great sport to see our friends watch the action of our light rods; they had prophesied disaster to them from the first should large fish be encountered, for the Inland Fishing Club is, or rather was, wedded to the English idea of a heavy 14ft. rod for sea trout, and my 8oz. split-bamboo, Imbrie, was a revelation to them.

"I tell you, Kern," said Johnson, "Vail's rod is a beauty, but just wait until he hooks one of those posies, you see if it doesn't buckle and break."

That last afternoon I think I did some missionary work in the rod line, for, while our companions were quite near to us, a large sea trout took my stretcher, and just as I struck another rose to my dropper, and I hooked them both. The Colonel and Mr. Austen watched the fight with great interest, but the bamboo conquered at last, and Harry skillfully netted them for me. The larger fish measured 22in., and the smaller 18in.

A fly known (locally, probably) as the Jeremy-Diddler we found most killing. As it is unknown to tackle dealers in New York, I will describe it: Body, bright green mohair or wool, wrapped with gold tinsel; legs, bright orange hackle; tail, brown turkey; wings, the same, with cherry-red shoulders.

It was evident that the trout were just coming into the pool, and that by remaining a few days longer we could have great sport; but the business engagements of our friends, and the fact that our provisions were beginning to run low, compelled us to return. Considering the condition of the stream, which Enos said was quite as high as during the spring freshets, we did not do badly, and what we lacked in fish we made up in jollity. On reaching the road we found the carriage in waiting and were soon on our way to town.

Neither Harry nor I will soon forget the kindness we received at the hands of the Inland Fishing Company, and we hope next summer to have the pleasure of seeing Austen's long legs leading the way through the bush, and to hear the Colonel's short fat ones plumping through the puddles behind us.

PRESCOTT B. VAIL.

BOWELS OF COMPASSION.

I WONDER if man's sympathy for God's creatures increases as he grows older? I am led to ask this question through my own experience, going back twenty-five years to the time when I, a boy of 12, came into proud possession of my first gun. How well I remember when my father decreed that I had become sufficiently expert to be trusted in the woods alone with it, and with what pride I exhibited the three red squirrels brought down by my own hand on that never-to-be-forgotten first hunt. It is needless to say that armed with that trusty cap lock the thought furthest from my mind, while tramping through the woods, was any possible pain I might inflict on such stray squirrels or rabbits as might cross my path. I wanted blood, good rich red blood, and my only regret upon returning home at night was that so little gore was upon my infantile hands.

So for years this insatiable longing to destroy possessed me. I could gloat over the dying agonies of a gray squirrel as he tore and bit at the twigs and leaves at the foot of his home tree from which I had just brought him down with my gun.

The puff of feathers and limp cringing of the grouse or quail crossing before me, as my finger pressed the trigger was the acme of delight, and the jerking of my creel against my side as a 10in. trout flapped frantically therein filled my piscatorial soul with ecstatic tittilations. I gauged my pleasures afield by the number of birds, beasts or fishes added to my score, never once considering the possibility of any of my victims having as good a right to live as I.

Suddenly a change came over me. While my love for field sports was just as strong in me as ever, I began to find that my sympathies were gradually going over to the side of the innocents, and when in pursuing some particular bird or animal that same bird or animal eluded me, instead of a feeling of disappointment pervading my mind I found rather a sense of relief and comfort. I don't wish it understood by this that my heart has become softened to that degree supposed to prevail in the central organ of the barnyard fowl, or that I have joined that noble order recognizing the late Henry Bergh as its founder. Not so. I only know that while still a keen and eager sportsman I have somehow passed from that sanguinary state of boyhood and early manhood, to a condition in which I recognize myself as only one of God's least creatures, with no more rights in the premises than his meanest animate creation.

Now all this is involuntary. I did not court it. It came upon me gradually, and like oil upon troubled waters it has left me sympathetic and calm. Were I an old man it might be said, "He has passed through the bustle of life and now in his declining years he sees the folly and injustice of wantonly sacrificing God's creatures;" but I am not an old man, not even a middle-aged man, so that can't be the trouble. Were I a rich man, oppressed with the cares of fortune to that extent that perforce I was deprived of the joys of the field, and by lack of contact with natural objects lost all interest in matters sporting, and so for an excuse would say, "It is wrong," that might offer a solution. But I am not a rich man, and every year finds me at my accustomed haunts along the covers and beside the streams.

Is there in the ethics of the field such a thing as a sportsman's change of heart? Something akin to the great change that takes place in man when he turns from the follies of this world to something higher and better? I think so and believe that to this is due my present condition. Now what brought it about and what will be its results touching my future?

In communing with nature through the instrumentality of my gun and rod I have learned to love her for herself alone. I have found infinitely more pleasure and solid comfort in admiring her wonders, and studying her beauties than in shearing her of those beautiful creatures that go so far toward enhancing her delights.

Still I always take a shot when I can get it and never pass a favorable pool unwhipped. I take what I can get thankfully, knowing that no matter how much or how little of game or fish I may get I still have left the whole broad realm of nature to draw from, and the result is I am never unsuccessful.

Now I would respectfully ask brother sportsmen if this isn't a proper condition to be in? No more anxiety regarding possible failures. No horrible regrets born of unaccountable misses and broken leaders. Best of all, no necessity of lying to increase the measure of small success to the alleged proper standard. All these are done away with in this new-found condition, and the sportsman over whom this change comes becomes a sportsman indeed.

It is possible I may stand alone in this great reformatory act, but I don't believe it, and if there are other sportsmen who find after years of practice that they still have bowels of compassion linked to a devoted love for field sports, I would like to hear from them.

H. W. D. L.

Natural History.

FIVE DAYS A SAVAGE.—V.

NOTES OF A HUNTER-NATURALIST IN THE NORTHWEST.

GULF OF GEORGIA, British Columbia.—At the first break of dawn I awoke. The gulls had commenced their cries once more. Now, I had been trying for two days to get some more cormorants, but could not get even a shot at them, they were so shy. I knew they must be roosting on the north end of the rock furthest from me, and that they would start at the first alarm. As they roost on the top of a wall of rock directly over the water, it is impossible to shoot one and prevent its falling into the water. I knew that after the shooting I had done, it would be useless for me to try to approach them in the boat; so I concluded to crawl within shot over the top of the rock. Carefully I climbed the rock and crept along the ledge on its very edge. Finally I could see one of the birds and hear others flying, as the gulls warned them of my approach. Taking a snap shot at the one in sight, I sprang to the top of the rock as my bird whirled down, heels over head, and as the others made the sheer plunge over the edge, I shot another, and then putting in another shell, I dropped one more. I quickly climbed down to my boat and pulled out into the current. I found the first and second birds lying on the water, secured the first and started for the second, when he suddenly disappeared and I never saw him again. The third was still on the water, but well able to swim, having somewhat recovered from the effects of the shot. He was out of gunshot, and I had to let him go or give up landing again on that rock.

Well, I had one fine old female, and now for the puffins' nests. At the top of the rock in the light soil and above the edge of the cliff I found plenty of their burrows. I commenced to dig at one with a three-cornered hoe, which I had brought along for the purpose, and soon found I had a bird inside. After going in some four feet I put in my arm to its full length and drew out the bird and then a white egg covered with red earth. I continued digging for two or three hours. Talk about dogs digging out woodchucks! It wasn't a circumstance. I chopped roots, dug out stones, went in head first, got all covered with red earth, got my hair, mouth and shoes full. It wasn't much trouble to get rid of the dirt, for as fast as I shovelled out it went over the rocks and straight down, in some places 150ft. or so. I noticed a few holes, into which I could put my arm and reach the egg. These, I think, were the holes of birds nesting for the first time, as they had a very new, fresh look, while some of the

holes which went in and diagonally downward for 6 or 8ft. appeared to have been used for more than one season. I continued to dig until I struck an old colony. Here I would follow one hole in for 8ft. or so, and then it would branch out in three or four ramifications, which in turn connected with others. In fact there seemed to be a perfect labyrinth of tunnels and the bank was honeycombed in all directions. Then I gave it up. There is a queer thing about the eggs of the puffin. Although they appear a dirty white when taken from the hole, on account of the earth which stains them, when thoroughly washed they are a beautiful clear color with faint spots showing through. These spots appear to be on the inside, or at least under the surface, as they show very plainly on the inside of the egg. The tufted puffin makes no nest here, but lays its single egg near the termination of the burrow and on the bare earth.

Having now gotten plenty of specimens, I prepared another meal. I had patched up my pail at the fisherman's, and had some water left, so made a stew of birds, flavoring it with wild onion and mustard, and this, with a small fish I managed to spear with my sharp stick, and some mussels roasted, made me quite a lunch.

As I had started out to be gone only three days, I thought it was time to turn toward camp. Piling all the things on board the boat, I made a start for the Sucia Islands, intending to stop there over night and go on to Lummi the next day. But the wind left me to the full force of the tide, and I was carried to Matia Island, two miles west of the Sucias. Here I found a Scandinavian fisherman, with whom I stayed that night. John Penson made me very welcome. And here ends my five days.

On the next day John said there would be no wind and a storm was brewing. He thought the tide would turn about 4 o'clock in the afternoon, and advised me to start about three, so as to get the advantage of slack water. I had to row eight miles directly across the channel to get under lee of Lummi Island. And through here the tide sets very strongly both ways. John said the flow would take me up toward the Gulf, and the ebb would bring me back. And so they did. But, oh, John! you missed your calculations on the turn. I rowed away for the point, and the tide bore me further up the Gulf, and still further, and finally the sun went down and left me way out in the Gulf, and about as far from the island as from the shore. And now the tide was turning. Away along the Gulf came a long ripple; then the waves rose and the waters reared themselves upward. Soon my boat was caught in the whirlpools at the meeting of the tides. Pulling stoutly through this tumult, I was soon in the ebbing current.

Now the air grew dark and a roar came up from the west. Black clouds obscure the sunset light in the western sky. I knew this meant the storm. I quickly make everything fast, put on my oil clothes, put up my mast and sail and then glanced around. I heard that sullen roar coming louder and louder, and through the darkness of the storm the white waves gleamed as they came rushing on. As the storm approached I felt a shiver and wondered how my little skiff would stand the gale and sea. And now it is upon us. I have the sheet in my right hand, the steering oar grasped firmly in my left. The little boat heels over under the fury of the blast, and I lean far out over the weather rail, bracing myself with all my might to hold the line and steering oar. Now, now she gathers way, and springing like a thing of life, she rushes through the hissing sea, rolling the foam high from her bows. Higher and higher roll the great seas, and still the gale rises. The rain drives against my cheek. But I see the boat is making very little water and rides like a seabird. I have no fear. I exult in the mighty tumult and the chaos of the elements. "Blow, ye winds!" I shout through my set teeth. And so in the night, the darkness and the storm, miles from the shore on the heaving Gulf, we drive on—my boat and I—toward the long black mass that looms in the distance.

But now there is a change. The first squall is past, and the wind dies away. The sail flaps idly, and the boat rolls in a sickening way as she climbs the crests of the great seas, or lies like a log in the hollows between. I seized the oars, and steering by the intermittent flashes of a lighthouse on one of the British Islands some twenty miles away, I tried to row toward the point of Lummi Island. The wind had been ahead, and as I had taken it abeam, it had been taking me toward the American shore, and so into the shore current which sets down toward Lummi Island. I know that there will be more wind, but the tide is with me, and I hope to gain the lee of the island. I row and row. It is hard, tiring, discouraging work, and finally completely worn out, I take in my oars and lie down in the bottom of the boat. She falls now into the trough of the sea and rolls fearfully. But I knew she would ride it out, and the tide was bearing me now in the right direction. Soon I drop to sleep. How long I slept I do not know, but was awakened by a shower of salt spray in my face, and got up to find that the storm was coming again. Slowly and wearily I unfurl the sail. The wind came dead ahead. We seemed to be much nearer shore. Sailing as close to the wind as was possible with a flat boat, I steered for the shore and trusted to the tide. I soon found that the tide dragged so on the boat's stern that it kept her head off the wind, so she would steer herself. I trimmed her carefully and lay down with the sheet in my hand. Then I slept, and wind and tide drove us on! Mechanically I held the sheet, and when the boat heeled too much I woke and eased the sheet, and then dozed off again. Thus I got a long rest, and when at last the sea began to abate, I found I was getting under the lee of the island.

I arose feeling much refreshed; took my oars, and in an hour more I had my boat fast to the steamer's stern as she rode at anchor at the beach. As I climbed over the rail Joe stuck his head out of the cabin door. "Hullo, Professor!" he exclaimed, "we thought you had gone to Alaska in the skiff. We thought it would be just like you." "What time is it?" said I. "Two o'clock in the morning," said he. Just then the storm howled louder than ever, and the rain poured down in torrents. I turned in in the cabin, thankful to be sheltered from the fury of the elements, and fell asleep, lulled by the raindrops beating on the deck.

I have now given a little of my experience of savage life. Lest some enthusiastic young friend should wish to imitate me, and strike out for some desolate island to depend on his own resources, I will say, "Don't do it." You will make a mistake. A meat diet is not apt to fatten a man in a warm climate, and it is not always best for those who have been brought up among all the comforts of civilization and tenderly nurtured in pleasant homes to try to inure themselves to hardship. It is well to be near nature, but have all the creature comforts you can carry, and above all, plenty of provisions. Health and comfort will then walk hand in hand, and your ways will be the ways of pleasantness and your paths the paths of peace. EDWARD HOWE FORBUSH.

NESTS OF THE GREAT HORNED OWL.

ON February 23, 1887, a friend of mine went to the mountain to hunt for the great horned owl (*Bubo virginianus*), in the hope of getting their eggs. He looked carefully nearly all day, without any success, and was just about leaving for home when he heard the crows making a tremendous racket not far off. On going to where the crows were he could see no owls, but found an old dilapidated nest, and imagined he could see a bird's tail extending over the nest. He pounded the tree, but no bird flew off, so he decided to climb up to the nest, a distance of about fifty feet. When he was about half way up the owl left the nest, which contained two fresh eggs, which he took. On April 8 he went there again, thinking that perhaps the owl might have laid a second time. To his surprise he found that the redtail hawk had taken possession of the nest and had deposited two eggs in it. I never heard of the redtail hawk laying its eggs in an old nest, and so far as I know these are the first redtail eggs taken in this locality, although some five or six years ago I found very near the same place a nest with one young one. This nest was a new one built by the hawks, and fully twice as large as a crow's nest.

On February 22, 1888, my friend went to look for the owls again, and found that they were occupying the same old nest. This time the bird left the nest before he could get anywhere near it. He climbed the tree, and found that she had laid only one egg, so he decided to leave it alone, and take the young when about two weeks old and have them stuffed and mounted together with a pair of old ones.

On April 8, just forty-six days after the first egg was laid, we went there together expecting to come home with two half-grown owls. When we arrived at the tree we saw that the old bird was sitting on the nest. I pounded against the tree and she eyed us but did not fly. The moment my friend commenced to climb she flew from the nest, and in leaving it a young one fell out. Of course, falling from such a height, we expected to pick it up dead, but it seemed unhurt. The nest still contained one picked egg ready to break, so that one could hear the little one inside make a noise. We hid for at least half an hour and watched for the old ones to come and give us a shot, but their eyes must be better than ours, and they would not come. As the little one had not yet died and seemed strong and lively, and was not the size he wanted, my friend decided to climb the tree again and take it and the egg back to the nest. This he did and on the edge of the nest he found the head and front legs of a rabbit. Under the trees near by we found bones of animals, a dead field mouse and feathers of the ruffed grouse. We shall probably go there again in the course of a few weeks, and hope by that time the young will be the size desired, and that we will be able to shoot the old ones, as they surely are the sportsman's worst enemy. I am anxious to see whether the little one that fell from such a height is still living. Did any of the readers of FOREST AND STREAM ever hear that it takes a great-horned owl forty-six days to hatch her eggs? During our day's ramble we saw one live grouse and signs where several had been killed, probably by owls or foxes. We also found several new nests which we took for those of the Cooper's hawk, but none contained eggs. We also saw a red fox, another game murderer. O. B. H.

BETHLEHEM, Pa., April 10.

ODD HABITS OF ANIMALS.

Editor Forest and Stream:

I made, recently, at a meeting of the New York Academy of Sciences, some remarks on the habits of animals and send the following memoranda;

In an early Colonial book, "A New Voyage to Carolina," London, 1709, by John Lawson, Surveyor General, he records p. 125, "The fox of Carolina is gray with reddish hairs about their ears. They make a sorry chase because they run up trees when pursued." I cited a recent incident of a fox being shot in Pennsylvania in a tree, 30ft. from the ground, where he had taken refuge from the hounds. A clipping from the *Sun*, March 7, 1888, gives an account of a meet at Whitfield, near Dover, England, where "three foxes were seen to ascend a tree a short distance off. They were dislodged, one by one. The first made a ringing run and escaped; the second was taken on reaching the ground; the third with a good start led a ringing run and was eventually run into."

Dr. E. Percival Wright, Prof. University, Dublin, in his "Lectures on Animal Life" says, "The woodchuck of America (*Arctomys monax*) burrows in the earth, but ascends bushes and trees, probably, in search of buds and other productions on which he feeds." I have seen no such record in any American work on natural history.

Prof. C. H. Pettee of Dartmouth College has seen this animal repeatedly in trees, and I have other well authenticated cases. He is frequently found lying on the lower extended branches sleeping or sunning himself.

Fifty years ago the advocates of total abstinence argued that "no animal would taste alcoholic liquors," and the man who did so became *ipso facto* lower than the brutes. This has no basis in fact; Lawson says p. 121, "The raccoon is the drunkenest creature living if he can get any liquor that is sweet and strong." I observed Sept. 11, 1827 (with a large number of passengers returning from the Yale Commencement on the night steamboat to New York) a party of sailors just discharged in Boston from the frigate Constitution with a dog, the companion of their three years' cruise, who spent the night on the forward deck. They had a gallon jug of rum, and drank frequently of it. At each draft one pulled off his shoe and poured a liberal dram into the heel, which the dog lapped with a good appetite.

Twenty years ago it was common in central New York for the merchants to prepare hogsheads of black cherry brandy, rum and whisky, and the next summer to throw out the cherries in by places and even the road. The wandering swine of a village in Oneida county gathered around one of these heaps and gorged themselves, and were soon prostrate and disabled for a good while. This agrees with the account published in Howe's "Historical Collections of Virginia," p. 314, that when "Gen. Arnold captured Richmond, Va., in 1781, he poured out all the liquors found in the shops into the gutters, and the cows and hogs drunk them and went staggering about the streets."

A friend has recently related to me an incident that he saw several years ago in New Hampshire. A cow got into a cider mill, and drank so much new fermenting cider that she lost her equilibrium and fell upon her side as if she had taken champagne *more humano*.

The fondness of sheep for "kill-lamb" or wilted leaves of the kalmia or laurel, and of cows for those of the wild cherry are examples of peculiar or perverted tastes for injurious substances.

There is obviously a wide field for observation and study of the habits of animals, which would bring out interesting results and a new page in natural history.

NEW YORK. OLIVER P. HUBBARD.

DOMESTICATED WILD GEESE.

A FEW years since I wrote you that Mr. Norman Pomroy, living about three miles from this city, captured a flock of wild geese (*Branta canadensis*) by their entering his barn during a severe storm. To-day I was out for a tramp, and learning that I was within half a mile of Mr. Pomroy's residence, I concluded to make a personal observation of these birds. The young sons of Mr. Pomroy, seeing me on the premises with my gun, thought they would interview me, and when I made known my errand they commenced looking up the geese, a part of which were found in a shed under the farm impliments. They seemed to be more restless and pugnacious than the domestic bird. After watching them for some time, the boys took me down through the orchard, and, pointing into the stubble field adjoining, said there was a goose sitting on the snow, and proposed that we go out and see it. As we came near it I noticed that it was within an inclosure of wire netting, and was used as a decoy, to attract geese flying over. Pointing to tracks in the snow, one of the boys told me that yesterday three geese had alighted and stayed for some time. (Perhaps they were the same mentioned by "Cayuga" in the land-lord story in your issue of March 21). I had been told by parties before reaching Mr. Pomroy's that they had seen three geese flying about the day before, and they were, probably, the same the boys had seen about the decoy. Mr. Pomroy does not decoy them for the purpose of shooting them, but in the hope that they may be led into the barn by his domesticated wild geese, as these were by his domestic geese during the storm.

Mr. Pomroy's wild and domestic geese breed together, but he generally kills off the hybrids, and sells the surplus of the wild species for $10 a pair. At present he has sixteen of the *Branta*, and a few of the hybrids. They are now breeding, and on our return from the stubble field through the quince orchard I was shown the nests, on one of which was a hybrid laying her eggs. I was given a half-breed egg as a specimen for my collection, and promised one of the *Branta* eggs later in the season, the young man remarking that "after the wild birds commenced sitting there would be eggs that would not hatch." I wonder if this is so in the wild state?

After leaving Mr. Pomroy's, and about fifty rods from the house, I found two of his wild geese in the water by the roadside. I passed within ten feet of them, and they were no more disturbed than domestic birds generally are. They were beauties, and, had I not known that they were domesticated, I think that I would have been tempted to fire into them.

The first wild geese of the season were seen on March 13.

LOCKPORT, N. Y., J. L. DAVISON.

TROPICAL FRUITS AT LAKE WORTH, FLORIDA.—Dr. H. E. Van Deman addressed the Biological Society of Washington at its last meeting on the subject of tropical fruits introduced into the Lake Worth region, in Florida. After explaining the mildness of the climate because of the proximity of the Gulf Stream and mentioning the poverty of the locality in native fruits, which were limited to the papaw and the wild melon papaw, Dr. Van Deman traced the history and progress of the principal fruits which have been added to the flora. The cocoanut dates from 1860 (other accounts say about six years earlier), and ten or twelve trees of this age are now living; the tallest of them are 40ft. high. The ripening season is continual, and a tree will ripen from 200 to 300 nuts yearly. The principal supply for planting came from a wreck. There are now about 500,000 cocoanut trees from Lake Worth to the southern end of the State. The pineapple flourishes. Of the bananas the dwarf banana is the only successful one. The mango is said to bear well; sometimes the early blooms are all blasted for several years, but another set comes out the same season and the yield is good. The sapadillo resembles a russet apple and becomes a delicious fruit. The soursop and the sugar apple do very well. The guava, famous for the jelly made from it, has grown since 1860 and bears all the year. The tamarind thrives and produces fruit abundantly. Avocado pears give great satisfaction. The citrus family, including oranges and lemons, amounts to very little at Lake Worth, as the soil has become too valuable for such industry.

ANNUAL RING GROWTH.—At the last meeting of the Biological Society of Washington, Mr. B. E. Fernow, chief of the Forestry Division of the Department of Agriculture, read a valuable paper on annual ring growth in trees. Mr. Fernow stated that in a climate like ours, characterized by an alternation of seasons, including winter and summer, the annual ring is readily recognized and enables one to determine the exact age of the tree. Secondary rings are sometimes produced by an arrest of the regular progress of growth, but these do not mislead the close observer. The ring shows a notable demarcation into spring wood and summer wood, two elements differing in color and density, and contributing, when suitably combined, to beautiful effects in the arts. The density of the wood increases as the season advances, and growth ceases about Sept. 15. The width of the annual ring decreases with the age of the tree. It is quite practicable to count sometimes as many as 500 or 600 rings.

THE revised and abridged edition of the A. O. U. Check List of North American Birds, including the additions and changes made in the supplement, will be sent post free on receipt of 50cts.—*Adv.*

A CAPTIVE ROBIN.—*Editor Forest and Stream:* When out after English snipe at Flushing, L. I., on April 19, my attention was attracted by a bird fluttering at the end of a branch of a maple tree ahead of me. Upon a close examination I found it was a robin which was attached by one leg to the small twigs at the end of the branch. Calling a small boy, who with several companions was chasing the wily polywog in the neighboring pond, I got him to climb the tree and cut off the branch, which I caught as it fell. The robin had found somewhere a long piece of shoemaker's thread and had appropriated it for its nest. In some way this thread had become wrapped around the bird's leg, forming a single hitch above the foot and another around the longest toe. The long streaming thread had become entangled around the end of the branch and the struggles of the poor bird had only served to fasten it more securely. I found the thread had cut the toe to the bone and the bird had in its struggles so strained its leg, that it hung uselessly down when I released it. The bird's wings, however, were not injured, and the bone of the leg not being fractured, it probably recovered from the strain. What a meal a hawk would have had, had he happened along and seen the captive. —ROBT. B. LAWRENCE (New York, April 27.)

BIRD NESTING BOYS.—I wish that we had a game warden as energetic as Mr. Hague, our fish warden, one that would stop the killing of all kinds of game out of season as practiced throughout this and neighboring counties, the use of ferrets, and last, but not least, would put a chek on the small-boy-with-a-gun, who kills all kinds of birds in sight, and those young scamps who make it a business to gather birds' eggs. One of the latter, whose fond father looks upon him as a coming naturalist, boastingly told me he had gathered fourteen sets of the eggs of the flicker (*Colaptes auratus*), and that he had discovered two more nests to-day, but was so busy he could not attend to them before next Saturday. The flicker commonly lays six eggs, sometimes more. We will call a set in this case six. Multiply by fourteen and you will have some idea of the work our young naturalist (?) is doing. How can this be stopped? Our birds are almost all here, the Baltimore oriole being our latest arrival.—G. A. SCROGGS (Beaver, Pa., April 29).

FLORIDA BIRDS OF PLUME.—We learn from Dr. J. A. Henshall, who has just returned from Florida on the Fish Commission schooner Grampus, that all the plume birds were excessively scarce during the months of February, March and April and that they are permanently decimated by the slaughter for the market. He coasted along from the lower end of Biscayne Bay, through Card Sound, Barnes' Sound, around Cape Sable, the Florida Keys, and up the west coast to Tampa, everywhere observing the scarcity of birds. An occasional white egret was seen where he formerly met with thousands. Only two roseate spoonbills were noticed. White egret plumes that once sold for 10 cents each now bring a dollar, so rare have they become. Merchants have placarded the whole of Florida with directions for making, preserving, and shipping skins. Even alligators were uncommon, but this may have been due to the exceptionally cool weather.

BRANT IN MICHIGAN.—*Editor Forest and Stream:* On Nov. 8, 1888, John Boyse, a local gunner, killed at Monroe, Mich., a pair of brant, which were sent on to New York to be mounted by John Wallace. The said brant were examined by Mr. Geo. N. Lawrence, and pronounced to be the common eastern species (*Branta bernicla*). In a letter, dated April 12, 1889, Mr. Lawrence states: "I consider the brant to be, undoubtedly, the eastern species, which has been but rarely obtained in the interior." I believe in Herbert's (Frank Forester) time it was quite a subject of discussion whether the eastern brant was ever found on the Great Lakes, and, if I have been rightly informed, a wager was made that they never occurred so far away from the seaboard. Whether said wager was won or lost I never heard, however.—ROBT. B. LAWRENCE (New York, April 27).

WHALE AND KILLER FIGHTING.—On April 19, when Mr. W. A. Wilcox was returning by steamer from Humboldt Bay to San Francisco, he witnessed a lively fight between a California gray whale and a pair of supposed thrasher sharks. "We first noticed them a mile away, dead ahead, and passed within 15ft. of them. The whale was having a hard time to 'come to the scratch.'" It is probable that the opponents of the whale were killers, a species of *Orca*, whose high and narrow dorsal fins would naturally be mistaken for the long tail of the thrasher. This shark is much too small and insignificant to combat with a whale, but the killer is fearless, aggressive and powerful in conflict.

FOOD OF THE BULLFROG.—*Editor Forest and Stream:* April 20, while shooting bullfrogs for a mess of their hindlegs, we found in the stomachs of two of them a partly digested pickerel frog, at least a quarter the size of the bullfrogs, one of which was quite a large one, the other a medium-sized one. I considered it an unusual thing for the bullfrog to practice cannibalism, as I have always been told they were insect eaters only, and write this thinking perhaps it would bring out other notes on the subject.—E. T. J. (Bethel, Conn.).

ALBINO SQUIRREL.—Our correspondent "Mac," writing from Glasgow, Ky., under date of April 30, says: "On April 25 Mr. Morgan Brents, a Louisville sportsman, killed a male albino squirrel. The specimen has been forwarded to a taxidermist and will be mounted. This is the first albino squirrel killed here since 1848." We should be glad to know what kind of a squirrel it was.

BIRD NOTES.—*Editor Forest and Stream:* Since my last letter the following birds have been seen: April 15, Wilson's snipe; 18th, kingfisher; 19th, black-throated green warbler; 20th, chipping sparrow; 21st, field sparrow; 22d, barn swallow, chimney swallow, bank swallow, hermit thrush and summer yellowbird; 25th, nighthawk—P. C. (Concord, N. H.).

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price $2.50. For sale by FOREST AND STREAM.

Game Bag and Gun.

WITH THE CRESTED QUAIL.

I USED to think that the population of Arizona consisted principally of rattlesnakes and scorpions, centipedes and tarantulas; while its climate was well described by that old chestnut of the Yama soldier, who died, was gathered in below, and the next morning was obliged to telegraph back for his camp blankets. After being here for six months I find that quail should be substituted for snakes, and ducks for the rest of the varmints; while the climate is as far superior to that of southern California as my new hammerless is to a revolutionary musket.

I am a member of what the innabitants designate "the one lung brigade," and whom they treat with the greatest consideration, there being hardly a day but I am taken by some one for a shoot or a drive. Last New Years I had my first try at the crested quail, having been invited by a Mr. Elder to join himself and a few friends. The programme included a lunch at his ranch, about two miles from town, after which we were to hitch up four-in-hand to his big wagon and spend the afternoon in the sage brush on the desert. The lunch was a grand success, especially to one like myself, who had been living in a Chinese restaurant at two bits a meal and where the choice of napkins was limited to the corner of the tablecloth or the back of one's hand. From my seat at the table I had a full view of the barn and the man hitching up our rig. Suddenly I saw him go flying about six feet through the air, while the right wheeler, who had been the propelling power, attempted a back somersault, landing both himself and mate on their backs, breaking the pole short off, and making things generally pleasant all around. These native ponies are not always to be relied upon. The others rushed to the assistance of the man, and peace and order were soon restored, but I stayed to protect the ladies and the lunch.

Of course this knocked our four-in-hand in the head, but Mr. E. hitched up one pair to his buggy and taking me in that and leaving the others to come in the farm wagon, we were soon in the brush with quail on every side. Dogs are absolutely useless, except as retrievers, the birds refusing to lie at all. He hitched the team to a mesquite stump and then for an hour we had a fine time; we crawled up ditches on our hands and knees, dodged from bush to bush in the most approved Indian style, and at the end of that time I had a lame back, my clothes covered with dirt and one quail. This was aggravating, as we could see and hear hundreds of them, but their lungs were better than mine, and they could run two yards to my one. We went back to the wagon, and after driving some minutes in silence Mr. E. remarked, "The last time we shot over this team they cleared the traces, but if you wish to try it, bang away." It was his team, not mine, and if he could stand it I rather guessed that I could, and so slipping in a couple of shells and praying that I would land in a sand heap and not in a cactus bush, I waited my chance. Mr. E., who is a man of great strength, took a fresh grip of the reins and nodded to my left, where I saw about twenty quail some forty yards away, making tracks at a rate that would have done credit to a fox-terrier chasing a Hempstead rabbit. I let them have it right and left, getting two with the first and one with the other, and was greatly surprised to find myself still sitting in the buggy. The horses had given one grand plunge, tried to stand on their heads and then gave in beaten. After a few more rounds they really seemed to enter into the spirit of the thing themselves and would stop short at the report. For the next hour we took turns driving and shooting, and such sport I had never seen before, the birds being as thick as the sparrows in Central Park. At the end of that time we counted up thirty dead birds, including a few doves, and started for home, arriving tired and hungry and just in time for the best dinner I had seen in weeks. Some of you may think that this is pot hunting, but you will find that hitting a running quail from a moving wagon is not so easy as it looks. In my next I will tell you of my first attempt at duck shooting by moonlight. PHŒNIX.

A HUNT IN ARKANSAS.

I HAD made up my mind that I must kill a deer, and on my return from duck hunting on the Illinois River, in the spring of 1887, I proposed to S., one of our party, that we build a boat, and float down the Illinois and Mississippi Rivers to Arkansas. There we might have a chance at something larger than snipe and ducks. S. remarked that he always had had a desire to take a trip of that kind, but could never find any one to go with him. So it was settled that we go the following fall.

We at once began to get our duffle ready, as we had but seven months of time before we intended to start. Both of us being what the world calls poor, we had to contrive to make our limited means go as far as possible. We built a boat of weather boards, 16ft.×54in., to carry us and our outfit. We had two of the things most despised by "Nessmuk," namely, a wall tent and camp stove. I never want to go into camp for a week or more without the stove. Ours was 14×24in. on top, 10in. deep, with oven 10×14in., which, with four joints of telescopic pipe, made a very complete stove for four or five persons. Besides the tent and stove we had the usual cooking utensils, an axe, hatchet, saw, pliers, a bag of nails, tacks, rivets and wire, needles and thread, buttons, fishing tackle, two double-barrel shotguns, one .22cal. rifle and ammunition, and four dozen steel traps, which, by the way, I was not in favor of taking; then there was our bedding and extra clothing, gum boots, and about 200lbs. of provisions. We started from here at 4 o'clock on the morning of Oct. 5, going by wagon to Frederick, a small town on the Illinois River. Arriving there that afternoon, we pitched our tent, and got everything ready for an early start down the river next morning.

Daylight found us packing our outfit in the boat, and we had a large load when we got everything in and took our seats at the oars. We had one set of bow-facing and one of common oars. At 11 o'clock that day we camped at the mouth of Crooked Creek, five miles below Beardstown. We camped here a day, but as the weather was very warm we concluded to strike out down the river at once. For the next ten days we rowed each day until tired, then camped on shore, rested and ate, especially eat. Arriving at St. Louis, Mo., at 11 A. M. on the 13th, we concluded we had enough rowing, and secured passage on the City of Vicksburg for the mouth of the river we were bound for, in Arkansas. Leaving St. Louis at 9:30 P. M. of the 15th, we arrived at our destination about 4 o'clock on the morning of the 21st, it having taken us five days and six nights to make the trip on account of the low stage of water. Tired of steamboat life and ready to again "paddle our own canoe," we started up river, but only succeeded in getting eleven miles up it that day, the river being very swift here. On the following day we succeeded in getting up river about thirty-five miles to our permanent camping ground. Here we camped on the bank of the river and about half a mile from a series of lakes, around which we saw plenty of fresh bear and deer signs. Several days were now spent in fixing up camp, setting traps and trot lines and enjoying a free woods life.

We had plenty of ducks and squirrels, but had seen no deer, until one morning I went to the upper end of the lakes. I had walked up the dry bed of a slough about a quarter of a mile, when I heard something running in the brush, which was here quite thick. I stepped behind a tree, slipped two shells loaded with buckshot into my gun, and waited what seemed to me a half hour, but was perhaps a minute or so, when a young buck emerged from the brush and stopped and looked at me. I gave him a load of No. 7 buck in the head and neck, and he dropped in his tracks. I ran to him—or rather stepped, for I think I covered the 25yds. at about two steps—put my foot on his shoulder and bled him. As the knife entered his neck, he rolled his pitiful-looking eyes to mine, and I was sorry that I had shot him. But only for a moment; then the instinct of the hunter made me rejoice in my triumph. After admiring him as he lay for ten or fifteen minutes, I shouldered him as he was and carried him about two miles to camp, arriving there covered with glory and blood.

After that I hunted but little, but saw plenty of sign of both deer and bear, and some six or seven deer.

My partner S. getting tired and wanting to see wife and baby, we only stayed about a week longer, living on the fat of the land, venison, duck, snipe, catfish and squirrel. As to the latter I differ with "Nessmuk" as to how to skin a squirrel easily. My way is to cut through tail from under side close up to the body, leaving only the hide on top side, then put my foot on tail, take him by hindlegs and pull, when the hide will part on belly, take this by point and pull and the skin will come off in two parts, leaving the body free from hair. Try it.

On the morning of Nov. 3 we broke camp, pulled to the mouth of river, and took passage home. I was homesick for the camp before I got on board the steamer, and promised myself that I would go again next fall and stay longer. I am going again next fall if I can get a stayer or two to go with me. I think I can get more than one deer and perhaps a bear.

A word in regard to best gun. After two trips south, missing several good shots and crippling one or two deer with a shotgun, I have decided to use a rifle for large game, as being surer to kill and giving much more satisfaction to the user when he does kill. EN AMI.

MACOMB, Ill.

LAST SEASON IN KENTUCKY.

Editor Forest and Stream:

More attention has been given to hunting and fishing matters in the "dark and bloody ground" during the past year than perhaps ever before, and it is now quite the proper thing to have a gun and a dog or a rod, and be well up in the laws of both sports. Gun clubs are being organized all over the State, and Capt. G. G. Berry, right hand man of Griffith & Semple, dealers in all manner of sporting goods, says that a great deal of hunting is being done all over the State, and small game is to be found in abundance.

In eastern Kentucky and in the Green River region birds were very plentiful, and great sport was had. A party consisting of Capt. G. G. Berry, his brother, Lieut. Com. R. M. Berry of the United States Navy; Mr. James O'Bryan, and Mr. R. W. Crabb of Uniontown, Ky., shot last winter about Alligator Lake, Miss. Alligator Lake is eighty-seven miles below Memphis on the Newport News & Mississippi Valley Railroad, and is a favorite hunting ground with Louisville hunters, who are old enough in the business to be known as professionals. Capt. Berry, who is, perhaps, at the head of the lovers of the gun in the Falls City, goes to this famous hunting ground each year in search of bear, but last year he was kept so busy selling guns and gunning paraphernalia to hunters that he was unable to get away in time to meet bruin. The party came back home, however, triumphant with eight handsome deer, a number of wild turkeys, and a great load of ducks and squirrels. They had much trouble with their dogs, or the results would have been even better.

Dr. Dudley S. Reynolds and Dr. Allen Kelch, who are as handy at the trigger as they are with a patient, were out on the new Louisville, St. Louis & Texas Railroad, about fifty miles from Louisville, and had great sport. The country is new and is full of the small game so eagerly sought by Louisville nimrods, and Judge W. B. Fleming, Kentucky Railroad Commissioner, averaged thirty-six birds a day for the five days he gunned. Mr. M. J. Burke, of the Louisville, St. Louis & Texas road, and Dr. Austin B. Alexander, were also out on the line of the road, and brought in some handsome birds. About Pineville, Beattyville, Winchester, Uniontown, Richmond, Nicholasville and other Kentuckey towns the sport was finer than for a dozen years, and hunters were not slow to take advantage of the fact.

The extremely light winter has made fishing very good for the season, and on the Falls here, along Green River, and at and near Pineville, some good catches are being made. Sporting goods dealers anticipate an unusually good season, and are making preparations to handle an increased stock. The Uniontown, Ky., Hunting Club has now one of the best club houses in the South, and it is the pride of all who are fortunate enough to be interested in it. The members are Capt. G. G. Berry, Dr. C. W. Kelly, Judge W. B. Fleming, Mr. John G. Roach, Dr. Arthur Peter, Mr. Joseph W. Davis, Mr. James O'Bryan and Mr. Paul Cain. The club house is very handsomely and conveniently equipped, and is about two miles by land and three miles by water from Uniontown. It is situated on Hovey's Lake, which is owned by and named for the present governor-elect of Indiana. In high water the lake may be reached by boat, but in low water only by land. The location is the very best, and the duck shoot-

ing in the vicinity in season is said to be fine. Small game there is always plentiful, and when the members go down each year for a two-weeks' stay they have a royal time. There are other clubs of the kind in the State, but none on quite so elaborate a scale. Among them are the clubs at Winchester, Georgetown, Owensboro, Lexington, Pineville and Mt. Sterling.

Good dogs are in great demand here now, and those who own them guard their animals as if they were made of gold. There are many hunters who would buy a good pointer or setter, and pay a good figure for the right kind of animal, but prevalent ideas here are that they are very scarce. H. H. B.

LOUISVILLE, Ky.

SHOOTING, PUBLIC AND PRIVATE.

Editor Forest and Stream:

I have been much interested in reading the articles in your paper descriptive of the shooting clubs of Chicago and the resources for sport at their command. The more I read up these matters, however, the more I become convinced that not many years hence the average sportsman will have mighty little use for a gun, except possibly to pelt away at clay targets or other inanimate objects. Why? Because all the available shooting territory will be in possession of the city shooting clubs. Now, there are hundreds of the best sportsmen in our land who live outside the limits of the cities, and who are the peers of any that live in any land under the sun, and who would scorn to do an injury to the property of any man while out for a day's sport with the gun or rod; yet let one of these men set foot upon the marsh owned by some ducking club, and straightway a game constable is after him as though he were a villain of the deepest dye. Now, this may be all right from the club men's standpoint, but to the rest of the world outside it looks a little selfish. I will admit that if a party of gentlemen should club together to restock some certain tract of land with game birds, such as quail or grouse, it would be a gross injustice for other parties to shoot their birds; but with the duck, snipe and woodcock, who are here to-day and yonder to-morrow, it is different. God created the game birds for the use of mankind, and why a few should get them all and the majority none is a question not easily answered. If club men see fit to purchase land, and erect a club house for their accommodation in a game country, why, that is perfectly proper, but they ought to be willing to take their chances with the rest of the boys while out among the marshes. No decent man would think of invading the immediate grounds of the club house without invitation, but a mile away among the reeds and rice one man is, or should be, rather, as good as another. Take for example the St. Clair flats, when one gets up above the line of club houses along the channel the lake is covered in every direction with patches of rushes, and every little ways you will see a notice posted on a stake forbidding any shooting. Now, who put up these notices? Why, the club men, of course, you say. Well, who do the club men derive their authority from, pray tell? The Canadian clubs lease from the Indians on Walpole Island, but on our side of the channel the clubs have taken things into their own hands and posted notices just where they please, and they will keep you off, too.

Now perhaps this is justice and all right, but I fail to discover wherein. As to the protection part of the matter, I am unable to see what the difference is between ten men killing a hundred ducks each, or a hundred men killing ten ducks each. There is a difference, but it is not apparent to the ducks probably; my experience has been that the more shooters on a ducking ground the safer the ducks. One thing I do believe, and wish I might see it come to pass, that no man should be allowed to sell or barter away any of the game birds of which he may become possessed. If there was no market for game, men would know when they had killed enough. I have done such a thing in years gone by as to hunt a little for market, but the teachings of FOREST AND STREAM, and the fear of soon becoming a "bloated bondholder," have shown me the error of my ways, and I am contented now if I get enough game for a good square meal. CHIPPEWA.

SEVILLE, O.

TEN DAYS IN CAMP.

Editor Forest and Stream:

Last fall I spent three days out in my shooting territory. I call it mine because I go there every season. I find a great abundance of game left. I flushed four coveys of quail, containing at least eighty birds in all. The dog treed twenty or thirty squirrels, and jumped a number of rabbits. I look forward to good fall shooting. There are two bunches of wild turkeys there, one of eleven, the other thirteen. They were seen early in February and looked fine and bid fair to furnish a goodly number of young for the fall shooting. They will increase in spite of the gunner, as they know how to take care of themselves in the wood, and it takes a man who understands his business to get one. There is plenty of mast in the wood, especially among the back timber.

On Oct. 15, 1888, Jim and Frank packed tent, guns and provisions on Jim's buckboard, to which was hitched his mustang pony. Frank took the train and met Jim at the station, ten miles distant from town. A drive of eight miles more took them to Basil's, where George put in his appearance, and, exchanging the pony and buckboard for mules and heavy wagon, we started for the old camp ground. On the way enough game was killed for supper, but we had pork for breakfast.

What pen can describe the beauties of the woods in lovely October, and after a year of close attention to business I am sure we all enjoyed it to the fullest extent, taking in great draughts of the life-giving pure air far away from the strife and turmoil of city life, and the strain and vexations of business. We killed enough game so that we always had meat in camp, fish and game, and a good many of our friends at home had game on their tables, where game is usually very scarce. Ten days of that kind of enjoyment brought us both home again with a new lease of life, and better morally, mentally and physically for having had a closer communion with mother nature.

We killed 157 head of game, caught some nice fish, no accident occured, and on the whole had a splendid time.

IRONTON, O. D.

RIFLES FOR SMALL GAME.

Editor Forest and Stream:

I read with much interest in a recent issue of your valuable paper of "Byrne's" luck shooting game with a .22cal. rifle. My experience has been very much like his, both in northern Maine and in Hillsboro county, Fla. In the latter country rice birds, mourning doves and quail were the only birds I was sure of with the .22cal. On several occasions I shot at wild pigeons, and saw them fly away, apparently unharmed, but found them afterward with a bullet hole completely through the body. I killed four alligators (one of them something over six feet in length) while there, the first shot being placed in the eye, and with the short cartridge. I have put no less than nine bullets through a gray squirrel in the top of a tall pine before bringing him down. This does not speak very well for my shooting, but I did not seee his head at any time long enough for a shot. It was no use at all to shoot at herons and buzzards.

I used a 15in. Stevens bicycle rifle, chambered for the "long rifle" cartridge; which, by the way, gave me no better satisfaction than the ordinary long. In most cases where I took the "long rifle" from the gun, I left the bullet sticking in the chamber. I have never used either of the .22 center-fire cartridges. They must be very good for target purposes, but unless one is good shot enough to take heads at all distances, I don't think them much good at even small game.

I have now a Stevens .32-40 range rifle, rigged fore and aft with Lyman sights, and though I do not pretend to be much of a shot and never but once tried my hand at the Creedmoor 200yds. target, on a regular range, I have never been beaten at long or short distance since I owned it. But I lay about as much to the Lyman sight as I do to the excellence of the rifle. Last fall we had a three days' hunting match here in the Dead River country, and I had a chance to test the merits of the sights in wood and field, in light and in shade, and I like them so well that a man couldn't give me the best rifle made, for my own use, with the ordinary crotch-sight on. I have never tried the .32-40 on deer, or in fact on anything larger than foxes, but I find it very satisfactory, except that it tears small game pretty badly if shot in the body. I mean to try a light powder charge and round bullet, at short range, on grouse and squirrels. Perhaps some of the readers of the FOREST AND STREAM can give me their experience with round bullets in a .32-40 through your columns.

The favorite hunting rifle here seems to be the .38-55 Marlin. A guide here at Eustis named Emery, while hunting deer in the fall, came upon four bears. He had only seven cartridges in his Marlin, but he succeeded in killing three of them and badly wounding the fourth. It being late in the afternoon was all that prevented him from gathering the last one. But for killing power on big game I think there is no cartridge equal to the Government .45-70-405. LYMAN SIGHT.

EUSTIS, Maine, April 29.

SMOKY FIREPLACES.

WILL some kind reader of FOREST AND STREAM give me the dimensions of an open-hearth fireplace that will burn cordwood and not allow the smoke to escape into the room? At our club house we built an open-hearth fireplace that smoked so badly that we tore it down. We rebuilt it, and the second smoked as badly as the first. We then built a new hearth on the west side, the first and second were on the south side of the house. The third smoked so badly that we tore it down and rebuilt it, and that one is but little improvement on the other three. It will smoke. Will some one who knows how tell me how to build an open-hearth fireplace that will take all the smoke up the chimney? KEOUK.

[It is assumed that Keouk's inquiry refers to a one-story house. This being so, let him build his chimney five or six feet square on the inside, carry it up square to the spring of his gable, leave the opening into the club house five feet high, arching the open side if he likes. At this height the opening at top may be contracted eighteen inches each way, and the chimney sloped upward from that to the top of the roof, at which height the opening may be reduced to a foot square. Then raise the chimney another four or five feet without reduction. The hearth should be raised six inches in front, sloping back to nine or ten inches behind, and if a piece of grating or a few iron bars are available, it is better to have a portion of the hearth for an ashpit and draft, laying the grating or bars across the vacant strip, which may extend from the front to three or four feet back. Finally a curtain is wanted to contract the square opening into the room by reducing its height. This curtain may be of tin or sheet iron, the width of the fireplace, and from eighteen inches to two feet deep, and should be tacked or nailed to the top of the opening. If this opening is arched, the curtain is simply required to span the upper arc of the arch. Perhaps a curtain to his present fireplace and a flour barrel on top of the chimney for draft would do it.]

WHAT YOU'RE USED TO.

THERE has been more or less discussion in your journal as to the relative merits of rifles, as to weight of lead, the amount of powder to be used to propel it, size of bore, height of trajectory, etc. This discussion has been going on to my personal knowledge for twenty years, and ardent sportsmen are still unsatisfied. Now, is there not another side to this question? We, of course, know that a good workman with good tools can do marvelous things, but can an indifferent mechanic work with the good man's tools? May he not be able to do better work with the tools that he is used to?

A long-range globe-sighted rifle in the hands of a marksman can be made to run up a score of bullseyes down a firing range, but will it in the timber do better work on deer than a bored out musket loaded with nine buckshot? The size of your game bag, or rather bag of game, depends a great deal on the knowledge of the firearms you're used to. An estimable English lady who came to Canada some twenty-five years ago was one day deeply interested in getting out the family washing. She had sheets and tablecloths out drying, when to her horror she saw the line go down and her spotless clothes trampled in the dirt. A large buck caught by the antlers was the cause of the trouble. There was not a man within five miles of her — they had all gone to a neighbor's for the day. She screamed, and the deer, the more he plunged the tighter he got wound up, and the louder she yelled. Something had to be done and done at once. She had a fine gun in the house, loaded, but she would not approach it, as firearms were her special dread. Among her many possessions she had a large pair of tongs—fire tongs—that she had brought over with her. She thoroughly understood this firearm, and with all her housewifely instincts outraged, grabbed them and sailed in. She had her clothing slightly torn, but within five minutes they had venison; she literally pounded the buck's skull to a jelly, after which she told me she sat down and had a good cry. It all depends on what you're used to.

Her nephew, aged 14, within a week killed a doe with a charge of No. 8 shot, fired from a converted flintlock musket, certainly as ugly a looking weapon as I ever saw, but it answered all the purposes of a modern repeater. The boy was used to it.

Game is growing scarcer and the means of destroying it improving day by day, and I want to say to my fellow sportsmen if you want to get any game while it is going, stick to the gun that you are used to. TEALY.

THE SEASON NEAR ST. LOUIS.

ST. LOUIS, Mo., May 1.—*Editor Forest and Stream:* The closing scenes in the drama of field shooting were witnessed in this locality last week. All the ducks, with the exception of a few wood ducks, have skipped for their northern breeding haunts. Wood ducks in good numbers breed in this locality, and about August splendid sport may be had on them.

Sniping has been slow and of very little interest during the week. Quite a number of the sportsmen have been out in quest of them, but as a rule the bags made were small, and many of them vow they shall not make another effort this season to bag any more. It was hoped that the past season would be an exceptionally favorable one for the birds, but it proved just the contrary. The marshes were, with the exception of a week, in most excellent condition, and before the birds began to make their appearance the sportsmen were in high glee over the prospects of the sport in store for them. Why the birds failed to come this way is a question very difficult to answer. Old sportsmen who were seen and questioned regarding it, simply shook their heads and said nothing. Large shipments of birds were received by the game dealers in this city from points south of here, and there was every reason to feel certain that they would come through here and also tarry long enough to furnish a little sport to the anxious sportsmen. A few fair bags were made during the season, but the amount does not compare with what was customary for this locality. What birds are coming to this market now are from points several hundred miles north. UNSER FRITZ.

PENNSYLVANIA GAME EXTERMINATION.—*Editor Forest and Stream:* A few instances of the way game is being destroyed in this neighborhood have come under my observation since January 1, in conversation with a young man who lived near. I saw four boys with a dog, going into a piece of woods where in season I had shot at quail, grouse and rabbits. Seeing something that resembled a gun barrel in one of their hands I said: "Are those boys hunting?" "Yes," said the young man, "that dog will run rabbits, and when they are holed they dig them out with that hoe or crowbar, that you imagine is a gun, and in this way they furnish meat for the family as long as they can find rabbit, coon or woodchuck. Not many years since a number of unprincipled sportsmen residing here kept and made use of ferrets, which, when under control, will clear out rabbits faster than all the breechloaders in existence, and when allowed to escape and roam at large work incalculable destruction among our game, both fur and feathered. One year ago a neighboring farmer shot a ferret near his barn. Passing through his woods a few days since, under a ledge of rocks he discovered the half-devoured body of a ruffed grouse. A few inches off a crevice in the rocks showed the den of the slayer, a fox, as he supposed. Procuring a dynamite cartridge he tried to dislodge the occupant, but rending asunder the rock disturbed him not. A steel trap was next tried. For two nights it was pushed aside, but on the third night the trapper was successful and the murderer was caught. "What do you suppose it was?" said my farmer friend. "A fox, of course," was my reply. "No sir," said he, "it was another of those miserable ferrets that was left or got away from its owner last fall, and has probably killed most all the birds and rabbits my woods harbor, as I have not seen nearly as many recently as at the end of the shooting seasen." Our game warden has been looking for some of these ferreters the past autumn, but failed to make a case so far. One case that has come to my knowledge illustrates what can be done with ferrets. Three miles from this town there lies as fair a little valley for game as a sportsman could wish for. Five years ago its timber and brush piles were alive with cottontails. Every brush fence was a nursery and every other brush heap contained a rabbit. In this valley lived a farmer having a son who was unable to keep up his end at hard work, being partly crippled. They procured a ferret, and the boy brought rabbits to the game dealers here by the hundred, many being kittens or only half grown. To-day not a cottontail is to be found in the neighborhood for a radius of some miles. They have been completely cleaned out by ferrets. A few ruffed grouse are left, but by importing a Connecticut bird snarer the work of extermination would be complete.—W. P. D. (Towanda, Pa.).

SPRING IN NEW BRUNSWICK.—Mr. Orr informs me that the flight of wild geese over the country between the Nashwalk and Miramichi rivers has been very large this spring, and that these birds alighted and fed much more than usual on the high lands. Two were caught there in steel traps set for them in the fields; one of these, which turned out to be a bird in good condition, had its leg broken by the trap and consequently had to be killed, the other is now a captive and is walking about with its wings cut as contentedly as one could expect to see a wild goose in captivity.—EDWARD JACK (Fredericton, Can.).

FOREST AND STREAM, Box 2,832, N. Y. city, has descriptive illustrated circulars of W. B. Leffingwell's book, "Wild Fowl Shooting," which will be mailed free on request. The book is pronounced by "Nanit," "Gloan," "Dick Swiveller," "Sybillene" and other competent authorities to be the best treatise on the subject extant.

CHICAGO AND THE WEST.

CHICAGO, May 1.—Three weeks ago, when Mr. L. R. Brown was out on Mak-saw-ba marsh, he jumped a mallard hen which appeared to be crippled, and which fluttered off over the reeds not very far in advance of him. Mr. Brown fired at the bird with snipe shot, but says that the instant he pulled the trigger he knew she had a nest and was trying to lead him away from it. Fortunately he did not kill her and a few moments' search discovered the nest, which contained twelve eggs. These eggs were taken to the house and are now under a domestic hen.

Mr. R. B. Organ says that he lately saw a female bluebill in the same marsh which was acting very much as Brown's duck did, and he is satisfied she had a nest. I have never heard of the actual discovery of a bluebill nest in this country, although many other ducks nest on the Kankakee, especially the mallard. Mr. Henry Sloan tells me that he once, by means of his hunting dog, discovered four ducks' nests on this marsh in one day, for a friend who wanted to raise some young wild ducks. The dog pointed the nest just as he would a bird.

Snipe shooting goes on unabatedly, and nearly everybody is getting plenty. Mr. J. A. Sharp and a friend got seventy in a day near Winter Valley. Mr. Joel A. Kinney got thirty-two at Mak-saw-ba, and other bags of like size have been so common that I forget them. Plover and snipe have been very plentiful west of Morgan Park, beyond the Sag. The birds are in wonderfully good condition.

We are all getting tired of shooting out here for this spring, and talk turns toward the trap and the coming State meets. Fishermen are growing impatient. The ice is reported nearly out of Eagle Waters, and the season will begin up there a month earlier this year than it did last.

I was talking the other day with a few friends prominent in sporting circles here, and we fell upon the subject of an inter-State game law. All agreed that some such measure was the only thing which would ever really and practically solve the question of game protection. "It might be called visionary," said one, "but so has nearly everything else been called visionary which has ranked high in the field of actual accomplishment. For myself I do not see anything impossible in some such project for keeping the great game markets closed at the same season. Of course, an iron-clad law establishing the same season throughout all the United States would be impossible and undesirable; but suppose we had a sort of Congress of sportsmen, delegates from the different States or State associations: and suppose this Congress should draft a wise and conservative measure which should promise the greatest good to the greatest number; suppose the close season should be established for any given bird to run not between any rigid parallels, but between lines which would vary as the isothermal lines do, running north or south to cover the needs of any certain State, but preserving a general regularity; suppose the whole country were to be thus mapped off, and each State to accept the decision of the Assembly as to the game law which would be best for it and all the other States, as applied to any given bird or animal. Then let the other birds and animals be taken up in the same way. For instance, let duck shooting be sought to be stopped clear across the country between the arbitrary lines above mentioned, between certain dates. Then, after the general idea was mapped out, and the definite law for each State suggested, let the delegates return and let each lay before the sportsmen of his State the measures thought desirable. It would then be left a question of local work; and if sportsmen can accomplish anything at securing game legislation, I am sure I do not see why they could not ultimately accomplish the success of such a measure, founded as it would be in a general good sense. If we could do something like this we might be satisfied. Then we would have really protected the game, and would no longer hear the old selfish cry, 'If we don't kill the game some other State will.' I am tired of hearing that—and of feeling the truth of it."

There is enough in the above words to offer food for thought, if not for action. For the truth of the main predication, that we will lose our game or form a general law of this sort, nothing will speak so plainly and so rapidly as the events of the next few years. It is too plain already that the game is going, everywhere, rapidly, unmistakably. He may be visionary who expects to see these States forget selfishness and join in a general measure to protect the game, he is far more visionary who expects to see the game last under the present measures of so-called protection.

The jacksnipe and plover have been giving our folks a mighty good lot of fun for the past week or two, and have brought into temporary vogue, at least, a little of the decadent sport of upland shooting. The birds seem to be pretty much all over the country, and are found by nearly every party that goes out. Water Valley reports numerous big bags, and the shooting at jacks must have been good there this spring. Mak-saw-ba marsh also looms when it come to jacksnipe this spring, and nearly all the shooters who have been there lately have some account to give of themselves. Mr. Wm. Mussey last Saturday bagged a dozen golden plover in a desultory sort of way, while Messrs. R. B. Organ, J. A. Sharp, J. C. Hayde, John Walson and another gentleman, who took the club wagon and went out for plover, had a lot of fun. Mr. Watson got a nice bag of snipe, Mr. Organ brought in forty odd birds, golden plover, upland plover and snipe. The other gentlemen of the party also did well.

Mr. George Airey got 15 jacksnipe along the Sag last Friday, and earlier in the week Mr. Charles Iglehart and a friend got 42 sand snipe (gray plover) and a few golden plover over in the same direction. On last Saturday I made a flying trip over in that country, which is but four or five miles west of my home, and got 10 snipe and plover. I found the jacksnipe so fat they could hardly fly. When they did get up, they flapped along slowly, unable to utter more than an apoplectic squeak, quite unlike their usual defiant note. I found it no trouble to kill ten straight. On the table the birds were the best I ever tasted. The skin was underlaid with a layer of fat a quarter of an inch thick.

Mr. Wm. Payson, alias Billy Payson, started last Monday night for Joliet, Ill., for a whirl at the golden plover. The prairies around Joliet are fairly alive with these birds, and two guns have made bags of 200 and 300. The method of hunting is with a team, and the shooting is done largely from the wagon. The birds will not often allow the shooter to approach close enough on foot. No. 7 or No. 6 shot is usually found to be best, as the flocks often start at 50 and 60yds. distance. This bird—known as "bullhead" in the South—is a big and beautiful bird, the breast being black and the back shot full of little golden scales. It is by odds the best of the plover family, and is usually preferred here to the jacksnipe.

The jacksnipe had not at this writing made their appearance to any great extent about Fox Lake, but they are leaving the lower marshes very rapidly. Let them go. We have all had fun enough out here this spring, and ought to think of seasons yet to follow.

May 2.—The wiseacres may once have been right who pictured the sportsman as a lazy, ne'er-do-weel with no love or energy for the ordinary work of life; but the pictures they once drew are in sad lack of accuracy now. Our best men are proud to be held sportsmen to-day. I am started on this reflection by the morning paper, which announces the confirmation of Col. Jas. Sexton as postmaster of Chicago. "Col. Jim" Sexton is one of the best and heartiest sportsmen of this city, and ever since his name was suggested for the place, the boys have hoped he would get it. Indeed among the boys there may have been some who could help a little, for Chicago draws her shooters from the best business classes. Col. Sexton is a member of the Cumberland Duck Club, and it is to be hoped that he will hang out at his new office a regular bulletin, announcing the condition of the flight. He can draw trade in that way.

I have been interested of late in that always interesting study of tracing the circulation of a big paper. I never could help wondering where a big paper goes, who takes it, what each subscriber looks like, what he does for a living, and what is the prevailing color of the hair in his family. I have been unable to learn the color of the hair of all the readers of the FOREST AND STREAM, but I find that the paper goes pretty much all over this city in its weekly tide. There are, however, certain whirls and eddies in this tide, wherein lurk numbers of the largest and most sagacious of our sportsmen. For instance, I learn that large numbers of FOREST AND STREAM go into our City and County building. The Sheriff's office, the Probate Court, the Coroner's office, the Fire Department, the Comptroller's office, and I doubt not many others unvisited, all show goodly numbers of the paper with the mist-colored back, and there seems to be a sort of contagion about the thing. The great Board of Trade building is another hive of sportsmen. Run a net through there and you will catch a lot of shooters and fishers, and many who have seen sport at its best in all corners of the world. FOREST AND STREAM is as much a necessity in there as the daily market report. Our big wholesale houses make the next best showing.

Such comment is *apropos* of nothing in particular except to the bygone notions of the back-number wiseacres, who will, I hope, all note it. I wish to say that if you see a tall, hearty-looking man, whose clothes fit him, and who tells the newsgirl on a cold day to keep the change, you mostly see a mist-colored paper in his pocket; while, on the other hand, if you note a man bent and crabbed, with a paralyzed umbrella, and who loses a train waiting for a cent in change, you don't see any such paper in his pocket. I calls no names, and I draws no lines. All I have to say is, that it is plain that all good sportsmen finally become happy and prosperous, while all who are not such are destined to sink into a peevish, obscure and unhonored future. The moral is too plain to need any further pointing than that. E. HOUGH.

IT GOES EVERYWHERE.—*Editor Forest and Stream:* My hatchet, a sketch of which you kindly published Nov. 22, 1888, seems to be the "long felt want" of a goodly number of brother sportsmen, if I may judge by the number ordered from all parts of the United States, including the four new sisters and the two Canadas. Permit me to congratulate you on your widespread circulation, and to offer as proof part of a letter received a short time ago: "Pay Examiner's Office, No. 2 Koyla Ghat Street, Calcutta, India, Feb. 11, 1889. * * *Dear Sir:* I have seen the sketch of your hatchet in FOREST AND STREAM of Nov. 22, 1888, and prompted by what you say in same, write to ask you to kindly favor me by sending a hatchet such as you use yourself. * * From the sketch I am of the opinion that it would be a most useful article for camp life in India. * * Signed, —— Major Calcutta Vol. Rifles." Our postal union allows but 4oz., but fortune favors the brave, and in August a good missionary will leave our town for his post, Allahabad, India, with the Major's little hatchet in his grip. I find I will have to patent the hatchet to protect myself.—G. A. SCROGGS (Beaver, Pa., April 29).

THE NEW JERSEY GAME LAW.

THE new game law of New Jersey, just signed by the Governor, provides:

That hereafter it shall not be lawful for any person or persons to capture, kill, or have unlawfully in possession after the same has been taken or killed, any quail, commonly called partridge, or any ruffed grouse, commonly called pheasants, or any rabbit, except only between the last day of October and the sixteenth day of December in any year, under a penalty of $20 for each quail, grouse or rabbit so taken, killed, or had unlawfully in possession.

That no person or persons shall take, kill, or have unlawfully in possession after the same has been taken or killed, any woodcock, except only during the month of July, and also between the last day of September and the sixteenth day of December in any year, under a penalty of $20 for each bird so taken, killed or had unlawfully in possession.

That no person or persons shall take, kill or have unlawfully in possession after the same has been taken and killed, any upland or grass plover, except only between the last day of July and the sixteenth day of December in any year; or any Wilson snipe, commonly called English or gray snipe, except only during the months of March and April, and also between the last day of September and the sixteenth day of December in any year, under a penalty of $20 for each bird so taken, killed or had unlawfully in possession.

That it shall be unlawful to take, kill or have unlawfully in possession any reed bird, rail bird or any marsh hen, except only between the last day of August and the sixteenth day of December in any year, under a penalty of $5 for each and every bird so taken, killed, or had unlawfully in possession.

That nothing in this act shall prevent any one, duly authorized by an incorporated game protective society in this State, from capturing alive any quail for the sole purpose of protecting and preserving them alive during the winter months; provided the birds so taken are released within the borders of the State.

That nothing in this act shall prevent any licensed or established dealer in game to dispose of such game mentioned in this act, ten days after the periods therein mentioned; provided that such game was killed within the period allowed by this act or was killed and purchased outside the limits of this State.

That all laws now existing, relative to the preservation of game treated of in this act, be and the same are, so far as the same are inconsistent with this act, hereby repealed.

That this act shall be taken to be a public act, and shall take effect immediately.

ALBANY GAME LEGISLATION.

ALBANY, April 29.—The Assembly Committee on Game Laws has reported Mr. Hamilton's bill preventing net fishing in the St. Lawrence River; also De Peyster's bill prohibiting the running down and shooting of birds from steam yachts; also Stevens's bill amending the forestry laws so that any one can go upon the forest preserve to fish and hunt.

The Assembly has passed McAdams's bill prohibiting the spring shooting of ducks and geese through the State; also Mr. Stevens's bill for the protection of shad and other fish in the Delaware River; also Mr. Treadway's amendments to the game laws.

Sea and River Fishing.

FISHING NEAR NEW YORK.

IV.—THE FISHING BANKS.

ALL along the Atlantic coast there are stretches of shallow water several miles out into the ocean which are called "banks," and on these banks most of the big sea fish are caught which are sold in the city markets. Off the New Jersey coast from Seabright south these banks are comparatively near the mainland, and the shallow water is dotted every day during the open season with the boats of the professional fishermen who supply the New York market. If the New Yorker wants to see these New Jersey banks he can often get the Seabright fishermen to permit him to accompany them. To reach Seabright take the Sandy Hook boats from Pier 8 North River, foot of Rector street, and from Sandy Hook pier the trains of the New Jersey Southern Railroad (round trip fare $1.35) to Seabright. Another way of reaching the New Jersey banks is to go to Asbury Park via Central R. R. of New Jersey, or Pennsylvania R. R. (round trip fare $1.50). From the fishing pier at Asbury Park there are during the summer several sloops which make daily trips to the fishing banks, charging passengers fifty cents apiece, bait not included.

From New York there are two steamers which make regular trips to the New Jersey banks and those off Fire Island, on the southern shore of Long Island. These latter are about twelve miles distant from the mainland, and the mean depth of the water over them is fourteen fathoms, or 84ft. The Angler, Capt. Al Foster, is a double iron and steel hulled steamer, whose pier is at the foot of East Twenty-first street, East River; and the other Fishing Banks steamer is the famous old fisherman J. B. Schuyler, Hancox captain, Henry Beebe pilot, whose pier is at the foot of East Twenty-third street, East River. These boats begin running to the banks early in May each year, and continue until the weather is so cold that no fisherman is brave enough to sit out on deck and dangle a line.

The principal fish caught now on the Cholera Banks are codfish, which run up to 20lbs. and over in weight. The average will weigh perhaps 10 or 12lbs. One day last week the Angler's passengers took 139 codfish and haddock, another day they took 80, and on Sunday of this week they made the biggest catch of the season thus far, 257. Besides codfish some smaller fish are now taken, and great lobsters are caught on every trip. Conger eels are plenty and easily caught. They weigh from 2 to 5lbs. Blackfish were caught last Sunday running from 2 to 4lbs. in weight, and later in the season they will be taken weighing as high as 10 or 12lbs. One codfish caught from the Angler last Sunday weighed 4lbs.

The summer fish begin running in late June, and are caught until late in November. The fluke is common in July, and averages 10lbs. Sea bass begin biting in late June or early July. They weigh from 4lb. to 12lbs., and are excellent for boiling and for chowders. They possess a very large mouth, so that by the time one of them is hauled from the bottom to the surface of the water he is generally almost drowned. Big porgies, weighing 2 or 3lbs., are also taken on the banks in summer, and large bluefish and weakfish are caught from small boats anchored at a distance from the steamer. The fish most caught of all, perhaps, is the bergall, or cunner. He is a bold biter and a fine table fish, but is a small fellow, seldom weighing over a pound. He also possesses a number of sharp spines, which inflict painful wounds to the hands if caution is not used.

The line for banks fishing must be a long one, and the angler carrying his own tackle with him had best be prepared with a number of assorted sizes of hooks and sinkers. Most of the fishermen use a handline, but the best sport is obtained with a rod and reel. The sinker is tied on the end of the line, and is allowed to rest near the bottom while fishing, three and sometimes four hooks on wire snells being tied at intervals of 3in. apart above it. Clams are the bait most used for fishing on the banks, except for blackfish, the latter being caught with fiddlers. Bait and tackle are always kept for hire on the fishing steamers and meals can be procured on board. There are also staterooms for those who are seasick, and on rough days they are nearly all occupied.

The steamer J. B. Schuyler runs now to the Cholera Banks every Tuesday, Thursday and Sunday. During the summer her days of sailing may be changed, but her trips are always advertised in the daily newspapers. She leaves her pier at East Twenty-third street at 7:30 A. M., Peck Slip at 8 A. M., and foot of Franklin street, North River, at 8:30 A. M. The time for returning varies, but she is expected at her uptown pier at 6 P. M. or soon after. The fare for the round trip is 60 cents, or if a party of five is made up a "club rate" of 50 cents is charged. The latter is also the fare for ladies. Clam bait is sold aboard the Schuyler at 5 cents a "bunch," a bunch being five to seven clams hung on a string. All sorts of eatables can be bought on board, and there is a "grill room" where anglers can have their fish broiled as soon as they are caught. Tackle can be hired at a reasonable rate, or purchased outright at the ruling city retail prices. The Schuyler carries, besides her two life-boats, two rowboats for the accommodation of those who wish to "chum" for bluefish or catch weakfish. One of these boats holds twelve, the other eight, and seats are sold at $1 each aboard them. The fishing aboard the steamer is done from the rails on both decks. As there is such a crowd of fishermen aboard, especially on Sundays, lines sometimes become tangled and many cuss words are said. The best point of vantage from which to cast your line is

a portion of the upper deck where there is no space on the deck beneath for another fisherman to angle, as near the middle of the boat as possible.

Captain Albert G. Foster of the steamer Angler is the veteran pilot of the Fishing Banks. He has made the haunts of fish the study of years, and consequently knows exactly where to go at various seasons and under various conditions of weather to secure good results. His brother, Mr. Fred Foster, to whom I am indebted for much of the information below, has sailed with "Captain Al" for many seasons, and is not at all behind the latter in reliability as an authority on banks fishing. Mr. Fred Foster says the point on the Cholera Banks to which the Angler takes her parties is about eleven miles off Point Lookout (Long Beach, L. I.), and bearings are determined by the range formed by the Point Lookout Hotel and the Long Beach Hotel. The Angler goes to many other places besides the Cholera Banks, however, and Captain Foster is said to be the only pilot who can reach desirable grounds by steering according to ranges instead of feeling his way by soundings. Sometimes the Angler goes to the Southwest Cholera Banks (fourteen fathoms), two miles from the Cholera Banks proper, and sometimes to the Middle Ground (twelve fathoms), a short distance northwest of the Cholera Banks. In bad weather the anchor is hove about three miles southwest of Long Beach Hotel, and sometimes the boat only goes as far as the banks off Rockaway Beach, about four miles distant from the big Rockaway Hotel. At this time of year the best fishing is found on the Farms Banks, which lie twelve miles to the southeastward of the New Jersey Highlands and about ten miles off shore, or at the Rocky Spot south of the lightship in seventeen fathoms of water. Mr. Fred Foster says that neither the Rocky Spot, the Farms Banks nor the England Banks, six miles off Elberon, are put down upon the charts of the coast survey, and there are many reefs which have been discovered by Captain Al Foster, which are ignored in the charts. To the presence of these unmarked reefs Mr. Foster attributes the wreck of L'Amerique, the French vessel that went to pieces off the Jersey shore some time ago.

The Angler at present leaves her pier at the foot of East Twenty-first street every Sunday, Tuesday and Thursday mornings at 6:30, touching at Beekman street, East River, at 7 A. M., and at Pier 6, North River, at 7:30 A. M. During the summer she will probably run every day, and she continues her trips just as long as fishermen will go. Last winter her last trip was made Dec. 15, and Captain Foster guarantees that his patrons will catch fish any day in the year all the year round. Fare for round trip is 75 cents for gentlemen, 50 cents for ladies. Dinner is served on board for 50 cents, and the seasick angler can have a stateroom all to himself for $1. Bait and tackle can be purchased on board at city prices.

Mr. Fred Foster gave me information more in detail concerning the banks fishing than I had been able to obtain elsewhere. The conger eels, which are the most greedy biters now, run from 2 to 12lbs. this season, and besides the cod spoken of near the beginning of this article, Mr. Foster mentioned many of the cod's near relatives which are caught now, including the haddock, hake and ling. Lobsters are hauled in freely weighing as high as 12lbs. The blackfishing now is done in shallow water. The sea bass fishing begins about May 15, Mr. Foster says, and a month later the big porgies, the bluefish, the large weakfish (10 to 15lbs. and caught on mossbunker bait), and skates (1lb. to 75lbs. in weight) will begin to run. Besides these fish bonitos averaging 6lbs. apiece are sometimes common, great sunfish are occasionally met with, and once in a while some fisherman lands a shark. Mr. Foster says that just now there are a few peculiar fish called "horn fish" or "horn hound" caught, which run from 3 to 10lbs. in weight, and he asserts that these fish are viviparous, in the fall many being taken which contain in a sort of womb or sack from three to seven young ones each.*

Captain Al Foster advises the use of a dark olive-colored line 150ft. long and $\frac{1}{16}$in. diameter. When fishing in from 3 to 10 fathoms of water with a moderate tide, use a 6oz. sinker; from 10 to 20 fathoms a 12oz. one, with two hooks sufficiently apart to clear each other, one below and the other above the lead. Having touched bottom with your sinker, raise the line about 2 or 3ft. and keep it there.

When fishing for sea bass or cod, bait with shedder crab, lobster, squid, sea clam or skimmers, hard clam, mossbunkers, dolphins, smoked, salt or fresh herrings, eels or any other scaled fresh fish. Sea bass or cod are more certainly hooked if the hooks are left a little exposed. For blackfish and sheepshead use mussels out of the shell, hermit, shedder, hard or fiddler crabs, sea bugs, shrimp, periwinkles or soft clams, also out of the shell, and blackfish or Virginia hooks, letting your sinker lie on the bottom. For porgies have as light a sinker as possible, and fish from 6 to 12ft. off bottom in shoal water, or with your bait just out of sight in deep water. Use stout small Virginia or blackfish hooks and bait with soft sea, hard or razor clams, or the lips of the scallops, all fresh from the shell. For weakfish use No 7 Kirby or No. 5° Kirby Limerick hooks, and a 1 or 2oz. sinker. Bait with crab, shrimp, bunker, snappers or herring. If you have a pearl or bright tin squid on your hook (using but one in this instance) you can, by constantly bobbing up and down this unbaited decoy hook, catch many weakfish. For fluke or plaice use a Kirby Limerick 7° hook and bait with bunkers, herring, killies, bergalls, or other small fish, though the better way is to use tin or pearl squid hooks baited with a piece of fish and gently raise and lower it at 1 or 2ft. from the bottom. This will cause flukes, and sometimes large bluefish, weakfish and cod to snap at it.

In chumming for bluefish use 3 or 4ft. of No. 13 music wire for the snell, first taking the precaution to darken or remove the polish by immersing the wire in strong coffee or tea; or, better still, in a solution of tannic acid. Pass the wire through the ring of a No. 7° Kirby Limerick hook, twist or overlay it, then make a loop at the other end with pliers for fastening on the line. Wind the overlay of the line with thread of an olive color. For the "chum" cut or chop up fine fresh mossbunkers, and throw a little on the water at intervals, forming an oily "slick" that attracts the fish. Cover your hook well with a slice of the fleshy back of the bunker and cast it among the floating chum. If the water is not too clear, so that the fish are not shy of the baited hook, bluefish (and often bonito) will seize the hook as fast as it can be baited and thrown over.

The Angler does not carry small boats, but is arranged so that all fishing can be done on board. The aftermost end of her hurricane deck is the most advantageous position. SENECA.

[On May 6 Thos. J. Murrey caught a 7½lbs. striped bass in the Hudson River, above the Fort Washington depot.]

*Genus *Mustelus*, related to the shark and dogfish.

THE RANGELEY LAKES.

Editor Forest and Stream:

My friend Stebbins, proprietor of the *Journal and Courier* of this place, made me very envious when he got back last fall from his periodical hay fever trip, by his angling tales, and the furor which the big fish he had brought home from the Rangeleys had created in the village. In this one grand *coup* he had beaten my entire record. He told me where he caught them, and warmed me up with the how.

A few days ago, I having bought, read and enjoyed "Where the Trout Hide," loaned it to him, and asked him to give me the data as to his trip to the Rangeleys. This he has done and handed the result to me, with permission to use the material for a letter to FOREST AND STREAM, but finding that I could in no way improve the paper, I forward it intact, accompanied by a photograph of the fish.

I think the interests of fair play demand that facts shall be freely given when a question which affects many worthy men, such as John Danforth, Fred Barker and others, is raised.

I myself spent a week at the Rangeleys four years ago, and in company with Mr. Charles Mallory, Mr. Adon Smith, Mr. Lazelle and others of the Oquassoc Angling Association worked very hard with but slight results. My time being up, I returned to New York via the Upper Dam, and there met a number of anglers who up to that day had been very poorly rewarded; but on that day the fun had begun, and a dozen or more large fish had been caught that morning. I afterward met the three gentlemen I have named, and they told me that directly after my departure the fishing became excellent, and Mr. Mallory caught a very large fish—I believe that they told me a nine-pounder. PISECO.

LITTLE FALLS, N. Y., April 29.

Editor Forest and Stream:

My friend Capt. L. A. Beardslee has called my attention to the following passages in Kit Clarke's interesting little book "Where the Trout Hide:"

The luster of the Androscoggin, more familiarly known as the Rangeley Lakes, has flown, their glory has departed and the big trout whose rainbow-lined magnificence has given them universal fame are a fond memory. * * * Now a fish is rarely taken from among their huge boulders and deep pools. * * * The fish for well-known reasons have nearly all disappeared.

After a very pleasant perusal of Kit Clarke's book I am forced to the conclusion that he not only has a grudge against Rangeley but that he has some peculiar partiality for the St. John's Lake boom in the interests of which the book is evidently written. I was never at Rangeley Lakes until last season, when I spent two weeks in September at Upper Dam and at Camp Bemis. I have no interest in anything connected with hotel or transportation company and was only led to make the visit from the White Mountains in the hope of combining fishing with immunity from hay fever. I may add here in passing, that for hay fever sufferers I do not believe there is a better place in the United States.

Those who remember the last two weeks of last September will recall the fact that in that region there was rain and wind almost every day. My diary says there was but one bright sunny day. It was very poor weather for fly-fishing, and late in the season at that. But at the Upper Dam some large fish were caught nearly every day. I am not expert with the fly rod and my catch was not among the largest. But I inclose to you a photograph taken by my son after my return home, showing five brook trout weighing respectively 4, 4½, 4½, 5½ and 6lbs., being the largest fish taken by me in the pool at the Upper Dam during the last week of my stay there. During the same time each of some six or eight men showed a better record than this. Of the one sunny day we had I spent four or five hours upon a mountain stream with very good success, the number taken being forty-eight, of which the largest weighed 1½lbs.

Sept. 23 and 24 I spent at Camp Bemis, one of the loveliest spots in the world. My brother, who had never before cast a fly, was with me. The first forenoon we caught thirty-three fine trout, weighing 27lbs.; the next forenoon twenty-nine trout weighing 23lbs. At each of several casts we took a ¾lb. trout on each fly, with as lively sport as I have ever known, even when bass are "on the bite."

I append the record at Upper Dam of the large fish caught by Mr. Wm. H. Fullerton, of Windsor, Vt. I saw many of these fish and know that the record is correct: Aug. 24, 6½, 6, 3; 25th, 3½, 2¾, 2, 5, ¾; 27th, 3, 1, 1; 28th, 2½, 1¼; 29th, 2½, 1¼, 3¾, 6½, 7; 30th, 2½, 3¾, 3¾; 31st, 1½. Sept. 3, 5, 1½, 7¾; 4th, 6½, 6¾, before breakfast; 5th, 3½; 6th, 6¾; 7th, 3½, 3½; 8th, 3; 11th, 5¾; 14th, 4¾.

This was the best record of the season, but several others had good ones, though I have neither the number nor weight. Mr. R. M. Parish, of Montville, Ct., on Sept. 21 captured two beauties at the same time with a 6½oz. rod, the one on the tail fly weighing in my presence 6lbs. 14oz., the other weighing 2½lbs. He saved both without assistance.

Kit Clarke, I believe, is right in saying that the fishing in the Rangeley Lakes is not so good as it used to be (and I have yet to find a place where it is); but the assertions that "a fish is rarely taken," that "the fish have nearly all disappeared," the big trout "are only a fond memory," etc., etc.—these assertions show that the writer is either very prejudiced, very ignorant or very mad at something that may have happened to him at the lakes. Perhaps a large trout shook his tail in his face!

I may add that Captain Barker at Bemis and Landlord Pickens at Upper Dam take the best of care of fishermen and their friends, whether these friends are ladies or gentlemen, and that there are many charms of lake and river here which can be enjoyed without the discomforts which Kit endured in the wilds of Canada.

JEAN R. STEBBINS.

OFFICE *Journal and Courier*, Little Falls, N. Y., April 26.

EARLY FISHING IN MAINE.

A CURIOUS feature of the trout season is that the very early opening has put sportsmen completely off their reckoning. Last year the ice was very late about getting out of the Maine lakes, and a number of fishermen, annual visitors to these waters, were ready and waiting. Indeed, the telegraph was anxiously watched for the signal to start. This year the ice is out the earliest on record—or nearly so, there being an old record, back in the forties, which says that the ice went out of the Rangeleys on the 25th of April—this year it went out on the 29th. But the sportsmen are not ready, and some of them will not go at all, for the reason that they are not ready to start as usual—at the opening of the season—and they fear that the best of the fishing will be over before they can get away. Still some merchants and professional men of Boston, and other cities, are about starting for Maine. The Tuttle party went on Tuesday, but it misses some of the familiar faces of former seasons. Mr. Farewell, with three or four friends, also started on Wednesday. Mr. Stevens, of Camp Vive Vale at the Narrows, Richardson Lake, cannot be the first to start, as usual, this year. He is detained by a case in court, which case would probably have been finished had the ice staid in the lakes as late as usual. Under the circumstances, Mr. Stevens will probably make the trip late in the spring season, in spite of the black flies. Still he has a friend in Philadelphia waiting for the signal to start. Mr. Shattuck and Mr. Smart, both of the Vive Vale Camp, will probably start about Saturday. The trains are not loaded with sportsmen, as is usually the case, for a week after the ice is out of the Maine lakes—the ice has played them a trick, and with this trick there is considerable dissatisfaction.

Maine sportsmen are on the alert, and several have already reached the fishing grounds. Mr. Freeland Howe, of Norway, with Capt. W. W. Whitmarsh and F. W. Sanborn, editor of the *Oxford County Advertiser*, were off as soon as the ice had left the lakes. They went at once to the Upper Dam, where J. A. French, of the French's Hotel at Andover, has charge, instead of the Union Waterpower Co., as formerly. A letter from Mr. French, written Saturday, says that Mr. Howe and his party have struck excellent fishing. The day before, Mr. Howe had landed some twenty trout, and some of them of good size. At the Rangeley end of these lakes the sportsmen are not arriving very freely. They come "dragging along;" the season being so early as to be ahead of everybody's calculations. Reports also speak of cold weather, though the ice is out. One early arrival was seen fishing with mittens on his hands, and occasionally he would throw down his rod to warm his fingers by thrashing them against his sides. There are still no reports of good fishing at Bangor, though the run is daily expected. There have been heavy rains in that part of Maine, and the river at Bangor has been very high. But there is no snow left in the woods, and the water is likely to fall very rapidly. Indeed such is the case with all the trout waters of the State, and unless the weather is very cold and rainy for a couple of weeks hence, fly-fishing, all over Maine, will be unusually early.

After all there is something very curious about this early fishing for trout. The theory is that the first on the ground are sure of a majority of the fish, but such is not always the case. Mr. Stevens, mentioned above, went down to his camp on the Narrows last year long before the ice left the lakes. Indeed, he was at the Narrows in season to troll over the best trout ground in that section a part of every day from the 16th to the 25th day of May, before catching a single trout. He was there with his guide, Adana Brooks, and they desired trout about as much as ever sportsman did, for they were getting short of provisions. They had taken in what they supposed was food enough to last them till the steamers came up, but they had not calculated on more three or four days at the most. The ice left the Narrows by the 16th, but it did not leave the lake below, so that the steamer could not get up with safety till about the 24th. They trolled and trolled in the Narrows, but still no trout. Both are expert at trout fishing. Each day they made a record of the temperature of the air and of the water, which record they have in camp, and they noted particularly that the trout did not take hold till the temperature of the water was nearly up to that of the air in the morning. Then the fun began, and on the 25th one of 5lbs. was taken, and for days after—till the fishing stopped—there were probably hundreds of pounds of trout taken from the Narrows. When the temperature of the water gets too high, as every sportsman knows, the trolling season for trout is done, and trout are only taken at nightfall and early in the morning at the mouths of the streams and in the rapid water. After all, the trolling season is only a couple of weeks in length, and it is well that it is so; for the drain is too great upon the trout supply.

Moosehead Lake cleared of ice very early, but the usual spring visitors to those waters are all demoralized in the matter of time. The Thomas party, or the Kineo Club, made up extensively of Boston merchants, will not start at present, but will wait for fly-fishing. One or two gentlemen left Boston by train on Tuesday for Moosehead, and they will try the trout, but they left with the feeling that the season is altogether too early. Cold weather in the trout region is yet expected. SPECIAL.

MAY 6.

STUNG BY A TROUT FLY.—Newton Bigoney and Geo. W. Blake have a colored servant name Lizzie. Chas. Barker Bradford took dinner with the above named gentlemen the other evening. While they were sitting at the table after the meal, smoking and looking over a catalogue, Lizzie, in clearing the table, caught sight of a page illustration of small trout flies. "Excuse me, sah," said the girl, pointing to one of the flies, "dat's de nasty leetle ting dat played de debel wid one o' my fingers de oder ebening." Bradford asked the girl what she meant, and she said: "Well, sah, I war clearin' up Meester Blake's top bureau drawer an' I seed what I 'spected war two or tree leetle feathers a sticking to a silk umbrella case, an' I jus' grabbed hol' ob dem and yanked dem jus' as any one would who wanted to clear away any bit o' dirt from a gemman's tings, and would yo' believe it, sah, de nasty leetle ting stung me jus' like a bug. I didn't wait to see what it were, I jus' shook it off my finger an' out ob de winder." Like a great many other persons, Lizzie had never seen a trout fly.—J. CHARLES DAVIS.

OZARK MOUNTAIN TROUT.

THE opinion is pretty widespread among ichthyologists that there is no native trout in the Ozark Mountain region of Missouri, Arkansas and Indian Territory. It must be remembered, however, that a species of *Salmo* has been described from Kansas River, a tributary of the Missouri, emptying into the latter stream not far from the mouth of the Gasconade. It may be that this species, *Salmo stomias*, did not really come from Kansas River, but from some locality further west. The fact that no additional specimens have been obtained since the types were collected would seem to warrant this belief. There is another side to this question, and we desire to bring it forward, in order that the truth may be discovered. Some of the anglers' guide books refer to several localties in Missouri, Arkansas and Indian Territory, at which trout may be caught. In many cases it is certain that they do not mean black bass, which is generally called trout in the Southern States, but a fish of the salmon family. In the Smithsonian report for 1864 will be found a "Journal of an Exploration of Western Missouri in 1854," under the auspices of the Smithsonian Institution, by P. R. Hoy, M.D. This is dated April 4 to June 4, 1854. Under date of May 14 Dr. Hoy says: "Rained all night, which puts an end to our fishing here; this I greatly regret, for there are several species of fish I am exceedingly anxious to obtain, especially one species of *Salmo* (?) called here salmon trout. * * *" Mr. L. M. Turner, who gave me this extract from Dr. Hoy's journal, also wrote out for me his own experience with trout in the Ozark Mountains of Missouri in 1872. Mr. Turner has caught thousands of trout in Alaska, Labrador and elsewhere, and his statement should receive due consideration:

"During the latter part of July, 1872, I had occasion to travel nearly the entire extent of the Ozark Mountains of Missouri. * * * In one of the small streams tributary to the Gasconade River, near Waynesville, we stopped to allow the horses to drink. We observed a number of trout in the deeper portions of the gravelly-bedded stream. Following the course we came to a place where the water ran rippling over a bed of small stones. We frightened some of the trout on to the shallow place and killed several by throwing stones at them. Two of the fish were fully a foot in length, the remainder smaller. We fried them for our supper. They * * * had the coloration as follows: Back and upper sides dark lead with faint greenish shade. The middle sides lighter and the lower sides much lighter. The middle sides were flecked with rounded black spots, most numerous about and immediately below the median line. I do not now recollect that the larger individuals had any spots on the back, but do remember that the smaller spots were on the posterior portions of the fish."

I have been informed recently by Mr. Slosson, of Washington, D. C., that he caught black-spotted trout in mountain streamlets in Crawford county, northwestern Arkansas, about ten years ago. He says they were not black bass, but real trout, and that they are caught also in the Ozark Mountain region of Indian Territory. I hope that some of the numerous correspondents of FOREST AND STREAM, who are familiar with the region in question, will be able to throw some light on this subject. Rainbow trout were planted in 1880 by the U. S. Fish Commission in the headwaters of the Gasconade and Osage rivers, and 3,000 were deposited in Spring River, a tributary of the Arkansas. In 1885 the Missouri Commissioner found at least three generations of trout in Spring River. The Commissioner stated that no native species of trout is found in any of the streams that rise in the Ozark range. T. H. BEAN.

HOW TO CATCH TROUT.

IN Mr. Mershon's account of his trip on the Flying Peggy I observe that, like hundreds of other anglers, he falls into the common error of believing that the man who goes first is the one who catches the most trout. I think I am justified in saying this is an error. When I am fishing for trout, and observe "two or three natives sneaking in ahead of us," I just let them sneak; and, instead of taking a short cut to head them off, I will fill my pipe, sit down on a stone beside the cool stream, watch the tumbling torrent as it bounds from rock to rock, listen to the birds chattering around me, and anon stretch myself on my back, and between watching the curling wreaths of smoke, observing the grand old oaks and pines nodding and bowing so graciously to each other, and contemplating nature in general, a very pleasant and profitable half hour goes speedily by. Taking up my rod and examining the flies, I slip quietly along to yonder pool, cast the bait behind that rock or log, when splash! a fine fellow jumps out of the water, seizes the hook, executes a somersault, and down he goes! The rod bends and twists as the trout rushes hither and thither, I play him for a moment or two, then gently elevate him and he is in my hands. Wiggle, wigglety-wig—ah, what a sensation—and I drop him in the basket. So it continues. In the meantime what are the natives doing? In their greed they rush pell mell over the crackling brush, bounding over rocks, falling into pools and frightening the trout out of a year's growth. Occasionally they hook a fingerling, but more frequently they don't, and I tell you, gentle reader, a fish of any decent size is rarely seen on their stringers.

Is this usually the case? By no means, I am sorry to say. It is usually reversed. The average sportsman, after spending a year at his desk, rigs up his tackle about the first of April, gazes lovingly upon his split-bamboo rod all mounted with German silver, pats it on the back, and exclaims, "Ah, there! What a royal time we will have next week!" He hies him away, and two days are consumed in reaching the grounds. He stops at a village or a house three miles from the best fishing, and when he casts his line it is about 9 A. M., just the time he should stop and take a snooze for a few hours. Suddenly he observes some one ahead of him. "Ah! this won't do. I must get ahead of that yawp," he says. And he does, after skirmishing over rocks, through green briers, under laurel, over logs, etc., and when in half an hour he reaches the stream breathless, exhausted, clothes torn, shins peeled, tip broken, flies gone, he looks back and observes the other fellow a hundred yards below, calmly smiling upon him, yanking out the fish, with a string of fine big fellows dangling at his side. It is enough to make a fellow cuss. In fact I have cussed under such circumstances, and so have you.

The moral is plain: Don't go trout fishing if you have but two or three days to spare. Take two or three weeks and take a small tent and outfit. Camp near the stream, fish early in the morning and late in the evening. Don't be in a hurry. If there are half a dozen ahead of you no matter. Let them go, only don't follow them too closely, and my word for it, you will have more fish than they.

PACIFIC.

WINTER FISHING AT POINT BARROW.

THE natives of Point Barrow, Alaska, fish very little with hooks, their fish being taken with gill nets both summer and winter; they are very expert in the use of nets for taking both fish and seals; they will set a net under 5 or 6 feet of ice on the rivers where they go to hunt in winter for reindeer. Their manner of doing it is by drilling holes through the ice as indicated in Fig. 1.

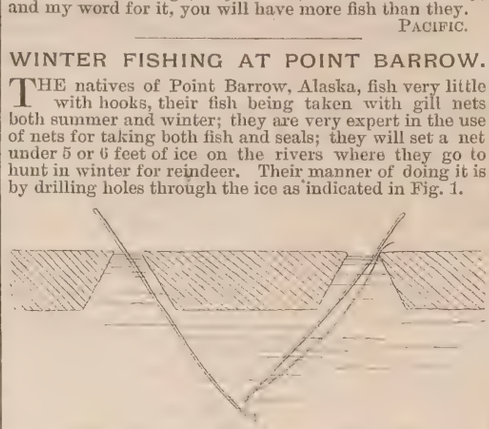

FIG. 1.

They drill usually three holes; then, by putting a line on the end of one long pole and a hook on another pole, they get the hook on the line and pull it through the second hole, and so to the third hole. Communication being thus established, it is easy to set the nets under the ice as shown in Fig. 2. The holes are small at the top and enlarged at the bottom; the middle one through which they draw the nets and fish the largest.

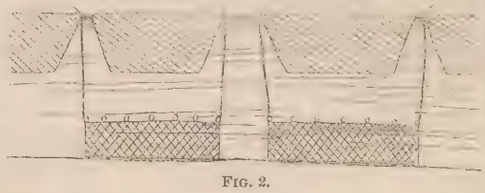

FIG. 2.

In making these holes they first drill a hole about 6 or 7in. in diameter through the ice to the water, then they enlarge the hole at the bottom. The hole now being filled with water, the ice broken off by the ice pick floats to the surface, and is removed by a scoop made open on the bottom, as represented in Fig. 3. With this scoop they also remove the ice from the hole while sinking to the water.

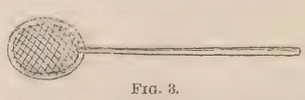

FIG. 3.

The fish taken are mostly whitefish. In these nets I have seen taken from 40 to 60lbs. of fish at one setting of twenty-four hours. The size of the nets is 15ft. long by 4ft. deep.

When I think of poor DeLong sitting down and starving on the banks of the Lena River, which, like all large rivers emptying into the Arctic Ocean, teems with fish, just for the want of the knowledge possessed by the inhabitants of these northern regions, it makes me feel sad. I have always felt that if he had with his party a couple of Esquimaux, most of their lives might have been saved.

I was told by the natives that trout are to be found in the large rivers, and I have seen what we call the salmon trout. E. P. HERENDEEN.

SAN FRANCISCO, Cal.

CALIFORNIA FISH LAWS.

Editor Forest and Stream:

I wish to call your attention to the provisions of the California fish law headed, "Permanent Contrivances in Fishing; Punishment for Violation of Provisions of Penal Code:"

Every person who shall set, use, or continue, or who shall assist in setting, using, or continuing any pound, weir, set net, trap, or any other fixed or permanent contrivance for catching fish in the waters of this State, is guilty of a misdemeanor. Every person who shall cast, extend, or set any seine, or net of any kind, for the catching of, in any river, stream, or slough of this State, which shall extend more than one-third across the width of the said river, stream or slough, at the time and place of such fishing, is guilty of a misdemeanor. Every person who shall cast, extend, set, use, or continue, or who shall assist in casting, extending, using or continuing "Chinese sturgeon lines," or "Chinese shrimp or bag nets," or lines or nets of similar character, for the catching of fish in the waters of this State, is guilty of a misdemeanor. Every person who, by seine or any other means, shall catch the young fish of any species, and who shall not return the same to the water immediately and alive, or who shall sell, or offer for sale, any such fish, fresh or dried, is guilty of a misdemeanor. Every person convicted of a violation of any of the provisions of this chapter shall be punished by fine of not less than fifty dollars, and not more than three hundred dollars, or imprisonment in the county jail, of the county where the offense was commited, for not less than thirty days nor more than six months, or by both such fine and imprisonment. One-third of all moneys collected for fines for violation of the provisions of this chapter to be paid to informer, one-third to District Attorney of the county in which the action is prosecuted, and one-third to the Fish Commissioners of the State of California. * * * It shall not be lawful for any person to buy or sell, or offer or expose for sale, within this State, any kind of trout (except brook trout) less than 8in. in length, any person violating any of the provisions of this section is guilty of a misdemeanor.

Of course this does not apply to the Fish Commissioners. This is only a small part of the law, but it covers what I shall allude to.

Now, as will have been seen, the law strictly prohibits any permanent contrivance for catching fish. That being the case, why were not the parties that built a trap across the San Joaquin River last fall to shut the salmon off from coming up the Tuolumne River arrested? A dam was also built across the mouth of the Tuolumne River, and persons speared as many as forty salmon in one night, and kept their traps there for over a week. Some of those same parties have since made their brags to me that it was election times and the officers would not notice them, for they were afraid they would lose a few votes. I mention no names, but will call attention to the fish laws of this State, and perhaps through FOREST AND STREAM the attention of the Fish Commissioners of this State may be drawn to this matter.

The warden that was last here in this district was no good. He would arrest Chinamen, Frenchmen and Italians for violating the above laws, but citizens of the State he never arrested, and you can form an opinion why.

I have no especial love for Chinamen, but when it comes to a question of law and order, arrest one man for violating the laws as well as another. R.

MODESTO, Cal.

FISHING NEAR CHICAGO.

CHICAGO, April 29.—A little of the fishing news got away last week. It seems that the season has already opened at Fox Lake, and in right good earnest, too. A week ago yesterday a large number of good fish were taken in Fox, Petite and Nippersink lakes, including bass, pickerel and wall-eyed pike. One pickerel of 7lbs. was killed, and two bass of over 4lbs. each. Mr. Wm. White, better known as Billy White, had twenty-seven bass, pike and walleyes. That was a pretty good showing for one day, surely. It will not be long now till we begin to hear of fun all along the fishing line.

The following item, taken from a daily paper here, may be an old "rounder" for all I know, but it is of some interest:

"The largest pair of black bass ever caught in Missouri waters or in any other waters of the United States, in fact, were caught by J. W. Peters and son, of St. Louis, in Peter's Lake, Pemiscot county, Missouri, on March 3 last. They weighed 11lbs. and 12oz., and 11lbs. and 10oz., respectively, seven days after they were taken from the water. The larger fish was 28⅜in. in length from the lower lip to the extreme end of the tail, and 18⅜in. in circumference at the largest portion of the body. It was at least 3lbs. heavier than any one specimen of black bass ever caught in the United States before. The heads of these monsters of the black bass school have been beautifully mounted in elegant frames and were given to Capt. H. C. West, the Fish Commissioner of Missouri, who in turn will present one to President Harrison, and the other to ex President Cleveland. They will be exhibited in a Broadway show window for three weeks."

The above is a fair sample of what the average daily paper does not know about sporting matters. Personally, I never saw a bass that weighed over 7lbs., but I do not believe that the bass above mentioned weighed 3lbs. more than any bass ever taken in the United States, nor do I believe that these bass are the largest ever taken, because I am very credibly informed that they have been taken on the St. Clair flats weighing over 12lbs., and I have heard on pretty fair authority that 12lbs. bass have been taken in Florida. At any rate, I should like to hear from the bass record as understood by FOREST AND STREAM readers, or better still, by fish dealers who handle netted fish.

May 2.—The maskallonge season has opened, and I wish some one would tell us how to spell it. At least one good fish has come down from Eagle Waters. Its weight is 42lbs., and it is very thick and stocky. It is on exhibition at one of the fish markets, and I do not know who caught it. The ice should by this time all be out of the Wisconsin and Michigan lakes, and the much-spelled fish will soon be in his glory. Doubtless it is generally known that May and early June is the best time to catch this fish unless one waits until after frost. In midsummer the "bloom" of the lakes kills the fishing. Eastern fishers who monkey with trout at $4 an inch will do well to come out here this spring and just go fishing for once. One or two 40-pound fingerling maskallonge, or maskinonge, or muscallonge, will convince them that Gilead lies just north of Chicago.

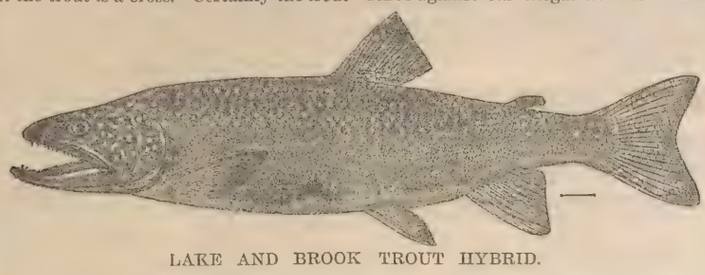
May 4.—Additional reports show the fishing season now well begun, and the end of the week will see northbound trains crowded with anglers *en route* for Silver Lake, Lake Maria, Twin Lakes, Wauconda and other accessible waters near by. Messrs. David Oliphant and Geo. Hazlitt start to-day for Wauconda Lake, pursuant to the advice of Geo. Pratt, a resident of the lake, who writes that the fishing is good. Mr. Pratt has sent down a very fine pickerel. Wauconda is worthy the attention of our anglers this season. The lake has been high and the outlet full, and fish have been running up from Fox River in great numbers. It is said of this lake that one can always take a string of fish there, no matter what the weather. The fishing is better there early in the season, as its waters are quite full of vegetation in the summer.

Everybody looks very happy here now. E. HOUGH.

FISHING NEAR ST. LOUIS.

Editor Forest and Stream:

ST. LOUIS, Mo., May 4.—Croppie fishing is most excellent in this part of the country. Reports to hand from all the lakes, sloughs and small rivers are to the effect that the sport was never better. Bass have as yet not begun operations, for very few have been caught. Croppie, though, are taking the minnow in a most ravenous way, and large strings have been brought in by parties who were out. Creve Cœur Lake, which is situated twenty miles west of here, is furnishing splendid sport to the disciples of Izaak Walton. Two gentlemen from this city spent a day out there the past week and returned with nearly 200, averaging about three-quarters of a pound each, and yesterday another gentleman showed up seventy-two croppie as the result of a day's angling on his part. Judge P. S. Langham and a friend came back from Murdock Lake, which is located twenty-two miles south of here in Illinois, and they had over 250 fish on their string, all caught in a day and a half. Among the number were a few bass, one of which weighed a little less than 4lbs. Murdock Lake is one of the oldest fishing places in this vicinity, and, usually, more bass are caught there than croppie. This season, though, just the opposite is the rule.



A telegram was received from the superintendent of the Kings Lake Club stating that the fishing was exceedingly fine up there, and several of the members have started up there to take advantage of the sport. UNSER FRITZ.

THE FLY-CASTING TOURNAMENT will be held in Central Park, this city, May 23-24. The secretary is Mr. G. Poey P. O. Box 3049, New York.

CROSSING OF SALMON AND TROUT.

Editor Forest and Stream:

Will brook and salmon trout cross? There is a pond in Madison county, N. Y., which contained speckled trout, and which some years ago was stocked with salmon. Now many claim that the trout is a cross. Certainly the trout

LAKE AND BROOK TROUT HYBRID.

are lighter than most brook trout and the red spots not so clearly defined.

Not many trout have been taken thus far this spring, but all the followers of Sir Izaak are waiting for a warm rain, and then they expect to have some sport. WING.

[There is no evidence that any of our salmon and trout cross naturally, but many crosses have been produced by artificial fertilization. A cross between the salmon trout (*namaycush*) and the brook trout (*fontinalis*) was described in FOREST AND STREAM Jan. 17, 1889. Since this description was published we have examined specimens of the hybrid in alcohol and are now able to complete the account of the teeth and the pyloric cœca. The teeth on the vomer (middle of roof of mouth) are as in the lake trout, and there is a well developed band of teeth on the root of the tongue. The stomach is very large, siphon-shaped, and the cœca number about sixty, being more numerous than in the brook trout, but not nearly so abundant as in the lake trout. In all characters of great importance, as in the shape of the tail, size of the scales, and the dentition, the cross has received its impression from the lake trout, while in coloration, general form, and number of cœcal appendages the impression came from the brook trout. In other words, in matters most subject to variation, *fontinalis* has left its impress, but in characters of greater permanence *namaycush* has left its unmistakable mark. The figure herewith published will give a perfect knowledge of the proportions of the cross as well as of the distribution of color areas: for a description of the fresh fish the reader is referred to the article above mentioned. The specimen was an undeveloped male about 20in. long.]

SUNAPEE LAKE TROUT.

Editor Forest and Stream:

I began fishing in Sunapee Lake in 1857, at North Point, a ledge on the northwestern shore of Sunapee. We used to catch only the speckled native trout, but they were plenty and we caught hundreds of them weighing from 1 to 6lbs. each. Jacob R. Hutchinson and I have been fishing together all these years. The St. John's River trout have been put into the lake since that time, so have the landlocked salmon and black bass. Trout fishing is now best carried on in depths of 40 to 80ft., black bass are near the shore. Trout fishing is what we old fishermen care most for, and we have pulled out some big ones in deep water. Mr. Amos Woodbury a few years ago caught a trout that weighed down pretty well, but I guess I took the biggest prize last July. I started from home early in the morning and got on to the water before sunrise; it was so foggy that I hardly knew where I went, but rowed for Hedgehog fishing ground. I anchored and put out my line, in a few minutes something nibbled at my bait. I took the line in hand and found a big trout had the hook. For thirty or forty minutes I pulled and he pulled, it was a hard pull and a long pull, but I hauled him in and steered for the nearest cottage to weigh him. Mr. Cheney weighed the fish immediately upon taking it out of the water, and his weight was 15lbs.; after being out of the water a few hours he was somewhat lighter in weight, but was pronounced the largest trout that had ever been taken out of Sunapee Lake. The length of the fish was about 30in. Until this catch, my friend Mr. Woodbury rejoiced in being the champion fisherman of Sunapee Lake; but I understand that the people of Sunapee now record Sullivan Marston as the man who won the day and the biggest trout. I expect to get his mate the coming summer. If I do I will write again. SULLIVAN MARSTON.

NEWPORT, New Hampshire.

THE FIRST STRIPED BASS.—*Editor Forest and Stream:* I caught two striped bass in the surf yesterday, fishing with rod and reel and using white worms for bait. These are the first taken on this coast this season in the above manner, and, as far as I have been able to learn, the earliest on record. My eldest boy caught a Southern sculpin (*Cottus octodecim spinosus*) to-day. Are they common so far north or at this early date?—BIG REEL (Ocean Beach, N. J., May 1). [Mr. V. N. Edwards, of Woods Holl, Mass., has obtained striped bass in his vicinity on the following early dates: April 24, 1877, Falmouth, Mass., 1; April 23, 1880, Martha's Vineyard, 1; April 27, 1880, Martha's Vineyard, 156; April 25, 1883, New Bedford, Mass., 1. The eighteen-spined sculpin is a winter resident on the New Jersey coast, seldom arriving there before the month of November; it is much more abundant northward, extending at least to Labrador.]

FISHING PROSPECTS IN NEW BRUNSWICK.—The present season in New Brunswick is one of the earliest on record, and no one can remember ever having seen nature arrayed so soon in its garb of green. Mr. Robert Orr, fishery warden for the Upper Miramichi, informs me that upward of 125 salmon (spent fish) have lately been taken with the fly in that river at distances varying from six to eight miles above Boiestown, a circumstance never before known.—EDWARD JACK (Fredericton, N. B., May 1).

MACKEREL AT PROVINCETOWN.—A mackerel was caught at Provincetown, Mass., May 1.

FINED FOR ILLEGAL FISHING.—*Editor Forest and Stream:* Our fish are enjoying a rest, the first in many years. This rest, unexpected alike to both fish and fishermen, was brought about by the sudden appearance of our fish warden, John W. Hague, Esq., of Pittsburgh, who has been hard at work for months gathering evidence against our illegal fishers. On Monday, the 15th inst., he exploded his bomb, and shocked our quiet community by arresting Bernard (better known as "Ike") Lazarus, Rochester's Chief of Police and county detective, taking him before A. R. Moore, J. P., who fined him $50 and costs for fishing with a seine within a quarter of a mile of the dam, at Bridgewater. Then came Thomas Lukens, who plead guilty and was fined $50 and costs for like offense. He was followed by Jacob Stahl, a professional fisherman, in whose possession the warden found a complete outfit, which he ordered the sheriff to destroy. Stahl's fish box contained many fine fish, which were at once returned to the Big Beaver, from whence they had been forced. Stahl said "Guilty," and the Justice of the Peace said "$50 and costs." Geo. B. Hoyt, "for seining," etc., $50 and costs, followed by "Col." Joseph Reed, Sr., fined $25 and costs for having nets in possession; and the last to date, Joseph Reed, Jr., $10 and costs for taking black bass with rod and line. Mr. Hague says the work has only commenced, and that he is determined that illegal fishing shall be stopped in his district.—G. A. SCROGGS (Beaver, Pa., April 29).

A GREAT CATCH OF BASS.—On April 1 Mr. C. A. Hamlet, of this city, took 56 black bass, running from 1 to 4½lbs., the total catch weighing 85lbs. He used a 6oz. fly-rod and "chub" minnows. This is the largest catch of bass on record here. Last season Mr. G. H. Asper, of Chicago, Ill., captured the largest black bass ever taken in our waters with a rod; the gamy fellow weighed 6lbs.—MAC (Glasgow, Ky., April 30).

PRICE OF SHAD.—In the markets of Washington, D. C., shad were sold at retail, May 4, for five cents per pound. Roe shad are offered at an equally low price.

Fisheulture.

FISHCULTURE IN OHIO.

DAYTON, Ohio, May 6. The protection that the State has given the fish in the rivers, and the regular planting of fry in the streams has given Ohio as fine fishing waters as can be found anywhere. The close season begins May 1 and continues until June 15, and the bass are now spawning. The rivers are full of bass, goggle eyes, rock bass and channel catfish, and anglers will have greater sport this summer than ever before, if there is a good stage of water.

President Osborn, of the Ohio Fish Commission, reports that the 150 jars of pickerel spawn in the State establishment at Sandusky are hatching out rapidly, and that already a large quantity of the fry have been planted in the streams of Michigan, and that within the next ten days many millions will be deposited in the inland rivers of Ohio.

One half acre of land on Peach Point, Put-in-Bay Island, in Lake Erie, has been deeded to the Government as a site for the fish hatchery, and John Brown, Jr., a son of old Ossawatomie Brown, is making the survey. The shores of Peach Point are a wild stone bluff, and very picturesque, niched and caverned. The heavy growths of cedar and forest trees, wild vines and shrubery must be cleared away before the building can begin.

CANADIAN FISHERIES.*

THE report on the fisheries of Canada for the year 1888 is made up of the following elements: A brief introduction containing a general survey of the whole subject by the Deputy Minister of Fisheries, a series of eight appendices giving a statement of fishing bounties and the fishery statistics of the inspectors and overseers of the various provinces, a report on fish breeding, and a report on the fisheries protection service.

The yield of the fisheries in 1888 was as follows:

Nova Scotia	$7,817,030.42
New Brunswick	2,941,863.05
British Columbia	1,902,195.50
Quebec	1,860,012.96
Ontario	1,839,869.09
Prince Edward Island	876,862.74
Manitoba and Northwest Territories	180,677.00
Total	$17,418,510.76

There has been a decrease of $967,592.99 as compared with the returns for 1887. The greatest falling off has occurred in New Brunswick and Nova Scotia, while Ontario has shown a large increase. The fisheries that have declined most markedly are mackerel, sardines, lobsters, smelts, cod and salmon, named in the order of their diminution. A notable improvement is recorded in the catch of whitefish, hake, eels and "pickerel" (wall-eyed pike). The cod yields nearly one-fourth of the whole catch of the fisheries of Canada. The decline in the mackerel fishery amounted to nearly half a million dollars, or about one-third of the yield of this species in 1887. In Nova Scotia "herring were plentiful and prices fair. Shad and alewives appear to be on the increase, while a slight shortage is noticeable in cod, undoubtedly due to stormy and unfavorable weather for boat-fishing. Herring fishing was, on the whole, remunerative, while mackerel utterly failed. The assistant inspector lays great stress on the damage occasioned to this fishery by the use of purse seines, and he urgently recommends the utter prohibition of this mode of fishing."

In New Brunswick the returns show a decrease of over a half million dollars from the yield in 1887, and of more than a million dollars from the catch of 1886. The decline was almost entirely in salmon, smelt and lobsters, and is attributed to over-fishing.

The fisheries of British Columbia show a decrease of $76,691.50, due chiefly to the failure of the Fraser River salmon fishing. By an order in Council, passed Nov. 26, 1888, certain regulations were established for the protection of this fishery. Nets, boats and other apparatus cannot be used without a license from the Minister of Marine and Fisheries. The minimum size of the meshes of salmon nets is fixed at 6in. Drift nets are confined to tidal waters and must not obstruct more than one-third of any river. No salmon nets of any kind shall be used for salmon in fresh waters. Fishing for salmon and the use of apparatus shall be discontinued from 6 o'clock on Saturday morning to 6 o'clock on the following Monday morning.

The value of the fisheries of Ontario was $1,839,869, being an increase of $308,019 over the amount of 1887. This result arose from judicious protection and a strict enforcement of the fishery laws.

In Prince Edward Island there was a decided falling off in the catch of mackerel and lobsters. The decline of the lobster fishery is attributed to over-fishing and constant opposition to all restrictive measures. It is found also that the oyster industry is being ruined for the want of an adequate close time. The present close season of three months and a half is insufficient to protect the oyster.

In Manitoba and the Northwest Territories the value of the fisheries showed a considerable increase, the catch of whitefish being nearly double what it was in 1887. Great destruction of fish during the breeding season is wrought by Indians, who, under pretense of fishing for their own use, catch large quantities of fish at a time when others are prohibited from doing so, conceal them and afterward sell them to traders.

Six new fishways of the Rogers model were built in streams in New Brunswick and Nova Scotia. Eleven hatcheries were operated by the Dominion Government. These are located at Newcastle and Sandwich in the Province of Ontario; Miramichi and St. John River, New Brunswick; Fraser River, British Columbia; Magog, Tadoussac, Gaspé and Ristigouche, Quebec; and at Bedford and Sydney in Nova Scotia. 98,214,000 eggs were placed in the hatching houses, and the number of young fish distributed during the season of 1888 was 88,109,000. The kinds of fish deposited were Atlantic salmon, two species of Pacific salmon—the quinnat and the blueback—lake trout, brook trout, whitefish, wall-eyed pike and small-mouthed black bass.

In the following table are shown the values of the fisheries exceeding $200,000 in amount, arranged in the order of their importance:

Cod	$4,203,508.00
Herring	2,354,234.90
Salmon	1,907,400.00
Lobsters	1,483,388.56
Mackerel	981,659.01
Haddock	948,732.00
Whitefish	702,324.28
Trout	510,061.00
Hake	486,540.00
Pollock	484,284.00
Fish oils	390,650.90
Eels	321,348.70
Fur seal skins	279,830.00
Fish for bait	231,586.50
Smelt	223,674.66
Coarse and mixed fish	208,851.63

The number of persons engaged in the fishery service of Canada was 910, of whom twenty-five were special fishery guardians employed for short periods during the close seasons.

In the Province of Ontario, Parry Sound and Muskoka divisions, Overseer A. H. Smith, in charge of Lakes Joseph, Rosseau, Muskoka and other waters in the District of Parry Sound, reported as follows: The season opened early. With the exception of bass, which were scarce, fishing proved highly successful to anglers and trollers. Pickerel were clean, bright and of a good size. The species referred to under this name is evidently our wall-eyed pike. At the head of Lake Rosseau 10 to 16lbs. pickerel were common; while a 20lb. lunge [lake trout] was landed from Sparrow Lake. Tourists were not quite so numerous during last summer, but the influx of hunters, including foreigners, was larger. Game is more attractive than fish. Spearing is almost completely stamped out. A most difficult question to manage is the sawdust nuisance. Mill owners seem well disposed to comply with the statute, but the burners erected to dispose of the sawdust proved defective.

Overseer J. G. Rumsey, of Huntsville, who has charge of the inland waters of twelve townships in Parry Sound and Muskoka, reports that speckled trout appear to be getting scarcer, notwithstanding the fact that the only fishing is done by sportsmen and a few settlers for local use. The decline of fish is accompanied by a falling off in the number of tourists. The overseer attributes the scarcity of trout to the want of fishways in the dam at Burk's Falls.

Overseer Fred Webber reports a steady improvement in all kinds of fish, except speckled trout, in Lake Couchiching and the Severn River. This is especially true of the black bass, and is due to the extension of the close season and the more general observance of the fishing laws. Muskellunge are scarce in Lake Couchiching, but it is believed that the prevention of spearing in the spring will soon restore their numbers. The Severn River is reported by anglers and tourists from the States to be better than ever. Scarcity of speckled trout is ascribed to extreme low water during the winter, causing the death of many young fish. A number of trout fry were placed in Coldwater River by a gentleman last year, and other parties have promised to continue the work. A large school of whitefish was seen last summer in Lake Couchiching as the result, it is believed, of fishculture, some fry having been sent to this lake a few years ago from the Newcastle hatchery. The principal fish of Lake Couchiching and the Severn River are bass, pickerel (wall-eyed pike) and muskellunge. At Moose Deer Point, Georgian Bay, whitefish and lake trout began spawning Oct. 14. Capt. Alfred F. Holmes, commanding the steamer Cruiser, reports the spawning time for whitefish and lake trout to extend from Oct. 15 to Dec. 1, and for black bass from April 1 to June 15, with slight variations due to temperature.

Mr. F. C. Gilchrist, fishery overseer of the Qu'Appelle River and adjoining lakes, in his very interesting report for the year 1888 gives notes on several of the important species of his district. His comparison of the two kinds of black bass deserves the careful attention of the readers of FOREST AND STREAM. "It has been recommended that the large-mouthed black bass be used for stocking our waters. There are many lakes where they would be a valuable addition to the list of fishes. * * * I would, however, protest against putting them into waters that are connected with lakes where there are whitefish or which are suited to stocking with the *Coregoni*. In shallow lakes with muddy bottoms and weeds, and where there are only the predaceous varieties, they would do well, but my examination of the stomachs of hundreds I have caught in the Otonabee, Trent and other rivers in Ontario, led me to the conclusion that they were almost entirely piscivorous, preying very largely upon the young of other fish that had taken to the weeds for shelter. Unlike the small-mouthed black bass, which appears to hibernate in the winter, they are voracious the entire year. * * * The large-mouth are much inferior to the small-mouth in the pan, and infinitely so upon the hook,

*Annual Report of the Department of Fisheries, Dominion of Canada, for the year 1888. Ottawa, 1889. Pp. xxx+255+69+24.

but I believe they are better suited to the stocking of certain classes of our lakes than carp, because they are a better pan fish and can be caught at any time of the year by the most inexperienced person; they can be placed in a lake in company with the most predaceous species of fish and will thrive. * * * My experience with the small-mouthed black bass in Rice Lake, Stony Lake, the Muskoka Lakes and other places in the East, where I have caught thousands of them and examined the stomachs of many, led me to believe that * * * fully one-half of its food was composed of crayfish and the balance of insects and their larvæ, frogs, minnows, perch and the young of other fish. They breed and grow apace in clear water with clear, stony or gravelly bottom and where there is an abundance of crayfish, all of which can be found in many of the lakes of Assiniboia."

The report on the fisheries of British Columbia contains a great deal of valuable material, and deserves more attention than our space will allow. The pack of salmon in Alaska during the season of 1888 is thus stated:

Cutting Packing Co., Cook's Inlet	25,000 cases
Alaska Commercial Co., Cook's Inlet	15,000 cases
Arctic Packing Co . Cook's Inlet	13,000 cases
D. L. Beck & Son, Chilcat River	20,000 cases
B. A. Seaburg, Stikine River	15,000 cases
Fishing & Trading Co., Klawack Inlet	10,000 cases
Bradford & Co., Bristol Bay	25,000 cases
Alaska Packing Co., Bristol Bay	28,000 cases
Arctic Packing Co., Bristol Bay	25,000 cases
Alaska Commercial Co., Bristol Bay	18,000 cases
Karluk Packing Co., Karluk River	72,000 cases
Charles Thomas & Co., Karluk River	30,000 cases
Kadiak Fishing & Mining Co., Karluk River	20,000 cases
Cutting Packing Co., Wah Bay	17,000 cases
Boston Fishing & Trading Co., Jass Bay	6,000 cases
Cape Lees Packing Co., Borough's Bay	6,000 cases
Taylor, Young & Co., Tongass Inlet	13,000 cases
	358,000 cases

Cases contain 48 one-pound cans each.

"Skil" is a native name for the "beshowe" on the west coast of Vancouver and Queen Charlotte Islands. In the books this fish is known as *Anoplopoma fimbria*, and the species has attracted favorable attention because of its adaptability for smoking like the halibut. The salt fish commands the handsome price of $18 per barrel. In eight days' fishing two vessels caught 314 barrels of these fish. The depths in which they were taken varied from 200 to 230 fathoms, and the apparatus used were hand lines and trawls. A trawl of 300 hooks set two or three hours brought up 100 to 150 fish, averaging about 10½lbs. each. The skil is very rich and oily; a 25-lb. fish yields a quart of oil, which the natives use as a substitute for butter. The flesh has a delicate flavor and is very digestible.

The report of Max Mowat, fishery officer in charge of the Fraser River hatchery, on the kinds of fishes found in the lakes and tributaries of the Fraser River, their abundance, spawning season, etc., is full of interest for the angler and the fishculturist. We are not quite sure that we know the "aguassa, silver and speckled trout," but we know that the dolly varden (*malma*), the red-throated (*purpuratus*) and the lake trout (*namaycush*) are found in this region. Gairdner's trout occurs there also. The lakes are said to be fairly alive with trout and salmon, while the surrounding country is covered with herds of large game. The only drawbacks are the lack of facilities for travel and the difficulty of securing board and lodging even at high rates; but to these conditions is due the preservation of the fish and game.

FISHCULTURE IN WYOMING.—We are indebted to Mr. Louis Miller, Commissioner of Fisheries, for the following account of the Wyoming fish hatchery, abridged from the columns of the Laramie *Boomerang*. The large supply of breeding fish kept in this establishment was noticed in FOREST AND STREAM, Feb. 7. The hatchery is located on a forty-acre tract of land five and a half miles southeast of Laramie and is under the charge of the Commissioner and Mr. W. D. Tanner, superintendent. As soon as a title to the land can be obtained, which is looked for during the coming summer, the hatchery will be enlarged so that its capacity will be 1,500,000 fish every winter. Money has been appropriated for this improvement. A large number of black bass have recently been secured for stocking lakes, and 200 have been placed in Hutton's Lake, one of the best fishing resorts in the Territory. Sunfish, carp and catfish will be added to the introduced species. Brook trout, lake trout, rainbow trout and California salmon have been acclimated for the most part with gratifying success. So does the young West add line upon line to its policy of aggressive fishculture, and it will be advantageous to some of the older sections of our country if they heed the lesson.

TROUT DISTRIBUTED IN PENNSYLVANIA.—The demand for brook trout in Pennsylvania has been unparalleled. Mr. J. P. Creveling, superintendent of the station at Allentown, has sent out more than one million fry from his hatchery alone, and the number will probably be brought up to eleven or twelve hundred thousand. These go to natural brook trout streams of the eastern slope of the Alleghenies. The station at Corry will probably supply an equal number to streams on the western slope of the Alleghenies. Allentown station has furnished twice as many fry as its intended capacity called for. If appropriations are forthcoming the facilities of both hatcheries will be largely increased. There has been very little demand for rainbow trout.

WORK OF THE GRAMPUS.—Dr. Henshall, who has recently returned from Florida on the Fish Commission schooner Grampus, reports that Barnes Sound was two feet shallower than ever before, notwithstanding the excessive rains. The work in fresh water was very unsatisfactory on account of the presence of myriads of mosquitoes. So persistent and painful were the attacks of these pests that the men were literally forced to relinquish the attempt to collect in certain inland waters. The party sailed 500 miles in a thirty-foot seine boat, making the bulk of their large collection in salt waters. On the voyage north to New York, Capt. Adams of the Grampus kept a sharp lookout for mackerel and other schooling fish, but saw none, and whales and sea birds were absent.

TROUT HATCHING IN COLORADO.—Dr. John Laws received 35,000 eggs of brook trout from Wisconsin and succeeded in hatching 95 per cent. of them in his establishment at Everglade Lakes, Colorado.

WASHINGTON, D. C., Aug. 24, 1888.—*The U. S. Cartridge Co., Lowell, Mass.:* Gentlemen—I have used about 10,000 of your Climax paper shells this year, and not a single bursted head. As long as you keep them up to their present high standard I will continue to use them in preference to all other makes. Very respectfully (Signed) JAMES M. GREEN, of Green & Cunningham.****

LAFAYETTE, Ind., Aug. 21, 1888.—*U. S. Cartridge Co., Lowell, Mass.:* Dear Sir—I am pleased to be able to give you a most satisfactory account of the paper shells you sent me. I have used Schultze powder altogether for the last seven years, with Eley's shells, and yours are the first perfect substitute I have found, and I shall take care to recommend their use. (Signed) W. GRAHAM, Champion Shot of England.—*Adv.*

The Kennel.

FIXTURES.

DOG SHOWS.

May 22 to 25.—Pacific Kennel Club Show, San Francisco, Cal.
Sept. 10 to 13.—Sixth Annual Dog Show of the London Kennel Club, at London, Ont. C. A. Stone, Manager.
Sept. 10 to 13.—Dog Show of the Central Canada Exhibition Association, at Ottawa, Can. Capt. R. C. W. MacCunir, Secretary.
Sept. 11 to 13.—First Annual Dog Show of the Toledo Kennel Club, Toledo, O. T. B. Lee, Secretary.

Feb. 18 to 21, 1890.—Fourteenth Annual Show of the Westminster Kennel Club, New York. James Mortimer, Superintendent.

FIELD TRIALS.

Nov. 4.—Third Annual Field Trials of the Indiana Kennel Club. P. T. Madison, Secretary, Indianapolis, Ind.
Nov. 18.—Eleventh Annual Field Trials of the Eastern Field Trials Club, at High Point, N. C. W. A. Coster, Secretary, Saratoga Springs, N. Y.
Dec. 2.—Inaugural Field Trials of the Central Field Trial Club, at Lexington, N. C. C. H. Odell, Secretary, Mill's Building, New York, N. Y.

OUR EVERY-DAY FRIENDS.

READING a late issue of FOREST AND STREAM I was attracted by the heading of an article, "The Super-Sense of Animals," or something to that effect. At the end I found the name of Mr. Hallock, who has a delightful way of putting things; besides the subject interested me. He would have it that there is someting beyond mere instinct in the faculties of animals; that they do not always act from impulse or necessity merely. He does not stand alone in this regard, especially among the lovers of woodcraft. Those who have a fondness for out of doors seem also to possess a leaning toward admitting an equality between themselves and their pets.

"Puir Buffie" was poisoned because a nervous neighbor was annoyed by his barking at night. His owner, who had lost not only Buffie, but others by

"The murd'rous and unmanly play,"

was not vindictive, and gave utterance to his sorrow and the hope of a future re-union in verse, concluding:

"Where thou an' Nig, wi' twa three more
Wha hae been murdered lang before
Maun hae yer huntin' frolics o'er
In shadowy race,
Whyles a' thae murderers hing out ower
Anither place."

The poet had no dread of offending the sensibilities of the literal believers in the dominion of man "over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth."

The sentiment expressed in the stanza appeals to me and I like it. The editor of one of our monthly magazines kept standing for some time this sentence: "The editor is not responsible for the opinions of contributors." A very fair legend when properly interpreted and one inviting liberty of expression. I take it for granted that you admit the cogency as well as the propriety of the rule, and though not advertised, it is understood. Therefore I, not being an editor, am free to say what I like. With this privilege, I like children, snakes, butterflies, flowers, dogs, cats, or whatever by its beauty, innocence or helplessness solicits my regard. I am afraid to assume the superiority authorized by the Bible as commonly interpreted, having lived long enough to know that it is easier to be mistaken than to be right. Hence a reverence rather than a feeling of authority impresses me when I am addressed by—my dog for instance.

You and I have been taught to believe that, having dominion over all the earth, we possess souls; that we are made after His image. It is very pleasant to believe so, and as we acknowledge to ourselves our superiority it behooves us to be superior. But are we? A man will not kick a child out of his way, but sometimes he may forget himself and kick a dog. I have been puzzled many times to understand why men will make such distinctions. Is it because they believe that the child has a soul and the dog none? Either will respond to a caress or shrink at a blow, and they have memories. As Mr. Spencer might qualify his statements, I wish it to be understood that I do not refer to bad babies or bad dogs, but to babies and dogs in general. I cannot think so meanly of my fellows as to believe that they make the distinction because the dog has no father or big brother to resent the indignity, but they do so rather through the influence of a vicious education; they prefer to adhere to the letter instead of searching for the spirit of the dominion expressed in the first book of Moses; it is so much easier.

We are taught to believe that many things are right, and experience demonstrates that they are radically wrong, both in inception and accomplishment. The truth fairly skins us alive sometimes with its satire. Still we go on believing in the right of wrong-doing; the knowledge of our mental infirmities is a sealed book to us.

It has been and is still believed by some that to break a broncho he must be roped, thrown, beaten, conquered before he can be utilized. I believed so once, but the method has always struck me as a dead failure. Were the breaker of as fine intellect as the broncho, in many instances he might gracefully submit to a reversal of situations and allow the broncho to train him, for out of the brains of bronchos we may learn wisdom, as well as out of the mouths of babes and sucklings.

I had a friend once, as brave a man as ever graced a saddle, leveled a Winchester or loved a child, and he owned a broncho. If he would saddle the animal once or three times a day the pony must be roped, thrown and blinded on each occasion. My friend said it was "the nature of the brute." I knew he could not be wantonly unkind to anything. It never occurred to me that it might be education, and that nature had nothing to do with it.

Several years later the madam and I were camped near an old log road in the mountains in the vicinity of a friend's ranch. One morning, as I was about building the fire for coffee, the ranchman's son, a lad of eighteen, came up the road with a bridle on his arm. He stopped near us and began to whistle, as one would for a dog. After he had whistled a few times I heard a whinnie, and in a few moments the rapid beat of a horse's hoofs broke upon the sweet peacefulness of the summer morning. Looking in the direction of the sound, I presently saw a pony coming down the old road on a keen run. A dappled gray pony, with ears erect and mane flying; his neck was outstretched and his eyes seemed to flash with exquisite pleasure; he came leaping on as if moved by thoughts of love, absolutely free, beautiful in form, graceful in his liberty and in every movement. Within a few rods of the lad the reckless gallop resolved itself into a swinging trot until he reached his friend, when he came to a halt and rubbed his nose against the boy's shoulder. The loud whinnie was softened and the arched neck pressed against the lad for the expected caress. It is a good twenty years since that bright morning, and yet the memory of it is as fresh as if I saw it now; I can taste again the very sweetness of the balsam-laden air, can see the tender blue mist that lingered about the distant hills, and see the pony's head resting against the boy's shoulder; and it seemed to me then as it does now, that if there had been hands instead of hoofs, he would have hugged the boy and would have kissed him on the lips, instead of on the hand, had he known how.

"Where did you get that horse, Harry?"

"Out of ——'s band."

"You don't mean to say he's a broncho—he's too kind and handsome?"

"That's what he is."

"How long have you owned him?"

"About three months."

"But how did you break him? I supposed that they had to be roped and beaten and—"

"Now don't you believe a word of it. I haven't even spoken cross to him, have I, Dick?"

The pony corroborated the statement beyond cavil. The madam went out and shook hands with the boy and hugged the horse, and I should not have blamed her had she hugged the boy, as I looked down into his honest, laughing gray eyes.

Patience and its attendant genius, kindness, without any exhibition of man's "dominion," a simple endeavor to bring himself up to the horse's standard of intellect, and the result was two loving friends. That they could not talk Greek, Latin or English to each other dignified the situation; the understanding between them was quite perfect and beautiful in its eloquence.

The next morning the clouds were settled about us, and my horse had pulled up his picket pin and strayed into the timber. I could not see twenty feet in any direction, but I could follow the trail of the iron pin and the rope through the pines, and the trees looked ghostly. When I reached the horse the spirit of "dominion" entered me, I gathered up the lariat and undertook to lead the way back to camp. I was as familiar with the mountainside as with my own yard, but the trail doubled on itself in some way, or I missed it, and it took me about five minutes to get lost. For half an hour I plodded around, taking a dozen different starts from as many familiar points in the way of rocks, dead trees and other certain monuments, knowing each time that I was going in the right direction. Finally I became disgusted—with the stupidity of the horse—his straying was iniquitous, the rope was a burden to me and I was hungry. As long as I led the way he followed passively, though I have no doubt he was wondering all the time at my enthusiastic morning pedestrianism and trying to ascertain my motive. I threw down the rope and said:

"Bob, will you find the way to camp?"

He only looked at me. I never had the same look bestowed on me but once before. I was talking with an Arapahoe brave, with another red gentleman standing by. I expressed my admiration, in a fluent way, of Left Hand, a chief of the Arapahoes, and the bystander looked all through the conversation just as Bob did. Finally I said:

"I should like to see Left Hand; he is a brave Indian."

"This is Left Hand," said my red brother pointing to the bystander, and the bystander smiled broadly.

"Glad to see you. How?" I inquired.

"Very well," said Left Hand, proffering his dexter, making me feel glad I had refrained from saying anything that might be construed into a discourtesy.

Bob, as I have said, looked just as did Left Hand, though he did not understand English so well; but my experience with Left Hand and his brother had taught me a lesson. I did not admit to the horse otherwise than that I was dependent upon him, nor but that I recognized his power of discriminating between politeness and its opposite.

"Will you please find the way to camp? Go on!"

He started and I followed. It did not take him five minutes to find the bag of oats under the buckboard.

Had I condescended in the first place the madam would not have been uneasy and "waiting breakfast" for me. When I explained to her the cause of my delay, my dilemma and how I had been relieved, she said:

"Had you let him alone he would have come home."

"I presume so—bringing his tail behind him?"

"I'm proud to know that you admit the philosophy of the nursery."

When you teach a dog to perform what you call tricks you feel proud of the dog as he displays his accomplishments successfully before admiring friends; you take a great deal of credit to yourself and consider yourself not the smallest part of the show. Certainly there is pleasure in it, and sometimes you are generous enough to love the dog for his intelligence and obedience. But how is it when the dog learns without your bestowing an effort on him? In such instance, if you are not wholly given over to arrogance, a touch of humility because of your own frailty, and a new respect for the intelligence of the dog, must come over you. When he educates himself, as it were, even in what you consider trivial matters, by what authority dare you say he may not be gifted with reasoning faculties as well as yourself? They may not be, perhaps, of as high order, considered from the human standpoint, but the possession of an imperfect faculty promises what? A capacity for development, certainly, and more, the possibility of perfection.

I sat reading a few nights since, alone except for Toney, the Maltese, and Frankie, the French poodle. I gave up my chair to Toney some time since, because he seemed to think it the most comfortable chair in the house; I deferred to his judgment, nay, I am ready to make oath that his judgment is absolutely without fault in this particular. My experience corroborates his to the division of a hair; sustaining each other my statement touching the chair is entitled to credit. When Toney desires to come into the house, or to go out, for that matter, he does not mew nor wait for the chance opportunity of some one coming to the door. He has ascertained that the knob is in some way connected with the mystery of opening a door, so he reaches up and rattles the knob. If the summons is not attended to he rattles again, and as often as politeness and a due respect for others will warrant. He seems to be aware that the inmates may be busy with more important matters, he is willing to concede the fact, trusting to receive attention as soon as his want is ascertained and it is convenient. This habit came near costing him his life on one occasion. But to return to Frankie. She was lying on the rug before the stove on the evening in question; she got up and went into the kitchen, in a few moments she came back, and sitting down by me placed her chin on my hand, which rested on the arm of the chair. She is but little over a year old, has beautiful brown eyes that I can only see when I put back from them the long, silky, black hair.

"What do you want, Frankie?" She got up and went to the door leading to the kitchen. I did not follow, and she returned, assuming her old position. I patted her on the head, and my hand rested there while I continued my reading. Turning over the page required the use of the hand, and, that service done, I rested it on the chair arm again. She put her chin upon it, giving vent to a low guttural sound, as if she were clearing her throat to say something.

"What is it, old lady?" She went to the door again, and stood there until I followed. She then led me into the kitchen, to the sink, placed her foot into the empty bowl upon the floor, tipped it over and looked up into my face. The children had gone to bed neglecting to put water in the bowl, and she was thirsty. In like circumstances a year old baby would have cried, and the party in charge would have investigated for a loose diaper pin, and, not finding the offending article, or the article offending, would have administered various antidotes for colic without success, because a baby always has the colic when it cries; if it fails to respond to treatment for colic then it is not an ordinary baby. If the babies could only talk or use a club—but no matter.

I had another dog (I have had a great many) a number of years ago. I saw him grow up from a puppy brought home in my arms until he weighed quite 150lbs. Broad between

the eyes, wide-chested, black-haired save for a white strip between his arms; wonderfully kind, except to other dogs. He seemed to understand at an early age that it was his business to take care of the house. If a tramp came into the yard he never treated the intruder otherwise than with courtesy. The tramp would never come in if he caught sight of the dog, but once in the dog attended him to a door or the gate as the trap inclined. The tramp must touch nothing; he could knock at the door, if it were opened Duke entered, faced round and stood there; when the tramp went away he escorted him off the premises. If a tramp offered him a part of his meal he declined. He could distinguish between a hungry man and a peddler, and drew the line at the latter; this was one of his virtues that won the heart of his mistress. One of this gentry came on a summer day to the front gate. Duke met him there. The foot-trader hesitated, but the dog looked so friendly that he ventured to put his hand on the latch; the dog growled. The peddler tried flattery and called him pet names; then, feeling encouraged, he reached over and patted the guardian on the head. Certainly that must settle the business, and he placed his hand on the latch again, but took it off immediately. The peddler was puzzled, but with characteristic persistence ventured on further caresses, which the dog received in dignified silence. The fellow's hand alternated between the dog's head and the gate latch for ten minutes, while the madam, looking through the closed blinds, enjoyed the exhibition. The peddler did not come in.

One would imagine that a dog in grateful remembrance of a bone or a refuse scrap from the family butcher would accord to that individual privileges not allowed to others not members of the household. But the butcher came one day and Duke met him and escorted him to the back door, both romping by the way; the butcher knocked, there was no response. Now, let him tell it in his own way:

"Nobody answered my second knock and I knocked agin; still nobody come, and Duke, he stood there lookin' up at me waggin' his tail and sayin' as well as he could he was glad to see me. But I had to leave the meat; the door was locked; then I thought I would raise the kitchen winder and lay it on the sill inside. Good enough. I put my hand on the sash, raised it about an inch, and Duke stepped right in front of me and growled. I couldn't think what he meant and spoke to him. But he give me to understand right there that I must not raise that winder. What did I do? Why, I just put my arm round his neck and hugged him, and went and left the meat next door and ast 'em to tell your wife when she come home. Talk about dogs not knowin'—go way! As well as he knowed me he knowed I hadn't no business goin' in that winder. I tell you, Squire, I love that dog!"

So did I, and to this day it is a pleasure to acknowledge my faith in him. When I was away from home I knew the loved ones were as safe as if guarded by men with muskets; safer, because love prompted him to duty, and where that is, even in a dog, nothing will be lacking.

Duke's good traits were many and he taught himself; his vice was fighting and that was taught him by a neighbor's boy, and I taught the boy something—but that did not break the dog of the habit. He was accustomed to take a run around the neighborhood in the morning if he missed getting into the house the night before. He always waited for me to open the gate for him, greeting me pleasantly as I came out. He could open the gate as well as I, but he established the custom and it was my province to fall in with it and we both enjoyed it. One morning when I opened the door I saw him lying in front of the gate, he did not move when I stepped out, and my heart felt for a second like a lump of lead in my breast. I made the few steps between us with an oppression weighing upon me that I could not, five minutes before, have believed possible. As I looked down upon him, convinced of my loss, I wanted to know who was the cause of it and then I felt it were better that I did not. And that same want haunts me now, after fourteen years, with the soberer feeling attending like a shadow appealing against the bitter purpose. I thought then:

"'Tis the murd'rous an' unmanly play
That gives the pang."

though "Puir Buffie" was not then known to me.

My friend Duke could have throttled the animal made in His image, if in a fair field. The poet was a better Christian than I; he knew the poisoner of his pet and harmed him not, though perhaps he withheld his forgiveness. I can only have hope in the fulfillment of the last stanza, believing that the superseuse of animals deserves more consideration than it receives. We dare not avow that it may not prove to be something even more exalted. L. B. FRANCE.

RACING THE YOUNGSTERS.

WE had a matinee at the coursing park yesterday afternoon for the purpose of further testing our plans and the practicability of coursing on inclosed grounds. We made an eight-dog stake for pups under 13 months old, all of Sandy Jim's offspring, and owned by eight different parties. D. C. Luse, of Great Bend, judge. A week previous to the races we drove 15 good buck jacks into the running grounds and trained them by chasing them through the course three times during the week with our dogs and muzzled greyhounds, so that they were familiar with the escapes. We had some very fine courses as the dogs had all been raised in the country and been used to running jacks and if anything above the average of pups of that age. We slipped them closer to the jacks than the rules call for as they had never been in slips before, and out of the eight races they only caught three and some of them they never turned. What they did catch led the dogs at least half a mile to the first turn. The day was beautiful, a good turnout and everybody enjoyed the sport. Mr. Luse makes a good judge and gave general satisfaction. In driving our grounds we had no trouble in getting in all the jacks we needed and could have secured as many more as we did get. They have increased beyond our most sanguine anticipations. I think without exaggeration there are 75 old ones and perhaps 200 young ones in the park. I have bought and put in 52 young ones up to date. We saw young ones in the drive that were almost grown. This was only an experimental meeting and settles the practicability of the scheme in favor of success. The next meeting we think we will hold in Chicago the last of September if we can get a suitable park. There will be a committee appointed to go there soon to make all necessary arrangements.

M. E. ALLISON.

HUTCHINSON, Kas., April 29.

PONTIAC AND BRAKE.—*Editor Forest and Stream:* In reviewing the performances of the two heavy-weight pointers Pontiac and Brake at the recent shows, your reporter assumes that Messrs. Davidson, Tallman and Mortimer were wrong in their judgment, and that the other judges who agreed with him were right. Now considering that two at least of the judges are exceptionally experienced sportsmen, is it not more probable that their preference for Pontiac was due to his having the best points for a field dog; than that they made all the errors that he accuses them of? Your reporter admits that Pontiac has better hindquarters than Brake, and every one who has seen him in the field must know that his shoulders, chest, etc., correspond with them or he could not have the free gait and great endurance that he has, and as to his being coarse, I can only say that if he were any finer, he would be so much the less fit for the rough work that a field trialer has to perform.—C. E. MCMURDO.

THE ENGLISH NATIONAL FIELD TRIALS.

THESE trials began near Newport, Shropshire, Eng., April 23. In the Puppy Stakes there were 33 starters, 20 setters and 13 pointers. The winning setters were:

First, Pride of Salop (G. Shaw), lemon and white bitch, 11 months (Little Billey—Bess).

Second, Rosa (A. P. Heywood-Lonsdale), liver and white bitch, 14 months (Ross—Pitti Sing).

Third, Ranger (A. P. Heywood-Lonsdale), black, white and tan dog, 14 months (Dick Wind'em—Peep Bo).

Fourth, Trip of Kippen (F. C. Lowe), liver and white dog, 15 months (Tutsham Trip—Dido).

POINTERS.

First, Banco of Brussels (A. Morren), orange and white dog, 15 months (Master Bang Bang—Lorna Doone of Kippen).

Second, Gem of Kippen (F. C. Lowe), lemon and white bitch, 14 month (Kent Cob—Magpie).

Third, Toil (T. Statter), lemon and white dog, 14 months (Naso of Upton—Titi 4).

Absolute winner, Banco of Brussels.

ACTON REYNALD STAKES.

For pointers or setters (limited to 12). There were 8 pointers and 4 setters. The winning pointers were:

First, Woolton Game (G. Pilkington), liver and white bitch, 2 years, 2 months (Gough—Larkspur).

Second, Belle des Bordes (P. Caillard), liver and white bitch, 6 years (Young Bang—Pollie).

SETTERS.

First, Bonny Daisy (J. Bishop), black, white and tan bitch, 23 months (Sailor—Flora).

Second, Randolph (F. Bibby), white and liver ticked dog, 3 years (Tory II.—Border Nell).

Absolute winner, Woolton Game.

CLOVERLY STAKES.

For pointer and setter braces. There were five braces entered and the winners were:

First, R. Ll. Purcell-Llewellin's English setter bitches Coquet B., black and white, 3 years 1 month (Dashing Bondhu—Duchess Primrose), and Belle Bondhu, black and white, 3 years (Dashing Bondhu—Duchess Placid).

Second, R. J. Lloyd Price's liver and white pointer dog and bitch, Sir Watkin, 2 years (Jasper—Mink), and Miss Sixpence, 3 years 3 months (Lucky Sixpence—Golden Slippers).

RUSSIAN - SIBERIAN - CIRCASSIAN WOLF-HOUNDS OR GREYHOUNDS.

Editor Forest and Stream:

I am tempted to set up as an "authority." I used to fight very shy of that reputation, but I know of half a dozen or more who don't know half the little that I do, setting up as wiseacres and good lack, as "judges:" and I don't see why my small candle shouldn't ape a "Brush" light as well as theirs; certainly it can't flicker any more, and I don't think I will let it smell as badly of "smokiness," like to that of Lima oil, as some of the light that has been lately shed on us does. To the point: I propose to "set up" on the above breed, breeds or imitation of breeds, principally because they are new, and nobody knows what is the "right thing;" and, further, because I would like to "boom" the breed. I am not circumstanced so that I can breed them myself, or I would go into them at once, for they are the loveliest dogs I have ever seen, and the *chien de luxe*.

Like other of our recent "authorities" I bank on what I can pick out of books, and following Mr. Potts, I take Vero Shaw, skillfully mix Dalziel's new edition of "British Dogs," flavor the hash with the three dogs of the breed I have seen, and am an object to be looked up to. The beauty of Vero Shaw's pictures will be admitted at once, but what is faulty in the dogs, as members of the greyhound family, is lack of length of body; heads, legs, chests and coats are very good; the fault of Domovoy in "British Dogs" is principally roughness or wiriness of coat. This should not be: the coat should be just what we should look for in a cross of setter and greyhound, shorter than the setter's, perfectly flat, fringed about as shown in Domovoy (thunder! the "authority" said "fringed" when it should be "feathered").

The faults of the dog shown at New York were that he is very much too short in body and badly carried and feathered tail. Compare him with a greyhound and the lack of length is obvious at a glance, while the tail is all wrong; this dog's tail is a setter one, pure and simple, both in carriage and feather. Whoever saw a greyhound with a sickle tail, carried up above the back like the boom of a derrick? It should be carried between the legs with just the tip sticking out, like the picture of Lauderdale in Vero Shaw. Then it should not be brushed from the root to point, it needn't be bunched with rags at the end like a Persian's, but free from feather at the root and moderately fringed from about half way to the tip. (Oh, yes, like a "pure" Gordon's.) Mr. Hacke's dog, Czar, shown at Pittsburgh, was too much of the deerhound in type, with a curly, somewhat soft or wooly coat, not the sleek, shiny one of his son or of the New York dog; his face had the rudiment of a beard and was not as finely drawn as it should be. His son, shown at the same show, was about perfection: Very large with great length, roached like a cat, with tremendous quarters, tucked up flank, coat just right, and exquisite head, tail nicely tucked in and feathered on only about three-quarters of its length. I constantly thought as I looked at this dog, "What a dog to follow a handsome span of horses or a lady on horseback." What a dash "Flora McFlimsey" would cut with a pair of these dogs "to wear," and what a hole she would make in papa's pocket to carry out her ambition to be ahead of her dear rival!

We really have no breed of dogs thoroughly suited for this purpose. As a companion-guard a mastiff is perfection, but he is quite too heavy and ponderous for following a horse. The same as to St. Bernards, and as I see them, too many are faulty in hindquarters. Neither have the elegance of outline that accords well with a thoroughbred horse or dame of fashion. A greyhound has the elegance but lacks the appearance of power, and a deerhound would be considered an ugly dog by ninety-nine out of a hundred non-dog show habitués. The mere appearance of a boarhound is terrifying, and few beaux would have the courage to approach Miss Flora when she was so attended. No other dog comes near the requirements of size. Now the Czarish greyhound (be he in either of the above divisions) has every desired qualification: beauty, size, power and speed, and I should think their dispositions were excellent. Their expression is very amiable and pleasing, and they seem as fond of attention as most dogs.

So many Americans of wealth and leisure "go into dogs" just to be in the swim, and ten chances to one pitch on to mastiffs, St. Bernards, fox-terriers or collies, that are well taken up now, and where they either have to dip repeatedly in their pockets to keep up or be rated second fiddlers, with ninety-nine out of a hundred chances against their ever making a name except as liberal buyers; now why don't some of them take up this lovely breed, almost unknown here and but little fancied in England? They are no more in the shade than St. Bernards were when Macdona took them up, and they are now at the top of the tree.

To be honest with you, I have tried to forestall the market by sending an order to England, and this is in the nature of a free ad. I don't intend to keep the dogs myself, but I know a good fellow who will take care of that end of the string. Whoever follows my example should be sure to require the greyhound type, not the deerhound one. From the fact of Mr. Hacke's old dog being of the latter type and his son of the former, I am convinced that there is little exact uniformity of type in them, particularly as Mr. Hacke selected his pair at the Jardin d'Acclimatation at Paris. The greyhound is very much the handsomer type of dog.

W. WADE.

HULTON, Pa.

DOG TALK.

IN quoting the remarks of the Omaha *Herald* last week in relation to the dog show held in that city being a fake, we should have noted that the *Herald* is owned and managed by Mr. R. A. Craig. The average daily paper generally mixes up dog matters in a manner wonderful to behold, but Mr. Craig, as our readers well know, is very apt to get hold of the right end of the stick. We are informed that a number of prominent dog men in Omaha have decided to form a kennel club, and we have no doubt that the show they propose holding next season will receive the hearty support of exhibitors as well as the public.

Mr. Wm. Graham, or as he is better known, the Irish Ambassador, does not often get a rise taken out of him in the line of dogs, but the following little tale, if true, shows that complications may arise that are not contemplated even in the best laid plans: It appears, so the story goes, that in some unexplained manner the Ambassador became the owner of a dog that in common parlance was a "oad un," and how to get rid of him without any strain upon his conscience became an absorbing question. Finally the dog was given to a person who was about to exhibit at a distant show with instructions to enter him for sale at £20, and to accept the best offer obtainable, one-half the proceeds to be retained for the service. Now it happens that the Ambassador had a friend to whom he had given a roving commission to purchase any dog that was good and cheap, and the friend happened to attend this show, and seeing the dog—a veritable "flat-catcher"—was so well pleased with it that he at once secured it, paid the price and shipped it forthwith to the Ambassador, who is still trying to figure up the profit and loss in the transaction.

At the meeting of the Associate Members of the American Kennel Club held during the Boston dog show for the purpose of organization there were 11 members present and 23 were represented by proxy. Dr. J. F. Perry was unanimously elected President, Mr. E. H. Moore, Vice-President; and Mr. H. W. Huntington, Secretary. The above named officers were also appointed as delegates to the American Kennel Club.

Mr. Wm. Graham, of Belfast, Ireland, arrived in this city last Saturday. We were favored with a visit from him on Monday and were pleased to see him looking so well. He leaves to-day for San Francisco to judge at the show of the Pacific Kennel Club, to be held May 22 to 25. As an all round judge Mr. Graham has few equals and the fanciers of the Pacific coast are to be congratulated upon securing his services.

The National Poultry and Bench Show Association of Atlanta, Ga., has been dropped from membership by the American Kennel Club for non-payment of dues, and the officers of the association, Messrs. H. W. Grady, T. O. Hall and W. B. Henderson, have been disqualified from showing under A. K. C. rules, for non-payment of prize money won at their show in January, 1888.

There was a dog fight at Winsted, Conn., recently, between a Newfoundland and a foxhound. After a short scrimmage the Newfoundland seized his antagonist and dragging him into some water held his head under until he was dead. The owner of the foxhound we understand will bring suit for the value of his dog against the owner of the victor.

Mr. E. B. Goldsmith, forwarding agent of 58 Wall street, this city, has just received per steamer State of Nebraska, the red Irish setter dog Garryowen IV., from the kennels of Mr. Jas. J. Giltrap, Dublin, Ireland. The dog is owned by Mr. George H. Covert, of Chicago, to whom he was forwarded.

We have received a letter from Mr. A. G. Eberhart, Cincinnati, O., in which he states that a person named John Davis is advertising and selling pug puppies that are said to be by Mr. Eberhart's Bradford Ruby II., which is not true, as Mr. Davis has never had the use of the dog.

Mr. E. O. Damon, Northampton, Mass., has recently imported the red Irish setter dog Darby II., winner of first in local and second in open class at Cork, 1888. Darby II. was whelped April 22, 1886, and is by Chieftain (Palmerston—Quail) and out of Nellie X. (Cocksure—Nellie).

Lord Neversettle, Mr. H. C. Lowe's recently imported greyhound, is reported to have broken a foreleg in pursuing a jack rabbit. The accident occured near Hutchinson, Kas.

Entries for the first annual Derby of the Central Field Trial Club close on Wednesday, May 15.

Mr. R. F. Mayhew will judge the non-sporting classes at the Toledo dog show, Sept. 7.

BLEMTON VERITY.—Hempstead, N. Y., April 30.—*Editor Forest and Stream:* I notice in your report on fox-terriers at Philadelphia you state that the winning bitch Blemton Verity was sent home on the first day on the ground that she was sick. This is false. Did your correspondent or any one else see the veterinary's certificate necessary in such cases? The true version is this. Being a young bitch in whelp, and not having had distemper, it was my intention to remove her from the building at night, vide regulation 13. On application to the superintendent I was informed all puppies could be removed on the first night if so wished. He at once signed me an order to remove Blemton Ravager, Bloom and Verity, which arrangement suited me admirably, as our kennel man was returning to the kennels that night. No question of sickness arose and being unaware that a protest was to be made against Verity, your intimation that any jockeying was contemplated by the Blemton Kennels through me has no more foundation than your correspondent's narration of invented facts. Verity was by Mr. Belmont's orders taken by me to Philadelphia, on Thursday last the 25th inst., and submitted to the Philadelphia Kennel Club officers and veterinary. It was proved upon test that the bitch heard and the protest was not sustained.—GERMAN HOPKINS, Manager.

RUNNING WEIGHT OF GREYHOUNDS.—*Editor Forest and Stream:* Mr. H. W. Huntington did not read my remarks on the running weight of greyhounds in your paper of April 18 quite correctly. I stated the average weight of dogs who had won the Waterloo cup was from 60 to 65lbs. This remark was not intended to include bitches who have won Waterloo cups. Their average weight we all know would not exceed 55lbs. Mr. Huntington, in his remarks on certain greyhounds in FOREST AND STREAM of April 25, only confirms my opinion, that a big greyhound can be equally as handy with his hare as a little one. My experience has always been that a good big one will generally beat a good little one.—H. C. LOWE.

NEW FOX HUNTING CLUB.—A hunt club is being organized near Hyde Park, N. Y., under the name of the Dutchess County Hunt Club. Among the gentlemen who are interested and are active in the organization are Messrs. Archy Rogers, E. P. Rogers, N. P. Rogers, John A. Roosevelt, James Roosevelt, Walter Langdon, F. Yelverton and Rives, of New Hamburg. Mr. E. P. Rogers has purchased forty beagles for the club, and they will be shipped to his place this summer. Hurdles are to be put up on Mr. Archy Rogers's place for training horses. The objects of the club are to encourage the enjoyable and health-giving practice of riding; to enable those desiring to ride cross country to do so by keeping a pack, and to appoint certain days of the week during the months of October and November for meets, one day to be devoted to drag hunt and one day to fox hunting, so that all can enjoy which they prefer.

BEAGLE AWARDS AT PHILADELPHIA.—Philadelphia, May 5.—*Editor Forest and Stream:* Please correct a statement in report you made of Philadelphia dog show in regard to third prize in open bitch class for beagles. Blanche owned by Mr. Bond did not receive any prize. Mr. Hallett, the judge, awarded my bitch Diana third prize, he handed me the yellow ribbon, but made a mistake in marking his book. I afterward called the attention of the Philadelphia Kennel Club to the mistake and they and I wrote the judge and he replied that he made the award to my bitch. Please correct the mistake in your next issue and oblige—W. H. ASHBURNER.

EASTERN FIELD TRIALS CLUB.—There will be a meeting of the Board of Governors of the Eastern Field Trials Club at 44 Broadway, New York, on Tuesday, May 14, at 3:30 P. M. The president specially requests the attendance of members of the board as he will lay before the meeting the suggestion that the club relinquish its champion stake and subscribe the same amount to a National Champion Stake to be run next January under the joint management of delegates appointed by each club.

BLACK AND TAN TERRIER SPECIAL AT PHILADELPHIA.—Buffalo, April 29.—*Editor Forest and Stream:* In your report of the Philadelphia bench show you state that Sheffield Lass won the special prize for the best black and tan terrier dog or bitch. This is an error, as my dog Buffalo General was awarded the special prize.—A. W. SMITH.

LANCASHIRE WITCH.—New York, May 5.—*Editor Forest and Stream:* In attributing the report of the Worcester dog show to Mr. Chas. H. Mason, it appears I did that gentleman an injustice, for which I beg through your columns to offer amends.—SARAH LEGGETT EMORY.

KENNEL NOTES.

Notes must be sent on prepared blanks, which are furnished free on receipt of stamped and addressed envelope of large letter size. Sets of 200 of any one form, bound for retaining duplicates, are sent for 30 cents.

NAMES CLAIMED.

☞ **Notes must be sent on the Prepared Blanks.**

Rustic George, Rustic Kate and Rustic Anna. By G. W. Fisher, Catawissa, Pa., for golden fawn pugs, one dog and two bitches, whelped April 6, 1889, by Rustic King (Rustic—What's That) out of Tra-la-la (Young Toby—Tantrums).

Cassia. By G. W. Fisher, Catawissa, Pa., for pug bitch, age not given, by champion Max out of Ollie.

BRED.

☞ **Notes must be sent on the Prepared Blanks.**

Wacouta Donna—Edwy. C. N. Powell's (Omaha, Neb.) mastiff bitch Wacouta Donna (champion Ilford Chancellor—Ilford Comedy) to Dr. G. B. Ayres's Edwy (champion Orlando—Countess of Woodlands), April 30.

Say—Graphic. Fleet View & Reading Pointer Kennels' (Lynn, Mass.) pointer bitch Say to C. Heath's champion Graphic, March 29.

Timferna—Brock. E. M. Crouch's (Thomaston, Conn.) pointer bitch Timferna (Tim—Guiferna) to his Brock (Dash—Zoe), April 25.

Lady Price—Duke of Hessen. The Elms Kennels' (Forest Lake, Minn.) pointer bitch Lady Price to F. R. Hitchcock's Duke of Hessen, April 24.

Dot—Lord Nelson. A. E. Pitts's (Columbus, O.) pug bitch Dot (Ellis's Jim—Cute) to Acme Kennels' Lord Nelson (champion Toby—champion Queen Mary), March 5.

Minnie—Lord Nelson. A. E. Pitts's (Columbus, O.) pug bitch Minnie (Cricket—Pansy Blossom) to Acme Kennels' Lord Nelson (champion Toby—champion Queen Mary), April 12.

Judy—Lord Nelson. H. L. Woodman's (Chicago, Ill.) pug bitch Judy to Acme Kennels' Lord Nelson (champion Toby—champion Queen Mary), March 13.

Judy—Rustic King. J. L. Camdbell's (Montreal, Can.) pug bitch Judy to G. W. Fisher's Rustic King, Feb. 4.

Tra-la-la—Rustic King. G. W. Fisher's (Catawissa, Pa.) pug bitch Tra-la-la to his Rustic King, Feb. 6.

Midge—Rustic King. G. W. Betsch's (Bloomsburg, Pa.) pug bitch Midge to G. W. Fisher's Rustic King, March 28.

Dollie—Rustic King. G. W. Wambach's (Baltimore, Md.) pug bitch Dollie to G. W. Fisher's Rustic King, April 23.

Rose—Rustic King. G. W. Fisher's (Catawissa, Pa.) pug bitch Rose to his Rustic King, May 6.

Bessie—Valens. O. H. White's (Wauwatosa, Wis.) St. Bernard bitch Bessie to Acme Kennels' Valens (champion Valentine—Suzeraine), April 23.

Empress—Valens. C. C. Sidler's (Milwaukee, Wis.) St. Bernard bitch Empress (Tell—Noma) to Acme Kennels' Valens (champion Valentine—Suzeraine), Feb. 14.

Jill—Valens. C. W. White's (Milwaukee, Wis.) St. Bernard bitch Jill to Acme Kennels' Valens (champion Valentine—Suzeraine), March 26.

Lady Nell—Clan Warwick. The Elms Kennels' (Forest Lake, Minn.) English setter bitch Lady Nell (A.K.R. 6646) to their Clan Warwick (A.K.R. 6645), April 18.

Lady Edith—Tim. J. H. Ackroyd's (Saylesville, R. I.) Irish setter bitch Lady Edith (champion Rory O'More—Lady Berkely) to Max Wenzel's champion Tim (Biz—Hazel), April 19.

Black Meg—Black Pete. H. S. Reynolds's (Poughkeepsie, N. Y.) cocker spaniel bitch Black Meg (Obo II.—Darkie) to J. P. Willey's Black Pete (Obo, Jr.—Phonsie), March 19.

Elora Tatters—Blemton Trump. H. P. Thompson's (Toronto, Can.) fox-terrier bitch Elora Tatters to Mr. Macdonald's Blemton Trump (Bacchanal———), May 2.

Biddy—Bradford Harry. A. M. Goldsmith's (Chicago, Ill.) Yorkshire terrier bitch Biddy (Bonnie Britton—Lassie) to P. H. Coombs's Bradford Harry (Crawshaw's Bruce—Beale's Lady), April 9.

Tiny—Bradford Harry. Geo. E. Richards's (Bangor, Me.) Yorkshire terrier bitch Tiny (Tug—Mistress Mary) to P. H. Coombs's Bradford Harry (Crawshaw's Bruce—Beale's Lady), March 30.

WHELPS.

☞ **Notes must be sent on the Prepared Blanks.**

Nell. Dr. B. C. Russell's (Keene, N. H.) pointer bitch Nell (Sam—Gyp), April 27, nine (five dogs), by W. M. Williams's Judge (Ned—Floss).

Judy. J. L. Campbell's (Montreal, Can.) pug bitch Judy, April 4, eight, by G. W. Fisher's Rustic King.

Tra-la-la. G. W. Fisher's (Catawissa, Pa.) pug bitch Tra-la-la, April 6, three (one dog), by his Rustic King.

Berna II. The Elms Kennels' (Forest Lake, Minn.) St. Bernard bitch Berna II., April 18, eight (four dogs), by D. Bergman's Martigny.

Empress. Acme Kennels' (Milwaukee, Wis.) St. Bernard bitch Empress (Tell—Noma), April 17, ten (five dogs), by their Valens (champion Valentine—Suzeraine).

Belle Ward. W. McKennan's (Washington, Pa.) English setter bitch Belle Ward, April 26, nine (three dogs), by Mt. Washington Kennels' champion Paul Gladstone.

Jennie II. Louis Parisette, Jr.'s (South Brooklyn, N. Y.) Gordon setter bitch Jennie II. (Buck—Jennie), April 25, six (three dogs), by W. S. Hammett's Royal Duke (Bob—Nell).

Starlight. John J. Hooley's (Troy, N. Y.) Yorkshire terrier bitch Starlight (Howland's Dingo—Bess), April 20, three (two dogs), by P. H. Coombs's Bradford Harry (Crawshaw's Bruce—Beale's Lady).

SALES.

☞ **Notes must be sent on the Prepared Blanks.**

St. Joe Patty. Fawn, black points, mastiff bitch, whelped Aug. 17, 1887, by champion Ilford Caution out of Juno, by St. Joe Kennels, Niles, Mich., to H. M. Wood, Jeffersontown, Ky.

Kittie Comedy. Fawn, black points, mastiff bitch, whelped March 24, 1889, by Edwy out of Ilford Comedy, by Dr. G. B. Ayres, Omaha, Neb., to Fred E. Winning, same place.

Mainspring—Fly whelp. Lemon and white pointer dog, whelped Feb. 25, 1889, by Jas. P. Swain, Jr., Bronxville, N. Y., to Stephen T. Barker, New York.

Judge—Ruby whelp. White and liver pointer bitch, whelped Feb. 10, 1889, by Jas. P. Swain, Jr., Bronxville, N. Y., to F. T. Hurless, Jr., Windsor Locks, Conn.

Bello—Empress whelps. Orange and white St. Bernard dogs, whelped Oct. 15, 1888, by Acme Kennels, Milwaukee, Wis., three to D. P. Redd and one each to Dr. J. Senti and A. Cramer, all of same place.

Cesar. Orange and white St. Bernard dog, whelped Oct. 15, 1888, by Bello out of Empress, by Acme Kenncls, Milwaukee, Wis., to O. Lethamman, same place.

Chautauqua Prince. Lemon and white English setter dog, whelped May 11, 1888 (A.K.R. 6484), by F. T. Weatherill, Jonesville, N. Y., to J. R. Bancker, Urbana, O.

Bridget. Dark red, small white star on breast, Irish setter bitch, whelped Aug. 6, 1888, by Reo out of Juliet (A.K.R. 6414), by F. T. Weatherill, Jonesville, N. Y., to Dr. M. E. Daughtry, Franklin, Va.

Elora Tatters. White, black and tan fox-terrier bitch, age and pedigree not given, by G. Bell, Toronto, Can., to H. P. Thompson, same place.

Rifle and Trap Shooting.

RANGE AND GALLERY.

BOSTON, May 4.—The regular rifle shoot of the Massachusetts Rifle Association was held at their range to-day. The shooting conditions were very good, and some fine scores were made. A large number of riflemen were present, and much shooting done in all the matches. Mr. Francis won the gold medal in the 20-shot rest match, and Mr. Loring won the gold champion medal, following are the best scores finished to-day:

Champion Medal Match.

A Loring	7	7	10	10	6	9	6	10	7	—	77
C Willard (mil)	8	5	7	10	9	7	10	7	6	6	75

WILMINGTON, Del., April 29.—When the riflemen faced the butts at Healdmoor Range, Wilmington, Del., to-day, and saw the coquettish character of the wind, as indicated by the flags, they forsaw that it would require the sharpest kind of watching to come out with respectable much less high scores. With a grim determination to celebrate such a glorious event as the centennial of Washington's inauguration with a regular "John Adams" kind of a time, and in spite of all unfavorable conditions, the riflemen good humoredly "went in" to enjoy the afternoon. Following are the scores in detail, off-hand, standard American target:

Record Practice—200yds.

C Heinel, Sr	10	5	7	10	6	4	8	7	6	8	—71
H Simpson	8	7	10	7	10	7	5	3	4	4	—65
H Johnson	4	5	9	3	10	6	6	6	6	3	—58
H A Spoerl	0	4	7	8	5	5	4	2	6	10	—51
P Williams	7	5	5	5	5	8	4	4	2	6	—51

Revolver Match—30yds.—100-30 S. A. Target.

E J Darlington	9	10	9	8	7	9	8	6	5	5	—76
E Darlington	7	7	5	4	7	10	9	8	8	8	—74
E Jackson	2	5	6	9	6	9	3	6	7	6	—60
H Johnson	8	2	6	4	3	9	5	8	3	6	—54

Revolver Match—50yds.

H Simpson	5	8	7	7	8	8	7	10	7	6	—68
S Howard	3	7	4	5	8	6	4	7	5	7	—56
E Jackson	3	3	7	8	7	3	4	6	6	8	—55
P Williams	4	6	4	7	3	4	6	3	3	7	—47

ONTARIO RIFLEMEN.—The annual meeting of the Ontario Small-Bore Association was held at Orillia on May 1. There was a large gathering of delegates of the different clubs. The president, Mr. J. W. Crossley, was in the chair. There were two sessions lasting up to midnight. The president addressed those present on the success which attended the organization. The name of the association was changed from the Ontario Small-Bore Rifle Association to the Off-Hand Rifle Association of Ontario. Mr. Crossley was re-elected President; Geo. E. Whitten, First Vice-President; John Doolittle, Second Vice-President, and J. H. Ross, King City, Secretary-Treasurer. An executive committee was appointed to arrange matters and attend to all matters not provided for in the rules. The association commences its second year under most favorable circumstances. Any sportsman can have a copy of the rules free by sending card to J. W. Crossley, King City. Before the meeting the delegates shot a match for two cash prizes, the first being given by the president and the other by the Orillia Association. The prizes were given for the best two delegates from any club making the highest score, and the first prize was won by J. W. Crossley and J. H. Ross, of King City, and the second by Simpson Rannie and J. Davidson, of Scarboro'. The following is the score:

King City—J W Crossley	82	Aurora—Eli Braund	79
J H Ross	89—171	J C B Johns	82—161
Scarboro'—S Rannie	82	Orillia—Wm Paine	63
J Davidson	88—170	Geo E Whiten	82—145
Bradford—Dan Neilly	73	Alliston—A Graham	86
Jos Neilly	90—163	Dr Sutherland	50—136

OTTAWA, April 27.—The Rifle Club to-day had their second spoon shoot, 200, 500 and 600yds., and three classes. Dr. J. E. Hutchinson again wins first with a score of 87—should have been 92—he making an error by shooting at the wrong target and scoring a bull. Capt. C. F. Cox took second with 79, and for third Scott and Lightfoot tied at 77.

ST. LOUIS, Mo., May 4.—The sixth tourney of the St. Louis Pistol Club came to an end last Wednesday night, and Mr. L. V. D. Perret becomes the final winner of the medal, having finished with the very good average of 81⁹⁄₁₀ for the twenty shoots he contested in. Fodde came in second with an average of 80¹⁵⁄₁₆, he having taken part in sixteen shoots. Mr. M. Summerfield takes the first handicap prize and Mr. Race second. At the last shoot only nine members were present, and Fodde carried off the honors by making 87, and will in consequence retain the medal for one week, when it will be turned over to Mr. Perret. A 30yds. standard American target and Stevens .22-cal. pistols are used for all shooting. The scores are as follows:

F A Fodde	9	10	10	8	10	6	8	9	7	10—87
M Summerfield	9	6	10	9	10	8	9	9	6	8—84
W H Hettel	9	8	7	10	8	7	5	6	10	9—79
J A Lee	7	10	8	7	4	7	10	10	7	7—77
A E Bengel	4	9	8	10	8	5	10	6	9	6—75
W Bauer	9	9	8	4	7	5	8	7	10	8—75
W Mackwitz	6	9	5	7	7	5	6	7	7	6—65
W Billmeyer	8	5	5	4	8	10	5	7	4	7—63

UNSER FRITZ.

NEWARK, April 30.—To-day was a lively day at the Shooting Park, sixteen members of the shooting society and two New Yorkers being on hand. Ten of the party were recently elected members. The main attraction was a dinner match between Barney Walther and M. Dorrier, of the Zettler Rifle Club, on one team, and the "Two Obediahs," of the Newark Shooting Society, on the other. The match was 50 shots each on the German ring target. The "Two Obediahs" had to settle for the dinner, the scores being as follows:

Dorrier	222	210	211	216	228—1,087
Walther	200	215	210	206	224—1,055—2,142
Young Obediah	219	125	227	211	222—1,094
Old Obediah	209	195	179	184	187— 954—2,048

A 50-shot match was also shot between Theo. Babcock and A. Begerow, the former winning by the following score:

Babcock	207	206	207	197	204—1,020
Begerow	193	209	193	203	210—1,013

In a 10-shot match between Campbell and Halsey, the former won by 211 to 194. Two matches were also shot between Begerow, Babcock and Campbell, the first being won by Babcock and the second by Begerow.

THE TEAM ABROAD.—Subscriptions to defray the expenses of the Massachusetts Rifle Team's visit to England are coming in most satisfactorily, and Treasurer A. P. Potter makes his third acknowledgment of sums paid in up to noon Saturday, April 27, of $3,025.

THE TRAP.

Scores for publication should be made out on the printed blanks prepared by the Forest and Stream, and furnished gratis to club secretaries. Correspondents who favor us with club scores are particularly requested to write on one side of the paper only.

Secretaries of clubs and managers of tournaments are requested to keep us advised of the dates of their shoots, so that we may give due notice in our column of fixtures.

FIXTURES.

May 14, 15, 16.—Ohio Trap Shooter's League tournament, Cleveland, O.

May 14, 15, 16, 17.—Iowa State Sportsman's Association's annual tournament, Des Moines, Ia. A. C. Miller, Secretary, Des Moines, Ia.

May 16, 17.—Olean Sportsmen's Association tournament, Olean, N. Y.

May 21, 22, 23.—Minneapolis Gun Club tournament, Minneapolis, Minn. James Pye, Secretary.

May 27 to June 1.—Missouri State shoot.

May 29, 30, 31.—South Side Gun Club tournament, Milwaukee, Wis. C. W. Milbraith, Secretary.

May.—Nebraska State Sportsmen's Association's fifteenth annual tournament, Norfolk. B. B. Locke, Secretary.

June.—Annual tournament Sportsmen's Association of the Northwest, Tacoma, Washington Territory.

June.—Ninth annual tournament Southern Illinois Sportsmen's Association, Belleville. C. P. Richards, Secretary.

June.—Kansas City tournament.

June 3, 4, 5, 6, 7.—New York State Association for the Protection of Fish and Game tournament, Albany, N. Y. Horace B. Derby, Secretary, Albany, N. Y.

June 6, 7 8.—Southern Illinois Sportsmen's Association's ninth annual tournament, Belleville, Ill.

June 10, 11, 12, 13, 14.—First tournament of the American Shooting Association, at Cincinnati, O.

June 18, 19, 20, 21.—Illinois State Sportsmen's Association's tournament, Grand Crossing, Ill.

Aug. 20, 21, 22, 23.—Second annual tournament of the Keystone Manufacturing Co., of Corry, Pa. Traps will be pulled by a new electric apparatus.

Sept. 17, 18, 19, 20.—Central Illinois Sportsmen's Association's eleventh annual tournament, Jerseyville, Ill.

THE MIDDLESEX TOURNAMENT.

DUNELLEN, N. J., April 30.—The Middlesex Gun Club celebrated Centennial Day by holding one of their popular tournaments. As usual, they were favored with a large attendance and pleasant weather. Shooting began at 10 A. M., and the banging of the guns did not cease until darkness had set in. Sweepstakes at artificial targets were shot all the forenoon from the five center traps, under Keystone rules, and while the live-bird shoot was going on targets were shot from a side set of three traps, under Chamberlin rules. The big live-bird sweep was called promptly at 1 o'clock. The club had guaranteed $150 for this event, and it more than filled, no less than 25 of the cracks of the East entered, making a grand sweepstakes of $375 divided into four moneys. The birds, unfortunately, were only an average lot of spring birds, occasionally a hard driver, then a duffer. They puzzled the experts, as the scores show. W. Fred Quimby was referee and Jacob Pentz scorer. The Tournament Committee, headed by President Smith, kept the events moving lively, and there was sport enough for all. The work of Mr. Voorhees was remarkable for a man of his age. He is probably one of the oldest shooters facing the traps to-day, but he keeps the young fellows busy all the time. Among the visitors from a distance was Mr. E. S. Mills, of Washington, D. C.; he dropped in accidentally, and, shooting a strange gun and shells, he entered the sweep. He expressed himself as much pleased. The scores ran:

Event No. 1, 10 bluerocks, Keystone rules, $1 entry:

Miller	1111111111—10	Turford	1100001010— 4
S G Smith	1101101100— 6	"Tee Kay"	1110111100— 7
F Mahlon	1111111111—10	Apgar	0011111111— 8

D Terry	111110110—7	J Richards	001111000—5

W. Terry first, Soper and Brantingham second, Robinson and Zwerlein third, Tee Kay fourth on shoot-off with 3. TEE KAY.

ST. PAUL GUN CLUB.

ST. PAUL, Minn., May 4.—Yesterday the weather report called for "strong southerly winds and local storms." The storms did not put in an appearance, but the wind was on deck. It was impossible to tell where to hold, and as a consequence the members of the St. Paul Gun Club and their visiting friends made some "rocky" scores. First some one would make a straight, and perhaps the next event would not get a place at all. Every one was out for fun, however, and evidently had it, for all seemed to enjoy themselves. The entrances were light, so that no one lost much. Mr. Hanson, a visiting sportsman from Litchfield, Minn., and one of the best shots in the State, got his full share, as he was very successful in shooting off the ties. The Challenge Badge shoot caused considerable interest because the contestants are the large gun dealers here, and are sharp rivals in business as well as at the trap. Although the scores are low they are good considering the furious gale that was blowing from the rear and rolling over the club house would make the birds dodge in a most bewildering way.

The club badge was won by Pfister on the splendid score of 9 out of 10 single and 5 pairs Peorias, which is a hard score to beat on a fine day, and simply wonderful on a day like yesterday.

First event, 15 single Peorias, 18yds. rise, 5 screened traps, 3 moneys:

Max	011111111111100—12	Browning	000000011011111— 7
Bennett	011000101001111— 8	Pfister	010110111111100—10
Kennedy	111011111111001—12	Burke	111100111111110—12
Hanson	111110101111110—12	Holt	111111011111001—12
Fish	000111101110001— 9	Skinner	101110001110111—10
Chantler	111101111011111—13	Forbes	101011111111101—12

Chantler first money, Hanson second after breaking 6 straight on rie, Pfister and Kennedy third.

Second event, 5 singles and 3 pairs Peorias, same conditions:

Max	01111	11 10 11—8	Pfister	10011	10 01 10—6
Bennett	11111	11 10 10—9	Burke	10111	10 11 11—9
Kennedy	11101	10 11 10—8	Holt	01111	10 10 10—7
Hanson	11111	10 11 10—9	Skinner	11101	10 11 10—8
Fish	00011	10 11 11—7	Forbes	01010	11 11 11—8
Chantler	10011	11 10 11—8	Cummings	01001	11 00 10—5
Browning	01111	00 11 10—7			

Hanson first on shoot-off, Forbes and Skinner second on shoot-off, ties on 7 divided third.

Challenge badge, 15 singles and 5 pairs Peorias, American rules, entrance $5:

Burkhard	011110110011111	10 10 00 11 11—17
Kennedy	101011011001000	10 11 10 11 11—15

Burkhard wins badge for the second time and is challenged for next Saturday by Holt.

Third event, 10 single Peorias, same conditions:

Max	0111101100—6	Pfister	1111101100—7
Bennett	1110011111—8	Burke	1111110111—9
Kennedy	1111111011—9	Holt	1110100110—6
Hanson	0011101011—6	Pants	0011100110—5
Fisk	1001001100—4	Forbes	1111110111—9
Chantler	1011011110—7	Cummings	0110111001—6
Browning	0111011100—6	Blakely	0011111011—7
Bennett	1111111111—10	Kilby	0100111010—5
Fish	1111111110—9	Pants	0111100110—6
Chantler	1111010100—6		
Browning	1011010100—5		
Pfister	1101111111—9		

Fish and Forbes first, Pfister second, Bennett and Holt third.

Badge shoot, 10 singles and 5 pairs Peorias, $1 entrance:

Max	1110101111 11 10 11 10 10—15
Bennett	1111001010 11 11 11 11 11—16
Kennedy	1111101111 11 11 10 10 11—17
Hanson	1111110011 10 11 00 11 11—16
Fish	1011110111 11 11 11 10 01—16
Chantler	1110111111 10 11 11 11 10—17
Browning	1010111001 01 00 10 10 00— 9
Pfister	1111111111 11 11 11 10 11—19
Burke	1111100100 11 10 11 10 11—14
Forbes	1011110111 11 11 10 10 11—16
Cummings	0111001111 00 00 10 10 10—10

Pfister wins badge and first, Chantler and Holt second on shoot-off, Forbes third on shoot-off.

Fifth event, 6 pairs thrown, Chamberlin rules, $1 entrance:

Max	10 11 10 11 11 11—10	Pfister	10 11 11 10 01 11— 9
Bennett	10 11 10 11 10 11— 9	Burke	11 10 01 10 11 11— 9
Kennedy	00 11 11 11 10 11— 9	Holt	10 10 11 11 11 11—10
Hanson	10 00 10 11 10 10— 6	Forbes	11 10 01 10 10 11— 8
Fish	11 10 11 00 10 11— 8	Cummings	10 11 10 00 11 11— 8
Chantler	11 11 10 11 11 10—10	Blakely	11 11 00 10 11 11— 9
Browning	11 10 10 00 11 10— 7	Kilby	10 11 01 10 10 10— 7

Chantler wins first on shoot-off, Pfister wins second, Forbes wins third.

Sixth event, 10 single Peorias, $1:

Max	0101110101— 6	Burk	0100101100— 4
Bennett	1111111111—10	Holt	1000111111— 7
Kennedy	1100011111— 7	Forbes	1111111111—10
Hanson	0110010111— 7	Cummings	0000110000— 2
Fish	0011111110— 7	Blake	1111011001— 7
Chantler	0111111010— 7	Kilby	0111011001— 6
Browning	0001000110— 3	Pants	1010110001— 5
Pfister	1111011111— 7		

Bennett and Forbes first money, Fish second money on shoot-off, Max and Kilby third.

Seventh event, same conditions:

Max	1111010101— 7	Burk	0111110011— 7
Bennett	1111111111—10	Holt	0111011011— 7
Kennedy	0001111101— 6	Forbes	0111010111— 7
Hanson	0110111111— 8	Cummings	0000111111— 6
Fish	1101011011— 7	Blake	0111011000— 5
Chantler	1111110011— 9	Kilby	1100101000— 4
Browning	1010010001— 5	Pants	1111100110— 7
Pfister	1101010011— 6		

Bennett first, Chantler second, Hanson third.

TRAP AROUND CHICAGO.

CHICAGO, Ill., April 29.—Preparations for the great tournament of the Illinois State Sportsmen's Association are going on, and it certainly looks as if the fifteenth annual meet of the association would be the best and most notable of any yet. The date is June 4 and the week following. Special interest attaches to this year's meet from the fact that the several recent attempts at equalization of trap shooters—the Loyd, Keystone and Tucker systems—will be given serious and thorough trial, and all that can be done for the young shooter will be done then. The fact is accepted that something should be done, for the young shooter is holding back from the trap entirely too much, and thus is felt to be a marked difficulty at a meet of this sort. Large numbers of shooters are wanted. And since these provisions, new and careful, have been made in justice to all classes, it is to be hoped that all classes will come and shoot. The men of Chicago are one in sending out this invitation, and no shooter who comes to this the best meet of the greatest sporting city of the country, will regret his trip, whether he loses or wins.

The executive committee of the association met last Wednesday evening, and their programme is announced as follows:

Shoot No. 1. The diamond badge, emblematic of the individual State championship, 10 live birds from 5 ground traps, entrance $10, the winner of the badge this year to receive the receipts of next year's tournament.

Shoot No. 2.—The L. C. Smith cup, representing the individual State championship at inanimate targets, 20 targets per man from 3 traps; the winner of the cup this year to receive 60 per cent. and the club of which he is a member 40 per cent. of next year's receipts, entrance $5.

Shoot No. 3.—The club team championship, for teams of four men from any club which is a member of the State Association, entrance, price of birds only.

Shoot No. 4.—Fifteen inanimate targets, to be shot under the Loyd system, six equal moneys, divided into three parts each, 50, 30 and 20 per cent., entrance $3.

Shoot No. 5.—Ten live birds from ground traps, four moneys, 40, 30, 20 and 10 per cent., Keystone system on ties, entrance $7.50.

Shoot No. 6.—Eighteen inanimate targets, Tucker system, ties decided on last 6 birds, five moneys, 30, 25, 20, 15 and 10 per cent., entrance $4.

Shoot No. 7.—Twenty live birds from 5 ground traps, four moneys, 40, 30, 20 and 10 per cent. entrance $20.

Shoot No. 8.—Team shoot, any two shooters to constitute a team, 9 inanimate targets per man, four moneys, 40, 30, 20 and 10 per cent., entrance $5 per team.

Shoot No. 9.—Team shoot, any two shooters to constitute a team, 10 live birds per man, four moneys, entrance $15 per team.

Shoot No. 10.—At inanimate targets, 9 singles and 3 pairs, four moneys, entrance $3.

Shoot No. 11.—Nine inanimate targets, three moneys, 50, 30 and 20 per cent., entrance $2.

Shoot No. 12.—Twenty-one inanimate targets, eight equal moneys under the Loyd system, three divisions in each, 50, 30 and 20 per cent., entrance $5.

Shoot No. 13.—Twelve inanimate targets, four moneys under the Keystone system, entrance $3.

Two batteries of traps for artificial target shooting will be used, and extra shoots at both live birds and artificials will be arranged after the programme has been completed. Several guaranteed purses will be offered and numerous valuable prizes will be shot for in the State shoots.

The following sums have already been presented to the association: Audubon Club of Chicago $50, Gun Club of Chicago $50, Grand Calumet Heights Club $50, Mussey's Billiard Hall $25. The Chicago Shooting Club offers four gold medals for competition in the club team championship. Other clubs or individuals wishing to contribute should address W. L. Shepard, secretary, 164 La Salle street, Chicago. Back dues should be sent to same address. This is essential.

On May 5 the Lake George Sportsmen's Association and the Gun Club of Chicago will shoot their third match, this time at the grounds of the Lake George Club. Each club has a victory to its credit, and neither is going to win the next victory without a struggle. The matches are for ten men on a side, ten birds each.

It is hoped and believed that last year's series of inter-club matches will be resumed and extended this summer. The Maksaw-ba, Cumberland and Grand Calumet Heights Clubs were in the fight last season, and it is thought that the Lake George boys will join this year. Why could not others of the clubs join also? The more the merrier.

Social shoots at our different club grounds are now of almost daily occurrence, and although the game season is about closed, there will be little difference in the sale of the munitions of war.

Mr. George Dieter, a not very big railroad conductor, who shot a not very big gun, only a 16-gauge, did the gun club boys up last Saturday, winning both the live bird and the blackbird medals. He must be the coming man. E. HOUGH.

TORONTO, May 4.—McDowall & Co.'s grounds this afternoon presented a lively and exciting scene, the events being the shooting of the Stanley Club for the president's gold watch, which was won by T. Sawden, Jr., after an exciting chase, also an open competition for a beautiful gold ring, set with a carbuncle, donated by Mr. G. F. Oakley, to be shot for under very puzzling circumstances, each shooter being compelled to lay his gun on a table, pull the trap himself, and then shoot at the bird. It was won by Mr. C. B. Harrison with a score of 18 out of 25. The weather was all that could be desired, and a thoroughly good day's sport was spent. The scores are as follows. Shoot for watch at 25 birds: T. Sawden, Jr., 22, W. McDowall 22, F. Emond 19, T. Sawden, Sr., 19, J. Rice 18, T. Bennett 17, T. S. Bayles 15, F. Moffatt 14, W. Felstead 14. McDowall and Sawden both tied at 22 birds. They then went back to the 25yds. mark, where Sawden finally won with 5 out of 6 to McDowall's 4 out of 6.

Shoot for ring, at 25 birds: Harrison 18, Sawden, Jr., 18, McDowall 18, Moffatt 16, Emond 12, Pigeons 12, Wright 11, Draisey 10, J. Crow 9, White 9, F. Johnson 9, Cusack 5, Bayles 5. Ties at six birds between the first three at 18 resulted in the order name.

First sweepstake, at 10 birds: Felstead 9, McDowall 7, Crow 6, Andrews 6, Bennett 6, Draisey 5.

Second sweepstake, at 10 birds: Bennett 9, Crow 8, Felstead 8, Andrews 4.

Third sweepstake, at 10 birds: White 9, Bennett 8, Felstead 8, McDowall 7, Crow 6, Andrews 6.

Fourth sweepstake, at 5 birds: White 10, Felstead 8, McDowall 7, Bennett 7, Crow 4.

YOUNGSTOWN, Ohio, May 2.—This city now has three gun clubs in active operation. The Flint Hill Gun Club held a shoot this afternoon. In the first shoot Charles Weaver was the winner, breaking 24 out of 25 bluerocks, and in the second shoot Richard Harry broke them all. The third shoot at 10 birds was won by Will Smith, who hit the entire number.

MEADVILLE, Pa., May 2.—At the Corry gun shoot to-day Fred Babcock, of this city, aged 16 years, won the gold medal for the third time, breaking 24 clays out of a possible 25. There were 25 contestants. Babcock is a son of Trainmaster John W. Babcock, of the Nypano, this city, known as one of the finest shots in the country.

MINNEAPOLIS, May 3.—The weekly badge and sweepstake shoot of the Minneapolis Gun Club was held to-day with a large attendance. It seems as though the wind always blows a gale when either the Minneapolis or St. Paul Gun Clubs have their shoots. To-day, by the way of variety, the wind blew just opposite its usual direction and went from left to right with force enough to drift a left-quarterer back, and making it hard to find the second bird in doubles. St. Paul was represented by Forbes, Fish, Burke, Bennett, Holt, Cummings and Skinner. Shooting was fast and furious until dark. Good scores were made by some and very poor ones by others. One curious incident to-day was that the winner of the "junior" badge got first money, while the tough old seniors only got 14 and were content to divide fourth. The sparrow match, Monaco boundary, that was to be shot between Bradley and Skinner, is off, as Bradley refuses to come to time as per his challenge, although he has had two opportunities. Following are the scores:

First event, 5 screened traps, $1 entrance, match at 5 singles and 2 pairs Peorias, 18 and 15yds. rise:

Jacoby	011000	11 10— 5	Marshall	101111	11 11— 9
Fish	111011	10 10— 7	Cummings	011110	11 11— 8
Bennett	111010	11 11— 8	Burke	111111	10 11— 9
Murphy	011111	11 11—10	Skinner	011111	10 11— 8
Forbes	111111	11 11—10	Warwick	101011	10 10— 6
Hanson	001111	11 11— 8	Bangs	101110	10 11— 7
Brady	111110	10 10— 7	Pratt	100111	00 10— 5
Nicholson	110100	10 10— 5	Dunn	1000001	11 10— 5
Lawrence	001110	11 11— 7	Cutter	111110	00 10— 6
Holt	111111	11 11—10			

Holt and Forbes first, Burke and Murphy second, Bennett and Hanson third, Cutter fourth.

Second event, 5 singles and 2 pairs Peorias, $1 entrance, 5 screened traps, 18 and 15yds. rise:

Christenson	10001	11 11—6	Bangs	11001	10 11—5
Jacoby	10010	11 10—5	Forbes	11111	10 11—8
Marshall	11011	11 11—8	Skinner	11110	11 11—8
Cummings	11111	10 11—8	Brady	10110	10 10—6
Morse	01010	10 11—5	Pratt	01111	11 10—7
Warwick	11101	10 01—6	Murphy	11010	00 10—4
Parker	00110	11 10—5	Dunn	11001	11 11—7
Nicholson	01110	11 11—7	Burke	10111	11 0 —6
Griffin	11000	10 00—3	Cutter	11111	00 01—6
Lawrence	00101	11 10—5	Ensign	11011	01 10—6
Hanson	11111	11 11—9	Purdy	00110	11 00—4
Fish	11101	01 11—7	Houghtaling	10010	00 10—3
Bennett	11111	10 10—7	Whitcomb	01111	10 11—7
Holt	11111	11 11—9			

Ties on 10 divided first, ties on 9 divided second, ties on 8 divided third, Bennett fourth on shoot-off.

Badge shoot, 10 single and 5 pairs Peorias, 5 screened traps, 18 and 15yds. rise, $1.50 entrance, four moneys:

Skinner	1110110011 11 00 11 10 01—13
Jacoby	0110001101 11 01 10 10 01—11
Bangs	1000001001 11 10 01 10 00— 8
Griffin	0000101100 10 11 10 10 11—10
Morse	0111110011 10 11 11 10 10—14
Dunn	0111111000 11 10 11 10 10—13
Warwick	1010001111 10 01 11 10 01—12
Nicholson	1110001010 10 10 10 11 10—11
Parker	1011110101 10 10 10 10 00—11
Marshall	1110111011 11 11 11 10 11—17
Forbes	1111110111 10 10 11 11 11—17
Fish	1111101111 01 10 01 11 11—16
Bennett	1101011100 11 10 10 10 10—12
Christenson	0110111010 10 11 11 11 10—14
Whitcomb	0010000010 00 10 01 10 00—
Pratt	1010001011 11 10 11 10 11—14
Cummings	1111010111 11 10 10 10 11—14
Brady	0111010101 11 11 10 11 11—15
Hanson	1111001111 10 11 10 11 10—15
Harritz	1100111011 11 10 10 10 11—14
Burke	1101011111 11 10 11 11 10—16
Holt	0110011111 01 11 10 11 11—15
Murphy	0101011011 11 10 11 11 10—14
Lawrence	1101100001 10 10 11 10 10—11
Cutter	1100111111 11 11 00 11 10—15
Ensign	1111110011 11 11 11 10 00—15
Shepperd	1110111001 11 10 10 10 11—14

Marshall and Forbes first money, Burke and Fish second, ties on 15 div., Pratt fourth on shoot-off, Ensign senior badge, Marshall junior badge.

"Tribune" badge, 9 singles and 3 pairs Peorias, 5 screened traps, 18 and 16yds. rise, four prizes, $1 entrance:

Ensign	111101110	00 10 10— 9	Holt	111111011	11 11 11—14
Lawrence	101101011	10 10 11—10	Fish	010111110	10 11 11—11
Brady	110000111	11 11 11—11	Bennett	010111011	11 11 10—11
Cutter	101101011	10 01 11—10	Nicholson	101101101	01 10 10— 9
Skinner	011110111	10 10 11—11	Warwick	010111111	11 11 11—12
Forbes	111111111	10 10 11—13	Hanson	011110111	11 11 11—13
Cummings	101111001	10 10 10—10	Marshall	010111101	10 11 11—12
Rand	011110011	10 10 10— 8	Murphy	110010110	11 10 11—12
Shepperd	1101113000	10 10 00— 7	Pratt	011011111	11 10 10—11
Jacoby	0000000001	00 11 00— 3	Dunn	111101101	11 11 11—13
Bangs	101111010	10 11 10—10	Whitcomb	1100011111	11 10 10—10
Morse	111101110	11 11 10—12	Burke	110111111	11 10 10—12
Griffin	110101001	00 11 10— 8			

Holt first, ties on 13 divided second, Burke third, Fish and Skinner fourth.

TRENTON, May 2.—The new grounds of the Mercer Gun Club at Trenton, N. J., were opened yesterday and to-day in a highly successful manner. The grounds are level, well-situated, fenced in and contain a comfortable club house. Appended are the shooting events:

Mercer Gun Club Grounds, Trenton, N. J., May 1.—Sweepstakes, $1 entrance, 10 Keystone targets, Keystone rules:

J Sampson	5	L Grant	6
M Fox	8	C Van Camp	6
C Smith	6	F Buckwalter	5
C Huston	7	J Frank Kleinz	8
J Dumont	2	John L Brewer	8
M Johnson	6	C Zwerlein	5
C Forrest	5	A Leigh	8
F Apgar	7	T Thompson	5

Same day—Match at live pigeons, modified Hurlingham rules; 5 birds, $3 entrance. All the shooters stood at 30yds. Ties divided:

J Sampson	12021—4	C Zwerlein	20011—3
T Irvine	11211—5	J Dumont	10230—3
C Smith	22111—5	T Jones	11201—4
C Van Camp	11121—5	C Forrest	02210—3
D Williams	02110—3	T Ralston	21210—4
J L Brewer	12221—5	T Thompson	21120—4
H Goeke	10110—3	L Grant	21021—4
J F Kleinz	12130—4	F Apgar	11201—4
C Huston	21111—5	M Johnson	11111—5
M Fox	21202—4	F Thomas	11000—2

Mercer Gun Club Grounds, May 2.—Live pigeon match, 5 birds, $3 entrance, modified Hurlingham rules, ties divided:

J Sampson	20102—3	C Forrest	21100—3
T Irvine	11100—3	L Grant	11221—5
C Smith	10221—4	T Thompson	00001—1
C Van Camp	10110—3	M Johnson	11110—4
J L Brewer	12221—5	T Thomas	10120—3
J F Kleinz	11210—4	T Ralston	21201—4
C Huston	11112—5	E Updegrove	21010—3
M Fox	01110—3	C Zwerlein	02210—3
F Apgar	10221—4	I Shreve	12210—4

Same day, live birds, miss and out, $1 entrance, ties divided:

C Smith	10	T Jones	210
J Frank Kleintz	222	C Van Camp	0
J L Brewer	0	F Buckwalter	0
T Irwin	0	M Fox	112
T Thompson	0	J Dumont	0
T Ralston	20	T Thomas	0
F Apgar	0	D Williams	0
C Zwerlein	111	C Forrest	120

WELLINGTON, Mass., May 4.—There was a good attendance at the grounds of the Wellington Club to-day, and the weather conditions were favorable for good scores. Chase won in the pitcher match, with a score of 13 out of a possible 15. The winners in the sweepstake matches were as follows: Five clay-pigeons, Schaefer, Dan and Chase; six bluerocks, Choate; six bluerocks, Choate; six bluerocks, Bradstreet; five clay-pigeons, Bradbury, Schaefer and Choate: six bluerocks, Choate, Chase and Bradstreet; six bluerocks, Bradstreet; three pairs clay-pigeons, Schaefer and Bradstreet; six bluerocks, Baxter and Chase; six bluerocks, Ross, Lee and Webster; six clay-pigeons, Dan and Chase; eight clay-pigeons, Chase, Sanborn, Swift and Perry; six clay-pigeons, Dill and Chase; six bluerocks, Dill and Allerton.

THE JAMAICA PLAIN GUN CLUB will give a tournament at Clarendon Hills, Mass., May 16, at which time the Amateur Challenge Gold Badge of the Massachusetts State Shooting Association will be contested for. The club elected on Tuesday, April 30, Mr. H. F. Amsden and Dr. H. A. Baker delegates to the Mass. State Shooting Association.

ST. PAUL, April 27.—The St. Paul Gun Club held its weekly badge shoot to-day at the fair grounds. The wind, as usual, blew a gale in the shooters' faces, and with the cold made shooting difficult and very disagreeable. Only a small number were present, but very good and very bad scores were made; 15 out of 10 singles and 5 pairs, or 15 straight out of 0 singles and 5 pairs, are very hard to get at any time, and in such a wind is simply astonishing, but both were done to-day. The club will soon have new grounds within two blocks of Hamlin station, 5 miles from the city, and the long and tedious ride in wagons will be avoided. As trains pass each way every hour the attendance will be better. Following is the score of the first event. First sweep, 10 single Peorias, 50 cents entrance, three moneys:

Pfister	1011011110—8	Skinner	0111111110—8
Chantler	1111111111—10	Balsom	1110101111—8
Burke	1111100001—7	Barnes	1111111011—9
Bennett	1111111111—10	Kennedy	1111111111—10
Fish	1011111111—9	Browning	0001011000—3
Holt	1101111110—8	Cummings	1100011111—7

Bennett first, after breaking 9 straight on the tie; ties on 9 divided: Skinner third.

The next event was the individual challenge badge shoot, entrance $5. 15 singles and 5 pairs Peorias, 18 and 16yds., 5 screened traps, American rules:

Burke	1101011111011110	11 11 11 10 11—20	
Barnes	0111011011111111	11 11 10 11 00—19	

Burke wins purse and badge, and is challenged for next week by Holt.

Second sweep, 10 single Peorias, 18yds., 50 cents entrance, three moneys:

Pfister	0111111111—9	Balsom	0110011011—6
Chantler	1111101111—9	Barnes	1100101001—5
Burke	1101010001—6	Kennedy	1011111111—9
Bennett	1101111110—7	Browning	0101111001—7
Fish	0111011110—7	Cummings	0011111003—5
Holt	1111010000—6	Forbes	1111111111—10
Skinner	0111011110—7	Campbell	0101110010—4

Forbes first money, Pfister second on shoot-off, Bennett third after shooting off.

Third event, 5 single and 3 pairs Peorias, same conditions, entrance 50 cents, two moneys:

Pfister	01111 10 00 01—6	Kennedy	11110 10 11 11—9
Chantler	11101 11 11 11—10	Browning	00100 00 10 10—3
Burke	10001 10 01 00—4	Cummings	11011 11 11 10—9
Bennett	11101 11 11 00—8	Forbes	10111 10 00 10—6
Fish	11111 10 00 11—8	Campbell	00001 10 11 10—5
Skinner	01011 00 10 10—5	Barnes	10110 10 10 10—6
Balsom	01111 11 10 11—9		

Chantler first money, Balsom and Kennedy divided second.

Fourth event, 5 single and 3 pairs Peorias, $1 entrance, three moneys, same conditions:

Pfister	01111 11 11 10—10	Balsom	11110 11 11 11—10
Chantler	11111 11 11 11—11	Barnes	11011 11 10 11—9
Burke	10111 10 11 11—9	Kennedy	11111 11 11 11—11
Bennett	11111 00 00 10—6	Browning	11113 00 11 11—8
Fish	11111 10 00 10—7	Cummings	11110 10 11 11—9
Holt	11111 11 10 11—10	Forbes	11011 11 11 10—9

Chantler first money on a straight score, Holt second and Burke third money.

Badge shoot. 10 single and 5 pair Peorias, same conditions, $1 entrance, three moneys:

Barnes	1101011111	10 11 10 11 11—13	
Pfister	1111010110	11 10 00 10 11—12	
Chantler	1111111111	11 10 10 10 10—16	
Burke	1111110111	11 11 10 11 11—17	
Bennett	1010110101	11 11 00 10 11—13	
Fish	1111111111	11 10 11 11 11—19	
Holt	1111111111	11 10 11 11 11—19	
Balsom	1111011111	11 11 11 10 10—17	
Kennedy	1111111111	11 00 10 10 11—16	
Browning	1101011001	11 10 01 11 10—13	
Cummings	1100010111	00 10 01 10 10—10	
Forbes	1111111111	11 00 10 10 10—15	

Ties on 19 for badge and first money: Fish, 60; Holt, 11011—4; Holt wins badge. Burke second money, Chantler third money.

Fifth event, 9 singles and 3 pairs Peorias, same conditions, $1 entrance:

Barnes	011110111	00 11 11—11	
Pfister	101111111	10 01 11—11	
Chantler	101111110	10 11 11—11	
Burke	111111111	11 11 11—15	
Bennett	111011011	11 10 11—12	
Fish	111011011	11 11 01—12	
Holt	111011001	11 11 10—11	
Balsom	111101111	10 11 11—11	
Kennedy	111011011	11 10 11—12	
Browning	111011111	11 11 10—13	
Cummings	111111011	11 00 10—11	
Forbes	111111111	11 11 11—12	

Burke first, Bennett and Forbes second, Chantler third on shoot-off.

Last event, same match and conditions:

Pfister	111111111	11 10 11—14	
Chantler	110110111	10 10 11—11	
Burke	111011111	11 11 10—14	
Bennett	101111101	11 10 10—11	
Fish	011010111	00 10 11— 9	
Holt	111011111	10 11 11—14	
Balsom	111101011	10 11 10—12	
Kennedy	111011111	11 11 10—14	
Browning	110111101	11 11 00—12	
Cummings	110111111	11 11 00—12	
Forbes	111111111	10 11 10—14	

Pfister and Burke first, Holt and Balsom second, Chantler third.

SKINNER.

GRAND CROSSING, Ill., April 27.—The Gun Club of Chicago. Match at 20 Peorias, 3 traps, 18yds. rise, National rules, medal prizes:

Pfister	11111011111111111110—18	Wells	11101111101101111110—16
Walsworth	01011111111101111111—17		

Hutch, Price, Place, Donald, Stone, Eustis, Rocky, Thomas and Willard withdrew.

Match at 10 live pigeons, 5 ground traps, 30yds. rise, Illinois State rules, medal:

Hutch	0201101200—5	Eustis	1010121011—7
Dieter	1112121112—10	Fuller	2020121111—7
Wilcox	1021102211—7	Place	2112121001—8
Wells	2101010010—5	Willard	1111001210—7
Donald	1201210111—8	Rocky	2120112210—8
Stone	2122121212—10	Buechner	2200101022—6
Price	1110101220—7	Wadsworth	2222112111—10

Ties on 10 at 30yds., won by Dieter, killing 12, Stone 10. Next match May 11.—RAVELRIGG.

DAYTON, Ohio, May 6.—The new Kennel Gun Club had their initial shoot of the season for club prizes. All used 10 gauge guns except Van Ausdal. Three traps were set, 30 single standard targets each, new American Association rules, David McCutcheon and Ed Mike judges:

R C Anderson	0160100010301100010110110101111—14
Whitney Brown	1110100001100110001110101001011—15
Chas Van Ausdal	1111100110100111110010110 0011—19
Charles Hanitch	0103001010010011100111010110—15
Charles Wheaten	1111100000010111010110000011111—18
Charles Sander	1111101111111111111010001111—26
Charles G Stoddard	0101011101 0111011110101010—21
H G Carnell	0 0000001101111111010100001—14
Geo Makley	0 011 1111011000 0110101011110—18
Adolph Sander	1111101011110110000 0010101011—19

Rolla Heikes, though not shooting for prizes, scored 20, losing only his seventh bird.

CLAREMONT, N. J., May 4.—The N. Y. Suburban Shooting Grounds Association trophy was shot for to-day with the following record:

Simpson	0101100010 0010001000110l— 9
Tatham	0 1000101010101010101001—12
Elliott	1000 0000 1000 0000100100— 7
Hathaway	0 0101011010101100110010—14
White	1010010101001100 0001010—11
Richards	1011000 0111100101101111—17

On April 29 and on May 1 there were numerous sweepstakes on the grounds, and three days of very enjoyable shooting were spent.

BROOKLYN, May 3.—The Glenmore Rod and Gun Club held their regular monthly shoot at Dexter's Park, Woodhaven, to-day. In addition to the club diamond badge, Mr. John Y. Van Wyckien offered a valuable prize, to be chosen after the match. The contest was at 7 birds, at 29yds. rise. There were fifteen contestants, and the shooting was exceptionally good. J. Bennet and W. Selover shot their 7 birds straight. The following was the score:

W Lewis (26)	1111061—5	T Helgans (29)	1111110—6
W Selover (29)	1111111—7	H Schuelle (23)	0111010—4
J Bennet (29)	1111111—7	Maxure (25)	1111011—6
J Ochs (20)	0111110—5	H Reid (26)	1011101—5
H C Ryan (26)	1011003—3	E Schielkun (26)	1111011—6
P Sutter (29)	0011011—4	W Livingston (24)	1111001—5
C Meyer (25)	1111101—6	H Adams (24)	1010030—3
H Boekman (20)	1110311—5		

Selover and Bennet shot off the tie. Bennet won killing 6 out of 7 birds, to Selover's 5.

Every week we are obliged to defer to the next week trap scores which come in too late for publication in the current issue. It is particularly requested that scores be sent us as early as possible.

CLEVELAND, O., May 2.—The regular badge shoot of the East End Gun Club was held to-day, and the shooting was first-class. Paul North won the first badge with 25 straight, and W. King won the second in the shoot-off; 25 standards, at 15yds., were used. Following are the scores:

Sweetman	1110011001011001111001111—16
J Hall	1101110111111111111111011—22
C Elford	1110 1011000011100111011 —17
H Harris	1111101011011110 0110101—20
B King	1101011111111100111111001—20
J Brown	0111001101010001101011001—12
W King	1011110111111111111011111—22
Stiles	1110000111110000010111111—16
D Jane	0101011111 1111111111111111— 22
P North	1111111111111111111111111—25
M Silsby	1111110101111101111111111—22
Sanford	1011010111001010111101—17
Skinner	0010011011111 0111010111111—16
Smith	1111011111101111111111111—23

TOWANDA, May 6.—The following score was made by members of the Towanda Rod and Gun Club at their last shoot, at 10 live birds, 25yds. rise, 40yds. boundary, 1 trap:

W F Dittrich	0211110010—6	D E Sawtelle	1220111111—9
F Montanye	0111011111—8	J W Snyder	1100100002—4
N Wilbur	1000101111—6	H Streeter	1011010101—6

RONDEAU, Ont., May 5.—At a meeting of local sportsmen held at the store of J. B. Reynolds, Rondeau, Ont., the Rondeau shooting Club was organized with the following officers: Pres., Wm. Montgomery; Vice-Pres., Wm. R. Steering; Sec., J. B. Reynolds; Treas., Calvin Monk; Capt., Samuel Hartford.

OTTAWA.—Following is the official programme of the tournament to be given by the St. Hubert Gun Club on May 24 and 25: Friday, May 24.—First match, open sweepstakes—Entrance $2; 15 single Peoria blackbirds, 15yds. rise, 5 traps, birds 3 cents each. Four moneys, 40, 30, 20 and 10 per cent. of entries, if not more than 25 entries. If more than 25 entries, and less than 40 entries, five moneys. If more than 40 entries six moneys.

Second match, team match—Open to teams of five men from any recognized gun club in Canada; 5 traps, 15 single Peoria blackbirds to each man, 18yds. rise, entrance $5 per team, birds 3 cents each. Entries close May 18 next. Post entries 25 per cent. extra. First prize, Lansdowne challenge cup, presented by Lord Lansdowne, late Governor General of Canada, and $50 cash; second prize, silver cup, presented by the Ottawa and St. Hubert Gun Clubs, and $30 cash; third prize, 25lbs. powder and $20 cash; fourth prize, 2,000 cartridge cases; fifth prize, five bags Montreal Rolling Mills Company's chilled shot.

Saturday, May 25.—Third match, individual—Open to members of all recognized gun clubs in Canada; 25 single Peoria blackbirds, 18yds. rise, 5 traps, entrance $2, birds 3 cents each. Entries close May 18 next. Post entries 25 per cent. extra. First prize $30, second $20, third $15, fourth $12, fifth $11, sixth $10, seventh $9, eighth $8, ninth $7, tenth $6, eleventh $5, twelfth $5, thirteenth $4, fourteenth $4; fifteenth $4; total $150.

Fourth match—Open to teams of three men from any recognized gun club in Canada; 15 single Peoria blackbirds to each man, 5 traps, 18yds. rise, entrance $5 per team, birds 3 cents each. Four moneys, 40, 30, 20 and 10 per cent. of entries. Any club may enter as many different teams as it sees fit in this match. Conditions as to qualification of team members same as in first team match.

Merchandise match—In addition to the above match there will be 3 traps set apart at which shooting will be carried on throughout the tournament for a number of valuable prizes presented by friends of the club. Entries unlimited. Fifty cents each entry, including birds, 9 matchless blackbirds. Only one score to count for any one competitor. The "Stark matchless blackbird" will be used in this match.

Should time permit the club will add a sweep same as No. 1.

Rules and conditions—National rules to govern, with the exception that no handicap will be allowed for guns. There shall be no class shooting in any match. Shooting will commence at 9 A.M., sharp, at Rideau Rifle Range.

OTTAWA, April 26.—The executive committee of the St. Hubert's held a special session to-day. Reports from workers indicate the tournament a success. A resolution was passed requesting the secretary to correspond with Mr. Keys, the secretary of the Dominion Gun Club Alliance, and endeavor to have a full meeting of the executive thereof in this city on the 24th. For the ninth and last day for March and April prizes it was threatening for rain, with a stiff east wind across the range. First call a sweep at 15 birds was called: J. Deslaurier 13, Edward White 12, W. J. Johnston 11, A. H. Throop 11, Geo. White 10, S. White 10, Dr. A. Martin 9, R. G. Dalton 8. For the close up of the monthly shoot for club prizes, the five average winning scores are:

1. Ed White	20 17 17 17 18—89	4. Geo. White	17 17 17 16 14—81
2. S White	19 17 17 15 14—82	5. W J Johnston	17 16 15 15 14—77
3. A H Throop	17 17 16 16 16—82	5. J Deslaurier	18 16 15 14 14—77

In shooting off ties, 5 birds each, for the second and third, S. White broke 4, Throop 3. A toss up for the tie between Johnston and Deslaurier gave the former first choice.

THE NATIONAL GUN ASSOCIATION.—*Editor Forest and Stream:* The fiscal year of the National Gun Association comes to a close to-day. For the past two years the association has had practically no support except from a limited number of local members, and possibly a score outside of the State of Georgia. The reasons for this are too many for the scope of a letter like this. It is enough to say that the managers, seeing no encouragement for the future, have decided to let it pass quietly into oblivion. The property of the association is not of sufficient value to pay the indebtedness, so we can declare no dividend on stock. Thanking you for uniform courtesy through the existence of association under our management.—T. C. ETHERIDGE, Sec'y, (Macon, Ga., April 30.)

TRENTON, N. J.—The Mercer Gun Club of Trenton, N. J., are to open their new grounds with a two days' tournament on May 15 and 16. On the opening day there will be a guaranteed purse of $150 at 10 live birds and a $75 sweepstake at 25 Keystone targets. The second day they guarantee $250.

29. Detroit.

LORD DUNRAVEN'S CHALLENGE.

VALKYRIE, Lord Dunraven's new cutter, was successfully launched at Southampton on May 1, being christened by Miss Diaper, daughter of her skipper. The latest news in regard to the challenge is that Lord Dunraven is dissatisfied with the reply of the committee of the New York Y. C., and will withdraw it. The cabled reports are very meagre and obviously incorrect in important particulars, and nothing definite will be known until after the meeting of the New York Y. C. on May 16. Lord Dunraven's reply to the letter of the committee was mailed on May 4, and will probably be received by Monday, but, of course, the contents will be kept secret until after the club meeting. The rumor says that Lord Dunraven is dissatisfied with the refusal of the club to accept a mean of the New York and Y. R. A. time allowance. This is absurd on the face of it, as from the closest calculations possible the time allowance between Volunteer and Valkyrie would be practically the same under both rules. There is no occasion for a disagreement here, but the real reason for the hitch is shown by the following extracts from the *Field* of April 20 and April 27:

"It appears to be taken for granted by the majority of Americans who are interested in yacht racing that the Volunteer will be selected to defend the America Cup, that is, unless she should be beaten in the trial races by some other yacht. It should, however, be said that the practical yachtsmen, who form the minority, have the greater portion of the New York press at their back, and it is possible that this minority will get their views adopted. This is the effect of the rather ostentatious exuberance of patriotic pride with which the Americans have already sailed Volunteer round Valkyrie is this: We on this side of the Atlantic have commenced to regard the result of the encounter as a foregone conclusion, and that at the very best Valkyrie could do nothing better than win one race out of the series of five if the wind should be very paltry on either day. In a breeze Valkyrie might as well race a torpedo boat.

"There is one very strong reason why we anxiously desire to see the opinion of the fair-minded yachtsmen and sportsmen in America deferred to. Some time ago the committee of the New York Y. C. announced that, although a challenge under the old deed, which governed the Genesta, Galatea and Thistle contests, would be accepted, yet would the committee impose a condition that the challenger and challenging club should make a binding compact that the winning club should adopt the objectionable and condemned 'new deed' to govern future challenges. This would be a very cheap way of carrying this sinister design into effect by securing a race between the Volunteer and Valkyrie, and thus making the Earl of Dunraven unwittingly the means of gratifying the vanity of a few members who, by the aid of some attorney, concocted the document which goes by the name of the 'new deed of gift.' We will not again traverse the conditions of this strange document; but we unhesitatingly say that no Englishman should persist in a challenge for the Cup if the compact we have referred to forms part of the bargain. Better that the America Cup should sink into oblivion than that any one, by accepting an unequal contest—such as a Volunteer and Valkyrie race would be—should enable the committee of the New York Y. C. to say that a challenger had confirmed a deed which has been condemned as unsportsmanlike, almost without exception, both in America and in this country."

"Of course there is a difficulty about the new deed. But that really is more a matter for the Royal Yacht Squadron to decide, and there is the ugly fact that the New York Yacht Club makes the condition that an undertaking shall be given before the matches are sailed that the winning club adopt the deed. They argue that their proposal is fair, and that there cannot be anything unreasonable in the deed or they would not propose that the winning club must adopt it. In face of the fact that they may lose the custody of the Cup by the victory of the Valkyrie, this is magnificent of a transatlantic type, it is true. But we cannot very well bund ourselves to the fact that the chances are at least ten to one that the Valkyrie does not win the Cup if the Volunteer is matched against her. Then why should the Royal Yacht Squadron enter into an arrangement which, so far as can be foreseen, will confirm the Cup in the possession of the New York Yacht Club forever? If the New York Yacht Club wishes by these means to keep the Cup, and to boast of beating British yachts under it, they can do so. But it is a very different matter asking the Royal Yacht Squadron to be a party to the transaction."

The truth of the matter is that British yachtsmen are at last beginning to realize how completely they have played into the hands of the New York Y. C., and that the proposed match would be nothing but a case of "heads I win, tails you lose." When, as a concession to the strong feeling at home and abroad against the new deed, the New York Y. C. hit upon the ingenious plan of offering the Cup once more under the second deed, with the proviso that all races in the future must be under the new and objectionable document, the best that was hoped for was that a 90ft. cutter, possibly Thistle with alterations, would challenge, and be defeated. Instead of this, however, they have actually found a challenger who is willing to carry the farce still further by coming here to race a 70ft. boat against one 86ft. long, thus going through the bare formality of a contest; confirming the new deed without the slightest risk of the loss of the Cup.

It seems almost incredible that Lord Dunraven, the Royal Yacht Squadron and Mr. Watson have been blind to this aspect of the case. They must understand now, if they have not done so before, that in challenging for the America's Cup they agree *if they win it*, to hold it under the new deed; but *if they lose it*, the New York Y. C. continues to hold it under the new deed, and British yachtsmen have waived all right of protesting against its unjust terms. As there is confessedly no chance of Valkyrie defeating Volunteer, the chances of a loss of the Cup by its present holders are entirely eliminated. According to the New York *Herald* Ex-Commodore James D. Smith expresses himself as follows. Mr. Smith is the ex-chairman of the Committee to Determine whether the Challenge is in Due Form, and whether the Club should Accept a Challenge which it Could not Decline. He is also chairman of the present "Plan and Scope Committee," having entire charge of the race:

"Do you think that Lord Dunraven is afraid to meet the Volunteer?"

"I don't see why he should be. In the first place the Volunteer has not yet been chosen. She may not be. There is no necessity for us to name any boat until a week before the actual race. We have arranged for very elaborate trial races, and Mr. Archibald

Rogers has already entered his 70-footer Bedouin. The owners of the Katrina, Titania and Shamrock have also intimated that they will enter, but as yet have not officially entered their yachts. So it appears that the owners of the 70-footers do not despair of their chance of being chosen to meet Valkyrie."

"What do you think is the true measurement over all of the Valkyrie?"

Our committee has reason to believe that she is 91ft. over all. Mr. George L. Watson is one of the shrewdest of naval architects. He came over here and studied all our best boats. If the Valkyrie is really 91ft over all, she will probably be as able a boat as the Puritan under certain conditions. We have no boat in our 70ft. class which can compare with her, if we are correctly informed as to her length over all. The Titania is 81ft. 6in. over all, the Shamrock 77ft. 3in., the Katrina 85ft. 9in. and the Bedouin in 83ft. In a strong breeze, with the wind abeam, or even close hauled on a wind, the Valkyrie would have considerable advantage over any one of the four."

"Has not Lord Dunraven pledged himself to bring over the Valkyrie to take part in the contest of 70-footers for the international cup which General Paine has arranged for?"

"He has and he will come. I consider him too much of a sporting gentleman to take such a position as that attributed to him. Our committee has done all in its power to meet him in a fair and courteous way, and I cannot believe that he does not appreciate it. By the bye, such rumors as these will be sure to deter our yachtsmen from building a 70-footer. I hear that two or three are projected, and each, if built, is to be from 91ft. to 94ft. over all."

The above statements in regard to the trial races and new yachts are entirely misleading, as it is recognized by all yachtsmen that the announcement lately made by the committee, in connection with the refusal to risk a vote of the club on the question of the 70ft. class, amounts to the selection of Volunteer and nothing else. Of course the trial races are open to the 70-footers, and any yachtsman is at liberty to build a new yacht to enter, but no existing boat can nearly save her time off of Volunteer, nor will any one build a boat to race under such conditions. What Mr. Smith says may be nominally correct, but the resolution introduced by him at the last meeting is generally understood as equivalent to the selection of Volunteer. He knows very well, too, that the time has gone by for building, and that it is too late now to begin a boat for the trial races with any prospect of success. The over-all length of Valkyrie is a matter of conjecture, but in these days of long ends there is nothing formidable in a length of 94ft. The new 40-footers have almost reached a length of 60ft. over all, and in the same proportion a 70-footer would measure 105ft. Katrina, measured by British methods, would be nearly 94ft., and there is no reason thus far for assuming that Valkyrie is larger or more powerful than she through excess of length.

NEW YORK YACHT RACING ASSOCIATION.

Editor Forest and Stream:

Under the title the "New York Yacht Racing Association," in your issue of March 21, you do the infant organization an injury by announcing in the first sentence its untimely demise before it had well begun to live. The cause of its early taking off you improperly set down to be that ancient disorder—mean length. The case has been wrongly diagnosed. As a fact, the organization merely gave expression to those infant squeaks that proclaim the advent of a lusty youngster destined to weather squalls, to skim shoals and spread the sandpits of mean or other length.

The N. Y. Y. R. A. has come to stay. Like a skillful practitioner, later on in the article commenced on, you deem it prudent to hedge by bespeaking for it a gruesome, lingering existence, "as an insignificant local union of sandbag clubs." Take heart of grace Mr. Editor, the club may not have entered on its existence in accord with your pre-conceived notions of propriety, yet may thrive for all that. The majority ruled for mean length—mean length it is. The majority is always infallible. The association was influenced largely in its determination by the advice of a practical student of yachting of world wide fame—bearing a name to conjure with and sail safely by Scylla or Charybdis.

At the meeting of the committee several systems of measurement were submitted for their consideration, two of them were innovations, being measurements by sail area alone; taking a certain number of square yards, say 2,000, as a standard, and calculating the allowance from that; another was sail area and hull measurement, and then length measurement. When the committee took up the latter measurement, the only question was whether they should tax the overhang, and if so, how much? The committee, in drafting these rules, recognized that they had to do with the present; that is, make rules that would suit the present members of the Association. On canvassing, not a club using sail area was discovered. All used a measurement of length alone; some taxed overhang more, some less. In such a contingency it was imperative for the committee to make some rule of length measurement. After considerable discussion, it was agreed to report the measurement, which was adopted by the Association.

It is manifestly necessary in starting the Association that it must have some rules on which to work. Experience and more mature deliberation may result in the adoption of some other standard than mean length. The by-laws admit of amendment. At present no question so agitates the yachting community as that of measurement. Both the New York and Seawanhaka clubs have appointed committees to report some new rule, and I believe the Larchmont Club is moving in the same direction. No matter what measurement is adopted, there will always be fault-finders, and boats will be built to get the best of it. Besides, everything else being equal—I mean models—the larger boat is bound to win; as, for instance, what chance would Valkyrie have against Volunteer?

The two associations now in existence in this country—the Lake Yacht and the New England—both have entirely different systems of measurement. The Lake Y. R. A. has the Seawanhaka rule, the New England is waterline length with one-fifth of the overhang aft added. The latter measurement seems to hold water, while the former, from the discussion going on for some time past in your columns, I should judge they were not satisfied with.

The Seawanhaka Y. C. and the New York Y. C. have different rules. The Corinthian Y. C. of New York leaves it to their sailing committee. I have not the Eastern or Larchmont club books before me, but the former used to be a length and beam measurement. The South Boston Club is similar to the N. E. Y. R. A. The Beverly is two-thirds length on l.w.l. + extreme beam. The New Rochelle formula is length of yacht's hull measured at the distance of two per cent. of her length on the actual l.w.l. above and parallel to the said w.l. I have given you the above examples in order that I might illustrate the great dissimilarity of measurement even among the larger clubs. It can be seen how important it is to have some standard measurement, which the N.Y.Y. R. A. has secured by at least adopting a uniform one for the clubs now in the association. The association has also adopted the Herreshoff table of time allowances, and at a recent meeting of the association a classification was adopted to conform to this time allowance. All schooners over 40ft. are classed together, as it was found that there were only three or four in the association, so for the present this will stand; when others (schooners) come in more classes will be formed. The classes for sloops and cutters are as follows:

Class B, 53ft. and under 62ft.
Class C, 45ft. and under 53ft.
Class D, 38ft. and under 45ft.
Class E, 32ft. and under 38ft.
Class F, 27ft. and under 32ft.
Class G, all under 27ft.

Classes above 62ft. l.w.l. were not made, for the same reason that none for schooners were, viz., there are no larger sloops or cutters in the Association. This classification, I think, is the best I have yet seen, and will stand the test of time; only a difference of 9, 8, 7 and 6ft. respectively. In the classes for open jib and mainsail boats:

Class 1, 27ft. and under 32ft.
Class 2, 23ft. and under 27ft.
Class 3, 20ft. and under 23ft.
Class 4, all under 20ft.

In the classes for cats:

Class 6, 27ft. and under 32ft.
Class 7, 23ft. and under 27ft.
Class 8, 20ft. and under 23ft.
Class 9, all under 20ft.

There is also a class for cabin cats. These classifications are as fair as they can be made, and meet a long-felt want.

A word about ballast. While advocating stationary ballast, and while the committee reported for such to the Association, still I think in time it will all come around. As it is, cabin yachts are restricted to stationary ballast, and for crew are allowed one man for every 5ft. of l.w.l. or fraction, with a sailing master. While shifting ballast was allowed to open boats, the crew have been restricted to one man for every 3ft. or fraction, with sailing master. This is an allowance of nine men for a boat under 25ft. The Larchmont club rule for open boats allowed shifting weight and five men and a captain; now they allow eight men and captain, the same as the Association. DELEGATE.

NEW YORK, May 2.

[The early withdrawal of the Brooklyn Y.C. from the association on account of the rule bears out our prediction of the probable result. It is true that the N. Y. Y. R. A. is composed only of clubs racing on length rule, but it is also true that other clubs, which should and probably would have taken an active part in the movement, were scared off by the certainty, as shown in the first discussions, that nothing but a mean length rule would be adopted. The interests of the open-boat men might have been protected, and at the same time the co-operation of a large number of yachtsmen might have been secured by the adoption of different rules for open and cabin boats, as we suggested at the time. The length rule has practically disappeared, save in the smaller clubs on very shoal water, and while there is still some uncertainty as to the best form of a length and sail area rule, nearly all the large yachting organizations of the world are agreed on the correctness of the principle. The Seawanhaka C. Y. C. rule, as it is generally known, is now used by the Seawanhaka C. Y. C., the Eastern Y. C., Lake Y. R. A. (some eight clubs), Knickerbocker Y. C., Quaker City Y. C., and some smaller clubs. It is very similar to the rule now in use by the Y. R. A. of Great Britain and the Royal Nova Scotia Squadron, besides some other foreign clubs. The New York Y. C. also uses a similar rule, while the Corinthian, of Marblehead, and the Beverly, both large racing clubs, use another form or rule, giving about the same results in practice. Judging from this there is no room for doubt as to the correctness of the principle, and the association would have been perfectly safe in adopting the Seawanhaka rule for its cabin boats, subject to amendment in the future. As to the instance quoted, the New England Y. R. A., we commented last week as to the manschievous result of a length rule in its case, in the way of a hindrance to its growth. The lesson that it teaches is that a length rule in any form is a drag on all but sandbag boats. That we are not alone in our opinion of the mean length rule is shown by the following from the London *Field:* "It will be remembered that some time ago we reported that the members of the New York Y. R. A., including Captain Joe Ellsworth, refused to be satisfied unless they had a 'mean length' rule. They have now got it, that is, the length over all is added to the length on the waterline, and the sum divided by 2. This is the 'mean length' which the captain just referred to so earnestly desired, and probably it will foster a style of architecture of the Manx cat type." The *Field's* comparison to a Manx cat only covers one end of the case. The other may be compared to a pug dog. What sort of a 'morfydite' the resulting structure would be is shown by boats built in other places under the same rule, in which the bow tumbles in aloft and the sternpost rakes forward on the head. We have a model of such a craft before us as we write. Length on deck 25ft. 6in., l.w.l 23ft. 6in., "mean length" 27ft. The lines of this boat are at the disposal of any one who wishes to build in time for the regatta of Sept. 2. If it had been desired to establish a representative body that should include all the smaller clubs, a very brief inspection of existing yachts and racing rules would have shown the absurdity of a rule which bars out modern boats and is directly opposed to the most advanced ideas of yachtsmen in all parts of the yachting world. We believe that there is a wide field for an organization such as the New York Y. R. A. assumes to be, and we are willing to help in every way toward its permanent establishment; and it is for these very reasons that we have opposed the effort to run the association in a narrow rut that all active yachtsmen are trying to get away from.]

THE LAKE Y. R. A.

ON Saturday next the annual meeting of the Lake Y. R. A. of Lake Ontario will be held at Rochester, delegates being present from all the clubs interested. Among other changes in the constitution and sailing rules it is proposed to replace the present Seawanhaka rule, adopted in 1884 on the formation of the Association, by a formula that will tax sail more heavily, as follows:

$$\frac{L+6\sqrt{S.A.}}{8}$$

The Lake Y. R. A., in common with most other large clubs, has felt very strongly the necessity for some action in the direction of restricting sail, and the question has been discussed for some time, with the result that an effort will be made to pass the above rule. While there is no doubt as to the need of further legislation in this direction, the subject is far too important to be dealt with hastily, or in such a manner that another change will be needed in a year or two. The great point in a measurement rule is stability; that it shall when adopted be established for a term of years, if possible, in order that men may build under it with some degree of confidence. Changes in the rules, though inevitable, must always have a bad effect for a time, and consequently should be as few as possible.

While yachtsmen in many other clubs, as in the L. Y. R. A., are agreed as to the need of a change, thus far there has been no agreement as to the details, and by common consent the matter has been laid over for the present, but with the distinct understanding that it should be taken up vigorously next fall, and a change made in good season to permit of building. Several clubs have appointed committees specially to consider this matter during the racing season, and to report at its close; by which time, there is little doubt, a great deal of valuable data will be added by the many promised races.

The L. Y. R. A. cannot do better than to adopt the same course, announcing its intention to change the rule in the fall, and appointing a live committee which shall work through the summer and report as soon as the season closes. One object of an immediate change is to prevent the addition of yachts with still larger rigs than any now on the lake, several of which have been talked of. This object can be attained by the course proposed, as it is not likely that such boats would be purchased now for one season only, knowing that they would be at a disadvantage under a new rule, as the disposition to tax sail is very evident. Sudden changes in a rule, especially when the season is practically open, are always undesirable and make a very bad precedent, and in the present case would be objectionable even if a really good rule were proposed, much less when a crude and hastily made rule is offered. The first efforts toward a change in the rule on the Atlantic coast took the same form as that given above, merely a heavier tax on sail, the classes being as before. Had the matter been pushed a couple of months ago such a change might have been carried through, but the continued dissension has brought to the front the other method, to which we have several times alluded, of classification by corrected length, and it is at least possible that a rule of this kind will be adopted in the fall. The following tables will show how such a rule would apply to the Lake Y. R. A. fleet, keeping the same formula as now. The arrangement of classes may not be the best possible, but serves as an illustration:

25ft. Class.		40ft. Class.	
L.W.L.	Sail.	L.W.L.	Sail.
20	900	36	1936
21	841	37	1849
22	784	38	1764
23	728	39	1681
24	676	40	1600
25	625		
26ft. Class.		48ft. Class.	
26	1156	L.W.L.	Sail.
27	1089	41	2025
28	1024	42	2916
29	961	43	2809
30	900	44	2704
35ft. Class.		45	2601
31	1521	46	2500
32	1444	47	2401
33	1369	48	2304
34	1296	49	2209
35	1225	50	2116

The fleet would thus be classed as follows:

30ft. Class.			
Molly	27.55	Nadia	28.21
Velnette	27.46	St. Elmo	26.50
35ft. Class.			
Cricket	31.93	Katie Gray	33.35
Cyprus	32.52	Coquette	34.41
Gerda	34.10	Majel	
40ft. Class.			
Verve	37.60	Iolanthe	36.73
Aggie	39.02	Laura	35.74
Merle	37.79	Vision	35.23
Psyche	37.36		
48ft. Class.			
Cygnet	48.10	Garfield	44.45
White Wings	46.40	Madge	44.16
Ethel	45.05	Condor	42.74
60ft. Class.			
Aileen	57.06		
70ft. Class.			
Oriole	62.26	Atalanta	66.21
Norah			

It would require a careful study of the fleet by men familiar with it to say what the classes and the allowance of sail for each length of loadline should be, but the principle is fully illustrated above. The probabilities are that it would prove a far better solution of the trouble than the proposed new rule, but we hope that neither will be adopted at the present meeting, nor on the other hand that the matter be permitted to go by default, but that the L. Y. R. A. will decide to amend its rules, but to do it deliberately, thoroughly and in the proper time for such work, at the end of the yachting season.

BUILDING NOTES.

AT Lawley's yard the work is being pushed in all departments, and yachts are leaving the yard and new keels being laid in their places every few days. Nanon and Nepenthe will probably leave this week, the former for Philadelphia and the latter for New Orleans. Maraquita, the Belmont 40, is nearly ready and will leave for New York in a few days. Merlin, the Forbes schooner, had her masts stepped on Saturday, Verena is nearly completed inside, the Foster 40, Lotowana, is in frame, the Owens 45 is ready for framing, while the lead keel of the Hasbrouck 40 has been cast. There is also plenty of old work. Pappoose has had more lead, a longer boom and bowsprit, and Wilson is making new sails. The sloop Mystery has had 3 tons of lead added to her keel in addition to 8 tons already there. A number of yachts are fitting out, including Zigeuner, Gundred, Alga, Chiquita and Adrienne. Sapphire, steam yacht, will have 3 tons of lead added to her keel. At East Boston the new 40, Alice, is partly planked. A part, at least, of Boston's yachting fraternity is greatly exercised over the question as to when this yacht will be finished as per contract by June 1. The designer, Mr. A. G. McVey, of the Boston *Herald*, has made a bet with the owner of the best suit of clothes that can be made, that the yacht will be ready on time. The celebrated "P. R. pants" are expressly barred by the terms of the bet.... At Salem the Helen, 40, will take a trial trip in a few days, and the Chrystal, 30, will be launched in about a week. Minerva, the Fife 40, was launched from Frisbie's ways on May 2, after having 1,400lbs. of lead removed from her keel, leaving 26,600lbs.

NEW YORK Y. C.—The next meeting will be held on May 16. The new club house at Newport is described as follows in the *Sun:* "The structure will be compact, canacious and of wood. The dimensions of the building will be 33ft. square, and it will have three stories and a cupola. It is not exclusively a New York affair, for the members of the Eastern Club as well as those of the Atlantic will find the doors wide open for themselves and their lady friends. Nearly the whole of the first story is to be occupied as a ladies' saloon or waiting room, from which will open elegantly appointed toilet chambers. One of the most attractive features of this apartment is the large open fireplace, which during the season will frequently be utilized to drive away the ill effect of Newport's heavy fogs and mists. The mantel is superbly carved by skillful artists. From this saloon one reaches the piazza, 50×10ft., which looks out upon the harbor, and from which the men and women of fashion can watch the white-winged sailers as they drop anchor during the summer months. The front of this promenade piazza runs out to the water face of the dock. The second story gives a definite idea that it is the purpose to separate the sheep from the goats. This story is exclusively for men. A chimney-place and its adornments are the attractive features of this hall. Over the fireplace is a large shield on which rest the various signal flags used by the club. The surrounding brick work is tastefully finished. The third story is reserved for apartments for the janitor. All the floors and staircases will be of hard wood. Over the front of the building will be a 10ft. square cupola to be used for a lookout and signal station by the fleet officers. Surmounting the cupola will be a lantern, octagonal in shape, measuring 3x3½ft., and this will have above it a weather vane, to be connected with the men's hall by a rod to a dial plate on the wall. The body of the building is to be stained and the trimmings painted white."

AMATEUR DESIGNING.—We have received from Mr. Chas. Livingston, of Liverpool, a design for a 20ft. racer for Lake Windermere, which he has lately completed, the boat now building by John Shaw, of Bowness, on the lake. The design, by halving the scale, would make a very promising 40-footer, of the extreme type, the dimensions being: Length over all (with clipper stem added), 55ft. 6in.; l.w.l., 39ft. 6in.; beam, extreme, 15ft.; l.w.l., 13ft. 8in.; draft, 10ft. 6in. Her displacement would be 26 long tons, with about 14 tons on keel. The design goes further than any of the new American boats in the direction of extreme beam and light bilge, her displacement being about the same as the American craft. Mr. Livingston, who is known to our readers, especially the canoeists, as an amateur designer and skillful boat sailer, has given considerable time to designing this winter, and has turned out three other designs, from which yachts are now building. One of these is a 10-rater, but rather small for her class, being 35x9ft., with 6ft. 6in. draft, 6ft. headroom, and a 7-ton lead keel. Another is a centerboard cruiser, 23ft. l.w.l., 31ft. over all, 8ft. beam, 4ft. 2in. headroom under 8in. cabin trunk, and 2ft. 9in. draft, with 1½ tons of iron on keel. The third boat, for himself and a friend, is an 18ft. sloop for the New Brighton Sailing Club.

COLUMBIA Y. C.—At the annual meeting of the Columbia Y. C., held on April 22, the officers were elected for 1889 as follows: Com., Chas. T. Wills; Vice-Com., Wm. H. Rowe; Sec., Geo. Parkhill; Treas., Jos. A. Weaver; Meas., Henry C. Rosemond; Steward, Theunis Spear; Fleet Surgeon, Chas. B. White, M.D.; Board of Trustees—it. P. H. Abell, Chas. H. Knubel, Chas. E. Simms, Jr., Abner B. Ingles, C. M. Armstrong, W. J. Greacen; Regatta Committee—Lemuel H. Withey, A. M. Everett, C. H. Kruse, A. F. Gore, Geo. Parkhill. The secretary reported 140 active members now on the roll, and the treasurer presented a financial report showing a net surplus in the treasury of $1,600. The annual regatta of the club will be held on June 18, over the straightaway course to Yonkers and return, and the iron steamboat Cygnus has been chartered to carry the guests over the course.

CHANGES OF OWNERSHIP.—Clytie, schr., has been sold by G. H. Gaither, of Baltimore, to Messrs. Savage and Batchellor, of the Dorchester Y. C. This is not the old New York Clytie, but a centerboard schooner 64ft. over all, 55ft. l.w.l., 17ft. 6in. beam, and 6ft. draft, built in 1878.... Bantam, cutter, has been sold by Dr. W. B. Jameson to W. E. Gordon, of the Lynn Y. C. Bantam is a Burgess boat, but not the one owned by Mr. Woodbury Kane of Newport.

BOUND FOREIGN.—The steel schooner Yampa, Mr. Chester W. Chapin, sailed last week from New York on a long cruise, her first port being the Azores. From there she will sail for Cowes, and later to the Mediterranean. The Yampa will be the first specimen of the latest results of American yacht building to be seen in European waters, and no better example of the large cruiser can be found afloat. She is 134ft. over all, 110ft. l.w.l., 27ft. beam and 13ft. 6in. draft.

STELLA, steam yacht, H. E. Abbey, was in collision with the Long Branch steamer Monmouth on April 29 off 22d street, North River, New York. The yacht was somewhat damaged. Mr. and Mrs. Abbey, Mr. W. H. Crane and Mr. Marcus Meyer were on board at the time.

CAPSIZED CENTERBOARDS.—On May 1 a catboat owned by Chas. Danhart of Greenville, N. J. capsized in New York Bay, drowning her owner. A companion, Charles Fisher, clung to the bottom of the boat for a time, finally swimming for shore, which he reached in an exhausted condition.

CONDOR.—The largest of the yawl rigs afloat, the famous old Condor, built by Fife in 1878, is now sailed under the Stars and Stripes, being owned by Mr. McDonough, a member of the Seawanhaka Corinthian Y. C., residing in England.

RAMBLER.—This old schooner, which sailed last fall for the Isthmus with a cargo of dynamite, and was afterward reported lost, turned up at Aspinwall on April 25, having been repaired.

ALERT.—Mr. Byrant's schooner has had her white pine masts replaced by Oregon pine, besides other alterations and improvements.

LADY EVELYN, schr., Sir Roderick Cameron, sailed on May 2 from Cowes for New York.

REPUBLIC, schr., T. H. Hall, was at Ponce, Porto Rico, on April 16.

BOOKS RECEIVED.

FARRAR'S Illustrated Guide to the Androscoggin Lakes, and the headwaters of the Connecticut, Magalloway and Androscoggin rivers, Dixville Notch, Grafton Notch and Andover, Maine, and vicinity, with a new and correct map of the Lake Region, drawn and printed expressly for this book. Also contains a valuable treatise on camping out, and the game and fish laws of Maine and New Hampshire (as revised by the last Legislature), Railroad, steamboat and stage routes, etc., etc. By Capt. Chas. J. A. Farrar. Boston: Lee & Shepard.

Canoeing.

Secretaries of canoe clubs are requested to send to FOREST AND STREAM their addresses, with name, membership, signal, etc., of their clubs, and also notices in advance of meetings and races, and report of the same. Canoeists and all interested in canoeing are requested to forward to FOREST AND STREAM their addresses, with logs of cruises, maps, and information concerning their local waters, drawings or descriptions of boats and fittings, and all items relating to the sport.

AMERICAN CANOE ASSOCIATION.

OFFICERS, 1887-88.

Commodore: H. C. ROGERS.....
Secretary-Treasurer: GEO. W. HATTON } Peterborough, Can.

	Vice-Com.	*Rear-Com.*	*Purser.*
Central Div.	W. R. Huntington,	E. W. Masten.....	T. H. Stryker, Rome, N. Y.
Atlantic Div.	W. P. Stephens.....	L. B. Palmer.....	F. L. Dunnell, 186 Jerolemon St., Brooklyn.
Eastern Div.	H. E. Rice, M. D....	Maxton Holmes.....	H. D. Marsh, Springfield, Mass.
N'thern Div.	Robert Tyson.....	S. S. Robinson.....	Colin Fraser, Toronto.

Applications for membership must be made to division pursers, accompanied by the recommendation of an active member and the sum of $2.00 for entrance fee and dues for current year. Every member attending the general A. C. A. camp shall pay $1.00 for camp expenses. Application sent to the Sec'y-Treas. will be forwarded by him to the proper Division.

Persons residing in any Division and wishing to become members of the A. C. A., will be furnished with printed forms of application by addressing the Purser.

WESTERN CANOE ASSOCIATION.

Commodore—J. R. Bartlett, Fremont, Ohio.
Vice-Commodore—D. H. Crane, Chicago, Ill.

THE ATLANTIS AND HER CRUISE.—II.

THE NEW ATLANTIS SAILS.

At once the mast we rear, at once unbind
The spacious sheet and stretch it to the wind.
—*Odyssey XI., 4 and 5.*

IT is an interesting fact that Mr. Stoddard has preceded the fast sailers of canoes by at least a year in each of the two important advances made in arriving at the present form of racing sails.

Canoeists generally are aware that it was he who first used the combined form of the lateen and the balance lug, afterward perfected and employed so successfully by the Albany men as to be generally adopted for a time and known as the Mohican sail.

A year before that part of the sail which is forward of the mast began to disappear at the meets, Mr. Stoddard was using the sail herein described, and it was used in the cruise of 1885. It is somewhat similar in principle, though different in detail, from the best canoe sails now used. The difference is due principally to the fact that the usual method would require too long a yard for handiness in a sail so large as that of the Atlantis; whereas a sharpie or gaff sail would necessitate too tall a mast.

The old Atlantis or Stoddard sails are too well known to need description here. Such as are not already familiar with the Stoddard sails should refer to Mr. Stephens's and Mr. Vaux's excellent books, entitled respectively "Canoe Building" and "Canoe Handling."

It will be remembered that in his original sails Mr. Stoddard solved the problem of combining the advantages of the lateen, doing away with its long yard, and those of the balance lug, retaining its advantages of flatness and adaptability to reefing gears.

The plan of that sail is shown in the first article of this series on page 225, April 4.

The original sails, while good in plan, were unfortunate in material, the substance being so light as to stretch and hopelessly ruin the set of the sails. They were lost in our shipwreck off Portsmouth and were not deeply regretted.

In the sails subsequently used all the qualities of the former sails were retained in a form in which all the cloth was placed aft of the masts.

Within the last two or three years Messrs. Butler, Gibson, C. J. Stevens, Vaux and other experts have made wonderfully ingenious and effective racing sails, embodying all the above mentioned desirable points, and their work is well-known. Mr. Stoddard's rig differs from theirs in its adaptability to sails larger than those used on racing canoes.

He employs two halliards but compensates for the complication involved by combining all the following advantages:

1. Short mast when sail is furled.
2. Length of mast adjusted to height of sail when reefed.
3. No sail forward of mast.
4. A simple, effectual reefing gear, with no loose ends to cordage, and with no halliards to snarl in the cockpit.
5. No lines leading into cockpit, a great advantage when sailing with storm apron.
6. Boom can be elevated when running free.
7. When reefed the sail is in best possible shape for a storm sail, viz., a "leg of mutton," tack close to deck and end of boom well raised; reef close and snug.

Mr. Stoddard's drawings, which are here given, display the sail plan and general features. The dimensions are:

MAINSAIL.

Mast above deck	10ft.
Yard	11ft.
Boom	11ft.
Batten	11ft.
Luff from tack to peak	16ft.
throat	5ft.
Leach, from peak to end of batten	12ft.
end of batten to clew	5ft.

MIZEN.

Mast above deck	7ft.
Yard	7ft. 3in.
Boom	7ft. 3in.
Batten	7ft. 3in.
Luff from tack to peak	11ft. 3in.
throat	4ft.
Leach, from peak to end of batten	8ft.
end of batten to clew	4ft.

There are two systems of lines; the one forms the peak halliard and the downhaul, the other forms the throat halliard and the reefing lines. The former starts at *A*, Fig. 1, as the peak halliard, and ends at the same place as a topping lift and downhaul; the latter starts at *D*, Fig. 1, as the throat halliard, and ends divided into three strands or parts, *U*, *U*, *U*, at the ends and near the middle of the batten, as the reefing lines. The former makes a long bight or loop along the port deck, the other a similar loop to starboard. Both reeve through blocks made fast to cleats, within easy reach of the skipper.

OPERATION OF THE LINES.

To hoist the sail, a haul on the peak halliard raises the yard against the mast, and the upper triangle or the reefed sail is set. The slack of the halliard runs through block 2, Fig. 1, and is taken up as the topping lift. Another haul on the throat and peak halliards together shakes out the reef and the full sail is unfurled, as shown in Fig. 1. The slack of the throat halliard is taken up as the reef line, after passing through block 3, Fig. 1.

After the sail is set the halliards are held taut by a little piece of line spliced into the halliard as at 4, Fig. 1, and belayed to spring cleat 5, on the cockpit coaming.

To reef, the above operation is reversed; the halliards are let slack by casting off line at 5, but not at 6 (Fig. 1), and the halliards are run through their blocks 2 and 3. The batten comes down evenly as a curtain stick, and rests upon the boom. It is bound down tight by a pull on the reef line, the slack being taken up on cleat 6.

To top up the boom while running free a pull is given on the downhaul without releasing the peak, the slack of downhaul being made fast on deck. The end of the boom may thus be brought to the end of the batten, or the whole sail brailed up, as far as desirable. This is one of the strong points of the gear, as it is certainly a great advantage to have the end of the boom under immediate control when rolling in a big sea.

To lower away in haste without getting the end of the boom overboard, the halliards are let go from cleats 6 to port and starboard, the sheet is hauled in and the sail comes down with a run and is caught by the topping-lifts.

DETAIL.

A, Fig. 1, is a block running freely upon a galvanized wire, which is seized to the yard *B* and *B*. The peak halliard is made fast to the eye of this block, and leads through a sheave, *R*, in the masthead, through a block on deck forward and to port of the mast, and through block 2, Fig. 1, on deck aft. Thence it returns forward as downhaul and divides into two, port and starboard, strands at *T* with an eye-splice and loop as in Fig. 1, and not tied as is shown in the enlarged drawing.

The two parts lead through boxwood blocks, made fast under each side of the jaw of the boom, are sunk into deep grooves cut in either side of the boom, and are protected by brass plates; they are so led under all other rigging for about two-thirds of the length of the boom. Then they turn through sheaves on either side of the boom at *L* and ascend, as topping-lifts, to their origin at *A*.

The throat halliard is made fast to the center of the jaw of the batten at *D*, reeves through the block which is seized to the mast at *S*, about 2ft. from the masthead; leads through a block on deck forward of the mast and to starboard; thence along the starboard deck and through the block 3. It then returns forward as the reef line which at the tack divides into two parts, *U*, *U*. One part leads through a hole bored through the boom, upward through rings along the luff of the sail to the batten, where it is made fast. The other part leads through a block under the jaw of the boom and terminates in an eye-splice at *K*. The after reef line begins at the end of the batten, leads through rings on the leach of the sail, through a sheave in the end of the boom, forward through rings under the boom through the eye-splice, *K*, where it divides into two parts which ascend on either side of the sail to the batten.

The mizen is rigged in exactly the same way as the mainsail. The lines, however, with the exception of the sheet, do not lead to the deck. The peak halliard is made fast to the cleat, *F*, Fig. 2, at the foot of the mast; the throat halliard to a cleat, *G*, on the upper side of the boom. The forward reef line leads around a sheave sunk into the boom. The operation is the same as that of the mainsail, and the detail is clearly shown in Mr. Stoddard's excellent drawings.

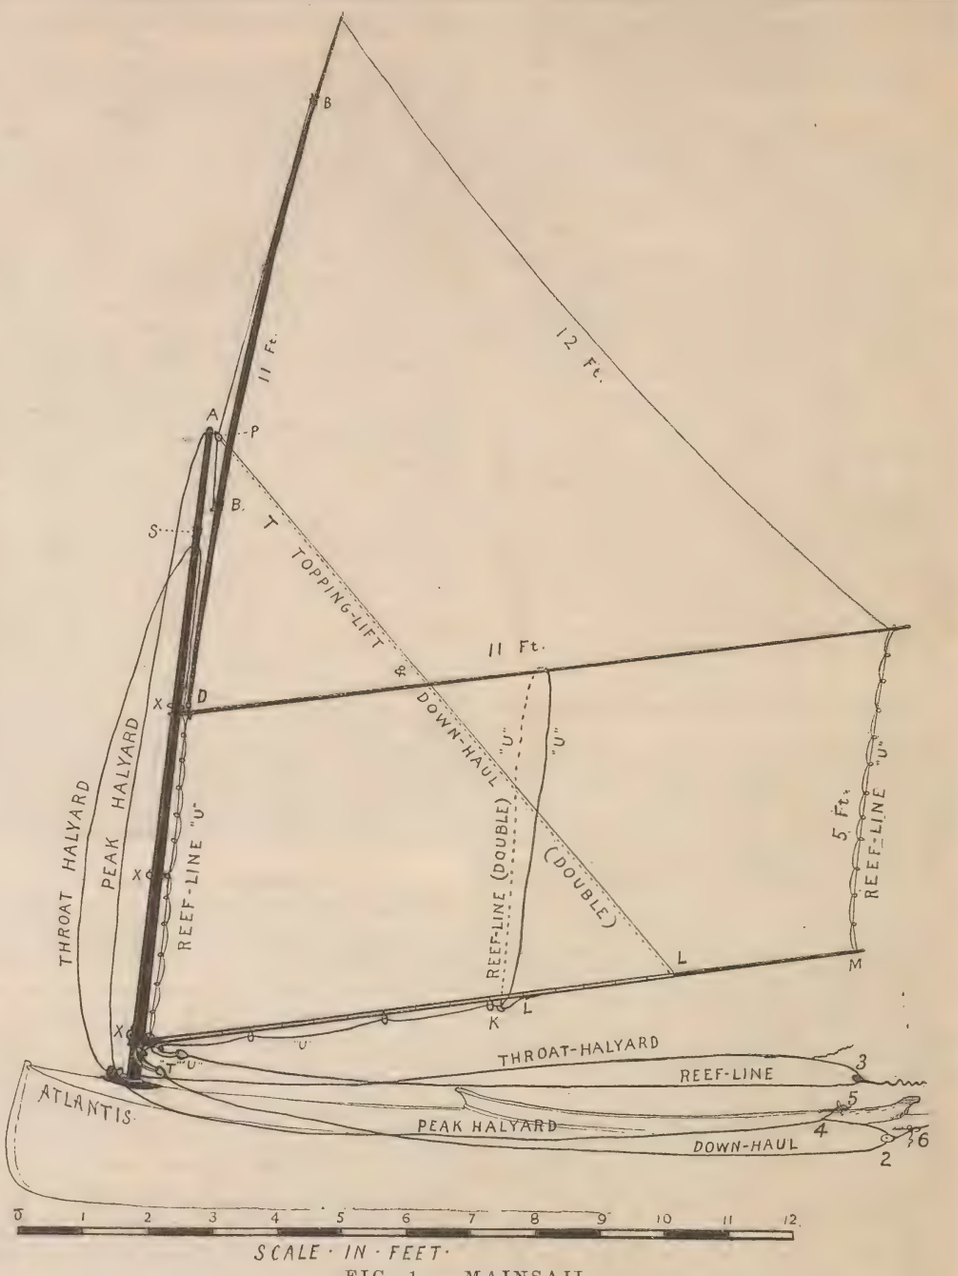
If you have followed thus far you have taken in every rope in the ship's rigging, and if you are familiar with canoe sails you need no further explanation of how the gear works.

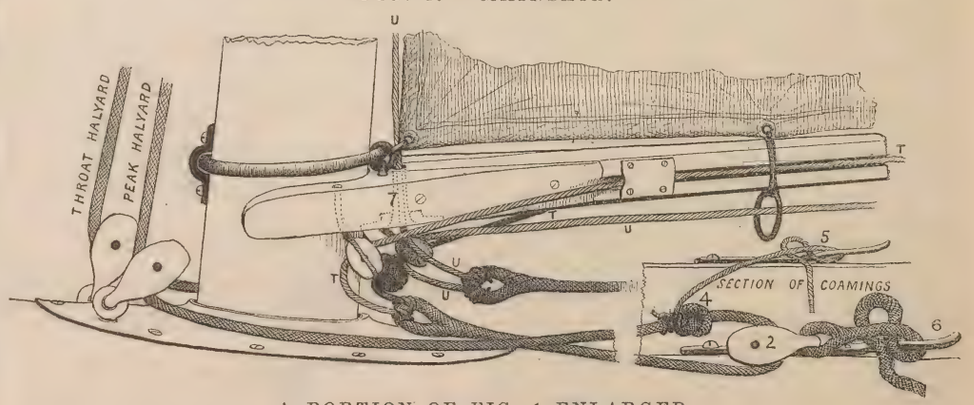
MINOR POINTS.

The wire *B*, *B*, is stretched very tightly, just allowing the block, *A*, to run, but not allowing the sail to fall away too far from the mast. The sail is cut with considerable roach.

Three rings hold the luff of the sail to the mast.

The boom is made fast to the mast by a shackle joint, as shown in the enlarged drawing, but it may be brailed up against the mast for stowing.





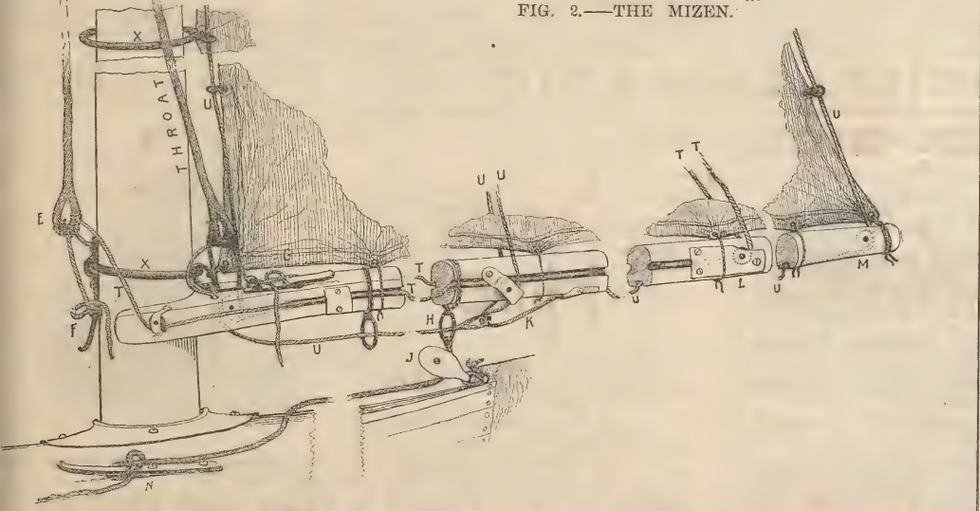


FIG. 1.—MAINSAIL.

A PORTION OF FIG. 1 ENLARGED.

FIG. 2.—THE MIZEN.

RIGGING OF MIZEN. (FIG. 2 ENLARGED.)

The three blocks under the boom do not interfere, the two for the downhaul being under the jaws, and the one for the reef line being under the boom itself.

The hole through the boom for the forward reef line is counter sunk and smoothed, so that the line does not bind.

The system of loops and eye splices at *T*, *U* and *K* take up any slack made by unequal shrinking of the divided lines.

The main halliard blocks on deck can be removed from deck and the entire sail and rigging removed and furled.

The rings under the boom do not turn sidewise so as to jam the line, but may be turned up against the boom so as to be out of the way in stowing.

The blocks, 2 and 3, on either side of the cockpit, are made fast by a short bight of heavy line, cleated to half a Tredwen spring cleat; they are not belayed, and may both be cast off in an instant, letting the sail fall on deck or into the topping-lifts. All the spars may be then raised above the sea by hauling the topping-lift, and swung inboard by the sheet.

A bight of small line is made fast just forward of each of the blocks 2 and 3, to set the sail up flat after it has been raised. The enlarged drawing shows the knot at 4. This would have been a splice had Silver Lake line not been used. The end thus formed is made fast to a cleat on the coaming. R. B. BURCHARD.

Answers to Correspondents.

☞No Notice Taken of Anonymous Correspondents.

P., Louisa county, Va.—We have asked C. J. R. to give you a wrinkle.

C. M. W., Providence, R. I.—The FOREST AND STREAM targets are open for testing any guns that owners or makers may submit for the purpose.

C. L., New York.—Can you advise me what bait to use for mink traps and how to bait it? Ans. Fish or a chicken's head. In the case of an animal so small as a mink the bait may be tied to the pan of the trap.

J. A., Jr., Caledonia, N. Y.—I have a kennel of beagles. The dog tax in our town is $2 each (dog or bitch). I sometimes have 15 or 16. Is there any New York State dog law giving exemption to breeders? Ans. No.

H. L. F., Tarrytown, N. Y.—1. A setter dog three years old is not too old to be taught to retrieve. 2. For method of instruction study Hammond's "Training vs. Breaking." 3. The setter indicates the location of the bird by pointing it.

P Keokuk, Iowa.—1. Coarse and fine shot weigh the same bulk for bulk, because the ratio of solid metal to interstitial space is the same in both cases. An equal bulk of mixed large and small shot will weigh heavier because the ratio of interstitial space to metal is reduced. 2. We cannot identify the bird from your meager description. 3. The price of the abridged A. O. U. Check List is fifty cents.

ED. WARD, Brunswick.—Will you kindly inform me as to the dog law in the State of Maine. For instance: If a man should shoot my dog, can I recover damages in any way, and if so what course should I pursue? Ans. It is a legal axiom that the law provides a remedy for every injury, but your legal status in the matter would depend on whether the dog was killed wantonly or in self-defense. Your proper course is to consult a lawyer.

V. S. McN., Potecasi, N. C.—Will you oblige me by giving minutely and plainly the *modus operandi* of using quicksilver in the removal of lead from rifle barrel? Ans. The *modus operandi* is to stop one end of the barrel, pour in a little quicksilver, stop the other end, and then keep the quicksilver in motion over the whole inner surface of the barrels until all the lead is amalgamated with it. Follow this with a stiff brush.

A. C. R., New York.—Could you kindly inform me through your esteemed paper where I could get good trout fishing during the two last weeks of May, within 150 miles of New York? Do you know of any better place than Rockland, Sullivan county, N. Y., Lackawaxen, Pike county, Pa., or Stroudsburg, Monroe county, Pa.? If not, which of the three is the best? Ans. Rockland and Stroudsburg both well recommended. Dingman's Ferry, Pike county, Pa. (New York, Lake Erie & Western), is a noted resort. Oak Ridge, Passaic county, N. J. (New York, Susquehanna & Western), has many trout streams. For additonal localities see FOREST AND STREAM of April 25, page 289, answer to A. K. R.

E. R. C., Lewiston, Me.—1. Is there any other object in grooving bullets than to lighten them? 2. Will they shoot any more accurate than the smooth bullets? 3. Will a rifle using a bottle-necked shell shoot as accurate as a rifle using the straight shell of the same caliber with the same charge? 4. Will the round ball shoot and penetrate as well as the conical? Ans. 1. The canelures hold lubricant and take the grooves of the barrel. 2. Yes, in the rifle for which they are designed. 3. A bottle neck holds a larger charge in a smaller length. They are not favored in fine rifles. 4. The ball is made conical to secure more accurate shooting and to increase weight. Hence it should hit harder, though the shock to the animal hit may not be as great.

H. E. B., Rockland, Me.—1. Would you send $20 or $30 to a stranger for a dog you had never seen? Would it be unbusinesslike to offer to deposit with express agent a sum sufficient to cover all charges, and then have the goods come subject to approval? Ans. 1. There would be nothing imprudent in sending the price for a dog to a respectable, long established kennel firm after arranging for his purchase on description and guarantee, but it would be folly to make such arrangements with a man of whom you know or can ascertain nothing satisfactory. 2. If you have a dog sent subject to your approval he should be sent C. O. D. on your lodging the costs of transit one way with the express agent, as evidence of your good faith. The fact that an owner will send a dog for your approval, and be prepared to bear half costs if you reject him, is sufficient evidence of his good faith; but there would be nothing unbusinesslike in your undertaking to defray all charges.

E. F. J., Morgantown, W. Va.—I write you for information about bass fishing. I have used always a plain reed pole and about 20ft. of line, but am now desirous of trying light tackle and reel. Would like to know what length and weight of rod to buy; also whether to buy a plain or multiplying reel, click or drag, and what size and quality of line is best. I want a rod which will do for both bait and fly-casting. Fish range as high as 3½lbs. What flies would you recommend? Ans. A trout fly-rod 11ft. long and weighing 9oz. will be suitable for black bass fishing. Ash and lancewood are perhaps the best materials. The "Imbrie" reel can be used both for bait and fly-fishing, No. 4 or 5 will answer. It would be much the best to have separate rods for bait fishing and fly-fishing. For bait fishing use Henry Hall Co.'s H or No. 6 line. For fly-fishing you should have a water-proofed tapered line of enameled silk 25 to 30yds. long, size F or 4. There is great diversity of opinion among anglers about the choice of flies. You will find the following, however, generally recommended: Professor, red-ibis, coachman, Queen-of-the-water, grizzly-king and the various hackles.

SUBSCRIBER, Bristol, R. I.—Where can a friend and myself find good inland trout and bass fishing, about May 5, within three or four hours' travel of Boston, Mass., and good accommodations? We do not mind paying well for the fishing privilege. Ans. You cannot lawfully catch black bass until July 1 in Massachusetts. In New Hampshire the season begins June 15. At Natick, Mass. (Morse's Pond), fishing is good for black bass, pickerel, yellow perch and white perch. There is probably no better place for black bass in Massachusetts than Stow, Middlesex county, Assabet River. Except in the Berkshire Hills or in stocked waters, trout are not excessively plentiful in Massachusetts. Becket, Berkshire county (Boston & Albany R.R.), is credited with some trout in Mill Brook, May and June. Chester, Hampden county (Boston & Albany), is well known. Many brooks near are fished with best results, April to June. Easthampton, Hampshire county (Connecticut River R.Rs.), has Broad Brook, containing some trout. Plymouth (Old Colony R.Rs.) is near several trout brooks. Shelburne Falls, Franklin county (Fitchburg R.R.), has several small brooks. The west branch of Swift River near its headwaters is excellent but hard to reach from Enfield. Roaring Brook, three miles from Stafford (Willimantic R.R.), furnished fair trout fishing last year.

GURDON TRUMBULL'S

Names and Portraits of Birds

Which Interest Gunners; with descriptions in language understanded of the people.

Practically speaking, this is the first popular volume of ornithology ever issued from the press; a work which goes far to demonstrate that scientific accuracy may be as easily maintained in English as in Greek or Latin. Follows the game birds all over the continent and gives a glossary of all the local names in popular use. Illustrated with admirable portraits from the pencil of Mr. Edwin Shepard of the Academy of Natural Sciences, Philadelphia, which, with the clear descriptions in the text, will enable any man who can read to identify the contents of his game bag.

OPINIONS OF THE PRESS:

It is the first, so far as we know, of a class of books of which the need is felt in every department of natural history.—*Troy Press.*

The book should find its way to a choice place in every sportsman's library.—*Chicago Inter-Ocean.*

I would much rather know what this book tells me, the various names by which the people call a bird, than the Latin, Greek or Hebrew name which science gave him for the sake of cataloguing him. * * * It is more value to me to have a description of a bird in plain English which I understand than in scientific language which I do not understand.—*W., in Journal of Commerce.*

Hotels and Routes for Sportsmen.

Only 33 hours from New York, 29 hours from Boston to Roberval, Lake St. John.

ANGLER!

Did you ever catch a fresh-water salmon? If not, try Lake St. John; or, if you want the largest of brook trout, try Lake Edward. Bring your families at the same time, to enjoy some of the most delightful scenery in America. Comfortable hotels at Roberval and at Metabetchouan, Lake St. John, 190 miles, and at Lake Edward, 115 miles, from Quebec. Express trains each way daily.

For particulars of lakes and fishing, read "Adirondack" Murray's "Doom of Mamelons," or Kit Clarke's "Where the Trout Hide." For folders and other information address, ALEX. HARDY, Gen'l Pass. Agent, Quebec, or G. LEVE, 315 Madison avenue, New York.

J. G. SCOTT, Sec'y and Manager.
General offices, 92 St. Peter st., Quebec, Can.

The Tomahawk Lakes & Trout Lake

Are the very best fishing grounds in the State of Wisconsin. These lakes are located in Oneida county, along the newly completed line of the Wisconsin Valley Division of the *Chicago, Milwaukee & St. Paul Railway*, and the whereabouts is just being made public. Muscallonge, bass and trout in abundance.

During the season of 1889, necessary hotel and camping facilities will be provided for all sportsmen who are looking for "greener fields and pastures new."

Buy tickets to Minocqua, Wis., via the Chicago, Milwaukee & St. Paul Railway.

For further information address A. V. H. Carpenter, General Passenger Agent, Milwaukee, Wis.

Hotels and Routes for Sportsmen.

GRAND TRUNK RAILWAY.

When planning your summer piscatorial tour remember that this company controls over 4,100 miles of railway, equipped in the most approved modern style, and passing through a magnificent country, noted for its unsurpassed facilities for sport.

A FEW OF THE PRINCIPAL RESORTS.

PORTLAND, ME.—For salt water fish.
RANGELEY LAKES (via Bryant's Pond or Bethel, Me.)—For brook trout, pickerel, yellow perch, rock bass.
THE WHITE MOUNTAINS (via Gorham, N. H.)—For pickerel, trout, bass, cusk.
THE SALMON RESORTS of Quebec, New Brunswick and Nova Scotia (reached via Quebec).
LAKE ST. JOHN DISTRICT.—For Ouinaniche (reached via Quebec).
THE RIVER ST. LAWRENCE (in the neighborhood of the line for 400 miles).—For muscalonge, pike, bass, whitefish, pickerel, perch.
THE THOUSAND ISLANDS (via Gananoque or Kingston).—For pickerel, black bass, muscalonge, pike.
MUSKOKA LAKES (the best place on the continent for fishing, shooting and camping, reached from various points on Northern and Northwestern Division).—For brook and salmon trout, black bass, muscalonge pickerel.
PARRY SOUND AND GEORGIAN BAY.—For pickerel, muscalonge, black bass.
LAKES ONTARIO, ERIE, HURON AND MICHIGAN, (via stations at all principal ports).—For the varieties of fish for which they are noted.
LAKE SUPERIOR (via Collingwood, Wiarton, Sarnia, in connection with steamship lines).—For lake trout, etc.

The charges for hotels, guides, and camping at many of the fishing waters named above, are extremely low. Full particulars of same, with many valuable hints as to baits, best months and general facilities are published in a pamphlet entitled **"Fishing and Hunting Resorts of the Grand Trunk Railway,"** which will be furnished gratuitously on application to any of the company's principal agents, or of the General Passenger Agent, Montreal, P. Q.

WM. EDGAR, Gen. Pass. Agent. JOSEPH HICKSON, Gen. Manager.

TAKE THE

Grand Rapids & Indiana Railroad,

The "FISHING LINE,"

THE DIRECT ROUTE TO
TRAVERSE CITY, PETOSKEY, MACKINAC, MARQUETTE, and Other Delightful Health and Summer Resorts of

NORTHERN MICHIGAN

And the Celebrated Trout and Grayling Streams, Beautiful Lakes and Grand Forests of this Famous Country.

The waters of Northern Michigan are unsurpassed, if equalled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

THE CLIMATE is peculiarly beneficial to those suffering with HAY FEVER and ASTHMATIC AFFECTIONS.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample ACCOMMODATIONS FOR ALL.

The Grand Rapids and Indiana Railroad in connection with the Duluth, South Shore and Atlantic Railway at Mackinaw City, forms the most direct route to Marquette, Sault Ste. Marie, Negaunee, Houghton, Hancock, and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to tourists and sportsmen.

For Tourist's Guide, Time Cards and Folders, giving full information, address
C. L. LOCKWOOD, Gen'l Pass'r Agent,
Grand Rapids, Mich.

THE ICE IS OUT

Yachts and Canoes For Sale.

Cruising Yacht For Sale or Charter.

The owner of a well-known yacht, 47ft. long, 14ft. beam, 6ft. draft, perfectly fitted out for the comfort and accommodation of four to six persons in the cabin, and three men in forecastle, patent w. c. and all modern improvements, will sell or charter her at a reasonable price on account of important business engagements preventing his leaving the port during the summer months. The yacht is built upon a beautiful model, has two rigs, can be sailed as a sloop, when she is very fast, or as a yawl for cruising. She was built during the winter of 1886, of best of material, under the personal supervision of the owner, and is a staunch and excellent sea boat, well suited for cruising in the gulf of St. Lawrence, and has been so employed, where capital sea trout and other fishing can be enjoyed, and salmon may be included, seal and white porpoise hunting, duck and shore bird shooting. This is an opportunity seldom offered. Address P. O. Box 1081, Quebec City, Can. Satisfactory references in New York or elsewhere given and required.

FOR SALE.—THE CELEBRATED SINGLE-handed yawl Windward. Can be seen at the foot of Spring st., Newport, R. I. Address C. F. L., 14 Walnut st., Boston, Mass.

FOR SALE.—CUTTER YACHT 32FT. OVER all, water line 25ft., beam 8ft. 6in. Five tons lead on keel. Completely fitted for racing or cruising. Sound and a fast sailer. Inquire, I. H. P., 214 Purchase street, Boston, Mass.

FOR SALE.—THE CAT YACHT VIKING, length 30ft., beam 11ft. 8in., Barnegat cabin, built for cruising and fishing, of best selected frames and timbers; finished in mahogany with nickel trimmings. Fast, staunch and an able boat. Spars, sails and running rigging in first-class order. Well fitted with apparel and furniture, and ready for immediate use. Will be sold at a sacrifice. Address Box 291, Chester, Pa.

FOR SALE.—FAST AND ABLE CUTTER rigged keel sloop, 20ft. 4in. over all, 7ft. beam, 5ft. 3in. draft, 25ft. 6in. waterline, 5 tons of outside lead; iron floors on every frame; oak garboards, cedar planking, mahogany cabin fittings, ample head room, sleeping accommodations for four, plush cushions, etc. Full suit cruising, storm and racing sails in first-class order. New yawl boat and fully fitted in every respect. Is a wonderful sea boat, tight as a bottle, carries her sail well and is in full commission ready for racing. Rigging, etc., all new. Nothing to do for her. Only four years old. Cost $3,400 to build, and offered for only $1,100 to prompt purchaser, as owner has built a larger boat. Address WM. WHITLOCK, 37 W. 22d st., N. Y.

FOR SALE.—NEW SLOOP YACHT, 30FT. waterline, 36ft. over all; handsome overhang; wheel; centerboard; draft 5ft. 6in.; 6 tons lead on keel. Rigging, sails and everything in first-class order. Fully found. Ample lockers, ice box, etc. In commission. Price $1,750. H. STANTON, owner, Mills Building, N. Y.

For Sale—Rushton Canoe

15ft., been used one season; mast tube for lateen sail; sail and rudder; just been oiled; getting larger boat. Sell for $35; cost $70. *Speak quick.* GEO. H. WILD, Red Bank, N. J.

No Chemicals.

W. BAKER & Co.'s Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

ANSWERS TO CORRESPONDENTS.

LIMING SONG BIRDS.

WITHIN the past few weeks great numbers of song birds have been destroyed or captured within the limits of this city. Men provided with bird lime and decoys have this spring visited the upper sections of New York Island, where there are still fields and woods, and during the migration have made away with thousands of the beautiful creatures which were making their journey from the south toward their summer homes.

By Chapter 427 of the Laws of 1886 it is specifically provided that no person shall catch with bird lime or any similar substance any song bird or any wild bird other than a game bird. The penalty for a violation of this act is imprisonment in the county jail for a period of not less than five or more than thirty days, or a fine of not less than ten or more than fifty dollars, or both fine and imprisonment, at the discretion of the court.

However difficult it may be in the country districts to enforce this and similar laws, there should be no trouble about doing it in the city, where it falls within the province of the police to prevent infractions of the statutes. The police who patrol the upper end of the island, or some of them, appear to be ignorant of their duty in this matter, and it will be well for the captains of the various precincts to bring this subject to the attention of their men.

We are informed that one of the favorite places for this trapping of the birds is on the Ward property, which is situated at about 170th street, in Captain Cortright's precinct. We learn that complaint has more than once been made to the patrolmen whose beats cover this property, but they have declined to take even the mild action of warning away the offenders. The Ward property is, we understand, leased as a shooting ground to the Washington Heights Gun Club, and complaints of these infractions of the law have been made to the president of this club, but it is stated that he paid no attention to the matter. It would seem that a sportsman would take sufficient interest in an affair of this kind to try and put a stop to it.

The provisions of the law are clear, and it is the plain duty of the police to see that they are carried out. Inspectors and captains controlling the suburban portions of the city have the power to put an end to this destruction, and now that the subject has been brought to their attention they probably will do so.

A SUMMER CAMP FOR BOYS.

IN our Natural History columns we print a communication from Worcester, Mass., describing the summer camp for boys maintained by the Worcester Natural History Society, at Wigwam Hill, on the shore of the beautiful Lake Quinsigamond. It must be confessed that the account given might be thought to smack of Utopianism, for the plan of the camp is one to be much more readily projected than carried out. But the best part of it is that the camp is an outgrowth of experience; it has been gradually developed from a small beginning, and the summer programme, as given by our correspondent, is rather in the nature of a report than of a prospectus. The camp is a natural growth; it has not been forced; and it is established on what have been proved to be the right lines.

The Worcester Natural History Society was founded more than a generation ago for the special benefit of young people who had a love of nature. Its usefulness has consisted in the opportunities offered by which natural history study might be stimulated in the minds of the young; and this branch of usefulness has been developed, rather than those advanced scientific investigations which make up so large a share of the work of ordinary scientific societies. The ambition of the directors has been to awaken and encourage in boys and girls an intelligent interest in botany, entomology, mineralogy and other such pursuits, and thus to equip them with tastes and knowledge which should prove a value and a gratification through life.

The Society has excellent collections of specimens. From a study of these indoors, the next step was to make field excursions for new specimens, then field meetings for study; and these have now grown into what has come to be a regular annual summer camp. The establishment at Wigwam Hill is in short a pleasure or vacation camp where the pleasure is intelligently directed and the vacation is profitably spent. It is camp life with all the advantages of the ordinary camp and added to them the influences of older persons who have the faculty of imparting to the young something of their own enthusiasm in the study of outdoor life.

BAGGAGE CAR EXTORTION.

THE extortion of baggage masters when it comes to charging up transportation on a hunting dog is an old cause of complaint; and a long-suffering public hails with complacency the occasional instance when the biter is bit. The report of such a case has just come to us from Philadelphia. Two sportsmen of that city, one being Mr. Joseph McKinney, of the Philadelphia Sportsmen's Club, not long ago went over the Norfolk & Western Railroad from Lynchburg, Va., to Roanoke and thence to Christiansburg. They were on a quail shooting expedition, and had two dogs. For these dogs the baggage master, one Duyerlie, charged them $4.25 to Roanoke, a distance of fifty-three miles, and $2.50 for the rest of the way, thirty-two miles. These charges they paid, but on the return trip they learned that the rule of the railroad company was that one dog could be carried free, and a fee of twenty-five cents only was due on the extra one. Now Mr. McKinney is a man of pluck, as was amply demonstrated some years since, when, having lost the sight of his right eye by a charge of shot striking him, in a partridge cover, he set to work and learned to shoot from the left shoulder. Finding that he had been robbed, Mr. McKinney communicated the facts to General Passenger Agent W. B. Bevill, who at once took the case up, paid the expenses of the two Philadelphians to Lynchburg, took their testimony and swore out a warrant for Baggage Master Duyerlie. He was arrested, prosecuted by the railroad company's attorney, convicted and sentenced to jail for three months for larceny. The ending of the case did credit to all engaged in righting the wrong.

The same course of precedure ought to be followed by every sportsman who is subjected to thievish extortion by baggage masters. The officers of the roads are usually more than ready to do their share in correcting these abuses, and the individual who is robbed by an over charge owes it to his fellows, to sportsmen as a class, to report imposition. This sometimes involves one in added trouble, but so long as the sportsman tourist is content to pay the damage and give himself no further trouble, so long will baggage car extortion flourish.

SNAP SHOTS.

IT is gratifying to learn that the sentiment for the protection of does in the North Woods is on the increase. However such a rule may be thought to be uncalled for and needless in some other hunting districts of the country, it is recognized as most desirable for the Adirondacks. This year's Legislature has done nothing whatever toward enacting a law for the protection of does, but the feeling in favor of such a rule is making headway, and where this sentiment exists a law is not absolutely necessary. The guides have such things largely in their own hands, and they often refuse to put their parties in the way of killing does. We have just learned of a noteworthy instance of a North Woods guide's stand for his principles. There is a certain famous surgeon of this city whose name, by reason of his excesses in hounding deer, has come to stand for wanton slaughter. Year after year he repaired to the Adirondacks in the summer and killed for the sake of killing. Last season, however, when he set out upon his annual campaign, he found himself blocked, because his guides would not be a party to the business. They went with him only on condition that only such deer should be killed as could be used; and for once in his life this man of eminence in his profession had to conduct himself in the woods with decency.

Messrs. Thos. B. Asten and F. L. Anthony have just returned to this city from their winter cruise in the Awixa on the east and west coasts of Florida. The yacht has a record of eleven tarpon to its credit for the season. The average weight of the fish was 115lbs. Commodore Asten is loud in his praises of the Florida waters for winter cruising, and of the tarpon as a game fish. "Al Fresco," our Jacksonville, Fla., correspondent, has not lost faith in the invincibility of the St. John's River tarpon. Years ago he contended that these fish could not be taken with a rod and reel, and the success of tarpon fishermen on the west coast has in no wise shaken him in his belief. The Charlotte Harbor tarpon caught in winter are, according to "Al Fresco," comparatively only infants; the mature, developed, hard fighters, which make their way up the east coast and reach the St. John's in June, July and August, are the glorious game creatures sure to come out unsubdued from a battle-royal matched against most perfect tackle and consummate skill.

The National Gun Association, whose demise was recently announced by Secretary Etheridge, was in purpose closely allied to the existing American Shooting Association; it had a like purpose; and the scheme of the present association was outlined and proposed by the managers of the National. The first attempt may have been premature, for trap interests had not then the magnitude they have assumed within the last years. Whatever may have been the causes for its failure, the National served a useful purpose as a forerunner; and in its way it certainly did advance the interest in trap-shooting.

There is no point on which the fond father expands with more pride in talking of his son than when relating the prowess of the youthful prodigy with gun or rod. The skill of the youngster and his precocious sportsmanship—as told by the proud parent—would do credit to a grown man; and the boast is always made that in woodcraft the son will be sure to prove himself a chip of the old block. This is a healthy pride, and speaks well for man and boy. The companionship and comradeship of some fathers and their manly sons in their summer woods life are altogether lovely.

The compendium of the New York game laws published by the Commissioners of Fisheries, is indexed in a very slovenly manner.

The Sportsman Tourist.

SALMO FONTINALIS.

WHO shall dare to sing thy praise,
Haunter of cool waterways?
Who thy virtues may rehearse
In the manacles of verse?
Monarch of the forest brook
From Kootenai to Pemacook;
Royal in thy port and bearing,
Haughty, self-contained and daring,
Eye of the hawk, and speed of deer,
Palate of the connoisseur,
Leopard's grace and lion's heart—
All complete in every part—
Chaste as Dian, wise as Pallas,
Princely *Salmo fontinalis!*

Living rainbow of the stream,
Incarnated artist's dream,
Animate jewel of the water,
Humming bird and butterfly's daughter,
Flashing shaft from Phœbus' quiver,
Meteor of the lake and river,
Aqueous bird of Paradise,
Ruby, diamond, pearl of price—
Words, abashed, scarce do their duty
Charactering thy matchless beauty;
Gorgeous gem in Nature's chalice,
Beauteous *Salmo fontinalis!*

When the blackbird woos his mate,
When hemlock aisles reverberate
To the pheasant's booming drum
And the cicada's shrill hum,
I, thy lover, seek thee still,
Track the thicket, breast the hill,
Thread the treacherous morass,
Climb the rugged mountain pass,
Brush the dew from brier and brake
All toil endure, for thy sweet sake,
Till at last, O joy! I find thee
Where the water-fairies bind thee,
Enchanted in thy crystal palace,
Loveliest *Salmo fontinalis!*

H. P. U.

THE VOICES OF THE SEASONS.

ONE threatened with the loss of sight very naturally begins to reckon how far his other senses may be depended upon to acquaint him of what may be going on about him. If he is a lover of nature, a close or only an ordinary observer of it, he will be assured, as he recalls its voices, that if he were deprived of all senses but that of hearing, this one sense would inform him of the presence of each season if it did not apprize him of its coming.

The caw of returning crows, the swelling rush of unbound brooks, the nightly, monotonous, rasping note of the Acadian owl, would tell him certainly of the coming of spring. He would know by the crackling croak of the frogs, the hyla's shrill chime, the diffusive ringing of the toads, by the beat and roll of the ruffed grouse's muffled drum, and by the querulous whistle of the woodchuck warmed to new vitality, that the soft breath of spring was filling the earth with life, that the squirrel cups were blossoming in sunny woodside nooks, buds of arbutus beginning to blush under their rusty leaves on southern slopes of woodland ledges, and willow catkins were yellowing the swamps.

In sweetest fashion of all, the birds would tell the story. Indeed, if he had ever noted their coming, he might now almost name the day of the month when he heard the twitter of the first swallow, the flicker's heartening cackle, the jingle of the bobolink's song, the swell and fall of the plover's wail.

The wind would stir the new leaves to tell him they were out, and the patter of the rain upon them would strengthen their testimony with a sound unmistakably different from its leaden pelting of naked boughs and dead fields. The busy hum of bees overhead would tell of the blossoming of fruit trees, when the pendulous flowers of the locust were sweetest, and when, in July, the tiny bells of the basswood knolled perfume to call all the bees to the woods.

He would know when summer burned hottest by that very voice of heat, the shrill cry of the cicada, and by the troubled notes of parent birds, anxiously watching the first adventures of their chirping young in a world rimmed by a wider horizon than the brink of the nest, and at nightfall by the crickets creaking in full chorus with earnest, tireless monotony.

A little later would be heard the click of ripe apples through the leaves and their rebounding thuds upon the ground; at dusk, the screech owl shivering out his gruesome cry in the old orchard as if he, "for all his feathers was acold" with the chill of the first autumnal evenings, and from lonely woods would come the similarly quavering but more guttural, wilder and more lonesome call of the raccoon.

The absence of the earlier migrants would as noticeably mark the season as the hail and farewell of others passing southward in the night time; the startled chuckle of the plover, with hardly a hint in it of his springtime wail; the scaipe of the snipe; the woodcock's whistle; the bittern's squawk, voicing all his ungainliness; the quick, sibilant beat of wild ducks' wings and the note of many a winged traveler whose identity can only be guessed at. One may know when October days have come by the gentle alighting of falling leaves, the incessant nut-rasping of the squirrels, the busy stir and low, absorbed notes of the jays in the beeches, the irregular patter of dropping mast, the chipmunk's clucking good-by to the outer world, and an occasional clamor suddenly uprising from a great army of crows on its winged retreat to more hospitable climes.

Too soon one hears the scurry of wind-blown leaves along the earth and the clash of naked branches, the pur of the first snow falling on frozen grass and dry leaves and its light beat on roof and pane. The latest migrating wild geese announce their passage with a musical confusion of clarion notes, and jays, hairy and downy woodpeckers, nuthatches and chickadees come from the woods and abide near the habitations of men, each with well-known note making one aware of his presence. With the snow come great flocks of snow buntings, late familiars of the Esquimau and Lap, the white bear and the reindeer, and all the animate and inanimate savagery of the frozen north. Their creaking twitter reminds one of the creak and tinkle of moving ice, their voice a voice of winter, unmistakable though faint.

There are winter days, or hours in winter days, when one's ears might make him believe that night was brooding over the earth, so hushed are all the voices of nature in a silence deeper than pervades even any night of spring, summer or fall, for the silence of such a night will now and then be broken by insect, reptile or nocturnal bird or nightly prowling beast, or be emphasized by the low murmur of a distant stream. But now, not a bird note nor stir of withered leaf, nor smothered plaint of ice-bound brook, no sound of anything, animate or inanimate, disturbs the deathlike quietude which as unequivocally if not as imperiously as his voices proclaim the absolute sovereignty of winter. The sullen roar of the winds in leafless woods, the hiss of driving snow, the crack and shiver of ice may be heard in early spring and late fall, but this dead stillness is a sole prerogative of the stern king's reign.

When an unseasonable rain falls on the snow, freezing as it falls, there is presently a hollow rattle of drops on the new-made crust, and every ice-sheathed branch and twig creaks and tinkles in the wind till the trees drop showers of gems that you can almost hear the glitter of. Sometimes when one sets foot on such a crust it seems as if the whole surface of a great field sank slightly, with a sudden resentful crash at the crunch of the first footfall. One's first impression is that he has sprung some immense natural trap, and he holds his breath for an instant in dazed expectation of catastrophe. Another characteristic sound of winter is the settling of "shell ice," when after a great thaw and flood, followed by sudden cold weather, the new ice falls to the level of the subsiding waters. It drops with startling suddenness, but with a prolonged musical ring very different from the short, flat crack of snow crust, while splinters of the broken edges slide down the sloped border and far across the lowered level, jingling and clinking as they glide like scattered handfuls of silver coin.

In the neighborhood of great frozen lakes is often heard one of the wildest sounds of winter and the most unearthly, the booming of the ice, caused by its cracking or by its contracting and expanding, or as some maintain, by air beneath it. At first a thin, tortured cry arises, faint and far away, growing louder in swift approach, rising at times almost to a yell, and mingled with hollow groans, now suddenly ceasing for an instant, now as suddenly bursting forth, then falling and dying away in such a wail as it began, far off in the direction opposite to that from whence it arose. It is as if tormented spirits were fleeing through the air, fleeter than the wind, as invisible, with voices as pervasive.

The sharp, clear, resonant crack of trees under stress of severest cold, like the breaking of an over-strained cord, and the duller snapping of house timbers, tell of still starlit nights, when the whiskers of the wandering fox are silvered with his breath, and in such nights the great horned owl hoots a prophecy of storm.

Its fulfillment is heard in a gusty south wind driving a pelting slant of rain against weatherboards and windows and upon the snow till the rush of free brooks falls upon the ear once more.

The outlawed crow proclaims his return to such scant forage as the bare fields may yield. The great owl's least cousin sharpens his invisible saw in the softer-breathing evenings. Some morning the first robin pipes his greeting, then from high overhead floats down the heavenly carol of the bluebird, the song sparrow sings blithely again and phebe calls, and we know, though we only hear of it from them, that spring is here once more.

ROWLAND E. ROBINSON.

FERRISBURGH, Vt.

THE MAGIC SPELL.

WHAT is the magic spell that makes camp life attractive to so many men? It is easy to account for in youth; but the boy who has fallen in love with it, carries the passion unabated into maturer years and even down into old age. The rich and the poor, those engrossed in business, in public life, in professional cares—men in all vocations long to steal away for a few weeks' holiday and sojourn in the woods, by the broad lakes and running streams, to sleep in the open bark shanty over fragrant hemlock boughs, snuffing the smoke of camp fires, that delicious perfume which once enjoyed is never forgotten. Is it a remnant of that old wild nature not yet eradicated from the blood by the enervating influences of civilization, and testifying to some former more intimate alliance between man and the outer world than subsists to-day? I do not allude here to the love for fishing or shooting; these are kindred pleasures, which, however, are not necessarily associated with the liking for camp life, and may exist apart from it. I have known men who cared for neither of these, who were yet passionate enthusiasts for the simple pleasures of the camp.

I recall a visit I once paid to a camp belonging to a couple of old men, who had for many years been in the habit of occupying it for a few weeks every season. It was a plain bark structure built against a large rock, the side of which answered for a fireplace. A bed of green boughs covered with gray blankets was on one side. Some rough benches, a birch bark table, cooking utensils, cups and tin plates, with some fishing traps hung on the wall, comprised the furniture. The shanty was open on one side, and looked down on the waters of the lake, across an open reach which extended for a mile or more to the surrounding forest, and back of that appeared the tops of some blue hills. The proprietors were absent, off probably on some of their usual fishing excursions, and I failed to see them. But that picture of plain, simple, high living has dwelt in my memory, and I love to think of the old men preserving in declining years that youthful passion unabated, that taste for the pleasure of outdoor life which doubtless helped to keep their hearts and feelings young, despite gray hairs and failing strength—a brotherhood of kindred minds cemented by the companionship of many years, spent on these waters and by the glow of that camp-fire.

It is several years since I was last in the Adirondacks, but at one time I used to spend some weeks every summer on its lakes and streams. From youth up a lover of camp life, I have had in my time abundant opportunity to gratify my passion and have made acquaintance with some rougher forms of it than most campers for pleasure would care to experience. This, however, had not subdued the liking, only educated it, and by the time I first visited the North Woods I had formed a clear idea as to what would best please my taste in that line. I recognized at once the rare combination of water and forest, so distributed as to make travel easy and delightful, and wooded glades that afforded an ideal playground for those who loved to go a-camping.

> Nor these alone, but every landscape fair
> As fit for every mood of mind,
> Or gay, or grave, or sweet, or stern was there."

At first with guides I traversed the watery regions of the Raquette, Fulton Chain, Long Lake, Tupper Lakes and the Saranacs, and was familiar with the regular routes in those sections, together with some byways and nooks that lay off the beaten tracks. My experience with guides had been various, and I had discovered that even the best are not suited to every man's taste, and that the personal peculiarities of your guide must harmonize with your own. We all know what unexpected traits will reveal themselves when in camp in a friend, whom we thought we had known intimately for years, and what caution it is necessary, therefore, to exercise in selecting a companion for the woods.

Similar considerations have to be regarded in choosing a guide. The standard requisites are well known, and the better class of guides study to please their employers, and doubtless succeed in most cases, especially with novices. The taste, however, in this, as in other matters, becomes critical and fastidious. But I found one who suited me *par excellence*. He was an Indian half-breed. Born in Canada, I believe, most of his life had been passed in the wilderness, and he knew little of cities or of city conventionalities. In winter he earned his living by trapping and lumbering. To education derived from books he could make little claim; but he was learned in woodcraft and forest lore. He knew where fish were still to be found, and was always willing to diverge from the direct road to visit some trout hole or hidden brook, and was content to stay by it as long as there was any show of luck, even if it entailed the abandonment of all attempts to get back to camp and compelled a bivouac in the open air for the night. His talk was of hunting, fishing, trapping, boats and boating; and somehow it never grew wearisome. He had at times a marvellous capacity for silence, and could keep his tongue still for hours at a time. His crowning merit was a distaste for hotels. This distinguished him from all other guides I have known. Why it was I don't know, but he appeared to have little use for them except as stores where our stock could be replenished. When on a trip whose terminus was a hotel, he often seemed to me to devise some occasion for delay on the road—tempt me with a good fishing hole or what not—so that we would tarry until too late, have to sleep out in the woods and not reach our destination until morning. What little knowledge I possess of woodcraft I owe mainly to him. After employing him two seasons I lost sight of him. He probably returned to Canada, as he used to say he would if the hotels continued to increase in number.

Growing tired of wandering over the wilderness, I latterly ceased hiring a guide and settled down on Raquette Lake, rowing my own boat, and camping either on its shores or those of neighboring waters, accompanied by a friend or some chance companion. This lake offers attractions for such a mode of life which appear to me superior in many respects. Its shores are miles in extent, the location is central, a number of streams empty into it, opening communication in a variety of directions. Many of the neighboring lakes and ponds are accessible by short carries, and the bass, now so abundant, afford good fishing all the season through. So far as sport is concerned, fly-fishing for bass with light tackle is not much inferior to that for trout, and a two-pound bass affords, on a 7oz. rod, as much fun as any reasonable man need want. The scenery round the lake, while not strikingly picturesque, is at least beautiful, and the varied outline of the shore is an element that distinguishes it advantageously from many others. For a good camping site I have always considered it an indispensable feature to have a long stretch of open water in front. This gives scope for that play of light and shadow caused by sunshine and cloud which affords constant variety. One never tires of such a place, where the landscape seems to undergo constant transformation from hour to hour. Even in bad weather a site affording such a perspective is robbed of half the usual monotony.

THE revised and abridged edition of the A. O. U. Check List of North American Birds, including the additions and changes made in the supplement, will be sent post free on receipt of 50cts.—*Adv.*

Natural History.

DOMESTICATED WOOD DUCKS.

DAYTON, Ohio, May 14.—Mr. William Kiefaber of this city has had very pleasant experience in raising wild ducks in his own yard. Early last year a friend sent him a pair of California wood ducks hatched from a setting of wild duck eggs that had been incubated under a Brahma hen. The duck laid eggs that were hatched by a hen in the fall, and shortly after the holidays Mr. Kiefaber gave a dinner party to his friends with roast wild duck as the chief dish.

The parent ducks are glossy black, with a tint of brown on the drake's breast, and they are as large as ordinary mallards. They do not take kindly to confinement, therefore one wing of each is clipped, and their coop is made of pickets 20ft. high. The eggs are clear white, but not so large as ordinary duck eggs. Mr. Kiefaber has distributed the eggs this spring, and several broods will be raised.

Four years ago Phil Wenz, a hunter who lives down the river a few miles, received a pair of wild ducks from a friend at Oswego, New York, and he also has been successful in raising them, and finally has crossed the breed with his common barnyard ducks. Last year he raised 150 of these half-breed wild ducks that would weigh 5lbs. dressed. In the seasons before that he had a great deal of trouble to keep the young ducks, and several entire broods flew away with the wild ducks that fed along the river.

THE CARNIVORA.

BY R. W. SHUFELDT, M.D., C.M.Z.S.

LEAVING behind us the diminutive shrews and moles, which we considered in our last contribution under the order *Insectivora*, we now come to a group of mammals, the *Carnivora*, which, in ages gone by, as well as with the present fauna of the earth, stand among the most formidable animals known to us. In the fauna of our own territorial domains the *Carnivora* are well represented, and they are seen in the sea lions and seals, several species of bears, a still greater number of raccoons, a long list of the *Mustelidæ*, including otters, skunks, badgers, weasels and their kind, and finally, an interesting array of *Canidæ and Felidæ*.

To present these to the mind of the reader, however, more in detail, and grouped in orderly arrangement, we will here continue the Provisional List of the U. S. National Museum, which disposes these forms in the following manner:

ORDER CARNIVORA. FLESH EATERS.

SUBORDER PINNIPEDIA. THE SEA LIONS AND SEALS.

The Family OTARIIDÆ. *The Eared Seals.*

Zalophus californicus (Lesson), Allen. California Sea Lion. Coast of California.
Eumetopias stelleri (Lesson), Peters. Steller's Sea Lion. North Pacific from Behring Straits to California.
Callorhinus ursinus (Linné), Gray. Northern Fur Seal, Sea Bear. Shores of the North Pacific.

Family PHOCIDÆ. *The Seals.*

Phoca vitulina, Linné. Harbor Seal. North Atlantic from New Jersey to the Arctic regions, European coast, North Pacific from Southern California to Arctic regions.
Phoca græenlandica, Fabricius. Harp Seal. North Atlantic from Newfoundland to Arctic Seas, North Pacific.
Phoca fœtida, Fabricius. Ringed Seal. North Atlantic, North Pacific and Arctic Seas.
Phoca fasciata, Zimmerman. Ribbon Seal. North Pacific.
Erignathus barbatus (Fabr.), Gill. Bearded Seal. North Atlantic, North Pacific and Arctic Seas.
Halichœrus grypus (Fabr.), Nilsson. Gray Seal. North Atlantic from Newfoundland and Western islands northward.
Monachus tropicalis, Gray. West Indies Seal. West Indies, Florida (?), Mexico (?).
Cystophora cristata (Erxleben), Nilsson. Hooded Seal. North Atlantic and Arctic Seas.
Macrorhinus augustirostris, Gill. California Sea Elephant. Coast of Southern California and Western Mexico.

Family ODOBÆNIDÆ. *The Walruses.*

Odobœnus rosmarus (Malmgren). Atlantic Walrus. Labrador to the Arctic Circle, Arctic Europe and Asia.
Odobœnus obesus (Ill.), Allen. Pacific Walrus. Behring Straits.

SUBORDER FISSIPEDIA. THE TERRESTRIAL CARNIVORES.

Family URSIDÆ. *The Bears.*

Ursus americanus, Pallas. Black Bear. North America from Mexico to Alaska.
Ursus horribilis, Ord. Grizzly Bear. Western North America from Mexico to Alaska.
Ursus richardsoni, Audubon and Bachman. Barren-ground Bear. Barren grounds of Northwestern North America.
Thalassarctos maritimus (Linné), Gray. White or Polar Bear. Northern America, Europe and Asia.

Family PROCYONIDÆ. *The Raccoons.*

Cercoleptes caudivolvulus (Pallas), Tomes. Mexico to Peru.
Nasua narica (Linné), Allen. Texas to Panama.
Procyon lotor (Linné), Storr. Raccoon. United States and Central America.
Procyon cancrivorus (Cuvier) Sclater. Crab-eating Raccoon. Panama to Guiana.
Bassaris astuta, Lichtenstein. Common Cacomistle. Oregon, Ohio to Mexico.
Bassaris sumichrasti, De Saussure. Southern Cacomistle. Mexico to Costa Rica.
Bassariscyon gabbi, Allen. Costa Rica.

Family MUSTELIDÆ. *The Weasels.*

Enhydris lutris (Linné), DeKay. Sea Otter. North Pacific Ocean, south to Lower California.
Lutra canadensis (Turton), F. Cuv. North American Otter. North America generally.
Lutra felina, Molina. Chinchimen. California to Chili; (?) Alaska.
Lutra brasiliensis, F. Cuvier. South American Otter. Central and South America.
Mephitis mephitica (Shaw), Baird. Common Skunk. Hudson's Bay to Guatemala.
Mephitis putorius (Lanné), Coues. Little Striped Skunk. Carolinas northwestward to British Columbia, southwestward to Guatemala.
Mephitis macrura, Licht. Long-tailed Mexican Skunk. Mexico.
Mephitis chilensis, F. Cuvier. Chilian Skunk. Costa Rica and southward through South America.
Conepatus mapurito (Gmelin), Coues. White-backed Skunk. Southwestern border of the United States southward to Costa Rica.
Taxidea americana americana (Boddaert). American Badger. Hudson's Bay to Mexico.
Taxidea americana berlandieri (Baird), Gray. Mexican Badger. Southwestern border of the United States southward.
Gulo luscus (Linné), Sabine. Wolverine. Northern half of the United States to the Arctic Ocean.
Galictis barbara (Linné), Franklin. Tayra. Mexico to La Plata.
Putorius vison (Schreber), Gapper. American Mink. All North America.
Putorius nigripes, A. and B. American or Black-footed Ferret. Central region east of the Rocky Mountains.
Putorius vulgaris, Linné. Least Weasel. Northern United States northward, Europe, Asia.
Putorius erminea (Linné), Griffith. Ermine, Stoat. United States, except the Austroriparian and Sonoran regions, northward to the Arctic coast.
Putorius longicauda (Bp.), Rich. Long-tailed Weasel. Central and Sonoran regions, northward.
Putorius brasiliensis frenatus (Stewart), Coues. Bridled Weasel. California and Sonoran regions and southern Texas to Guatemala.
Putorius brasiliensis æquatorialis (Stewart), Coues. Æquatorial Weasel. Guatemala to Ecuador.
Mustela pennanti, Erxleben. Pekan, Pennant's Marten. Eastern and central and Pacific regions northward to the Arctic circle.
Mustela americana, Turton. American Sable or Marten. New England eastward to the Pacific coast, northward to the Arctic coast.

Family CANIDÆ. *The Dogs.*

Urocyon virginianus virginianus (Schreber). Gray Fox. United States northward to Costa Rica.
Urocyon virginianus littoralis (Baird), Gill. Coast Gray Fox. Coast of California.
Vulpes velox (Say). Aud. and Bach. Kit Fox or Swift Fox. United States west of the Mississippi.
Vulpes macrurus, Baird. Prairie Fox. Rocky Mountain region of the United States.
Vulpes fulvus fulvus (Desmarest). Red Fox. Arctic America to Northern United States.
Vulpes fulvus argentatus (Shaw), Aud. and Bach. Silver Fox, Black Fox. Arctic America to Northern United States.
Vulpes fulvus decussatus (Desm.). Cross Fox. Arctic America to Northern United States.
Vulpes lagopus (Linné), Gray. Arctic Fox. Arctic regions of the globe south to 50° N.
Canis lupus griseo-albus (Linné), Sabine. Gray Wolf. North America.
Canis latrans, Say. Coyote. Saskatchewan to Costa Rica.

Family FELIDÆ. *The Cats.*

Felis concolor, Linné. Puma or Cougar. America generally.
Felis pardalis, Linné. Ocelot or Tiger Cat. Arkansas to Patagonia.
Felis onca, Linné. Jaguar. Louisiana to Patagonia.
Felis yaguarundi, Desmarest. Yaguarundi Cat. Texas to Paraguay.
Felis eyra, Desmarest. Eyra Cat. Texas to Paraguay.
Felis tigrina, Erxleben. Margay Cat. Mexico to Paraguay.
Lynx boreatis canadensis (Gray), Mivart. Canada Lynx. Northern North America.
Lynx maculatus (Vigors and Horsfield). Spotted Lynx. Texas, California and Northern Mexico.
Lynx rufus (Güldenstadt), Rafinesque. Red Lynx. Southern United States and Mexico.

Obviously, it will be impossible to do anything like justice to this host of splendid species of animals in a single chapter; the more especially since the vast majority of them occur in our own fauna. Seeing then that we shall be obliged to devote a number of chapters to the consideration of this important order, I will in my next contribution deal with the leading characteristics of the *Carnivora* as a whole, and next take up the sea lions, seals and walruses.

[TO BE CONCLUDED.]

A NATURAL HISTORY CAMP.

Editor Forest and Stream:

A long sheet of water, deep, clear and cool, fed by many springs and gurgling trout brooks, stretching away to the north among wooded hills, and southward to open meadows and flowed lands, the haunt of herons, where the water lilies grow and the gaunt pickerel lie among the water weeds watching for their prey. Here and there a wooded ridge conceals some long bay or smaller confluent lake or meadow deeply set, spreading low between the pine-clad banks. Such is Quinsigamond, the "long lake" of the Indians.

A high shore slopes down to the water's edge from a reach of grassy, undulating plain, shaded by scattering pines. This is the ancient summer camping ground of the Nipmuck tribe. Here and there great rocks jut up, a stone's throw from the shore a long hill rises, on the north with gentle slope, but south there is a mass of sheer and broken ledges. Great rocks moss-grown and weather-beaten rise tier on tier, home of the fox and ground squirrel. Among these rocks, clinging and cleaving with sturdy roots, the strong old trees bear up, defying winter storms, and in summer shutting out from view with their green leaves the rugged face of the broken cliff. The hill above is covered to its crest with a dense growth of vines, bushes, trees, and all the mazy tangle of the wildwood. Along the shore to Coalmine Brook north from the ledges the woodland is unkempt and wild. At the hillfoot, back from the Indian landing place, an amphitheater of rocks rises high to an overhanging pulpit rock. Here great vines swing their fantastic forms over the place which in centuries past has rung with the oratory of the red men of the forest. Such is the camping ground on Wigwam Hill.

How often in planning a summer's outing is the question asked by anxious parents, "What shall we do with our boys?" The natural history camp at Worcester answers the question, for there they will be well cared for, have a good time, learn many manly accomplishments, gain in health and strength, and come home with their minds stored with that useful knowledge which comes from communion with nature, and daily association with enthusiastic students in her fields, their faculties stimulated by observation and reflection, practiced not in the light of work or study, but as recreation.

In 1885 Dr. W. H. Raymenton, president of the Worcester Natural History Society, conceived the plan of extending the spring field meetings of the society and making a camp where the members could live outdoors and devote themselves, each for a longer or shorter period, as his means or time would permit, to the study of nature out of doors. Accordingly, forty acres of land were secured which have since been paid for, and an annual camp established by the efforts of the president, seconded by many of the liberal citizens of Worcester. To-day there is a fine array of tents, a large pavilion, workshop and cook house, and much valuable camp property. Although originally intended for Worcester boys, the fame of the undertaking has gone abroad until it has been found necessary to admit boys from many of the States of the Union. As the camp has come to the notice of many of the most prominent educators, they have without exception commended it to their friends, so that now many boys travel long distances to avail themselves of its advantages. During the past season a description of its work has occupied several pages of the report of the Massachusetts Board of Education, in which it is highly commended.

The boy's summer vacation is generally given up to comparative idleness or purposeless ill-directed activity. The plan and scope then of this summer camp are to place before the boy a great variety of useful occupations, physical exercises, studies and recreations, and then to direct his energies without burdening him with irritating discipline or restrictions. Each boy is allowed to follow his own peculiar bent. Is he a born mechanic, there is the workshop stocked with tools and simple machines, where he can build boats, traps, camp furniture, etc., with the advantage of having skilled mechanics to assist him; or he may spend hours in watching the boat building and other occupations. Does his youthful mind aspire to excel as a hunter, trapper or angler, then he will follow the steps of the camp hunter, watch the making and setting of traps, the building of log camps, the netting of bait and the tying of flies; he will learn the use of the woodsman's ax and the handling of boats and canoes; he will learn the secrets of woodcraft or frequent the shooting grounds. Should he have the instincts of a naturalist, he will follow the ornithologist in his search for birds, the entomologist in his excursions after bugs, beetles and many-legged things, the botanist who gathers wildflowers, or the geologist among the rocks; he may spend hours with the taxidermist, learning the art of preparing and mounting specimens, or in the laboratory or by the shore, he may watch the curious forms under the microscope. Should his taste be artistic, he will join the roaming class in outdoor sketching. Should his inclination favor the military, he will have an opportunity to exercise them by a daily drill with the cadets, and if he proves efficient he may be made an officer. There are gymnastic exercises and swimming lessons given by a former student at West Point Military Academy. Caution is taught when in and upon the water, and as every safeguard is put around both those who are experienced and those who are not, there has never been an accident. Many means of recreation are provided. Games and sports are freely encouraged. Entertainments are given in the pavilion. Illuminations or fireworks occasionally fill out the evenings, and on special occasions, gathered round the camp-fire, the veteran hunter, ornithologist, woodsman, soldier and forester, will tell tales of adventures in the wilderness, on the prairie, mountain or shore, which will linger in the memory for years. And so the summer waxes and wanes and the late summer evenings come when the chorus of the katydids is swelling in the trees and the whippoorwills are heard no more upon the hill. The boys gather for the last time about the camp-fire, happy if looking forward to another summer under the shadow of old Wigwam Hill.

Of course in an article like this we can give but a limited sketch of the undertaking and its scope. All who care to follow it further or obtain more definite information will be cheerfully accommodated by applying to the president of the Worcester Natural History Society.

WORCESTER, Mass., May 9. EDWARD HOWE FORBUSH.

BULLFROGS AS BIRD EATERS.—New York.—In your issue of yesterday I noticed an item by E. I. J., Bethel, Conn., in which he states he thought that bullfrogs are insect eaters only, but cites a case where they proved to be of cannibalistic propensities as an unusual occurrence. Once while out after snipe, not far from Montreal, Can., with Mr. Frank Livingston, a well-known sportsman of Toronto, we suddenly came upon a spot where some dozen birds or so were scattered about feeding. Motioning to Frank to get ready, we both raised our guns and fired simultaneously, Frank killing two and myself one. My snipe was knocked over into the water, and what was my surprise when on reaching the bank to secure him, to see an enormous bullfrog shoot suddenly from the water, seize my game and make off with it under my very nose. To say I was "flabbergasted" or "thunderstruck" would be a mild way of expressing my astonishment at the audacity of this marine robber, but raising my gun and taking rapid aim I let him have a charge of No. 8, which effectually stopped him in his plundering career. He had swallowed whole the legs, body and all but the head of a snipe one-half the size of himself.—J. S. DE CASANOVA. [While returning one summer afternoon from beach bird shooting on the shores of Long Island, a companion shot a bank swallow, which fell on the margin of a pool on the salt meadows. On going to fish it up it could not be found, but in the water at the edge of the pool was seen the head of a huge bullfrog, and from its mouth projected like two horns the tips of the swallow's wings.]

THE BLACK-FOOTED FERRET.—At the last meeting of the Biological Society, of Washington, Mr. W. T. Hornaday exhibited a living black-footed ferret (*Putorius nigripes*), one of the rare little mammals of the United States. This is probably the first live example seen by naturalists. The species was described by Audubon in 1852, but the type was lost and the ferret was not seen again for so many years that the describer was supposed to have dealt with an imaginary animal. In 1874 the National Museum had only two skins, one of which was imperfect. Now it possesses about twelve, and Dr. Merriam has ten. These are the largest collections known. Most of the specimens are from Kansas. In its native haunts the black-footed ferret has a mission; its chief aim in life is the destruction of the young prairie dogs, which it forces into their burrows and then proceeds to devour at its leisure. The specimen living in the zoölogical collection is fed on rats, birds, and other flesh, which has greatly improved its physical condition, but has not entirely sweetened its disposition.

NEW HAMPSHIRE BIRD ARRIVALS.—Cliff swallows appeared on the 30th of last month; hairy woodpecker and least flycatcher on the 4th inst.; whippoorwill on the 6th; Baltimore oriole on the 8th; redstart, catbird and bittern the 10th; yellow-rumped warbler, ovenbird and thrasher the 11th; chewink the 12th.—P. C. (Concord, N. H.).

CENTRAL LAKE, Mich.—House wrens came May 5.—KELPIE.

ARRIVALS AT THE PHILADELPHIA ZOOLOGICAL GARDEN DURING APRIL, 1889.—Purchased—Three wildcats (*Lynx rufus*), one Dorcas gazelle (*Gazella dorcas*), two black-backed jackals (*Canis mesomelas*), two gray squirrels (*Sciurus carolinensis*), four southern fox squirrels (*Sciurus niger*), one flicker (*Colaptes auratus*), two white-eared conures (*Conurus leucotis*), two St. Thomas conures (*Conurus xanthokœmus*), one American swan (*Cygnus americanus*), one Canada goose (*Bernicla canadensis*), one European quail (*Coturnix communis*), one ground rattlesnake (*Caudisonia miliaria*), one blacksnake (*Bascanion constrictor*), two hog-nosed snakes (*Heterodon platyrhinos*), one king snake (*Ophibolus getulus*), one Brazilian tortoise (*Testudo tabulata*), two black tortoises (*Testudo carbonaria*), and four tuberculated iguanas (*Iguana tuberculata*). Presented—One prairie wolf (*Canis latrans*), one raccoon (*Procyon lotor*), two prairie dogs (*Cynomys ludovicianus*), one opossum and four young (*Didelphys virginiana*), one marmoset (*Hapale jacchus*), one summer duck (*Aix sponsa*), one red and blue macaw (*Ara macao*), one golden eagle (*Aquila chrysaëtos*), one American coot (*Fulica americana*), one broad-winged buzzard (*Buteo pennsylvanicus*), one alligator (*Alligator mississippiensis*), one glass snake (*Opheosaurus ventralis*), four gila monsters (*Heloderma suspectum*), eighteen chameleons (*Anolis principalis*), and one blacksnake (*Bascanion constrictor*). Born—One hog deer (*Cervus porcinus*), two prairie wolves (*Canis latrans*), and two Virginia deer (*Cervus virginianus*).

SMOKY FIREPLACES.—*Editor Forest and Stream:* In answer to "Keouk's" request in your issue of May 9; if he will build his fireplace in proper proportion with the following dimensions he will get a non-smoking chimney: Inside measurements of fireplace, depth at bottom from jamb to back of hearth, 15½in. Depth at top of fireplace, from breast of chimney to back, a Franklin back, 10in. Height from hearth to breast, 2ft. 3½in. Width from jamb to jamb, 2ft. 9½in. Gradually after leaving the Franklin back "draw in" till the funnel is reached, when the inside dimensions should be two bricks long and one brick wide, and this should be pursued till the desired height of chimney is reached. Before pulling down his present chimney to rebuild, I would advise him to make trial of this device: Bore or pick a hole through the bricks from the center of the fireplace at the back of hearth to the outside, insert, imbedded in mortar, a 1½in. iron pipe. Let the inside mouth of pipe be flush with back of hearth, the hole to be at a slight depressed angle. The other end of pipe may project one or two inches. In this way he will get a "bully" draught from outside, a draught sufficient to carry all his smoke up, and he will most likely not have to tear down his chimney. I have used this device with wonderful success.—V. S. MAC N.

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price $2.50. For sale by FOREST AND STREAM.

Game Bag and Gun.

JAMES RIVER TALES.

RAIL SHOOTING ON THE CHIPOAX.

IS there any sport so satisfactory, enjoyable and lasting as that associated with the dog and gun? It fertilizes the future with the richest of memories. Time and again do we recall and live them over.

Last fall I shot a few partridges in Saratoga county, this State. It had been several years since I followed Dan, and the long fast had whetted my appetite. Besides I wanted a few fresh memories, for my stock of old ones was threadbare and bagged at the knees like a well-worn pair of trousers. Dan was handicapped by age and a superabundance of flesh, the latter accumulated through idleness and high living, but he did fairly well and evinced as much interest in his work as when we hunted the turkey and quail of "Ole Virginny." There was one old cock partridge that fooled both of us several times, and we regretfully left him to winter in Saratoga county. Not long since I was on a surface car late one night and began to doze and dream of that bird. This time there should be no mistake. Dan enters the small wale (the Saratoga name for thicket, ravine or small piece of woods), in which the bird has sought shelter after several flights, while I hurry around to the other side. Dan begins to go slow. I hear his tail beating faster and faster against the bushes. Whi-r-r! Out comes the bird and starts across the opening—a lovely shot and a sight to gladden the heart. Up goes the gun, and—— the conductor informs me I am several blocks beyond my street.

* * * * * *

"Hello, Jim! Just in time. Lovely day, isn't it? This east wind has backed the whole river into the creek. Everything ready, and I guess this light rain won't bother us."

"All right, old man," was the response; "will be with you in no time."

The place was Claremont, Virginia, located on the James River about midway between Norfolk and Richmond. Jim was the chief engineer of a railroad surveying party, and when he wasn't running an imaginary line through some native's peanut patch he and the old man were generally hunting, or making preparations for a hunt, or swapping lies about a hunt they had made. The old man was aiding in the materialization of a town on the wild West plan. The town was booming. It had a patent outside weekly paper and—the remainder of the town was expected in course of time. This, so to speak, was its incubating period. The town was a work of art and imagination nicely blended. It possessed all the modern improvements, built on papier-mâché foundation and after the India ink style of architecture. Jim built the town all alone by himself. He would point with pride to its clean, roomy streets, the absence of unsightly telegraph poles, and other striking evidences of the millenial age. But those sora.

It was along the first of September, and Jim and the old man were going up the Chipoax Creek after sora or rail birds. This creek emptied into the James River at Claremont. It was patterned after the fashion of a rail fence, and to say the least was a trifle erratic in the course it pursued.

The day was all that could be desired, and the water promised to be unusually high, thus leaving very little shelter for the birds and making good poling. A short walk brought us to the boat, a light flat-bottomed affair kept at the mouth of the creek. The wind was fair, and the objective point, a low piece of marsh on the left, was soon reached. Jim was to take the first whack at the birds, while I shoved the boat and gathered in the dead. This being the first really good tide of the season the sora were plenty. The boat had barely entered the wild rice, before the birds began to rise on all sides. It was bang, bang, right and left as fast as you could shove in the shells. A few misses at the start, and then Jim settled down to business and dropped them with commendable regularity. The birds were fat and lazy, sitting about on the rice in twos and threes and often permitting the boat to almost run over them before they took wing. We were using about two drams of powder and half an ounce of No. 10 shot. It required very little skill to knock them over, as they invariably flew straightaway, and it was the rapid work with the gun that gave zest and excitement to an otherwise rather mechanical sort of sport. The greatest difficulty was to secure the dead birds. This is where the professional pusher gets in his fine work. It matters not how many you have down at one time, he locates and recovers every one, for he is paid so much per bird.

In a comparatively short time the ammunition was used up, and taking stock of the dead we counted over a hundred birds. In the meantime the wind had increased in force, and when we started for home the creek was rough and dangerous for so light a boat, the coffee-colored waves often coming in upon us. The water came in faster than we could bail it out, and when within 30 or 40yds. of the shore the boat began to sink. We managed to reach shallow water before a big wave struck us and finished the job, leaving us standing in water up to our armpits, making frantic efforts to secure our birds and other loose contents of the boat, which were floating about us. A provoking mishap but rather a ridiculous situation, and one that seemed to afford considerable amusement to several negroes in a big lighter on the shore. After getting as much of our property as we could we threw a rope to the negroes and asked them to pull the boat ashore. They stood on the end of the lighter, which, by the way, was half full of water, and gave a mighty tug at the rope. Snap went the rope, tumbling the negroes over backward into the water with a great splash. Then the laugh shifted to the other side, and we made merry at Sambo's expense. Finally the tangle was straightened out, the boat made fast, and we started to finish our journey on foot. But our tribulations were not over, for on coming to a small stream that made in from the creek the bridge was missing and we had to take to the water once more. However, this was the last of our misfortunes, and after getting inside of dry clothes and outside of a warm supper, we decided that altogether the afternoon had been one of jolly good sport. What matters a ducking when you bring home a well filled game bag?

The sora always left with the first frost. One day the marsh would be alive with them. If there was a frost that night, the next day you could hardly find a bird. The negroes kill them at night for the market, but they waste no powder and shot in so doing. A fat-wood fire in a tin pan, elevated 4 or 5ft. above the bottom of the boat, a light paddle, from 12 to 16ft. in length, and the sora-smacker's outfit is complete. One shoves the boat while the other manipulates the paddle. The birds are blinded by the light, and before they can get out of reach down comes the death-dealing paddle. The smacker rarely misses. Every swing of his long stick means a dead sora, and so the slaughter continues while the tide remains high enough to float the boat. Ten to fifteen dozen is an average night's work.

But there is other sport to be had besides sora shooting on the Chipoax Creek and its vicinity. Summer duck, mallard, black duck and geese are quite plenty in their respective seasons. Wild turkey, too, that prince of all game birds, is to be found there, and the deer afford excellent sport. I will tell you of these things later on.

OLD MAN.

A HUNT IN BRITISH COLUMBIA.

Editor Forest and Stream:

We left Medicine Hat early in the morning for the famous sand hills on the Red Deer, of which we had heard glowing accounts as to the abundance of game. We were a large party, having been joined besides our own people by six hunters from Hat. Captain Moodie of the mounted police came with a spanking team hitched to a buckboard, and a fine gray saddle horse ridden by his servant that we were to use, and with the three four-seated wagons, the baggage wagon, and half a dozen led cayuse ponies, we made quite an imposing appearance as we started.

It was a bright, crisp day, with a suspicion of snow in the air, and we rattled along over the bare hills, covered only with buffalo grass, at a spanking pace for about seven miles, when we stopped at a little lake to wait for the laggards—the half-breed guide who drove the baggage wagon was always behind. There were plenty of avosets, snipe, plover and a few ducks, and some of the party, especially the one who was supposed to be the dead shot of the party (any way, to hear his stories one would think so), had quite a time popping away at them but with no great results. After we all got together we made another start and kept on, over the same kind of country, looking all the time for the lake where we were going to feed. About 2:30 P. M. we came in sight of it. It was about one and one-half miles by one-half, and was black with ducks which flew up and down all the time.

Swallowing their lunch, four or five of the party went after them and shot as fast as they could for an hour or so. In the meantime it began to snow in great wet flakes and we decided to pitch our tents and camp for the night. There was no wood. The snow fell very fast. We got our tents pitched and sat in them. Tried to make a fire with bulrushes, of which a fringe a few feet wide grew all around the lake, but they only smoked. Captain Moodie, whom long life on the frontier had made fertile in expedients, worked diligently, and after awhile, by splitting up a box that held provisions, eked out with bulrushes, managed to boil some water and make tea, and we who did not go out to shoot sat and shivered in the tent. The hunters came straggling in very much excited. They picked up that fell on the land, and that was only a small portion, about a hundred ducks, many of them canvasbacks, besides geese. A colder, wetter, hungrier crowd was seldom seen, and we all soon went to bed to get warm. The alkaline water had made two of us sick, and as soon as we would get a little warm we had to get up and go out, coming back colder than ever. A horse, wanting a dry place to lie down, chose the side of the tent and lay down on the head of one of us; so taking the whole thing together the night was not the most comfortable one, but the Mark Tapley of the party on waking up said, "Oh! isn't this jolly; I never passed a better night!" We did not drown him, but felt like it.

The snow was about 6in. deep and it was very cold, so two of us concluded that we had had enough, and taking two cayuse ponies we started back to Medicine Hat, 25 miles, with nothing but trackless hills to go over, as the snow had covered up our trails. The half-breed said "keep a little west of south," and off we went. If anybody has ever ridden a cayuse 25 miles when he did not want to go (and he seldom does), he knows something about what we went through. Pounding, kicking and shouting we worked our passage on, hour after hour, thinking every time we got to the top of a hill that we would see something, but another hill just as high was before us. At last, as our courage had just about oozed out, we came on an old trail that looked as if a wagon had some time or other gone over it. After following it about a mile we came in sight of the lake seven miles from the Hat, and knew where we were, and if we ever felt good, or a meal tasted good, it was when we got back to our car. I will leave for some other time the story of how we went out to shoot prairie chickens, waited an hour for a ride home, and rode 100yds., when the team ran away, throwing us about 30ft., breaking our guns, and nearly breaking our necks.

The rest of the party went on for about twenty-five miles and camped for the night in the snow, with no wood or water. Four of the party were sick all night, cold and alkali being the cause, and found it the longest and most uncomfortable night in their lives. The next day we struck the river and followed it down to the Sand Hills, where we camped in comfort. Two of the party started off to kill all the game in the region, and got lost, not having seen anything. With nothing to eat, it snowing a little, they walked and walked until even the sage of the party had to admit he did not know the way. It was a hard blow to him, as he had a fairly good opinion of himself, but they kept on walking and firing their guns, and after about an hour they heard an answering shot. Visions of supper, fire, etc., rushed over their minds, and they hurried on, the answering shots coming nearer and nearer, but no signs of camp-fire. At last they came on another tenderfoot of the party who hailed them with, "Oh! I am glad to see you, I have been lost for two hours," and even Mark Tapley, who was one of them, almost said "What will become of us?" but caught himself in time. They had to keep on or freeze, and after walking until about 11 o'clock they at last found the camp.

The next day we hunted. There were plenty of sharp-tailed grouse, but they were very wild. The moment your head showed up over the hill, up with a whirr would get all that were within 200yds. We followed them all day and killed fifty or sixty. Our mighty hunter in chasing them around a sandhill came suddenly upon a doe and gave her two barrels. She ran around the hill and he followed her and after awhile came on her again, giving her more, and kept it up until the poor thing was so full of No. 8 shot that she could hardly carry them, and Mark Tapley, meeting her face to face, finished her. When we came to eat her there was as much shot as meat. We hunted another day, killing nothing, and started back, reaching our car without any trouble, traveling 150 miles and killing one deer, while the wagon loads of antelope, bear, deer, etc. we expected to kill were left in undisputed possession of the Sandhills of the Red Deer.

It is astonishing how little game there is on those great plains. Since the buffalo are extinct you travel mile after mile and see nothing but an occasional coyote, except prairie dogs, and even they are scarce. Around the water courses there are some grouse and a few lynx and skunks, and in the season many ducks and geese, but the hunter who expects much game will be greatly disappointed.

W.

THE JOYS OF ROUGHING IT.

Editor Forest and Stream:

When reading the descriptions of elaborate club houses and the expensive paraphernalia employed in hunting, I sometimes think that after all there is something in the "advantages of poverty," at least so far as the enjoyment of woodcraft is concerned. My ideal of sport with rod and gun is to get as close to nature as possible; for what is it that gives us enjoyment in this particular form of amusement but the satisfying of the yearnings of the untamed part of our nature? I hold, then, that the more we uncivilize ourselves the more enjoyment we will receive. Now, uncivilized men are individualists in the highest degree; there is no division of labor among them, each one does almost everything for himself, catches his own fish, shoots his own game, paddles his own canoe, as is frequently the case with sportsmen. I am too poor to employ much help in my hunting excursions, and were I rich as Gould I would follow no other method. Of course for a novice or tenderfoot this would be impracticable, but if any one favored with a good constitution and some experience would try my methods, I am persuaded he would approve of them. He would see, if he used his eyes and ears, that he would soon acquire a good knowledge of woodcraft. He would, even in a strange neighborhood, with Indian instinct find trout pools and deer runways; he would find himself able to tell by the sound of a hound's tongue whether he was running a deer or merely making a spurt after a rabbit or porcupine, and he would tell at which point ducks would be likely to fly near and where to set out his decoys.

Every man who has hunted deer knows how much more satisfactory it is to kill one still-hunting than by any other method. There he depends on his own skill, not only his marksmanship, but his woodcraft as well. To my mind there can be very little satisfaction in the mere killing of a deer in the water by a sportsman who has been paddled by his guide up to it after it was driven there by dogs set out by another guide, and who himself could not go into the woods alone for fear of losing his way. To my mind such sport is on a par with English pheasant shooting—a very tame affair. Should my ideas be carried out, I admit there would be less game brought home by sportsmen, but what they did get would be honestly their own.

I well remember the first deer I killed. Two of us, rather young men, secured the privilege of supplying the provisions and accompanying a couple of professional hunters on an excursion to the backwoods. My mind was filled with visions of deer, bears and wildcats; and not being the possessor of any more formidable weapon than a 12-gauge shotgun, I was about sacrificing it for a cheap rifle, when I mentioned the matter to one of the hunters with whom I expected to take the trip. He asked me what kind of a rifle shot I was and how much practice I had had. When I confessed that my practice consisted of shooting about twenty rounds of Government ammunition yearly at fixed targets, he told me to keep my shotgun or get the loan of a larger one if possible. I borrowed a nondescript engine of destruction, which the owner called a goose gun. (I found he spoke the truth in regard to the name when I had carried it for some miles through the woods.) It was originally a muzzle-loader, but had been converted by a clever blacksmith. The bore was 8-gauge, with barrels 40in. in length, and weighed about 15lbs. I got with it eleven brass shells, which I thought not half enough at the time; but as I could not obtain any of the size in the town, I had to make the best of it and take a good amount of ammunition for reloading.

Two days' journey by stage brought us to our destination; and on the following morning we went for a hunt. I was placed on a runway with instructions to keep still. My companion and one of the hunters watched the lake, while the other hunter put out the dogs. I got myself and most of the big gun secreted behind a broken hemlock stump. In about an hour's time I heard our hound giving tongue, probably a mile away, toward the lake. I thought the race was not coming my way, but soon the bay of the hound sounded nearer, and this time it was accompanied by the yelping of the cur, which constituted the other part of our pack. It was evident the race was coming my way and I became very nervous in consequence. All my previous experience had been with small game and the thought of a monster buck caused me to tremble with excitement. I could, I fancied, hear my heart beat. What if I should miss! The thought brought me to my senses, so I steadied my nerves and silently raised the hammers of my gun. Presently a small spike-horned buck, which looked as large as an ox, appeared on the edge of the small clearing in front of me. He halted for a moment, as if undecided what to do, but the loud voice of the hound seemed to cause him to make up his mind, and on he came straight toward me and destruction. When he was about the distance a pitcher stands from a batter on the baseball field, I gave a sharp whistle, as I had been previously instructed. He stopped and I covered his shoulder with the howitzer and pulled; he leaped into the air and fell; raised his head and I pulled the other trigger. Fortunately for what was left

of the carcass the primer failed to explode. The echoes had not died away on the morning air before I was beside the fallen game. He was scarcely breathing, the buckshot having made a hole large enough to let his wind out all at once. To say I was proud poorly expresses my feelings. In a few minutes the dogs came up, smelled the dead game and laid down beside it. Presently the man who started the dogs appeared on the scene and congratulated me on my success, and between us we proceeded to drag the buck about a mile and a half to our camp. It was the hardest work I ever did in my life, and the big gun seemed to grow heavier every step, but I went through it cheerfully. In conversation that night the discussion finally reached the point as to whether I could have missed the deer or not under the circumstances. It began to dawn on my mind that I had not performed a very difficult feat, and that the shooting of a single duck over my decoys was a far greater attainment than the killing of the deer.

I learned something during that and subsequent trips, and can now depend on myself, find my own way through the woods without quarreling with my compass, paddle my own canoe, and keep up my end in constructing a shanty when necessary. W. R. W.

TORONTO, Canada.

SEBOKEGNET OR CROSS ISLAND.

The advantages that an island presents are many. The game does not leave it. Poachers and pot-hunters can be kept off—the banes of inland tracts where attempts have been made to preserve. Islands are the thing; but unfortunately they are scarce.—*Forest and Stream, March 21.*

THE above paragraph from your valued paper struck my eye just after my friend and I had been discussing the same subject in reviewing our last summer's experience and considering our route for the coming season. We had visited Sebokegnet, or Cross Island, as it is usually called, and were struck with the advantages it offered to a gun club, or, what is still better, for the shooting box of some wealthy sportsman.

Cross Island is situated near the eastern headland of Machias Bay. It is about three miles in length by two in breadth. It is densely wooded with spruce, hackmatack, fir and birch trees, some of which are enormous. At either extremity is an ideal harbor, deep, capacious and landlocked, affording anchorage for yachts and larger vessels. It is uninhabited except by the officer and crew of the Life Saving station, who are on duty during the winter months. In 1857 it was made the subject of special legislation, by which "If any person shall hunt, kill or chase any deer on Cross Island, so-called, without the permission of the owner, he shall be punished by fine or imprisonment." Since then it has been scrupulously preserved.

The island, beautiful in itself, is surrounded by some of the most picturesque scenery on our coast. In front, on the south, is the broad Atlantic, unbroken except by the Seal Islands. Due east is the precipitous rock-bound coast of Grand Menan. North is the beautiful bay of Machias, dotted with islands and indented with peninsulas. On the northeast is Little Machias Bay and Cutler Harbor, where there is already a fine summer hotel, which we make our objective point when in that region, which affords within a radius of twenty miles every variety of wild sport.

This island is the most remarkable game preserve on the continent, and contains, according to the estimate of him who is the best judge, Capt. Wright, the commander of the Life-Saving station and game warden, not less than 300 deer.

We started from Hotel Cutler, which stands at the head of Cutler Harbor, at 7 o'clock one fine morning in July, for a day on the water, a cruise along the western shore. The wind was a light breeze from the northward, which wafted us speedily along. We soon passed Lighthouse Island, which stands like an angel of mercy at the entrance, beckoning the storm-tossed mariner to the safe harbor within. We sailed down the western coast, passing a well-wooded, bold promontory on our right. Before us lay Cross Island. We next passed the entrance of Little Machias Bay and entered Cross Island Narrows, a famous fishing ground, which we reached in about an hour, just in time to witness the struggles of some fishermen with an enormous halibut they had taken, while around were numerous other dories, the occupants of which had suspended their attention to their own lines to witness the contest. After the monster was secured we proceeded on our way around Cross Island.

The stories we had heard at Cutler had led us to think we would come on a deer at every turn, and we were quite disappointed when we reached the western extremity without having espied a single pair of antlers. Nor were our eyes greeted with the sight of a deer until we had made the entire circuit of the island, and had landed at the Life-Saving station, where we were warmly greeted by Capt. Wright. Here feeding quietly was a doe and fawn. We were again disappointed to find that they were tame, and the mother not even a native of the island, but had been brought there a fawn and given to Mrs. Wright, who every morning and evening feeds it a handful of grain. During the day it often strays into the woods, but always returns at feeding time.

Lyman Wright, the captain of the Life-Saving station, is unmistakably a gentleman well adapted to his responsible position, and one whom it is a pleasure to meet. He is every inch a sportsman, well versed in woodcraft, and of course the topic of our conversation was deer. "I am somewhat surprised you saw none on your way around," he remarked. "It is rarely the case. In fact, for the last five years I seldom leave the station, either by land or water, but I see one or more. We often see them from our windows. They follow Fannie, the doe, to the edge of the clearing, and if no one is in sight, for quite a way into the opening, but at our slightest motion they are off like a shot into the cover. Last year Fannie persuaded a young buck, who was paying her attention, that we were harmless, and invited him to share the contents of her feeding trough. He became comparatively tame—never like Fannie who liked to be fondled—but he would not flee at sight. One morning I found him in the inclosure, where he had evidently been all night. I fear Fannie is a sad flirt and he fell a victim to jealousy. One afternoon while he was in the opening with Fannie he was attacked furiously by two old bucks and driven away. They probably killed him, for he was never seen after."

"How many deer do you think there are on the island, Capt. Wright?" I inquired,

"I think it is safe to estimate there are at least three hundred," he replied.

"Why not estimate one thousand as well?" asked one of our party incredulously.

"I do not feel sure that I would overestimate the number if I did, and so I feel safe in putting them at three hundred. You see, deer do not stand up to be counted. Go where you will when snow is on the ground and not too deep and you will see it marked with deer tracks. I seldom go anywhere on the island but I see one or more deer, sometimes a large troop. I see more of them than any one else. Perhaps they recognize me, and know there is nothing to fear and don't run from me. Then again, the island is large. It has always been the natural habitat of the deer. When I was young we used to put dogs on the island and drive them toward the narrows, where we would shoot them while swimming. We always got as many as we wanted that way. It contains 2,500 acres. It is full of browse, their food, besides the dulse on the shore, of which they are very fond. The deer we see are very sleek, and evidently find ample pasturage, so I can see no reason to prevent a natural increase. Now, the deer on this island have been protected for twenty-one years, and I don't believe there has been a poacher on it all this time. They firmly believe I would shoot them as I would a bear, and I don't know but what I would," said the captain, while a smile stole over his benevolent countenance. "Wild animals destructive to deer are unknown. 'Tis true a bear swam on the island a year ago, but as soon as we saw his tracks we turned out and shot him."

"Do you suppose he was the only one?"

"Yes. Bears always leave signs and we have not seen any before or since. I don't suppose a bear could get away with a deer, anyway. Their scent is strong and a deer's nose is very keen."

"Well, you have hardly given evidence of their being 300 deer yet, let alone 1,000."

"It is a safe estimate that two will produce two more in two years. If so, a little calculation will show that in twenty-one years the natural increase from a single pair in that time would be thousands. Well, the conditions for this natural increase have been most favorable. They have abundance of food and shelter. For twenty-one years they have not been disturbed by dog or gun. Does are often seen with two fawns. There is every reason to believe that there were a number on the island instead of a single pair when they were first protected. Three hundred is a very moderate estimate."

"What is to hinder them from swimming off the island?"

"Nothing but inclination. Here they find sufficient food, shelter and protection. No dogs to chase, no huntsmen to kill and alarm, and why should they leave it? In fact, though deer have been known to swim from the mainland to the island, during the last twenty years none have been known to leave it. When chased by dogs on shore they instantly make for this island, appearing to know that here they will find a refuge."

"I should think they would become crowded," pursued our questioner.

"At our estimate of 300, this island would allow 8⅓ acres for each deer."

"Are there any other kinds of game?"

"Yes; there are several large colonies of raccoons, that would afford coon hunting, so popular in Virginia. There are, also, plenty of foxes. There is a large fresh-water lake at the other end of the island, which wild geese and other waterfowl make their stopping ground in spring and fall. For several weeks in the spring and a week or two in the fall geese abound, while brant, duck and other waterfowl stop much longer. Shore birds are innumerable. I have seen them in flocks so large that they would seem like a cloud. There are, as well, lots of partridges."

We took a short walk in the woods. Every spot capable of receiving an impression was marked with deer track.

"Why do we not see any? They are evidently all about."

"You make too much noise. Step softly, do not speak, and I think I can show you some. Follow me."

He led us down a path through the dense woods, and by a warning finger uplifted, halted us at the edge of a little clearing. Availing ourselves of the cover the bushes afforded us, we cautiously advanced. On the further side, within the shade the trees afforded, was a troop. There was the lordly buck, the fat doe and the timid fawn, how many I know not, for before I thought to count an incautious movement of some of our party startled them, and they quickly disappeared into the forest.

We returned to the Life-Saving station, inspected the apparatus and reëmbarked for Machias Bay to see the sculptured rocks and fossil footprints. The peninsula on our right, which has been bought by Captain Ellicott, of the Coast Survey, for some Baltimore people, is also full of game. Deer are abundant and the marks of bear are plenty. Jutting from it is Sprague's Neck, a charming little point of three hundred acres, an admirable site for a country seat. We sail up the beautiful Bay of Machias, inspect the fossil footprints and gaze on the hieroglyphic sculptures on the rocks. We make the circuit of the bay and again come out on the Atlantic Ocean. As far as the eye can reach is a succession of islands and points. In the distance is Roche Island, the country seat of a wealthy Boston gentleman. Just beyond is Loon Point, the summer home of one of Boston's millionaire bankers. On our return we again sail past Cross Island, which we reached just before the sun was setting. This time we were rewarded by a sight of deer; first one, next a pair, and on one of the points a group of seven.

We returned to Cutler well satisfied with our cruise and visit, and rejoicing with the assurance that unless certain contingencies arose, we would receive another season an invitation to assist in thinning the bucks, which is now considered advisable; and fully convinced that, were we wealthy, we would buy Cross Island, and thus secure the best game preserve on the coast, if not in America. FRITZ WALTERSON.

FOREST AND STREAM, Box 2,832, N. Y. city, has descriptive illustrated circulars of W. B. Leffingwell's book, "Wild Fowl Shooting," which will be mailed free on request. The book is pronounced by "Nanit," "Gloan," "Dick Swiveller," "Sybillene" and other competent authorities to be the best treatise on the subject extant.

HOW A BUCK GAVE ME A HEARTACHE.

IT was some years ago, when bacon was not so plentiful as now in Arizona Territory. Meat was meat, and there was no shooting game for fun. I was mining at the head of Lynx Creek, twelve miles from Fort Whipple, when one day finding our larder running low I concluded it was time to go hunting. Shouldering my old Spencer repeating rifle I took to the brush. I presume some of the readers of FOREST AND STREAM have in their time owned and sworn by their Spencer, but in these days of good rifles the old style Spencer would be a sort of a contrary "let her go-Gallagher." It may be she would go, may be she would not. Mine was a good one of the kind. I had resighted it until it was a nail-driver at seventy-five yards—that is, when it went.

I had tramped over the mountains for some six hours; it was getting late in the afternoon and I had seen nothing but a couple of wild turkeys, with no chance for shot. Coming out upon an open hillside, with small patches of oak brush about two feet high, I saw a sight which made my heart beat fast; and in a second I had a bad case of the buck ague. For there below me, not seventy-five yards, I could see the branching horns of an old buck, at least six points to the side, I knew. How to get him was the question. I sat down to quiet my nerves and think it over. I could not see the body, but only about half the horns above the brush. I knew when he came up it would be flying; and meat was too scarce to chance a wing shot. By studying the position of his horns and straining my eyes into the brush I thought I could make out the line of his back. Drawing a careful bead I fired. The buck sprang up, then stumbled and went down. I could see the blood on his shoulder. Up he sprang again, and I pulled the trigger, but she didn't go Spencer. Away went the buck with a broken foreleg; down went the lever of my old Spencer, and as might have been expected, the knife-blade extractor sheared the rim from the shell; and there I was left with a spiked gun and no ramrod, until I had whittled down a young oak sapling and made one. It was then near sundown; and my noble buck, where was he? Even to-day the memory of that big wounded buck disappearing among the pines makes me feel lonely. J. J. FULTON.

DEER DRIVING IN VIRGINIA.

THOUGH in all the sporting papers of the United States one always sees a great deal about deer hunting in its various forms, I have noticed with some surprise that seldom are there any articles explaining this particular branch of deer hunting, namely deer driving. Of course it differs very materially from stalking and other methods of hunting deer, and many people consider other methods more sportsmanlike, exciting and requiring more craft and skill. I think, however, and many others share my opinion, that if you have any really good deer driving it compares favorably with, if it does not excel, any other methods in excitement and pleasure. For this sport one requires a pack of at least a dozen hounds, the best being the ordinary black and tan hounds one meets with so often in the mountains of Virginia. Of course they are not much for looks or for blood, but for the rough ground they have to traverse and for endurance they are far better than any other breed used for the purpose. To make this sport a success one requires about ten or twelve men; more if possible, in fact the more men, the more chances there are of bagging the game. Two of these are chosen for the "drivers," those having the best knowledge of the country "driven" being generally selected, and the remainder are the "standers." The standers are then placed on their "stands" by the drivers, the best ground being along the bank of a river or the ridge of a mountain or any other convenient locality, the stands being certain runways, fords, or other likely places for the deer to run through, which are generally about one or two hundred yards from each other, and are generally either in a straight line or a semicircle as the case may be. The driver then leaves the standers on their stands, having arranged some signal he shall give at the end of the drive to call together the standers. He takes all the hounds with him, having coupled them if possible, lest striking the track of some deer or other animal, they should leave the driver and follow it up on their own hook before the proper time. He then goes by a roundabout way to some point directly opposite the line along which he has placed the standers and walks toward them, letting the dogs loose two at a time as he comes across the fresh tracks or sign of deer going in the direction of the standers, and thus it is very probable that the deer will be driven by the dogs toward the standers, and passing through the stands some one is pretty sure to get a shot, possibly several. C. H. R.

WINCHESTER, Hants, Eng.

BEARS AND BEAR SHOOTING.—*Editor Forest and Stream:* I welcome the criticism of your East Indian correspondent, "Shikaree." He calls me "hypercritical," but he is always interesting, and may punch as many holes in my articles as he chooses. Perhaps, were we to compare notes, he would find that my opinions coincide very nearly with his own, though his experience of bears is widely different from mine. He says that they "advance to the attack very deliberately." In this country, as far as I know, they seldom advance at all, unless wounded. I do not believe even the grizzly is an exception. The article to which "Shikaree" refers consisted of a few random ideas, thrown together for the benefit of inexperienced sportsmen, and was in no sense intended for the instruction of experienced hunters. It was drawn forth by the statement that a bullet of small caliber planted in the brain of a bear, would kill him. To this I agreed, but stated that the difficulty was to get it there. Bob Herring, of Texas, said, "Never shoot at a bear's head, even if your iron is in his ear—it's onsartin." So think I, and so, I believe, does "Shikaree." In my experience bears always try to get away by the shortest route, and when they are plunging through the brush you can't hit the brain. One might as well try to cut off a duck's head in a seaway. I still hold to the conclusion that for the great majority of shooters it is very much safer to shoot at a bear with a large caliber rifle than with any of the smaller sizes, and would like to ask "Shikaree" how it would suit him to hunt East Indian game with a .32.—KELPIE.

OHIO.—Ironton, May 8.—The woods are full of young squirrels; any amount of quail and rabbits also.—J. D.

Sea and River Fishing.

THE ANGLING TOURNAMENT.

THE fly-casting tournament will be held at Harlem Mere in Central Park (the upper end), next week Thursday and Friday, May 23 and 24, beginning promptly at 9 A. M. each day. We printed the rules in our issue of March 21. The programme will be as follows, the prizes in each class being gold, silver and bronze medals:

First Day.—Single-handed fly-casting by amateurs. Judges: Rev. H. L. Ziegenfuss, Dr. A. Ferber: C. Van Brunt, referee.

Salmon fly-casting. Judges: Jno. A. Roosevelt, J. S. Van Cleef; W. J. Cassard, referee.

Minnow casting for black bass. Judges: A. N. Cheney, Jas. L. Valloton; Jno. A. Roosevelt, referee.

Single-handed fly-casting by experts. Judges: Fred Mather, Dr. Geo. Trowbridge: A. P. Van Giesen, D.D., referee.

Second Day.—Singled-handed fly-casting by amateurs. Judges: E. G. Blackford, Francis Endicott; Hon. Dan O'Reilly, referee.

Single-handed fly-casting, light rod contest. Judges: W. H. Wood, Wm. J. Cassard; D. Chauncey, referee.

Heavy bass casting. Judges: Hon. H. P. McGown, Dr. Geo. Trowbridge; Capt. Wm. Dunning, referee.

Fly-casting for black bass. Judges: A. P. Van Giesen, D.D., L. Dinwiddie Smith; Wm. C. Harris, referee.

The secretary's address is G. Poey, 114 Wall street, New York.

THE SUNSET CLUB.—III.

IT was an hour after sunset when the heavy footsteps of the President had an echoing sound through the deserted hall. The club rooms were dark. Standing on tiptoe he took a large key from the casing above the door. Unlocking, he walked in. After lighting the gas he seated himself in front of the whitewashed stove; elevating his feet above the rim, he gave way to meditation and revery as he watched the curling smoke from his cigar slowly drifting from him. It was not long until a noted worm-fisher from Chicago entered the room, quickly followed by an expert fly-caster from Castalia. Then came a black bass angler from Dayton, O.; a catfish jugger from St. Louis; several enthusiastic yachtsmen, including a noted commodore, and when the President called the club to order the room was well filled.

"Keeper of the Keys," said the chair, "are you satisfied that all present are entitled to seats in this chamber?"

"Mr. President," replied the official, "as near as I can judge, the brethren are true and worthy disciples of Izaak Walton and are qualified to wear the regalia."

"'Tis well. Brethren, salute the chair."

The secret signs were given, after which the minutes of the last meeting were read and approved.

"I would like to make an announcement before we proceed to the regular business, for fear that I might forget it," said the President, holding in his hand a dozen letters. "It is as to who are are eligible to become active members of this club. I have here letters of inquiry from different parts of the United States touching this subject, and will say for their information and others, that all lovers of outdoor exercise and sport who can satisfy us they are truthful men and that they have never told a lie, or, if wanting in this respect, are willing to reform by taking upon themselves an obligation, followed by trying degrees and mysterious ordeals, as prescribed in our ritual, and paying to the treasury the initiation fee: to all such we extend a hearty hand of fellowship."

The regular business of the club was resumed, and there being no committees ready to report, the members entered into a discussion touching the instinct of birds of passage, relative to their being good weather prophets. The following is a synopsis of the arguments presented as recorded on the secretary's book: "It is instructive to compare with our modes of life those of the lower animals whose actions and habits are directly prompted and regulated by the Creator, by means of their instincts. That birds have long been guides to sailors is well known. Members of the guests who sailed on the schooner yacht Speranza in her famous cruise from the Atlantic to Lake Erie testified that when the cormorants flew landward, wind was sure to follow; and when the gannets collected in flocks and followed the yacht, rain was certain to fall within a few hours. and when seagulls soared to lofty heights, and, circling round, uttered shrill cries, a storm was approaching, the smaller the gull the surer the storm. Hunters are close observers of the habits of birds.

"If birds in autumn grow tame
The winter will be cold for game.

"A member from Michigan stated that he would never leave the camp if he saw a solitary buzzard at a great altitude, for it indicated rain; but if they flew high together fair weather followed. A brother from Missouri said, there would be no rain the day the crane flies down the creek. Florida's representative said the direction the loon flies in the morning the wind will follow the next day. Dakota swears by the wild geese,

"The weather it will spill
If they fly to the hill.

"If ducks and geese fly to the south, the weather it will be cold, if to the north, warm."

After the subject was well discussed, the chair said that the committee appointed relative to admitting Hon. Charles Foster as an honorary member was ready to report.

The committee stated that they had seen Hon. Joseph W. Cummings, and that he admitted the fact as stated in the last meeting, but he was proud to say that he knew the Governor had cast aside his $2.85 fishing tackle and now was the happy owner of as fine an outfit as ever was manufactured, and to show that he is awakening to the inspiration of the true angler, it is recorded at Middle Bass Island, Lake Erie, that he caught last fall two large black bass at one time."

"Yes, Mr. President," said a gentleman from Kentucky, "I can testify that the Governor did some scientific fishing. It is also true that he made two double catches on a spreader; but, my brethren," and he lowered his voice to a whisper, "his line showed a little trace of tar, conclusive evidence that he had been fishing in a pound."

This statement created quite a sensation, and the President shook his head. As the chair was favorably inclined toward the Governor, he called a recess for ten minutes, after which the committee concluded the report by recommending his admission, without debate, in the Cypronoid degree. This was unanimously agreed to.

"In conferring upon Governor Foster this degree," said the President, "it may be well to explain to him that to become a bright member—for it must be remembered that the novice is entering on a career that requires study, perseverance and experience to become an expert—we expect members to so pursue this profession as to add honor to the club and the ancient and honorable art of angling. This degree entitles him to all the privileges and emoluments of this club, and confers upon the recipient the right to fish with angle worms, which he can spit on if he finds it necessary, and with such pole, line, bobber and sinker as best suits his inclination. As he advances in the art he may use his $85 outfit, and we hope to hear a good report from the Governor by next fall. Judge Cummings will instruct Governor Foster in the secret works of the club, and will see that he does not fish in pounds. We consider it a great honor to place his name upon the roll of membership. Is the name recorded?"

"It is," replied the secretary.

"We will now listen to the report from the trout fishing grounds at Castalia, as the season opened on the 15th of March."

Commodore George W. Bills, the most enthusiastic and persevering member of the club, was called upon. His reputation is known along the chain of lakes.

Good luck is his. The speckled beauties rise
Where'er he fishes, nor can he well surmise
Why the largest trout avoid his well-cast flies,
Save by the logic, age has made them wise.

"Mr. President," said the Commodore, "I shall be very brief. The waters of Cold Creek, at Castalia, are literally alive with young trout. In the shadows of the rafts we have seen trout weighing upward of 4lbs. fanning themselves and winking at our flies. We placed in the stream this spring of our own hatching 70,000 young fish, which are doing well. The Government put in 7,000 yearlings and they are all at home. The fishing season opened on the 15th of last month. I have taken particular pains to give you a correct report of that day's catch. Col. John W. Oswald caught 18 trout, with a total weight of 9lbs. 10oz. Mr. Baker, of Cleveland, 14, weight 8lbs. 11oz. Mr. Zollinger, of Sandusky, O., 9, weight 7lbs. Mr. John Sweeney of Detroit, who walks on his toes along the bank, caught the largest trout, 2¼lbs." A description of how the fish took the fly and the trouble the angler experienced in landing him, would fill several columns of any Michigan paper. Com. Geo. W. Bills caught 11 trout, weighing 10lbs. 11oz. As this was 11oz. more than the laws of the club permit in one day's catch, his trial will come off some time during the summer.

"Are there any other reports?" asked the chair.

"Mr. President," said Major Wm. R. Leflet of Ohio, "you may talk of the pleasures experienced with the fly at Castalia, and of going to some far away land from the friendly influences of civilization, but I tell you, gentlemen, the western end of Lake Erie and her romantic tributaries offer attractions to the sportsman seldom found in any waters of the United States. Her rock-bound, vine-clad islands, her lily-circled bays and inlets, in the size, the great variety and gamy qualities of her fishes, she may justly claim rare distinction. Amid the marine forests and gardens of mosses of a hundred hues of green, woven into unnumbered fantastic shapes of beauty, grace and elegance, there in his pride and strength sports the lordly black bass, the stately pike, the matchless speckled bass, the sunfish and the perch. But these are not alone. Here, there, glancing, darting everywhere, are the sun-tinted golden shiners and minnows and other small fishes of all varieties and by the millions; while near by, lurking in shades of deeper waters, are the sauger or jack salmon, eager for the hook, and one of the finest fish that ever graced the table of the epicure; the pickerel, the rock bass and other varieties of game fish common to the northern lakes. Who that hath floated upon these transparent waters, inhaling the sweet fragrance of the lovely water lily, charmed by the splendid beauty of the Egyptian lotus, and drank to his soul's content the health-giving, soul-inspiring, balmy breezes of a summer morning, as they were wafted across bloom-laden marshes, gardens and fields, or still floating there in autumn, after the hand of God had painted pictures upon islands, forest, marsh, leaf and flower, grander, fairer and more stately than artists' touch ever gave to canvas, and with a beauty more of heaven than earth, gently caressing the souls of men from earth to heaven—who that hath seen these pictures and drank of this beauty shall fail to treasure their memories and the memory of these radiant summer days while life lasts, and not be haunted by them as we are haunted by the recollection of sweet dreams? Can you wonder why President Harrison loved to linger among these historic islands of Lake Erie, or that Robert Lincoln, Gov. Foster, Major Bickham and a score of lovers of the rod and line can spend weeks at a time upon the reefs and shoals patiently waiting the strike of a black bass? But, brethren, I arose to report the result of my first fish this spring. Ohio fishermen are familiar with Ottawa River, whose waters are often so transparent that minute objects can be seen at the depth of 10 or 15ft. This arm or bay of Lake Erie is teeming with life since the laws have been rigidly enforced. Last fall thousands of bass and pike were taken, and the anglers every afternoon were rewarded with strings of from ten to forty, each string weighing from 20 to 125lbs. On the afternoon of March 23 with a truthful member of this club we caught seventy perch and pike. As the sun was disappearing below the leafless forest, and my friend had returned home, I had occasion to go to the boat house. I put a large minnow upon the hook and cast it into the incoming current and laid my rod upon the float. Upon my return twenty minutes after I found the rod gone. The thoughts of a large fish first ran through my mind, for you know nothing surprises an angler; looking up stream I saw the rod about a quarter of a mile distant, and still going at a rate of forty-two knots an hour. Leaping into a boat I made the quickest time on record, and found that every inch of line was off the reel. I raised the rod. The line was taut in a moment. My rod, the best bethabara, was tied in a knot. Fearing to trust it too far and after straining every nerve to turn the fish on a curve, for the sake of my hands I was compelled to loop the line over the oarlock; this was a mistake, the fish came near upsetting the boat. Slowly and noiselessly I rowed the boat toward the monster, taking in the slack line; to my surprise he lay perfectly quiet, like a summer evening just before a storm. Without a word I gently got my hands around his thick neck, behind the gills, and before he knew who had captured him he was in the bottom of the boat."

"Brother Leflet, what was the weight of this pike?"

"As to its weight," replied the Major without a smile, "it will suffice to say that if placed in the balance against a season's catch at Castalia the scale would tip in my favor."

Some of the members of the Cold Creek Trout Club made an attempt to reply to this reflection, but the chair asked the secretary, "Are there any applications for membership?" The secretary read the following:

CHICAGO, Ill., April, 1889.—*President of the Sunset Club:* Desiring to become active members of your valuable organization and to learn the arts of fishing, hunting and yachting, we inclose herewith the initiation fees. We solemnly promise a cheerful obedience to the requirements of your association and will readily obey all mandates during our initiation or while connected with the club, so long as they do not conflict with the late amendment to the Inter-State Commerce Law. Advise us, by railroad mail, when wanted. Respectfully your obedient servants,

A. G. SHEARMAN, T. P. A. U. P. R. R.
W. S. BROWN, T. P. A. L. S. & M. S. R. R.
R. McC. SMITH, T. P. A. C. B. & Q. R. R.

"Brethren, what shall be done with the applications?"

"Mr. President, I move you that they be instructed to appear in the ante room of this club at early candle light next meeting." The motion was unanimously carried.

"The keeper of the goat will see that he is fed upon ginger and other West India plants."

The club adjourned.

J. E. GUNCKEL.

REMINISCENCES OF TROUT FISHING.

I DESIRE to express my gratitude for the salmon and trout supplement in your issue of April 4. As yet, I have not found time to give it much attention, but I can see that it is destined to be in the future of great assistance to many of us in determining species, and consequently will be of much value to science. The article by "Penn," on "White Mountain Trout," is interesting to me, as that region was long ago one of my old "stamping grounds," and I am glad to learn that some of the trout are still there. I wish "Penn," who seems to know that country well, would tell me if the trail from Waterville to the Notch has been kept open. I was the first traveler to pass that way, and at the time I went through (summer of 1860), the men had made a road as far as the forks of Sawyer's River (about six miles I think), where I left them encamped, and went through on my own hook. There was no child's play about that performance, and the caution of "Penn" to those who seek these forests is not misgiven.

When I feel like writing, which is but seldom nowadays, I may tell the story of that trip.

The funniest (that's the proper word) thing in that number of your paper was the note by "Awahsoose." I have a strong fellow-feeling for that gentleman, and supposed that like myself, he was a trout fisher from 'way back in the forties. Until within the last ten years I had never caught a bass, and seldom fished except for trout, unless when on salt water. I am now somewhat noted, I believe, as a local bass fisher, but what I know of that art has been acquired without instruction, and as my experience leads me to differ from some of the recognized authorities on certain points, I am slow to say much about it.

As to trout, bless 'em, I have been their friend and admirer since the day when, a boy, I lifted six sparkling gems of that species from a little brook, with the aid of an appletree wand. I have since taken them in many ways, as dictated by preference or necessity. I have speared, shot and "griddled" them in my time, but hope to be forgiven, as it was but for food, and in such numbers only as justified my hunger, and the absence of all Christian-like appliances. For food also, I have lifted on a four-pound salmon trout at one end of a small clothes line, till the stout smoke-dried juniper pole bent almost double to the desperate strain of the surging fish.

That was on Foss Pond, in Maine, and you fellows know where that is, and if you don't, the course is easy, to a woodman. You just start from Kingsbery, and strike east and by south till you hit the old "New England Road;" follow this about four miles, or till you see two stumps and a big canoe birch with a good deal of bear sign around, then hold north, watch the leaves for last year's moccasin tracks, follow your nose about three miles and if you don't get there I am sorry for you, as it will indicate that you have, in Western parlance, bitten off somewhat more than you can chaw; and those woods are not good for tenderfeet to camp in without guides.

In Foss Pond and its outlet we were accustomed to catch four kinds of trout—the little black fellows of the brook, the large speckled trout, the magnificent red salmon trout, and the lakers, or "crotch-tails" as they were called. There were likewise eels in the pond, but I never caught any.

As I was saying; I have caught trout with the roughest tackle and with no tackle; with chunks of pork and hunks of squirrel; with delicately scoured and carefully disposed worms: with gaudy ibis or jay flies and stoutest single leaders; with delicate midge or miller and gossamer gut; and it saddens me to think that my prejudice against fishing in a cedar swamp are strong enough to prevent me for the most part from fishing for trout in the waters of this region. There is too much pure cussedness in a cedar swamp to accord with my ideas of trout fishing. So, generally, when I fish, I fish for bass.

When I fished in the streams of Vermont (mostly between Woodstock and 'old 'Cutney," as Mount Ascutney is often called), there was good fishing there. I am sorry that the experience of "Awahsoose" is derived only from depleted brooks.

But if I were ever to revisit his State, it would please me to take him to a spot where I have reason to think that a few two pounders are still left, and hear his opinion of the sport when he had succeeded in capturing one of them and was lost in contemplation of its beauty.

Perhaps, as I have admitted the taking of trout by means which nothing but dire necessity will ever justify to a true sportsmen, I ought in justice to myself to say that you have the extent of my misdeeds. I never jiggered, poisoned or blew up the fish with explosives. And there are other methods which I have learned from the

Indians, but never practiced, scarce less deadly than those which I have named. They are probably known to the editor, but neither he nor I would like to see them described in this paper, for even the fish-hog has been known to read the FOREST AND STREAM. I suppose he read it backward, as the devil is said to have done by the Lord's Prayer.

Only, if I were lost, like Mr. Everts, in the Yellowstone country, and if my fishing tackle had galloped away on the pony: if I should see, as he did, a brook full of trout and nothing apparent to catch them with, it would probably not be very long before I should have a few of those trout stuck upon sage bush forks and sizzling over the fire. KELPIE.

APRIL 9.

ANGLERS' ASSOCIATION OF EASTERN PENNSYLVANIA.

AT a recent meeting of the above association the president, Hon. A. M. Spangler, delivered an address on its inception, growth and work. The organization was demanded by the deplorable violation of laws framed for the protection of fishes, bringing to naught all efforts at restocking depleted waters. At the preliminary meeting, held in Philadelphia, Nov. 15, 1882, fourteen gentlemen pledged themselves to promote the objects of the proposed association, which were stated to be "the welfare of the angling interests of this vicinity, * * * the enforcement of the fishery laws of the State, and the restocking of streams which have become depleted by illegal fishing and other causes." When a constitution was framed the first section reversed the above order by reciting that "the primary object of the association shall be the preservation, protection and increase of edible fish in the waters of Pennsylvania, the enforcement of the laws concerning the same, and to increase the interest in angling." Measures were at once taken to secure permanent headquarters, a library, to promote correspondence with similar organizations and with other persons interested in this work. Provision was made for discussions on fish and fishing topics, the reading of essays and the delivery of lectures.

After the organization was completed there was an immediate and large increase in the applications for membership. The association entered into friendly relations with the Fish Commissioners of Pennsylvania, the U. S. Commission and with angling associations in Pennsylvania and other States. The members then went to work to obtain information about the state of the streams, the quality of the fishing, violations of fishery laws, etc. The advice of fishculturists was obtained in relation to game fishes for stocking the waters of eastern Pennsylvania, and a fish warden was secured for the vicinity of Philadelphia. The State Fishery Board was urged to prevent the use of fish baskets in the Susquehanna and Delaware Rivers, and to increase the stock of trout and black bass. Violations of fishing laws were reported and rewards offered for the arrests and conviction of the offenders. By request of the association Mr. Spangler was appointed to fill a vacancy in the Board of Fish Commissioners. One of the many important actions of the association was the preparation of a complete digest of the State fishery laws, which will be incorporated in the forthcoming report of the Pennsylvania Fish Commission. Through the efforts of the Anglers two carloads of rainbow trout were obtained from the Government supplies for Pennsylvania streams. The work of distribution was accomplished by the members at their own expense, but the results were unsatisfactory.

In the way indicated and by all other legitimate means the gentlemen have labored to protect the fishing interests of the State and to increase the store of valuable species. We look forward with hopefulness to the time when the lessons which the Anglers' Association are trying to teach will result in an enlightened public sentiment in favor of protection and increase of edible fishes in Pennsylvania streams. We cannot avoid expressing the hope that our associates among the anglers, who exert a powerful influence, aided and extended through the agency of the press, will be especially careful to learn all the facts involved in the discussion of fishery methods with which they may have no personal acquaintance. Let us investigate every disputed point, attacking nothing until we are sure it is wrong, never descending to the undignified practice of applying hard names to men whose interests may appear to conflict with our own. We have nothing to lose and everything to gain by patient, intelligent study of problems which the best methods of research have not yet solved.

THE RANGELEY LAKES.

Editor Forest and Stream:

I am preparing for a long and I trust a lively campaign among *Salmo fontinalis* up North, but I cannot sail away without dropping a few remarks *versus* Mr. Jean R. Stebbins's letter in this week's issue of FOREST AND STREAM. I am glad he met with success at the Rangeley Lakes last September. Few people are so fortunate nowadays, and where one person catches trout in those waters, a hundred are copiously "left." I concede that the records he quotes are exceedingly good, and most creditable to his ability as a fly-caster. Camp Bemis, too is a lovely spot, and a sojourner there will not have gone amiss. I am also pleased that so eminent a gentleman found pleasure in reading my little book, "Where the Trout Hide." It may interest him to learn that the contents of the volume have pleased others, for the publishers have paid me royalty on over 15,000 copies, and it is still going rapidly, although a mere infant of but three months of age.

Mr. Stebbins says the book was evidently written in the interests of the Lake St. John boom. In this Mr. Stebbins errs. It was written—if such a tractate deserves the dignified accusation of ever having been written—principally in the interests of the author, who found it profitable, and to direct the fraternity of anglers to a glorious fishing country. It will prove profitable to them also.

Mr. Stebbins says I must be prejudiced against the Rangeley Lakes, and here he again errs. I am not prejudiced against the lakes, but the exceedingly poor success I as well as many acquaintances have invariably met there in recent years.

Probably, if I were to sit in a boat and freeze while I trolled with "gang hooks" as the ice disappeared, I might "catch on." I know this course is pursued by some "fishermen," and they are welcome to it, but as for me, well:

I want to be an angler,
And with the anglers stand,
No "jig" or ugly gang hook
Invades that honest band.

I will add that Mr. Stebbins does not known me else he would not say that I must be mad at something that has happened to me there. I rarely get mad, but on the contrary, I have a nature as sweet as a June lilac. When, at very rare intervals, a real good A No. 1 first-class mad comes upon me, I'm something awful.

I am told that upon such occasions I tremble in the fins, my gills turn pale, and for hours in succession I refuse enticing luxuries of every description. When Mr. Stebbins concludes that I may possibly be "very ignorant" I promptly plead guilty. My commission from the Medes and Persians prohibits any reply to such an accusation, and my most sincere prayer is that *consillio et animis* I may live to overcome it. However, I freely forgive him, and if he, with his friend "Piseco," will permit me to direct them to a little stretch of damp water during September I will promise them more big trout (from 1 to 4lbs. each) in three days than they will take at the Rangeleys in three months, or even three years. Thirty hours by railway from their rock-ribbed home will land them on the spot. My knowledge of the Rangeley Lakes has been derived from a personal experience extending over many years, and possibly repeated disappointments may have induced me to look upon them a little "nor' nor'east, a little nor';" yet still upon the subject of good fishing my vision is decidedly clear—most emphatically "sou' sou'west, a little sou'."

In the interests of a leading newspaper I shall visit the Rangeley Lakes this season, as well as Parmachene, and shall find pleasure in writing only the plain unpainted truth. I have been told that I would meet "trouble" if I went there, and hence I shall go fully prepared for any emergency. On the contrary, I feel sure that nothing will occur of an unpleasant nature, and I anticipate an enjoyable journey. Should it appear that my views are incorrect I promise not to abridge the excitement.

KIT CLARKE.

NEW ENGLAND TROUT.

BOSTON, Mass., May 13.—The opening of the trout season was very early, but it is also proving to be slow. The exodus to the Maine trout waters is not yet up to the advanced season, and the catch of trout is also a good deal behind the season. A party of Boston sportsmen has been at Moosehead for a week, under promise to telegraph their friends here when the trout are biting, but still the welcome news does not come. Those friends are waiting to be off, but they can spend but a few days on the loved trout waters, and they are almost discouraged. The weather has been very warm, and the water is as warm as need be, but the trout do not bite. The same story is also true of other trout waters in that State. Even the newspapers that usually have them do not yet contain the big trout stories, though the ice has already been out a couple of weeks. At the Upper Dam there was fairly good fishing in the rapid water below the dam at first, but trolling in the still water in the Rangeleys has not yet been good this season. Perhaps the transportation and hotel people will not thank me for writing this story, but the truth must be told, cost what it may. It is possible that there is to be splendid trout fishing later in the season—possibly at about the usual time, and that all the early opening is to go for naught; that the trout are not to bite till they get ready. Perhaps it is the season, the time of the year, and not the going out of the ice after all that signals the biting of the trout. We will wait and see. At any rate there is no news at present calculated to stimulate us to be on the way.

The salmon at Bangor are also very tardy. The season opened remarkably early with a few caught, but since the first day or two the fishing has been very poor. The waiters here, and there are several of them, watch for the welcome of the dispatch from Mr. Fred Ayer in vain. Letters come by mail every day or two, saying, "Do not come yet. Wait till I telegraph." A big run of salmon is certainly expected, but it is very tardy thus far.

Reports from the trout streams in this State continue good—better than usual. In fact it would seem that the better protection which has been given these streams for the past two or three years, through the influence of the Massachusetts Fish and Game Protective Association, is bringing forth good results. Some of the New Hampshire trout streams are also "panning out" well this year. In that State also protection has been better for a couple of years. But in Maine the reverse is true. The law has been enforced perhaps, but winter fishing was never carried to a worse extent than during February, March and even April, 1889. This was all done under the law that permits such work, by the inhabitants of the State.

Mr. Geo. B. Appleton, with Mr. Fuller, will go to Bangor salmon fishing as soon as the telegraph informs them that the run has begun. Harry Moor will start for the Rangeleys about next week. The Kineo Club is still determined to put off its trip to Moosehead till about the first of June. W. D. Weld will join a fishing party to Maine next week. Mr. Wardsworth, who has been at Rangeley every season, for a number of years, is obliged to give up his trip this year, from the fact that he is just recovering from a severe carbuncle. SPECIAL.

BOSTON, May 14.—Some good trout scores from Rangeley this morning. At Upper Dam Messrs. Clark and Brackett, of Peabody, Mass., took on Saturday two of 7½lbs., one of 5lbs., two of 4lbs., two of 3lbs., and a host of smaller.—SPECIAL.

FOUR-BEARDED ROCKLING.—In one of the aquaria at Wood's Holl, Mass., Mr. Vinal S. Edwards has placed a four-bearded rockling (*Onos cimbrius*), an interesting little member of the cod family. One peculiar feature of this fish is the construction of its first dorsal fin, which is composed of a long, detached anterior ray, followed by a series of minute filaments which do not rise much above the contour of the back. These filaments are situated in a furrow, and Mr. Edwards states that they are kept in rapid motion even when the fish is lying at rest. The function of this rudimentary fin is unknown, and it is to be hoped that the species may be kept under observation until more is learned about its habits.

LAKE LAMOKA.

ELMIRA, N. Y.—*Editor Forest and Stream:* Though a reader of your valuable paper for many years I have seen nothing in your angling columns describing Lake Lamoka, in Schuyler county, this State. This beautiful sheet of water is three miles long and about one mile wide, situated between Seneca and Keuka lakes, near the village of Tyrone. It is noted for the fine fishing to be had there during the angling season. It abounds with gamy bass, both large-mouth and small-mouth, pickerel, yellow perch, bullheads, sunfish, etc. The best months for fishing are June, September and October. There is good fishing through the ice during the winter months also. There are some fine spots for camping along the lake shore, and the neighboring farmers are very hospitable, or if the angler prefers he can find ample accommodations with Len. H. Storrs, who keeps a boarding house on the bank of the lake, close to the fishing ground. Mr. Storrs also has a number of good boats and has bait and tackle at all times. He sets a good table and has a good many fishermen to entertain during the summer months. His charges are very reasonable. His P. O. address is Tyrone, Schuyler county, N. Y. There is good woodcock and grouse shooting in season, also ducks and quail.

I have spent many happy days on the banks of old Lamoka, and expect to pitch my tent there in June, and I anticipate having a glorious time fly-fishing for bass. If any of your readers want a quiet spot to go and while away the summer days, a place where they can always fill their creel with fish, this is the place. I have derived a great deal of benefit from the information of shooting and fishing grounds contributed to your columns by members of the fraternity and now feel like adding my mite, and I feel that if any sportsman should go to Lake Lamoka and have some of the sport I have been having the last few years I shall be amply repaid for these lines.

E. A. S.

ST. LOUIS WATERS.

ST. LOUIS, Mo., May 11.—Ever since the opening of the season large catches of croppie have been reported. Bass have been somewhat scarce. This is to be expected until about the latter part of next month. Murdock Lake, in Illinois, a few miles south, has been furnishing excellent croppie fishing to the members of the Murdock Lake Fishing Club. Judge P. S. Lanham spent two days at the lake in the early part of the week and returned with 245 croppie and 6 bass, the largest of which weighed 4lbs. Another member returned after staying one day, with 78 croppie that would average about 1¼lbs.

Mr. I. V. Dutcher and a party of friends leave to-night for the club house, to remain a few days. The Meramic River has had its quota of fishermen, and with few exceptions they have enjoyed satisfactory sport. Mr. W. Mackwitz spent one day and caught a good string of fish, among which was a jack salmon weighing 4½lbs.

About twenty-three miles south of here, where this stream empties into the Mississippi, a party last Tuesday caught 23 large eels, 45 croppies and 3 bass.

At King's Lake the fishing has been only ordinary. The Dameron Lake Club, a few miles above, report the same state of affairs at its grounds. There has been no rain for some time, the waters are perfectly clear and fishing ought to be good.

The Grand Pass Fishing and Hunting Club, which has a large preserve, seventy-two miles distant in Illinois, is fortunate in having a really favorable place for fishing in connection with its hunting grounds. Major Cunningham, in one day with a fly, took 35 bass, which would average 4½lbs. This catch by far surpasses any other.

A telegram from the superintendent of the Current River Fishing and Hunting Club says that fishing at present with live bait is good, but that it is a little early for trolling. Mr. W. D. Groves is at the club house now, and in a letter to a friend here says that he is having splendid sport. Next week a large party leave for the locality to remain several days. UNSER FRITZ.

THE LUMPFISH.

AT the present time the lumpfish (*Cyclopterus lumpus*) is very abundant at Wood's Holl, Mass., and individuals of all sizes are found. This is the spawning season of the species. Late in April Mr. Geo. A. Lewis forwarded a female, measuring 20in., to the National Museum. By weighing the ovaries and counting the eggs in a portion, Mr. Barton A. Bean determined the number to be about 172,800. The lumpfish, also known as the lumpsucker, sea owl and cockpaddle, ranges northward to Greenland and Iceland. Southward it reaches Virginia in cold weather. The most striking peculiarities of this fish are the following: The male makes the nest and takes care of the young, which cling to his body by means of sucking disks on the belly. The young are found at the surface in summer in the midst of floating rockweeds; they have an anterior dorsal fin, which becomes obsolete with age. The colors of the adults are bright green, or blue, and red. It is claimed that the red ones are males and the others females. The specimen above mentioned was greenish. In some parts of Scotland and among the Greenlanders the lumpfish is eaten, but Buckland thinks it about equal to a glue pudding, indicating a difference of taste which we leave for the Ichthyophagi to reconcile.

TROUT AND WINNINISHE IN CANADA.

MR. DAMON S. COATS, of the Springfield Fishing and Game Club, tells us that as a result of the notice of the club's Canadian grounds, printed in these columns, he has received numerous inquiries for fishing waters. Mr. Coats recommends anglers to go to the establishment kept by Harry Poole, five miles from Chambord, P. Q. Mr. Poole has leased the old Hudson's Bay Company's post at the mouth of the Metabetchouan, where he furnishes board at the rate of $1 per day, and guide with canoe at $1.50 per day, guide to be found; he can direct to excellent trout fishing, and there is good winninishe fishing at the post. These fish strike in there from the 10th to the 15th of June, and remain for two weeks, then they go to the Grand Discharge, where the catch is great. Mr. Poole has teams to convey the angler to different points. Chambord is on the Quebec and Lake St. John Railway. The train leaves Quebec in the morning and reaches Chambord at night of the same day. Mr. Poole's address is Chambord, Quebec.

TAKE WHAT YOU CAN.

Editor Forest and Stream:

A correspondent over the pen name "Pacific" in your last week's issue advises against going trout fishing if one only has two or three days to spare. He says: "Take two or three weeks." Very poor advice, in my humble opinion. He might just as well lay down the law, "catch nothing but three-pound trout." This would be delightful if possible, and likewise three weeks' fishing are better than three days; but it is a ridiculous moral which he draws. Now, I deem it my very good fortune to be able to get away from the city for two or three days at the most the latter part of May, taking advantage of Decoration Day, and I hope to repeat my little vacation this year, if I hear of any place "where the trout hide" and are in a playful frame of mind. Three days! I will not allow my three days to be laughed at, and then—but thinking it over, it is not a three days' trip I take; it is a trip longer than "Pacific" advises. Here it is the 9th of May, and I have been planning and talking trout for two weeks at least, and it wants three weeks to Decoration Day, and about four weeks to talk the whole thing over, so my trip this year will foot up to about nine weeks and three days. Quite a respectable trip after all, so I won't attempt to ruffle the smooth surface of the Pacific any more. FLIN.

CARP IN THE PASSAIC.—Paterson, N. J., May 6.—Your reference in a recent issue to carp in the Passaic River is slightly incorrect in that you assume that carp may be found near Garfield. If there are any there, they are so in very small number. The Passaic River above Little Falls—a station of the Greenwood Lake Railroad—is alive with carp; the recent heavy rains carried a number of them over the falls at Little Falls, and yesterday I saw a man with a string of five caught a short distance above Paterson. The carp he had would average 5lbs., the heaviest weighing over 7lbs. I doubt whether many carp would live in passing over the falls at this city and the rapids below, and it would be only with difficulty that they would get over the dam at Dundee, all of which would be necessary for them to reach the river near Garfield. Please do not urge any person not to catch carp during the breeding season. Carp are worthless as a game fish and are not fit to eat at any time, and they are, I fear, spoiling our bass and pickerel fishing, which is not as good as formerly in the upper Passaic.—CHAS. A SHRINER. [Carp cannot possibly injure the fishing for bass and pickerel, as their food is vegetable substances. On the other hand, if carp become plentiful their young will afford food for the game species. Opinions differ as to the edibility of this fish; we recommended it on the strength of personal experience and the corroborative testimony of a large majority of correspondents who have eaten it.]

POSTED BROOKS IN CONNECTICUT.—*Editor Forest and Stream:* I have for the last week or ten days been on a business trip into Berkshire county, Conn., and find on inquiry that the new law was not working as satisfactorily as was hoped it would. Cutting off from the open season the months of April and August has taken from the farmers their months, for the farmer's time is too fully occupied to think of fishing in May, June and July, and he could fish a little in April and August. It seems the farmers were not consulted in the matter at all, and the law was sprung on them unawares. Feeling aggrieved they are retaliating by posting the brooks; and when the sportsmen get into the country they will find, instead of the free and open fishing, that all of the best of it is posted; and the farmers seem to be inclined to be rather stringent in their restrictions as far as I was able to learn, and I heard from every town in the county save one or two. I gained my information through sportsmen, so it is liable to be correct. These are the facts in the case, and the sermons which might be preached from the text I will leave for others to do.—NOTLIKS.

TROUT PORTRAITS.—Mr. Wakeman Holberton, of this city, has just completed for the Smithsonian institution oil portraits of the Dolly Varden trout (*Salvelinus malma*), female, and the red-throated trout (*Salmo purpuratus*), male and female. The painting is from life studies made by Mr. Holberton at Kanusku Lake, in northwest Idaho, one of the headwaters of the Columbia. These fish are most brilliantly colored and they are here set off by a becoming background with gorgeous effect. The capture of this particular Dolly Varden trout, by the way, has never been heralded with much pride by Mr. Holberton. In fact he did not take it, nor is he himself an adept at the mode of fishing by which it was killed. The cook had excavated more deeply a natural spring hole in the lake near camp as a depository for provisions which it was desired to keep cool; and going down one morning, Sept. 22, for the butter, he was startled by the sloshing about of a 30in. trout, which he incontinently clubbed to death. The fish had just been spawning.

FISH PROTECTION IN MINNESOTA.—Twenty-three bills for the preservation and protection of fish were passed during the late session of the Minnesota Legislature. We are indebted to Mr. W. D. Tomlin for a list of these measures, which prescribe close times during the spawning period, limit the methods of catching fish and prohibit fishing for sale, in all the counties having fishery interests worthy of protection. "In the bill relating to the protection of the whitefish in Lake Superior the office of fish warden is created, and the munificent sum of $200 is named as such fish warden's salary."

THE FIRST WEAKFISH.—New York, May 13.—A weakfish was caught yesterday by G. W. Graham, at Great Kills, Giffords, Staten Island, wind east, tide half ebb, bait shrimp. This is the earliest ever known in these parts. Mr. Graham is a member of the Squeteague Club, headquarters at Fitzgerald's, at the above place.—G. C. MEYER, Secretary.

FISHING NEAR NEW YORK.—*Editor Forest and Stream:* The cruiser Seneca is laid up on the stocks this week for repairs, after a wreck in New York Bay. She will be in commission again on Saturday, and will sail at once for Jamaica Bay in pursuit of further information for saltwater fishermen on "Fishing Near New York."—SENECA (New York, May 13).

A BIG SUNFISH.—Probably the largest sunfish on record was the one captured at the Life-Saving Station at Morehead, N. C., recently, and forwarded to the National Museum. The length of the specimen was 6ft. 9in., and the distance from tip of dorsal to tip of anal 8ft. The eye, which is inclosed in a bony capsule, was 3¼in. long. The name of this fish is *Mola mola*. The development of the species offers one of the most interesting problems for the embryologist.

BASS IN LAKE ERIE.—Dayton, Ohio, May 14.—The Dayton Club, Chicago Club and about fifty other anglers from various parts of the country are now enjoying bass fishing in the waters around the Lake Erie Islands. The Dayton Club, sixteen rods; Springfield Club, four rods; Chicago Club, twelve rods, are on Pelee Island, Canada waters. The Cincinnatians are at Kelley's Island; Indianapolis and Columbus at Put-in-Bay; Toledo Club at Middle Bass Island.

THE WAY OF THE TRANSGRESSOR IS (SOMETIMES) HARD.—The Connecticut Association has just caused the prosecution and fining of seven men at Salisbury, in Litchfield county, for spearing black bass and pickerel in Twin Lakes. Game Protector Kidd, of Newburgh, has secured the punishment of John Garrison, of New Jersey, who has been dynamiting trout in Warwick Creek, in Orange county, N. Y.

"LINES CAST IN PLEASANT PLACES" was the title of a lecture delivered at a special meeting of the Massachusetts Fish and Game Protective Association last Tuesday evening by President Edward A. Samuels. The illustrations embraced over one hundred beautiful stereoscopic views of picturesque scenery and fishing incidents in Canada, and the talk was of the most delightful character.

FISHERY INDUSTRIES OF THE UNITED STATES.—We are indebted to the U. S. Commissioner of Fish and Fisheries for volumes II. to V. of the important work published by the Commission, on "The Fishery Industries of the United States." These volumes complete the publication and we shall have occasion to refer to them in detail in a subsequent number.

THE WARM WEATHER which came with such a rush last week started the fishing tackle trade with a vim. It has been a great time for fish talk, and dealers report that they have been hard pushed to fill orders.

NORTHAMPTON, Mass., May 13.—Some fine strings of trout have been caught in this neighborhood the past week.

SEINES, NETS of every description. American Net & Twine Co., Mfrs., 34 Commercial st., Boston, or 199 Fulton st., N. Y.—*Adv.*

"WHERE THE TROUT HIDE."*

THIS little book of 115 pages is printed on fine woodcut paper, and contains some excellent illustrations, among them several views of celebrated northern lakes and waterfalls. The writer treats the principal fishes of the angler's fauna in a graphic and rollicking style, not burdening himself with the requirements of scientific nomenclature or a discussion of the habits of the species. Black bass fishing in Lake Gogebic furnishes the opportunity for a vivid description of the endurance and *finesse* of the small-mouthed *Micropterus*, and for a comparison between the bass and the brook trout, in which the former is damned with faint praise in one breath and slandered in vigorous English immediately afterward. Similar treatment is bestowed upon the Rangeley Lakes for some reason unknown to us, and certainly not indorsed by many other anglers. The muscalonge of the Eagle waters comes in for a glowing tribute because of his agility and wonderful heroism.

The enthusiasm of the author culminates in his account of Lake St. John and its famous landlocked salmon, but while we grant the marvelous beauty of the region and the admirable qualities of its salmon, we cannot admit that this is "the only home of the peerless ouananish, the grandest game fish and the most prodigous warrior that plows fresh water." The perfection of angling and the intense gratification of taste and touch were enjoyed in the royal waters of Lac des Grandes Iles. Here the number, size, brilliant coloration and fighting qualities of the brook trout awaken another burst of enthusiasm. The charming view of Lac des Grandes Iles, which accompanies this chapter, is one of the most pleasing features of the book, fairly dividing honors with the illustration of Lake St. Joseph embellishing the account of Isle de Paradis. The trout fishing from this "island elysium" must be of a kind long to be remembered. Brief mention is made of lake trout fishing in Lake St. Joseph. In the closing chapter the sojourn in the wilderness will awaken the enthusiasm of every one who has ever dropped a fly or pulled a trigger.

The accompanying extracts will give a fair idea of the manner and method of this series of sketches. The mixed metaphors heaped upon the bass may spoil the author's luck when next he goes a-fishing.

"The black bass is a nobleman among the finny nobility. He is an aquatic terrier, tenacious as a bulldog, and a three-pounder on a light rod will fully compensate a man for a day's vexation. What a vicious break he makes when he rushes for the fly. * * He is a patrician among his species; an aristocrat worthy of honor and respect, and after the *Salmonidæ* he is the bravest inhabitant of the waters.

"There is no denying the fact that the black bass is a splendid fish, but in the finny race for leadership he is outclassed at all points by the trout.

"For the brook trout is crowned with the ineffable ensign of royalty—the red and the gold—and it reflects his nobility in greater magnificence than any living spectacle with which the Creator has gladdened the earth. * * *

"The black bass is a grand fish, an honor to the finny nation, but he should never be compared to the brook trout. The one is a thing of beauty and a joy forever, the other is a blackguard and a tough forever."

"The finny dwellers of the waters must possess a singular conceit, conceding that they are ever encumbered with any sort of a notion regarding the cyclopean phantoms living and moving up there on top of the mud.

"If a trout possesses meditative qualities—and if any fish does it surely must be the brook trout—he will be struck with amazement as, enjoying a tranquil siesta in a cool and shady brook, he observes an awkward, lumbering monument slowly approaching the water's edge, vainly endeavoring to be shrewd and sly about it.

"Suddenly, with a huge missile long and stout enough to sweep the waters of the brook aside, the monster projects the ponderous weapon upward and onward, as if endeavoring to close a vacuum in the surrounding atmosphere, and continues to repeat the outlandish proceeding *ad infinitum*.

"And the trout, having carefully observed these unique and inexplicable gyrations, does not remain there any longer. He knows a lovely shaded retreat some fourteen miles down the brook, and he proceeds to seek it with dispatch. * * *

"There is no recreation in which a man can engage that will bring an equal reward in renewed health like a day or a week wandering and wading along a woodland brook in quest of its trout. The water is as sweet and bright and pure as if the Woodland Queen had brought it direct from its source in a silver chalice. Where the stream broadens the angler's purpose broadens; where it is shoal he is careless; he understands its every ripple, its dark depths, its rocky undulations and its mad rushes; its lullaby haunts him forever."

*"Where the Trout Hide," by Kit Clarke. New York: Brentano's, 1889.

Fishculture.

MASSACHUSETTS TROUT SPAWNING.

WE have long believed that the brook trout on Cape Cod and vicinity extend their spawning season well into April and that the fishing should not begin as early as it does. In order to obtain fresh and reliable information on this subject we appealed to Mr V. N. Edwards, of Wood's Holl, Mass., a resident observer for the U. S. Fish Commission, and have just received the communications given below. These letters sufficiently indicate the necessity of exhaustive investigations in the same direction, and we hope the Commissioners and others interested in the protection and preservation of this valuable species will inquire to what extent this late spawning occurs and take measures warranted by the circumstances.

WOOD'S HOLL, Mass., May 10, 1889—*Dear Sir:* About two weeks ago I went to the trout stream at Waquoit and saw some large ones as well as small ones. A great many have been caught there this spring and sent to New York market. They never before were known to be so plentiful and so large as this spring. The fishermen say they are full of spawn until the middle of April. I wrote a letter to Henry Bartlett, who used to keep large numbers of big trout in an aquarium in his market. I had seen them spawning there, but had forgotten the time of the year. I inclose his letter. Yours truly, VINAL N. EDWARDS.

NEW BEDFORD, Mass., May 9, 1889.—*Mr. Vinal N. Edwards, Dear Sir:* The trout I had in my tank usually got through spawning by the middle of December, but some of the smaller ones were a little later. I dressed a trout three years ago, which was caught in Westport River, as late as the middle of April. This trout had a nice spawn and a number of ripe eggs ready to be dropped. Respectfully yours, H. BARTLETT.

It may be that this late spawning is limited to brook trout which have the sea-going habit; at any rate the suoject deserves careful investigation.

STRIPED BASS IN CALIFORNIA.—In 1885, when Mr. B. B. Redding and Mr. S. R. Throckmorton were commissioners of California fisheries, two lots of young rockfish or striped bass were brought over from New Jersey, the last shipment arriving in August. A number of the fish of various sizes have been caught every year since that time. About April 1, Inguglia & Co., of Clay street market, San Francisco, had at their stall a bass weighing 17lbs. besides some small ones weighing from 1 to 3lbs. A few days later the same firm exhibited a specimen 39in. long and 25in. in circumference, weighing 27lbs.; three smaller ones were shown with this large one. These fish were caught in nets near Vallejo. This locality furnished many smaller ones during part of March and April. It is estimated that the total annual catch does not exceed 700, and the scarcity is attributed to the Chinese methods of catching the young fish migrating to the ocean and drying them with other small fish for export to China. In Suisun and San Pablo bays this mischievous practice is said to flourish.

FOOD OF THE BULLFROG.—The large American bullfrog, (*Rana catesbiana*) has a varied diet of insects, fishes, batrachians, reptiles, birds, and even mammals. Professor Sedgwick, of the School of Technology, Boston, Mass., once had a very large frog in captivity, which used to eat not only frogs of other kinds, but also those of its own species. It was often given mice and English sparrows and would swallow them alive. I have found in the stomach of a large frog a young mud turtle, or painted tortoise, *Chrysemys picta*, half digested, and have seen at other times snakes in the stomachs of large specimens. I consider the bullfrog the most voracious of the batrachians.—S. T. DENTON (Washington, D. C.)

ENORMOUS YIELD OF SHAD.—On the 6th of May at three stations of the U. S. Fish Commission on the Potomac, Susquehannah and Delaware rivers, sixteen and one-half millions of shad eggs were taken, or about as many as were collected during the entire season of 1881. The total number of eggs secured to May 8 will be about 80,000,000. The distributing cars now carry 4,000,000 shad eggs at a time, starting with them when they are within two or three days of hatching. The effect of this wholesale work is evident in all the shad rivers. In 1879 the catch in the Potomac was 178,000; this season's yield, from present appearances, will be 500,000. Roe shad have been offered at retail in Washington as low as three or four cents per pound.

INTRODUCED SHAD IN GEORGIA.—Hon. H. G. Turner has forwarded to the U. S. Fish Commission two shad which were caught in a trap May 3, near Quitman, Georgia. The Withlacoochee River, from which they were obtained, flows into the Suwannee, which empties into the Gulf of Mexico about ten miles north of Cedar Keys. This is one of the streams stocked by the U. S. Fish Commission, and the shad gives promise of successful acclimatization therein. Both of the examples were males, the smaller 8½in. long, the larger 14in., and with the spermaries moderately developed.

AMERICAN FISHERIES SOCIETY.—The annual meeting of this society now in session in Philadelphia will be one of the most important in its history. From Mr. Henry C. Ford, the secretary, we learn that "The meeting promises to be the largest the American Fisheries Society has ever had. Nearly all of the different State Fish Commissions will be represented, with many prominent invited guests." This afternoon the society will be the guests of the Anglers' Association of Eastern Pennsylvania at a planked shad dinner at Gloucester, N. J.

"LA CARPE."—Under the above title M. Albert Le Play has written a treatise on recent methods in feeding and rearing the carp. The work is well recommended.

Camp-Fire Flickerings.

"That reminds me."

266.

I THINK I can beat "M. E. N." While out after partridge one fall I heard the sharp yip, yip, of a cur, and looking over my shoulder saw a partridge flying toward and behind me about four feet from the ground, and the dog not more than four feet from the bird, and both were doing their level best. Raising my gun to the shoulder, and whirling to face the bird I caught my feet in a vine, which threw me to the ground, causing my gun to explode, and when I awoke to sober consciousness I saw the bird fluttering on the ground and the dog running in an opposite direction, evidently astonished, and I know I was more than surprised. A.

The Kennel.

FIXTURES.

DOG SHOWS.

May 22 to 25.—Pacific Kennel Club Show, San Francisco, Cal.
Sept. 10 to 13.—Sixth Annual Dog Show of the London Kennel Club, at London, Ont. C. A. Stone, Manager.
Sept. 10 to 13.—Dog Show of the Central Canada Exhibition Association, at Ottawa, Can. Capt. R. C. W. MacCurdy, Secretary.
Sept. 11 to 13.—First Annual Dog Show of the Toledo Kennel Club, Toledo, O. T. B. Lee, Secretary.

Feb. 18 to 21, 1890.—Fourteenth Annual Show of the Westminster Kennel Club, New York. James Mortimer, Superintendent.
March 11 to 14, 1890.—Second Annual Dog Show of the Rochester Kennel Club, at Rochester, N. Y. Harry Yates, Secretary.

FIELD TRIALS.

Nov. 4.—Third Annual Field Trials of the Indiana Kennel Club. P. T. Madison, Secretary, Indianapolis, Ind.
Nov. 18.—Eleventh Annual Field Trials of the Eastern Field Trials Club, at High Point, N. C. W. A. Coster, Secretary, Saratoga Springs, N. Y.
Dec. 2.—Inaugural Field Trials of the Central Field Trial Club, at Lexington, N. C. C. H. Odell, Secretary, Mill's Building, New York, N. Y.
Dec. 16.—Second Annual Field Trials of the Southern Field Trial Club, at Amory, Miss. T. M. Brumby, Secretary, Marietta, Ga.

THE SPOTTING SYSTEM.

Editor Forest and Stream:

Whether the spotting system, as adopted by the Southern Field Trial Club, is right or wrong, time and experience will, doubtless, prove. I believe that with competent and fair judging (without which no system will do) this system, combined with the heat system and the time limit, constitutes the very best plan that can be put into practice at present. One thing, at least, is certain; viz.: That the heat system alone, based on the theory of constructive beatings, is essentially wrong and inconsistent with fair play and common sense. This fact needs no further proof than merely the application of the most ordinary reasoning faculties. Two good dogs are drawn together (as, strange to say, they generally are), and two poor ones also chance to come together. One of these good ones must go out in the first series, and one of the poor ones must go up to the next round, where the same thing may, and often does, occur again. That this is an evil surely no one will attempt to deny. That the Central Field Trial Club leaves it, at least, possible to remedy this evil, is certainly not out of the frying-pan into the fire.

It may be said that although a good dog may be knocked out in the first round by another good one, he still has a chance of being spotted or selected to run for second or third place under all of our field trial rules. This is only true provided the dog by which the unlucky dog was beaten wins first place, which makes his chances to get in again so remote that experienced handlers whose dogs, good or bad ones, get beaten in the first series, always consider them out of the race. The good one beaten in the first series becomes dependent on his conqueror's behavior, condition and (last but not least) on his luck for a chance to get into the stake again. This dog may have run a grand heat in the first series, and yet he may, and often does, go all to pieces or misbehave in the next or subsequent series. Is it fair, then, to consign the one beaten by grand work to further and hopeless defeat by inferior work? I think not. Therefore, I approve of the wise provision in the rules of the Central Club, which gives the judges power to place dogs on their merits, as shown by the work done, instead of obliging them to be governed by chance, bad conduct of a lucky competitor, or other unfortunate circumstances.

The spotting system is now and has been in practice under all the field trial rules that I am acquainted with, but only in such a manner as to deprive it of its full value. The judges of all the trials have been spotting or selecting dogs to compete for second place or to receive the award of third or fourth prizes. All have, therefore sanctioned and by using it, indorsed the spotting system, but it remained for the Central Club to advance to the application of the system in the broader and more comprehensive sense in which it proposed to use it. If the argument against this system applies to its use by the Central Club, then why should it not also apply to its use by other clubs. The fact that other clubs use this system of spotting at the close of their stakes instead of at the opening of them, does not, I think, make its use essentially different except in this particular.

By spotting at the start the judges are given power to correct more than to create evil, whereas I think the spotting at the end gives the same power to create and little, if any, power to correct evil.

Cases are cited where dogs ran poor heats in the first series and afterward proved themselves good dogs by doing uniformly good work, and cases where good work was done in the first heat by dogs that did indifferent work in subsequent heats. Most potent proof, I should say, of the great value of the spotting system properly applied, and of the wisdom of the rule of the Central Club, which requires their judges to consider a dog's work in all his heats. If a poor dog does good work in the first series, and consequently is overrated and passed into the next series, where he shows up in his true light, no harm is done by this error.

As the keen, expert judge will see and understand the case, he will want positive proof of inferiority, and rather than dismiss a good dog in the first series he will take chances of putting an indifferent one into the second series of heats. At least it is not only possible to do so, but probable that such work will be done under the new rules. On the other hand, under the old and weather-beaten system of constructive beatings, from beginning to end of a stake, where two good ones were drawn together, judges were left no other alternative than to dismiss one or the other, no matter whether the work done was good or indifferent. Now, do not all who hunt dogs and are familiar with their work know full well that the more brilliant a dog's best work is, generally the more remarkably bad his bad work is? By this rule, is not the least meritorious of a good brace almost certain to win a heat where both dogs are off and doing their worst work? It seems plain then that the system which would surely put the best dog of a brace out of the stake is not as good as that which would leave it possible to keep either or both dogs in till the true winner is discovered.

So far as the judges are concerned, I am satisfied that unfair or incompetent ones could do great wrong, despite any and all rules. I think no one will deny that the Central Club has done the very best that could be done to guard against trouble arising through their judges. They have selected those who are generally believed to be thoroughly competent, fair and impartial gentlemen; they announced their names before an entry was asked for. If the public do not approve of those judges they need not enter their dogs to be judged by them. If sportsmen and breeders at large do approve of those judges they will, no doubt, indorse them by making entries liberally. Other trials have been advertised, nominations have been made under the impression that so and so would judge, but when the fees were paid, the dogs on the ground and the owners absent, altogether different judges were sprung upon the handlers, who, ignorant of what their employers would have done under the circumstances, started the dogs often to their sorrow. I am not now trying to stir up bad feelings between the old clubs and the new one. I am simply trying to call attention to what many, others as well as I, believe to be facts, and for no other purpose than for the good of the cause to which, no doubt, those who may differ with me are as much attached and perhaps of far more consequence than I am.

I have little to say at present about the new departure of the Central Field Trial Club regarding the running of setters and pointers, alternating the days for each breed. I have given this proposed feature of the running very little study; but the argument against it, based on the point of endurance as tested at field trials, is no argument at all, to my mind at least, for the reason that trials as now conducted do not pretend to test endurance, and if they did pretend to do so, such pretension would be ridiculed by sportsmen in general.

I am pleased with the prospects of a trial that will reasonably test endurance, although I am not a believer in the doctrine of endurance testing to the extent of backing brilliant performers. I believe, though, that a dog of endurance should hold his pace, unslacked, for four or six hours, and that how much he would slow down between a short spin and a whole-day race should, with stayers, altogether depend on how they were fitted for the work.

Common sense shows that a dog that goes at the rate of ten miles an hour should require greater power to run ten hours than one that goes only two or three miles an hour. Yet I know that any level-headed dog will regulate his pace according to the length of time he is habitually required to work.

I believe, though, that some of the cracks will wisely keep out of any trial that will test their endurance, or rather expose their lack of it. On this subject, and in compliance with Major Murnan's kind request for my opinion, more anon.

LUKE W. WHITE.

SOME NOTED GREYHOUNDS.

NOW that there seems to be every prospect of coursing with greyhounds being introduced into the Eastern States, I have thought perhaps some of the readers of FOREST AND STREAM might like to know of some of those dogs which have made great names for themselves, and that a recital of some of their peculiarities and characteristics might not be altogether uninteresting. During the past ten years I have been in frequent correspondence with some of England's oldest coursers, and from their letters have gleaned such incidents as have served to while away for me most pleasantly many an hour.

In the present age of hurry-scurry, little attention has been paid to those happenings which are fraught with great interest to those who come after. A pleasing incident occurred just before Mr. Campbell's great Canaradzo, called sometimes "The King of the Whites," won the Waterloo. Just before the dog went into the slips, a gentleman approaching Mr. Campbell, asked him the meaning of the name, saying, "I don't find it put down in Johnson's Dictionary." "Isn't it?" replied the proud owner of the dog and the inventor of the name, "Well, if Canaradzo wins the cup to-day, you'll find his name in the next edition." He did in very truth win the cup, and although the name may never have appeared in the dictionary, it is so universally known among coursers that the absence is not felt. In his Waterloo in 1861 Canaradzo showed remarkably fine pace, fire and working form, commanded himself most beautifully, and was particularly determined and clever in closing with his hare. In this course he gave Faldenside (a rare good dog and brother to Crerer and Border Union) a terrible dressing, and only let Gilbert (by Weapon) get first turn by favor of the ground. His stock was inclined to be a bit quarrelsome and required a great deal of work. If they were bad of temper they were very bad, while if they were the reverse they were like the boy in the nursery tale, "very, very good." All his progeny showed fine pace and were very game.

One of Mr. Campbell's peculiarities was in the names he invented for his dogs, all of which began with the initial letter of his name. Some of them quite put one's jaw out of sockets to pronounce, as may be verified by struggling with Colcorxardo, Cararando, Calabaryono, Chiardona, Coodareena, Ciotoga (pronounced Kiotoga), etc. He was a bit superstitious about naming his own dogs himself, and without doubt was justified in it, for the only ones he did not name were Crested Lochiel and Carn-ye-by-Athol, both of which came to a bad end. It is greatly to be regretted that Mr. Campbell's advancing years caused him to retire from active coursing and so content himself with a few of his still marvelous breeding. His name will go down as one of the shining lights of the greyhound world, coupled with Scotland Yet and Canaradzo, the latter one who, besides his wonderful speed and cleverness, transmitted these qualities, which are especially apparent in his progeny both of the first and second generation, among which are found the notables: Spendthrift, Boanerges, Bab-at-the-Bowster, Contango, Litigation, Charmer, King Death (Waterloo, 1864), Cock Robin (second to Master McGrath, 1868, for Waterloo), Charming May, Chameleon (Waterloo purse, 1862), Wee Avon, and a score of other flyers.

Canaradzo was a beautiful dog, especially well formed in the ribs and outline of his back, and with his tail set on perfectly. Mr. Nightingale, who judged twenty-nine meetings in succession, and eighteen out of twenty-one Waterloos, in writing to a friend said of Canaradzo: "He had the particular point which settles all disputes in my mind as to a fast versus slow greyhound, viz., the proper description of loin. A broad, thick, vulgar loin denotes to a dead certainty a slow dog, that worst of all complaint in a greyhound. What is wanted is a well developed loin, not heavy, nor too long or weak, but growing finer and narrower from the middle to the couplings just as you see it in him." Of all the dogs that ever came under his judgment, Charming May was his especial delight, and he had her up to his bedside before the Waterloo to put her and as he said "give her a piece of good advice. She is nearly as pretty as her dam," he said, "and with that same curious dip behind the chine." Of the stock of King Cob, it seemed as if he could never speak enough praise, which he said "always ran so short and kept their backs up and their heads so well down." As to perfection and true characteristic greyhound head, that of Sunbeam realized all his ideas, and Sam quite captivated him with "his healthful style of running, so true, so clever, that you might ride for miles and miles after him and yet never see his nob."

The peculiar names given his dogs by Mr. Campbell had no significance in themselves, but those given by other coursers surely had, as evidenced in Mr. Jardine's Ladylike, whose whole deportment indicated the character she represented. She was a very smart one, and clever too with only just enough sense. If a hare chanced to go down hill she would follow her just far enough so as to stop herself at will, but if perchance she did miscalculate, she rectified her error by regaining lost ground at a pace that was simply marvelous.

Studying Oscar seems to have come honestly by his odd name and his actions in the field warranted his having been so-called. In one of his courses, which he won with much credit, one of the great judges while watching his cleverness in working his hare said, "Studying Oscar is in very truth studying coursing." He had a habit of placing himself right in the hare's line, thus verifying the old adage that "a cunning dog will throw you over, but it takes some sense to win a big cup."

British Lion was another worthy of his name both as to constitution and strength. His ability to stop or turn was the admiration of all who saw him run, and it is said he could stop on the side of a hill in two yards. His constitution was such that he could run well about every day, and whenever he was beaten he ran well and worked hard, this compelling his adversary to do his very best.

Go and Glory, one rough and the other smooth, the property of Mr. Geddes, were a rattling brace of greyhounds, in fact considered the fastest dog and bitch brace in any kennel in all Scotland. Go seemed to be a bit the faster of the two, while Glory, with beautiful action and working of her hare, gave a charming finish to the course.

It is upon the killing that Dr. Richardson's white and black dog King Death's fame principally rests, and some of his cross kills were simply beautiful to witness. He won the Waterloo in 1864, beating Rebe in the final. It was indeed death to any hare who felt his teeth, for when his jaws closed the scene ended.

Capt. Spencer's Sunbeam, a beautiful red dog, was a most charming dispositioned one, and fully realized the significance of his name. John Irvine, the trainer, found him a delicate dog to get into proper condition, as he was always a very light feeder. He had a soft, mild eye, and a head so small and beautifully formed that it might well have belonged to a bitch. A course over an open country suited him exactly, as he had a great antipathy to fencing, and would hardly face a gate. His speed was good, though nothing specially brilliant, but his work when he got well into it was not only very even but beautiful as well.

H. W. HUNTINGTON.

[TO BE CONCLUDED.]

RUSSIAN WOLFHOUNDS.

Editor Forest and Stream:

Your indefatigable and always interesting correspondent W. Wade in his article "Russian-Siberian-Circassian Wolfhounds or Greyhounds" claims that "we really have no breed of dogs thoroughly suited for the purpose of following a handsome span of horses or a lady on horseback," and he is of opinion that the Siberian wolfhound would fill this want. I do not want to dispute this point with Mr. Wade, but on the contrary wish him luck and profit on his venture in importing some specimens of that breed, but merely want to differ with him on his assertion that for the above purpose there is no other suitable dog. To my taste the Great Dane is as stylish an animal as any lady or cavalier could wish to take along on a ride or a drive, and he can outrun any horse and jump as well. Besides, he is the largest breed known, and this alone would make him fashionable at a time when size is considered a main attraction. The Great Dane is faithful to his master, indifferent, even unfriendly, to stranger's and a first-class watch and guard dog, what more could be wished for?

The Great Dane travels in America under so many different names that for the uninitiated it is difficult to know which is which. Even I in speaking of Great Danes do not correctly express what I mean, but I use the word in its accepted meaning in the United States. What I mean is the Ulmer dogge (also called Deutsche dogge), an animal similar to the Dänische dogge, but larger and heavier than the latter. It would be well for American shows to have distinct classes for the German and for the Danish breed, as it is an injustice that the smaller species should be compelled to compete with the larger. Some years ago a correspondent in your columns proposed to have it settled in the above manner, and do away with all the other misleading names as: Siberian bloodhound, German mastiff, German boarhound, etc., but at the time his suggestion was not favorably received; perhaps there was not sufficient interest in this class of dogs. Now, however, they are rapidly gaining favor in fashionable circles, and breeders are turning their attention to them, and, therefore, I believe the time has come to do away with all confusion and distinguish the German dog from the Danish, and altogether drop the other erroneous names. Some of the daily papers have inaugurated a new sport, so-called beauty contests; how would it be for you to take votes on the popularity of the different breeds of dogs *de luxe*? I vote for the English mastiff, on account of his affectionate nature, reliable temper and his companionable manner, coupled with the greatest strength and highest courage.

GEORGE H. KRETZ.

NEW YORK.

Editor Forest and Stream:

Since writing the article on the above that appears in your issue of the 9th inst. (which I wrote nearly two months since), I have learned that I was mistaken in supposing that Mr. Hacke's two dogs were sire and son. So the inference as to uniformity of type in the breed is not as strong as I supposed.

W. WADE.

THE ENGLISH FIELD TRIALS.

THE fifteenth spring field trials of the English Kennel Club were ran at Worksop, England, April 30 to May 2. There were 94 nominations for the Derby with 17 starters, 9 pointers and 8 setters. The winning pointers were:

First, Banco of Brussels (O. Morrel), orange and white dog, Jan. 3, 1888 (Master Bang Bang—Lorna Doone of Kippen).

Second, Dodona (Duke of Portland), liver and white bitch, Feb. 20, 1888 (Kent Cob—Magpie).

Third, Rene R (Rev. W. J. Richardson), liver and white dog, Feb. 10, 1888 (Byrsa—Regent of Milton).

SETTERS.

First, Trip of Kippen (F. C. Lowe), liver and white dog, Jan. 17, 1888 (Tutsham Trip—Dido).

Second, Blossom of Halesworth (C. Bishop), black and white bitch, April 28, 1888 (Pride of the Hillside—Essex Belle).

Third, Aldon Trip (F. Warde and C. Gibbs), liver and white dog, April 23, 1888 (Tutsham Trip—Penelope).

Absolute winner, Trip of Kippen.

ALL-AGED STAKES.

For pointers or setters (limited to 16); the winners were:

First, Polities (Sir T. B. Lennard), liver and white pointer dog (Priam—Duchess).

Second, Drogheda (C. C. Ellis), red Irish setter dog (Frisco—Grouse II.).

Third, Blue Maid of Cranfield (H. Harter), black, white and tan English setter bitch (Ranging Aaron—Little Bess).

Fourth, Belle des Bordes (P. Caillard), liver and white pointer bitch (Young Bang—Polly).

DISTEMPER.—Hulton, Pa., May 9.—*Editor Forest and Stream:* I have a litter of two months old mastiffs with distemper. They have never been out of the kennel yard, into which no other dogs are admitted. I can only account for the disease by a distempered dog having been put in the same range of kennels in the latter part of February. After this distempered dog's removal, the kennels were thoroughly cleaned out, but not disinfected, although all bedding was burned up. I had no idea that the contagion could retain its potency for nearly three months. Is this usual? Is there any more effective disinfectant than burning plenty of sulphur in the kennels while they are tightly closed?—W. WADE. [The poison of distemper retains its vitality for a long time; just how long has never been satisfactorily determined. It is claimed by many that the germs of the disease can be conveyed through the air for quite a distance, and our experience leads us to believe that this is true. A thorough cleaning and fumigation with sulphur will undoubtedly disinfect the kennel.]

AMERICAN FOX HUNTING.

NEW HAMPSHIRE STYLE.

THE morning was clear, cool and frosty; such an one as comes only in the month of October, to the hunter the pleasantest month in all the year. All the necessary preparations had been made the evening before, when we had decided to go to the Big Pasture, a large tract of rough hilly country, partly cleared pasture land with several hemlock thickets, where partridges made their homes and foxes had several burrows and annually reared their families. We started long before daylight, reached the desired locality just at sunrise, and selecting our stands on old established runways, let the dog loose, expecting every moment to hear him open on a fresh scent, as we seldom failed to start a fox in those thickets. On this occasion we were doomed to draw a blank, for after about two hours' of diligent hunting the hound came back to his master, and with numerous wags of his tail and a disappointed look in his intelligent eye as he gazed squarely in his master's face, seemed to say: "I have hunted diligently for two hours, but no trace of a fox can I find." It was then determined to go two miles further to another locality, and try our luck there. When we reached the promised land it was 10 o'clock. Again we gave the hound his liberty, and three minutes later he opened on a rather cold trail, which he worked diligently for nearly an hour, when he stopped barking, and we heard no more of him for a long time.

We had decided to start for home, when, hark! that is him coming straight toward us. He had jumped a fox at last, and we felt sure of a shot. Not so, however. The fox when within twenty rods of me, but not in sight, turned squarely to the right and started for the mountain two miles away. Of course we followed, and reached the summit just in time to see reynard start for the next mountain, where he threw the hound off; and the sun was not more than one hour high when, having secured the hound, we in no very enviable frame of mind started for home, six miles away. I arrived there after dark, and rather sullenly ate supper and retired, determined not to go fox hunting again that season.

We poor mortals sometimes change our minds, however. It seemed as though I had not been asleep more than half an hour when I heard blood-curdling sounds. It is the rebel yell, accompanied by the rapid firing of a ten-gun light battery, and mingled with the roar are the clash of sabres and the groans of the wounded. As I sprang from bed the same sounds were repeated, but now very much changed. The firing of the battery was only my friend H. thumping with his brawny fists on the side of the house near my bedroom window, and the much-dreaded yell was his eager voice calling to me, "Git up, git up, quick! There is a fox over in Squire Lane's bushes and we want him." The eager whine of the anxious hound and clank of his chain was what I at first thought to be the clash of sabres and groans of wounded.

"I cannot go," I answered. "I was out all day yesterday and must attend to business to-day."

The answer came promptly, "I must be back by 8 A. M., sure; come on."

I dressed hastily, and without waiting for breakfast caught up gun and shooting coat and joined H. in the yard, and we were soon on the way to Lane's bushes, where we arrived before daylight, and turning the dog loose awaited developments. We had not long to wait, for we had hardly reached the runway between two thickets, H. about six rods ahead of me, when the hound opened on a fresh scent and came directly toward me. It was not light enough to see the fox, so I had to let him pass, but H. emptied his 10-gauge in the general direction of the fox, but not a hair did he touch. The chase led straight for a large hill a mile away, and I put on all steam for a favorite stand, where a stone wall crossed a rough ledge, hoping to get there before the fox left the hill, where he usually circled several times. I was within twenty rods of the coveted position, and in plain sight, when reynard mounted the very stone behind which I proposed to stand, and turning to look for his pursuers saw me, and with one switch of his big tail started for the next hill a mile away. It was now sunrise, and a splendid morning with clear, cool, bracing air, and a heavy white frost, equal to a light snow for tracking, and by some considered better than a snow for fox hunting.

Arriving near the summit of the hill, around which the fox circled several times, we selected the most promising stands, and here only a few minutes later, H. emptied his gun at long range and scored another clean miss. I had several good views of the fox, as he crossed open ground just out of shotgun range, with those long graceful easy bounds that I have never seen equalled in any other animal.

When watching them I have often thought that their movements resembled the uncoiling of a spiral spring. When about to make a bound, we see the body shortened to its utmost capacity, nearly the whole weight thrown on the hindfeet; then the fore parts rise gracefully, and then we see the force of the spiral spring, which, commencing in the forefeet, extends up through the muscular back and ends with the hindfeet. The spring commencing to uncoil at the shoulders and throws forward the whole body, the last and strongest impulse being given with the hindfeet. The animal shoots forward, and striking on the forefeet the spring is compressed for the next bound.

We followed on from hill to hill until nearly night without getting another shot, the fox leading toward the rough side of the mountain, where we would not care to follow. He had led us quite near the foot of the mountain, when he concluded to circle and double several times in a large patch of thick and tangled sprouts.

Taking advantage of the time spent by the fox in the thicket, I rushed for a well-known stand between the thicket and the foot of the mountain, where two stone walls crossed each other at right angles not forty rods from a large stand of farm buildings. I was too late, for when within about twenty rods of the coveted stand and in plain sight, reynard, with a light bound, landed lightly on the topmost stone, and casting one hasty glance at his pursuer, who was pushing him hard, started up across the orchard toward the mountain at a speed which would soon take him to a place of safety. I watched him with that disappointed feeling known only to hunters when they see their prey just out of reach. Then I wished for the old muzzleloading rifle that had in former years stopped many a fox. The next moment I heard a roar like that of a light field piece, and saw the fox turn a somersault, give a few convulsive kicks, and his chicken stealing days were over. I started for the fox to claim him as my property, but the hound reached him first and entered first claim, a moment later and on the run came a short stout red-faced boy, perhaps 16 years old, and in his right hand he held an old Queen's arm still smoking from the heavy charge that had made the still heavier report, but when he saw the threatening attitude of the hound he concluded not to enter his claim for the trophy but quietly awaited my coming.

I soon settled the difficulty by giving two new quarters to the boy, who, with a hearty "Thank you!" and a broad grin, accepted them. With the long gun in his right hand and the money in his left hand, he was soon out of sight in the barn, not thirty rods away.

I had nearly finished skinning the fox when H. came along and commenced to ask questions and offer his congratulations. In nearly the same breath he remarked that it seemed very extraordinary that my little light 20-gauge could make such a report, and after looking at the half dozen ugly-looking holes in the beautiful skin, he insisted that I must be using much larger shot than I had claimed. He would not be satisfied until I removed the shell from my gun and he with his pocket knife had lifted out the top wad and seen ¾oz. of No. 2 shot. I have been not a little amused since to have him tell to some rather skeptical listeners of the deafening report of my little gun, and what horrid holes No. 2 shot will sometimes make. R. S. F.

EASTERN FIELD TRIALS CLUB DERBY.

THE entries for the annual Derby of the Eastern Field Trials Club closed May 1 with 58 nominations, 40 setters and 18 pointers. All were whelped in 1888.

ENGLISH SETTERS.

ALCE (P. Lorillard, Jr., Tuxedo, N. Y.), lemon and white dog, Aug. 7 (Cassio—Allie James).

AMORET (P. Lorillard, Jr., Tuxedo, N. Y.), black and white bitch, Aug. 7 (Cassio—Allie James).

ANNIE F. (Memphis & Avent Kennels, Memphis, Tenn.), black and white bitch, Jan. 6 (Roderigo—Juno A.).

ARMADA (E. W. Durkee, East Patchogue, L. I., black and white bitch, July 22 (Roger—Chintz).

BELMORE (John White, Bridgeport, Conn.), black, white and tan bitch, June 16 (Regent—Belle of Bridgeport).

BLUE RIDGE (E. Dexter, Boston, Mass.), blue belton dog, April 22 (Count Noble—Belle of Piedmont).

BESSIE M. (C. E. Metzger, Harrisburg, Pa.), liver, white and tan bitch, May 11 (Count Noble—Fate Gladstone).

CLOCHETTE (P. Lorillard, Jr., Tuxedo, N. Y.), black, white and tan bitch, Feb. 3 (Roderigo—Lavalette).

CON (H. Merriam, Weston, Mass.), black, white and tan dog, Sept. 25 (Pan—Nellie Noble).

COUNTESS RUSH (R. V. Fox, Harrisburg, Pa.), black, white and tan bitch, April 22 (Count Noble—Belle of Piedmont).

COUNT V. (J. I. Case, Racine, Wis.), blue belton dog, May 15 (King Noble—Queen Vashti).

DAISY WIGTON (J. O'H. Denny, Pittsburgh, Pa.), lemon and white bitch, February (Count Noble—Daisy Queen).

DAN GLADSTONE (W. T. Coppedge, Stanton, Tenn.), black, white and tan dog, March 14 (Gladstone's Boy—Flame).

DEE (J. I. Case, Racine, Wis.), black, white and tan bitch, July 18 (King Noble—Elsie Belton).

DENVER (E. F. Thomas, Denver, Col.), black, white and tan dog, May 23 (Bridgeport—Miss Elsie).

DRACO'S MARK (B. Crane, Chicago, Ill.), black, white and tan dog, April 30 (Roderigo—Princess Draco II.).

FANNY M. (Dr. J. N. Maclin, Mason, Tenn.), black, white and tan bitch, March 14 (Gladstone's Boy—Flame).

HARRY C. (Memphis and Avent Kennels, Memphis, Tenn.), black, white and tan dog, June 10 (Roderigo—Countess House).

KING LEO'S LAD (E. F. Thomas, Denver, Col.), black, white and tan dog, Aug. 24 (King Leo—Floy Gladstone).

LADY CATHERINE (E. W. Durkee, East Patchogue, L. I.), black, white and tan bitch, July 22 (Roger—Chintz).

LADY NOVICE (Jos. Lewis, Cannonsburg, Pa.), black, white and tan bitch, April 30 (Paul Gladstone—Dashing Novice).

LATH (F. R. Hitchcock, New York), black, white and tan dog, April 7, (Cassio—Allie James).

LETTY LYNN (Memphis and Avent Kennels, Memphis, Tenn.), black, white and tan bitch, June 10 (Roderigo—Countess House).

LETTY BURGES (G. N. Whiteley, Helena, Mont.), orange and white bitch, June 29 (Gath's Mark—Esther).

MONTICELLO (E. Dexter, Boston, Mass.), blue belton and tan dog, April 22 (Count Noble—Belle of Piedmont).

NANNIE B. (J. I. Case, Racine, Wis.), lemon belton bitch, May 15 (King Noble—Queen Vashti).

NOBLE GLADSTONE (J. R. Henricks, Pittsburgh, Pa.), black, white and tan dog, February (Count Noble—Countess Gladstone).

NOBLESSE GLADSTONE (J. R. Henricks, Pittsburgh, Pa.), black, white and tan bitch, February (Count Noble—Countess Gladstone).

PARSON BROWNLOW (B. Crane, Chicago, Ill.), black, white and tan dog, April 30 (Roderigo—Princess Draco II.).

PAUL DOMBEY (Memphis & Avent Kennels, Memphis, Tenn.), black, white and tan dog, Jan. 6 (Roderigo—Juno A.).

PAUL NAVIS (J. O'H. Denny, Pittsburgh, Pa.), black, white and tan dog, April 30 (Paul Gladstone—Dashing Novice).

QUADROON (P. Lorillard, Jr., Tuxedo, N. Y.), liver and white bitch, Feb. 3 (Roderigo—Lavalette).

ROD'S LADY (A. M. Hildebrandt, Chicago, Ill.), black, white and tan bitch, July 16 (Roderigo—Guy Gladstone).

ROWDY ROD (Memphis & Avent Kennels, Memphis, Tenn.), black and white dog, Jan. 6 (Roderigo—Juno A.).

ROYAL C. (Memphis & Avent Kennels, Memphis, Tenn.), black, white and tan dog, June 10 (Roderigo—Countess House).

SAM (J. I. Case, Racine, Wis.), lemon and white dog, May 8 (King Noble—Cricket).

THEODOSIA (W. T. Townes, Danville, Va.), lemon and white bitch, May 6 (Dick Gathmark—Dashing Lady).

U. S. DAN (Memphis & Avent Kennels, Memphis, Tenn.), black, white and tan dog, Jan. 6 (Roderigo—Juno A.).

ZULU (J. I. Case, Racine, Wis.), black, white and tan dog, May 1 (King Noble—Nellie Belton).

IRISH SETTERS.

GARRYOWEN II. (G. H. Covert, Chicago, Ill.), red dog, Jan. 4 (Avondale—Dora).

POINTERS.

A. C. (Col. C. H. Odell, New York), orange and white dog, April 5 (Bang Bang—Lalla Rookh).

B. D. (Col. C. H. Odell, New York), orange and white bitch, April 5 (Bang Bang—Lalla Rookh).

CONCAVE (Luke W. White, Thomasville, N. C.), lemon and white bitch, Aug. 10 (Consolation—Graceful).

CONVEX (Luke W. White, Thomasville, N. C.), liver and white dog, Aug. 10 (Consolation—Graceful).

FLIRT (O. W. Donner, Boston, Mass.), liver and white bitch, April 8 (Mainspring—Merry Legs).

HOCKANUM (R. C. Cornell, New York), lemon and white dog, June 6 (Match—Lill).

KIPPENCLIFF (Lebanon Kennels, Lebanon, Pa.), liver and white dog, Feb. 13 (Naso of Kippen—Virginia).

LAD OF BANG (J. B. Wallace, Ansonia, Conn.), liver and white dog, August (Lad of Bow—Lady Belle).

LADY TAMMANY (F. E. Lewis, Tarrytown, N. Y.), liver and white bitch, June 15 (Tammany—Juno).

MAY (J. P. Swaine, Jr., Bronxville, N. Y.), liver and white bitch, May 4 (Mainspring—Fly).

MIKE (J. P. Swaine, Jr., Bronxville, N. Y.), lemon and white dog, May 4 (Mainspring—Fly).

NYE (Lebanon Kennels, Lebanon, Pa.), liver and white dog, Feb. 13 (Naso of Kippen—Virginia).

RIP RAP (E. Dexter, Boston, Mass.), white and black ticked dog, May 20 (King of Kent—Hops).

SAMOA (N. W. Simpkins, Danville, Va.), liver and white dog, Feb. 28 (Randolph's Guy—Rita Croxteth II.).

SCOUT II (E. H. Haight, Allaire, N. J.), liver and white dog, June 29 (Dexter—Volunteer).

SING SING (E. Dexter, Boston, Mass.), white and blaak ticked dog, May 20 (King of Kent—Hops).

TORY TANNER (F. R. Hitchcock, New York), liver and white dog, May (Naso of Kippen—Kate VIII.).

TOUGH NUT (Col. C. H. Odell, New York), liver and white dog, Aug. 10 (Consolation—Graceful).

BLEMTON VERITY.—Philadelphia, May 11.—*Editor Forest and Stream:* The protest entered against the Blemton Kennels' fox-terrier Verity by the Hillside Kennels was not sustained after an examination by the club's veterinary. —FRANCIS S. BROWN, Sec'y.

DOG TALK.

THE report of the Boston dog show in the London *Fanciers' Gazette*, presumably written by the judge, Mr. Gresham, has this to say of some of the breeds: "The spaniels disappointed us. Messrs. Oldham and Willey's lot were decidedly the best, but Glencairn, who has lately been imported by them, was quite the best. We could not help noticing that most of the exhibits were short and stumpy in head and that only a few had the correct texture of coat. So far our neighbors across the water cannot compete with us in spaniels. The cockers were the best classes. * * * The beagles were good classes, superior as a lot to anything we have in England, better in legs and feet, and showing more hunting-like properties. Small ones, such as have sometimes won prizes, were evidently not finding favor in the United States. * * * Passing on to the collies, we found one of the finest teams in the world, consisting of Mr. Mitchell Harrison's lot. * * * The fox-terriers were a feature of the show, some very good animals putting in an appearance from the kennels of Mr. August Belmont, Jr., Mr. John E. Thayer, and the Messrs. Rutherford." The report has a good word for the management which, it says, in some respects is superior to that of English shows, particularly the arrangements for judging.

Mr. F. R. Hitchcock, who is now in England, has purchased the pointer bitch Gem of Kippen, winner of second at the National field trials last month. The *Fanciers' Gazette* says: "Mr. Hitchcock will also take out with him Mr. Fred Lowe's English setter, Trip of Kippen, who won the field trial Derby at Welbeck this week. This was a great performance for the son of Tutsham Trip and Dido, as he not only was first in the trials for the best setter, but beat Banco of Brussels, who was first among the pointers, and who has never before had his colors lowered at any field trials. Trip of Kippen is to be run in the puppy stakes in America as the joint property of Mr. Hitchcock and Mr. Fred Lowe, and as he has plenty of time before him, the trials taking place there in the fall of the year, he will have become accustomed before then to American habits. We shall be surprised to hear that he does not acquit himself well, as he is descended from one of the best strains in this country for getting field trial winners, which, after all, is of much more importance than breeding sporting dogs for looks, which is too much the custom over here."

A friend said recently: At a house where I often called, they had a Caniche puppy of which they were both proud and fond. The little creature took sick not long ago, and on the occasion of one of my visits was reported to be very low. When I was next at the house I inquired after the puppy, and learned that it had died. On the evening before its demise the whole household were anxious and sad, and it was determined that the waiter man should sit up all night with the puppy. He was accordingly called up and received his instructions. As he was turning away, a thought seemed to strike him and he turned back and asked, "If she passes away during the night, ma'am, shall I put her in the ash barrel?"

We learn that an Ottawa Clumber man has lately purchased in England the champion Clumber spaniel dog Boss III., and he is expected to arrive there shortly. The well-known winners Bromine and Snow may travel in the same direction this summer also. The Ottawaites appear to be bent upon maintaining their position at the head of Clumber affairs. The Clumber classes at the coming Ottawa show in September promise to surpass by far, both in the number of entries and in general excellence, all that have previously been got together in America.

We are pleased to note that the unfortunate clash of dates of the Southern and Central Field Trial clubs has been amicably arranged, as will be seen by the dispatch from Mr. Brumby, the secretary of the Southern Field Trials Club. The date for their meeting is fixed for Dec. 16. This will give ample time for those who wish to attend both meetings. Entries for the Southern Derby will close June 1. The address of the secretary is T. M. Brumby, Marietta, Ga.

The Southern California Kennel Club was organized at Los Angeles, Cal., May 1. Many of the prominent dog men of southern California have already joined the association. Following is a list of its officers: President, Mr. H. T. Payne; Vice-Presidents, Messrs. J. F. Holbrook and J. E. Preston; Secretary, Mr. J. J. Hanford; Treasurer, Mr. E. B. Tufts. Application has been made for membership in the American Kennel Club.

We are sorry to learn that Mr. H. W. Huntington intends to retire upon his laurels and will dispose of his entire kennel of greyhounds. Here is an opportunity for some fancier of the breed to secure the finest leash of longtails in this country. Champions Balkis and Cassandra and the young dog Highland Chief have won some 75 prizes between them. Mr. Huntington informs us that they are all in capital condition.

There are 58 nominations for the Eastern Field Trials Club Derby, two less than last year. The setters number 40, ten more than last year, while the pointers only muster 18 as against 30 last year. This is quite a falling off in the pointer division. Can it be true that the pointer breeders are getting discouraged?

The Keystone Kennels, Pittsburgh, Pa., have received from Miss Anna H. Whitney, Lancaster, Mass., the St. Bernard bitch Warwick Abbess, recently imported from England, she is by Duke of Wellington and out of Lady Eva.

Miss Anna H. Whitney, of Lancaster, Mass., has purchased from Mr. J. W. Gould, Hull, Eng., the St. Bernard dog Sir Herbert. He was whelped April 20, 1887, and is by Phinlimmon and out of Queen Jura.

Entries for the third annual Derby of the Indiana Kennel Club close June 1. The address of the secretary is P. T. Madison, Lock Box 4, Indianapolis, Ind.

Miss Ida F. Warren, of Leicester, Mass., has recently received from London, Ont., the fox-terrier dog Vassar, believed to be a future winner.

The summer show of the English Kennel Club will be held at the Olympia, Kensington, London, July 9 to 13.

We are informed that Mr. E. M. Oldham intends to take a team of spaniels to the San Francisco show.

The Rochester Kennel Club claim the dates March 11 to 14, 1890, for their second annual dog show.

The English Bulldog Club will hold its annual show in London, May 29 to 31.

THE SOUTHERN FIELD TRIALS.

[Special to Forest and Stream.]

MARIETTA, Ga., May 14.—The Southern Field Trial Club have decided to change their date of running and will run their trials at Amory, Miss., commencing Monday, Dec. 16. Entries will close June 1.

T. M. BRUMBY, Sec. and Treas.

EASTERN FIELD TRIALS CLUB.

THERE was no quorum at the meeting of the Board of Governors of the Eastern Field Trials Club on Tuesday. The views of those present were embodied in the following resolution, which was sent to the members of the Board who will vote on the question and return to the secretary.

Resolved, That the Eastern Field Trials Club invite its sister organizations or clubs, viz., the American Field Trial Club, Indiana Kennel Club, Southern Field Trial Club and Central Field Trial Club to organize a Champion Sweepstake of $100 each to be run after the close of their respective meetings, at such a time and place and under such rules as may hereafter be agreed upon. Such stake to be open to all first prize winners of any open or local champion stake previously held, and that each brace, in said stake, of competing dogs shall occupy not less than half a day or 4 hours of continuous running. And that such stake be run under the management of a Board consisting of one representative from each association, who shall agree upon all judges, rules, and the interpretation of the same, and that in case such stake be established by mutual consent, the Eastern Field Trials Club will abandon their champion stake and donate the sum of $200 as their share of the stake and expenses provided an additional sum of $300 be subscribed by the other associations.

TOLEDO DOG SHOW.

TOLEDO, Ohio, May 13.—*Editor Forest and Stream:* As has been announced the Toledo Kennel Company will give their first annual bench show Sept. 10 to 13. The show will be held in the Art Building on the Tri-State Fair Grounds. Mr. John Davidson will judge the sporting classes, and Mr. Harry W. Lacy will judge the non-sporting varieties. We deeply deplore the conflict of dates with our neighbors London and Ottawa, but unfortunately we are situated exactly as they are, and must give our show that week or not at all. While this may tend to decrease the number of entries somewhat, still with liberal classifications, supplemented by a large special premium list, competent judges, good accommodations, and the promise of the right kind of treatment to visitors, we expct to make this, our first effort, a fairly successful one. THOS. B. LEE, Sec'y.

KENNEL NOTES.

Notes must be sent on prepared blanks, which are furnished free on receipt of stamped and addressed envelope of large letter size. Sets of 200 of any one form, bound for retaining duplicates, are sent for 30 cents.

NAMES CLAIMED.

☞ **Notes must be sent on the Prepared Blanks.**

Bosco. By Eberhart Pug Kennels, Cincinnati, O., for silver fawn pug dog, whelped March 1, 1889, by Boycott (Duke—Bonnie) out of East Lake Virgie (Bradford Ruby—Puss B.).

BRED.

☞ **Notes must be sent on the Prepared Blanks.**

Silver Queen—Gilderoy. G. W. Felton's (Barre, Mass.) collie bitch Silver Queen (Scot's Guard—Midlothian Lassie) to C. C. Abbe's Gilderoy (champion Charlemagne—Hasty), April 25.

Beauty II.—Gilderoy. G. W. Felton's (Barre, Mass.) collie bitch Beauty II. (Victor Hugo—Gypsie) to C. C. Abbe's Gilderoy (champion Charlemagne—Hasty), April 25.

Tyzah's Daisy—Gilderoy. C. C. Abbe's (Springfield, Mass.) collie bitch Tyzah's Daisy (Gaffa—Tyzah II.) to his Gilderoy (champion Charlemagne—Hasty), March 30.

Warwick Abbess—Macgregor. Keystone Kennels' (Pittsburgh, Pa.) St. Bernard bitch Warwick Abbess (Duke of Wellington—champion Lady Eva) to H. H. Woolverton's Macgregor, March 15.

Juno—Meinrad. A. Messner's (Pittsburgh, Pa.) St. Bernard bitch Juno (Bonivard— ——) to Keystone Kennels' Meinrad (champion Hermit—Nun), Feb. 9.

Madchen—Meinrad. Keystone Kenuels' (Pittsburgh, Pa.) St. Bernard bitch Madchen (Alp II.—Sombre) to their Meinrad (champion Hermit—Nun), Feb. 12.

Lasse—Meinrad. Mr. Whitehouse's (Pittsburgh, Pa.) St. Bernard bitch Lasse (Rector— ——) to Keystone Kennels' Meinrad (champion Hermit—Nun), March 4.

Princess A.—Meinrad. Keystone Kennels' (Pittsburgh, Pa.) St. Bernard bitch Princess A. (champion Apollo—Princess Louise) to their Meinrad (champion Hermit—Nun), April 10.

Jura - Meinrad. C. A. Painter's (Pittsburgh, Pa.) St. Bernard bitch Jura (Perro—Alpina) to Keystone Kennels' Meinrad (champion Hermit—Nun), April 21.

Lady Dido—Bradford Harry. W. D. Reid's (Elmira, N. Y.) Yorkshire terrier bitch Lady Dido (Prince—Flora) to P. H. Coombs's Bradford Harry (Crawshaw's Bruce—Beal's Lady), April 12.

WHELPS.

☞ **Notes must be sent on the Prepared Blanks.**

Woodland Queen. James Luckwell's (Woodstock, Ont.) cocker spaniel bitch Woodland Queen (Tippo—Woodstock Queen), May 7, seven (four dogs), by J. P. Willer's Obo II. (Obo—Chloe II.).

Lady Stanley. Geo. Douglas's (Woodstock, Ont.) cocker spaniel bitch Lady Stanley (Robin—Fretyie), May 9, seven (three dogs), by James Luckwell's Black Duke (Obo II.—Woodlawn Queen).

Black, white and tan foxhounds, nine dogs and four bitches (pedigree not given), by Rokeby Hunt, Barrytown, N. Y., to E. P. Rogers, Hyde Park, N.Y.

DEATHS.

Mars. Black, white and tan beagle dog, whelped April 3, 1886, by Lee out of Venus. Owned by F. McKie Thayer, Colorado Springs, Col., May 3. Run over by cars.

KENNEL MANAGEMENT.

☞ **No Notice Taken of Anonymous Correspondents.**

V. K., Michigan.—A seven year old pointer dog was very fleshy last summer and was troubled with sores on his legs that would irritate him so he would continually bite them. During the fall these sores healed but went to his paws and seemed to irritate him in the same way. Will you kindly advise what is the probable cause, and what can be done to cure same? Ans. Bad condition, obesity. By keeping the bowels free by means of salts or oil, by proper amount of exercise and judicious feeding, the dog should come around all right. Give five drops of Fowler's solution of arsenic morning and evening in the food.

Rifle and Trap Shooting.

RANGE AND GALLERY.

WORCESTER, Mass., May 10.—The Emmet Guards of this city, Co. E, 9th Regt. Mass. Vol. Mil., had yesterday their second anniversary field day, followed by a banquet. At the target shoot the military rifle was used, the shooting was off-hand, distance 200yds. Each man had 5 shots, with a possible 25. The work of each follows:

Qualified Marksmen.

GARDNER, Mass., May 9.—At the last regular meet of the Gardner Rifle Club, at Hucknatack range, the standard target was used. The shooting was off-hand, distance 200yds. The work of each man in detail follows:

G F Ellsworth	6	10	10	8	10	9	10	10	8	–91	
	8	8	9	9	10	9	7	9	9	9	87
	8	8	8	4	10	10	7	8	10	6	79 – 257
W C Loveland	10	7	10	6	10	10	6	9	7	7	–85
	9	6	7	9	10	8	5	8	8	5	–75
	7	7	8	8	8	10	10	9	9	7	–80 – 240
A E Knowlton	6	8	10	8	10	10	9	7	7	6	81
	9	10	7	8	4	6	10	7	7	10	–78
	9	6	8	6	8	7	8	10	10	7	79 – 238
F B Edgell	5	5	8	5	6	8	7	8	9	5	–68
	5	9	5	6	9	9	7	5	7	7	–69
	10	8	7	9	9	9	7	5	7	7	84 – 221
C N Edgell	7	8	8	5	7	10	6	9	9	4	–71
	9	7	5	9	10	10	6	8	6	6	–76
	9	6	7	7	7	7	10	5	8	6	–73 – 220
J H Jenkins	7	8	7	5	5	5	8	6	4	4	–69
	9	10	7	6	8	8	7	8	6	5	–74
	10	5	6	7	7	4	8	8	8	8	–69 – 212

The several practice scores resulted as follows:

G F Ellsworth	9	10	7	6	10	10	6	7	10	7	–82
	8	7	10	11	9	10	8	6	8	9	–85 – 167
C N Edgell	5	8	8	9	8	9	9	7	8	6	–80
	10	7	7	9	10	9	10	6	8	5	–84 – 164
A E Knowlton	7	8	9	8	8	6	10	7	6	9	–78
	8	7	9	9	9	8	8	10	10	8	–86 – 164
F B Edgell	10	10	8	7	10	6	8	8	7	8	–80
	8	9	7	10	10	8	5	9	6	10	–82 – 162

CINCINNATI, May 9.—There were seventeen entries in tonight's shoot of the Queen City Pistol Club at Curley's Vine street gallery, of which Henry Goodman was the only one that succeeded in scoring straight. His shooting throughout the evening was admirable, scoring in one run 22 bullseyes straight. Messrs. Copeland, Hopkins and Wick strove hard to tie the leader, but found the pace too warm. The club is showing great improvement, especially so is this case with the poorer shots. Robertson, Bandle, Taylor, Worsum, Naegle, Hurst and Cole, six of the club's best shots, failed to materialize. The St. Louis Pistol Club has challenged the local club to a series of three matches to be shot by telegraph, ten men to a side, at the Hinman standard target. Hyde range, ¾in. bull to count 10. To-night's shooting resulted in the following scores, the conditions being, 10 shots at 12½yds. range, 2¼in. bullseye, counting 12, strictly off-hand with revolver or pistol:

H Goodman	12	12	12	12	12	12	12	12	12	12	–120
Geo Hopkins	12	12	12	12	12	12	12	12	12	11	–115
Ben Copeland	12	12	12	12	12	12	11	12	12	12	–119
Wick	12	12	10	12	12	11	12	12	12	12	–116
John Ridley	12	12	11	12	12	10	12	10	11	12	–114
Schafield	12	12	12	12	11	11	11	10	9	12	–112
Chas Kaufman	11	12	11	11	9	11	12	12	12	10	–111
Chas Reif	12	11	12	11	11	10	10	11	10	12	–110
Julius Beiser	12	12	11	12	11	10	12	10	11	12	–114
Wilson	9	11	11	11	11	12	12	9	10	12	–108
Guy	11	9	8	12	6	10	12	12	12	11	–103
Slater	12	10	10	12	11	11	12	12	10	12	–116
Clubb	11	9	11	11	12	11	11	6	9	12	–103
Geo Boehers	10	12	10	12	11	10	11	11	8	8	–104
Albers	11	11	10	10	12	9	10	11	10	12	–106
A Drube	11	12	9	10	5	11	11	12	12	9	–102
Casey	11	12	9	10	5	11	11	12	12	9	–102

TORONTO, May 4.—The first practice of the Allan Rifle Association was held this afternoon on the Garrison Common, and considering the very unsteady wind that was blowing at the time, the scores were fairly well up to the average. This association has decided to publish all scores of 90 points and upwards made at any regular practice, and also to offer a solid silver teaspoon for competition every Saturday, the first as the score shows, being won by Mr. G. M. Donnelly, but no member can win twice in succession. It might be mentioned that although this association has been in existence for the past six years, its ranges have never been opened outside of the Queen's Own Rifles until the present season, and it has now decided that any citizen of Toronto or county of York may become a member if his application is considered satisfactory by the investigating committee appointed for that purpose. The following are the scores with rauder rifle:

	200yds.	400yds.	500yds.	Total.
G M Donnelly	32	28	32	92
W M Hasp	32	26	32	90
W R Meadows	32	29	29	90
F Wiseman	24	29	32	85
J K B Turner	28	28	29	85
Geo Eaklon	32	26	27	85
Geo Lewis	28	24	29	81
Jas Eaklon	32	26	23	81
T Wiseman	28	24	29	81

SAN FRANCISCO, May 5. The San Francisco Turn Verein held its 37th annual outing to-day at Shell Mound. It was intended that a shooting match should take place during the day, in which the crack shots of the Schuetzen section were expected to make some very creditable scores. Prizes amounting in value to $500 were to have been awarded, and an interesting contest would have taken place had not the heavens willed otherwise. The deluge of rain which descended in the morning debarred so many members of the Schuetzen attending that the prize shoot was indefinitely postponed. The San Francisco Turner Sharpshooters did, however, have a shoot, during which some creditable work was done. The Independent Rifles, with Capt. Schmalholtz in command, held a practice shoot and made the following scores at 200yds.:

F Staude	3	5	4
J Schlichtman	3	4	4
Capt Schmalholtz	4	3	3
H Galtjen	4	3	5
M Hunker	0	3	4
T C Hamann	2	4	4
D Hennig	2	3	3

Oestrich	4	5	4
Asserson	4	4	4
Young	4	5	4
Curtis	3	4	3
Pritchard	3	4	4
Donohue	3	5	4
Corbett	4	3	3
Brusher	2	3	3
Kennedy	3	4	3
Bailey	4	3	3

A picked rifle team from the Third Regiment was also present during the day and scored as follows:

W F Oestrich	4	5	4
J McGinnis	3	4	4
F Young	4	5	4
H C Middleton	4	3	4
Asserson	4	4	4
P McBrien	3	3	4
G H Curtis	3	4	3
M Ryan	4	4	3

TORONTO, May 11. The members of the Allan Rifle Association turned out this afternoon in goodly numbers for their second practice of the season, and were fortunate in having a very fine and favorable day for rifle shooting generally. The scores of the three leading men were close and exciting, and the ownership of the spoon was any one's. Mr. Knifton eventually captured it, as Mr. Donnelly was disqualified on the grounds of having won on the previous Saturday. It is the intention of the association in a short time to offer two spoons for competition at every practice. Following are the scores, the Snider rifle being used:

	200yds.	400yds.	500yds.	Total.
G M Donnelly	28	29	25	82
John Knifton	28	29	24	81
W H Meadows	30	29	21	80
T Westman	30	24	21	75
Wm Harp	25	27	19	71
J K B Turner	25	27	15	67
James Brash	24	19	23	66
Geo Lewis	28	19	18	65
J M Major	25	22	17	64
A A Dewdney	29	11	24	64

BOWMANVILLE, May 11.—The following scores were made by the Bowmanville Rifle Association this afternoon at 200, 500 and 600yds., Martini-Henry rifles being used:

	200yds.	500yds.	600yds.	Total.
Russell	31	33	30	94
Mitchell	31	29	30	90
King	27	31	16	84
Horsey	28	30	26	84
Young	27	27	27	81
Beach	28	28	23	79
Windatt	29	28	20	78
Morris	31	30	15	76
Curtis	28	21	23	72

SHOOTING IN PARIS. A great shooting competition is to be held in connection with the Paris exhibition. The contest, which is to last twenty days, fro n the 8th to the 27th of August, will take place on the ranges of the Vincennes Polygon, land for the purpose by the military authorities. The competition is to be limited to the rifle (Gras model) in use in the French army, to military revolvers and to long-range match rifles. One hundred and eight targets are to be erected (distances 300yds.) for the rifle shooting, and 20 targets at 33yds. for the revolver contests. The aggregate value of the prizes to be distributed will amount to $30,000, two-thirds of which is contributed by the Paris municipal council. The competition is to be a national one, but foreigners will be allowed to take part upon the personal invitation of the organizing committee. Furthermore, a grand fete, to be given under the auspices of all the shooting societies of Paris, will come off in the Tuileries gardens on July 7.

PHILADELPHIA, May 9.—At the Schuetzen Park the members of the Philadelphia Rifle Club met for practice to-day, and another victory was scored for the Wurfflein rifle, Mr. G. F. Kelb, one of the oldest active shooting members, winning his silver medal for 1889 on the honor target by the following score: 19-21 21 —81. Those using Wurfflein rifles shot an official score on standard American target, 200yds., off-hand:

E Stees, Jr	10	8	8	7	9	7	10	6	10	8	–83
E Travis	8	7	8	8	7	8	4	7	6	7	–70
J J Mountjoy	6	8	8	6	8	6	6	9	4	7	6 –68
J M Green	10	4	7	7	7	7	5	5	10	4	–68
W Wurfflein	6	8	7	6	6	8	5	7	8	4	7 –63
J H Buehler	6	4	10	5	6	5	4	4	6	9	5 –60

WILMINGTON, Del., May 6. At last, after patient waiting, the riflemen of Wilmington, Del., were favored with a day that was in every way almost perfect. The mild, spring-like weather was a temptation to any lover of outdoor life, but to target shooters, with the prospect of scenting the atmosphere of the fields, the attraction was irresistible. The shooting lasted during the entire afternoon, and the marksmen were loth to quit for supper. Following are the scores in detail, standard American target, off-hand:

Revolver Match—50yds.											
E J Darlington	3	2	3	6	3	5	3	10	3	5	3–36
E Evans	6	10	6	10	10	10	5	7	7	6	7–87
E Jackson	3	6	10	4	5	3	7	7	6	5	6–67
H Simpson	3	10	4	7	3	3	3	6	5	5	5–55
H Johnson	3	2	5	7	5	6	5	7	5	6	5–51
W Rice	4	10	3	6	3	3	2	4	3	7	3–48
Badge Match—200yds.											
H B Seeds	7	4	3	5	7	3	7	5	3	7	7–67
H Simpson	3	6	6	5	9	10	7	3	5	4	4–58
Record Match—200yds.											
H Johnson	4	5	4	3	5	3	5	7	5	2	3–39
S Howard	4	5	5	3	5	5	6	7	3	5	6–57
W Rice	3	5	4	7	3	4	7	3	5	3	3–42
At 100yds.—Special Practice.											
J P Taylor	10	8	10	8	9	9	8	8	9	10	9–93

G Darlington	7	5	6	9	10	9	8	8	10	6	8–86
Beginners' Badge Match.											
J R Montgomery	7	7	6	7	9	9	6	8	7	6	7–70
M James	6	5	5	6	6	6	6	6	5	6	5–62

NEWARK, May 8.—The Thursday shoot of the Newark Shooting Society drew nineteen members to its park, and the targets were kept in constant motion from 4 o'clock until dark. The day was hot, and the light was wretched, the glaring sun shining full on the faces of the targets, making hard work for the eyes. The members' trophy match was one of the attractions, and this resulted as follows, each member firing ten shots at the ring target: H. Williams 23, Geo. Baumann 21, H. Townsend 22, J. Carpenter 21, F. Jones 22, C. E. Dalrymple 23, Geo. Bauer 23, C. C. Campbell 22, A. H. Merriman 22, F. A. Fessenden 17, Fred Fessenmeier 16, W. Dreyer 19. In the expert medal match some big scores were rolled up by the different contestants. H. Williams succeeded in finishing up a shoot-out number of scores of 10 or more to win the first gold medal of the season, and John Coppersmith walked off with a bronze and a silver medal. The scores on which Williams won the gold medal were as follows: 97, 97, 95, 97, 99, 97, 98, 99, 97, 97. Coppersmith's silver medal scores were 95, 97, 92, 95, 95, 94, 95, 93, 95, 95. Henry Dolgee of the Zettler Club, shot in five times, and put up a great silver medal score, and was presented by darkness from getting the other two. The annual Bailey Warner league games take place among the shoot afternoon, running all the way from 95 to 98, and every club on the ground will get a gold medal score. On the opening afternoon the nine ties ranged as follows: Hedges, 95; Neil Williams, 95; George Wahner and Coppersmith, 97 each, divided third and fourth; F. A. Fessenmeier and J. A. Boyden, 98 each, divided fifth and sixth; F. C. Campbell, 99, seventh. Among the shooters was A. H. Merriman, of Meriden, Conn., who practises to-morrow for the sole purpose of shooting with the club, of which he is a member.

T. T. CARTRIGHT, the well-known rifle shot of Northampton, Mass., has been appointed Inspector of rifle practice for the local militia company. Mr. Cartright is with the Winchester Gun Co., of Hartford.

ST. LOUIS, Mo., May 8.—A meeting was held by the St. Louis Pistol Club to-day and a programme for its next tournament arranged. Two medals and one prize will be contested for by the club members. The 20yds. Standard American target was adhered to for the coming affair. Fifteen shoots, one each week. A member will be allowed to shoot three scores on a regular meeting night, from which he may select the best for publication, but all are to count in the general average for the medal. Then a medal is to be awarded to the member whose average shows the most improvement at the end of the shoot. To the member having the largest handicap average in 8 shoots a handsome prize will be given.—UNSER FRITZ.

MINNEAPOLIS, May 9.—The Minneapolis Rifle Club held its usual weekly practice shoot yesterday in spite of cyclones, hurricanes, lightning, rain and the fearful dust that preceded the rain. The bad weather accounts for small attendance. Badge shoot, 200yds. off-hand: Weeks 82, Marshall 68, Snider 58, Johnson 61, Merville 71, Morgan 61, Brooks 60. The highest scores made during the day were: Weeks 75, Morgan 74 Snider 63, Austin 59, Merville 73, Marshall 68, Brooks 72, Johnson 61.—SKINNER.

ST. LOUIS, May 11.—A friendly match between our pistol club and the Cincinnati Pistol Club is on the tapis, to take place in the near future. If arranged the teams will be composed of 10 men and a Standard American target will be used.—UNSER FRITZ.

THE TRAP.

Scores for publication should be made out on the printed blanks prepared by the Forest and Stream, and furnished gratis to club secretaries. Correspondents who favor us with club scores are particularly requested to write on one side of the paper only.

Secretaries of clubs and managers of tournaments are requested to keep us advised of the dates of their shoots, so that we may give due notice in our column of fixtures.

FIXTURES.

May 14, 15, 16.—Ohio Trap Shooter's League tournament, Cleveland, O.

May 14, 15, 16, 17.—Iowa State Sportsman's Association's annual tournament, Des Moines, Ia. A. C. Miller, Secretary, Des Moines, Ia.

May 16, 17.—Olean Sportsmen's Association tournament, Olean, N. Y.

May 21, 22, 23.—Minneapolis Gun Club tournament, Minneapolis, Minn. James Pye, Secretary.

May 27 to June 1.—Missouri State shoot.

May 28 and 29.—Norwich, Conn., Tournament. E. W. Yerrington, President.

May 29, 30, 31.—South Side Gun Club tournament, Milwaukee, Wis. C. W. Milbraith, Secretary.

May.—Nebraska State Sportsmen's Association's fifteenth annual tournament, Norfolk. B. B. Locke, Secretary.

June.—Annual tournament Sportsmen's Association of the Northwest, Tacoma, Washington Territory.

June.—Ninth annual tournament Southern Illinois Sportsmen's Association, Belleville. C. P. Richards, Secretary.

June.—Kansas City tournament.

June 3, 4, 5, 6, 7.—New York State Association for the Protection of Fish and Game tournament, Albany, N. Y. Horace B. Derby, Secretary, Albany, N. Y.

June 6, 7, 8.—Southern Illinois Sportsmen's Association's ninth annual tournament, Belleville, Ill.

June 10, 11, 12, 13, 14.—First tournament of the American Shooting Association, at Cincinnati, O.

June 18, 19, 20, 21.—Illinois State Sportsmen's Association's tournament, Grand Crossing, Ill.

Aug. 20, 21, 22, 23.—Second annual tournament of the Keystone Manufacturing Co., of Corry, Pa. Traps will be pulled by a new electric apparatus.

Sept. 17, 18, 19, 20.—Central Illinois Sportsmen's Association's eleventh annual tournament, Jerseyville, Ill.

THE PITTSBURGH TOURNAMENT.

PITTSBURGH, May 7.—The tournament under the auspices of E. E. Shaner and F. F. Davison, which opened to-day, promises to be a big success, and the two enthusiasts deserve great praise for their endeavors in behalf of fellow sportsmen. The weather was splendid, and just the kind any shooter could wish. There was no wind, and the sun's rays were toned down to comfort. The opening day of the grand shooting tournament found a goodly crowd on Brunot's Island, and the roar of the double-barrels was mingled with many a cheer. Everybody was feeling in first-class shape and consequently the affair was one of the happiest ever witnessed here. Ten matches were shot, including a practice shoot and two extra sweepstakes. E. E. Shaner was in great form and made excellent runs. P. Kelsey won the most money in the affair, his winnings amounting to almost $100. Two thousand five hundred birds were thrown. The best shoot was for the guarantee purse, at 21 Keystones. Al. Bandle and Rolla Heikes did not show up; neither did Penrose, the well-known wing shot. The winners of the different matches are given below. Where two or more won first prize the money, by mutual consent, was divided among them.

Practice shoot, 5 birds, entrance $1, 14 entries—First, D. S. Allen, E. E. Shaner, C. E. Verges, 5 each; second, C. Richardson, H. J. Levis, P. Kelsey, 4 each; third, Paul North, A. C. Krueger, 3 each.

First match, 10 single bluerocks, 5 traps, entrance $1, 16 entries—First, Paul North, 10; second, C. Richardson, E. E. Shaner, 9 each; third, P. Kelsey, John Downs, 8 each; fourth, A. C. Krueger, 6; fifth, H. W. Nair, 5.

Second match, 9 single Keystones, 3 traps, entrance $1, 14 entries—First, C. Richardson, A. C. Krueger, 9 each; second, H. W. Nair, P. Kelsey, E. E. Shaner, 8 each; third, C. E. Verges, 7, fourth, F. F. Davidson, J. O. Hanlon, 6; Scanlon 5.

Third match, 20 single bluerocks, 5 traps, $50 guaranteed, entrance $3, total purse $96. 31 entries—First, G. E. Snyder, Q. A. McClure, C. Richardson, 17 each; second, P. Kelsey, 16; third, J. Williams, J. O. Hanlon, 15 each; fourth, F. F. Davison, 14; fifth, E. E. Shaner, P. North, 13 each.

Fourth match, 9 single Keystones, 3 traps, entrance $1.50, 40 entries—First, H. J. Levis, E. E. Shaner, 9 each; second, J. O. Hanlon, W. S. King, Q. A. McClure, H. W. Nair, 8 each; third, C. E. Verges, F. F. Davison, 7 each; fourth, W. M. Pierce, J. F. Donnelly, Dr. Cundall, T. F. Cummings, G. Cochran, M. Scanlon, J. P. Dean, 6 each; fifth, P. North, S. Clover, 5 each.

Fifth match, 10 single bluerocks, 5 traps, entrance $2, 36 entries—First, W. S. King, P. Kelsey, 9 each; second, Dr. Cundall, Q. A. McClure, 8 each; third, Chas. Richardson, J. G. Hoffman, A. C. Krueger, J. P. Dean, W. S. Bell, F. F. Davison, 7 each; fourth, S. Clover, 6; fifth, J. Hanlon, P. North, 5 each.

Sixth match, 21 single bluerocks, 3 traps, $50 guaranteed, entrance $3, total purse $108, 36 entries—First, W. S. King, W. S. Bell, Q. A. McClure, 21 each; second, P. Kelsey, 20; third, J. H. Williams, 19; fourth, J. P. Andrews, George Cochran, 18 each; fifth S. Clover.

Seventh match, 10 single bluerocks, 5 traps, entrance $1.50, 29 entries—First, E. E. Shaner, C. E. Verges, 10 each; second, Q. A. McClure, P. Kelsey, F. F. Davison, P. North, S. Clover, 9 each; third, C. M. Hostetter, C. Richardson, G. E. Snyder, 8 each; fourth, J. O. Hanlan, 7; fifth, G. W. Lowen, A. C. Krueger, J. Peters, 6 each.

Extra sweepstake No. 1, 10 bluerocks, entrance $1, 23 entries—First, E. E. Shaner, A. C. Krueger, P. Kelsey, Q. A. McClure, 9 each; second, C. E. Snyder, P. North, J. Brown, 8 each; third, C. Richards 7, G. Cochran, 7 each; fourth, J. P. Andrews (withdrew, having made 6), J. S. McPherson won fourth money in the shoot-off; fifth, M. Hostetter, W. J. McCrickart.

Extra sweepstake No. 2, 9 single Keystones, entrance $1, 15 entries—First, P. Kelsey, E. E. Shaner, 9 each; second, F. F. Davison, George Snyder, C. Richardson, P. North, C. E. Verges, 8 each; third, T. F. Cummings, H. J. Levis, 7 each.

May 8.—The two-day tournament at Brunot Island was brought to a close to-day. Taking it all through it was the most successful shoot ever held in this city. Messrs. Shaner and Davison certainly deserve the palm for being good hustlers and managers. Over 9 000 bluerocks and Keystones were used. All of these were thrown from two sets of traps. This is exceedingly good work. Especially so in this case, as one set contained but three traps. The management will realize at least $200 from their venture outside of their personal winnings from the sweepstakes. It was an off day for the crack shots. The young boods had their shooting clothes on and took all the plums. Paul North, of Cleveland; Seth Clover, of Erie, and C. E. Verges, of Lowell, O., all old-time wing shots, had to take down their colors before Shaner, Richardson, Hanlon, McClure and others. P. Kelsey, who had such good luck Tuesday, was out of pocket when balancing-up time came. Charles Richardson was shooting in excellent form. If there is any luck in a rabbit's foot he had it. Every time he went to the score he would get the "Colonel" to rub his rabbit's foot across his back, and he got there every time. Elmer Shaner and Capt. McClure were about the heaviest winners, Davison being a close second. The weather was excessively warm and had a bad effect on the sportsmen. Those who made poor scores had a good excuse to offer in this. Paul North went to Cleveland after the tournament. He and Shaner are making arrangements for the 20-man team race between Cleveland and Pittsburgh clubs. It will likely take place some time next month. B. Michels had a narrow escape from being injured. He had a loaded shell in his pantaloons pocket. Not thinking of it, he dropped a silver dollar in the same pocket. The dollar struck the primer and the shell exploded. Michels was burnt a little about the leg and on the wrist in taking the shell out. The affair caused considerable excitement, many thinking that he was seriously hurt.

After the regular matches had been finished several small sweepstakes were shot, the last gun being fired at 6 P. M. The scores were as follows:

Practice shoot No. 1, 5 birds, entrance $1; First, Kelsey, Richardson, 5; second, Cochran, McPherson, 4; third, Shaner, Hoffman, 3.

Practice shoot No. 2, 5 birds, entrance $1: First, Hanlon, Davidson, 5; second, Richardson, 4, won in shoot-off; third, Shaner, Hoffman, 3.

Match No. 3, 10 single bluerocks, 5 traps, entrance $1.50, 21 entries: First, E. Shaner, W. S. King, Cummings, 8; second, Verges, Kelsey, Hanlon, Hoffman, McClure, 7; third, Richardson, 6, won in shoot-off with Davison, Snyder and Clover, Richardson breaking 3 out of a possible 5; fourth, Williams, 5; fifth, North, McPherson, Krueger, Lauenge, 4.

Match No. 10, 9 single Keystones, 3 traps, entrance $1.50, 25 entries: First, Cochran, McClure, 9; second, Davidson, W. S. King, Richardson, P. Kelsey, 8; third, A. H. King, Michels, Hanlon, 7; fourth, E. Shaner, Holsman, Clover, Williams, 6; fifth, Krueger, 5. Krueger set the pins with three straight breaks against Rambaugh, Snyder, Wampler and Verges in the shoot-off. Hoffman was in the tie with 5 and withdrew.

Match No. 11, 20 single bluerocks, 5 traps, $50 guaranteed, entrance $3, 20 entries, total money $60—First, E. E. Shaner, McClure, 18; second, J. Hanlon, Krueger, 17; third, Davidson 16; fourth, W. S. King, Snyder, A. H. King, 15; fifth, Cochran 14.

Match No. 12, 9 single Keystones, 3 traps, entrance $1, 29 entries—First, Wampler, Lauenge, J. S. Davison, J. B. Holsinger, 9; second, Richardson, Cochran 8; third, A. H. King, Clover, McClure, 7. This was divided after the shoot-off, all three men making six straight breaks. Fourth, North, Shaner, 6. Both broke three straight in shoot-off, with Williams, Kelsey, Laniger and Simpson; fifth, Krueger, 5. This was also won in the shoot off.

Match No. 13, 10 single bluerocks, entrance $1, 29 entries—First, Snyder, 10; second, E. Shaner, McClure, W. S. King, Richardson, Hanlon 9; third, North, Krueger, Cochran, 8; fourth, Michel, Kelsey, Davison, Verges, 7; fifth, Hostetter, Clover, Williams, Bell, Hoffman, 6.

Match No. 14, 21 single Keystones, 3 traps, $50 guaranteed, entrance $3, 27 entries, total money $81: First, McClure, Holsinger, A. H. King, W. S. Bell, 17; second, Wampler, Davison, 18; third, North, Krueger, Kelso, W. S. King, 17; fourth, Clover, Hanlon, 16; fifth, Messner, McKnight, Cochran, Richardson, 15.

Match No. 15, 10 single bluerocks, entrance $1.50, 24 entries, 5 traps: First, W. S. King, 10; second, Herron, North, 9; third, Hanlon, Davison, 8; fourth, McClure 7. Won in shoot-off, breaking 5 straight, with Shaner, Verges, Michels and Krueger; fifth, Richardson, Snyder, McKnight, Lewis, 6.

Match 16, 9 single Keystones, 3 traps, entrance $1.50, 22 entries: First, Shaner, 9; second, Clover, McClure, 8, both broke 3 in shoot-off against Richardson, Leves, Hanlon and Gist; third, Herron, Verges, North, 7; fourth, Snyder, Davison, Kelsey, Krueger, 6; fifth, Neal, 4.

How some of the crack shots loaded up for their work in hand, what guns they used and how they were charged is shown in the following interesting table giving exact details on these interesting points:

All guns full choke barrels.

DETAILS OF GUNS AND LOADING, PITTSBURGH TOURNAMENT.

NAME.	GUN AND BORE.	LOAD.	CARTRIDGE.
G. E. Verges, Lowell, O.	Lefever hammerless, 12-g.	33grs. Trap Wood Powder, 1⅛oz. Tatham's No. 8 Chilled Shot.	U. M. C. Club.
Paul North, Cleveland, O.	Parker hammerless, 12-g.	33grs. L. & R. Orange Extra, 1⅛oz. Tatham's No. 8 Chilled.	Climax.
C. M. Hostetter, Pittsburgh, Pa.	Parker hammerless, 10-g.	34grs. Dupont's Choke Bore No. 1, 1¼oz. Tatham's No. 8 Chilled.	U. M. C. Club.
Chris. Richardson, Pittsburgh, Pa.	L. C. Smith hammerless, 10-g.	34grs. Dupont's Choke Bore No. 1, 1¼oz. Sparks No. 8 Chilled.	U. M. C. Club.
A. H. King, Pittsburgh, Pa.	W. & C. Scott & Son hammerless, 12-g.	34grs. Dupont's Choke Bore No. 1, 1¼oz. B., F. & Co.'s No. 8 Chilled.	Rival.

J. S. McPherson, Sewickley, Pa.	Parker hammerless, 10-g.	34grs. Dupont's Choke Bore No. 1, 1¼oz. B., F. & Co.'s No. 8 Soft.	Rival.
W. J. McCrickart, Pittsburgh, Pa.	Colt hammerless, 10-g.	34grs. L. & R. Rifle Patented, 1¼oz. B., F. & Co.'s No. 8 Soft.	Rival.
L. C. Smith hammerless, 10-g.	34grs. Dupont's Choke Bore No. 1, 1¼oz. Tatham's No. 8 Chilled.	Rival.

THE M'CLURE-GLASS SHOOT.

PITTSBURGH, Pa., May 6.—*Editor Forest and Stream:* To attend the Shaner and Davison two days' tournament on the 7th and 8th inst., and witness the live-bird shoot between Capt. Q. A. McClure, of McKeesport, Pa., a member of the Herron Hill Gun Club, of Pittsburgh, and Chas. Glass, of New Castle, Pa., I managed to reach Pittsburgh this morning in time to join M. Clure and his party when boarding the train for New Castle. Messrs. E. E. and S. Shaner, J. O'H. Denny, Chas. Richardson, W. J. McCrickart and the undersigned were among those who accompanied the Captain. The match was $100 a side, Bogardus rules, 25 birds each. Each side furnished half of the birds, which were a splendid lot, especially those furnished by the Captain, among which there were a number of corking good birds.

The match commenced about 1:30 P. M. in an open field outside of New Castle, and well adapted for the purpose. Mr. McFarland was appointed stakeholder, W. J. McCrickart judge for McClure and Welsh for Glass, and Mr. Wm. Alexander acted as referee; and very satisfactorily to both parties did these gentlemen perform their duties.

The two contestants and their styles of shooting are entirely different. McClure is quiet and dignified at all times and a most cool and deliberate shot, and in his black attire and sedate manner is oftentimes mistaken for a preacher. Glass, on the contrary, is quick, nervous in his actions and way of shooting. Although there were a number of magnificent shots made by both, yet the scores of both men are below their general average, and were rather a disappointment to their friends. The quality of the birds had a good deal to do with this. The condition of the weather was all that could be desired.

McClure was the most unfortunate, for with the exception of the 18th and 25th birds, which were clean misses, he hit every bird; but the 2d bird, a right-quarterer out of trap 5, the 7th bird, a driver out of trap 3, the 16th, a towering bird out of trap 5, and the 21st bird, a tailer out of trap 5, failed to stop in bounds; the 13th bird, a hard driver out of trap 4, fell dead 8yds. out of bounds; the 3d bird, a right-quarterer out of trap 5, and the 22d, also a right-quarterer out of trap 5, were both hard hit, but went at least 50yds. from traps before falling dead; the 1st bird, a left-quarterer from trap 3, the 4th, a towering bird from trap 1, and the 5th, a like bird from trap 5, were quick, clean kills, as were also the 8th and 10th, both right-quarterers from traps 5 and 1, the 11th and 12th both drivers from trap 3, the 23d, a driver from trap 5, and the 24th, a left-quarterer from trap 2. Only fair kills were made on the 6th, an incomer from trap 1, and the 14th, a driver from trap 1. Difficult and magnificent shots were made on the 9th, a rattling tailer from trap 1, the 17th, a left-quarterer from trap 5, and the 19th and 20, both clipping drivers from trap 1.

Glass started in with three straight misses, the 1st, a right-quarterer from trap 1, 2d and 3d both drivers from traps 3 and 1, also missing his 14th, a driver from trap 1; the 5th, 8th, 13th, 22d and 25th, all drivers from traps 2, 5, 4, 3 and 4 respectively, were hit hard, but failed to stop in bounds; the 6th, 7th, 23d and 24th, all incomers from traps 3, 1, 4 and 1 respectively, and the 11th, a right-quarterer from trap 4, were easy, quick and clean kills; the 10th, an incomer from trap 1, was merely knocked down, nothing more; on the 9th, 10th, 15th, 17th, 19th and 20th, all rattling drivers from traps 3, 5, 4, 2, 1 and 3 respectively, such magnificent shots were made as to put Mr. Glass among the best of them; the 18th, an incomer from trap 1, and the 21st, a hard driver from the same trap, were also cut down in elegant style.

McClure shot a 10-gauge hammerless, full choke, with 5drs. of Dupont's diamond grain No. 4, and 1¼oz. Tatham's No. 8 chilled shot. Glass shot a 10-gauge Parker hammer gun, with 4½drs. of Austin's powder and 1¼oz. of Bailey, Farrell & Co.'s chilled shot No. 8. No disputes of any kind arose, and though Mr. Glass took his defeat good-naturedly, he is not satisfied with the result of this match, and another will very likely be arranged in the near future between these same gentlemen. The following are the scores:

Capt Q A McClure	1011110111110110101101110—18
Chas Glass	0001010111100111111010—16

UNION GUN CLUB.

SPRINGFIELD, N. J., May 6.—The Union Gun Club held its fifth monthly prize shoot this afternoon, and the bright, pleasant weather brought out many of the boys who have not shot before for some time. Some of the cracks were unavoidably absent, but those present had just as much fun and did some remarkably good shooting, all things considered. The targets used were Keystones, thrown from 3 Keystone traps. These traps are dandies and will throw a bird over 80yds. and like chain lightning; this was the kind thrown to-day. Several sweeps at bluerocks were shot before and after the main events, but the scores have been mislaid. Following are the scores of the two main events, 20 Keystones, 3 Keystone traps, 18yds. rise, N. G. A. rules. 11 prizes:

Miller	11111111101111111111—29
Johnson	11111111111111111111—30
Conover	10110111011111111111—25
A Sickley	11101111111111111111—28
Roll	11101111010.11100111100111100—22
Sopher	10111101111010111011010100101—21
H Sayre	01100101111101111111110111—23
Williams	11101001111111111111011101—25
Briant	10011101110100110110111101—19
Terry	01011111101101101111000010—18
G Pudney	01010010011000110000100110—13
Duncan	011 10101010011101101111111—21
Lightipe	11000101010111110101011111—19
Wade	11101010003110001110011100 0—13
Eager	0010101 0000 0010001100 00101—11
V Sayre	10.0110001111100101110101111—18
Newton	110.00.0311010.001110.11110011—18

Johnson first, Keystone trophy. Miller second, $10 gold. Sickley third, leather gun case. Ties on 25 for fourth prize, $7.50 gold: Conover 15, Williams 13. H. Sayre fifth, shell case. Roll sixth, $5 gold. Ties on 21: Sopher 2, Duncan 3, wins hunting coat. Ties on 19: Briant 6, Lightipe 3. Ties on 18: Terry 3, V. Sayre 4, Newton 4. Second tie: Sayre 2, Newton 3 and wins. Ties on 13: Pudney 2, Wade 4 and wins 500 paper shells. Eager wins eleventh, 12½ozs. powder.

Match at 10 Keystones, 3 traps, 18yds. rise, shot under N. G. A. R., 50 cents entrance, 4 moneys:

Williams	1101101111—8	Wade	1011110111—8
Roll	1110110101—7	H Sayre	1111111011—9
Conover	1110111111—9	Sopher	1111110111—9
A Sickley	1011111110—8	Lightipe	0011111111—8
Terry	1100010000—5	Johnston	1101011111—9

Ties divided. 12-BORE.

MINNEAPOLIS GUN CLUB.

MINNEAPOLIS, May 10.—Yesterday, for once this year, the Minneapolis Gun Club had a good day to shoot—when it didn't rain—and the result can be seen in the straight scores, 20 straight and 19 out of a possible 20, 10 singles and 5 pairs Peorias, are very scarce here, and I judge are elsewhere by the scores sent to FOREST AND STREAM. The day was still, warm and cloudy, and the smoke hung heavy in front. Those who had wood powder for their double shooting had a decided advantage, as the second bird was wholly obscured by smoke.

Among the visitors present were Fish, Bennett, Chantler, Pfister, Ponsonby and Skinner, St. Paul, and I. Clagget, Montevedio, Minn., representing the new Macomber metal target, which has been greatly improved by himself and is now as perfect as any of the breakable targets, both as to flight and indicating qualities.

Next Thursday is the regular monthly one-day tournament and a large crowd and good time can surely be looked for, and in two weeks, the 21st, our great tournament with 25 average prizes of $1,100 guaranteed money takes place.

It is universally acknowledged that Minneapolis gives the best tournaments and has the largest attendance of any point in the Northwest, not excepting Chicago. Following is the score:

First event, 7 single Peorias, 5 screened traps, 18yds. rise, 50 cents entrance, three moneys:

Skinner	1111111—7	Shott	1100001—3
Daly	1111111—7	Lawrence	0101111—5
Marshall	1011111—6	Christenson	1111101—6
Chantler	1101111—6	Cutter	1111111 7
Warwick	1101001—4	Bangs	1111116—6
Murphy	0111111—6	Claggett	1011010—4
Reilly	1110011—5	Whitcomb	1011013—4

Skinner and Cutter divided first, Chantler second and Lawrence third after shoot-off.

Second event, 6 single and 2 pairs Peorias, same conditions, 75 cents entrance:

Skinner	111101 00 11—7	Christenson	101111 10 10 7
Daly	111111 10 11—9	Cutter	111111 00 10—7
Marshall	111111 00 11—8	Bangs	111111 11 00—8
Chantler	011111 11 10—8	Claggett	111101 11 11—9
Warwick	110100 11 11—8	Whitcomb	111 00 00 01—5
Murphy	110111 01 10—7	Fish	110111 11 11—9
Reilly	111111 11 01—9	Bennett	111111 11 10—9
Shott	010000 11 00—3	Kusch	110000 11 11—6
Lawrence	011001 11 11—7	Brady	111110 11 11—9

Claggett first, Warwick second and Christenson third after shoot-off.

Third event, badge shoot, 10 singles and 5 pairs Peorias, same conditions, entrance $1.50, 4 moneys:

Skinner	11 11 11 11 11—19	Daly	10 10 10 11 11—16
Marshall	11 00 10 11 10—14	Chantler	11 11 11 11 10—19
Warwick	10 10 10 11 11—14	Chri tenson	10 00 10 11 11—12
Whitcomb	11 11 11 10 10—15	Reilly	11 11 10 11 01—17
Nicholson	10 10 10 10 10—10	Stokes	10 10 11 11 10—13
Morse	10 11 00 00 10—10	Short	10 10 10 10 10—10
Osmer	10 10 10 11 10—14	Deesman	01 10 10 10 10—12
Fish	11 10 10 00—13	Bennett	11 01 11 10 10—16
Hoffiin	00 00 10 00 00—2	Kinsch	11 11 10 11 10—17
Brady	11 10 11 10 11—12	Bangs	11 10 10 10 11—15
Ensign	11 11 11 11 11—20	Cutter	11 11 11 11 11—19
Lawrence	10 01 11 11 11—17	Daniels	10 00 10 10 10—9
Murphy	11 10 01 11 10—14	Pratt	10 11 10 10 11—15
Fox	10 10 10 00 11—10	Ruby	10 00 11 00 00—3
Geneva	10 11 10 10 00—12	Lauz	00 11 11 11 10—12
Rozy	00 00 10 00 10—8		

Ensign first and senior badge on straight score. Skinner, Chantler and Cutter divided second, Reilly third, after shooting twelve times, Bennett and Daly fourth.

Fourth event, "Tribune" badge shoot, 9 singles and 3 pairs Peorias, same conditions, $1 entrance, 4 moneys, previous winners handicapped:

Ensign (22)	01 00 00— 9	Claggett	11 01 10— 9
Brady (2)	11 00 00— 9	Goasman	11 10 11—11
L'w'nc (20)	11 01 11—12	Bennett	11 10 00—11
Cutter (21)	10 00 11— 9	Fish	11 01 11—12
Stokes (21)	11 10 10—13	Murphy	11 10 10—11
Skinner	11 10 10—13	Pratt	10 11 10—10
Morse	11 10 10— 8	Fox	00 11 01—10
Marshall	10 10 01— 9	Dodge	11 10 11—11
Dub	10 10 10— 8	Kinsch	10 10 10—11
Ruby	10 10 11—11	Thompson	10 10 10—11
Shott	10 10 11— 7	Geneva	10 10 10— 8
Roxy	00 00 10— 7	Havermai	10 10 00— 3
Chantler	11 10 11—14	Reilly	10 10 10—11
Daily	10 11 10—12	Bangs	00 10 10— 7
Hoffiin	00 10 00— 4	Walker	10 11 11—13
Latz	11 11 10— 8	Nicholson	w.

Chantler first, Warwick badge, and divides second with Skinner and Stokes, Fish third on shoot-off, and Murphy fourth.

Fifth event, 10 single Peorias, $1 entrance, 4 moneys:

Skinner	11 11 11 11—10	Claggett	11 01 10 11— 8
Lawrence	11 01 11 01— 8	Shott	10 10 10 00— 4
Stokes	11 10 01 11— 8	Murphy	10 10 10 11— 6
Pratt	11 10 11 11— 8	Walker	11 11 11 01— 9
Marshall	11 11 11 11—10	Bangs	01 01 10 10— 5
Riley	11 11 11 11—10	Havermall	00 00 00 00— 0
Chantler	01 11 11 11 0— 8	Brady	11 11 10 10— 7
Morse	11 01 01 00— 5	Geneva	01 10 10 00— 3
Fox	01 00 10 01— 5	Ensign	11 11 10 11— 9
Dodge	11 10 11 11— 9	Cutter	11 11 11 01— 9
Whitcomb	01 11 11 10— 7	Dub	11 11 11 00— 7

Skinner and Riley first, Cutter and Ensign second on shoot-off, Chantler third on shoot-off.

Sixth event, 5 pairs Peorias, entrance 50 cents, 3 moneys:

Skinner	11 11 11 11—10	Dodge	11 01 11 11 10— 8
Whitcomb	11 10 10 00 11— 6	Murphy	10 01 11 10 10— 6
Stokes	11 11 10 10 10— 7	Ensign	10 00 11 00 10— 4
Marshall	11 11 10 10 11— 8	Cutter	10 00 10 11 00— 4
Chantler	11 10 10 11 11— 8	Dub	10 00 10 00 10— 3

Skinner first, ties on 8 second, Stokes third. WILLIAMS.

ST. PAUL GUN CLUB.

ST. PAUL, May 11.—For a wonder the St. Paul Gun Club had a still day to-day for their regular weekly badge and practice shoot, the first one since the season opened. As a result good scores were made, and the person who won any money had to shoot for it. Peorias, as usual, were used, and 5 screened traps, Keystone rules, except in individual badge shoot when the singles are thrown according to the American rules, and the doubles from one set of traps. Holt, who challenged Burkhard, the winner twice of badge, failed to arrive in time, only a few minutes late, however, and Forbes challenged. Burkhard was sick and would not have shot at all had he not been the holder of the badge which accounts for his poor score. Pfister has challenged Forbes for next Saturday, and an interesting match is expected, as they are the best shots in the club, and the equals of any in the Northwest. Following is the score, 15 singles and 5 pairs Peorias, 18 and 15yds., $5 entrance, purse and badge to go to the winner:

Burkhard	11 00 11 10 11—16	Forbes	10 11 10 10 11—20

First event, 10 single Peorias, entrance 75 cents:

Max	11 11 10 11— 9	Reed	01 11 01 11 1— 8
Fish	11 10 11 11— 9	Skinner	11 11 11 11—10
Bennett	11 00 00 11— 6	Burke	10 01 01 01— 5
Chantler	11 01 11 10— 8	Pfister	11 11 11 11—10
Warwick	01 10 11 10— 7	Dox	10 01 00 10— 4
Kennedy	0 11 01 01— 7	Forbes	11 11 11 00— 7
Balsom	11 11 11 11—10		

Balsom, Skinner and Pfister divided first, Max and Fish divided second, Reed third.

Second event, 5 singles and 2 pairs Peorias, conditions same, entrance 75 cents:

Max	11 11 10 10—6	Reed	11 10 10 11—7
Fish	11 11 10 11 8	Skinner	10 10 1 11 10—6
Bennett	11 10 01 10—6	Burke	11 10 1 11 10—7
Chantler	11 11 11 11—9	Pfister	10 11 10 00—5
Warwick	11 00 11 11 7	Dox	10 11 11 10 7
Kennedy	11 11 10 11—8	Forbes	0 11 11 10 10—6
Balsom	11 11 11 10—8		

Ties on 8 for second: Fish 2, Kennedy 3, Balsom 2. Kennedy second. Ties on 7 for third: Warwick 3 and 2, Reed 2, Burke 3 and 2. Burke and Warwick third.

Badge shoot, 10 singles and 5 pairs Peorias, $1 entrance:

Max	11 11 11 11 1	Burke	11 11 10 11 01—18
Fish	10 10 11 10 11—11	Dox	10 11 10 11 10—12
Bennett	11 01 11 11 11—17	Forbes	11 11 11 11 11—20
Chantler	11 11 11 11 01—19	Cutter	11 11 11 11 11—20
Warwick	11 00 11 10 11—14	Daly	11 10 11 11 10—16
Kennedy	11 10 11 01 10—13	Chantler	11 11 11 11 11—20
Balsom	11 11 11 11 01—19	Reed	11 11 11 11 11—20
Reed	11 01 11 00 11—14	Skinner	11 11 11 11 11—20
Skinner	11 11 11 11 11—20	Burke	11 11 11 11 11—20
Burke	11 11 11 11 11—20	Pfister	11 11 11 11 11—20
Pfister	11 11 11 11 11—20	Dox	11 11 11 11 11—20
Dox	11 10 10 10 10—16	Forbes	11 11 11 11 11—20
Forbes	11 11 11 11 11—20	Kilby	11 11 11 11 11—20
Kilby	11 11 11 11 11—20	Holt	11 11 11 11 11—20
Holt	11 11 11 11 11—20	Smith	11 11 11 11 11—20
Smith	11 11 11 11 11—20	Novoting	11 11 11 11 11—20

Pfister and Burke divide first, but shoot for badge, Burke winning, Bennett second, Holt third, Max fourth.

Third event, 15 single Peorias:

Max	11 11 11 11 11—15	Burke	11 11 11 11 11—15
Fish	11 11 11 11 11—15	Dox	11 11 11 11 11—15
Bennett	11 11 11 11 11—15	Forbes	11 11 11 11 11—15
Chantler	11 11 11 11 11—15	Kilby	11 11 11 11 11—15
Warwick	11 11 11 11 11—15	Holt	11 11 11 11 11—15
Kennedy	11 11 11 11 11—15	Smith	11 11 11 11 11—15
Balsom	11 11 11 11 11—15	Blake	11 11 11 11 11—15
Reed	11 11 11 11 11—15	Pfister	11 11 11 11 11—15
Skinner	11 11 11 11 11—15		

Balsom and Skinner divided first, Pfister second, Chantler third after shooting 12 times on tie, and Dox fourth.

Fourth event, 4 singles and 3 pairs, entrance $1:

Max	11 11 10 01 00—7	Skinner	11 11 10 10—8
Fish	10 11 10 11—7	Burke	11 11 11 11—9
Bennett	11 11 11 11—9	Pfister	11 11 11 10—9
Chantler	11 11 11 10—8	Holt	01 11 10 11—7
Warwick	11 11 00 11—8	Forbes	11 11 10 00—7
Kennedy	01 11 01 11—8	Dox	10 00 11 10—5
Balsom	11 10 11 11—9	Smith	11 10 00 00—4
Reed	10 11 10 11—7	Blake	11 10 11 10—8

Bennett first, Kennedy second, Fish third, Max fourth.

Fifth event, 12 single Peorias, entrance $1:

Max	01 11 11 11 11—11	Reed	11 11 01 11 11—10
Fish	00 11 11 11 11—10	Skinner	01 11 11 11 11—11
Bennett	11 01 11 11 11—11	Burke	11 11 11 11 11—12
Chantler	01 01 11 11 11—10	Pfister	11 11 11 11 10—11
Kennedy	11 00 11 11 01—9	Holt	01 10 01 11 1—8
Balsom	11 11 11 11 10—11	Blake	10 11 11 01 11—10

Burke first, Max and Bennett second, Chantler third.

WILLIAMS.

KANSAS CITY, May 11.—The Missouri State tournament will be held here, opening on May 27 and running 5 days. Liberal prize lists have been prepared and the prospects are for a rich, good time. The programme provides:

First shoot, open to the world, 10 live birds, 28yds. rise, use of both barrels; ties, 3 birds at 30yds. Entrance $5, including birds. Divided 40, 30, 20 and 10 per cent.

Second shoot, open to the world, 10 live birds, 30yds. rise, use of both barrels; ties, 3 birds at 30yds. Entrance $7.50, including birds, with $75 added. Divided 40, 30, 20 and 10 per cent.

Third shoot, open to any number of teams of two from clubs that are members of the Association, 5 live birds at 26yds, and 5 at 30yds., use of both barrels; ties, 3 birds each man at 30yds. Entrance $15 each team, including birds. Divided 40, 30, 20 and 10 per cent., with $75 added.

Fourth shoot, open to the world, 6 live birds at 26yds., use of one barrel only; ties, 2 birds at 30yds. Entrance $7.50, including birds. Divided 40, 30, 20 and 10 per cent., with $75 added.

Fifth shoot, State Association medal, open only to one team of four from each club belonging to the association, 15 live birds each man, 30yds. rise, use of both barrels, entrance $20 each team, birds extra; ties, 3 birds each man at 30yds. rise. One hundred dollars to go to the club last holding the medal, and the balance to be divided 40, 30, 20 and 10 per cent. of purse.

Sixth shoot. St. Louis Gun Club medal, valued at $500, open to all members of the State Association, conditions and rules of the above club to govern; 10 live birds, 26yds. rise, use of one barrel only, entrance $10, including birds; ties, 3 birds at 30yds. First prize the gold medal. All the entrance money to go to the last club holding the medal. In this shoot there will be many handsome and valuable special prizes.

Seventh shoot, open to the world; 10 live birds, 26yds. rise, use of one barrel only, entrance $7.50, including birds; ties, 3 birds at 30yds. Divided 40, 30, 20 and 10 per cent., with $75 added.

Eighth shoot, open to the world; 4 pairs live birds, 21yds. rise, entrance $7.50 including birds; ties, 2 pairs at 24yds. Divided 40, 30, 20 and 10 per cent. of purse, with $75 added.

Ninth shoot, open to the world; 10 live birds at 30yds rise, use of one barrel. Ties, 3 birds at 30yds. Entrance $7.50, including birds. Divided 40, 30, 20 and 10 per cent. of purse.

Tenth shoot, open to members of the State association only; 10 live birds at 30yds. rise, use of both barrels. Ties, 3 live birds at 30yds. Entrance $2.50, the price of live birds only. The Independence and Kansas City Gun Clubs donate each $75 to this shoot, which will be divided 40, 30, 20 and 10 per cent. of purse.

Eleventh shoot, open to the world; 25 live birds, 30yds. rise, use of both barrels. Ties, 5 birds at 33yds. Entrance $25, including birds. Divided 35, 27½, 20, 12½ and 5 per cent. of purse.

UNSER FRITZ.

THE CORRY GUN CLUB held their monthly meeting May 1 and elected 15 new members. The club will shoot on new ground next week and house and grounds are almost completed. Following are scores of last shoot:

F Babcock	11111111111111101111111—24
Wetmore	11011111111111111111111—23
Scott	01111011011111011111011—20
Penrose	11011100111111111110 11110—20
Kelleher	11101110110101011111111—19

Gartner	00111001010000101001101—11
Van Wert	0000001000000000000000— 1

Fred Babcock won the gold medal, H. Arnold the silver and Van Wert the leather medal.

LONG BRANCH, May 11.—An interesting pigeon shoot took place near Newman Springs, Long Branch, this afternoon between Brooklyn and New Jersey crack marksmen. The match has for a long time been on the tapis, and was for $100 a side, the man making the highest score to be presented with a handsome Parker pigeon gun. The contestants were William Graham, of Brooklyn, and Tabor Parker, of Flatbush, L. I., shooting as a team against Edward Price, of the South Shrewsbury Gun Club, and Thomas Stone, of the Long Branch Shooting Club. The conditions of the match were: Twenty-five birds each, 80yds. boundary, 5 ground traps 5yds. apart, Hurlingham rules. Graham and Parker, of the Brooklyn team, stood at 28yds., Price, of Shrewsbury, stood at 30yds., and Stone, of Long Branch, stood at 25yds. behind the traps. Use of both barrels was allowed.

The day could not have been better could the marksmen have made it to order, a gentle breeze blowing the gun smoke away, leaving the flying target in clear sight should a second barrel be necessary to stop its career. The men faced the traps shortly after luncheon at 1 o'clock. A number of visitors from Brooklyn, New York and Long Branch came to the grounds to witness the shoot, among whom was quite a bevy of ladies. The poorest shooting of the lot was done by Parker, of Flatbush, who was regarded by many as the best marksmen of the lot, but, unfortunately, nearly every hard bird in the coop came to his trap. The fine form and steady shooting of Graham, the other Brooklyn man, won applause from the spectators, he bringing victory to the Brooklyn side, besides personally capturing the handsome Parker gun presented to the man making the highest score. The following is the summary of the shoot:

Brooklyn.	
Graham	11111111101111111111101111—23
Parker	01111111011101,0011111101—10—42
New Jersey.	
Stone	11111110111011111001011—20
Price	10111111011111111100,110—20—40

After the team match a dinner was served at a neighboring cottage to the friends of the marksmen who were invited to witness the match, while a number of gentlemen present, who came down with their guns, staid on the ground and engaged in sweepstakes, shooting clay and wild pigeons until train time for New York. A match was made on the grounds to shoot a match of similar conditions, between the same parties on Decoration Day, at Middletown.

BELFAST GUN CLUB, Belfast, May 8.—The Belfast Gun Club was organized May 90 with 16 members, and John Healey, Pres.; Herbert Morrison, Vice-Pres.; Charles R. Coombs, Sec.-Treas. We have a club shoot every Wednesday afternoon, and the score inclosed is of our second shoot. We are all green hands at this kind of shooting.

Match at 15 bluerocks, 3 traps, 16 and 18yds. rise, Chamberlin rules:

Gray	010100011000011— 6	Morrison	010000000000001— 2
Stearns	100001001000011— 5	Sanborn	000110000101101— 6
Hardy	011001100100000— 5	Wilson	101101101000000— 6
Coombs	101100011011011— 9	Healey	001111111001101—10
Decrow	000000001101001— 4		

MANHATTAN GUN CLUB, New York.—The Manhattan Gun Club held its regular monthly shoot at Woodside May 8. Club rules, 7 live birds:

J A Hoffmann	0111111—6	L Roth	1010100—3
M Lichtenberger	1111110—6	J Geunerich	1011101—5
F J Lambrecht	1010110—4	H Schmid	1011010—4
J W Bayer	1011110—5		

NORTHAMPTON, Mass.—The Norwood Gun Club of Florence, Mass., has adopted the rules of the American Shooting Association. The club have fine shooting grounds on the track of the horse railroad. The Northampton Gun Club have changed their name to the Little Mountain Shooting Club and have fixed up their grounds. The Whitney Gun Co. are busy at work on the tools and fixtures for turning out guns; they expect to have a few on the market for the fall trade. A large gun firm of Birmingham, Eng., has written asking to work the English and French patents.

SUBURBAN SHOOTING GROUNDS.—Claremont, N. J., May 11.—Lefevre Trophy, 25 birds, 25 cents entry:

Johnson	11111111111111111101110—23
Simpson	0,1101011100100011111100—15
Fox	11001110101010011101110—17
Jersey	11111011 0111 0111111111—22
Collins	10110111111 11100111111—21
Jones	0010 0010100011001100101—11
Lindsley	1 0011111111111111111110—21
Hathaway	10310 00011 0111011 01—15
Quimby	11110010111010.1111110111—20

Eight sweeps followed at 10 birds each, Keystone rules, 50 cents entry. The scores stood:

Sweep No. 1: Johnson 8, Ferris 8, King 8, De Forrest 9, Jersey 8, Collins 4, Simpson 7, Smith 6, Hathaway 5, Jones 6.

Sweep No. 2: Johnson 9, Ferris 7, De Forest 10, Jersey 8, Collins 8, Simpson 4, Jones 5, Smith 7, King 6. Third divided.

Sweep No. 3: Johnson 9, Jersey 7, Collins 7, Ferris 8, De Forest 5, King 7, Smith 7. Third divided.

Sweep No. 4: Johnson 9, Jersey 9, Collins 8, De Forest 7, Simpson 5, Ferris 5, Smith 7. First and third divided.

Sweep No. 5: Johnson 8, Jersey 6, DeForest 8, Ferris 7, Collins 7. First and second divide.

Sweep No. 6: Johnson 7, De Forest 8, Jersey 10, Collins 8, Ferris 8, Lindsley 6. Second divide.

Sweep No. 7: Johnson 9, Jersey 9, De Forest 8, Ferris 8, Smith 6, Lindsley 8. First and second divide.

Sweep No. 8: Johnson 10, De Forest 8, Jersey 10, Ferris 9, Collins 7, Lindsley 7, Smith 7, Jones 6. First divide.

ALTOONA, Pa., May 13.—Mr. Chas. L. Dick, of Johnstown, came over Saturday morning to shoot a pigeon match with Dr. Thornton, of this city. Two matches were shot and ended in a victory for Johnstown. The contest was for $100 a side, Hurlingham rules. In the first match 12-gauge guns were used, and in the second 10-gauge, 30yds. rise and 80yds. boundary, 5 traps. The contest lasted 2 hours and 15 minutes. G. G. Zeth was the referee and Frank Copely and J. M. Dodson acted as judges. One of Thornton's pigeons fell outside of boundary. The Johnstowners were much elated over the victory, but neither of the contestants did any remarkable shooting. In the first match Thornton shot 6 birds with the second barrel and Dick shot 5, while in the second Thornton shot 4 and Dick 2 with the second barrel. In the score below the figure 2 means second barrel:

First Match.

Thornton	00210111020111212000211112—17
Dick	12212,1200111,000112011—19

Second Match.

Thornton	11101201022011—11
Dick	11122101111111101—15

C. F. H.

LAKEWOOD, O., May 11.—The Locksley Gun Club held their regular shoot for the club badge to-day on their range, which is situated opposite the Cleveland Nursery, on Madison avenue. The day was remarkably fair and a fine time was had. A number of spectators were present to witness the shooting. John H. Byer won the badge, without any close competitors, breaking 24 out of a possible 25. The conditions were 25 single standard targets, thrown from 3 traps, 18yds. rise. The following are the scores:

A Hall	10010101111011100 0111110—16
A Jinks	11 11011110011110061110—18
E Hanley	01101011100 00001111100 1—14
C Sanford (visitor)	01110311111111101011111—21
J C Andrews	11101010101111011111—19
J H Byer	11101111111111111111—24
E G Pease	10100101011101171010,001—15

In the sweepstake shoot which followed the club shoot, there were 5 entries of 25 cents each, in which Ryer won first money and Sanford second.

BALTIMORE, May 8.—The shoot between the Baltimore Gun Club, of Baltimore, and the North End Gun Club, of Frankford, Philadelphia, came off to-day. The contest was at 25 Keystone targets per man. The Baltimore Club won in brilliant style by a score of 223 to 215, beating the Philadelphians by 8 birds. The day was all that could be desired, and the Baltimore boys met the North End team at the station and escorted them to the grounds in fine style. After the first squad had shot the Baltimore Club invited the contestants to a first-class dinner. In the near future the shoot will be repeated on the North End Gun Club grounds. One special feature of the shoot (outside of the first-class scores made by Messrs. W. H. Wolstencroft, M. Hiestle and Capron) was that W. M. Pack made his score of 21 breaks out of 24 with one hand, having met with an accident to his left hand, which prevented him from using it:

North End Gun Club Team.		Baltimore Gun Club Team.	
W H Wolstencroft	24	Hiestle	24
J A Penn	14	Capron	24
W Garvin	19	Willard	20
H Thurman	15	Hartner	23
W M Pack	21	Cantler	18
Jos Thurman	19	Cleveland	21
Jas Wolstencroft	20	Frankin	19
H Ridge	17	Brower	18
A L Lumb	23	Mann	21
S Richards	20	Buck	17
Wm H Pack	23	Wroten	18
	215		223

WILMINGTON, May 11.—At the grounds of the Wawaset Gun Club, Wilmington, Del., there was a match between the Wawaset and the Kiamensi teams. The former had an easy victory, defeating the Kiamensi by a score of 218 to 151. The shooting was at 15 singles and 5 pairs of doubles. Appended is the score:

Wawaset.	S'gls.	D'bls.	Kiamensi.	S'gls.	D'bls.
R Miller	14	10	W Allen	11	8
G Huber	12	9	F Pyle	9	8
W McKendrick	12	8	A Rutter	9	8
J Ewing	10	9	J Crouch	9	5
D Buckmaster	14	5	W Ruth	10	3
G Miller	12	5	F Gray	9	3
H Buckmaster	11	7	W Deighton	7	4
W Buckmaster	12	6	G Lancaster	7	4
J Ryan	11	6	C Hurbert	6	4
C Buckmaster	10	7	G Mann	6	4
A Stout	10	4	J Pyle	6	3
W Smith	11	2	G Smith	5	5
	140	78		94	57

CHICAGO, May 10.—The regular weekly shoot of the Sherman Gun Club was well attended to-day, but on account of the wind the poorest scores of the season were made. Sprig won Class A badge and Flowers Class B badge. Following is the score:

Williams	00 11	11013	10101	11110	11011—17
Sprig	10111	10011	11011	11111	11111—20
Ward	1 0 10	10110	10111	01110	10111—17
Colt	01 10	11100	01111	01111	11110—18
Darst	10111	10001	0.011	11001	01001—14
Walters	11101	00100	10011	00001	01110—12
Hunt	11101	11101	10111	11010	00110—17

Bennett	03001	10010	10010	10011	10110—11
Warren	01011	10000	01010	11101	100.0—12
Fields	10111	01100	00111	10111	10011—16
Grossman	00 01	01100	11011	00111	10000—12
Shephard (visitor)	01011	01110	11101	10101	11110—17

HARRISBURG, Pa., May 9.—West End Social Gun Club. Match at live pigeons, 10 ground traps, 21yds. rise, 80yds. boundary, old Long Island rules, gold medal prize:

A Miller	1111010011—7	M H Brensinger	0101011111—7
H Bach	011.000011—5	Wm F Wade	1011111011—7
A Dunn	0000100110—3	H Roat	0010000011—3
C Sellers	1110011111—7	P H Hummel	0101011010—5
J Troup	1000010110—4	M Owens	0101111010—6
H Shoop	0111000011—4	G Marshall	1010100000—3
J Whiteman	1011111111—9		

The birds were a very good lot, and the conditions were very favorable and all had a good time. The medal was won by Mr. Jacob Whiteman.—H. M. B.

SAN FRANCISCO, May 5.—Owing to the threatening aspect of the weather this morning very few members of the California Wing Shooting Club assembled at the San Bruno traps to participate in the monthly prize shoot of the club. The score of the day was made by Ed Fay, who grassed his dozen in fine form, all with the first barrel. This is a feat which was never before accomplished on the San Bruno ground and very seldom on any ground. Frank Day, a Los Angeles wing-shot, enjoyed the courtesies of the club and shot with them, but, for want of practice, was not in first-class form. The score:

Fay	1111111111111—12	De Vaull	0000111011111—7
Slade	11 0111110111—10	Lewis	0010001100—4
Coffin	0101111011—8	Day	0111011111 0—8
Liddle	1111101111 0—10		

A pool shoot at 6 birds, with 5 entries, was then made up and resulted as follows: Slade 6, Fay 5, Coffin 5, Liddle 5, Day 4. The rain prevented further sport.

PHILADELPHIA, May 11.—A contest at bluerock pigeons be members of the University Gun Club to decide which class in the University is entitled to the championship and shall have the right to enter the inter-collegiate championship match during June, took place to-day near the College grounds. It was expected that teams from three classes would participate in the event, but only two teams faced the traps—'90 and '91. Class '89 had two representatives present, but the contest was for teams of four men, 25 bluerocks per man, they could not shoot. The famous amateur live pigeon shot, H. Yalo Dolan, who will go abroad during 1891, was at the head of the '90 team, and his superior skill as a trap shot, practically insured a win; the teams were otherwise about equal in point of scoring strength.

Class '90.		Class '91.	
H Y Dolan	23	Starr	5
Irwin	9	Williams	15
McIlvain	16	Johnson	16
Brinton	15—62	Lennig	9—45

BROOKLYN, May 8.—The Fountain Gun Club of Brooklyn held its monthly shoot at Woodlawn Park, Gravesend, this afternoon. The attendance was larger than usual, and the weather was fine. The splendid birds supplied contributed their share to make the shoot a success. The club medal was won by J. E. Lake, 27yds., who was tied, on 10 birds straight, with A. Eddy 30yds., and I. Kane 30yds. Lake and Eddy shot off, the former winning on 3 killed to his adversary's 2. Dr. Shields 30yds., R. Graves 25yds., H McLaughlin 25yds., J Shevlin 24yds. and Wheeler 25yds., all killed 6 birds out of a possible 7. Of two sweepstakes at 3 birds each, three miss and out, the first one was won by McKane, first on 10 straight, Conover second on 11 out of 12, and P. Donnelly third. McKane also won the second match on 8 straight, with Conover second with 10 out of 11. Referee, Mr. Goodwin; scorer, C. H. Dollar.

OMAHA, May 6.—The new gun club grounds across the river were formally dedicated this afternoon by a grand sweepstakes race, 25 bluerocks, 16yds. rise, participated in by the members of the local and Council Bluffs clubs. There was a very large crowd of spectators, and despite the high winds some very creditable scores were made as follows:

Hardin	0101111100111110111110010—17
Ellis	0111101100100110101111101—16
Blake	1111111011100101010011—17
Ketchem	1.0111011111111111101110—21
Westbooke	0.0111101101101101111111—19
Brucker	1100110011100101011101111—15
Neville	1011101011110101111111—20
Prince	1001111111111111111111—23
Brewer	1111111111111011111111—23
Culver	1110011101110011010100101—16
Tipton	1011111110101101116000111—18
Field	1111001111101110101111—20

Following this event came a match for $25 a side between J. J. Hardin and John S. Prince, which was won by Prince by the following score:

Prince	0011111111111011111101010—19
Hardin	0.011111111111111111100.0—17

WORCESTER, Mass., May 9.—At the meet this week of the Worcester Sportsmen's Club at Coal Mine Brook range the classification contest was resumed. All who broke 22 or more out of a possible 30 were in Class A, all others in Class B. The work in detail follows:

Class A.	Classif'n.	Prize.	Class A.	Classif'n.	Prize.
Dr Bowers	24	10	C R P Claflin	22	9
G J Rugg	24	10	C H Howe	27	8
M D Gilman	26	9	E T Smith	24	8
Geo Sampson	25	9	E S Knowles	26	7
B Franklin	23	9	C W Burbank	23	6
Class B.	Classif'n.	Prize.	Class B.	Classif'n.	Prize.
C Rice	21	9	A R Bowdish	20	7
E F Swan	19	9	H Edwards	11	6
W Henry	20	8	F Forehome	7	2
C Johnson	16	8			

WATSON'S PARK.—Grand Crossing, Ill., May 9.—The Gun Club of Chicago. Match at 10 tame pigeons, 5 ground traps, 30yds. rise, 80yds. boundary, Illinois State rules, medal prizes:

Rock	2111122112—10	Miller	1201210012— 7
Wadsworth	1012112122— 9	Barlow	2121112111—10
Place	2220122210— 7	Young	2121212121—10
Thompson	1111101210— 7	Price	2112211101— 9
Hollister	1111112211—10	Hamline	2011011102— 7
Rowe	2220111010— 8	Kent	2121212111—10
Smith	1020122121— 8	Stanley	2010101010— 5
Buechner	2122220201— 8		

Ties on medal for first at 5 birds, 30yds.: Rock 220, Hollister 2120, Barlow 2220, Young 21211, 01111, Kent 12111, 20220. Young wins medal.

Match at 20 Peoria b'ackbirds, 3 traps, 18yds. rise, Illinois State rules, medal prize: Miller 6, Wadsworth 16, Rock 15, Smith 14, Thompson 9, Young 16, Price 6, Place 12, Hamline 15, Kent 4, Barlow 14, Hollister 18, wins; Stanley 2.—RAVELRIGG.

TORONTO, May 9.—The third shoot for the McDowall & Co. gun of the Stanley Gun Club took place on the grounds this afternoon. G. White was the winner, with 21 out of 25 at 19yds. rise:

G White (19yds)	1111110110111101111101111—21
T Sawden, Jr. (21)	1010111100101101111111111—19

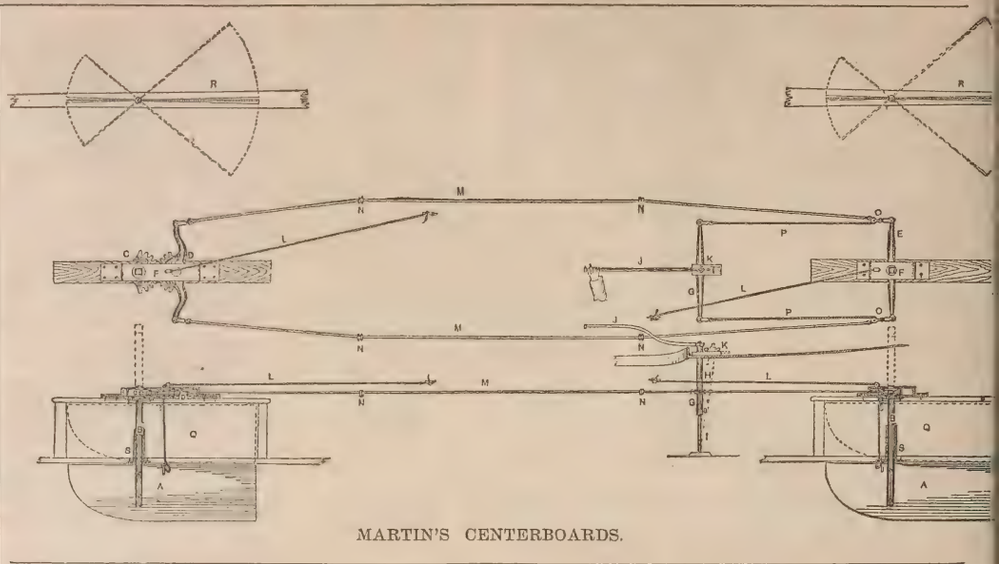
C Harrison (19)	110x0101100100retired.

Several sweepstakes followed.



WELLINGTON, Mass., May 11.—More than a score of shooters faced the traps at the grounds of the Wellington Club to-day, and several good scores were made in the silver pitcher and merchandise matches. In the pitcher match Field was tied with four others, with 14 out of 15 each, but in the shoot-off Field won. In the merchandise match the following scores were made: Schaefer and Stanton 14, Snow, Sanborn, Chase, Black, Perry and Dill second with 13; White, Dan, Warren and Melcher third, with 12; Hammond and Chase fourth, with 11. Schaefer and Allerton shot two 25 clay-bird matches, Schaefer winning the first on a shoot-off, and Allerton the second. There was also two 25 bird matches between Stanton, Choate and Perry. In the first Stanton and Perry divided, and in the second match, with Schaefer added, the scores were: Stanton 25, Choate 24, Perry 24, Schaefer 23, out of 25 birds. Following are the winners in the several sweepstake matches: Five pigeons, Stanton, Choate, Melcher; 6 bluerocks, Stanton; 8 pigeons, Stanton; 6 bluerocks, Choate; 6 pigeons, White; 6 pigeons, Allerton, Chase and Stanton; 7 bluerocks, Choate and Bradstreet; 8 pigeons, Stanton, Field and Perry; 6 pigeons, Dill, Choate and Stanton; 5 pigeons, White, Choate and Schaefer; 6 bluerocks, Schaefer, Dill and Stanton; 6 pigeons, Stanton; 6 bluerocks, Choate, Stanton, Dill and Schaefer; 6 bluerocks, Choate, White, Snow and Melcher; 5 pigeons, Stanton, Choate and Schaefer.

NEW JERSEY MARKSMEN.—A prominent New York sportsman proposes to match a team of 10 New Jersey live-bird shots against any similar team from any State in the Union. He will back the Jerseymen for any amount, and suggests a race of 250 birds, 25 birds each man, under any popular rules. A match of this character would create a furore in shooting circles, and if held on any accessible grounds would draw an immense crowd of spectators. In the last two or three years New York has become the trap shooting center of the country. There is to-day within a radius of fifty miles of the metropolis no less than 150 active gun clubs which hold weekly or monthly tournaments. Since the advent of artificial targets as a partial substitute for live birds, the colleges and athletic clubs throughout the country have added trap shooting as a prominent feature of sport. The Essex Gun Club, at a meeting held in Newark on May 8, decided not to assume the responsibility of managing the New Jersey State shoot. It will be held under the auspices of the Middlesex Club at Dunellen, providing the date does not conflict with the annual national tournament of that club; otherwise it will go to the New York Suburban Club.

NORWICH, Conn., May 13.—The Norwich Shooting Club will hold a tournament on its grounds in Norwich, Conn., on May 28 and 29, Tuesday and Wednesday. A $50 guaranteed purse will be shot for on each day. Mr. H. A. Penrose will have full control and management of the traps, which he will run on the Keystone system.—E. W. YERRINGTON, Pres.

TORONTO, May 11.—The third shoot of the Toronto Gun Club for prizes presented by the club was held at the Woodbine this afternoon. The following are the scores at 15 artificial birds: Felsted 13, McDowall 12, Townson 11, Sawdon 9, Phillips 13, Crow 11, Downe 11, Bayles 8. Felsted first, McDowall third.

DETROIT, May 11.—At the annual meeting of the West End Gun Club the following officers were elected for the ensuing year: President, John Archer; Vice-President, Chas. Smith; Secretary and Treasurer, J. Wm. Garrison; Captain, E. R. Wendt. The American Shooting Association rules were adopted, and it was decided to send a team to the Richmond tournament to compete for the club championship of Michigan and team trophy.

MARTIN'S CENTERBOARDS.

N. J. ATHLETIC CLUB.—The Board of Trustees of the New Jersey Athletic Club have agreed to the proposition of Messrs T. J. Parker, A. C. Wilmerding and E. E. Bigoney, the gun committee of the organization, to make clay-pigeon shooting a permanent feature of the sports patronized by the club. A large section of the club grounds at Bergen Point will be arranged as a range, and a cosy little cottage, to be partly used by gunners and partly by the lawn tennis element, will be erected. Matches will be shot every Thursday during the summer season.

BROOKLYN, May 9.—The Unknown Gun Club of Brooklyn held a shoot at Dexter Park, on the Jamaica Plank Road, this afternoon. Twenty members contested in squads of ten each for the handsome badge and two extra prizes. The rules of the club demand that the marksman hold the gun below the elbow until the bird is on the wing, and use one barrel only. M. Van Staden and Chichester were tried on 7 straight, the former winning on the shoot-off by killing 2 to his adversary's one. J. Vroom, W. S. Cahill, G. Knebel, Sr., and J. Rattjen killed 6 each out of a possible 7, Rattjen winning second money after a long contest with Vroom, by killing 6 and missing 3 birds. G. Haase, J. Rankin, W. S. Skidmore, G. Knebel, Jr., R. Monseos and Capt. Balzer killed 5 and missed 2 birds each. Dick Monsees won third prize on shoot-off.

CLEVELAND, O., May 7.—The Canfield Gun Club held their first shoot on the fair grounds Saturday. The following scores were made: M. L. Edwards 15, E. Thoman 14, Frank Holo 14, J. R. Taber 13, W. K. Osborn 13, George Strock 12, J. W. Harroff 10, J. Delfe 10, F. S. Osborn 10, H. Huxsaw 9, S. B. Parshall 5, C. W. Twiss 4.

COLLEGE SHOTS.—The '91 Gun Club, of Princeton, will shoot a match with the Penn Charter Gun Club, of Philadelphia, on Col. Stockton's grounds late in May. The class teams of the University of Pennsylvania will shortly enter into a contest which will divide the composition of the 'Varsity team. Classes '89, '90, '91 are represented by from four to six men each; the freshmen will not shoot, as there are no marksmen in the class. A team of four from each class will compose the 'Varsity team. Mr. Devlin, of the medical school, manages the teams and reserves.

WILLIMANTIC, Conn., May 7.—Willimantic Rod and Gun Club's third merchandise shoot. Match at 15 bluerocks, 5 traps and 10 clays, 3 traps, 16 and 18yds. rise; national rules: J. W. Webb 18. C. W. Smith 17. J. H. Ross 15, J. B. Baldwin 18. C. J. Alpaugh 12, J. Macfarlane 17, C. M. Thompson 11, A. W. Dunham 24, T. L. Clark 8, H. R. Alford 9, S. L. Johnson 17, F. Larrabee 13, I. A. Culverhouse 11, W. S. Crane 18, Geo. Taft 13.

NEW YORK TOURNAMENT.—Albany, N. Y., May 13.—*Editor Forest and Stream:* After many unavoidable delays the programmes of the tournament of the New York State Association for the Preservation of Fish and Game have been completed and will be issued this week. The executive committee of the State Association has secured nearly $1,500 in cash, and merchandise prizes to the value of $1,000, to be contended for in the various events. Sportsmen desiring programmes should send their names to Charles L. Gove, Secretary of the Elm Grove Gun Club of Albany, N. Y. The following named clubs have applied for membership in the Association: Trojan Gun Club, Troy; Independent Gun Club, Hoosic Falls; New York Suburban Shooting Grounds Association; Catskill Gun Club; North Side Gun Club, Long Island; Red Hook Gun Club; Union Gun Club, Brunswick; Waterville Gun Club; Little Falls Gun Club; Lakeside Gun Club, Geneva; New Berlin Gun Club; Olean Sportsmen's Association; Saratoga Gun Club, Saratoga Springs; Gloversville Shooting Club; Homer and Courtland Gun Club, Courtland.—H. B. DERBY, Secretary.

Every week we are obliged to defer to the next week trap scores which come in too late for publication in the current issue. It is particularly requested that scores be sent us as early as possible.

Canoeing.

A NEW STEERING CENTERBOARD.

THE accompanying illustration shows a new form of double centerboard for canoes, in which the board or boards take the place of the ordinary rudder, steering the boat in addition to furnishing the necessary lateral resistance. The boards, shown at *A A*, are each fitted to a shaft, *B B*, which rises or falls in the sleeve, *S S*, within the trunk, *Q Q*. The boards are raised and lowered, either together or independently by the lines *L L*. The after board is steered by the deck tiller, *J*, and yoke, *K*, while the forward board is operated by a second yoke and a pair of half gears, *D* and *C*. By raising the forward board 1¼in. the gear *C* is disengaged, the board being locked in the trunk in a fore and aft direction, the after board alone being used for steering. This arrangement permits the trunk to be placed well in the ends of the boat, leaving a very large space for sleeping and stowage, while there is no rudder, and the boat can be maneuvered with the greatest accuracy and delicacy. It has been tested by the inventor on the St. Lawrence River, and will be shown at the A. C. A. meet in August.

FLAGS FOR THE A. C. A. MEET.

THE regatta committee has issued the following circular: "In fulfilling one of the duties imposed upon them, that of obtaining suitable flags for prizes, the regatta committee for 1889 adopt the plan inaugurated last year of asking contributions from clubs. But in doing so they desire to point out that, to accomplish the object of having distinctive prizes, the flags themselves, and not merely a cash contribution, must come direct from the donors. Will you therefore please interest your club, and your club's lady friends, in this matter, and send us this year something that shall have a special value, not necessarily in the way of being costly, but in bearing the impress of the club and the locality from which it comes. In order to know what they may count on, the committee would be glad to hear from you, if possible, by June 1, by letter addressed to E. L. French (224 Jersey street, Buffalo, N.Y.), who takes charge of this department, and to whom the flags should be sent, if possible, not later than July 15.

"Those on the Canadian side may, to avoid questions of duties, etc., send flags to either of the other members of the committee, E. L. French, D. B. Jacques, E. B. Edwards, Regatta Committee."

SHUH SHUH GAH C. C.—This club gave last week a very interesting dramatic entertainment in the town hall of Winchester, Mass.

STANDING OR LOWERING RIGS.—*Editor Forest and Stream:* In my opinion the standing rig is both dangerous and inconvenient. Even if Lacowsic's crew could lower her small suit, could it be set again, or could it be lowered or set in any other way by luffing up in the wind? Even if Mr. Barney could accomplish these three seeming impossibilities, can others? The Dimple had five different sized standing sails and could perform none of the above maneuvers. Did not staunch believers in hoisting rigs adopt the standing just to keep up with the times? Would not the racing portion be on the same equality with hoisting and reefing sails as with standing? The only loss would be that of a dangerous and inconvenient sail to a few who do not use it for cruising. Besides, canoeing may as well be as safe as possible. Every one acknowledges the advantages of the hoisting and reefing sail, but who upholds the standing?—GEO. C. FORREST.

THE HUMBER YAWL CLUB.—We have received a copy of the club book of the Humber Yawl Club for 1889, an interesting little pamphlet, enlivened by some clever sketches, and containing considerable information about the club. Its headquarters are on the Humber about Hull, with an annex at Hornsea Mere, where the mate, Mr. Geo. F. Holmes, resides. The club has a membership of thirty-four, including two ladies, Miss Holmes and Mr. Tredwen, while Mr. W. G. MacKendrick of Toronto is the sole honorary member. The fleet includes thirty little ships of 12 to 22ft. length and 2ft. 6in. to 8ft. 9in. beam, canoes and canoe yawls. As the larger boats are used of necessity on very rough water they are mostly fine, able little cruisers. A summary of the club's work in '88 includes a very pleasant cruise of five canoe yawls in Holland. The officers are: Capt., J. M. Hamilton, Jr.; Mates, W. Gray and G. F. Holmes.

CANOEING IN THE FRATERNITIES.—During the winter a number of members of the D. K. E. and Psi U. clubs of New York have taken an interest in canoeing, and in order to bring the sport into notice Com. Burchard and Vice-Com. Curtis of the New York C. C. arranged for an entertainment before each of the two clubs. The first was given on May 10, under Com. Burchard's management, at the club house of the D. K. E. Club, of which he is a member, and the second on the following evening by Vice-Com. Curtis before the Psi U. Club. The entertainment consisted of an explanatory talk on canoeing, illustrated by stereopticon views, including a number of new ones by Stoddard, of the A. C. A. meet of 1888, and also some excellent views of the cruising grounds about New York.

A SPRING MEET ON THE DELAWARE.—The Red Dragon C. C. invites canoeists, whether club members or unattached, to attend the meet at Delanco on the Delaware River, from May 27 to June 1. A series of races has been arranged and nearly thirty prizes will be given, the races commencing on Decoration Day. A very fine site has been selected, and the camp will offer every inducement for cruising and racing. The meet is thus far an experiment, but the committee is determined to make a success of it. The new canoe we mentioned last week as building by Wiser, is not for his own use, but for Mr. Alex. Arnois, of the Red Dragon C. C.

THE RADIX FOLDING CENTERBOARD.—This board, which is now in general use for canoes and other small cruising craft of all kinds, is now made by the W. R. Baker Mfg. Co., of Watertown, N. Y., the maker of canoe fittings and brass work.

DEATH OF MR. MOLLOY.—Canoeists on the Passaic will regret to hear of the death of Mr. A. C. Molloy, a well-known member of the Arlington C. C., which occurred lately. He was also a member of the A. C. A.

CORINTHIAN MOSQUITO FLEET.—A regatta will be sailed on June 8, off Larchmont, instead of in New York Bay, as first intended. A special canoe race will be sailed on June 29.

Yachting.

VALKYRIE'S SIZE.

THE following extracts, the former from the *Telegram* and the latter from the *Commercial Advertiser*, are samples of articles that are found lately in the daily press, founded on the statements of ex-Com. Smith, to which we alluded last week:

"The Valkyrie furnishes the principal theme for yachtsmen at the present time. There is much discussion relative to her dimensions. There are rumors that the new English yacht is more than 85ft. over all, as reported by cable, and that she is really 94ft. over all, having a 24ft. overhang. If such proves to be the case she will be the same length over all as the Puritan, 2ft. shorter than the Priscilla and Atlantic, and 6ft. shorter than the Mayflower. The Volunteer's overhang is 21ft."

"Don't let us deceive ourselves as to the probable ability of the Valkyrie by underrating her. She will undoubtedly be the most able boat with 70ft. waterline of any yet built. She represents the latest in the science of yacht building, and let me tell you that means a big advance in the last few years. Compared to her the Bedouin, Gracie and even the Titania or Katrina are out of date just as much as the 40-footers of last year are a long way behind the development of that class as seen in the fleet now building. The Valkyrie's waterline measurement just admits her within the 70ft. class. But consider her length over all; whereas the Bedouin's length over all is a little more than 80ft., the Valkyrie's is about 10ft. greater. That tells the story. Her high freeboard and great overhang give her immensely increased power by admitting of a much larger spar plan and sail area. You will see that the Valkyrie will bring to this country a duplicate rig. She will have one for the race with the Volunteer much larger than that she will race under in England. With her great overhang she has extraordinary power compared to her waterline length for working a great sail plan. When she settles down under the pressure of canvas she will undoubtedly carry in this country, she will be nearer 85 than 70ft. on the waterline. Don't let us American yachtsmen fool ourselves with the idea that the Volunteer will have a walkover, or Englishmen complain that the selection of the Volunteer to defend the Cup is unfair and unsportsmanlike. The Valkyrie, I am certain, will make our eyes open when she shows her paces on this side. Watson, who designed her, is nobody's fool, and knowing perfectly well that the Volunteer was the most eligible yacht in America to defend the Cup he would not have advised challenging unless he thought the Valkyrie stood a fair chance of beating her."

Such simple nonsense would be unworthy of notice if it were not for the fact that it is given out with intention of deceiving the average reader into the idea that Mr. Watson is trying to overreach the New York Y. C. by building a larger boat than the rules allow; consequently, and here is the point, the committee is justified in putting Volunteer or Puritan against him. To the

uninitiated the talk of a 70ft. yacht that is nearly 100ft. long over all, and that will gain in real length when under way, is all well enough, but practical yachtsmen know that beyond a certain point, which has been reached in Katrina and Thistle, the long ends are a positive disadvantage. It is yet an open question with experts whether the modern clipper stem is on the whole superior to the old plumb stem of the cutters, and some contend that the increase of area at the extreme end, where its leverage is greatest, is a serious hindrance in windward work. As to the after overhang, it is good, in so far as it gives increased deck room and a longer purchase for the mainsheet, but what is added beyond is a loss, save in appearance. It is quite probable that Valkyrie may measure 94ft. over all, but there is nothing to apprehend from it, and she is likely to lose more than she gains. Her waterline is 70ft. and the official measurement is 85ft. Katrina measures 92ft. 6in.

The official measurement is taken from the foreside of the stem under the bowsprit to the afterside of the sternpost at deck. The sternpost cannot take over 45°, consequently it would overhang the after end of the loadline a distance equal to its height above the water. This would be a little greater than the freeboard, owing to round of deck, and may be estimated at about 3ft. 9in. to 4ft., thus leaving 8ft. to be accounted for. Of this 70ft. is the loadline, leaving a forward overhang of 11ft. This sounds very long, but it must be considered that while the U. S. rule only measures to the "wood ends" or rabbet of stem, Lloyd's rule measures to the extreme foreside of the figurehead. Thus, in Katrina's case, by the former rule her overhang at bow is 6ft., and by the latter 10ft. 6in., or some 9in. less than Valkyrie's.

As to after overhang nothing is yet known, but it is unlikely that it will be longer than Katrina's, as far from being an advantage, it means only an excess of weight in a very bad place. The advantages of extreme overhanging ends, apart from appearance, are as follows:

Bow.	*Stern.*
Shorter bowsprit and more foot to staysail.	Longer hold on main boom.
Increased deck room.	Increased deck room.

Against these must be offset the disadvantages of weight in the extreme ends, and of a long tail that may be dangerous in a real sea, points which must serve to limit the designer. The two advantages named may be had with an overhang of about 8ft. forward in a 70ft. boat, any extra length beyond the point where the gammon iron can be placed with advantage, must solely be in the shape of ornamental work, and a hindrance to speed. At the stern the advantages, so far as mere form and buoyancy are concerned, are realized as fully in some of the old sloops, with short but powerful counters, as in the modern cutter with a long tail high out of water, as Bedouin or Clara. Any great excess of displacement about or abaft the sternpost must so alter the trim of the yacht as she heels that her speed will suffer. The only advantages to be gained, the two mentioned above, can be had by an overhang of about 15ft., all beyond this is but dead weight. Valkyrie has probably under 95ft. over all length, or, measured by our rule, about 90ft., and she will be smaller, less powerful and carry some 800lb. less sail than Katrina. It would no doubt be gratifying to the advocates of Volunteer to prove that Mr. Watson was endeavoring to trick them, and that they had good grounds for putting the big boat against his 70-footer, but the figures do not bear them out.

THE L. Y. R. A. MEETING.

THE annual meeting of the delegates of various clubs composing the Lake Y. R. A. of Lake Ontario was held at Rochester, N. Y., on May 11, the following gentlemen being present in addition to Pres. Newell and Sec'y Evans: Mr. Biggar, Bay of Quinte Y. C., Belleville; Messrs. Carruthers and Stewart, Kingston Y. C.; Messrs. Jarvis, Monk and Stewart, Hamilton Y. C.; Messrs. John Tuttt, E. B. Mott and Allen Ames, Oswego Y. C.; Messrs. Robertson and Dick, Royal Canadian Y. C., Toronto; Messrs. Walbridge and Leary, Rochester Y. C.

The meeting was called to order about 8 P. M. in the rooms of the Rochester Y. C. The treasurer's report was read, showing a balance of $60. It was decided to reduce the circuit races to 5 each year, Toronto, Hamilton, Rochester and Oswego, with Belleville and Kingston alternating. The Kingston Y. C. had already announced its determination to hold no regatta this year, but one will take place at Belleville. Some minor amendments were passed, but the proposal to base the representation on the membership of each club was lost, being opposed by Oswego, Rochester, Belleville and Kingston. The date of the annual meeting was also changed from the second Saturday in May to a corresponding date in November, thus allowing the changes in the rules to be made at the end of the season. Some discussion occured over the rule relating to the postponement of races, the final decision being that no race should be postponed where any one boat succeeded in sailing one round in one half the allowed time, and that the second and third places should be determined by the order in which the competing yachts should pass the home buoy in the last completed course.

An amendment providing that every yacht competing in a regatta should carry her sailing number conspicuously displayed on both sides of her peak, and that the results of any mistake arising from a neglect of this rule should be suffered by a negligent yacht, was unanimously adopted.

A lengthy discussion of the proposal to change the measurement rule, to which we alluded last week, resulted in the appointment of the following committee to work during the season and report at the November meeting: Chairman Jarvis, of Hamilton; Ames, of Oswego; Bigger, of Belleville; Carruthers, of Kingston; Walbridge, of Rochester; Dick, of the R. C., and Secretary Evans, *ex officio*. A new class, 30.t. and under, was inserted, and the following dates arranged: Rochester, Aug. 15; Hamilton, Aug. 19; Toronto, Aug. 21; Belleville, Aug. 26; Oswego, Aug. 29. The following officers were elected: Pres., Com. Monk, of Hamilton; Vice-Pres., ex-Com. Mott, of Oswego; Sec. and Treas., George Evans, of the Royal Canadian. Executive Committee: Com. McMurrich, Oswego Y. C.; Capt. Bigger, Bay of Quite Y. C.; Mr. Carruthers, of Kingston, and Matt. Cartwright, of Rochester.

Capt. Bigger moved a vote of thanks to Secretary Evans, and also that the surplus in the treasury be expended in purchasing a testimonial for him, and a committee was appointed to do so. The meeting adjourned to meet at Hamilton on Nov. 9. In the evening a dinner was given at the Livingston, and on Sunday the visitors were taken for a trip to the Lake and Irondequoit Bay. Mr. Ames started from Oswego for Rochester in the Merle, but was compelled to return by calm weather. He will not deliver the yacht to her new owners until June 1.

RETALIATION OR "FRIENDLY COMPETITION."

SEVERAL of the New York papers, which are seeking to defend the action of the New York Y. C., have lately advanced a proposition, which, if admitted, must open up a very wide field for discussion and tend to further complicate and degrade the question of international competition. According to what the *Tribune* terms the "doctrine of reciprocation," the conditions on which British yachtsmen may be allowed to race for the America's Cup should be based, not on the commonly accepted principles of fair play which govern gentlemen sportsmen, but on such instances of unfair dealing, real or alleged, as British yachtsmen have been guilty of in the past. In accord with the same reasoning the *Herald* instances Sappho and Fortuna's failure to get a race, while the *World* devotes more than a column to an inflammatory review of past races, in which the baseness of British yachtsmen is offset by repeated instances of generosity and magnanimity on the part of Americans in general and the New York Y. C. in particular. If this view of the case is a correct one there is no reason why the question of retaliation should be limited by mere yachting precedents, but the terms governing the America's Cup may be made to cover various other international episodes, such as the Stamp act, the searching of American vessels prior to 1812, the Heenan-Sayres prize fight, the Alabama claims and the various squabbles of English and American oarsmen. It is true enough that there are many instances on record in which a total lack of fair play and a sportsmanlike spirit has interfered in an international race from the time when America could find nothing to meet her after her voyage across the Atlantic down to the last conspicuous instance offered by Mr. Chamberlayne's evasions and final withdrawal of his challenge, but though there may be a sort of rough justice in the idea of retaliation on future challengers, it is evident that such a course, even though well deserved by their opponents, would be disgraceful to American yachtsmen.

The America's Cup is the greatest international trophy in the whole world of sport, and in justice to themselves American yachtsmen cannot afford to defend it under any conditions which are not perfectly fair to the challengers, as well as the defenders. The question of how it was first won, which is advanced as a leading plea in the argument for retaliation, is utterly foreign to the subject for two reasons. First—Because the owners, after holding it for some years, gave it under express conditions, for a specified purpose, and how it came into their possession had no connection with this purpose; it would have been the same if they had bought it. Second—The racing of a fleet of yachts of all sizes, with or without time allowance, which was often a matter of necessity forty years ago, has long since passed out of date, and it is universally admitted that such a contest is in no sense a race. With the closely matched fleets of to-day, where races are won by two or three minutes, or even by seconds, it would be an absolute impossibility for one boat to win from a fleet of twelve or fifteen, most of which would be as large or larger. Were such a position maintained to-day, as the *World* practically claims it should be, the only result would be that no one would challenge.

Just what the conditions governing the Cup should be is a very difficult matter to determine, but all must agree that when certain principles and laws are recognized as fair in governing the regular races between home yachts, they cannot be far wrong when applied to international races of infinitely greater importance. The conditions mutually agreed on in such private matches as those between Katrina and her class may be accepted as a very fair standard, out these are very different from the ones now laid down for the America's Cup. In spite of the comparatively insignificant size of the boats, the great feature of the present season will be the 40ft. racing, simply because the boats are so well matched and sail under such equal conditions that the best boat is apt to win a majority of races. The contrary effect is already seen in the lack of all interest in the international race since it is a foregone conclusion that only Volunteer can be chosen. The America's Cup is offered, not only to English yachtsmen, but to the world; not for this year or the next, but as long as yachting shall exist, and Americans cannot afford to sacrifice permanently their reputation for fair play before the world to the gratification of private grudges and quarrels, which, it is to be hoped, will be forgotten long before the America's Cup ceases to be recognized as the great yachting trophy of the world.

A BRIEF STATEMENT OF FACTS.

THE New York *Times* of May 10 speaks as follows concerning the new deed or gift: "It may be said that nine-tenths of the members of the New York Yacht Club are opposed to the new deed of gift, and, as stated by a prominent member yesterday, it was railroaded through the club by a star-chamber proceeding, and never passed upon by a vote of the club."

This fits the case exactly, the last revision was never submitted to a vote of the club, nor were its contents known save to a select few prior to its final adoption. The gentlemen who stood as sponsors to the new deed no more dared to risk an open vote on it than they did the question of the 70-footers at the last meeting of the club.

RELUCTANT CONCESSIONS.

IN an article to which we allude elsewhere the New York *World* sets out to prove at some length that the action of the New York Y. C., from the time of the original race for the Cup in 1851, has been a series of generous concessions to the unjustifiable demands of challengers. There is no doubt but that the present position of the club is very different from that which it took in 1870, when the first challenge came, but how this change came about is another matter. The original position of the club, and the "concessions" which it has made are as follows: The club claimed the right to sail as many vessels, of all sizes, as it chose to muster, against a single challenger, granting him but one race over a narrow, tortuous course in smooth water for which its yachts were specially built, while the challenger was obliged to cross the Atlantic. In the course of thirty years it has come down from this independent and unsportsmanlike position to one more nearly in accordance with fair play and racing usage, not through a series of free concessions, but by means of a series of crawls from one untenable position to a slightly better one, each time following, not leading, the advance of public opinion and the development and perfection of match sailing. The various steps are as follows:

1871. The agreement to sail a series of matches, boat for boat, in place of one match against the fleet; but at the same time retaining the right to select the defender for each race from the fleet on the morning of the race; also the granting of some outside races. The club was forced to abandon the idea of sailing the whole fleet, as in the previous year, by a very strong letter from Mr. Geo. L. Schuyler condemning such a proceeding.

1876. The agreement to select one yacht in advance as the sole defender, to meet the one challenger. This concession was the result of lengthy correspondence and negotiations. As late as 1881 the club reserved the right to select a defender on the morning of each race, but since then has abandoned it.

1887. One subject of discussion in all races was the inside course of the New York Y. C., over which one race at least of each series has always been sailed, and, though the club has not formally abandoned the right to races over this course, it is practically done away with, and in all future races the chances are that outside courses will be selected.

Thus, in place of one race against a fleet over the inside course the club has finally come to a series of matches, with one boat chosen in advance as a defender, and over outside courses. So far from these concessions being made freely, each has been the subject of long and often heated controversy between the officers of the New York Y. C. on the one hand, and the challenger, backed by independent American yachtsmen, and to a certain extent by a tardy public opinion on the other. Even now there are points in dispute, such as the matching of a small boat by a large one, the demand for all the important dimensions nearly a year in advance, and the practical prohibition of any changes of trim and ballast by the challenger; which are disputed as hotly as the question of one against the fleet was in 1870, and which must end as surely in the same way as that, by the defeat of the New York Y. C. In the endeavor to support its position the *World* skims over the tedious Ashbury business, selecting such parts as best suits its case. It would not pay now to stir up the turbid pool of ink that has settled for so many years, or it might be shown that however captious, quarrelsome and complaining Mr. Ashbury was, he more than met his match in the persons opposed to him. Even though he may be as black as he is painted, it is only fair to give the devil his due, and the statement of the *World*, that Mr. Ashbury proposed to sail his yacht in twelve races, and to claim the Cup if he won a single race, is as false now as it was when first made by the New York papers in 1871. The proposal, according to his challenge, was to sail twelve races, only claiming the Cup in the event of winning a majority of the twelve.

As interesting reading, and an abstract study of ancient history, the records of previous Cup races have a certain value, but they have little bearing on the question of what terms should govern the races of the future. In the period from 1850 to 1855 yacht racing developed from infancy to sturdy manhood, the old squadron races died out and modern match sailing took their place, a system of rules for measurement, classification, sailing, and all pertaining to match racing has grown up on both sides of the Atlantic, differing less and less each year, until now the rules and customs of Britain and America are practically the same. Match sailing between the yachts of the various classes of each home fleet has reached a degree of refinement and perfection never dreamed of at the time when the America started in that eventful race, and it is full time that the conditions governing the great international races should be made to conform, not to the musty traditions of the past, but to the most enlightened ideas of racing yachtsmen.

VALKYRIE'S CHALLENGE.

THE expected letter from the Earl of Dunraven arrived in New York on Monday by the steamer Servia, but until the contents, which are thus far known only to Ex-Com. James D. Smith, are made public, it is impossible to say how matters stand. In addition to a cablegram correcting the figure 6, mentioned as the time limit in place of 7 hours in Lord Dunraven's first letter, Secretary Oddie received the following on May 11:

ROYAL YACHT SQUADRON CASTLE, COWES, April 29, 1889.

MY DEAR SIR—I beg to acknowledge a receipt of your cable of April 11, accepting unconditionally Lord Dunraven's challenge for the America's Cup, of which I duly informed them. I have also to acknowledge the receipt of your letter of April 12, confirming your cablegram, but containing a condition not previously alluded to, which will be laid before the members of the Royal Yacht Squadron at the annual general meeting to be held May 11. Believe me, my dear sir, yours very truly,

RICHARD GRANT, Secretary Royal Yacht Squadron.

To J. V. S. ODDIE, Esq., Secretary New York Yacht Club.

According to the cabled reports of the meeting of the R. Y. S. on May 11, the question of Valkyrie's challenge was not discussed, but the R. Y. S. is evidently aware, at last, of the terms, expressed and implied, under which the challenge is made, and that it is by no means ready to accede to these terms. A letter in the *Field* of May 4, signed C. S., contains a plain statement of the case as it now stands, and gives some good advice to British yachtsmen and prospective challengers. A meeting of the New York Y. C. will be held to-night.

THE NORTON SYSTEM AGAIN.

THE Norton Company, whose absurd claims were exposed by the FOREST AND STREAM last season, is out this spring with new advertisements in such papers as will publish them, promising complete immunity from capsize or sinking, together with great speed. Mr. Wiener's ambitious cruise has fallen through, but another equally foolhardy navigator has been found in the person of Captain Josiah W. Lawlor, son of Mr. D. J. Lawlor, the designer and builder, of Chelsea, Mass. A new craft, the Neversink, has been built for exhibition this year at Paris, and on May 11 she sailed from New York for that place, going through the Sound with the intention of calling at Boston. She is a keel boat, 36ft. over all, 30ft. l. w.l., 12ft. beam and 2ft. 6in. draft, with plumb stem and a yawl rig. As a matter of necessity a great part of the internal space is given up to the water ballast tanks, but she is said to carry stores for 50 days. Her crew includes Captain Lawlor, Hans Hansen, and Edward S. McKinney, a son of the treasurer of the Norton Co. Captain Lawlor, though only thirty-five years old, has followed the sea for twenty-three years, and is recognized as an expert and skillful sailor. He is the hero of shipwrecks and narrow escapes without number, but he will have added considerable to his experience before he reaches Paris in such a craft.

POILLON'S YARD.—The new wood keel has been put in the Gracie at Poillon's yard, and beneath it has been run 14 tons of lead, making a keel about 18in. deep. The frame has been stiffened by the addition of new floors. The mast has been removed, as the step, as well as the centerboard trunk, were replaced. At the same yard the new stern on the Ægir is nearly completed, and promises to look very well, though it is a difficult matter to put a long overhang on so wide a boat. The Carroll 40 is planked, decked and the joiner work is well under way, so she will soon be afloat, but like many of the others she will not be ready in time for good work in the June races. Mayflower has had her mast removed and the partners moved forward about 3ft., a hatch taking their place. The mainmast will come against the after end of the trunk. The inside chainplates were hard to get at, being between the frames and the planking, but they have been cut off just below the planksheer. The new chainplates will be outside. The dimensions of her spars will be as follows: Mainmast, 17in. at partners, 16in. at hounds, 8¾in. at upper cap, 63ft. deck to under side of trestle trees, 10ft. head, and about 9ft. housing; foremast of Oregon pine, 56ft. 3in. from deck to under side of trestles, head 8ft., diam. at head 17in., at hounds 15in., at cap 8½in.; the main boom will be made from the old boom, and will be 66ft. from shackle for tack of sail to extreme end, diam. at slings 13in., at inner end 8in., outer end 6½in.; maingaff will be made from the old gaff, and will be 30ft. 6in. from shackle to end, of oval section 8¾×7¾in.; from shackle to end of foreboom will be 29ft. 6in., diam. 8½in.; length of foregaff from shackle to end 30ft., diam. 7×6½in.; the main topmast will be made of the old stick, and from it to hounds will be 38ft., pole 6ft., diam. 8½in., reduced to 6½in. at hounds; foretopmast 34ft. from fid to hounds, pole 4ft., diam. same as maintopmast; spinaker boom will be 61ft. long by 8in. diam.; clubtopsail yard 49ft.×6½in; club 33ft.×6½in.; the distance between the center of the masts will be 82ft.; the bowsprit will remain unchanged. She will soon be ready to join her sister who has gone before into the two-stick division of the fleet. Clara also lies at the dock, nearly ready for work. Captain Barr and his crew have been busy for a month, and she is now in fine condition with new wire rigging throughout. The steam yachts Isolne, Lagonda and Meteor are also at the yard.

ST. LAWRENCE Y. C.—The headquarters of the St. Lawrence Y. C. have been removed to a very good location at Pointe Claire, where courses have been laid out. The season promises to be the liveliest yet known. The following fixtures have been arranged: May 24, 10 A. M.—Race for skiffs, two classes. First of series for Rear-Commodore's cup, 1 P. M.—Yacht race; first race for Commodore's cup, entrance fee divided between second and third yachts. May 28, 3 P. M.—First race of series for Vice-Commodore's cup. June 22, 3 P. M.—Second race for Vice-Commodore's cup; second skiff race for Rear-Commodore's cup, two classes. June 29, 3 P. M.—Third race for Vice-Commodore's cup. Third skiff race of series, two classes. June 30—July 31—Club cruise. July 6—Fourth yacht race and fourth skiff race of series. July 20—Fifth race of series for skiffs. The entrance fee to each race is fixed at $1. The prizes for the yachts are: Vice-Commodore's cup, for best in the series, and in addition the first boat in each race will receive $10, the second $8 and the third $4. For skiffs of the first class there is the Rear-Commodore's cup for the best in the series of five races, in addition to which the first skiff receives $5 and second $3 in each race. The prizes for second class skiffs are $5 for first and $3 for second, and they may also compete in first class for the Rear-Commodore's cup. It is also proposed to hold another race in September. The club cruise will start from Pointe Claire after the race on June 29, returning in the afternoon of July 1. The destination has not yet been decided on, and will be announced later.

MONTGOMERY SAILING CLUB.—Second regatta, May 5. Course, Norristown to Indian Creek and return; distance, 5 miles. Wind fresh, westerly:

	Length.	Start.	Finish.	Corrected.
Volunteer, tuckup	15.00	1 40 00	3 05 20	1 25 20
Igidious, tuckup	15.00	1 40 00	3 06 35	1 26 35
Nellie, tuckup	15.00	1 40 00	3 06 50	1 26 50
Pennsylvania, hiker	16.00	1 46 20	3 11 35	1 31 35
Playford, tuckup	15.00	1 40 00	3 12 22	1 32 22
Stranger, sharpie	15.00	1 40 00	3 12 45	1 32 45
Iola, ducker	15.00	1 50 00	3 36 00	1 36 00
Priscilla, tuckup	15.00	1 40 00	3 17 05	1 37 05
Ino, ducker	15.00	1 50 00	3 17 45	1 37 45
J. S. Lever, tuckup	15.00	1 40 00	3 18 08	1 38 08
Vesuvius, tuckup	15.00	1 40 00	3 24 35	1 44 35
Gracie, skiff	12.00	1 50 00	3 28 05	1 48 05
Emma L., tuckup	15.00	1 40 00	3 34 30	1 54 30
Starlight, canoe	16.00	1 34 40	Withdrew.	

It was a neat dead to windward to Indian Creek and a run home. Volunteer, sailed by Vice-Com. George Ritter, has won both races this season. Judge, Wm. Alcorn.

GITANA'S CRUISE.—Writing from Naples, under date of April 25, Captain Sherlock of the Gitana says: "We have had very bad weather here this winter, but it is getting fine now. There have been lots of mishaps. One English schooner got a bad shaking up in March. She lost two boats, jibboom and foresail, and her ballast came up through her cabin floor. We were out in the same blow, but came out all right. On the 20th of March we lost one boat, and one of our poor sailors was knocked overboard and lost. They were tying up the foresail and the gaff got loose and swung him overboard. It was blowing a gale and we did all we could to get him, but it was no use, we could do nothing for him. I signalled to a steamer and she run right down in the place where he fell, but I don't think they got him. We were running before the gale under square sail at the time. I tell you it was a hard sight for me, but I could do nothing. We hauled to as quick as possible and lay in the trough of the sea, and it was dangerous, too, but it was no use. We were driven away from him. It was blowing a hurricane. I tell you I felt bad. We will be soon coming home again and I won't be sorry, for it has been a hard cruise, and if the old Gitana had not been a good one, she would not have stood it."—*Boston Globe, May 12.*

CHANGES AT MUMM'S YARD.—Mr. John F. Mumm has lately leased his building yard at Bay Ridge to Mr. H. C. Wintringham, for a term of nine years; being obliged to give up the business on account of ill health. Mr. Mumm began in a small way many years ago near the old home of the Brooklyn and Atlantic clubs, at Gowanus. When the Atlantic Y. C. moved to Bay Ridge he accompanied them, leasing a part of their grounds, and afterward building a basin and ways of his own just above them, where he has carried on a successful business. Mr. Wintringham has long been known as a most enthusiastic Corinthian, a thorough yachtsman, and an amateur designer of no mean skill. He has been engaged in mercantile pursuits in New York until the past year or so, but his spare time has been given to sailing and designing. In connection with designing and building he has had intimate business relations with Mr. Mumm for a long time, and knowing the latter's desire to retire has taken the yard from him. Mr. Wintringham is well fitted to make a success of his new experiment, and it will be a decided gain to have a good yard near New York conducted by a man of his integrity and ability.

WORK IN THE YARDS.—At Lawley's Merlin is nearly ready for a trial trip; Nanon, Nepentue, Verona and Marguerite are about completed but have not left the yard. Lackawana is planked, the Hasbrouck 40 is in frame, as is Mr. Owens's 45-footer. Minerva has received her new boom and sailed for New York where she will make her headquarters this summer as flagship of the Corinthian Y. C. The McVey 40 Helen is about completed, but the 30 Helen is not yet launched. The other 40, Alice, is planked and the deck frame is partly completed. At all the yards the work of launching and fitting out is going on rapidly.

CAPSIZED CENTERBOARDS.—The sloop Mayflower of Lynn, Mass., lately capsized, nearly drowning her owner and two friends. She was towed in by Swampscott fishermen, who demanded $60 salvage before delivering her up.

THE JET PROPELLER EVOLUTION.—This new craft is now nearly completed at Lennox's yard, South Brooklyn, where she has been built for Dr. Jackson, inventor of the machinery and owner of the experimental boat Prima Vista. The new boat is 110ft over all and 22ft. beam, built with three skins and no frames proper, the outer skin being mahogany. The motive power includes a very powerful pump, built by the Worthington Hydraulic Works, connected to two 8in. suction pipes and two ejection pipes of but ¾in. in diameter. The water will be taken in through the large pipes and expelled under very heavy pressure from the small ones. There will be two systems of pipes, one for driving ahead and one for reversing and going astern. The steering is done by changing the direction of the nozzles, there being no wheel nor rudder. The steam for the pumps will be furnished by coil boilers. The cabin is very elaborately fitted in mahogany, with berths for six persons, with quarters for the crew abaft the machinery.

A NEW OFELDT LAUNCH.—The beautiful little steam launch Marie, built for Mr. Wilbur Hawkes, of Brooklyn, was delivered to him on May 12. The builders, Messrs. Frank Ofeldt & Sons, of Fifty-sixth street, Brooklyn, declare she is one of the most compact and easy running boats that was ever turned out of their shop. She was taken from Bay Ridge to Jamaica Bay, and made the run in less than three hours, without wetting a hair. Frank Ofeldt, Jr., had charge of the engine, and Mr. Ernest Ofeldt superintended things in general. Mr. Howard Newberry looked after the inner man, and Mr. Hawkes and his guest, Mr. Robert Smith, looked on in wonderment at the grand success of the Marie and her crew. On arriving at Canarsie Mr. John Cavanagh saluted the trim little craft and crew, and after invitation from Mr. Hawkes took several friends out for a sail around the bay. The boat was much admired by the many thousands on the piers as she scudded along to a 10-mile gait.

A TRICK ON THE NEW YORK Y. C.—A young Englishman, calling himself Albert C. Sutton of the Royal Navy and claiming to be a brother of Sir Richard Sutton, has succeeded in gaining the *entrée* of several New York clubs, including the Union, Manhattan and New York Y. C., as well as the Tuxedo Club. After a brief but brilliant career he has vanished, leaving mementoes in the shape of bills and I. O. Us among his new acquaintances, as well as at the Hoffman House. It is needless to say that he is not a brother of Sir Richard Sutton.

AN AMATEUR'S STEAM YACHT.—Mr. David M. Little, the Boston photographer, is now at work on a steam yacht for his own use, most of the work being done by himself. She is building in the studio of Mr. Ross Turner, at Salem, and is 35ft. 6½in. over all, 29ft. l.w.l., 7ft. 4in. beam and 3ft. draft. Her frame is of white oak, natural crooks, with white cedar planking, fastened with brass screws. The engine, a 5&7×7, compound, was made by Whitney & Crowther, of Boston, and the boiler, 33in. diameter and 54in. high, with 160 tubes, 1½in., by the Rochester Boiler Works. The yacht will be launched this month.

CAVALIER.—This schooner, built last year at a part of Long Island where the news of the invention of lead keels had not penetrated, was ballasted by a deep wood keel of heavy yellow pine and some inside metal. One season's use has seen her hauled up for the addition of a lead keel, at considerable expense. She was out last week at Wintringham's yard, where 9½ tons of lead were cast in the keel, the wood being cut away. Of course the yacht will be improved by the change, but the defect of useless weight in all parts is one that can never be remedied.

A NEW CUP DEFENDER.—Mr. Nathaniel C. Moore, a builder of working craft in Baltimore, proposes to build a 70ft. craft to enter the trial races next fall. She will be modeled after an old centerboard working sloop, the Baltimore, of alleged phenomenal speed, and will be but 72ft. over all, 70ft. l.w.l., 23ft. beam, 4ft. 6in. draft forward and 8ft. aft.

QUAKER CITY Y. C.—The events for the season are as follows: May 30, opening cruise, rendezvous at Cooper's Point 9 A. M., sail up the river to Delanco, and return; June 21, annual regatta, Gloucester to Marcus Hook and return; July 4, Corinthian regatta, from Marcus Hook, 10 miles, and return; July 27, Corinthian regatta, from Riverton, 5 miles, and return; Aug. 16-31, annual cruise, Chesapeake Bay; Sept. 16, open regatta; Sept. 20, closing cruise and review.

LARCHMONT Y. C.—On May 11 the season was formally opened at Larchmont, the club pennant being broken out at 4.25 P. M. with a salute. Dinner was afterward served in the club house. Among the yachts on station were the Dauntless, Portia, Nymph, Brenda and Richmond. Nearly 200 members were present.

CHANGES OF OWNERSHIP.—Lorelei, schr., has been sold by W. P. Longfellow to A. B. Emmons, of Newport. Effie May, sloop, has been sold by B. B. Crowninshield to Sturgis Lathrop, who will name her Effie. Madelon, cat, has been sold by W. A. Tucker to E. S. Hesseltine.

PACIFIC YACHTING.—A challenge has been made by Mr. Hancock Banning, owner of the sloop La Paloma, for an ocean race over a triangular course, for a trophy of any value up to $500. The challenge is open to the 47ft. class until July 13.

KINGSTON Y. C. OFFICERS.—Com., T. McK Robertson; Vice-Com., Dr. Clark; Rear-Com., J. G. Campbell; Sec'y-Treas., J. Galloway, Jr.; J. H. Carruthers, James Stewart and Mayor Wilson delegates to the Lake Y. R. A.

YACHT FITTINGS.—We have received from L. W. Ferdinand & Co., of Boston, their new and complete catalogue of yacht and canoe fittings of all kind, a neat octavo book of 130 pages. The firm is agent for Jeffries marine glue, now largely used here for yachts' decks.

THE PATTERSON'S CHALLENGE.—The owners of the Robert S. Patterson write us that their challenge has not yet been accepted.

MAGIC.—The new owners of the schooner Magic are Messrs. T. E. D. Powers and A. W. Mott. The price she was sold for is said to be $6,500.

DEATH OF CAPT. STRYKER.—Capt. Chas. Stryker, of the steam yacht Radha, died on May 2 of paralysis, at the age of 35.

SEAWANHAKA C. Y. C.—The fourth regular meeting of the Seawanhaka C. Y. C. will be held on May 18, at the club house.

Small Yachts. By C. P. Kunhardt. Price $7. Steam Yachts and Launches. By C. P. Kunhardt. Price $3. Yachts, Boats and Canoes. By C. Stansfield-Hicks. Price $3.50. Steam Machinery. By Donaldson. Price $1.50.

A BEAUTIFUL CRAFT.

From the Montreal Daily Witness.

* * * There is another third class boat on Lake St. Louis, Dr. Andre's beautiful Rushton cruiser, the Bessie, which would, if raced, make a most interesting match for these two new boats. The Bessie is a 17ft. by 5ft., and is the most beautiful specimen of the boat builder's art that has, perhaps, ever floated on Canadian waters. She is at present fitted only for cruising purposes, but is fast to a high degree, and if fined down and put into racing trim, would make things interesting for less stable boats.

NOTE.—This boat is not the regular cruiser model, but is from a special design by a Montreal expert. She can be duplicated for $300.—*Adv.*

Answers to Correspondents.

☞No Notice Taken of Anonymous Correspondents.

H. W. S., Tom's River, N. J.—For instructions in preparing bird skins read Batty's "Taxidermy," price $1.50, supplied from this office.

W. C. C., Mount Vernon.—Your plan of arranging traps appears to be a good one, but the same principle has been adopted already. The plan is not patentable, in our opinion, and if it were there would be no profit to pay the expenses of patenting.

G. R.—Will you please give me information about a bird resembling a goose, but not quite so large, and dark in color? They are numerous in winter in all the bays and lochs of England, Ireland and Scotland. There they are called barnacles. Ans. This is the barnacle or bernicle goose (*Bernicla leucopsis*).

W. E. B., Worcester, Mass.—How often is it best to feed a dog? I have an English setter pup a out four months old and nearly every one I have asked about this matter of feeding gives different advice. Some say feed three times a day, some twice and some only once. Ans. Three times a day now, falling to twice a day when the dog is six months old. After a dog is nine or ten months old, once a day is often enough.

J. G. Q., Jamestown.—A states a catboat to be a boat having one mast stepped in the eyes of the boat, without standing rigging, fitted to which is one gaff and boom mainsail. He does not limit the build of boat. It may be a flat-bottomed or round-bottomed boat, fitted with keel or centerboard. B on the other hand says the rigging of boat is correct, but that a catboat must have centerboard. In other words a centerboard is an essential part of a catboat. We agree to leave it to you. Hammersly's Naval Encyclopedia says a catboat is a broad, shallow boat, fitted with a centerboaad and rigged as we both described it. You will greatly oblige me by deciding this. At Newport here all the old boatmen agree that a centerboard is not an essential feature of the boat. This is the home of catboats. Ans. A centerboard is not an essential feature of the catboat, which is distinguished solely by its rig. Consult "Small Yachts," by C. P. Kunhardt.

F. D. B., New York.—I see in your issue of April 25 that the open season for bass on Lake Champlain begins June 15. Is this so? Mr. Chandler and I intended to visit St. Albans on Decoration Day for a little fishing, but we are "let off" if the law is as it reads. Do you know of any place in the Adirondacks or Pennsylvania where we could get a few respectable trout the last of this month? We are willing to travel twenty-four hours if necessary, and pay a reasonable price for privilege if necessary. Last year we went to State Dam, near Malone, and had good luck as far as numbers went, but they were small. Ans. Open season for bass on Lake Champlain is as stated. We have reliable information about the fishing at Swift Water, Monroe county, Pa. Brook trout fry have been introduced into the streams in large numbers and the result has been gratifying. Arthur Maginnis has a summer resort in the midst of trout streams, and will give anglers all the information desired. At Egypt Mills, Pike county, Pa., there are trout, and here the fishing for black bass, in the headwaters of the Delaware, is said to be superb

A handsome colored plate, 8×10in, of celebrated English or American running horses, given on receipt of 25 small cards, one of which is packed in each box.

GURDON TRUMBULL'S

Names and Portraits of Birds

Which Interest Gunners; with descriptions in language understanded of the people.

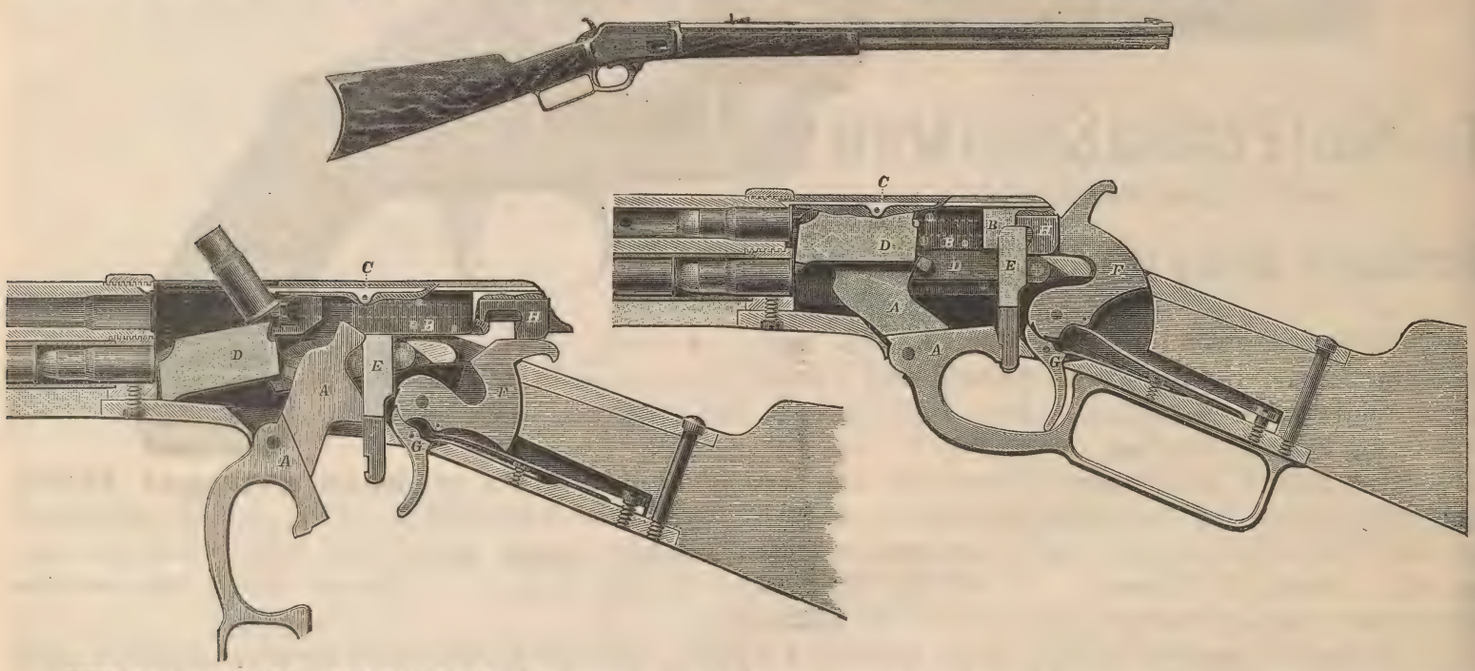
Practically speaking, this is the first popular volume of ornithology ever issued from the press; a work which goes far to demonstrate that scientific accuracy may be as easily maintained in English as in Greek or Latin. Follows the game birds all over the continent and gives a glossary of all the local names in popular use. Illustrated with admirable portraits from the pencil of Mr. Edwin Shepard of the Academy of Natural Sciences, Philadelphia, which, with the clear descriptions in the text, will enable any man who can read to identify the contents of his game bag.

OPINIONS OF THE PRESS:

It is the first, so far as we know, of a class of books of which the need is felt in every department of natural history.—*Troy Press.*

The book should find its way to a choice place in every sportsman's library.—*Chicago Inter-Ocean.*

I would much rather know what this book tells me, the various names by which the people call a bird, than the Latin, Greek or Hebrew name which science gave him for the sake of cataloguing him. * * * It is more value to me to have a description of a bird in plain English which I understand than in scientific language which I do not understand.—*W., in Journal of Commerce.*



SOLD BY

Forest and Stream Publishing Co.

PRICE, $2.50.

MARLIN MODEL 1888

In the issue of February 14 was by accident WRONGLY ILLUSTRATED the sectional cuts, being Model 1881. It is here illustrated CORRECTLY.

You will notice the breech block is on the old reliable Sharp principle, and has a solid backing against the frame. **You will notice** if you TRY THE ARM that it works WONDERFULLY SMOOTH AND SLICK, that it is finished superior to any other magazine arm, and **you will notice** if you SHOOT IT that the accuracy exceeds all other repeating rifles. Weight 6¾lbs. Same retail list, same dealer's discount as the Winchester. Sizes made: 24, 26, 28in. barrel. Calibers made: .32 .38 and .44, using Winchester cartridges. Ask your dealer to show it.

Send for Catalogue of Marlin and Ballard Rifles.

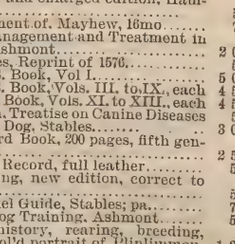
Woods and Lakes of Maine, new edition, Hubbard	3 00



The Diseases of Horses;

Their Pathology, Diagnosis and Treatment. To which is added a complete dictionary of equine materia medica. By HUGH DALZIEL.

A very complete, concise and intelligible treatise, conveniently arranged. Every horse owner should have such a book. Paper, 102 pages. 75c.

FOREST AND STREAM PUBLISHING CO.,
318 Broadway New York.

Hotels and Routes for Sportsmen.

Only 33 hours from New York, 29 hours from Boston to Roberval, Lake St. John.

ANGLER!

Did you ever catch a fresh-water salmon? If not, try Lake St. John; or, if you want the largest of brook trout, try Lake Edward. Bring your families at the same time, to enjoy some of the most delightful scenery in America. Comfortable hotels at Roberval and at Metabetchouan, Lake St. John, 100 miles, and at Lake Edward, 115 miles, from Quebec. Express trains each way daily.

For particulars of lakes and fishing, read "Adirondack" Murray's "Doom of Mamelons," or Kit Clarke's "Where the Trout Hide." For folders and other information address, ALEX. HARDY, Gen'l Pass. Agent, Quebec, or G. LEVE, 315 Madison avenue, New York.

J. G. SCOTT, Sec'y and Manager.
General offices, 92 St. Peter st., Quebec, Can.

Hotels and Routes for Sportsmen.

GRAND TRUNK RAILWAY.

When planning your summer piscatorial tour remember that this company controls over 4,100 miles of railway, equipped in the most approved modern style, and passing through a magnificent country, noted for its unsurpassed facilities for sport.

A FEW OF THE PRINCIPAL RESORTS.

PORTLAND, ME.—For salt water fish.
RANGELEY LAKES (via Bryant's Pond or Bethel, Me.)—For brook trout, pickerel, yellow perch, rock bass.
THE WHITE MOUNTAINS (via Gorham, N. H.)—For pickerel, trout, bass, cusk.
THE SALMON RESORTS of Quebec, New Brunswick and Nova Scotia (reached via Quebec).
LAKE ST. JOHN DISTRICT.—For Ouananiche (reached via Quebec).
THE RIVER ST. LAWRENCE (in the neighborhood of the line for 400 miles).—For mascalonge, pike, bass, whitefish, pickerel, perch.
THE THOUSAND ISLANDS (via Gananoque or Kingston).—For pickerel, black bass, mascalonge, pike.
MUSKOKA LAKES (the best place on the continent for fishing, shooting and camping, reached from various points on Northern and Northwestern Division).—For brook and salmon trout, black bass, mascalonge pickerel.
PARRY SOUND AND GEORGIAN BAY.—For pickerel, mascalonge, black bass.
LAKES ONTARIO, ERIE, HURON AND MICHIGAN, (via stations at all principal ports).—For the varieties of fish for which they are noted.
LAKE SUPERIOR (via Collingwood, Wiarton, Sarnia, in connection with steamship lines).—For lake trout, etc.

The charges for hotels, guides, and camping at many of the fishing waters named above, are extremely low. Full particulars of same, with many valuable hints as to baits, best months and general facilities are published in a pamphlet entitled "Fishing and Hunting Resorts of the Grand Trunk Railway," which will be furnished gratuitously on application to any of the company's principal agents, or of the General Passenger Agent, Montreal, P. Q.

WM. EDGAR, Gen. Pass. Agent. JOSEPH HICKSON, Gen. Manager.

TAKE THE

Grand Rapids & Indiana Railroad,

The "FISHING LINE,"

THE DIRECT ROUTE TO
TRAVERSE CITY, PETOSKEY, MACKINAC, MARQUETTE, and Other Delightful Health and Summer Resorts of

NORTHERN MICHIGAN

And the Celebrated Trout and Grayling Streams, Beautiful Lakes and Grand Forests of this Famous Country.

The waters of Northern Michigan are unsurpassed, if equalled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory.

TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

THE CLIMATE is peculiarly beneficial to those suffering with HAY FEVER and ASTHMATIC AFFECTIONS.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample ACCOMMODATIONS FOR ALL.

The Grand Rapids and Indiana Railroad in connection with the Duluth, South Shore and Atlantic Railway at Mackinaw City, forms the most direct route to Marquette, Sault Ste. Marie, Negaunee, Houghton, Hancock, and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to tourists and sportsmen.

For Tourist's Guide, Time Cards and Folders, giving full information, address

C. L. LOCKWOOD, Gen'l Pass'r Agent,
Grand Rapids, Mich.

The Tomahawk Lakes & Trout Lake

Are the very best fishing grounds in the State of Wisconsin. These lakes are located in Oneida county, along the newly completed line of the Wisconsin Valley Division of the *Chicago, Milwaukee & St. Paul Railway*, and the whereabouts is just being made public. Muscallonge, bass and trout in abundance.

During the season of 1889, necessary hotel and camping facilities will be provided for all sportsmen who are looking for "greener fields and pastures new."

Buy tickets to Minocqua, Wis., via the Chicago, Milwaukee & St. Paul Railway.

For further information address A. V. H. Carpenter, General Passenger Agent, Milwaukee, Wis.

Bromfield House, Boston.

Yachts and Canoes For Sale.

Cruising Yacht For Sale or Charter.

The owner of a well-known yacht, 47ft. long, 14ft. beam, 6ft. draft, perfectly fitted out for the comfort and accommodation of four to six persons in the cabin, and three men in forecastle, patent w. c. and all modern improvements, will sell or charter her at a reasonable price on account of important business engagements preventing his leaving the port during the summer months The yacht is built upon a beautiful model, has two rigs, can be sailed as a sloop, when she is very fast, or as a yawl for cruising. She was built during the winter of 1886, of best of material, under the personal supervision of the owner, and is a staunch and excellent sea boat, well suited for cruising in the gulf of St. Lawrence, and has been so employed, where capital sea trout and other fishing can be enjoyed, and salmon may be included, seal and white porpoise hunting, duck and shore bird shooting. This is an opportunity seldom offered. Address P. O. Box 1081, Quebec City, Can. Satisfactory references in New York or elsewhere given and required.

FOR SALE.—THE CELEBRATED SINGLE-handed yawl Windward. Can be seen at the foot of Spring st., Newport, R. I. Address C. F. L., 14 Walnut st., Boston, Mass.

DODGE'S PATENT

Collapsing, Folding, Landing and Minnow Net Frame.

No. 1 represents the frame unfolded and expanded, ready for use. Can be unfolded and expanded with the net on the ring (in 30 seconds) by the same motion that is used to open an umbrella. The ring is 12in. in diameter, made of steel, broad and strong where it joins the staff, and narrow and light at the outer side. The other working parts are made of brass, nickel plated. Nos. 2 and 3 represent the frame collapsed and folded, staff unjointed ready to pack. Can be carried in tackle box, trout basket, grip sack or pocket.

PRICE COMPLETE, $4.00.

J. N. DODGE, 278 Division St., Detroit, Mich.

BARGAINS. IF YOU WANT TO BUY, SELL OR EXCHANGE **GUNS, DOGS,** Etc., send 3 cents for a copy of the *Exchange and Mart*, the Want Paper. Bargains of every description, Curiosities, Useful, Sporting, Scientific Articles, etc. 17 B Congress st., Boston.

No Chemicals.

W. BAKER & Co.'S Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

W. Baker & Co., Dorchester, Mass.

PITCH YOUR TENT

on the Mountain, by the Lake or Stream, and have an enjoyable and economical vacation.

Send 25 cts. for large Illustrated Catalogue of Tents and Sportsman's Goods; also, "How to Camp, Where to go," etc.

ANSWERS TO CORRESPONDENTS.

CAMPING AND CAMPERS.

OUR contributor "Ibis," who writes his recollections of the Raquette, relates a very common experience when he tells of his disappointment when he found that the companion who had gone into the woods with him could not see things through his spectacles. Every one who has much experience in the field and camp can recall the occasions when the full enjoyment of his outing was marred by a similar lack of congenial tastes in his companion.

There are two classes of campers: One is made up of those who plunge into the woods, cross the plains, climb the mountains or seek the shore, because impelled by the fascination such a life has for them; and the other is of those who, without any special taste in that direction, go on an outing because it is the fashion to do so, or because hearing others tell of the joys of camp life they imagine that they too can find in it satisfaction and blessing. The methods and the moods of these two classes are widely different. Your born woods lover, no matter what may may be his every day mode of life, plain or luxurious, when he goes into camp goes light, as "Nesmuk" would say. His duffle is selected with a view to absolute necessity. His clothing is simple; his outfit includes only what experience has taught him are the absolute necessities for comfort.

On the contrary the novice, who is following fashion, follows it with a vengeance and to the bitter end. He studies the sporting goods dealers' catalogues as a woman studies a fashion paper. To demonstrate to the world that he is an old-timer at the business—and it becomes a very serious business with him—he rigs himself out with all the toggery he finds put down in the catalogues, and converts himself as nearly as may be into one of the ideal creatures he sees therein pictured, with boots and leggings, corduroy breeches, hundred-pocketed hunting coat, helmet, and a battery of assorted firearms.

The old hand politely conceals his amusement when he encounters such apparitions in the woods, and, thank heaven, they are never found very far away from the well-traveled trails of the Adirondacks or the Maine woods. These tailor-made sportsmen are they who find no rewards in woods life. To journey is to labor as the knights of old in their burdens of mail; to remain in camp is a bore, because their eyes cannot see the manifold beauties of shade and sunshine, their ears are not attuned to catch the illusive harmony of wood and open; they never learn the secrets nature refuses to impart save to her true and loving children. And they come back from the outing either full of honest disgust or bragging about the huge buck killed by their guide and credited to themselves at the expense of their pockets. These novices, fashion-impelled imitators of sportsmen, go in pairs and in bands; they have a notion that the more there are in a party in the woods the better they can enjoy it. They may be right, for their way of camping; but the woodsman understands perfectly well that a single tried companion is enough; and as an Ogdensburg veteran put it the other day, if we could only teach our dog to talk, we would need no other comrade in camp.

TAXING THE DOG.

MR. MASE'S dog tax bill having passed the New York Legislature has gone to the Governor. It provides for the taxation of dogs over four months old at the rates of $3 for one bitch and $5 for each additional one owned by the same person, and $1 for each dog with $2 for each additional one owned by the same person. It is provided, however, that nothing in the act shall apply "to any dog, bitch or puppy, while same is owned or possessed by any person or persons, association or associations, corporation or corporations in the State engaged in the business of breeding or rearing pedigreed or registered dog stock for the purpose of exhibition under the rules and regulations governing the American Kennel Club." This exemption practically gives immunity for the entire race of dogs, for the dog law will doubtless be construed with the latitude of that tariff clause which admits free of duty animals imported for breeding purposes, a clause so elastic that the prodigious Jumbo came in free under it. The effect of the law—if it shall become one—will be no doubt to multiply county fair dog shows, held under American Kennel Club rule, to reduce the multiplicity of the animal designated by the critics as "not a show dog;" and to blazon the name of the American Kennel Club in every remote hamlet over whose barking wards shall be extended the ægis of its benevolent protection.

The intent of the law is to protect the sheep raisers, and the funds accruing from the taxes are to be devoted to paying for sheep killed by dogs. We hear a great deal said about sheep farmers being compelled to give up their industry because of the depredations of dogs; but there is a very solid basis for doubt whether any one who cared to raise sheep was actually compelled to abandon the business because the dogs could not be controlled.

BY THE STREAM.

THIS is the angler's best season. Yes, now. It is very well to start out on the opening day when perhaps a couple of inches of snow covers the ground, when the brooks are full of melting ice, and the cold east wind drives the pelting rain through even waterproof clothing, and when your line freezes in the guides. It is pleasant to get the early fish, but it is by no means certain that he who goes out on the opening day will receive for his labors any recompense more welcome than an attack of bronchitis or even pneumonia.

It has been said that to fish is not all of fishing, yet he who in the first days of the season braves the elements, goes for fish and for fish alone. At this later date it is quite different. Now the winter is past, the flowers have appeared on the earth, the time of singing birds is come. Before him who goes at this season, prodigal Nature spreads out her fairest scenes, summons her sweetest choruses, scatters her choicest perfumes, that he may feel her charms through all his senses.

If the trout bite well he has a double pleasure; if they refuse his lure he yet goes home with joy in his heart and a memory of his outing which will not soon pass away. For years he will look back to this day, and if he can recall the taking of no great fish, the thought of the softness of the air, of the fragrance of the flowers, of the mellow whistle of the oriole in the elm and the rollicking jingle of the bobolink in the meadow, will stir his heart to faster beating for many a day. Now, if the fish refuse to bite, if the stream is one of the many that were once trout streams, but are so no longer, the angler can stop his fishing, and setting aside his rod, can strive to pry into some of nature's secrets, and to learn the ways of the shy creatures that have their homes along the brookside.

It is an old tale, but one that is ever new, this story that the bees and the birds and the beasts and the plants tell to the lover of nature. And it is the only story that never tires, never bores one. We can never feel weary when we are close to the heart of our great mother.

SNAP SHOTS.

OF the thirty odd fish and game bills introduced into the New York Legislature, less than a baker's dozen found their way beyond the committee rooms. It is just as well that the majority of these measures died where they did, but there were some which should have passed, and might have done so in a less indecent body than the last New York Legislature. One of these measures was the bill creating a special commission to codify all the game and fish laws of the State, reduce them to order and submit to a future legislature a sensible, intelligible, effectual code. It has for years been understood that such a codification was needed; the bill was very wisely drawn, the appointment of such a commission and the accomplishing of its labors would put us ten years ahead in game protection, and yet with their jobs and counter jobs the members left it to die in committee. Another bill which failed to pass was that providing for fishways in the upper Hudson, by which the salmon might ascend to their spawning beds. This measure, according to a reported statement by Commissioner Burden, was choked off simply because of party spite; it happened to have been introduced by a member whose party was in the minority, and the faction in power refused to sanction it for that reason alone. It is a lasting shame that party bigotry and mulishness should demand for its gratification the sacrifice of the Hudson's magnificent promise as a salmon stream.

All who are interested in dogs, but especially those who know anything about greyhounds and coursing, will read with interest the delightful papers now appearing in our columns from the pen of Mr. H. W. Huntington. There is, perhaps, no one in this country who has done so much to attract public attention to the greyhound, and no one who has owned better dogs, and it is only because he resides in the East, where coursing is impracticable, that this gentleman has not run some of the excellent specimens of this breed that he has shown. Now that this noble sport has taken a firm hold in the West, where there are hares and open plains where they can be run, we may look to see a constant development of and an increasing interest in coursing, and with this will come an improvement in our greyhounds. It is quite within the range of possibility that within a few years we may hear of an American-bred dog competing for the Waterloo Cup—perhaps even winning it.

The stray dog is a recognized factor in most communities, and the recognition usually consists of some scheme to reduce the surplus. There is a variety of modes which have been adopted by different cities for destroying their ownerless dogs; many of these modes have in them much of brutality. The subject has been thought worthy of special investigation; and having collected information respecting the dog laws of towns and cities in several States we shall at once publish them.

The meeting of the American Fisheries Society at Philadelphia last week was one of the most noteworthy ever held because of the active interest shown by the members. Taken as an index of the growth of fishculture in popular appreciation the Philadelphia meeting was full of encouragement.

The hotels in the Yellowstone National Park opened on the 15th instant. The roads are in good condition and a large influx of visitors is expected early in the season.

FOREST AND STREAM will go to press next Tuesday on account of Decoration Day.

The Sportsman Tourist.

SPORT IN CAPE BRETON.

HOW many of the American readers of the FOREST AND STREAM know anything about the Island of Cape Breton, its magnificent scenery of mount, river and glen, its cool, saline airs, delightful autumns, and, above all, its grand salt lakes where the Bras d'Or winds its way through sloping hills, quiet farms, forests and meadows? Many of them have doubtless read Mr. Warner's "Baddeck and that Sort of Thing," and laughed heartily over his "hand-mixed coffee" and "double-barreled sermons," but few indeed, I venture to say, know Cape Breton as it should be known—one of the most delightful spots on earth for sport. True, it cannot give the tourist the hotel accommodations he finds at his own summer resorts, but for bathing, fishing, shooting, few places excel this favored land.

I have caught trout here weighing seven pounds, and I have seen a fisherman of Fourchie in Richmond county catch in an evening with an ordinary cod hook baited with herring gills a dozen bass, some of which weighed over twenty pounds each. I have seen as many as eighty caribou in a herd on our northern barrens, and have shot two moose on my first day in.

Probably the best place on the island for sport is near the village of Ingonish, a small fishing settlement on the northern coast of the Island containing about five hundred souls. The interior of this part of the country consists chiefly of immense barrens, hemmed in by mountains, many of which rise to a height of one thousand feet from the sea. Here and there are long stretches of forest, steep ravines, rivers and lakes. At one time, a little over a century ago, moose were so numerous in these forests that over seven thousand hides were exported from the village of Ingonish alone in one year; and to this day the natives are frequently reminded of the wholesale slaughter of these animals indulged in by their forefathers by excavating from their farms antlers, hoofs and other relics of what might properly be termed the butcher period.

I have never hunted this part of the country in the fall, but have gone there the past four winters for caribou and moose, and with one exception have always been successful.

In the winter of 1885 my brother and I, accompanied by three hands, spent six days inland after caribou. Meeting with very severe weather we were unable to hunt the barrens for four days. On the fifth day we fell in with a party of five men from Ingonish, going to a favorite haunt of caribou called Chetticamp Lake, and on being invited to join them we gladly consented. After a tramp of seven miles on snowshoes we made our camp in a tongue of woods a mile or a mile and a half from the barren, known as the Great Western Barren, and here we stopped the remainder of that day and the following night, as a strong wind suddenly sprang up, blowing such dense masses of snow over the barrens that one could not see an object 30yds. away, let alone do any hunting.

The next morning being fine and clear we strapped on our snowshoes at 8:20 and went out to reconnoitre. No sooner had we got to the edge of the woods than we saw at about three miles from us on a gentle rising of the barren a herd of fully eighty caribou, some of which were lying down, some feeding, some gamboling over the hard crust. The whole herd being directly to windward we felt quite sure of our game, and having placed six guns in ambush on the side of a pass leading to another barren, our guide sent three men to drive. In less than an hour they had circled to windward and given their scent, when the whole herd came tearing down toward the guns at a speed swifter than that of the fleetest dogs. From the time we saw them start it seemed but a moment, when we heard their loud breathing on the clear morning air, and the next moment they were upon us. Crack! bang! went the rifles, and every caribou stood perfectly still. Then with a bound they sprang through the pass and were out of sight in a moment, except five that lay bleeding on the snow.

There being six guns among us and only five caribou down, the question arose among some of the men as to who missed his mark, but somehow or other it was never satisfactorily answered. I may say, however, that it was a fortunate event, as the laws of the Game Society of Nova Scotia limit the number of caribou to be taken by a party during any one season to five; and although we did not exceed the limit, I felt confident that few, if any, of us thought at the moment of civilized laws or anything else other than the panting, flying things, speeding by us for life and liberty.

In the winter of 1886 we went in again, but out of sixteen days we could only hunt two, when we got on the track of three running moose, and after following them forty miles on snowshoes, over barrens, through woods and down rivers, we wound up in a rainstorm which left not a particle of snow on the ground, and returned home empty handed.

Our third trip, in the following winter, yielded us four caribou, an account of which has already appeared in the FOREST AND STREAM.

Our fourth and last trip was in the winter of 1888. Leaving Ingonish at 4:30 on a cold, calm morning in January, we drove four miles over the ice of the "lake"—a basin of salt water about five miles long, surrounded by mountains, at whose feet the village is situated—and bidding adieu to the comforts of civilization, proceeded to make the ascent of the mountains. Two hours' hard toiling brought us over this difficulty, and after a tramp of eleven miles more on snowshoes we reached our camp. There were eleven men of us in all, and after a dinner of cold meat, bread and tea, we decided to try our luck. Just here let me say, that I doubt if Delmonico ever furnished a repast to tickle the epicurian palate as our dinner tickled ours that day.

It was decided that four of us including the writer should go down stream after moose, while five went to the barrens for caribou, leaving two in camp to cut wood and prepare for night.

Proceeding down the river—called Chetticamp River—four or five miles, our guide finally found some "work" consisting of the top of a small "dogwood" nipped off in that clumsy manner peculiar to moose, and in a few moments more he had discovered the tracks by digging in the snow. After scooping the light snow from these and carefully examining them he assured us that the moose had gone down the stream. There were but two guns with us, J., one of the hands, carrying a single-barrel muzzleloader, while I had a double-barreled rifle. The snow was not more than a foot deep, so the greatest caution was necessary, as the slightest move might start the moose, and they who have followed a startled moose know what it means. Having had this experience myself two winters before, it is needless to say that I drew my very breath as softly as possible. Proceeding in Indian file for a mile or more we finally came to a bend in the river, and there not more than 40yds. from us on the same side of the stream we were on and about 5yds. from the bank was a huge bull moose lying down, facing us, and staring at us with the most puzzled expression imaginable. I raised my rifle and at the same instant the bull sprang to his feet. In doing so he turned side on. This was my opportunity, and quick as lightning I took aim and fired the right barrel. With a thud the monster fell to the ground, the bullet, as we subsequently discovered, having passed through his heart.

"Look! look!" exclaimed the guide, and there, not more than ten yards from where the bull fell, I saw an old cow rushing up the side of the hill, and firing my left barrel sent the bullet through her, while at the same moment snap went J.'s muzzleloader, and refused to go off. Quick as a flash the cow turned in her tracks and charged toward us with the speed of an infuriated Spanish bull. So quickly did she do this that by the time I had put another cartridge in my rifle I had to fire at her point-blank, without putting the gun to my shoulder, but the ball luckily crashed through her skull, and she fell dead not more than six feet from where I stood, my hair at the time being in a state of elevation similar to that described by the ghost in Hamlet.

It was 10 o'clock that night before we had skinned the two moose, buried the meat in the snow and got back to camp, where we found the rest of our party not a little anxious about our long absence. They who had gone after caribou had not been successful in shooting any, although they saw many tracks, some of which were quite fresh.

As I write I can see from my window overlooking the ocean myriads of glittering-winged sea ducks speeding toward their summer havens in the far-off Labrador, while the reports of the fishermen's guns tell what havoc is being done to these wanderers of the sea and air. Enough! The bumps behind my ears begin to tingle; the kaleidoscope of memory closes on past winters' pictures of frozen solitudes and silent hills, and I must out to the rocks and waves with my gun, for it is April now, and each month yields its own unrivaled sport to Cape Breton.

H. E. BAKER.

FOURCHIE, C. B.

REMINISCENCES OF THE RAQUETTE.

MY memory is stored with reminiscences of many happy days passed on these waters, and the following sketch is an attempt to embody some of them, but which I fear only inadequately conveys the attractive feature of the picture as it exists in my mind. Those who have had experience can perhaps fill it out from their own recollection.

With a friend I had rowed down from Blue Mountain Lake in our own boat, intending to spend a few weeks on the Raquette and its nearby waters. Being provided with a tent, camp kit and blankets, we purposed to select a station on the Lake as a sort of headquarters and make excursions of a few days' length at a time to different points on its shore, up the various streams that empty into it and to nearby ponds that were accessible by easy carries. We expected to fish some of the time, but for the most part to float at random on the water, inhale the balmy odors of spruce and hemlock, snuff the bracing mountain air, harden our muscles by exercise at the oars and paddle, and in short enjoy our holiday as if we were schoolboys again.

On our way down the weather had been somewhat stormy, the wind high and accompanied by gusts of rain. Our boat also had developed some defects, and in addition had sprung a leak when we were half-way down Utowana Lake, which compelled us to pull ashore and make temporary repairs. On the carry at the foot of that lake we stopped at Fred Bassitt's cabin and procured some white lead and other necessaries to make the patch on our bark secure. This, and a bite we had there, delayed us considerably, and by the time we had threaded the long, monotonous pull of four miles down the Marion River, it was pretty late in the afternoon. The showers of the previous part of the day had given place to a heavy rain storm, and when we issued from the stream into the open waters of the Raquette we found a pretty lively sea running.

My friend, who was making his first acquaintance with the lakes, had not expected to find such a capacity for developing rough water, and the rain did not contribute to heighten the favorable character of his first impressions. It is notorious that these are the most lasting, and are frequently not to be overcome by any subsequent more agreeable experiences.

Though amply provided with India rubbers we could not entirely keep out the wet, and when we had got down as far as Kenwell's, my friend hailed with delight the appearance of human habitation and shelter, declared himself emphatically opposed to beginning his experiment of tent life in such weather, and in favor of stopping then and there, where fortune offered us a warm fire ready made, shelter from the storm, something to invigorate the inner man and a dry bed.

To him who understands how to catch the fleeting pleasure as it flies, and make the most of it, a better opportunity is seldom offered than when one arrives on a stormy night at a comfortable inn. A bright, crackling wood fire looks brighter at such a time than under ordinary circumstances. The contrast of comfort with previous misery, of cozy security and congenial warmth, is seducing. Few occasions in life afford such a concurrence of elements calculated to heighten enjoyment; and an appetite whetted by a hard day's work in the fresh air gave special zest to a bountiful supper of lake trout, coffee and hot biscuits which the cook soon prepared.

The comforts of civilization under such conditions formed a contrast with the roughness and hardships to be expected in camp, which, I fear, did not fail to strike my friend. To how many another man has a similar experience at the start decided his opinion of a mode of life which perhaps might have been totally different under favorable auspices.

After supper we seated ourselves by the blazing fire, smoked our pipes and listened to the wind and driving rain, and to the dash of the waves, as they rolled in on the shore.

I knew my friend had some acquaintance with camp life in former years, and though he made no pretensions to care for fishing, he liked rowing and being in the open air, and was physically in need of a change.

When we awoke the following morning the sun was shining brightly, the waters of the lake lay placid and sparkling in the sunbeams; all nature had that feeling of freshness which makes mere existence a delight, and like an invigorating draught nerves the courage to brave endeavors. The aspect of things was so completely different from that of the previous night that I thought it must obliterate all bad impressions then made and deck the future prospect in bright and attractive colors.

After breakfast we started to make a survey of the lake and see where we could find an eligible place to pitch our tent. My friend proposed to row, while I was to tempt the bass with rod and line. Who that has ever tried it, needs to be told how the heart leaps with joy at setting out on such a glorious morning, of the pleasure of pushing your cedar bark out upon the buoyant waters, hearing the splash of the waves as they break on its prow and sweep the sides, while it goes bounding like a thing of life, light as a feather, yet obedient as a well-trained steed? Of all boats give me the flat-bottomed, light-built, graceful Adirondack. With a little practice you learn to guide it instinctively, as a bird uses its wings. It obeys the prompting of every impulse, and is so easily propelled in smooth water you need never tire. Talk about the glory of motion! For us men here it is embodied.

Of the number of fish caught on that morning I have no recollection, and it is immaterial. I was more occupied in pointing out the features of the landscape that I hoped would favorably impress my friend—the projecting headlands, the deep bays, the rocky islands, the tempting nooks, the far-off glimpses of mountain and hilltop. I tried to impart to him something of the enthusiasm I felt for this splendid sheet of water. I narrated incidents in my previous acquaintance with certain parts. Showed him where I had on former occasions camped, the location of streams, where streams emptied their cold waters and at whose mouths trout were to be caught. For hours we rowed, we floated idly, we watched the fleecy couds floating in the sky, we smoked and talked, we breathed the blessed air of heaven and basked in the glorious sunshine. Was there any existence more luxurious? What could man want, in the shape of enjoyment, more than this?

There were, however, some drawbacks. Had my friend not remarked them they might have entirely slipped my recollection. That side of the picture I owe to him. The unusual exercise of rowing blistered his hands, and they became very sore. His face and neck were inflamed by the sun. There were rocks, at many places, so close to the surface that we sometimes struck, and once or twice fairly grounded on them. At localities where we touched mosquitoes abounded, and they followed us even out into the open water. Moreover, at the different camping places, which we inspected, there was a great lack of green grass, no place to stretch out comfortably and take a nap, and none of them seemed to fill the bill of requirements necessary for our purpose.

I was desirous that my friend's taste should be suited in the selection of a locality, but the morning passed without finding one. We returned to Kenwell's to dinner, and repeated our explorations in other directions all the afternoon; but with no better results. In despair, it was finally decided to move over to Hathorn's and try one of his open bark camps, where everything was fixed ready to hand; we could get our meals without the trouble of preparing them ourselves—and could find some society!

My friend's visit to the Raquette lasted nearly a week. He managed to pass the time in various ways, but it could never be said that he actually enjoyed himself. The annoyances did not diminish. Black flies and midgets were added to the list of his tormentors, and he pined for some indispensable comforts of city life, which could not be procured here. Despairing of ever being able to see objects through my spectacles, he finally determined to return home; and making arrangements with a guide who was going up with his boat to Blue Mountain, he departed, leaving in his retreat a collection of canned goods and delicacies, which he had purchased in New York for consumption during his stay and had brought up at considerable expense. They were appreciated by those whom he left behind, and served to keep the memory of the donor fresh in their recollections long after he had gone.

Natural History.

WOODCHUCKS IN TREES.

Editor Forest and Stream:

In the article by Mr. Oliver P. Hubbard, in your issue of May 9, reference is made to a foreign statement, that American woodchucks will sometimes climb bushes and trees. I have several times seen similar statements in years past, and have noticed that many persons expressed doubts as to the accuracy of these statements.

When a lad about fifteen years of age, I lived in Ashtabula county, in this State. I had a little dog, a mixture of terrier and spaniel, and the best little all-around hunting dog I ever saw. He weighed about 12lbs., and would kill woodchucks weighing 15 or more pounds, never hesitating to tackle them under any and all circumstances. Ashtabula Creek, passing through a heavy, virgin forest, was the boundary of a portion of the farm on which I lived. At this point there was about 50 yards of bottom land, from which rose a steep bluff some 20 feet and then a stretch of tableland covered by a heavy forest. In those days, this forest was alive with game; occasionally a bear, deer, some wolves, wildcats, wild turkeys in droves; and, I believe, the only forest in which I ever saw woodchucks. I rarely ever went into this forest, in warm weather, that my little dog did not run woodchucks into hollow logs or hollow trees. One day I was passing along the edge of the wooded bluff before referred to, when I suddenly heard an unusually loud commotion on the part

of the little dog a short distance ahead, and a moment later his familiar "up a tree" bark. Hastening forward, I found little Fido with his forefeet against a slightly leaning tree, and about fifteen feet up the tree a woodchuck about the size of Fido, clinging to the body of the tree, and evidently in an agitated state of mind, while Fido was even more excited than the woodchuck. Finding a handy club, I threw it, striking the woodchuck a slight blow. He did not stand on the order of his going, but sprang as far as possible toward the brink of the bluff, to find his neck in the firm grip of Fido's jaws. After Fido had given him a satisfactory shaking up, I gave him a few finishing touches with a club. His burrow was but a few feet over the brink of the bluff. Fido had surprised him on a foraging expedition and being closely pressed, he had taken to the tree for safety. I have seen woodchucks sunning themselves upon stumps, logs and rocks, but this was the only time I saw one up a tree. MILTON P. PEIRCE.

COLUMBUS, Ohio.

BRITISH COLUMBIA NOTES.

VANCOUVER ISLAND, B. C., May 4.—The prospects for good shooting here during the coming autumn are excellent. The mild winter and freedom from spring shooting have been favorable for the feathered game.

The short harsh crow of the cock pheasant can be heard at all hours of the day almost within the limits of the city of Victoria, and we are happy to say that this year will be here a close season for this game bird. Quail and grouse are abundant. While driving near the city with the veteran shot, R. Maynard, we saw a pair of blue grouse quite near the trail, and the cock bird gave us a most entertaining exhibition of the charms that he displays in wooing his mate. Like a turkey cock he strutted about with his wings trailing on the ground, his tail feathers erect and spread out fanlike to their fullest extent, his neck distended, and on each side of his neck the feathers were turned out so as to resemble a pair of round white rosettes, nearly three inches in diameter, with an oblong red spot in their center where the skin of the neck was exposed. His head seemed to be crowned with a fiery red comb. Excepting the rosettes he was in appearance a miniature turkey gobbler. Every few seconds he would strut up to his demure but sleek-looking mate, puff out his neck, and with a jerky movement of his head, utter his boom or hoot, *Boom, boom, boom.* As he grew more and more demonstrative in his actions, his modest mate flew up to an overhanging limb to escape his familiarities, and we drove away, leaving him still strutting on the ground underneath the tree where his mate sat perched. The comb, I should judge, was produced by the spots over the eyes becoming enlarged and inflamed with passion.

Deer are seen every day quite near the city. A panther was recently shot within a few miles of the city.

The well-known writer and naturalist, John Fannin, will soon formally open the new Provincial Museum at the Government Buildings here. He is rapidly getting things into shape, and has among his specimens by far the finest male caribou and also mountain goat that we have ever seen. With the assistance of Mr. A. H. Maynard his collection of song and game birds of the northern Pacific slope will be quite complete. All persons who are at all interested in natural history should not fail when in the city to pay Mr. Fannin a visit.

STANSTEAD.

MASSACHUSETTS BIRD NOTES.—*Editor Forest and Stream:* On May 12 that skilled observer, Mr. H. A. Purdie, of Boston, and myself made an observation tour in the woods and fields of this vicinity, and recognized the presence of fifty species, most of them migrants. There were, of course, quite a number of species previously noted as arrived which did not happen to fall under our observation. The species starred are rare here at any time. The following birds were seen:

Spotted sandpiper,	Vesper sparrow,	Maryland warbler,
Green heron,	Grasshopper sparrow	Chestnut-sided warbler,
Night heron,	Chipping sparrow,	Nashville warbler,
Downy woodpecker,	Field sparrow,	Parula warbler,
Flicker,	Song sparrow,	Black-throated green warbler,
Black-billed cuckoo,	Towhee,	Yellow warbler,
Whippoorwill,	Rose-breasted grosbeak,	Redstart,
Swift,	Scarlet tanager,	Ovenbird,
Least flycatcher,	Barn swallow,	Catbird,
Bluejay,	Tree swallow,	Brown thrasher,
Crow,	Cedar waxwing,	Whitebr'st nuthatch,
Cowbird,	Red-eyed vireo,	Chickadee,
Redwing blackbird,	Black and white warbler,	Wood thrush,
Bronzed grackle,	Myrtle warbler,	Robin,
Lark,	Golden wing warbler*	Bluebird,
Baltimore oriole,	Tennessee warbler,*	Bob White.
Purple finch,		
Goldfinch,		

The above list shows the tide of migration to be rather early this season. For instance, in comparison with 1884 the presence of several of the above (on the same ground) was not observed until the 17th to the 21st of May. The dates of 1888, however, do not differ much.—F. C. BROWNE (Framingham, Mass., May 15).

FLORIDA BIRDS OF PLUME.—I have been in Florida nearly every winter for the past ten years. Where I saw a hundred plume birds in 1879, I saw less than a tenth of that number on my last visit. During February and March it is estimated that there are a hundred thousand visitors in Florida, among them many sportsmen tourists, each of whom wishes to bring home some trophy from the land of flowers, plumes being especially sought for, being at their best in the spring. The result is what might be expected, to say nothing of the evil effect of such slaughter at that time of the year. If any State needs rigid game laws, it is Florida, and I am glad to see that some of the representative citizens are taking steps to secure such.—ORMOND.

ALBINO SQUIRREL.—Glasgow, Ky.—The albino squirrel killed near this place on April 25, mention of which was made in your issue of May 9, turns out to have been an albino gray squirrel, and was of usual size and form of our common gray squirrel. The coat was pure white, the eyes red, while the skin about mouth and nostrils was a delicate pink.—MAC.

THE revised and abridged edition of the A. O. U. Check List of North American Birds, including the additions and changes made in the supplement, will be sent post free on receipt of 50cts.—*Adv.*

Game Bag and Gun.

THE GAME LAW MILL AT ALBANY.

[*From our Special Correspondent.*]

ALBANY, May 18.—The various game bills introduced at the session just closed were disposed of as follows. Where a committee is named it is to be understood that the bill was not reported by that committee, and hence could not be acted on. Bills sent to the Governor will become laws if he shall sign them:

SENATE BILLS.

87, 82. Coggeshall—Amending section 640 of the Penal Code so as to make more difficult the fishing in private ponds. To the Governor.

165, 200. Coggeshall—Making a uniform law and shorter seasons for woodcock and partridge throughout the State. In the Assembly.

185. Hawkins—For the protection of oyster beds. A law, Chap. 9.

193. Sloan—Amending the act creating the Forest Commission so as to include Oneida county in the Forest Preserve. A law, Chap. 24.

222. Collins—Providing fishways in the Hudson River at Mechanicsville and Northumberland. In the Committee of the Whole.

223, 560. Collins—For the construction of fishways on all dams to be built hereafter. In the Senate.

224, 651. Collins—Amending the Hudson River Shad Law of 1887 so that Westchester county shall not be exempt from the provision that there shall be no fishing on Sunday between March 15 and June 15. In the Committee of the Whole.

225, 602. Collins—Amending the Salmon Act of 1837 so that fish of less than 3lbs. shall not be taken. In Committee of the Whole.

205, 206. Coggeshall—Same as Hamilton A. 481, 381, for the protection of fish in the St. Lawrence River. In the Committee on Game Laws.

350, 663. Collins—Forbidding the taking of partridge or quail with nets or traps. In the Committee of the Whole.

351, 547. Collins—For the building of a fishway in Delaware River. To the Governor.

430, 462. Coggeshall—Same as Kimball A. 1072, 1058, providing that a Deputy Attorney-General, a Commissioner of Fisheries and a Member of the New York State Society for the Protection of Game shall codify the game laws at an expense of $5,000. In the Committee on Finance.

492, 463. Walker—Same as Little A. 807, 623, prohibiting the taking of fish except by hook and line in Lake Ontario or Niagara River adjacent to Niagara county. In the Committee on Game Laws.

550. Raines—Same as Fitts A. 618, 965, forbidding the taking of fish in Owasco Lake except by hook and line. In the Committee on Game Laws.

630, 510. Kellogg—Same as Barton A. 840, 837, prohibiting the taking of fish in Glen Lake except by hook and line—no black bass to be taken between Jan. 1 and July 10, no bullheads between April 1 and July 1, no pickerel between Feb. 15 and July 1. In the Committee on Game Laws.

627, 511. Kellogg—Forbidding the taking of fish in Queensburg, Warren county, except by hook and line. In the Committee on Game Laws.

628, 512. Kellogg—Repealing Chapter 623 of the Laws of 1887 relating to private parks for fishing and hunting. In the Committee on Game Laws.

651, 522. Hawkins—Allowing any five or more citizens of the U. S., of full age and upon the approval of the Commissioners of Fisheries, to file a certificate with the Secretary of State that they have formed an ichthyological society for the purpose of scientific research. In the Assembly.

ASSEMBLY BILLS.

54, 225. McAdam—Prohibiting the shooting of duck in the spring between Feb. 1 and Sept. 1. In the Senate.

55, 864. A. B. Baker—Relating to the preservation of forest trees and timber. A law, Chap. 256.

214, 858. Cronin—Forbidding the use of nets, etc., for menhaden in Jamaica Bay. In the Committee on Game Laws.

229, 270. Savery—Relating to fishways in the State dam across the Oswego and Seneca rivers. To the Governor.

270, 38. Maynard—Relating to fishways across the State dam in Chittenango Creek. A law, Chap. 166.

286, 231. Tane—Excepting Elsburgh from the anti-net law of 1886 for Jefferson county. In the Committee on Game Laws.

295, 232. McAdam—Prohibiting the shipping of partridge, woodcock and quail, killed in Oneida county, out of that county. Vetoed.

303, 233. Savery—Prohibiting devices for fishing in Lake Ontario in Cayuga county. To the Governor.

308, 197. Stevens—Amending the laws relating to fishing in Delaware River. To the Governor.

333, 142. Flaherty—Preventing the obstruction of the east and west branches of the St. Regis River. To the Governor.

344, 372. Little—Extending for 6 years the provisions of Chapter 395 of the Laws of 1886, forbidding the killing of partridge and quail in Niagara county. In the Senate.

481, 381. Hamilton—Same as Coggeshall S. 205, 206, for the protection of fish in the St. Lawrence River. In the Committee of the Whole.

499, 319. Hughes—Reducing the hounding season from forty-five days to ten days. In the Committee on Game Laws.

554, 354. McAdam—Prohibiting the sale of speckled trout in Oneida county. In the Senate.

618, 429. Fitts—Same as Raines S. 550, prohibiting devices for fishing in Owasco Lake. To the Governor.

742, 1122. Townsend—Forbidding the Land Commissioners to grant lands under water in Queens and Suffolk counties without the consent of the supervisors of those counties respectively. On third reading.

764. A. H. Baker—Providing fishways in Cattaraugus Creek. To the Governor.

807, 625. Little—Same as Walker S. 493, 463, for the protection of fish in Niagara county. Lost in the Senate.

835. A. H. Baker—Providing that the open season for deer shall begin two weeks later and end two weeks later. In the Committee on Game Laws.

840, 837. Barton—Same as Kellogg S. 627, 510, for the protection of fish in Glen Lake. To the Governor.

965, 979. Tefft—Providing that whoever finds unlawful devices for catching fish shall report to the Town Clerk, who shall destroy them and pay the finder $10. On third reading.

993, 1232. Stevens—Amending the laws relating to fishing in private grounds. On third reading.

894, 765. Treadway—Making the close season for salmon trout, etc., on Lake George from October to January inclusive, and for the rest of the State, October to March inclusive. To the Governor.

1001. McCann—Transferring the oyster lands from the Shellfish Commissioner to the Land Commissioners. In the Committee on Ways and Means.

1042. Tefft—Providing fishways in the Champlain Canal. In the Committee on Canals.

1072, 1058. Kimball—Same as Coggeshall S. 430, 462, for a commission to codify the game laws. On third reading.

1087, 867. De Peyster—Making the close season for ducks May 1 to September 1, and one month longer on Long Island. To the Governor.

1159, 1233. De Peyster—Prohibiting the shooting of ducks from steam vessels. In Committee of the Whole.

1189, 1121. Walters—Prohibiting the use of nets, etc., in Embogcht Bay, Green county. In the Senate.

1210, 1161. Pearsall—Providing for a fishway in Chenango River, at Chenango Forks. To the Governor.

SMOKY CHIMNEYS.—May 17.—I should suggest to "Keouk," in reply to his inquiry regarding smoky fireplaces, that all new chimneys being damp or green are more or less liable to smoke, and before he tears down another chimney let him have a little patience and make a few hot fires, using plenty of good dry wood that will burn with little or no smoke, using if necessary a little of Bridget's "fire-persuader" to start them, so as to get a quick, strong blaze and an upward draft at once. In the case of club houses, which are generally built near water, and are unoccupied the larger part of the year, the chimneys are very liable to be damp and smoky. Sometimes a little powder touched off in the fireplace before making a fire will prove beneficial in clearing the chimney of damp, heavy air. The upper part of the fireplace should be closed in, so that the powder will blow up instead of out.—ORMOND.

THE CUMBERLAND CLUB MEDAL.—Chicago, May 10.—*Editor Forest and Stream:* In your issue of April 25, I noticed an article "A Sportsman's Comment," by "Guadalupe," in regard to the legislation for the proper protection of game, etc., and goes on to say: "But that no effort with wise and unselfish ends in view, will be made is evident from the following paragraph clipped from an article of Mr. Hough's in FOREST AND STREAM of April 11. 'Messrs. McFarland and Gammon in their week at the Cumberland, bagged 520 ducks, besides their geese, cranes and snipe mentioned earlier. * * * Mr. C. D. Gammon has put up a gold medal for the Cumberland Club, the man killing the most ducks this season to win it.' Mr. Gammon evidently intends to keep that medal for himself." I, as the winner of the medal, desire to correct the erroneous impression conveyed by said article, by stating the facts, viz.: On Sept. 1, 1888, Mr. Gammon procured a beautiful gold medal on which is inscribed, "Gammon medal, for largest bag, one day's shooting, 1888." The medal was to go to any member securing the largest number of ducks in any one day's shoot, during the fall of 1888, barring Mr. McFarland and Mr. Gammon. Owing to the extreme dryness of the Cumberland marshes last fall, there was no shooting, consequently, by the request of a number of the members of the club, Mr. Gammon consented to let the medal go until the following season, when it was won by the small score of thirty-nine ducks—"one day's shoot." By publishing the above facts you will be doing justice to Mr. C. D. Gammon, who is a thorough sportsman, and at the same time confer a favor on HENRY STEPHENS, Vice-Pres. Cumberland Gun Club, Chicago.

REGINA, N. W. T., April 24.—There will be a marked decrease in the number of wild waterfowl bred in the Northwest Territory this season as compared with former years. There are two reasons for this state of things. The drought has been very severe and many of the small lakes and sloughs are destitute of water, merely whitened sepulchres of alkali deposit. Again the early spring brought the ducks and geese into the country early in March, and as the open season does not close until the 15th of May, it has given the settlers, who are rapidly filling up the territory, a full two months of spring shooting, and they have slaughtered the geese and ducks by the wholesale and have driven many of the survivors to other breeding grounds further north. We trust that the N. W. T. Council will abolish spring shooting altogether, and unless this is done at once, the feathered game will go the way that the buffalo and antelope have gone—to the land of shades.—STANSTEAD.

ADIRONDACK PRESERVE ASSOCIATION.—New York, May 16. At the annual meeting of the members of the Adirondack Preserve Association, held May 6, the following were made officers for the ensuing year: L. M. Lawson, President; E. W. Adams, Vice-President; James Yalden, Treasurer; J. G. Case, Secretary. Trustees: H. C. Squires, G. W. Shiebler, A. L. Griffin, F. W. Kitching. The association has 65 members and is in flourishing condition. Resolutions were adopted thanking the Forest Commission for its "untiring exertions and attentions given to the preservation of the forests," and declaring the association to be in accord with the suggestion made to the Legislature for the enactment of laws tending to the preservation of forests; also thanking the State Senate and Assembly for their assistance in the enactment of game and other laws bearing on forest preservation.

JEKYL ISLAND PHEASANTS.—Acting Superintendent E. G. Grob writes to Mr. N. S. Finney, Secretary of the Jekyl Island Club, under date of May 15: "I have to report that 125 young pheasants have been hatched out up to this morning, and that we have now 957 pheasants eggs under hens, all from the 50 hen pheasants imported in March. The percentage in hatching out has so far been 89 per cent. against 88, the highest record heretofore known. These pheasants did not commence laying until April 12, so the above is the record of 33 days. Experts is pheasant raising say that our showing so far has been remarkable and without precedent."

CHARLESTON, Ill., May 15.—Wildfowl shooting has been the poorest here since the country was settled. It has been one of the dryest springs for forty years, so the old settlers say, and nearly all the ponds in this county have been drained in the last few years. Very little snow fell during the winter, and it was a blessing for the quail, only a few were killed when the ground was covered with snow. I have heard several reports from the prairie and forests that the quail wintered well and are hatching out large flocks lately. The fall shooting will be just splendid for pinnated grouse and quail if reports are true. —OFFICE BOY.

HUTCHINSON, Kan., May 5.—There have been lots of ducks killed on Brandy Lake and the smaller ponds in the last two weeks. I have only been out once and got two geese and two ducks. A barber here in town was in the store bragging about killing eighty-three ducks in one day pot-shooting. I told him he had better take some poison along and poison them, as he might kill more; but he did not seem to take the hint. The boys are killing lots of plover and curlew.—SHADY.

PHILADELPHIA, May 14.—The inclosed was cut from this morning's *Record*. Can Mr. Hough tell us if it is true? "A dealer says Chicago ships game to this State all the year round, regardless of seasons."—ROBIN.

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price $2.50. For sale by FOREST AND STREAM.

FOREST AND STREAM, Box 2,832, N. Y. city, has descriptive illustrated circulars of W. B. Leffingwell's book, "Wild Fowl Shooting," which will be mailed free on request. The book is pronounced by "Nanit," "Gloan," "Dick Swiveller," "Sybillene" and other competent authorities to be the best treatise on the subject extant.

Sea and River Fishing.

FLY-FISHING FOR TROUT.

IN looking over my writing table I find a number of unanswered letters which have been laid aside for a more convenient season to answer them till I find quite a pile, and among them I find a goodly number inquiring in regard to fly-fishing, rods, reels, flies to use, how to use them, etc., etc. With your permission I will use a little space in your much valued paper upon this subject; not that I am able or intend to write an exhaustive treatise on that almost boundless subject, but finding a growing interest among those who fish for trout with bait to know more about the methods of the fly-fisher, I thought it might interest a large class of your readers to give a little superficial knowledge of the art and the paraphernalia pertaining thereto. More particularly as I see a noted want in that direction.

There are books upon that subject, but only a few of the great mass of trout fishers have them, and the balance either do not know where to procure them or have not the means to spare to get them, and many would not buy them, preferring to go without the knowledge or get such as might be offered by papers they may read.

I have in mind in this description the needs of those who fish in southern New England, and although what I may say may not be applicable to larger waters and large trout, still the reader will find the theory good in many another locality, and with slight change to suit the particular pond or stream these rules will apply to any water where trout live.

The successful fly-fisher needs the following articles: rod, reel, line, flies, leader, fly-book, creel, landing net and fishing boots. Armed with these he can go forth with reasonable hopes of ultimate success.

The rod should be a good one. Split bamboo of the better grades are preferable, but cost more than some like to pay; but don't take the cheap split bamboo, it is a snare and a delusion. If you cannot afford a good split bamboo buy a good all lancewood, or one with an ash butt and lancewood joint and tips. It should have solid reel seat below the hand, should be from 9½ to 10½ft. long, made of three pieces with cap and welt ferrules, and have a hand grip bound with cord or cane, and should have two tips. In using them never use a tip two days in succession, except when obliged to do so by breakage. If split bamboo, the rod should weigh from 6 to 8oz., and if lancewood, from 7 to 9oz., with what is termed a very "limber back," that is, it should bend evenly and easily back to the hand grip, and when swung by the hand back and forth the tip should be able to describe an arc of a circle, the cord of which should be equal to the entire length of the rod. There is an erroneous idea among some bait fishers that by having a light tip fitted to a bait-rod it would make a fly-rod of it. A bait-rod is and will remain such to the end of its existence, while a fly-rod is of an entirely different make up.

The angler in buying his first fly-rod should get as limber and pliable a rod as he can find; avoid stiffness and rigidity of action as a defect, not that it is an actual fault, but in learning to cast a fly the soft, pliable rod is the better of the two, and when he has learned to cast well then he can buy such a rod as pleases him best.

The reel should be a plain click reel with safety bands, or flush handle, and should be fitted to the rod in exactly the opposite direction from what you would fit it to fish with bait; that is, it should have the handle on the right side of the rod when the rod had its rings on the under side. It should be of what is termed in trade as an 80yd. size, and the angler can suit his taste both in this and in the rod, also as to whether he will buy brass, nickle or German silver; but whichever you buy, have rod and reel match, if only for the beauty of it.

The line should be a tapered 40yds. enamelled, braided silk line. If this seems a trifle too high in price, a good level, oiled silk braided line will do. In either case the size should be for the 6oz. split-bamboo or the 7oz. lancewood rod, what is termed G or No. 5, and for the heavier rods F or No. 4.

I advise the use of 40 to 50yds. of line, not that one ever uses so much, but it is continually wearing off and growing shorter, till in a few years a shorter line becomes entirely useless, and has to be thrown away and a new one bought. Use the smaller end of the tapered line to cast with.

The flies one needs can hardly be enumerated, and I shall only give some general directions for the angler to follow. Flies are of such wonderful variety and size that it is almost useless to give names, and it will be several years before he will be familiar with the names of more than a limited number. Trout rarely rise to the fly in the month of April, but when they do it is generally at a brown or red hackle or a dun, more often a blue dun. Sometimes a cinnamon will take well; but black, white, yellow, red or green seem to be of little account.

In May the hackles and some of the duns are good; in fact, any fly whose color is slate, buff, brown, or a mixture of these colors, or in which any of these colors are shaded with yellow, black or red, seems to be taking. June brings a greater variety; in fact, almost anything that is a fly, excepting the very brilliant ones—which are the most attractive to the amateur angler—are at one time or another good flies. These gaudy flies, that look so very beautiful to an uneducated eye, are very doubtful flies to try. When trout do take them, they take them well; but it is discouraging work to find the right day, till finally the angler comes to see less and less beauty in them, and the little bunch of brown fuzz we call a brown-hackle begins to have a very handsome appearance to him. This brings to mind a No. 5 salmon-jungle of very showy appearance, that I tried several times each year for three years in succession and only found one day when it took trout; that day it and its mate, a similar fly, took twenty trout in about an hour.

June is the month when the gray and black flies come into use. July gives a chance to use a still larger variety, and admits some of the showy ones. The same can be said of August, and all summed up in a few words of an old sportsman, "A few well-selected flies are better than a book full of them selected hit or miss." The angler must find out almost wholly what those few are; but a good rule to follow is this: For the first of the season use browns or slates, and only add colors as the season advances, ending in August with the brightest flies in the book. A word as to quality. For a season's fishing six dozen is not a large quantity, neither is it a small allowance. There will be many left at the end of the season, but a good assortment comes handy on one of those mean days when trout seem to be particular as to the fly they want and that very fly gets hung on a bush just out of reach and it is lost, and it was the last of its kind in the book; then I have seen the time when I would gladly give the price of the whole six dozen for a few of that particular fly.

For leaders use only heavy 6ft. with loops and have them made with two loops for dropper flies, about 2ft. apart, thus enabling the angler to use three flies. A half dozen more or less of these leaders is sufficient.

Any fly-book that the angler may choose, from the old fashioned pocketbook to the most elaborate and newest styles, according to taste, is proper; this is merely a receptacle for carrying flies, leaders, etc., and it matters not what it is, excepting that it should be conveniently arranged and sufficiently large.

A word is sufficient in regard to the creel, landing net and boots. Do not get the basket and net too small, or the boots too large.

Tie a strong cord to the net, or a strap with a small snap at its end is better, fasten it to the front of your fishing coat, and when not in use throw it over your shoulder, allowing strap enough to let it hang easily upon your back.

Now a word as to the arrangement of the flies upon the leader. Use only three on a gang, or cast, as they are called, and arrange them something after this fashion:

The day before the angler goes fishing he should take down his book and arrange six or eight different gangs of flies, beginning with the three most likely flies in his judgment, and placing them upon the leader, the heaviest fly for the stretcher, or end fly, the next in size for the first dropper, and a small fly for the top or second dropper. This arrangement is for swift water. If arranging for absolutely still water the order of size should be reversed, placing the small fly at the end for the stretcher, and a large fly for the top dropper. The reason for this arrangement will be explained later.

After having arranged the six or eight different casts, having them all provided with different flies, coil them up carefully and place them in the book, not forgetting to put in a small piece of chamois skin or a large rubber band, the first being preferable.

The old method of soaking leaders over night is utter folly, for a more excellent way is described below.

Having said this much as descriptive of the tackle necessary, and supposing that the angler has fully equipped himself according to directions, and that he is fully acquainted with the methods of fishing with bait, he is now ready to take his first initiatory steps in fly-fishing. A word before he starts about casting and then he may go to the brook and try for himself. He has probably read of the phenomenal casts at the tournaments and heard of the guides in the woods, who all cast 100ft., no one ever hearing of a guide who casts less than that figure. He has doubtless come to think that in order to be successful as a fly-fisher he must be able to make a long cast. This is entirely erroneous; it is said by an old woodsman that "it is impossible to take a trout on a cast of over 75ft." Although this is probably not absolutely correct, yet every one who has tried it finds, first, that it is next to impossible to cast over 75ft., and second, that having made an extremely long cast, it is well nigh impossible to hook a trout, if one should rise. This is the third improbability, and so we find that it is highly improbable, if not impossible, that trout should be taken by long casting.

Twenty-five or thirty feet is about as much as any fly-caster usually uses, particularly on mountain brooks, and this distance can be readily attained to by a very small amount of practice; and when the amateur angler has become acquainted with the motions of the cast sufficiently to be able to cast 25ft. fairly well, he should then practice for accuracy, for this is the more essential feature, and one that must be acquired with more or less proficiency in order to be successful.

We may suppose that by this time the angler with his outfit has arrived at the brook and is "rigging up." When he gets out his gang of flies he finds they assume the form of a spiral spring, so having his friend, "for certainly he has taken his friend with him," hold the end of the leader, he takes the chamois, and with a few rapid rubs between his finger and thumb straightens the leader so that it hangs perfectly.

Standing in the middle of the stream at the head or upper part of a long, deep pool, where he always expects to find a trout when bait-fishing, and grasping the grip of his rod with his right hand, having the reel on the under side, he unreels perhaps 15ft. of line, and with a sharp upward and backward stroke followed by a correspondingly sharp forward stroke, he lands his flies upon the still water of the pool below, and by a tremulous motion of the wrist begins to draw them slowly toward him, always keeping the little top dropper fly hopping and jumping from ripple to ripple till he has made them cross the rapid water at the entrance to the pool. He must watch his flies very closely all this time, and will not have to be told when he has a rise, as he will doubtless be as much surprised as the trout he hooks, if indeed he hooks him. At the first appearance of a break or rise he must learn to strike instantaneously. This is done by a quick upward twist of the wrist, and this is where most beginners fail. While in bait-fishing he lets the trout have the line and go where he likes, the fly-fisher seems to try to snatch the fly away from the trout; but the trout is very rapid, and the angler must be correspondingly quick or the trout will drop the little bunch of feathers, finding that it is not the insect or fly that he thought it to be, and the angler loses his fish.

Having hooked the fish he quickly transfers the rod to the left hand and reels him up to him till he is almost at his feet; then grasping his landing net he slips it under him with a deft motion and the trout is his. The art is nearly his also, for with his first trout taken squarely and honestly on a fly comes the enthusiasm of fly-fishing which carries him on to perfection.

And thus having led the angler to a successful capture I have finished what I proposed to write. Still I might continue and tell you that not all brooks afford good fly-fishing. In some brooks trout never seem to rise to a fly at all, while in others they come out with a slash that surprises even an old hand at it, and the next brook he tries they may take the fly well, but make no noise about it, seeming to come up and suck it in quietly, as though it was the most natural thing in the world to do. Then again brooks differ as to the fly one should use, and it is no sure sign because they take a certain fly on one brook that they take that particular fly on all brooks. Nor is it a certain sign that they will take a certain fly to-morrow because they have to-day; for to-morrow they may take another very different fly, or none at all. Hence the advantage of having the six or eight gangs ready rigged beforehand, so that if one cast fails to bring a rise another may be tried, and so on till the right cast or gang is found; then note the particular fly or flies they take, and he will find them taking one fly or possibly two, and scarcely a day in the season will they take all sorts of flies as well as some particular one, although I have found them at times when I thought they would take almost any fly offered them.

The reason for the arrangement of the flies on the leader as described above is that the large fly at the end catches more water and therefore offers more resistance, and helps to hold up the two droppers and make them appear more lifelike.

The beauties of the art will gradually unfold themselves to the angler till he will come to say that "one trout taken on a fly gave me more pleasure than a basket full taken with bait, and I shall use bait no more."

NOTLIKS.

THE MAINE WATERS.

RANGELEY, Me., May 12—*Editor Forest and Stream* Most of the Rangeleys were clear of ice April 30, something very unusual. Last year I crossed both the Rangeley and Mooselucmeguntic lakes on the ice May 19. Now the trees are green and the weather is warm enough for midsummer. The fishermen are coming in quite fast and some of them are on their way out with their box of fish. I think that so far the fishing has been very good at all points on the lakes. Below I give you some of the catches made this spring, and I wish it understood that I do not impose upon the readers of the FOREST AND STREAM by giving a record of a catch of fish which I have not first assured myself is correct.

Mr. E. L. Simpson, of Brunswick, Maine, has been at Camp Bemis a week; in this time without the assistance of a guide he has taken one hundred trout; most of these were taken from the wharf. His record runs as follows: One 5lbs., one 4½, one 4, one 3½, and a great many between 2 and 3lbs. Mr. W. P. Clark, of Peabody, Mass., and Mr. W. D. Brockett, of Stoneham, Mass., with John and James Collins for guides, have been fishing in the vicinity of the Upper Dam for the past week. Their record is two 7½lbs., two 5, two 4, twelve in the vicinity of 3lbs., and many about 2lbs. The guests at the Mooselucmeguntic House report good success also at Indian Rock and Mountain View House. Mr. E. L. Bird and Mr. Geo. Whittier took at the "Eddy" on Rangeley Stream in one day's fishing 45 trout, the net weight of which was 40lbs.

F. C. BARKER.

BOSTON, May 20.—The trout season in Maine is picking up. Reports begin to indicate a good catch, and after all there are a good many prominent business and professional men on the grounds or have just returned. The early season disturbed the starting a good deal, but the finest of weather of late has started off even those who were in doubt about going at all. Again the salmon season at Bangor has been a failure thus far, and several parties intending to go there have tired of waiting for the salmon to rise and have gone to either Rangeley or Moosehead. From Moosehead the reports are good. Some fine trout were shown at the Boston Chamber of Commerce the other day. Messrs. L. E. Pierce, M. J. Conant, S. R. Ellis and Jas. H. Davis had just returned from a few days' fishing at Moosehead. Their catch of trout included 225 in all, among which they showed at the Chamber of Commerce a lake trout that they claimed to weigh 11½lbs., with five other lake trout of good size. Their largest brook trout weighed 5lbs., with others of good size. The catch of trout excited a good deal of interest among their brother merchants. The Kineo Club will start for Moosehead May 31.

The catch of trout at Rangeley is proving rather remarkable for numbers this spring, though the monsters have not yet responded. Five pounds for a brook trout is the largest record I have yet heard of that could be authenticated. But the catch is proving remarkable in the number of landlocked salmon that are being taken in Rangeley and Mooselucmaguntic lakes. Already the record runs up into the dozens of these fish caught, but the range in size is not large. In fact a 4lb. landlocked salmon is considered a large one for these waters this spring. But the number is rather gratifying to those who have been instrumental in stocking these lakes with these fish. It seems that they are taken in trolling, with the minnow bait, the same as trout; or rather they are generally taken when fishing for trout, and I have yet to learn of any peculiarities in either bait, tackle or manner of fishing that brings them, otherwise than that practiced in trolling for trout. None of them are on record this year as having risen to the fly. Possibly they may later in the season, though they are not yet noted for rising to the fly in any of the Maine waters.

Ladies are counted in to the Rangeley fishing trips more than usual this spring, and they are making some fine records with rod and line. There have been registered at the Elmwood, Phillips, Maine, N. N. Thayer and wife, Boston; W. F. Sturtevant and wife, Springfield; F. A. Magee and wife, Thos. Cunningham and wife, and Weston Lewis and wife, of Boston. Mr. F. A. Magee is the principal of the Magee Furnace Company, of this city, and a regular visitor to the Maine trout waters. Mrs. Magee is a novice with rod and reel, but her record is rather satisfactory. She has landed an 8lb. landlocked salmon, the largest of the season thus far. Senator W. P. Frye is at his camp on Mooselucmaguntic. The story is that considerable fishing has been done off the rocks in front of his camp this spring, and a great many trout caught. This was all done before the worthy Senator got there. The Allerton Lodge people, of Boston, quite a crowd of them, are at the same lake.

There is a mystery about the salmon at Bangor. Still they do not rise. The theory is that the water is too roily. It is said that a great dam above has been carried away, and hence the roil. But it is also true that the run into the nets at Bucksport and other towns down the river all the way to the ocean has been very small. The trade in Boston which handles these salmon from these netters have not yet received half the usual number. It

is plain that if it is the roil that is preventing the run of salmon, then it is stopping them all the way to the sea. But there is still time for a good run, and sportsmen who have intended trying the salmon at Bangor should not be discouraged. There was a run way into June last year. They should wait calmly at home, with the understanding that the telegraph is to inform them the moment the run begins. It is hardly good policy to start off, as one or two Boston parties have done already. They got tired of waiting for the welcome news, and went to Bangor. There they were at heavy hotel expenses, with a cost of $2.50 to $3 for a man and boat, only to become one of twenty-five or thirty other boats on the river, where the whole catch was hardly a salmon a day for all the boats. They have returned, and they wish that they had waited.

Brook fishing has been good this season, or good up to the time the streams began to lack water. The season has been dry of late, with the weather hot, and I have reports from streams in Maine, New Hampshire and Massachusetts which say that trout fishing is very poor, with the mosquitoes as thick as they should be in June. One letter suggests that the mosquitoes and black flies are a month earlier than last year. SPECIAL.

ANGLERS' ASSOCIATION OF EASTERN PENNSYLVANIA.

THE association held a business meeting at their rooms, 1020 Arch street, Philadelphia, on the evening of May 14. After the usual routine, arrangements were announced for the entertainment, on Thursday, of the American Fisheries Society, by an excursion in the U. S. steamer Fish Hawk to Gloucester, N. J., to partake of a shad dinner and witness the hauling of the great seine. There were twenty-nine members of the association present, besides Fish Commissioners C. V. Osborne, of Ohio, and W. L. May, of Nebraska. Mr. H. C. Ford, president of the Pennsylvania Fish Commission, related his recent successful introduction of twelve millions of young pike-perch (*Stizostedion vitreum*) into streams of eastern Pennsylvania. These fry were obtained from the U. S. Fish Commission, and were liberated in the Delaware, Perkiomen, Schuylkill, Juniata and Susquehanna rivers. The average period of incubation of this species was fifteen days, and the fry were in a very healthy condition. The president of the association, Mr. A. M. Spangler, had purchased the fine salmon recently caught in the Delaware and brought it before the Fisheries Society. He told the circumstances of its capture and referred to the long interval since the planting of the species in this river. Mr. Osborne, upon invitation, sketched the condition of fishculture in Ohio, and the gratifying results apparent from artificial propagation. As a consequence of the work with pike-perch, or wall-eyed pike, he mentioned some extraordinary catches of this fish in the waters of West Virginia, where unrestricted fishing robs Ohio of the rewards of honest labor. Thirteen thousand pounds of pike.perch were taken at one haul of a seine about forty miles below Bellaire.

One of the most satisfactory pieces of protective legislation recently secured in Ohio is the measure giving magistrates final jurisdiction in prosecutions for violation of the fishing laws. This has done more good than any other single measure in force, and the friends of the fishes are rejoiced. Mr. May was called upon to tell what Nebraska is doing for fishculture, and he responded in detail. Brook trout and pike-perch have received considerable attention and both have caught on in fine style. The former thrives wonderfully in some parts of the State. Mr. May was one of the pioneers in wholesale hatching of pike-perch.

Many of the fishes which were introduced into the Elkhorn in 1873 by the wreck of a bridge and the falling through of a Fish Commission aquarium car on its way to California, have become acclimated and multiplied. The bass were especially plentiful until over-fishing reduced their numbers and they are still to be found by the initiated. Dr. T. H. Bean, of the U. S. Fish Commission, was asked numerous questions about the desirability of importing fishes from abroad, and he expressed the belief that we have an abundance of native species far superior to most of the exotics and do not need to look to Europe and Asia for our supply. The Anglers' Association has about 200 members, and is very active in all measures for the increase and protection of valuable fishes.

USES OF THE GERMAN CARP.

Editor Forest and Stream:

I was somewhat surprised to note in looking over the contents of the last number of your paper the following words in a communication from Mr. Shriner, of Paterson, N. Y., on the subject of "Carp in the Passaic:" "Please do not urge any person not to catch carp during the breeding season. Carp are worthless as a game fish and are not fit to eat at any time and they are, I fear, spoiling our bass and pickerel fishing, which is not as good as formerly in the upper Passaic." Your half dozen lines of reply were sufficiently conclusive, but possibly a few words in confirmation of them may not be out of place.

Ever since the U. S. Fishery Commission commenced the distribution of the German carp I have felt great interest in the results, and they have so far been developed as to leave no doubt on my mind as to the value of the carp. It is, I believe, the only European food fish successfully introduced into the Middle States, and that its introduction has been a success there cannot be a question. Those who have had better opportunities for knowing than myself state that the German carp, which includes the three leading varieties, appear to have found the American waters more congenial to their nature than those from which our present stock was taken.

However that may be, it needs not the saying that their multiplication has been simply marvelous. They are rapidly becoming the most numerous of all the large fishes in the waters in this vicinity—I mean of those that are not of the anadromous order, and I for one feel that the fact should be hailed with much satisfaction by every one, and for several reasons (1), because they are not predacous, (2) because of their wonderful fecundity, (3) because of the extraordinary rapidity of their growth, (4) because they are wholly harmless, (5) because, as a result of their fecundity, and their peculiar adaptation to all of our streams save the most rapid ones, their constantly increasing progeny will furnish food for our black bass, wall-eyed pike, rock bass, perch and pike, a most important consideration, (6) because, although they are not in the full sense of the term gamy, they are sufficiently so to afford real enjoyable angling, a 3 or 4-pound carp taken with light bass tackle is far from being despicable game. Strongly built and thoroughly finned, those who have captured such an one will bear me out in this assertion that they found it a fairly good fighter, contesting for supremacy to the last. Those who cannot descend below the level of the salmon, the trout and the black bass will, of course, laugh at this; but such people should remember that all others have neither their refined tastes in the matter of sporting nor yet their opportunities for indulging in such high-toned recreation. Where one man can spare the time to go a-salmoning or a-trouting, there are a thousand who cannot, and who are content to avail themselves of the inducements for a day's outing along the streams where the carp abound. (7) Lastly, because, although the German carp is not what may be called a first-class fish for the table, there are worse in our waters. Everybody knows, or should know, that with the exception of the shad and a few others, no fish is fit to be eaten—or, at least, is not nearly at its best estate—during the spawning season. This is the spawning season of the carp, and possibly Mr. Shriner has recently been testing their edible qualities.

It is well-known that among the ancients—and to-day among the Germans—the carp was and is regarded as a fine table fish. This may be due to the fact that the latter respects the spawning seasons, or it may be that they understand more fully than we Americans appear to have thus far, how the carp can be most toothsomely served. There is a particular way in which every known fish can be cooked, which is the best way. Perhaps we have not yet found out that way, but we evidently shall one of these days, or American culinary skill and ingenuity will have lost its cunning.

But, admitting that there shall be no improvement upon the present method of cooking carp, we must not forget that all are not as fastidious in their tastes as your correspondent appears to be, and that there are very many who will gladly welcome the German carp to their tables, even though it be less delicate and well flavored than our choicer kinds of fishes.

It may interest some of your readers to learn that no less than twelve millions of wall-eyed pike, or as we know them, Susquehanna salmon, have been planted in the Delaware, Schuylkill, Lehigh and Susquehanna rivers, and that our State Fishery Commissioners have made up their minds to try what can be done with the big-mouth bass in the same waters. Encouraged by the marked success which has attended the introduction of the black bass, the wall-eye, the rock bass and the German carp, they know no reason why the big-mouth bass should not thrive and multiply as well in the waters of the Atlantic slope as beyond the Alleghanies and as far north as Manitoba.

Excuse this hasty screed. When I took pencil in hand about an hour since, I did not think of inditing more than a dozen lines, but becoming interested in my subject I have scribbled away until my paper is all used up, and I have nothing more to write about, except to say that on Monday last a fine 12½lb. salmon was caught in the Delaware a few miles below this city. It was purchased by the Anglers' Association of Eastern Pennsylvation, submitted to the examination of the members of the American Fisheries Society, pronounced a regular Maine salmon, and afterward served up in admirable style at the great planked shad dinner given at Gloucester on Thursday last. We felt very proud of that salmon, though it was not by any means the first taken in our river.

A. M. SPANGLER.

PHILADELPHIA, May 18.

SMALL CATCH OF TARPUM.

TARPUM fishermen on the Florida coast say that the extraordinary rainfall there, making river entrances brackish or fresh, interfered with the catch of tarpum. We doubt this, because the fish runs up the Homosassa River in Florida and several fresh water rivers in Texas long distances in pursuit of its food. The unusually cold winter probably prevented the incoming of the fishes on which the tarpum feeds, as it did many other species belonging to the winter fauna of the Gulf of Mexico.

Total catch of tarpum to and inclusive of April 26, at Punta Rassa, Florida:

BROOK TROUT STREAMS.—From reliable sources we learn that the fly-fishermen are doing well in Monroe and Pike counties, Pennsylvania. A very prominent member of the Pennsylvania Fish Commission, who uses only the fly, caught 20 beautiful trout a few days ago in the vicinity of Egypt Mills. The number of trout fry planted in Monroe county last year was 200,000, while ike county received 150,000.

POTOMAC ITEMS.

WASHINGTON, May 7.—The opening of the angling season was never looked forward to more hopefully than this spring, but so far very little has been done. The water has been muddy with the exception of a few days in April, at which time a good many black bass were taken at Great Falls and other points. There will be fine fishing when the water clears, as it is now doing rapidly. The Evening *Star* here daily reports the condition of the water at Great Falls, and anglers are thus kept advised. Clear water is 36, and 1 is mud; therefore one can readily determine whether to go fishing or not. It will do to fish at 25 if one is after black bass, but less than that only catfish and eels will take hold. To-day it is reported at 24.

One of the favorite places near this city for moderate sport is at the Navy Yard bridge. The fishing is best at night on account of the electric lights, which seem to attract the fishes to a small radius. One evening last week two young men caught 115, including 60 striped bass; the rest were channel catfish and eels. The striped bass were from ¼lb. to 1lb. in weight.

The catch of shad and herring this season is reported as unusually large, and the shad are very fine. They sold yesterday at $10 a hundred, herring $3 a thousand. The Fish Commission people claim that the increase is marked and steady during the past five years, and in proportion to the increase of planting the fry. In 1857 a half million of shad were taken from one shore on the Potomac, more than the whole river yielded twenty years after. In that year 400,000 barrels of herring were taken. Now the Fish Commission hope to get the product of the river up to the old figures, and are confident. If they do they will have to overcome the effect of innumerable nets of all kinds that fill the river from Washington Monument to the sea. At one point a company has a seine eight miles long, which gathers up every living thing, and leaves vast quantities of small fry and spawn to be killed on the shore.

I can testify to the good quality of the shad this season, having dined upon it almost every day, once at Marshall Hall, nearly opposite Mount Vernon, where planked shad was the *pièce de resistance*—and very few resisted it. You know a shad that has been roasted on a plank is something for the gods, in comparison with which white bait, pompano, Spanish mackerel and the like are very ordinary provender. Come over some day soon, and with Capt. Blake of the steamer Corcoran and Col. McKibben of Marshall Hall, we will cause your eyes to gleam with solid satisfaction. JEROME BURNETT.

PROBABLE ADVANCE IN FISHING GUT. — Redditch, April 24.—*Editor Forest and Stream:* We send you herewith a translation of an article in a Spanish paper on fishing gut, which gives a fair representation of the position of the trade there. There is no doubt that gut has been sold during the last two years at less than the cost of production. We have received from our manager of our gut factory at Murcia a letter reporting a failure in this year's crop, and that it is calculated that not more than half the usual quantity will be made this year. This will make gut dearer. He reports that the country people who breed the worms will turn their attention to silk making, which will pay them better than killing the worms and drawing the gut. The result of this will be to restore the trade to a healthy position, so that those who breed the worms and those who make the gut may look forward to obtaining fairly renumerative prices.—S. ALLCOCK & Co. [The translation referred to states that large stocks of gut are held in England, which is the principal market for the Murcia product, and the demand will necessarily be smaller than in previous years. This would result in low prices to the producers, who are already discouraged by the foolish competition among the "hijueleros," and are going into other business.]

TROUT IN DELAWARE COUNTY, N. Y.—New York, May 20.—Just returned from De Silva's, Grant's Mills, Delaware county, N. Y. Found streams much lower than usual this time of year and trout quite plenty. I had the pleasure of bringing home my first 2lbs. trout, a beauty. I have fished in Delaware county for the past ten years, and you can imagine my delight when this one fell to my lot. It seemed a pity, indeed, to take such a beautiful trout from his home. You can say to the boys I had no trouble in passing the ever-watchful game warden with this fine fellow that measured over 6in. Mr. Wm. Reed, of Liberty street, assisted in landing the fish. Mr. Thomas Lawrence, an old trout fisherman from New York, caught during the week six 12in. trout. With a little more care and consideration on the part of residents in this locality (whom, I am sorry to say, are trout hogs) this stream would be one of the best in New York State. I think all will agree with me that most trout caught are taken from streams by inhabitants, who go for number and not size.—H. C. W.

FISH WEALTH IN GREAT LAKES.—Mr. C. V. Osborne, President of the Ohio Fish Commission, informs us that yellow perch were so common during the last fishing season that they were given away. Lake herring (*Coregonus artedi*) were bringing only a half cent a pound on the United States shores, and the Canadians could not afford to ship them because the duty was equal to the value of the fish. 700 tons of fish were left in the freezers at the opening of this season's fishing. This year's catch will show a falling off because of the over supply in 1888.

FLY-CASTING TOURNAMENTS.—The tournament at the Harlem Mere, in Central Park, this city, opens this morning and will continue through to-day and to-morrow. There will be a tournament of the Fly-fishermen's Club of Indianapolis, May 31, at Broadcut on the canal. The several contests will be open to all competitors and the prizes will consist of reels, rods, fly-books, wading boots, etc. The secretary is Mr. Jesse H. Blair. Hon. Byron K. Elliott, Dr. P. G. D. Hunt and Capt. Dewitt Wallace will judge.

ABUNDANCE OF SHAD.—We have referred to the general large yield of shad this season and now find that parties are salting this species on the Delaware for the first time in many years. The catch in this river is the greatest for 15 to 20 years. The price now is $12 per 100 fish; the lowest wholesale price in former years was $25 per 100.

SUCCESS WITH BLACK BASS.—Mr. H. C. Ford, president of the Pennsylvania Fish Commission, informs us that the Delaware and Susquehanna now are two of the finest bass rivers in the East. This gratifying condition is the result of planting 200 adult fish in each of these streams, the Delaware receiving them in 1870 and the Susquehanna in 1871 or 1872. The oldtime fisherman who lamented the introduction of black bass because they might kill all the chubs, is enjoying bass fishing now and using the chubs for bait. It has been feared by some persons that the bass would destroy many young shad; but Mr. Ford has examined thousands of stomachs of black bass and found only two shad; the bulk of the food has been insects and crustaceans. The bass, Mr. Ford observed, feed along shore, but the young shad descend mainly in the deeper waters of the channels and escape the bass almost entirely. Black bass are larger in the Delaware than in the Susquehanna; a recent catch of seven fish averaging over 5lbs. each will give an idea of the size. The headwaters of the Delaware cannot be excelled for bass fishing.

WHITE MOUNTAIN TROUT STREAMS.—In answer to "Kelpie's" inquiry I can inform him that there is an open trail from Waterville to the Sawyer River, and down to the settlements. The writer has only been over that part which lies between Mad River Notch and Waterville. His trip was from North Woodstock up the east branch of the Pemigiwasset, by good trail, to the Hancock branch; up this toward the southeast by the stream bed (although there is said to be a "spotted trail" through the woods) to the forks of the Hancock, and thence by an excellent path to Waterville. Near the Mad River Notch the Sawyer River trail joined our track. The beginning of it was well marked, and the guide books say that it is passable. The trail up the East Branch, four miles of which we traveled, runs on some four or five miles further, but does not reach the road through the Great Notch. The passage, however, can readily be made by an experienced woodsman.—PENN.

BLUEFISH ON THE JERSEY COAST.—Ocean Beach, N. J., May 17.—On May 14 I caught six bluefish, on the 15th twenty-seven, and on the 16th fifteen. Average weight 2lbs. These were caught by me with rod and reel and metal squid, in the surf at this place on the dates mentioned. They were the first on this coast this season in any manner, I believe, and certainly the first by the above method. Seven bass from 2½ to 7lbs. were also caught this week.—BIG REEL.

THE KINGFISHERS.—This is to give notice, to all whom it may please, that the Kingfishers have applied for passage, and have been assigned a position in these columns, the date being not very far ahead.

POSTED BROOKS IN BERKSHIRE.—The item in our last issue relating to posted brooks in Berkshire county was by a slip of the pen made to refer to Connecticut, whereas it should have been to Berkshire county, Massachusetts.

Fishculture.

AMERICAN FISHERIES SOCIETY.

ON the morning of May 15 the American Fisheries Society assembled, by invitation, in the rooms of the Anglers' Association of Eastern Pennsylvania at 1020 Arch street, Philadelphia. Owing to the absence of the president, Mr. J. H. Bissell, of Detroit, and the vice-president, Mr. S. G. Worth, of Washington, D. C., Dr. W. M. Hudson, of the Connecticut Fish Commission, and a member of the Executive Committee of the Fisheries Society, was nominated and elected as chairman for the meeting. After a brief address from Dr. Hudson, Mr. A. M. Spangler, on behalf of the Anglers' Association, welcomed the society and explained the objects of the association, whose name is scarcely an index of its functions. He called attention to the beautifully preserved specimen of Kennebec, or Atlantic, salmon recently caught in the Delaware and exhibited at this meeting. The salmon is a fine sea-run fish with only a few large black spots, and is intended to be discussed more intimately by the members of the Fisheries Society and their hosts at the field meeting at Gloucester. Dr. Hudson responded for the Fisheries Society, and then business opened. At this juncture Mr. Fred Mather, superintendent of the Cold Spring Harbor station of the New York Fish Commission, was elected recording secretary *pro tem.* Next followed the reading of an address forwarded by the president of the Society, Mr. J. H. Bissell. In this address the president advised the selection of some members of the executive committee from the city in which the subsequent meeting is to occur. In the appointment of State fish commissioners he recommends that persons and societies interested in fish-culture and preservation use their influence to procure the selection of men who have an intelligent knowledge of the subject, and a willingness to work in behalf of their interests. In the organization of fish commissions, after a wise selection of men, he would provide for frequent meetings for consultation and concerted action; the labor should be so divided as to require an equitable share from each individual, and all should combine to shape legislation by insisting on the application of sound principles and placing responsibility with trustworthy agents. The wonderful increase of whitefish resulting from artificial propagation in Lake Erie was referred to; the catch of 1888 was the largest for fifteen years, and fishermen realize that this is the return from intelligent work in fishculture. The annual report of the transactions was so well attended to that Mr. Bissell urges the continuance of the same committee who had the subject in charge in 1888. For honorary membership he recommends that the Anglers' Association of Eastern Pennsylvania, because of their aggressive and valuable action in all matters pertaining to fishculture and protection, be elected by the Fisheries Society. At 11:40 A. M., on motion of Mr. W. L. May, the Society adjourned until 2 P. M.

At 2:35 P. M. the afternoon session was opened. Mr. E. G. Blackford nominated for membership Mr. Henry Burden and Mr. E. P. Doyle, of the New York Commission, and Mr. Harry Miner, all of whom were elected. Dr. B. W. James and Mr. Hoyt Post were admitted to membership later. On motion of Mr. W. L. May the chairman appointed a committee consisting of Mr. May, Mr. W. A. Butler, Jr., and Dr. T. H. Bean, to prepare nominations for the officers of the Society during the coming year. Dr. Bean read a paper on "Hybrids in Salmonidæ," showing original drawings of three crosses whose history is known. These are the result of artificially uniting brown trout and saibling, rainbow and brook trout, and lake and brook trout. In all of these hybrids the coloration differs remarkably from that of both parents, the shape is modified, the variable characters of the parents continue to be variable in their progeny, and in certain important features, which were mentioned, the impression is stronger from one parent than the other. The union of a large-scaled species with a small-scaled one produces a large-scaled cross in all specimens studied. Hybrids between members of distinct genera are sterile as a rule. In the discussion which followed the reading of this paper Mr. Fred Mather, Dr. Kingsbury, Mr. Henry C. Ford and Dr. Hudson took part. Mr. Ford found the flesh of the hybrid between lake and brook trout better than lake but inferior to brook trout. This cross appears to be more hardy than either of the parent species, resembling in this respect, as Dr. Hudson remarked, the mule, and the hybrid between the buffalo and the common cow.

Prof. John A. Ryder delivered a very instructive lecture on the lateral line system of the shad. He described minutely the structure of the series of tubes which make up this important apparatus, showed the provision for avoiding interference with the sight of the fish, and discussed the probable function of this system, which he considered to be supplemental to the sense of hearing, reaching the conclusion that it may be intended to aid the shad in determining the approach of masses of matter, whether in the form of food, enemies, or some other element affecting the welfare of the species. This system is not developed in the larval shad, and consequently the embryo is deficient in its apparatus of sense. The development of this contrivance takes place in the post larval stage and progresses by an infolding of the epidermis. Fishes are the most interesting class of animals to the biologist because of the perfection in this supplemental apparatus of hearing. Dr. James and Dr. Kingsbury asked some questions concerning details of this subject at the close of Prof. Ryder's address.

Mr. W. L. May brought up the question of a place for the next meeting. Mr. Blackford and Dr. Kingsbury urged the claims of Washington, while Mr. Osborne, Mr. May and others preferred Put-in-Bay Island, Michigan. The matter was decided by ballot, and Put-in-Bay was the place fixed upon.

At 4:35 P. M. Mr. H. C. Ford moved an adjournment until 8 P. M., which, after much reluctance on the part of some members, was finally agreed to.

At the evening session the following gentlemen were elected to membership: A. M. Spangler, R. M. Hartley, J. Penrose Collins, Thos. B. Harper, Collins W. Walton, Edwin Hagert, H. O. Wilbur, Fred W. Brown and William S. Hergesheimer, all of Philadelphia.

As no papers were ready for the evening meeting, the time was devoted to a series of talks on numerous subjects of interest to fishculturists. Mr. Blackford mentioned the gratifying returns from planting salmon in the upper Hudson; in 24 hours ten salmon ranging in weight from 10lbs. to 22lbs. were caught in New York harbor within five miles of the Battery. Dr. Hudson recounted the experiences of the Connecticut Commission with salmon in the Connecticut River, and stated the obstacles in the way of success. Mr. Spangler recalled captures of salmon in the Delaware in recent years, and a notable yield in 1878. Mr. Mather's work in planting salmon several years ago in the headwaters of the Delaware was referred to. A lively discussion of the effects of sawdust and other foreign substances in streams was entered into by Mr. Mather, Mr. Spangler, Mr. Osborne, Dr. Kingsbury and others, with the usual and inevitable difference of opinion which such subjects always involve. Mr. Osborne found straw pulp in the Scioto River very destructive to certain kinds of fish, and attributes its action to the poison of fermentation. Coal oil does not seem to do any especial harm except to the flavor of fish. The failure of the attempt to introduce California salmon in the East was talked over by Dr. Cary, Mr. G. Brown Goode and Mr. Mather. The only distinguished success in acclimatizing this species is in ponds of the Eastern States and Germany. Changes in the migratory or non-migratory habits with locality in the brook trout and rainbow were noted by Mr. Mather and Dr. Bean. Mr. Spangler and Dr. Hudson mentioned some of the serious difficulties in the way of establishing shad in the Connecticut and Susquehanna, caused by injurious fishing appliances and want of concerted action between States.

At 10 P. M. the Society adjourned until 9 A. M. on Thursday.

On Thursday the morning session opened at ten. The committee on nominations for officers, through its chairman, Mr. W. L. May, presented the following names: President, E. G. Blackford, New York; Vice-President, Herschel Whitaker, Detroit; Treasurer, Henry C. Ford, Philadelphia; Recording Secretary, Fred W. Brown, Philadelphia; Corresponding Secretary, C. V. Osborne, Dayton. Executive Committee—Dr. W. M. Hudson, Hartford, Conn.; Hoyt Post, Detroit, Mich.; Philo Dunning, Madison, Wis.; Dr. H. H. Cary, Atlanta, Ga.; J. V. Long, Pittsburgh, Pa.; Dr. S. P. Bartlett, Quincy, Ill.; Henry Burden, Troy, N. Y.

The report was accepted and, on motion of Mr. Spangler, the secretary cast the vote of the society in favor of the nominees.

Mr. May and Dr. Hudson referred to the faithful and efficient work of Mr. Mather as the recording secretary from the organization of the society to the present time. On motion of Mr. May the dates for the next meetings were fixed for May 14 and 15, 1890.

Mr. Fred Mather read a paper on "Salmon in Hudson River." After reminding the audience of the successful introduction of shad into Pacific streams and its restoration in Atlantic rivers, as also the good results from planting brown trout, he entered upon details of recent captures of salmon in the North River. In 1880 the possibility of making the Hudson a salmon river was again brought forward by Mr. Mather, and in 1882 a few salmon fry were planted in Warren county as a first experiment. Later in the year 25,000 fry were liberated. The number was increased gradually until in 1888 the output was 440,000, and the total to this time is more than 2,000,000 fry, besides some yearlings. In 1887 numerous salmon were taken in the Hudson. In 1888, between New York and Troy, 134 salmon were caught, 26 of them near the dam at Troy. Gravesend Bay and Troy offer the best facilities for collecting eggs of the salmon. There is no place below Troy cool enough to allow penning of salmon. The ordinary house sewage does no harm to fishes. The injury from chemicals is greatly lessened since the paper mills use wood pulp. The worst obstruction to the ascent of salmon in the Hudson is Palmer's fall and dam at Jessup's Landing, where a drop of 25ft. into a shallow pool shuts out the fish. This paper was discussed by Mr. Burden, Dr. Hudson and Mr. Spangler.

Mr. G. Brown Goode read an account of the "Colors in Fishes." He explained the structure of the skin and its varying thickness in species whose habits differ, the disposition of the scales and their strength of attachment. The colors are due generally to the presence of pigment cells or cromatophores, but in some cases, to a physical condition of the surface of the scales owing to the existence of iridocites, or rainbow plates. The combination of pigment cells and scale surface gives varying results. Plates of embryo fishes described by Alexander Agassiz were shown by way of illustration. Albinism is due to the absence of pigment cells; golden colors are due to incipient albinism. The adaptive coloration with reference to surroundings must be related to a special supply of cromatophores, in all probability derived from the food. Color is influenced by the supply of blood. Whenever a mass of food withdraws the blood from the surface, the fish becomes pale. Loss of color follows death, but placing the fish in the sun may restore the color. There is no doubt of the ability of fishes to change their colors at will and almost instantly. Flounders, which metamorphose from a vertical to a horizontal position with age, bringing the organs of vision on one side, lose the color of the blind side, as a rule. The discussion of this very interesting address was entered into by Col. McDonald, Dr. Kingsbury and Prof. Ryder. Col. McDonald does not believe that blindness invariably produces blackness, for there is no relation between the two in a lot of rainbow trout now kept at Wytheville, Va., which have become blind probably through the influence of asphalt. Prof. Ryder explained the structure of pigment cells, their development and arrangement, which latter varies with the species and is useful in diagnosis. The pigment cells differentiate in color and have the power of selecting their position. Their function may be to shade the blood, thereby changing the appearance of the fish and deceiving its enemies; they are under the control of the nervous system. These cells have also a respiratory function.

Mr. W. L. Powell, of Harrisburg, made some inquiries about the fresh-water terrapins of Juniata River, the means of propagating and protecting them, which were answered by other members. Terrapin culture is still in the same place with frog culture. At 11:45 A. M. the Society adjourned to meet on the U. S. Fish Commission steamer Fish Hawk, at 1 P. M., for a trip to Gloucester, N. J., where the members were invited as the guests of the Anglers' Association of Eastern Pennsylvania to a plank shad dinner. A meeting was called in the wardroom of the steamer at 1:37 P. M., Mr. Blackford presiding. On motion of Dr. Cary a vote of thanks was tendered to the retiring officers. The following new members were elected: E. H. Frishmuth, Robert Mackay, Jacob F. Miles, John Gay, Amos R. Little, Richard Rathbun and Capt. J. W. Collins. As corresponding members Prof. F. A. Smitt and Dr. Filip Trybom of Stockholm, O. T. Olsen of Grimsby, England, and Prof. A. J. Malmgren of Helsingfors were elected. The report of the treasurer, Mr. Blackford, was read and adopted. A resolution expressing sorrow for the death of the famous fishculturist, Seth Green, was offered by Mr. Doyle and favorably acted upon. At 2 P. M. the Society adjourned subject to the call of its president.

About 200 gentlemen assembled at Gloucester in response to the invitation of the Anglers' Association, and the dinner was greatly enjoyed under the genial guidance of Mr. A. M. Spangler. After the feast several eminent men made brief addresses: Dr. Hudson, Mr. Blackford, Dr. Leidy, Fred Mather and Dr. Levick.

The hauling of the great seine was disappointing because of the very small catch, but the Delaware has already received a tremendous share of the yield, and shad are remarkably cheap.

With the return to Philadelphia ended one of the most enjoyable and prosperous meetings of the American Fisheries Society, signalized by the addition of twenty-one new members, mostly members of the Anglers' Association, giving point to the remark of Mr. Blackford that it is fortunate the Society is departing else it might absorb the entire body of the Anglers.

RAINBOW TROUT IN PENNSYLVANIA.—The experiment of introducing rainbow trout into Pennsylvania streams has been unsatisfactory, and many thoughtful members of the anglers' associations recommended the discontinuance of the attempt to stock waters with this species. Recently, however, the friends of the rainbow have been delighted with the reports of this trout in the Harrisburg market. In some portions of the State, probably wherever the conditions were favorable and escape was prevented, the fish has shown up well.

The Kennel.

FIXTURES.

DOG SHOWS.

May 22 to 25.—Pacific Kennel Club Show, San Francisco, Cal.
Sept. 10 to 13.—Sixth Annual Dog Show of the London Kennel Club, at London, Ont. C. A. Stone, Manager.
Sept. 10 to 13.—Dog Show of the Central Canada Exhibition Association, at Ottawa, Can. Capt. R. C. W. MacCuaig, Secretary.
Sept. 11 to 13.—First Annual Dog Show of the Toledo Kennel Club, Toledo, O. T. B. Lee, Secretary.

Feb. 18 to 21, 1890.—Fourteenth Annual Show of the Westminster Kennel Club, New York. James Mortimer, Superintendent.
March 11 to 14, 1890.—Second Annual Dog Show of the Rochester Kennel Club, at Rochester, N. Y. Harry Yates, Secretary.

FIELD TRIALS.

Nov. 4.—Third Annual Field Trials of the Indiana Kennel Club. P. T. Madison, Secretary, Indianapolis, Ind.
Nov. 18.—Eleventh Annual Field Trials of the Eastern Field Trials Club, at High Point, N. C. W. A. Coster, Secretary, Saratoga Springs, N. Y.
Dec. 2.—Inaugural Field Trials of the Central Field Trial Club, at Lexington, N. C. C. H. Odell, Secretary, Mill's Building, New York, N. Y.
Dec. 16.—Second Annual Field Trials of the Southern Field Trial Club, at Amory, Miss. T. M. Brumby, Secretary, Marietta, Ga.

SOME NOTED GREYHOUNDS.

[*Concluded from page 341.*]

A VERY noted dog for working over all sorts of courses was the great Barrator. The most severe and trying one probably he ever ran was Mr. Patterson's black and white Sweetbrier, by Baron out of Mr. Jardine's Tailwife. It was close to a village, through foldyards, over high stone walls, through gateways, across the road and up the road as well, and ended finally up over a high hill over some very deep heavy ground. "It was just the course for him," the judge said, "for he is the cleverest dog in England." As to his appearance it is doubtful if there ever was whelped a more serious, sober, sedate looking dog than he, while his head was abnormally large—"large eno' for a whole litter." He was under perfect control at all times and in all places, and while he would respond to his master's invitation to a frolic by playing with a ball as does a kitten, or at veritable leap frog with his owner, yet he would walk through a field alive with hares jumping up on every side, yet never cast as much as a "sheep's eye" at one of them. He considered himself a "man of business" in all respects, and when the time came to perform his work he convinced the hare of his ultimate intentions. So well was he under control that his owner used to delight in bringing him up to his well laden table, where he would stand as indifferent to what was placed near him as if he was stone blind, a trait rarely seen in a greyhound, according to my own experience and that of others, gained by the purloining of many a chop, roast, and even a big fat turkey. So great was Mr. Nightingale's admiration of "the Acrobat," as he called Barrator, that he never went to Lytham without going to see the spot where the black pressed his hare to a gate, went round and round as if on a pivot, turned her back and killed her on his second jump.

The bulldog tenacity of purpose was perhaps never better illustrated than when Waterloo ran his terrible course with Lord Douglass's Driver, up and down over the large field at Cambuslang. Driver was beaten out and out in this course, and was only too glad to be picked up. Waterloo was thoroughly exhausted too; he had enough strength left, however, to stumble into the next field after the hare, and then he laid down, utterly unable to move a muscle. This was in the fourth tie, and so exhausting was it that neither dog ever recovered from the effects. He was a very peculiarly-marked dog, and was variously entered as white brindle, fawn and white, white blue and white dun.

So many accounts of the wonderful Master McGrath have appeared in print that it is hardly worth while to repeat them here. The only one which I do not remember having seen was an account of his course with Lobelia (48lbs.), when he made his remarkable kill. As is well known his pace, cleverness and tact were almost supernatural. He jumped a ditch into the road, Lobelia side by side, neck and neck with him; the hare fairly shot back over the hare bridge, the dog jumping back like a flash and nailing her as she came over. Mr. Warwick said in all his experience in coursing he had never seen a kill so clever and masterful, it being "just like a cat pouncing on a mouse."

That greyhounds with short, thick necks may still be good killers is especially illustrated in the great fawn dog Oliver Twist, who was considered when he ran to be the very best of killers. He won the 64-dog stake at Lytham without being even once challenged, and in addition to this victory killed every hare himself in grand style. Though he had great strength of body, still these kills were considered all the more remarkable since he went at a rattling pace and had an abnormally thick and short neck.

Mr. Sharpe's Hughie Graham (brother to Bonnie Scotland and Bell the Cat) won the Waterloo in 1851. In his final course with Haymaker he got away very badly from the slips, and so gave his competitor a fine chance to lead in a long racing stretch. Hughie, however, crawled up inch by inch only it seemed, and finally, after a long punishing course, headed his opponent fully 60yds. from the hare. He gave the hare three or four good wrenches, and ended the course by turning her into Haymaker's mouth. His finest trial both of speed and endurance was with Mockingbird, by Figaro, in the last but one round for the Waterloo. Mockingbird's great characteristic was her particularly fine eye to the hare, for she seemed, and a resumé of her work verifies it, to be able to locate the exact spot where a hare would reappear after it had disappeared over a hill or in a ground hollow. This peculiar ability enabled her to score many a win against a better dog. By this clever calculation she was always able to gain a few lengths on her opponent. This was illustrated well on the course in question with Hughie. The hare disappeared in a hollow, and by the time Hughie had again sighted her his adversary was many lengths ahead of him. Settling himself down to earnest work he rapidly regained his lost ground, and finally turned the hare into the bitch's mouth. Mockingbird showed to the best advantage with a very fast strong hare, as she was far from a good worker, but finally met her match in this regard in Mr. Etwall's Ebb, by Westward, who gave her a great drubbing at Amesbury. The remark of Mr. Nightingale best describes this quality when he says: "She throws herself at her hare further off than any greyhound I ever saw."

I have in several instances referred to Mr. Nightingale from which the reader no doubt appreciates the fact that he was not only held in great esteem as an honorable judge at all great meetings, but was a true gentleman. His eye for a properly formed greyhound was a most correct one and he rarely failed in his estimate either as to the speed of the dog or his ability to stand a long and exhaustive course. The Roman Camp near Dalkeith was a great meeting of the Midlothian Club (now defunct), an exceedingly aristocratic club which prided itself greatly upon its meets as well as its grand dinners. To the dinner after the meet I refer to, the Duke of Buccleuch sent venison, Sir G. Montgomery blackface mutton, Lord Melville pork, Mr. Geo. Wauchape perigord pie, etc., etc. Many members kept no dogs at all and only attended the meets, and later on appeared at the dinner. After having accepted the invitation to judge at this meeting, Mr. Nightingale found to his disappointment that it clashed with the Waterloo. The Waterloo card, however, was sent down to him, and of course the many friends of the Chief Justice requested him to advise upon it. It was a difficult task at the very best. He, however, ran over the card very carefully and gave the subsequent result perfectly correct, save that of the course between the brother and sister War Eagle and Wicked Eye, on which he said he dared not hazard a guess. His summing up of the entire meet was something remarkable, almost beyond belief. His final remark was "the ground should suit Cerito and Neville best," and the result verified the prediction, as they were respectively first and second. It is doubtful if there ever lived a courser who could repeat such successful predictions.

Scotland Yet, the dam of some of the greatest greyhounds the coursing world ever saw, was, according to John Wilson, alias Jack o' Dalzeg, her trainer, not only "very fast and of a very jumping sort, but a grand bitch withal." She divided a 64-dog stake at the Caledonian meeting with Baron, and the next year ran up for the Waterloo to Judge. Mr. Campbell was very much dissatisfied with this course, for he said, "It is no course at all. The hare weighs but 4lbs." The judge said, "She killed her hare too soon. Judge went off at a tremendous pace, went round and turned the hare right into the bitch's mouth, who killed her before she could get in any real solid work, which was her great forte."

Mr. Lister's Chloe, winner of the Waterloo, 1883, was considered a little short of fire from the slips, but had good pace, always greater than Rebe's in her stretches, smooth in her work and very clever with her teeth. As to her thighs, hocks and ribs, they were said to be perfection. If she had a structural fault, it laid in her forelegs, which by many judges were considered at least a half inch too long. In point of bench show qualities, it is doubtful if there is a bitch now on exhibition that could surpass her. She had a beautiful coat, and her color, white and black, made her particularly attractive to look at.

Cerito and Master McGrath were the only greyhounds that ever won the Waterloo Cup three times, the former achieving this wonderful feat in 1850, 1852 and 1853, the latin 1868, 1869 and 1871. The former was most beautifully bred, being by Lingo out of Wanton, which was pure Lancashire blood. She had fine pace and sense to correspond. Though a most successful bitch she received a heavy beating at Altcar where she met for the stakes the great Dalton, a dog noted for his ability of putting in the greatest amount of work possible in the shortest space of time. As a killer it is chronicled that there was nothing to compare with her perfect safety and truly scientific work. Her outlines were perfect, being in all parts the accepted measurements. She seemed to abhor a flying kill and never was known to make one, waiting for a later opportunity when she could effect it either just on the bend or the broadside, and for this effort she would draw herself a little back and then plunge. Though she ran well over any sort of a course her forte was grass. As Cerito was perfect in her killing abilities so was Lord Eglintars's celebrated Waterloo (by Dusty Miller) equally bad in this regard. He was simply a rank bad killer. His great forte lay in working his hare, and when he came to heavy ground or a plowed field he flew over it just as light as a cork. He was a great dog and if any of my readers has a copy of the Caledonian Coursing Picture he will find him in the foreground with his tongue out.

For thorough work, pace and fencing, all combined, it seems as if Riot never had a peer, though she failed at Waterloo, after having essayed to win it on two occasions. Still she has to her credit the remarkable score of winning 74 out of 84 public courses. Maid of the Mill, whose blood we find in many of the great dogs of to-day, was a fine big racy-looking red bitch, by Judge, and won the Waterloo in grand style in 1860. The beauty of her outline was marred by having too much arch in her back, and being very short between the couplings gave her action a very stilty and rather awkward appearance, yet for all this she was very clever and fast, and in her course for the Waterloo with the little Irish dog Blue Hat (by Legar Hill) she fairly ran round him. In the next course she beat Lord Sefton's Sampler in fine style. Though the former course was rather a short one the latter made up for the deficiency, as it was not only a very long, but a very severe one.

In speaking of the length of courses it is said that Regan (by Barrator) led Wood Pigeon further than any other greyhound was known to lead his antagonist.

Though there were many dogs that performed remarkable feats, both as to courage, speed and cleverness, not one perhaps surpassed Beacon, who had such sterling qualities as enabled him to win in good form the Caledonian, Altcar and Irish challenge cups, all within about three weeks. These events were not second-rate ones, but such as brought together the best dogs of the land.

Those gentlemen who have any greyhounds from the stock of those I have made mention may be able to account for the peculiarities they have noticed in their favorites, as certain traits are without doubt hereditary where sire and dam are of a very positive character. Hence, it is a subject of vital importance what dog should be selected as a sire in order that the deficient qualities of the dam may be overcome by the stronger character. There are innumerable instances where second-rate bitches have been bred to a high-class and positive-charactered dog, and great results have been achieved by such crossing.

H. W. HUNTINGTON.

SMUT.

REDUCING THE SURPLUS DOG SUPPLY.

THE dog is a noble animal, and beyond all others the friend of man, serving him with a faithfulness, a devotion and a zeal that has no parallel; but when we bear testimony to the excellent characteristics of the dog we do so intending it to apply in a general way only. We all recognize that under certain circumstances dogs, that is some dogs, may become a very grave nuisance and a danger.

Every breed of dogs has some special characteristics which render it valuable, and every breeder of dogs aims by a judicious selection of stock to perpetuate in the progeny the best characteristics of the selected breed or breeds, and the fact that dogs thus carefully bred are valuable and always in demand results ordinarily in their being well cared for, and to a greater or less extent, in their faculties being cultivated by exercise. Such dogs thus carefully educated and treated with consideration are very properly characterized as well bred, gentlemanly dogs, whether kept as companions or for the chase.

Any mongrel similarly treated might develop as high social and moral qualities, but we have to deal with the fact that mongrels very rarely enjoy these advantages; the very fact that mongrels exist is in itself evidence that their parents were not carefully looked after, and mongrels, having nothing to commend them to dog fanciers of taste, and consequently of no value, are for the most part ill fed, ill-cared for, uneducated and left to promiscuous intercourse with all the vagabond dogs of their neighborhood. The fact that such dogs are obtainable without money results in great numbers of them being reared and harbored by people who think it a fine thing to have a dog, but who do not trouble themselves with their responsibilities as dog owners. The dogs are allowed to roam at large, are ill-fed and have to forage for themselves. Every village and city in the country is infested by such neglected worthless dogs, a nuisance to the community and a danger to life and property. Some of these neglected curs are bold, powerful dogs, which subsist in great part like the wolf, by ravaging the farmers' flocks, others prowl among the garbage heaps of cities, subsisting on carrion, diseased carcasses and other putrid and unwholesome food, which renders them so unclean that their bite is always apt to be followed by blood poisoning, whether man or beast is the victim.

Accustomed too to ill treatment, their morale is low, and their temper often savage, which renders them dangerous, especially to children. The presence of few or many such dogs in almost every community, necessitates legal measures for restricting their increase, and guarding against the danger to life and property attendant on their presence; but at the very outset it is recognized that a crusade cannot be waged against curs and mongrels especially; the danger to be apprehended from dogs of this class is due primarily to their not being kept under proper restraint nor properly cared for, and if dogs or their owners are to be rendered liable to penalties, the penal laws must be based on evidences of want of proper care on the part of owners.

Dogs are in some States the subject of State legislation and taxation, but this fact does not debar the cities from imposing further taxation, from requiring that special precautions be taken, nor from proceeding against either the dog or his owner for violation of the requirements of the local law.

We have been at the pains to communicate with the local authorities in every city of any importance in the Union, with the object of ascertaining in how far the imposition of a dog tax or license is general, how the difficulty of unlicensed or stray dogs is met, whether such dogs are killed, and if so by what methods. This has brought us a mass of interesting correspondence, which we have prepared for publication, and from which it will be gathered that the basis of all legislation on this subject is compulsory registration of dogs, the imposition of a license or dog tax, and the requiring that every dog thus registered and licensed, shall bear the evidence of it on his person.

Beyond this elementary requirement the procedure varies widely in different localities. In some localities dogs are left unmolested at all times and seasons, but their owners are prosecuted and fined if they neglect to take out licenses. In other localities the owner is left unmolested, and the unlincensed dog is shot on sight or impounded and otherwise disposed of. In some localities a dog is at all times safe from the minions of the law if duly provided with collar and registered tag; in others he may not be at large without the addition of a muzzle, or he must be held by a short chain, while in one place at least, the roaming of a dog at night is held so objectionable that collar, tag and muzzle conjoined afford no security from the murderous constable. In some places unlicensed and stray dogs, or dogs without evidence on their persons of their owners' names and of registration, may be shot on sight; in others they are first impounded and held for periods varying from one to three days for redemption. Nor is there any lack of variety in the modes in which dogs are done to death—they are shot, drowned, poisoned, knocked on the head, or asphyxiated by carbonic acid or other gas, according to the temper and moral culture of the society whose laws their owners have violated or neglected to comply with.

In several States the fees derived from the dog taxes and fines are very logically appropriated to compensate for damages done by dogs in the State, and thousands of dollars are in this way recovered by farmers whose sheep have been killed or worried by unknown dogs. In some States the impost of the tax and code of regulations are instigated mainly as a protection against hydrophobia; in some States the dogs are taxed as personal property, and in still others they are regarded as respectable citizens, free to go and come untaxed, and left alone as long as they leave others alone.

Our own interest in the matter is confined mainly to the mode in which dogs are put to death under the law. It is a recognized fact that dogs without value and owned or harbored by people who care so little for them that they will not take ordinary precautions for their safety, are a nuisance, and more or less dangerous to life and property. The readiness of an owner to pay taxes is the best evidence he can afford as to his concern for the safety of his dogs, and there is a general concurrence of opinion that dogs whose owners will not pay tax for them must be put to death; but in the name of humanity it is desirable that the dogs be killed in the least painful and objectionable manner, and that the best method or methods in force in one place be held up for general imitation.

We purpose following this paper with the letters we have received on the subject from mayors and other officials, reserving the most important cities to the last, following this with criticisms on the measures in vogue, and closing with suggestions for future legislation.

SMUT.

WE give this week a picture of the black setter bitch Smut, who died May 10. She was whelped Feb. 25, 1876, and was by Copeland's Pete (Hill's Trim—Scranton's Smut) and out of Thompson's Queen Bess (Brains—Thayer's Tib). She was owned by Mr. Newton Earle, of Providence, R. I. It is sufficient to say she was a good dog.

I have just received a note from Mr. T. M. Aldrich saying that the well-known black setter bitch Smut died May 10, at the ripe age of 13 years and 2½ months. The history of Smut is well-known to the older readers of FOREST AND STREAM, as the reports of the field trials of the Eastern Field Trials Club, when they were run at Robins Island, contained full accounts of her performances. In 1879 at the inaugural trials of the club, Smut ran with Grousedale in the Brace stake and the pair won second place. In 1880 she ran in the All-Aged stake, and although she was not placed, there was a feeling among many of the spectators that the little lady was about as good as the best. I well remember every important phase of that notable meeting. I was handling Sensation and had carefully and anxiously watched the performances of the dogs in each heat, and at no time during the running of the stake did I have the least fear that the grand old pointer would be defeated until near the finish of his heat with Smut, then I must own that I was scared, as the little bitch had gotten in some very fine work and was, to my mind, ahead, but the judges thought otherwise, however, much to my relief, as I considered her a very dangerous competitor.

Although Smut has always been described as a native setter, there is imported blood in her veins and good blood too. For more than forty years I have owned and shot over her ancestors and relatives and have ever found them to be the very best dogs for New England shooting that it has been my good fortune to find, hardy and enduring, with lots of hunting sense and very companionable withal; they are, for the sportsman who keeps but one dog, as good as the best.

SHADOW.

PERVERTED TASTE.—*Editor Forest and Stream.* Perhaps you or some of your readers can tell me why two blue-blooded, well trained, daily groomed Graphic pointers, that won't touch raw meat, and were brought up in a neat and pious family, should take every available opportunity to roll themselves on a decayed bird or stinking piece of meat. If these can't be found near by, they will go off a mile or two to find some field covered with stinking phosphate, and rob the poor farmer of all that will stick to their coats. I have talked with the dogs about it a good deal, but they don't explain why they they do it. They have come home conscious of offense, and penitent, but do it over again, all the same. Is it perverted taste or is it instink?—A. P. C.

FRANK FRANCIS.

AS we grow older, and our hunting and fishing days become fewer and fewer, till they are not much more than a memory, we are apt to recall oftenest the particular days of which we have the fondest remembrance, both of incident and prowess, and in dwelling on them we cannot fail to call to mind the friends and companions who contributed to our success. One of my companions in the past, and the chief figure in many a happy recollection of my hunting trips in the Berkshire Hills of Massachusetts, was old Frank. He is just dead, aged 12 years. In behalf of his admirers I want to pay a word of tribute to his memory. Dear old Frank; he was a perfect pointer of his class—under rather than over the heavy weight, correct in form and style. I've seen his chocolate-ticked sides gleaming in fen and on rocky hillside, in splashing autumn shower and on the sunny edges of the alder cover, his bearing always giving one the feeling, that no matter how far off he had ranged, his business there was the business of hunting, and that he was entitled to one's fullest confidence in the results. On many a day he made success of impending failure, and pointed birds where mere men said they could not be found. Dear old fellow! the best house companion in the world, the watchdog who never barked at a friend nor failed to be first at the gate to meet a tramp, a contented foot-warmer in the bottom of the buggy or wagonet, an appreciative and patient listener at the day's recounting by the evening fire. The best retriever any of us ever saw, he never bit a live bird nor pinched a dead one. He would bring in a duck from its icy deathbed far out in the lake, or a broken-winged plover from its hiding place in the cart rut, a grouse from the rocky hillside, a woodcock from its falling place on the massed blossoms of the golden rod, or a snipe from a lily-pad—all with equal certainty, and with a dignified nonchalance that was simply royal.

How well I remember my last hunt with him. We were out with my pointer puppy, who was taking his first lesson with old Frank. The latter's young master, my cousin Cliff, had shot at a grouse far down on the edge of the cover, and the bird had flown on so far that we thought it lost. After beating about through a wide spread of young alders and birches for nearly half an hour, old Frank came to a point. His master started in to flush the bird for me. I asked him to let me flush it, and at the same time see if the puppy would back up Frank. I worked along and around somewhat to flush the bird toward my cousin, with my slim and eager little dog at heel. The bird did not rise. The puppy came to a stop on a staunch point toward the side of old Frank, who had stood with his nose in the air for several minutes. Down by old Frank's side lay the grouse, dead, and almost cold. The dog had not seen the bird, yet, great old hunter that he was, nearly sightless, his hearing almost gone and his step feeble, he still had his peerless power of smell, and had caught the scent of the bird as it was wafted across his path. I put my hand on my dog's head, with the command, "To ho!" Cousin Cliff called out, "Dead bird! Fetch him in, old fellow!" and old Frank turned, took up the grouse and carried it to his master's hand. I quite agree with the tearful and mournful words of one of Frank's masters, that "we shall never hunt over another dog like old Frank." J. D. P.

HARTFORD, Conn.

NEW ENGLAND VS. SOUTHERN FOX HUNTING.

Editor Forest and Stream:

Having been a devoted fox hunter, both in Virginia and New England, for the last twenty years, I beg leave to give the result of my observations upon the two methods of hunting the fox, which have given rise to so much controversy.

Virginia was my home during boyhood and early manhood, and as soon as I could sit a horse, a passion for fox hunting took possession of me, and still holds with old time force. Of course, I hunted, or rather chased, foxes then as my neighbors did, with a large pack of hounds, and they were considered as good as any in those parts; but in point of fact, two or three crack dogs did all the work and were generally called lead hounds, while the remainder simply packed to them.

The foxes hunted were gray or red, which were equally abundant. The grays, as a rule, were killed in from four to six hours, while the reds were good for an all day chase, only about one in six being killed by the hounds. This chasing was done in good weather, *i.e.*, either on heavy frosts, damp ground, or light snows.

In 1875 I came to New Hampshire, and some time afterward was invited to go fox hunting in the New England manner. An educated prejudice against shooting foxes at first caused me to hesitate, but I finally concluded to go and judge from experience. The first day's hunt convinced me that the only practicable method of hunting the fox in New England was exactly as the natives did it. I have traveled much in many parts of the world, and experience has shown me that natives of any country or climate generally find out the best method of doing things in their own locality.

The physical aspect of the New England States is quite sufficient to explain the great difficulty encountered in running foxes. The country is rugged, with much barren land, and broken by ledges and swamps in all parts. The native foxes are all red, much larger than the Southern congener, and possessed of more speed and bottom than any Southern fox it has been my experience to chase. When started, they run most of the time in thick alder swamps and undergrowth, or play on the dry ledges; and in winter stick to all the ice they can find, so it is a hard task to keep them going.

The hounds of New England have been greatly improved by the many bench shows, and are therefore finer bred dogs than those of the South, and have far better field qualities. Many are crosses between English and native hounds, or English and Byrons, and are unquestionably the best all round dogs I have ever seen.

I now own hounds of both of the above strains, which are as fast, true and indefatigable runners as any in the country. They will wind a fox as far, start him as quickly, and drive him as long as any dogs I have ever seen run, a sixteen hour chase being no uncommon one, yet they can't kill one out of fifty driven, without the aid of a gun.

I state boldly, and every fox hunter in New England will support me, that no pack of hounds either in England or America, given the same chances, can kill any more foxes than ours do. To test the question more fully, I had five gray foxes shipped to me from Virginia, and turned them loose in our woods. They were frequently started by my dogs, and driven hard and close all day, and by all day I mean from seven in the morning till past dark, and yet not one gray has been killed. The climate has greatly increased the endurance of the gray fox, and the hard country to run over still further aids him, so that he can keep ahead of the best hounds.

If a fox were never shot here, the dogs would rarely have a shake, and every fox hunter knows what a benefit it is to the dogs to have an occasional taste of reynard's fur.

"Tallyho" and others lament that the fox in New England has no chance because he is waylaid from behind trees and stone walls. They simply waste their sympathy, as reynard is quite able to take care of himself, for the most experienced hunter, with the truest of dogs, will not average one fox shot out of six driven, and will then have had to tramp three score miles. The man who hunts foxes during a New England winter, must be a thorough hunter, with grit to tramp miles through snow and swamps, and face the bitterest cold.

In conclusion let me state that I enjoy a brisk gallop across country after a fleet pack of hounds as much as any man, for it is royal sport; but New England fox hunting is also an exhilarating pastime, and is sport in the truest sense, for it demands the best qualities of an inherent sportsman. PISCATAQUA.

PORTSMOUTH, N. H.

Editor Forest and Stream:

I am learning something about fox hunting. "Bulger" says in FOREST AND STREAM of Feb. 21, "if foxes become over plentiful, by running them a few weeks they will emigrate. Well, that is too thin, at least for our Vermont foxes. Within a circle of three miles from my place are owned ten as good hounds as ever broke up a school meeting. They are at large the year through and I don't think they ever caused many foxes to emigrate unless helped by a little cold lead. One fox in particular we have run more or less for the last five years, and his track is so well known by our fox hunters we have named him St. John, and I will warrant he has been run at least three days in a week for the last five weeks and he has not emigrated yet either, and "Tallyho" can't ride to the hounds over his trail, he can bet.

We have twenty-six pelts down to our crowd's credit last fall and winter, and if we have a good sale are thinking about buying a broncho for the crowd—four of us—to learn to ride, as it will be so much easier to ride up a mountain ledge than to pull one's self up by his fingers. G. F. R.

BARTON, Vt.

DOG TALK.

WE have received a letter from Dr. Q. Van Hummel, of Kansas City, Mo., in which he takes exception to the statement of Mr. Allison in our issue of March 28, that he told Mr. Huntington that jack rabbits could be procured at fifty cents apiece. The Doctor writes that the price stated was $3 apiece if taken in February, and adds as inclosed coursing meetings the world over are simply money-making affairs, he will agree, whenever he can see any money for himself, to furnish all the jacks wanted. Open meets the Doctor further says will, in the future as in the past, receive his hearty support without money consideration.

Mr. T. C. Bate, of Ottawa, Can., has just received from England the well-known Clumber spaniel champion Boss III., winner of 18 first, 8 special, 4 champion prizes and the challenge prize at Barn Elms last July. He was whelped May 28, 1883, and is by Damper (Bob II.—Flush) and out of Trinket (Trump II.—Lotus). We understand that it is the intention of Mr. Bate to exhibit the dog at the principal shows in Canada and the States.

The Contoocook Kennel, Peterborough, N. H., have recently imported from the kennel of Mr. H. I. Betterton, Burton-on Trent, England, the smooth-coated St. Bernard bitch Regina (champion Sirius—Hilda Josepha). Regina we believe has not been shown, but as she is the dam of winners she should prove a valuable acquisition to her owner.

We are pleased to learn from the Erminie Kennels, Mt. Vernon, N. Y., that their rough-coated St. Bernard dog Lysander has fully recovered from his recent illness, and is now in good condition, weighing 186lbs.

We learn that the celebrated English setter dog champion Monk of Furness will soon leave England, his destination being Forest Lake, Minn.

There is some talk of an inclosed coursing meeting in Chicago some time in September if plenty of jack rabbits can be secured.

Mr. J. Otis Fellows will judge all classes at the Ottawa dog show in September. Mr. Alfred Geddes has been appointed superintendent.

THE ENGLISH POINTER CLUB TRIALS.

THE second annual field trials of the English Pointer Club were run near Wrexham, May 7 and 8. There were 16 starters in the Puppy and 23 in the All-Aged stakes. The winning puppies were:

First, Pax of Upton (C. H. Beck), liver and white dog (Perdix—Nancy of Upton).

Second, Toil (T. Statter), lemon and white bitch (Naso of Upton—Titia).

Third, Quail of Upton (C. H. Beck), liver and white bitch (Earl of Croxteth—Bromfield Dolly).

Fourth, Eclat (E. C. Norrish), liver and white bitch (Teign—Dagmar).

ALL-AGED STAKE.

First, Belle des Bordes (P. Caillard), liver and white bitch (Young Bang—Polly).

Second, Crab (A. P. Heywood-Lonsdale), liver and white dog (Plum—Myrtle).

Third, Quits' Baby (C. H. Beck), lemon and white bitch (Prior—Quits II.).

Fourth, Miss Sixpence (R. J. Lloyd-Price), liver and white bitch (Lucky Sixpence—Golden Slipper).

EASTERN FIELD TRIALS DERBY.

TWO additional entries for the Eastern Field Trials Club Derby have been received from England:

TRIP OF KIPPEN (F. C. Lowe, London, England, and F. R. Hitchcock, New York), liver and white English setter dog, Jan. 17, 1888 (Tutsham Trip—Dido).

GEM OF KIPPEN (F. R. Hitchcock, New York), lemon and white pointer bitch, Feb. 20, 1888 (Kent Cob—Magpie).

INBREEDING.—Hulton, Pa., May 17.—*Editor Forest and Stream:* A single swallow does not make a summer, but all the same it indicates it is near. Here is a case of inbreeding for you which amounts to at least one swallow. The bobtail sheepdog Fred was by Maverick out of Daisy, litter brother and sister by Bob out of Dame Judith. Neither were natural bobs, Fred is, and no matter what kind of a bitch is bred to him, bobtail, collie or cur, the pups are bobtailed. Now Fred was bred to his double granddam, Dame Judith, and all the pups were bobtailed, and are by all odds the strongest, largest and most active pups she ever had, free from the slightest taint of weakness of any kind whatever. The only evidence of inbreeding is the preponderance of white in them, over half of them being nearly solid in that color, a very rare one in bobtails. The experiment will be tried further, by breeding a bitch of this litter to her sire.—W. WADE.

THE COLLIE CLUB.—Rahway, N. J., May 17.—Members of the Collie Club are hereby notified that at the meeting of the executive committee, held May 16, it was decided that the fall section of the Produce, Futurity and Sweepstakes should be competed for at the bench show of the Long Island Live Stock and Fair Association, at Huntington, L. I., in September next. And in consequence of the intended absence of the secretary of the club till Aug. 1, all entries and nominations either for these stakes or for those of 1890 will be accepted if made between the 1st and 10th of August. Ample notice will be furnished through the sporting papers as to the Huntington bench show.—J. D. SHOTWELL, Secretary.

WHY DOGS TURN AROUND.—*Editor Forest and Stream:* In my journeyings hither and thither I am unable to obtain FOREST AND STREAM regularly, although strenuous efforts are made to do so, hence I have not read all the discussion as to the cause of a dog's turning around before lying down, referred to by "B. L. L." in the issue of April 18. The deductions of "B. L. L." will not "hold water;" at least they do not agree with my conclusions, which are the result of observations made from a natural standpoint. Take the dog, the wolf, the hyena, or any of the species in the wild state, and before lying down they will turn 'round and 'round, scraping together grass, leaves, etc., for a bed. After generations of domestication this natural habit asserts itself, and no matter how cozy and warm the room may be, nor how soft the carpet or downy the couch, previous to lying down the dog will invariably turn 'round and 'round exactly as he does in his wild state. Throw a Turkish rug before a blazing fire, and your dog will not only turn around, but will endeavor to scrape the rough surface of the fabric into a heap as his wild cousin scrapes up the leaves and grass before lying down.—PACIFIC.

A LARGE LITTER.—Philadelphia, Pa., May 16.—*Editor Forest and Stream:* The bull-terrier bitch White Violet whelped on April 29 eleven, seven dogs and four bitches. How is this for a litter of bull-terriers? She is doing well and raising them all comfortably without any foster mother. They are by Napoleon, a full brother to the grand bitch Duchess of York. Have you heard of any such bull-terrier litters before? The breeders of this city think it is great.—FRED P. KIRBY.

LORD NEVERSETTLE.—*Editor Forest and Stream:* I see it mentioned in your paper of May 9 that it was reported my greyhound Lord Neversettle had broken his leg in running a jack rabbit. He met with an accident in running a jack rabbit, by putting his leg into a prairie dog hole, and fractured his shoulder bone, but with the skillful assistance of Mr. F. Cook, veterinary surgeon, of Hutchinson, the dog is nearly sound again, and doing well.—H. C. LOWE.

KENNEL NOTES.

Notes must be sent on prepared blanks, which are furnished free on receipt of stamped and addressed envelope of large letter size. Sets of 200 of any one form, bound for retaining duplicates, are sent for 30 cents.

NAMES CLAIMED.

☞ **Notes must be sent on the Prepared Blanks.**

Lou Pape. By Rural Kennels, Wakefield, Mass., for black pointer bitch, whelped March 10, 1889, by Broncho, Jr. (Harrop's Phil—Harrop's Dinah) out of Rie (Joe Pape—Nellie Pape).

Rosa's Joy. By Anthracite Kennels, Mahanoy City, Pa., for black, white and tan English setter bitch, age not given, by Gath's Joy out of Old Dominion's Rosa.

Lady Don. By Anthracite Kennels, Mahanoy City, Pa., for black and white English setter bitch, whelped March 17, 1889, by Dr. Thompson's Donald out of Fredora.

Tasso B. By Brown's Cocker Kennels, Waterbury, Vt., for solid black cocker spaniel bitch, whelped Feb. 24, 1889, by Black Harry (Black Pete—Althea) out of Jet Obo (Obo II.—Critic).

Rex Obo. By H. F. Pearce, Philadelphia, Pa., for black cocker spaniel dog, whelped Dec. 19, 1888, by Dick McBride out of imported Nellie.

Topsy. By H. F. Pearce, Philadelphia, Pa., for black cocker spaniel bitch, whelped June 11, 1888, by Harry Obo (Obo, Jr.—Phonsie) out of Blackie (Kiddlewink—Rita).

BRED.

☞ **Notes must be sent on the Prepared Blanks.**

Daisy Queen—Scotilla. Martin Dennis's (Newark, N. J.) collie bitch Daisy Queen (Brack—Dora) to Chestnut Hill Kennels' champion Scotilla (champion Dublin Scot—champion Flurry II.), May 4.

Ethel—Dublin Scot. J. Van Schaick's (New York) collie bitch Ethel (Trevor—Hasty) to Chestnut Hill Kennels' champion Dublin Scot (The Colonel—Jessie), March 31.

Flurry III.—Dublin Scot. Chestnut Hill Kennels' (Philadelphia, Pa.) collie bitch Flurry III. (Blue Sky—Flurry II.) to their Dublin Scot (The Colonel—Jessie), April 9.

Verona—Bang. Bryn Mawr Kennels' (Philadelphia, Pa.) pointer bitch Verona (Day's Prince—Vandalia) to their Bang (champion Bang—Salter's Luna), April 7.

Vanity—Duke of Vernon. Dayton Kennel Club's (Dayton, O.) pointer bitch Vanity (Bang—Pride) to L. Gardner's Duke of Vernon (Glendale—Spotless), April 24.

Saddle Bags—Royal Monarch. Nahmke Kennels' (East Patchogue, L. I.) English setter bitch Saddle Bags (Foreman—Belle of Allendale), to Capt. C. C. Gray's Royal Monarch (Dashing Monarch—Lass), April 5.

Calico—Count Howard. Nahmke Kennels' (East Patchogue, L. I.) English setter bitch Calico (Foreman—Belle of Allendale) to F. Windholz's Count Howard (Sir Alister—Mona), May 2.

Woodstock Dinah—Jumbo. Nahmke Kennels' (East Patchogue, L. I.) cocker spaniel bitch Woodstock Norah (Obo II.—Dinah) to their Jumbo (Hornell Dandy—Hornell Dinah), May 12.

Phyllis—Black Pete. Brown's Cocker Kennels' (Waterbury, Vt.) cocker spaniel bitch Phyllis (Obo II.—Darkie) to J. P. Willey's Black Pete (Obo, Jr.—Phonsie), March 11.

Lady Madge—Lad. Brown's Cocker Kennels' (Waterbury, Vt.) cocker spaniel bitch Lady Madge (Black Pete—Phyllis) to J. P. Willey's Lad, March 9.

Bessie C.—Black Pete. Brown's Cocker Kennels' (Waterbury, Vt.) cocker spaniel bitch Bessie C. (Obo II.—Darkie) to J. P. Willey's Black Pete (Obo, Jr.—Phonsie), March 8.

——*—Hillside Flash.* Louisa Biddle's (Philadelphia, Pa.) fox-terrier bitch —— (General Grant—Freshness) to Chestnut Hill Kennels' Hillside Flash (Reckoner—Richmond Dazzle), March 26.

Roslyn Norah—Breda Jim. Chestnut Hill Kennels' (Philadelphia, Pa.) Irish terrier bitch Roslyn Norah (Roslyn Dennis—Roslyn Eileen) to their Breda Jim (Breda Ben—Graceful), April 22.

Trixie—Bradford Harry. R. J. McLaughlin's (Cleveland, O.) Yorkshire terrier bitch Trixie (Tiny—Flossie) to P. H. Coombs's Bradford Harry (Crawshaw's Bruce—Beale's Lady), April 19.

WHELPS.

☞ **Notes must be sent on the Prepared Blanks.**

Juno. F. McKie Thayer's (Colorado Springs, Col.) beagle bitch Juno (Gen. Rowett's Lee—Dorsey's Flight), May 10, five (three dogs), by his foxhound Adam.

Flurry II. Chestnut Hill Kennels' (Philadelphia, Pa.) collie bitch Flurry II. (champion Eclipse—Flurry), April 19, six (three dogs), by their Dublin Scot (The Colonel—Jessie).

Pitch Dark. Chestnut Hill Kennels' (Philadelphia, Pa.) collie bitch Pitch Dark (champion Eclipse—Matchless), March 30, nine (three dogs), by their Strephon (champion Eclipse—Flurry).

Spoiled Miss. Chestnut Hill Kennels' (Philadelphia, Pa.) collie bitch Spoiled Miss (Charlatan—Ada), April 15, four (one dog), by their Dublin Scot (The Colonel—Jessie).

Metchley Surprise. Chestnut Hill Kennels' (Philadelphia, Pa.) collie bitch Metchley Surprise (Sefton—Lady Rutland), April 9, three (two dogs), by their champion Scotilla (champion Dublin Scot—Flurry II.).

Vandalia. Bryn Mawr Kennels' (Philadelphia, Pa.) pointer bitch Vandalia (Bang Bang—Zanetta), April 15, five (one dog), by their Bang (champion Bang—Salter's Luna).

Golden Rod. Bryn Mawr Kennels' (Philadelphia, Pa.) pointer bitch Golden Rod (champion Beaufort—Zuba), April 15, eight (three dogs), by Chas. Heath's champion Graphic (Bonnie Sancho—Fursdon Juno); one bitch since dead.

Royal Cute. L. Gardner's (Mt. Vernon, N. Y.) pointer bitch Royal Cute (Duke Royal—Gala Day), May 2, twelve (six dogs), by his Duke of Vernon (Glendale—Spotless).

Lillian. Nahmke Kennels' (East Patchogue, L. I.) St. Bernard bitch Lillian (Leo—Fan), April 25, ten (five dogs), by their Barry (Monarque—Juliet).

Chintz. Nahmke Kennels' (East Patchogue, L. I.) English setter bitch Chintz (Foreman—Belle of Allendale), March 31, nine (five dogs), by L. Gardner's Roger (Count Noble—Queen Meg).

Belle of Piedmont. E. Dexter's (Charlottesville, Va.) English setter bitch Belle of Piedmont (Dashing Rover—Rance), May 9, seven (three dogs), by Memphis & Avent's Roderigo (Count Noble—Twin Maud).

Stray Shot. Nahmke Kennels' (East Patchogue, L. I.) English setter bitch Stray Shot (Gogo—Calico), May 10, seven (three dogs), by T. M. Aldrich's Gene (Druid—Ruby).

Belle of Allendale. Nahmke Kennels' (East Patchogue, L. I.) English setter bitch Belle of Allendale (Lava Rock—Liddesdale), Feb. 25, eight (four dogs), by T. M. Aldrich's Gene (Druid—Ruby).

Daisy Foreman. Geo. W. Neal's (Westville, Conn.) English setter bitch Daisy Foreman (champion Foreman—Jolly Nell), May 14, seven (five dogs), by J. E. Hair's Warwick Albert (champion Royal Albert—Maida).

Mieke. Chestnut Hill Kennels' (Philadelphia, Pa.) Schipperke bitch Mieke, May 10, three (two dogs), by Geo. Krehl's Drieske.

Phyllis. Brown's Cocker Kennels' (Waterbury, Vt.) cocker spaniel bitch Phyllis (Obo II.—Darkie), May 12, six (four dogs), by J. P. Willey's Black Pete (Obo, Jr.—Phonsie).

Bessie C. Brown's Cocker Kennels' (Waterbury, Vt.) cocker spaniel bitch Bessie C. (Obo II.—Darkie), May 11, nine (eight dogs), by J. P. Willey's Black Pete (Obo, Jr.—Phonsie).

Roslyn Eileen. Chestnut Hill Kennels' (Philadelphia, Pa.) Irish terrier bitch Roslyn Eileen (Gilford—Girl), April 3, seven (three dogs), by their Breda Jim (Breda Ben—Graceful).

Whisper. M. H. Daley's (Bangor, Me.) Yorkshire terrier bitch Whisper (Bradford Harry—Belva), May 14, two (one dog), by P. H. Coombs's Bradford Harry (Crawshaw's Bruce—Beale's Lady).

SALES.

☞ **Notes must be sent on the Prepared Blanks.**

Cotton Tail Jack. Black, white and tan beagle dog, whelped March 3, 1889, by Little Duke, Jr. out of Rural Dot, by Rural Kennels, Wakefield, Mass., to C. E. Whelden, Hinsdale, N. H.

Roslyn Belle. Sable and white collie bitch, whelped July 12, 1888, by Bonnie Dunkeld out of Bonnie Knowe, by Chestnut Hill Kennels, Philadelphia, Pa., to A. Folmer, Shenandoah, Pa.

Bonnie Dunkeld—Bonnie Knowe whelp. Sable and white collie bitch, whelped July 12, 1888, by Chestnut Hill Kennels, Philadelphia, Pa., to J. A. Haskell, Walston, Pa.

Caractacus—Jenny Lind whelps. Collies, whelped Nov. 2, 1888, by Chestnut Hill Kennels, Philadelphia, Pa., a black and tan dog to Dr. J. P. Gray, Rochester, N. Y.; a black and tan bitch to E. Furey, New York, and two sable and white bitches to F. Tallmadge, Columbus, O.

Scotilla—Cora II. whelps. Collies, whelped Nov. 19, 1888, by Chestnut Hill Kennels, Philadelphia, Pa., a sable dog to C. Henry, same place; a black and tan bitch to W. H. Webster, Milwaukee, Wis., and a black, tan and white dog to B. H. Grundy, Richmond, Va.

Leonard Drumlin Moss whelp. Sable collie bitch, whelped Oct. 30, 1888, by Chestnut Hill Kennels, Philadelphia, Pa., to Dr. J. P. Gray, Rochester, N. Y.

Jakyr Dean. Sable and white collie bitch, whelped March, 1888, by Bendigo out of Effie Dean, by Dr. J. P. Gray, Rochester, N. Y., to Chestnut Hill Kennels, Philadelphia, Pa.

Wellesbourne Flurry. Sable and white collie bitch, whelped April 25, 1888, by The Squire out of Active, by J. & W. H. Charles, Warwick, Eng., to Chestnut Hill Kennels, Philadelphia, Pa.

Maney Trefoil. Sable and white collie dog, whelped July 25, 1887, by The Squire out of Scotch Pearl, by J. & W. H. Charles, Warwick, Eng., to Chestnut Hill Kennels, Philadelphia, Pa.

Drumlin Moss. Sable collie bitch, whelped October, 1886, by Kintore out of Duchess, by Chestnut Hill Kennels, Philadelphia, Pa., to Dr. J. P. Gray, Rochester, N. Y.

Gem. Sable and white collie bitch, whelped July, 1884, by Brack out of Fairy, by Chestnut Hill Kennels, Philadelphia, Pa., to Dr. J. P. Gray, Rochester, N. Y.

Jenny Lind. Sable and white collie bitch, whelped October, 1883, by Rutland out of Blinkbonny, by Chestnut Hill Kennels, Philadelphia, Pa., to Dr. J. P. Gray, Rochester, N. Y.

Roslyn Brudn. Sable collie dog, whelped January, 1888, by Dublin Scot out of Di Vernon, by Chestnut Hill Kennels, Philadelphia, Pa., to J. W. Leevy, San Francisco, Cal.

King Bruce—Piper's Girl whelp. Collie bitch, whelped Feb. 1, 1887, by Associated Fanciers, Philadelphia, Pa., to C. W. Stoddard, West Point, Ia.

King Bruce—Norah whelp. Collie dog, whelped Jan. 3, 1886, by Associated Fanciers, Philadelphia, Pa., to H. J. Heitbrink, Logan port, Ind.

Donald—Miss Hero whelps. Fawn mastiff dogs, whelped Jan. 13, 1889, by Associated Fanciers, Philadelphia, Pa., one each to Mrs. J. C. Smith, Grand Rapids, Mich., and A. L. Pfau, North Baltimore, O.

Lou Pape. Black pointer bitch, whelped March 10, 1889, by Broncho, Jr., out of Rie, by McBeth Kennels, Massillon, O., to Rural Kennels, Wakefield, Mass.

Beaufort—Jessie whelps. Liver and white pointer dog and bitch, whelped July 7, 1888, by Chestnut Hill Kennels, Philadelphia, Pa., to Estroff Bros., same place.

Rural Obo. Black cocker spaniel dog, whelped Feb. 16, 1888, by Pete Obo out of Floss B., by Rural Kennels, Wakefield, Mass., to Bradford Norman, Newport, R. I.

Dick Obo. Black and white cocker spaniel dog, whelped Feb. 16, 1889, by Pete Obo out of Floss B., by Rural Kennels, Wakefield, Mass., to H. L. Richardson, Lynnfield, Mass.

Lou Obo. Black cocker spaniel bitch, whelped Feb. 16, 1889, by Pete Obo out of Floss B., by Rural Kennels, Wakefield, Mass., to C. E. Wheldon, Hinsdale, N. H.

Rex Obo. Black cocker spaniel dog, whelped Dec. 19, 1888, by Dick McBride out of Nellie, by Quaker City Kennels, Philadelphia, Pa., to H. F. Pearce, same place.

Topsy. Black cocker spaniel bitch, whelped June 11, 1888, by Harry Obo out of Blackie, by A. W. Pancoast, Jackson, Mich., to H. F. Pearce, Philadelphia, Pa.

Racket—Jess whelp. Cocker spaniel dog, whelped Jan. 18, 1889, by Associated Fanciers, Philadelphia, Pa., to W. W. Berry, Denmark, Pa.

Lady Madge. Black cocker spaniel bitch, whelped June 25, 1887, by champion Black Pete out of Phyllis, by Brown's Cocker Kennels, Waterbury, Vt., to D. Darling, Rochester, Minn.

Bessie C. Black cocker spaniel bitch, whelped Oct. 7, 1884, by Obo II. out of Darkie, by P. Cullen, Salmon Falls, N. H., to Brown's Cocker Kennels, Waterbury, Vt.

Black Harry—Jet Obo whelps. Two black cocker spaniel dogs, whelped Feb. 24, 1889, by Brown's Cocker Kennels, Waterbury, Vt., to Geo. H. Carr, Hartford, Conn.

Othello and Mieke. Schipperke dog and bitch, age not given, by Geo. Krehl, Loudon, Eng., to Chestnut Hill Kennels, Philadelphia, Pa.

Nell Bright. White bull-terrier bitch, whelped May, 1887, by Bendigo out of Daisy, by F. F. Dole, New Haven, Conn., to M. C. Trestrail, Philadelphia, Pa.

Miss Bendigo. White bull-terrier bitch, whelped May 24, 1888, by Bendigo out of White Rose, by F. F. Dole, New Haven, Conn., to Geo. E. Potts, Wolston, Pa.

Buster. White bull-terrier dog, whelped March 15, 1889, by Rusher out of Bertha, by F. F. Dole, New Haven, Conn., to W. N. Fogg, Nashville, Tenn.

Grip. White bull-terrier dog, whelped March 15, 1889, by Rusher out of Bertha, by F. F. Dole, New Haven, Conn., to J. M. Dill, Richmond, Va.

Hillside Flash. White and black fox-terrier dog, age not given, by Reckoner out of Richmond Dazzle, by J. E. Thayer, Lancaster, Mass., to Chestnut Hill Kennels, Philadelphia, Pa.

Roslyn Dennis—Biddy whelp. Red Irish terrier dog, whelped June 24, 1888, by Chestnut Hill Kennels, Philadelphia, to Mr. Schroeder, Chicago, Ill.

Paddy—Shelah whelp. Red Irish terrier bitch, whelped July 17, 1888, by Chestnut Hill Kennels, Philadelphia, Pa., to H. W. Karr, Rasinville, Va.

DEATHS.

Collie II. Black, tan and white collie dog, whelped Dec. 19, 1883 (A.K.R. 4620), owned by Armstead M. Webb, Baltimore, Md., May 20, from urethral calculi.

Smut. Black native setter bitch, whelped Feb. 25, 1876 (Copeland's Pete—Queen Bess), May 10, owned by Newton Earle, Providence, R. I.

Jip. White, black and tan beagle dog, whelped July 25, 1882 (Ringwood—Roxy), owned by Mrs. Bradford S. Turpin, West Yarmouth, Mass.

KENNEL MANAGEMENT.

☞ **No Notice Taken of Anonymous Correspondents.**

F. A. P., Bath, Me.—I have a mastiff pup (one year old) that has what I suppose is distemper. Can you tell me what to do for him? He feels good all the time, but has a cough, and yellow matter passes from his nose and eyes; he coughs so at some times it seems as if he would strangle. Ans. Keep bowels easy by giving two or three compound cathartic pills at a dose hidden in a bit of meat; give 5-grain quinine pill night and morning.

J. D. G., Pittston, Pa.—My dog has warts all over his mouth; they look like seed warts. If you think they would have to be burned out I would like to know what to use? Ans. They can be burned off by means of lunar caustic (silver nitrate) or nitric acid applied by means of a pine stick or match. Apply twice daily. If acid is used, limit its action by rubbing a bit of soap over the spot after applying. The dog must be firmly held.

Rifle and Trap Shooting.

RANGE AND GALLERY.

PARTELLO'S ADVICE TO SHOOTERS.

LIEUT. J. M. T. PARTELLO, who will be remembered as one of the most brilliant young shots brought to the front at the time that Creedmoor was doing so much in stirring up enthusiasm in rifle shooting, has written from his station at Fort Davis, Texas, a most interesting letter on the importance of good marksmanship in a soldier, and while talking of the way of teaching marksmanship in the army gives a great deal of good advice to shooters in general. The Cleveland *Leader*, always well informed and alert on matters of interest to Ohio marksmen, gives his letter in full, and from the columns of our Cleveland contemporary we quote of Lieut. Partello's letter:

Shooting to hit is the objective point of military art. All other drills and studies are for the purpose of placing the soldier in a position to do this effectively. The preliminary to target firing he must know how to aim, and he cannot aim correctly unless he can see straight. The most common defect in the recruit is inability to see straight, bad aiming, bad holding of the piece, constrained position of the body, canting the piece—that is, inclining the rear sight to the right or left—and fear of recoil. All these defects mastered, the recruit is bound to be a good shot in spite of himself, and possibly a fine marksman. Color blindness is another important drawback, and one much more common in the average mortal than most people imagine. Practicing at vision tests soon overcomes any tendency to crooked sighting; holding the piece properly and with ease cancels bad aiming, unsteadiness of body, constrained position, etc., and a proper grip hold as well as butt position against the shoulder will render the heaviest recoil of no moment.

There is a system of preliminary drills adopted in the United States army which it would be well for the militia of the several States to pattern after.

We get raw, green, verdant material, genuine numbskulls, who really do not know which is the dangerous end of a gun, and out of this stuff it is a fact that fine, accurate marksmen are developed, and even the highest grade of all, sharpshooters.

The difference between our regular army and the State militia is that the former makes all duty, work and labor, subserve the end of target practice. With the regulars, the most important of all drills and exercises is to perfect the soldier into a shooting machine, while on the other hand the time of the militia is occupied in fancy drills, parades, reviews, and other show work. The United States has to-day an army of marksmen. The officers thoroughly understand their business, and the soldiers take pride in becoming fine shots.

The service rifle is a good gun, provided with excellent, durable sights, and the mechanism is so simple and easily understood that it is equal in every respect and superior in some to the best repeating rifle yet invented. Our government is right in not adopting a magazine gun until it finds one that is better than the Springfield service now in use. This arm has a notch near the muzzle on the bayonet stub that answers for a front sight, and a buck horn or V-shaped crotch near the breach for a rear sight. The latter is mounted on a movable leaf that can be used in three positions at once. Lying flat along the barrel the piece is then ready for the blank range or any distance within 200yds. Raise the leaf quickly and, according to the position of the buck horn, which combines a peep sight and an open sight, two other distances are at command. Now look through the notch at the extreme top and the rifle is ready for long range work. This leaf has a movable screw by which the sight can be set either to the right or to the left, to overcome drift in the twist of the barrel and cross winds, and also a slide to raise or lower the elevation.

Allowing that all minor difficulties have been mastered, and that the recruit sees straight, holds correctly, has a good position, does not cant the piece, and does not fear the recoil, why is it then that when he fires—each shoot with the same elevation and under the same conditions—his bullets scatter and a bad score is made?

The answer is very simple, and next to pulling off, the defect is the most common of all, and the most easily remedied. Once stood beside a militiaman who was shooting at 500yds., conditions perfect, ammunition without fault, his nerves steady and his piece carefully handled, and yet in spite of all he could do his bullets would fly first up, then down, and not infrequently from the target altogether. He could not understand the cause, and was much provoked at himself; yet the reason was plainly apparent to me, and a few words of caution served to overcome the difficulty and enabled him to finish his score with fair results. The whole fault lay in drawing an imperfect bead each time.

The front sight may be so arranged to the eye that it falls into the buckhorn at the rear, either as a large, medium or small bead, and it is this little drawback that causes nine-tenths of the misses at long range. If, for instance, a marksman is shooting at 600yds., and the gun is so sighted (all other conditions being favorable) that the medium bead will place the lead on the bullseye; if he should now by accident or otherwise substitute a coarser or finer bead, the chances are that the bullet would fly clean over the target or fall short of the same. It is this fault that causes such irregular grouping by amateur marksmen. Which one of all who try is absolutely sure that he draws twice in succession the same size of bead? Very few, if any, can truthfully assert they are perfect in this respect. Then it is not the gun which does such poor shooting, but rather the man behind the gun. A little careful practice will overcome defective holding, fear of recoil and canting; but it requires long, faithful, steady and watchful work, the utmost care and attention to aim truly and successively the same way.

My own company attained a percentage last year at fixed distances of more than 90 per cent. This excellent showing was mainly due from a system of preliminary practice faithfully followed indoors during the cold months, so that when the time came for open-range work the men were ready to begin scoring at once, without the usual waste of ammunition. This is the scheme, and it would do the militia a vast amount of good, besides saving them a lot of ammunition money, if they first adopt this course for the preliminary training of their raw material before commencing range shooting out of doors. A sheet of white blotting paper, say 2 or 2½ft. square, is placed against a wall, and 30 or 40ft. distant a musket is steadied on a sandbag rest or in a tripod, so that it can be arranged in a sighting position to suit the observer.

A man stands near the blotter, holding in his hand a thin stick about 12in. long, on the end of which is a diminutive circular bullseye, black, with a hole punctured in the center large enough to admit the point of a pencil. Now the recruit takes his position, and without touching the rifle sights it on the blotter and calls to the man pointing to place the little bullseye where he says, at the same time directing him to move the pointer up, down, right or left, until it comes perfectly within the line of sight, as the gun is pointed. When the bullseye is exactly in range (precisely as he would have it were he sighting at a *bona fide* target 200, 300, 600 or 1,000yds. distant) he calls stop, and the scorer inserts the pencil through the inch bullseye and makes a dot. This is the first step. The recruit steps away, and the rifle, which is supposed to be immovable, remains still pointed on the same spot. The observer rests his eye for a minute, comes back and goes through the same tactics twice more—three in all—the scorer each time making a tiny mark as the former calls out stop. When the trials are over the triad of dots is connected by lines, and the marksman steps down to the blotter to see where his hits are. It is truly astonishing to see how wide of the mark some of them do go, not excepting experienced marksmen, and even sharpshooters. Considering the first dot to be a hit, were the others sighted at a target or a deer they would have been clear misses. The fault was in not taking the same bead three times in succession.

The importance of this apparent trifling point cannot be overestimated. Large scores are not composed of scattered bullseyes, but of consecutive bullseyes in which each succeeding shot reaches nearly the same spot struck by the others, and to get a succession of shots that are regular and not scattering, it is necessary to sight successively in precisely the same manner. Any variation will scatter and nine-tenths of the trouble lies in not drawing always the same size of bead. Had the recruit in the case of the blotter confined himself either to the small, medium or large bead, the chances are that the pencil would have scored three times on the same dot. Let those who want to improve their rifle shooting try the above scheme and they will be astonished at the benefit gained. It will give evenness of sighting before very long and probably explain, too, some of the unaccountable misses at former trials. The caliber and rifling of a gun nowadays have a great deal to do with the efficiency of the piece. Heretofore the inclination has been toward large bores. Some foreign governments still cling to 50cal. and in one case I think 56 is the standard adopted by a power. So it is with our militia. Some are now using 50cal., old pattern rifles, and fondly imagine they can do good work with these miniature out-of-date cannons. Why, the recoil of such a piece is sufficient to frighten any beginner, and the execution is virtually nil, compared to smaller bores. Forty-five is the standard of our government, and 40 would be far better. A happy medium, say 42cal., would fill the bill completely as to a general service rifle for both short and long range.

Trajectory has a great deal to do with the efficiency of a rifle. Not every one understands the full significance and importance of this adjunct, and as it is an element which enters largely into the possibility of fine shooting, I will give a few explanations for the benefit of those who do not understand trajectories.

The trajectory is the path of the bullet through the air. A bullet fired from a rifle is acted upon by five different forces. First, the projectile force; second, the resistance of the air; third, the force of gravity; fourth, the resistance of the sides of the grooves; fifth, friction against the surface of the bore. A variation in the intensity of any of these forces will effect a corresponding change in the path described by the bullet. Geography has also something to do with the matter, as both altitude and the condition of the atmosphere work a variation in the elevation. The above forces, in whatever latitude, are seldom or never the same at any two different times, so that two bullets will rarely strike in the same place, even though the piece be held perfectly or placed in a vise when fired. The resistance of the air and gravity are the main forces which affect a bullet after it passes the muzzle. The former decreases in proportion as the speed of the projectile lessens, while the latter acts always alike, no matter at what speed the lead is flying. Therefore, a ball, in its flight does not, as is generally supposed, describe a perfect arc in the air, but rather a curve somewhat sharper at its ending than its beginning half. The gun which has the correct length of bore, the right number of twists in the grooving, the proper charge of powder for the size of the chamber and length of the barrel, and a bullet of a weight in proportion to the amount of powder behind it, is apt to give the best results. Equalize the five forces as nearly as possible, and such a gun approaches nearest perfection. Gun makers are constantly striving to do this, and the result is the fine rifles now turned out by the first-class factories.

In casting elevations on a strange range always remember that damp, moist days require less elevation than hot, dry ones. Also, watch the bullet as it flies through the air, and observe where it drops. Some marksmen are utterly at a loss to know just where that "confounded bullet did go." I say watch it, and then you can tell. I know this caution appears to be a strange one, but let me say that it is strictly true, and not the least bit difficult to accomplish. I have watched thousands of bullets, from the time they left the muzzle of the gun until they struck, and have called the shots accurately and truly. Let any one stand behind a shooter, and train his eye to quick perception. Do not look at the muzzle, but about 20ft. beyond, or rather, just beyond the point where the puff of smoke reaches, and after a little practice he will be able to distinguish the little leaden pellet as it darts out, and to follow it, too, every foot of its journey through space. Don't give up in disgust after the first few trials, but try again. It is a very easy thing to do, and no trick at all for a sharp-sighted person.

The last and most important point of all is "pulling off." Of all the misses made by anybody when firing at an object, charge better than 50 per cent. of them to defective pulling of the trigger. Nearly every rifleman in the world, be he a greenhorn or an expert, deranges his aim to a more or less degree when he pulls off the piece. First-class riflemen will, as a general rule, flatly deny any such imputation against their superior marksmanship, and will claim that they have, long ago, mastered the defective pulloff of the trigger; but the real expert (who is one or two grades above the first-class rifleman) knows better than this, and that, as a matter of fact, not one rifleman in a thousand pulls off his piece perfectly. Now, if our best shots cannot always thoroughly overcome this one drawback to fine shooting after years of hard practice, how difficult must it be for the ordinary soldier or militiaman to master it? Hence it is that pointing and aiming drills are continuously practiced in the army, so as to give the soldier, whether standing, kneeling, or lying down, a perfect command of his rifle, as well as to teach him steadiness of both person and piece, and to establish between the hand and eye such a prompt and intimate connection as will insure the finger acting upon the trigger at the proper moment without causing any derangement of the aim.

The best riflemen at Creedmoor and elsewhere, before entering a match, spend the half hour previous to the contest in pointing, aiming and snapping the trigger at a small spot on the wall or tent, so as to have their nerves and trigger finger in training before commencing the competing scores. The pointing and aiming drills are the most important parts of the training necessary to make "a man with a gun" a good shot.

Pull off perfectly at the spot on the wall, and the real bullseye becomes a much easier matter to hit. One of the best riflemen I ever knew was a moderate drinker, and an inveterate smoker. Before entering a very important competition he suddenly cut short his drinking and smoking habits, and in consequence thereof went utterly to pieces in the match. The change was too great for him. Next time he kept up his regular habits, drank moderately, and smoke all he wanted to, and won the match. Smoking and drinking by no means aid marksmanship, but regularity of habits, whether good or bad, should always be observed by the embryo medal winner. Last of all, remember that riflemen are made and not born. Practice makes the marksman, not inheritance. It is within the province of every one to become at least fair shots, and if the student will observe at least a few of the above rules, which are calculated to transform the greenest of raw recruits into something better, he will find before very long that his labor has not been in vain.

J. M. T. PARTELLO.

BOSTON, May 18.—The regular shoot of the Massachusetts Rifle Association was held at their range to-day. The extreme heat and a bad fish-tail wind from 6 o'clock, caused the scores to run low. The champion gold medal was won by Mr. Frye, and the gold medal in the 20-shot rest match by Mr. Munroe. Mr. Brackett wins the gold membership badge on 10 scores of 81 or better. The spring meeting of this association will be held May 30 and 31 and June 1. Following are to-day's scores:

Champion Medal Match.

J A Frye	9	6	8	10	7	8	9	7	6	7—77
C C Clarke	6	5	8	10	10	9	4	5	10	8—75
O Howard	6	8	10	10	8	7	7	6	6	6—74
W Gardner	9	5	9	6	7	7	4	7	9	10—73
A Loring	6	8	5	8	7	7	7	7	4	9—68

Twenty-Shot Rest Match.

J R Munroe	7	11	12	11	11	11	11	11	9	12	
	10	11	12	11	12	10	10	10	11	10—213	
S Wilder	10	9	11	9	10	9	8	11	12		
	11	10	12	9	10	9	9	9	10	9—199

UNSER FRITZ.

BRIDGEPORT, Conn., May 16.—Members of the Bridgeport Rifle Club, and also of the Park City Gun Club, took advantage of the fine weather yesterday and went over to Readmoor, where matches were shot, with the following result:

Beardsley	10	10	9	10	10	12	10	9	9	9—98
	12	10	12	7	7	9	8	10	9	10—94—192
Wheeler	9	8	7	9	11	8	8	7	10	12—89
	10	7	9	11	11	8	9	9	7	9—90—179—371
C H Barber	10	8	8	9	9	8	9	11	11	7—90
	11	6	12	7	11	9	9	12	7	10—94—184
J W Brown	8	9	8	9	11	11	9	12	8	7—92
	8	9	7	10	8	10	11	8	10	9—90—183—367

Same conditions: B. E. George 98. Off-hand, 200yds.: Beardsley 83, 88, 86, J. W. Brown 82, W. B. Wheeler 82, B. E. George 80.

WILMINGTON, Del., May 13.—The regular weekly shooting at Healdmoor range took place this afternoon. Following are the scores in detail, standard American target:

Revolver Match, 50yds.

E Jackson	7	9	7	7	5	10	9	6	7	6	7—73
D Evans	8	8	7	7	7	7	6	7	10	8	5—70
E J Lee	6	9	8	7	7	9	8	6	6	6	5—66

Special Practice, 100yds.

I P Taylor	10	7	9	10	7	10	10	8	8	9—88	
E J Darlington	10	10	7	8	9	7	10	10	7	9—87	
M B Jackson	10	9	7	10	10	8	8	7	9	8—86	
R J Baldwin	8	8	10	10	7	7	7	10	7	8—82	
F H Eachus	6	9	9	10	10	9	7	7	7	8—82	
W S Darlington	10	8	8	8	6	7	9	8	9	8—81	
E Darlington	7	8	9	5	7	10	8	9	8	10—80	
G Darlington	9	8	8	7	8	7	8	8	8	8—79	

A short time ago a series of three 50-shot telegraph matches at 200yds. was arranged between S. H. Thomas, of Wyoming, W. T., and H. Simpson, of Wilmington, Del. The first match was concluded and resulted in a victory for Mr. Thomas by 3 points, 298 to 295.

OWENSVILLE, Ind., May 14.—The Owensville Ballard Rifle Club, 200yds., off-hand, standard target. J. Montgomery made his first full score of 10 bulls in regular match, having a run of 11 bulls in succession. W. T. Roberts, making the most tens, wears medal for coming week. Our two new members shot with us to-day and rolled up some nice scores:

J Montgomery	9	6	9	9	7	4	9	7	7	8—75	
	9	9	9	9	8	9	9	10	8	9—89—164	
Dr D F Gilmore	7	8	7	8	8	7	8	9	10	7—79	
	8	7	10	7	8	9	6	10	6	10—91—160	
W T Roberts	9	10	9	4	8	7	7	6	6	10—76	
	10	10	5	5	10	6	7	7	5	9—74—150	
R Speck	8	9	8	9	5	7	8	5	5	10—74	
	8	5	7	4	9	7	8	7	10	4—69—143	
R Howe	8	4	10	7	7	7	6	6	7	8—70	
	4	5	7	8	8	7	8	10	9	6—72—142	

J. MONTGOMERY, Sec'y.

CAMDEN, Del., May 13.—The following scores were made by the Kent County Rifle Club in the regular weekly shoot on their range to-day:

At 200 Yards.

H M Thomas	4	7	9	7	7	5	7	5	9	7—67
J W Evans	6	5	6	3	10	6	6	9	10	5—66
S H Thomas	4	5	3	4	5	4	6	8	5	5—49
J J Purdie	4	6	3	6	7	5	3	3	5	3—45

At 100 Yards, Reduced Target.

H M Thomas	6	5	6	4	5	7	5	7	8	10—63
J W Evans	5	9	6	4	7	5	6	6	7	6—61
S H Thomas	2	6	5	4	3	8	7	5	3	6—49
J S Purdie	8	4	2	6	2	5	2	4	6	7—46

SAN FRANCISCO, May 12.—The thirteenth May festival and annual shoot of the San Francisco Schuetzen Verein was held at Shell Mound Park to-day. The shooting commenced at 10 o'clock in the morning at both company and public targets, and lasted until 6 o'clock in the evening. All the prizes for the first target consisted of jewelry and silverware. For the second target the sum of $257 was set apart for prizes. The following are the scores of the principal winners on the company's target, for which only members of the Verein were allowed to enter. Each member was allowed three shots for a possible 75: first, Philo Jacoby, 66; second, F. Schuemann, 66; third, M. Zecher, 63; fourth, H. Tietjen, 62; fifth, Wm. Ehrenpfort, 61; sixth, J. H. Seyden, 61; seventh, J. C. Waller, 59; eighth, H. Kurlfinke, 57; ninth, F. Freese, 56; tenth, Louis Bendel, 56; eleventh, John Horstman, 55; twelfth, J. C. Britterman, 53; thirteenth, Chas. Tierbach, 53; fourteenth, Chris Nobman, 52. For the public target, where all comers were allowed, the following scores were made; $380 were taken in on tickets; each holder was allowed 4 shots for a possible 100: First, F. A. Freese, 94; second, Dr. Rodgers, 93; third, A. Johnson, 93; fourth, T. Dornbur, 92; fifth, F. Bockmann, 90; sixth, Philo Jacoby, 89; seventh, T. H. Browning, 88; eighth, A. Browning, 86; ninth; P. Rahwler, 82; tenth, C. Thurbach, 82; eleventh, T. H. Winter, 81; twelfth, J. B. McCutchan, 80. The first bullseye of the morning was made by Schuman, and the last by F. A. Freese. The first bullseye of the afternoon was made by J. B. McCutchan, and the last by F. A. Freese.

THE TEAM FOR ENGLAND.—Arrangements for the trip of the Massachusetss volunteer militia rifle team to England next month are nearly completed. The team will leave Boston on the afternoon of June 18, after receiving an official farewell from Gov. Ames and paying its respects to Mayor Hart at City Hall. Treasurer Potter at the Maverick Bank and President Spear at the Chamber of Commerce. Treasurer Potter makes his fourth acknowledgment of contributions paid in, making the grand total $4,015.

NEWARK RIFLEMEN.—The Newark Shooting Society members will be well represented at all the important shoots in this and New York State during the season. Early this week a strong delegation went to Jones's Woods to take part in the first annual shoot of the Barry Rifle Club, which offers twenty prizes ranging from $50 down to $3 for the best three tickets on the ring target; twenty prizes ranging from $40 down to $1 for best bullseyes, besides twelve premiums ranging from $30 down to $2 for most bullseyes. On the 28th they will attend the Miller Rifle Club's shoot at Union Hill. This club offers fifteen prizes of from $30 down to $1 for the best single tickets on the ring target and on the bullseye target; offers premiums of from $10 to $3 for most bullseyes, besides which the receipts on the bullseye target will be divided pro rata—after expenses are deducted—among those making bullseyes. On July 4, 5 and 6 the members will be kept busy by their own annual festival, which bids fair to be a grand success. On July 14 and 15 the Williamsburgh Shooting Society will hold its twenty-fifth annual prize shoot at Cypress Hills, Long Island, and this will catch a large number. Besides these the Independent Germanias will have a shoot in the Newark Shooting Park on June 16, and the Our Own Rifle Club, German-American Bullsheads, Zettlers and Marion Rifle Clubs will also hold prize shoots during the summer, though the dates have not yet been fixed. It is probable that one or more of these organizations will hold their shoots in the Newark Shooting Park.

CARD SPLITTING.—Some very interesting revolver shooting was witnessed at Conlin's gallery the other night when Mr. P. J. Donahue, of San Francisco, Cal., with a party of friends, came in. They started to shoot with the rifle, and after a few rounds Mr. Donahue called for the "Ghost," which is a .32-44cal., 9in. barrel Smith & Wesson revolver, and after doing some fine target shooting, started to split cards. The card being put in the split end of a match, is then put so that the edge and the shadow can only be seen, and the ball must hit the edge of card only. Mr. Donahue, who was shooting in excellent form, succeeded in splitting 26, or half the pack, in this way. This is the most cards split by any one man at one session. It is announced on the blackboards in this gallery that a rifle and revolver match will commence on May 16 and continue ten days, ending May 27. The revolver match to be shot at 16 meters, or 52½ft., on the standard decimal target. A handsome gold medal will be awarded as first prize. The rifle match will be at the swinging man target at 12yds. A gold medal is also offered as first prize in this competition. All are invited to participate.

THE TRAP.

Scores for publication should be made out on the printed blanks prepared by the Forest and Stream, and furnished gratis to club secretaries. Correspondents who favor us with club scores are particularly requested to write on one side of the paper only.

Secretaries of clubs and managers of tournaments are requested to keep us advised of the dates of their shoots, so that we may give due notice in our column of fixtures.

FIXTURES.

May 27 to June 1.—Missouri State shoot.
May 28 and 29.—Norwich, Conn., Tournament. E. W. Yerrington, President.
May 29, 30, 31.—South Side Gun Club tournament, Milwaukee, Wis. C. W. Milbraith, Secretary.
May.—Nebraska State Sportsmen's Association's fifteenth annual tournament, Norfolk. B. B. Locke, Secretary.
June.—Annual tournament Sportsmen's Association of the Northwest, Tacoma, Washington Territory.
June.—Ninth annual tournament Southern Illinois Sportsmen's Association, Belleville. C. P. Richards, Secretary.
June.—Kansas City tournament.
June 3, 4, 5, 6, 7.—New York State Association for the Protection of Fish and Game tournament, Albany, N. Y. Horace B. Derby, Secretary, Albany, N. Y.
June 6, 7 8.—Southern Illinois Sportsmen's Association's ninth annual tournament, Belleville, Ill.
June 10, 11, 12, 13, 14.—First tournament of the American Shooting Association, at Cincinnati, O.
June 18, 19, 20, 21.—Illinois State Sportsmen's Association's tournament, Grand Crossing, Ill.
Aug. 20, 21, 22, 23.—Second annual tournament of the Keystone Manufacturing Co., of Corry, Pa. Traps will be pulled by a new electric apparatus.
Sept. 17, 18, 19, 20.—Central Illinois Sportsmen's Association's eleventh annual tournament, Jerseyville, Ill.

IOWA STATE SHOOT.

DES MOINES, Ia., May 14.—The twelfth annual convention and tournament of the Iowa State Association for the Protection of Fish and Game began here this morning under favorable auspices. The weather was delightful, the city was in good show condition, and the popular interest manifested was above the average. The grounds of the meet are located at Central Place, on a flat encircled by a wooded arm of the placid Des Moines River, and in a spot better adapted for a shooting tournament than for anything else. The grounds are not inclosed and no admission fee is charged, which fact, coupled with the fact that the Belt Railway takes the visitors direct to the spot in a few minutes' ride, brought out to-day a very fair little crowd of spectators. Six tents are erected, and although there are no stands or buildings of any kind, the roofage provided would doubtless prove ample in case of rain. The absence of park facilities is more than compensated by the fresh and dustless turf and the generally green and refreshing look of things. For those who are not sufficiently refreshed by looking at the grass and leaves, there is good water in the restaurant tents.

The local committees have been active and efficient in their preliminary work, and everything possible has been done to advance interest in the sport. Tasty badges have been provided for shooters and visitors. The trophies for the competitions have been for some time exhibited at Eason's, on Walnut street; among these are the grand L. C. Smith cup, held last year by Carl Leopold, of Burlington, Ia.; the championship of America cup, won by Charlie Budd; the individual championship badge; the State team trophy; the American clay-bird badge; the Hotel Duncan gold badge; a Lefever gun and an L. C. Smith gun, both away up in G. Inspection of these beautiful incentives and rewards has convinced a great many non-shooting Des Moinites that there is something in this sporting business after all.

Des Moines can hardly be called a good sporting town, although sporting interests are yearly growing here, and are visibly more prominent than they were, say, five years ago, at which time it was my fortune to be residing here. The location of the State capitol here casts a heavy gloom of wisdom over this very beautiful and very moral city. In spite of this fact, however, the Des Moines Rod and Gun Club—which practically comprises and includes both the East Side and the West Side clubs, and contains the bulk of the shooting fraternity of the city, has of late been doing some very good work at the trap, breaking on an averages about 2,000 inanimates a week. The result of this work may be seen in to-day's scores, which show Messrs. Hughes and Hastings, of the above club, to have won the State trophy shoot.

The State Association is officered as follows: J. G. Smith, Algona, Pres.; Wm. Butler, Clarinda, First Vice-Pres.; N. S. Young, Burlington, Second Vice-Pres.; Al. C. Miller, Sec'y.; A. J. Zwart, Treas. Directors: C. W. Budd, Des Moines, J. Crabill, Clarinda, P. H. Cragin, Colfax, S. A. Van Saun, Greene. Law Committee: G. E. Clark, Algona, P. H. Cragin, Colfax, Galusha Parsons, Seattle, W. T.

All, or nearly all, of the above were on hand at the grounds today. A hasty look at the hotel registers showed also the following names of shooters attending: H. Durant, S. Sessions, H. C. Clark, W. J. Bronsom, W. A. Haugh, Algona; J. E. Weaver, Indianola; W. F. Smith, Webster City; H. Proctor, Lockwood Beed, L. M. Parks, W. F. Weeks, F. M. Mitchell, K. S. Cole, Hampton; Col. Whinnery, Wm. Sharp, Union; C. E. Gunp, D. Twining, Eldora; A. M. Crabill, Jacob Butler, Cal. Hobson, Clarinda; G. J. Young, Burlington; Frank Delmage, J. E. Corime, Matt Dye, A. J. Stephens, Dorimer.

A short examination of the grounds disclosed Charlie Budd, ubiquitous and smiling on his native heath; Capt. Jim Stice limping a little still from that rheumatism; J. A. Ruble, looking as innocent as he did the day he drifted in on the boys at Crown Point, and drifted off again with their money; F. S. Parmalee, of the Collins Gun Company of Omaha, with blood in his eye, and A. G. Courtney, the Lefevre gun man, who looked as though he had dined and was therefore not afraid to die. Messrs. Smith and Durant of Algona, Van Saun of Greene, Hughes of Fonda, Young of Burlington, and Hammond of Des Moines, were also to be counted among those sure to run hard. These are nearly all men of calm blue eye and projecting stomach. This outfit would seem to be required for successful shooting at the trap. Nearly all the circuit men asked where Frank Mason was.

The attendance to-day, in spite of the pleasantness of all arrangements and surroundings, has not been what was wished and expected. Marshalltown has no representative here. Charlie Hinsdale of Newton is not here, and a number of other old Iowa shooters are derelict in what should be their first duty this week. The first shoot filled with entries, and the Smith Cup race did not fill as was hoped. It is thought that to-morrow will show a larger attendance, and this is devoutly to be wished, for those who stay away will miss a most enjoyable tournament, and by all odds the best ever held by the Iowa Association.

The shooting of to-day, although the conditions were extremely favorable, was not phenomenal at all, and the live bird shooting was at times exceptionally bad. The light was clear and mild, the temperature hovering to 80°, and a very light breeze blew from the score at the blackbird traps. The latter traps were five in number, and squads of six shot at them. A similar arrangement was preserved at the live bird traps, and the shooting progressed rapidly. The traps were in good order, and next to none of the birds were broken in trapping. The live birds were at first above an average lot, but in the evening there was the too-frequent spectacle of cloth-flapping in the effort to get the birds to fly. The man will confer a benefit who will do away with this.

Mr. Al. Miller, the secretary of the association, kept the records of the squad scorers, and with Treasurer Zwart proved efficient and popular at the desk. The details of the shoot, barring the usual unavoidable individual delays, progressed admirably. The score:

Shoot No. 1, 10 single Keystone targets, entrance $1.50:

J M Crabill	1001111101—7	G K Martin	1111110111—9

G D Sweeny	1111010111—7	Al C Miller	0010101011—5
W F Hammond	0011111111—8		

In shooting off the ties, Runge, Parmalee, Ruble, Scott, Martin, Durant and Stice divided first, $23.25. They were all afraid. Leopold, Smith and Davis finally divided second, $17.45, after breaking 4 each. Hobson, Ebner and Sweeny remained in for 3 straight and divided third, $11.60. Van Saun shot out and won fourth, $5.10.

Shoot No. 2, L. C. Smith trophy, open to members of the State Association, 20 single Keystone targets, entrance $3.50, birds extra; $2 of entrance money divided according to conditions under which the cup is shot for, and $1.50 of entrance money divided into two prizes of 60 and 40 per cent.; cup to best score, 60 per cent. to second and 40 per cent. to third:

Carl Leopold	11100111111111111111—18
D Swaney	00111110111111101111—16

Budd and Runge agreed not to shoot off the 19 tie, but to hold the L. C. Smith cup in common, each keeping it for six months, agreeing also to divide next year's entrance money, as per the conditions. Carl Leopold, holder of the cup for the past year, received $48 of this year's entrance money. The first on 18 divided, Van Saun, Burnett and Leopold sharing the first money prize, $20.50, 60 per cent. Ties on 17 shot out, Yearnshaw and Hobson dividing $13.25, second money, 40 per cent.

Shoot No. 3.—Team shoot for State trophy, open to members of the Iowa State Sportsmen's Association, two men to constitute a team. Any number of teams from any organized club belonging to the State Association; 10 single live birds per team, 30yds., rise, both barrels. Entrance $4 per team, birds extra. First prize, State trophy; second prize, $20; third prize, $20; and fourth prize, $10.

*Holders of team trophy last year.

Hughes and Hastings won State trophy. This trophy was held last year by Messrs. Cole and Mitchell, of Hampton, who received this year $26 of the entrance money in the above shoot. Cole and Mitchell won second, $50. Smith and Durant and Park and Carnam divided third, $30. Hammond and Griffey shot out and won fourth, $10.

Shoot No. 4, American clay-bird medal winner to keep; entrance $2; 10 single Keystone targets, $50 guaranteed.

J A Ruble	1100011111—7	Searight	1111110101—8
Al Runge	1011001111—7		

J. R. Stice won first money, $20, on 10 straight, and also won American clay bird medal to keep; F. S. Parmalee won second, $14, on the shoot-off; Maycent, Crabill, Leopold and Durant divided third, $8.50, after shoot-off in 8 tie; Harris, Young, Ruble and Runge divided fourth, $5, on shoot-off in 7 tie.

Extra shoot No. 1, 7 live birds, entrance $4. There were 25 entries in this sweep. J. A. Ruble, Al. Runge and Gus Griffey divided first, $21.40, shooting off ties on 7 straight; K. S. Cole, C. W. Budd and W. W. Maycent divided second, $16.05, after shoot-off in 6 tie; J. E. Young won third, $10.70, in shoot-off in 5 tie; G. D. Sweeney and H. W. Scott divided fourth, $5.30, in shoot-off in 4 tie.

Extra shoot No. 2, 8 live birds, entrance $5.—There were 16 entries in this sweep; Smith, Budd and Hughes divided first, $18 25; Minard and Hastings second, $13.70; Montgomery and Davis third, $2.85; Howard fourth, $4.55.

Extra shoot No. 3, 7 live birds, entrance $5.—There were 18 entries in this sweep: Cannam and Ebner divided first, $21.60; Hughes, Gilson and Leopold second, $16.20; Parmales third on shoot-off, $8.30; Runge, Howard, Moore and N. S. Young fourth, $5.40.

Extra shoot, No. 4, 10 Keystones, entrance $2.—There were 34 entries in this sweep: Parmalee and Budd divided first, $23.10; Crabili, Ruble, Moore, Gilson and Hughes second, $17.30; Ebner, Mitchell, Hastings and Runge third, $11.05; Butler and Whinnery fourth, $5.75.

Extra shoot No. 5, 10 Keystones, entrance $2.—There were 16 entries in this sweep: Budd, Gilson and Sweeney divided first, $10.25; Ebner and Parmalee second, $7.70; Butler third, $4.80; Crabill and Moore fourth, $2.55.

Second Day, Wednesday, May 15.

The threatened rain of Thursday fell in the night, accompanied by a very creditable little thunderstorm. Wednesday remained cool and cloudy throughout and was an enjoyable one at the trap. The shooting was better on the day previous, the flying of the live birds not being especially strong. The grounds, situated as they are in a timbered bend of the river, and not near any barns or buildings, do not show so many tailers as grounds where the birds have their route mapped out, and there were consequently plenty of easy quarterers. None of the birds, however, could be called squabs or duffers, and the boys had plenty to do.

Several additions to the lists were made during the day. Mr. Abbott, ex-president of the Association, came over from Marshalltown, although he left his shooting irons at home. Mr. Abbott says the interest in trap matters at Marshalltown is in a fairly flourishing condition. Mr. J. H. Block, of St. Peter, Minn., and Mr. E. W. Bird, of Fairmount, Minn., were also present. A very notable feature of the shooting was the work of young Gilson, of Fonda, Iowa. Gilson is only 20 years old, but he was raised up in the duck country and takes to the trap naturally.

The programme shoots were easily run off, and a number of extras were shot. Considerable amusement was created at the finish of the regular shoot No. 5, which also carried the Hotel Duncan, Burlington, championship gold medal; Budd and Ruble, after a long shoot, shot out all the others who entered for the medal with their $1 entrance, but when they faced each other at the score they both began to think what a pity it would be for either one to lose the medal, and so agreed to divide it, *à la* Budd and Runge on the L. C. Smith cup. The crowd bantered them to shoot it out, and each declared himself willing to do as the other liked, but each knowing that the other didn't want to shoot, the matter was left so. It would appear to be more sportsmanlike to shoot these cup and medal races to a finish, and such a proceeding would certainly please the populace better.

Mr. A. G. Courtney, the Leiever man, was attacked with an ugly indisposition during the day and stopped shooting. Mr. Chan. Smith, alias "C. Moore," bantered an innocent sporting press representative to a 5-bird race, Mr. Smith to use but one hand. Mr. Courtney offered his gun to the challenged, saying, "If you break 5 straight I'll give you the gun." This the newspaper man proceeded to do, the score being 5 to 3 in his favor. "Take the gun," said Mr. Courtney; "you'll find the case over in the tent, and here's an old glove that goes with it. I don't want the old gun, anyhow; I'm going to die." Then everybody laughed.

The business meeting of the association to-night at the Aborn House parlors, reported elsewhere, was an important one. Following are the day's scores:

Extra shoot No. 6, 10 Keystones, entrance $1.25:

J Crabill	1111111111—10	P Block	1111111101—9
J G Smith	1110010100—5	Al Rochelle	1110111100—7

Bird	1111001100—6	Porter	1001001011—6
Runge	1011111011—8	Leopold	1111111011—9

After shoot-off Crabill, Parmalee and Gilson divided first, each clearing $4.95. Butler, Ruble, Ebner and Leopold divided second, $11.50. After shoot-off Lewis won third, $6.85. Stice won fourth in shoot-off, $3.85. A number of unrecorded shoots for the birds, etc., now followed, and the day closed pleasantly at dark.

The business meeting of the Association was held at the Aborn House parlors, Wednesday evening, with a large attendance. The following clubs were represented: Rod and Gun Club of Des Moines, Shooting Club of Burlington, Forester Gun Club of Davenport, Gun Club of Hampton, Shooting Club of Clarinda, Shooting Club of Algona.

Reports of the president and secretary were read and adopted. President Smith, of Algona, delivered the following brief and pertinent address, which was well received:

Gentlemen of the State Association: This is the twelfth annual meeting of our State Association. I am much pleased to see so large an attendance and also pleased at the great interest taken in our meetings. Our finances are in good condition and we hope to keep them so. The game laws of the State have been fairly well enforced except in four or five counties in the northwestern part. There game is killed and fish are caught without regard to law. There is little attempt made to enforce the law in those counties. Wild geese, ducks and prairie chickens are shot at all seasons and put into freezers for the New York market. The great lakes and breeding grounds of the State are located in those counties, and if we wish to preserve the game and fish some effort will have to be made to enforce the law. I hope our next Legislature will take the matter in hand.

I wish to call your attention to the law as it now stands in regard to wild geese and ducks. I think the season should open Sept. 1 instead of Aug. 15. Very few ducks and geese are fit to kill by Aug. 15. In fact many of them cannot fly and many prairie chickens are killed by shooters who claim they are after ducks.

Within the past few years great interest has been taken in field sports. Our country begins to realize that our men must be men of good physical development to hold their own with the nations of the Old World. With health and strength we have a clear brain and an active mind. If we would have good health, we must obey "nature's laws." We must breathe the pure air of heaven, which can only be obtained away from the busy haunts of man. The mountain and valley, forest and stream are the places where we find health and contentment. Do not be afraid, my friends, to spend a few days away from your business. Those few days may add years to your life, may save you from sickness and pain, and be a great blessing to you.

At the incidental mention of the words "FOREST AND STREAM" there were loud cries of "Hear! Hear!" with applause.

The treasurer's annual report was also read and adopted, and balloting was then begun for next year's location of the meet. The informal ballot stood: Clarinda 6, Des Moines 5, Burlington 3, Davenport 4. Tie balloting followed, amid some interest, until on the fifth formal ballot Davenport was chosen by a majority of 12, and will accordingly have next year's tournament. Davenport is a good town, and the trap is a great feature there. She will give a rousing welcome to the boys next year, and the meet will be a success then, as it has been always in the past.

Election of officers then followed, with the following results: Pres., J. G. Smith, Algona; First Vice-Pres., N. S. Young, Burlington; Second Vice-Pres., H. Proctor, Hampton; Sec., J. W. Howard, Davenport; Treas., E. Emerson, Davenport; Directors, C. M. Leonard, F. O. Davis, Davenport; J. Butler, Clarinda; K. S. Cole, Hampton; Gus Griffey, Des Moines. Law Committee, G. E. Clarke, Algona; Nelson Royal, Des Moines.

On motion of Mr. Leopold of Burlington the American Shooting Association rules were adopted, *vice* the Iowa State rules. No interpreter for the same was elected. On motion of Mr. Budd a committee was appointed by the chair to confer with the president on the matter of recommendation of laws for the protection of fish and game, Mr. C. W. Budd of Des Moines and Mr. S. Young of Burlington being so appointed. It is to be hoped that this committee will do some good hard thinking, as doubtless they will, before going through the old ineffective form of recommending the old ineffective "proposed bill for the protection of fish and game." All our States have got these bills, but who has got the game? It is to be hoped also that our young shooter who has received favorable mention in this report will cast his eye upon President Smith's address and go and sell, clear out and burn up the game freezer which he is running at Fonda, Iowa. Then he can come into a State protective association meet like this with clean hands.

Third Day's Shoot, Thursday, May 16.

The weather was cloudy and sultry throughout the day. Rain fell at 5 P. M. and continued into the night. There was a falling off in the attendance of prominent shooters of the day before, although a few others came in to-day for the first time. Live birds about an average lot. A strong wind blew for a part of the day, and this perhaps lowered the average of the shooters. The scores:

Shoot No. 8, 8 single live birds, entrance $6, $100 guaranteed:

Parmalee	11111111—8	Converse	11111101—7

Budd	11111—5	Parmalee	11110—4
Converse	10100—2	Laflin	01011—3
Lehman	11011—4	Howard	10111—4
Hughes	01011—3	Shadbolt	00101—2
Stice	11101—4	Wilson	01100—2
Block	11001—3	Gilson	11111—5
House	10100—2	Ruble	11110—4
Georgson	11011—4		

Budd and Gilson div. first, $26.25; Stice and Parmalee shot out and div. second, $15.75; Hughes, Block and Laflin div. third, $10.50.

Extra shoot No. 19, 10 Keystones, entrance $1:

C Moore	1101110000—6	Georgson	1111101011—8
Wilson	1101011011—7	Shadbolt	1011111111—9
Bennett	1111101111—9	Gilson	1101111111—9
Lewis	1111110111—9	Hughes	1101011111—8
Miller	1111111110—9	Searight	1111111000—7
Howard	1010110111—7		

Davis shot out and won first, $2.85; Georgson shot out and won second, $2.15; Howard shot out and won third, $1.40; C. Moore won fourth, 75 cents.

This closed the shooting for the day. During the day Budd and Ruble came to an understanding about the Hotel Duncan medal. Ruble bought out Budd's interest and will thus retain the cup.

The Iowa State Association championship gold medal, value $50, going to the best average individual score made in shoots Nos. 4 and 6, was tied and shot out by Hughes, Budd and Ebner. The latter dropped out, and Budd and Hughes again performed the difficult feat of dividing a gold medal for individual score.

Friday, May 17.—The rain of the night previous continued all Friday morning, and indeed all day, with scarce an intermission. Numbers of shooters had left on the evening before, and those remaining did not go out to the grounds. The tents and traps were removed and the tournament was declared at an end.

During the day the averages were made up for the delivery of prizes for best scores in the guaranteed shoots of the meet, the surplus over the guarantees to be divided into seven prizes. These were distributed as follows: C. W Budd, of Des Moines, first, 56 birds straight; Geo. Hughes, of Fonda, second, 55 birds; F. S. Parmalee, of Omaha, third, 53; J. A. Ruble, of Albert Lea, and Al. Runge, of Burlington, tie for fourth, 48 each; A. L. Lehman, of Milwaukee, and Chas. F. Ebner, of Burlington, tie for fifth, 47 each; J. R. Stice, of Jacksonville, Ill., sixth, 4; Al. Gilson, of Fonda, seventh, 45. Total amount of money so distributed was only $16.40.

Much interest had centered in the 100 Keystones race, at $25 entrance, which was to have been shot to-day, it being reported that Stice, Budd and Parmalee would shoot, if Ruble could be induced to enter; but it is a question whether this match would have been shot even had the weather been fair. A team shoot, Budd and Ruble vs. Stice and Parmalee, 25 live birds, $50 a side, was also arranged, but fell through by reason of the rain. At this writing, Friday afternoon, everybody is wet and cross, and all are getting out of town fast as possible. Stice will drag his rheumatism, and Parmalee his diamonds, to the Nebraska State shoot, beginning Tuesday next. Ruble and his red shirt are headed for Minnesota State shoot, at Minneapolis, on the same day.

In comment on the shoot, the first thing to notice is the rapid tapering off in the number of shooters from first to last. It very soon became apparent that a few men were safe to win the bulk of the money, and the weaker shooters gradually fell out. It is noticeably true here to-day, and never more so, that some system must be devised to equalize the expert and the amateur, if trap shoots are to be made a success.

The association figured well and came out slightly ahead on the shoot, the guarantee shoots all filling well enough to save them. It may be said that the officers of the association did all in their power to make the shoot a pleasant and successful affair. To this Charlie Budd, always active and good-natured, contributed more than anybody. Charlie is worth the price of admission.

For Des Moines as a place for a meet of this kind not very much can be said favorably, and the remarks of the departing shooters to-day are far from complimentary to this city. There are a great many nice people living here, but the whole 60,000 of them have not got the enterprise of many a little place of 8,000 or 10,000. Des Moines can turn out a pretty fair crowd of dry goods clerks, book-keepers and school girls to see a game of base ball, but for a State meet like this, when men are here who could do good talking for the city somewhere else, she cannot turn a hand. There were not fifty home visitors at the grounds on any day, and if any admission fee had been charged there would not have been two. The location of the next meet at Davenport was wise. This is not the place for it, for Des Moines don't want it. She is sleepy, and only wants to be let alone.

SUMMARY IOWA STATE SHOOT.

L. C. Smith cup, won by Budd and Runge.
State team trophy, won by Hughes and Hastings of Des Moines.
American clay bird medal, won by Stice to keep.
Hotel Duncan medal, won by Budd and Ruble, Ruble buying out Budd.
Iowa individual championship medal, won by Budd and Hughes; tie may be shot out in future.
Three best shoot averages, Budd, Hughes and Parmalee in order.

E. HOUGH.

OHIO TRAP SHOOTERS' LEAGUE.

THE second annual tournament of the Ohio Trap Shooters' League was held on the grounds of the Cleveland Gun Club at Blue Rock Springs, Cleveland, Ohio, on May 14, 15 and 16. Tuesday, the opening day, was accompanied with heavy rain in the forenoon, which had a depressing effect on the shooters and made the attendance very slim, but toward noon the sky cleared and the latter part of the day was remarkably pleasant for the sport of trap shooting. The League was formed by the efforts of a few prominent shooters in the State, for the purpose of increasing goodfellowship among Ohio sportsmen, and for the advancement of trap-shooting interests throughout the State.

Although the present tournament did not draw so large a crowd as expected, still those who were there certainly enjoyed a pleasant three days and will be on deck for the shoot of 1890.

On Tuesday evening a meeting of the League was held at the offices of the Chamberlin Cartridge Co. and the following officers elected for 1888: President, T. A. Cloose, Cleveland; Vice-President, Percy W. Leavitt, Akron; Secretary and Treasurer, Ed. Taylor, Cincinnati; Executive Committee—Al Bandle, Cincinnati; D. F. Morgan, Akron; G. E. Osborne, Toledo; R. Valentine, Monroeville; R. E. Sheldon, Cleveland, Mr. Cloose was taken by surprise, but acknowledged the honor in a few well-chosen remarks, and then took the chair. The League adopted the rules of the American Shooting Association, and decided to hold the next tournament at Toledo in May, 1890.

The attendance on Wednesday and Thursday was somewhat larger than on Tuesday, and the scores at the "red birds" were better as the boys got more practice at them. This is the new bird made by the Bandle Arms Co., and seems to require more skill to break than the others. On Thursday the race for the L. C. Smith cup was shot with 26 entries. The former holder of the cup, Rolla O. Heikes, of Dayton, O., was sick and in no condition to shoot, but he gamely stepped to the score and made an effort to reach his old-time form, but without avail. The race was a close and exciting one between the half dozen leaders, and when North retired with 47 out of 50, leaving Paul with a chance for 48 by breaking his last 5 straight, the general impression was that Paul would win with ease; he dropped one, however, which made him a tie with North. This was immediately shot off at 25 birds each, Paul winning with ease by 24 to 19. Below are the scores in full:

Tuesday, May 14.

Event No. 1, at 9 bluerocks, entrance $1.50. Match shot in two classes, A and B; money divided into two equal parts, and each part divided into three moneys. Open to members of Ohio State League only:

Benscotten	111111111—9	Calhoun	010111111—7
Taylor	111111111—9	Morgan	110101011—6
Paul	111111111—9	Leavitt	111010011—6
Paul North	110111111—8	Haycox	101101101—6
Sheldon	011111011—8	Hoffman	111011100—6
Green	101111111—8	Held	111100010—5
Hopkins	111011111—8	Unsen	011000111—5
Bandle	111101111—8	Richard	111001101—5
Osborn	111111011—8	Hendershot	110001101—5
Valentine	111111101—8	Elford	101011001—5
Cole	111110111—8	Alexander	010001111—5
Dayton	011111111—8	Bell	111000001—4
Prechtel	111111110—8	J E T	010101001—4
Nichols	101111111—8	Andrews	101010100—4
Heal	101111110—7	Holt	001101000—3
June	011011111—7		

All ties divided except on 8 and 5, which were shot off. North, Sheldon, Hopkins, Bandle and Osborn divided the 8 money, and Heal, Hendershot and Alexander the 5 money.

Event No. 2, at 12 standard targets, entrance $2, money div. as in event No. 1, open to League only:

Osborn	111111111111—12	Held	111011110111—10
J I C	111111111111—12	Bell	101111011111—10
Benscotten	111111111111—12	Cole	111111100110—9
Alexander	111111111111—12	Andrews	111010011111—9
Paul North	111111111111—12	Heal	111010111110—9
June	111111111111—12	Holt	111011011011—9
Hendershot	111111111111—11	Dayton	111011101110—8
Taylor	111011111111—11	Bandle	111011001011—8
Morgan	111011111111—11	Elford	111011001111—8
Paul	111101111111—11	Green	101100011111—8
Prechtel	111011111111—11	Leavitt	011111100001—7
Upson	101111110111—10	Richard	011101011001—7
Haycox	111111110110—10	Sheldon	110000011101—6
Calhoun	110110111111—10	Hoffman	101011100100—6
Hopkins	111111011011—10	Tettlebach	000110000100—3
Valentine	011111110111—10		

All ties div. except on 11 and 10 which were shot off. Taylor, Paul and Prechtel div. the 11 money, and Hopkins and Heal the 10 money.

Event No. 3, at 15 Cincinnati clay birds, entrance $2.50, money divided as before:

Paul	111111101101111—13	Calhoun	001011001001111— 8
Prechtel	111111101011110—12	Cole	111010001000111— 8
Paul North	111101011011111—12	Benscotten	001011101101100— 8
Bandle	100110111101110—10	Alexander	001101011110100— 8
Taylor	110101001111011—10	Hendershot	001111001011100— 8
Osborn	001001111111110—10	Holt	101011010110100— 8
Morgan	000100111111111—10	J I C	011000011111100— 7
Ford	110011001111110—10	Hopkins	101101001000110— 7
Hoffman	111001101010111— 9	Green	011101000011010— 7
Sheldon	111000111010111— 9	Dayton	010100011101000— 6
Andrews	101111000111100— 9	Leavitt	100000111000110— 6
June	100101001101111— 9	Heal	000110011000110— 6
Valentine	111111100011000— 9	Tettlebach	000010000100100— 3

All ties divided except on 10 and 8 which were shot off. Ford won the 10 money and Alexander the 8 money.

Event No. 4, at 9 bluerocks, entrance $1.50, money divided as before, open to all:

Benscotten	111111111—9	Paul	011101111—7
June	111111111—9	Paul North	111010110—6
Osborn	111111111—9	Cole	110011110—6
Heal	111111111—9	Bandle	101011011—6
Alexander	111111111—9	H T Smith	111100011—6
Hopkins	111111111—9	Morgan	111111000—6
Haycox	111111110—8	Held	110101101—6
Dr. Hibbard	110111111—8	Andrews	110011110—6
J I C	101111111—8	Elford	011111001—6
Valentine	111111110—8	Dayton	111010010—5
Johnson	101111111—8	Hoffman	101011010—5
Sheldon	111111101—8	Sweetman	011100101—5
Rudolph	101111011—7	Holt	001011001—4
Calhoun	111011011—7	Bell	010101100—4
Leavitt	011111011—7	Green	111100000—4
Nichols	111101101—7	J E T	001100100—3
Hendershot	101011111—7	W Dick	000001000—1

First, fifth and sixth divided. Other ties shot off. Haycox, Hibbard, Valentine and Sheldon divide the 8, Rudolph and Leavitt the 7, and North, Paul, Smith, Morgan and Heal the 6.

Event No. 5, at 12 standards, entrance $2, money divided as before, open to all:

Morgan	101111011100— 8	Sheldon	110111011010— 8
Hopkins	001111111001— 8	Cole	011011110001— 7
Leavitt	111111111100— 9	Dr Hibbard	111110011111—10
Osborne	111111111111—12	Paul	011111111111—11
Benscotten	011111111111—11	J I C	111001111100— 9
Hendershot	111111010101— 9	Dayton	110111001111— 9
June	111111011111—11	Nichols	111101111111—11
Haycox	011111111010— 9	Green	111100001110— 7
Holt	100101111111— 9	Alexander	111011111111—11
North	111111111111—12	Elford	001111111101— 9
Bandle	111011111111—11	Calhoun	111101111111—11

All ties divided except 11 and 9, which were shot off. Paul and Calhoun divided the 11 money, and Holt, J. I. C. and Dayton divided the 9 money.

Extra event No. 1, at 9 single bluerocks, entrance $1.50, four moneys, open to all:

Sheldon	111111111—9	Paul North	110111111—8
Hopkins	111111111—9	H T Smith	110111011—7
Calhoun	111111111—9	Hendershot	110011111—7
Dayton	111111111—9	Alexander	111011011—7
Osborne	111111110—8	Holt	011101110—6
Benscotten	011111111—8	Leavitt	010111110—6
Andrews	111111110—8	Rudolph	010111110—6
Cole	011111111—8	Green	101101011—6
Bandle	011111111—8	Haycox	110101101—5
Morgan	111011111—8	Dr Hubbard	011100110—5
Paul	111111101—8	Nichols	101010101—5

First, third and fourth divided; second shot off and divided by Bandle, Morgan and Paul.

Extra event No. 2, at 9 single bluerocks, entrance $1.50, money divided as in other matches, open to all:

North	111010110—6	H F Smith	111110001—6
Haycox	111111101—8	W Dick	000001000—1
Benscotten	111111111—9	Holman	101011010—5
June	111111111—9	Morgan	111111000—6
Cole	111011110—6	Leavitt	011111011—7
Hendershot	101011111—7	Sweetman	011100101—5
Rudolph	101111011—7	Hill	110101101—6
Dr Hibbard	110111111—8	Johnson	101111111—8
Osborne	111111111—9	Andrews	110011110—6
J I C	101111111—8	Alfred	011111001—6
Calhoun	111011011—7	Nichols	111101101—7
Heal	111111111—9	E T	001100100—3
Holt	001011001—4	J Bell	010101100—4
Alexander	111111111—9	Sheldon	111111101—8
Dayton	111010010—5	Paul	011101111—7
Bandle	101011011—6	Green	111100000—4
Valentine	111111110—8	Hopkins	111111111—9

Ties on 9, 5 and 4 div. Tie on 8 shot off and div. by Haycox, Hibbard, Valentine and Sheldon. Ties on 7 shot off and div. by Rudolph and Leavitt. Ties on 6 shot off and div. by Cole, Smith, Morgan and Hill.

Extra event No. 3, at 9 standards, entrance $1.50, money div. as before, open to all:

Osborne	111111110—8	Morgan	111011111—8
Benscotten	011111111—8	Hopkins	111111111—9
Haycox	110001101—5	Leavitt	010111110—6
Dr Hibbard	011100110—5	Rudolph	010111110—6
Sheldon	111111111—9	Calhoun	111111111—9
Smith	110111011—7	Paul	111111101—8
Nichols	101010101—5	Dayton	111111111—9
Andrews	111111110—8	Hendershot	110011111—7
Holt	011101110—6	North	101111111—8
Cole	111110111—8	Green	101011101—6
Bandle	011111111—8	Alexander	111001111—7

All ties div. except on 8 which was shot off and div. by Bandle, Morgan and Paul.

Extra event No. 4, at 9 standards, entrance $1, four moneys, open to all:

Bell	101101111—7	Upson	111111101—8
J I C	101111110—7	Aulbach	110001000—3
Osborne	111101011—7	Alexis	111101010—6
Benscotten	111111011—7	Haycox	011111111—8
North	111111111—9	Hopkins	111111111—9
Morgan	111011111—8	Brown	111011111—8
Leavitt	101111001—6	Sheldon	111010111—7
Dr Hibbard	101010111—6	Andrews	110011011—6
Heal	111100100—5	Paul	111111111—9
Valentine	101111111—8	Smith	111011001—6
Cole	101010101—5	Prechtel	111101000—5
Taylor	111111101—8	W Dick	011111100—6
Calhoun	111111111—9	Hendershot	101111011—7
Dayton	111101001—6		

First div., second shot off and div. by Morgan, Valentine and Haycox, third shot off and won by Hopkins, fourth shot off and div. by Leavitt, Alexis, Andrews and Dayton.

Wednesday, May 15.

Event No. 1, at 9 bluerocks, entrance $1.50, classes A and B, purse divided in half and each half into three moneys. Open to Ohio State League:

Osborne	111101110—7	Andrews	111111100—6
Hendershot	111111111—9	Hoffman	101010111—6
Benscotten	111010111—7	Palmer	111011001—6
Wightman	001110101—5	Dayton	001111110—6
Morgan	011111011—7	Bass	110010010—4
Hopkins	100111111—7	Paul	110111111—8
Leavitt	101011101—6	Alexander	011111111—8
Jone	101111111—8	Lee	111111011—8
Taylor	101011101—6	Roach	000010010w.
Cole	111110010—6	Elworthy	111011110—7
Sheldon	111111011—8	Prechtel	111011011—8
Bandle	111011111—8	Heal	111011010—6
Richard	111111110—8	Wendorf	110011101—6
North	111101111—7		

First won by Hendershot alone, other ties shot off, second div. by Paul, Lee and Prechtel, Benscotten won third, fourth div. by Taylor, Palmer, Dayton and Heal.

Event No. 2, at 15 standards, entrance $2.50, money divided as in previous event, open to League only:

Prechtel	111111111111—15	Nichols	111101111000111—11
Martin	101111110101111—12	Bandle	111111111111111—14

T. F. Spencer, referee; Charles Hebbard, A.G. Harbaugh, judges; A. Forrester, scorer.

Ties between Paul and North shot off at 25 birds each:

Paul....1111111111111111111110111—24
North....0111101111111111101001011—19

Paul is therefore the present champion of Ohio and holds the cup. This event was not finished until nearly 6 o'clock, and wound up the day's sport and the tournament.

FRANK MASON.

THE TRENTON SHOOT.

THE two-days' tournament of the Mercer Gun Club of Trenton, N. J., held on May 15 and 16, proved to be one of the most successful shoots every held in Jersey. Although this club was only organized in December last, it is already one of the largest and most active clubs in the State, and has on their membership list 75 of the most prominent citizens of the city. The board of officers consists of the following gentlemen: Pres., Edward G. Updegrove; Vice-Prest., Isaac Shreeve; Treas., A. Kuser; Sec., A. W. Moore. The grounds are situated on the Kuser estate, about two miles from the heart of the city. They are inclosed by a high board fence, that constitutes the boundary, being just 81yds. from the traps on all sides except the rear. The club house is a large and substantial structure, and is supplied with all conveniences. President Updegrove was chairman of the tournament committee, and had as assistants Al. Leigh, Tony Kuser, Mahlon Fox, Isaac Shreeve and M. Kline, and they all labored faithfully to make the shoot the grand success it was. The weather was delightful throughout the two days, and everything passed off smoothly. The live birds used, about 1,000 in number, were furnished by Dave Williams, and he got as good a lot of flyers as ever were seen in a tournament shoot. In artificial shooting Keystones were the targets, thrown from Keystone traps under that system. On the opening day the 10 live-bird sweep was shot under Mercer rules, "gun below the armpit until the bird is on the wing." This caused quite a number of entries to withdraw, and a number of others declared they would not stay over and shoot the rules. President Updegrove announced during the match that hereafter the live-bird events would be shot under modified Hurlingham rules, and everybody was happy. I think this was a very wise move on the committee's part, for Hurlingham rules, modified to permit the use of 10-gauge guns, are certainly the popular rules in this country. W. Fred Quimby assisted the committee in every way in his power, and did much toward making the events run smoothly, besides acting as referee. The scores ran:

Event No. 1, at 10 Keystone targets, $1 entrance, Keystone rules, four prizes:

Mahlon	1111111110—9	Cubberley	1011001111— 7
Williams	1001101111— 7	C Smith	1111111110— 9

C Van Camp (30)	c2111202c— 8	T M Pierson (30)	1001100w.

Ties on 8 for third money, miss and out: Kleinz 3, Hedden 4, Leddy 3, Van Camp 4, Kuser 4, Castles 2. Ties on 7 for fourth: Voorhees 1, Zwirlein 2, Turford 2, Manley 2, Quimby 1, Williams 1. Class, of Pine Brook, Sigler, of Montclair, Camp of Trenton, and Mack, of Easton, first; Cubberly, of Long Branch, Jones, of Jersey City, Mahlon, of Trenton, Miller, of Springfield, Irwin, of Philadelphia, second; Hedden, of Newark, Van Camp and Kuser, of Trenton, third; Zwirlein and Turford, of Trenton, and Manley, of Danbury, fourth.

Jones's first bird, a fast left quarter, was missed clean, and Irwin's, an easy incomer, came in unscathed. Van Camp's first, a fast right quarter, was hit hard with both barrels, but managed to reach the roof of the club house when it fell dead. Manley missed a fast straightaway and Hunton followed suit. Tee Kay's first miss was a fast left quarter; it was hit hard with the first barrel, but reached the fence. Miller's second bird, a tailer, was missed clean with both charges, and Hedden got behind his with both barrels and scored a miss. Quimby's second was a strong tailer and carried both loads just out of bounds and fell dead. Cubberley's third, a left quarter, twisted out of both charges. Kleinz had hard luck with his third and ninth; they were both rattling left quarters and both fell dead within two feet of the back boundary. Williams's second was hit, but hit the fence and was scored a lost bird. Jones made a beautiful kill with the second barrel on his third bird and redeemed himself for his first miss. Smelt did likewise, killing a twisting straightaway fully 50yds. away. Sigler killed his fourth bird cleverly, but held his gun above the armpit and had to shoot another. Miller made a beautiful shot on his third, a fast straightaway, bringing him down with the second barrel. Irwin's gun was challenged on his fourth bird and he had to kill another to score. Manley did not fare so well on his fifth bird; he killed it with the first barrel, but the gun was challenged and he missed the substitute. Castle's error in not using his second barrel on his fifth bird was an inexcusable one for a veteran like him, and cost him a bird that could have been scored. Zwirlein's seventh was gathered in bounds, but was challenged for shot marks and declared lost. Huston's third was an incomer that left No. 5 trap like a streak of lightning and was over the boundary before he could use his second barrel. Kuser had hard luck on his sixth, it falling dead just out of bounds. Smith's tenth and Grant's seventh were both good ones, and carried the shot out and fell dead.

Event No. 6, 25 Keystones, Keystone rules, $5 entrance, $75 guaranteed:

Frank Class scored his 20 straight but had a very close call on his 16th, the bird falling dead hardly 4in. within bounds. Fox lost his last bird very conveniently, he went to the score and forgot to push his safety up. Manley shot in very good luck and was lucky in getting good birds, the only bird he missed was a rattling tailer, that could have been missed by any one. Kleinz apparently had killed his 15th bird, but in order to make sure, he fired his second, when to the surprise of every one, the bird rose and slowly flew out of bounds; his 18th was an ordinary right quartering that was missed clean. Sigler's two misses were creditable ones, his 10th was a lightning straightaway that twisted out of the charge, his other miss was a fast towerer. Miller lost his 6th and 16th, both fast drivers. Cubberley's 12th was an easy one killed on the ground, he was given another bird, and got the hottest kind of a driver that got away; his 18th was one of the same kind and was missed with both barrels. Camp missed his 2d and 8th, both right quartering drivers; his 20th might have been killed if he had held right. Brewer was apparently not in good form as many of his kills were anything but clean; his 6th, a fast driver, was hit but got away; his 10th fell dead just out of bounds; the next one was a twister and got away with a clean skin. Castles lost his 2d, 10th and 16th, all hard drivers. Irwin's first bird was an easy incomer but was missed clean, his 6th a hard driver and the 15th a towering left-quarter fell dead outside the fence. Lindsley lost his 3d the fastest kind of an incomer, 7th and 12th both tailers, the 18th a towerer was hit with the second barrel and twisted in the air but got out and away. Smith's 7th fell dead over the fence as did his 15th; his 9th and 10th were dandies and both sailed away with considerable shot for ballast. Van Camp shot in great form in the early part of the race, but went to pieces on the home stretch; some of his kills were remarkable. Capt. Jones's 5th bird had to be put up by the trapper, and although he was balked he foolishly accepted the bird and scored a miss. Zwirlein's 11th was shot on the ground, the referee gave another bird and he proved to be a good one, as he was away as soon as the trap was pulled.

Event No. 3, 20 Keystones, $3 entrance:

TEE KAY.

CORRY, Pa., May 16.—The Corry Gun Club held their weekly shoot this afternoon on their new grounds; this with the good weather that prevailed helped the boys to make some very good scores for beginners. Austin won the gold medal, Lewis silver, and McCray leather. Following are the scores: Lewis 19, Barker 10, Ward 19, Austin 22, Swan 13, Arnold 19, F. Babcock 21, Ellis 17, Waggoner 13, Mead 13, Gallup 12, Scott 16, Starbird 14, McCray 9, Tyler 8, Edwards 13, Kelleher 16, Nichols 10, Hammond 10, Oliver 13, Duffy 10, Wilson 20, Blair 13, Blydenburgh, Jr., 13.

WORCESTER, Mass., May 16.—At the meet this week of the Worcester Sportsmen's Club at Coal Mine Brook Range, the principal event was the contest for the cup recently presented to the club, and it is to be continued for the present every two weeks. Each man has a handicap, and runs, thrown from open traps: M. D. Grinnem. At the meeting on [illegible], E. T. Smith 26, C. R. B. Claflin 26, commodore, the Prince of Wales 24, C. Crompton 22, H. W. Webber [illegible]arquis of Ormonde, was appy 21, W. R. Dean 21, W. L. Davis 21, [illegible] 20, H. D. Jourdan 20, C. B. Holden 19, [illegible]us challenges, the present on[illegible]4, V. F. Prentice 14, Dr. Bowers 14. [illegible]he most important, in eve[illegible]nging at all under the term[illegible]e future. The second issue, [illegible]of races, etc., is merely a [illegible]

MINNEAPOLIS GUN CLUB.

MINNEAPOLIS, May 17.—Yesterday, the day set apart for the monthly one-day tournament of the Minneapolis Gun Club, opened with heavy thunder and a severe hail and rain storm, which lasted until nearly 9 o'clock. The rest of the day was gloomy, sour and very windy, making good scores nearly impossible. There was a small attendance, about sixteen during the forenoon, which was increased to twenty-four during the afternoon.

The Minneapolis Gun Club has distinguished itself by being the first, and so far as the writer knows, the only gun club to have electrical trap pullers. They were tried yesterday for the first time, and of course needed some adjusting, but they worked very nicely, and with a little more experience and a few minor changes will be perfection itself. They work so smoothly and quietly that every one was enthusiastic in their praise, and I think the inventor, Mr. Vernon Bell, of Minneapolis, will have his hands full supplying clubs that will want them as soon as their many merits are known. President Harrison, of the Minneapolis club, will give any sportsman any desired information concerning them, as it is chiefly through his exertions and enterprise that the club possesses them.

There were present yesterday J. H. Balsom, Hudson, Wis.; Pfister, Hamlin, Bennett, Chandler and Skinner, from St. Paul; I. Claggett, Montevedio, Minn., and others.

Following are the various scores, all from 5 screened traps, 18 and 15yds. rise, Keystone system, all purses divided in 40, 30, 20 and 10 per cent.:

First sweepstake, 7 singles, 50 cents entrance: Pratt 3, Murphy 7, Skillet 3, Shott 4, Skinner 7, Osmer 6, Cutter 7. Skinner first, Osmer second.

Second sweep, 4 singles and 3 pairs, 75 cents entrance: Pratt 7, Murphy 7, Skillet 6, Shott 9, Skinner 9, Osmer 9, Cuttcr 7. Osmer first on shoot-off, Cutter second.

First event, 10 single Peorias, $1 entrance: Murphy 6, Marshall 8, Skinner 9, Lawrence 6, Shott 9, Christenson 8, Hamlin 10, Bennett 10, Cutter 7, Osmer 8, Pratt 5, Balsom 8, Daly 10, Pye 3, Dunn 6. Hamlin, Bennett and Daly divided first, Skinner and Shott second, Marshall, Christenson and Osmer third, Cutter and Balsom fourth.

Second event, 6 singles and 2 pairs, $1: Skinner 9, Marshall 6, Balsom 9, Pye 7, Lawrence 6, Shott 7, Osmer 8, Christenson 8, Hamlin 10, Bennett 7. Daly 8, Dunn 8, Murphy 5, Cutter 7, Pratt 7. Hamlin first, Skinner and Balsam divided second, Dunn 3, Bennett fourth.

Third event, 15 singles, $1.50 entrance: Skinner 14, Marshall 11, Daly 13, Lawrence 12, Pye 11, Shott 10, Pratt 13, Murphy 10, Hamlin 13, Bennett 14, Christenson 11, Balsom 15, Cutter 11, Dunn 13. Balsom first, Skinner and Bennett divided second, Dunn third, Lawrence fourth.

Fourth event, 4 singles and 3 pairs, $1 entrance: Christenson 8, Skinner 9, Osmer 9, Dunn 8, Balsom 9, Daly 8, Pye 8, Marshall 6, Lawrence 8, Pratt 7, Shott 6, Hamlin 8 Bennett 7, Cutter 7. Murphy 6. Skinner, Balsom and Osmer first, Dunn second, Bennett third, Marshall fourth.

Fifth event, 10 singles: Marshall 10, Daly 8, Skinner 9, Osmer 9, Catamaran 9, Nicholson 6, Stokes 9, Chantler 9, Balsom 10, Dalton 8, Pye 6, Kennedy 8, Hamlin 10, Bennett 7, Whitcomb 8, Lawrence 8, Pratt 6, Shott 5, Christenson 8, Cutter 8, Murphy 6, Dunn 7, Ensign 10, Morse 8.

Badge shoot, 10 singles and 5 pairs, $2 entrance:

WILLIAMS.

NEW YORK SUBURBAN SHOOTING GROUNDS.

NEW YORK, May 20.—There will be an all-day shoot at our grounds on May 30, Decoration Day, at bluerocks and Keystones. It was our intention to inaugurate live pigeon shooting at this date, but owing to the scarcity of birds and the difficulty in getting them in sufficient numbers, we are unable at present to announce any live bird programme. It is, however, our intention to give a good live pigeon shoot as soon as possible. Next Saturday, the 25th, being the fourth Saturday in the month, shooting will commence at 9:30 A. M. and continue all day. Any one who is interested in shooting is invited.—CHAS. RICHARDS, Pres.

The scores of May 18 were: Trophy match, at 25 Keystones, 25 cents entry:

Hathaway	1111111111010101010110100—18
Tatham	0000101001011110011011011—13
Collins	1001011111111111111111100 —21
Jersey	1111111011011010101111110—18
Winans	0010111110001110011110110—15
Pumphrey	1001100100111111111111111—19

Sweep No. 1, 50 cents entry, Keystone rules: Jersey 4, Pumphrey 6, Way 4, Collins 2, Richards 3, Tatham 4. Jersey second on shoot off.

Sweep No. 2, 25 cents entry: Richards 2, Way 2, Jersey 7, Pumphrey 7, Bolles 2, Tatham 6. First divided, Richards third on shoot off.

Sweep No. 3, same: Jersey 8, Winans 4, Pumphrey 8, Richards 4, Fox 3, Tatham 5, Way 0, Bolles 2. First and third div.

Sweep No. 4, same: Jersey 9, Pumphrey 9, Tatham 4, Rose 5, Winans 3, Richards 4, Collins 6, Hathaway 6. First and second div.

Sweep No. 5, same: Jersey 7, Pumphrey 9, Richards 6, Tatham 10, Collins 8, Rose 5, Way 5, Seeley 3, Winans 5.

Sweep No. 6, same: Tatham 9, Pumphrey 9, Collins 9, Jersey 9, Hathaway 8, Winans 5, Seeley 5. Jersey first on shoot off, third div.

CLASS AGAINST RIGGOTT.—On Saturday, June 1, Frank Class of Pine Brook, N. J., and John Riggott of Rockaway, N. J., will shoot a match at 50 live birds each under Hurlingham rules, with the exception of boundary, which will be 50yds. instead of 80, for $100 a side and the championship of New Jersey. The event is to take place on the base ball grounds at Dover, N. J., at 2 P. M. Sweepstake shooting before and after the match.

NEBRASKA ASSOCIATION.—The fifteenth annual tournament of the Nebraska State Sportsmen's Association is now in progress at Norfolk, Neb., having begun May 21 and to finish May 24.

AMERICAN ASSOCIATION TOURNAMENT.

Editor Forest and Stream:

Will you please publish that the trap-shooting rules, programmes of the Cincinnati tournament, registry blanks for memberships of clubs, and classification blanks can be had at the following business houses in the different sections of the country. I would like to add, that the shooters may thoroughly understand it, that any one intending to shoot at any tournament given by the association must first qualify by filling out a classification blank and mailing it to the association's office, receiving a card in return. The card should be of much advantage to any shooter holding one, as it will not only serve as an introduction, but it will get him properly placed at any shoot he may attend. Pennsylvania and Massachusetts now lead in the number of classifications sent in. J. M. TAYLOR, General Manager.

The following is the programme of the first tournament of the American Shooting Association, to be held at Cincinnati, June 11, 12, 13 and 14, on the grounds of the Old Avenue Base Ball Park, $1,350 cash in guaranteed purses.

Preliminary Shooting, Monday, June 10.—Match 1, 9 targets, free for all, entrance $2; match 2, 9 targets, free for all, entrance $2; match 3, 10 targets, free for all, entrance $3; match 4, 10 targets, free for all, entrance $3; match 5, 9 targets, open to classes B and C, entrance $2; match 6, 9 targets, open to class C, entrance $2. Sweepstake matches to suit to fill out the day.

Regular Programme, Tuesday, June 11.—Match 1, 9 targets, free for all, entrance $2; match 2, 9 targets, open to classes B and C, $2; match 3, 9 targets, open to class C, entrance $2; match 4, class A, 12 targets, open to classes B and C, $150 guaranteed, entrance $5; match 5, class B, 12 targets, open to class C, class A barred, $150 guaranteed, entrance $5; match 6, class C, 12 targets, classes A and B barred, $150 guaranteed, entrance $5; match 7, 10 targets, free for all, entrance $2; match 8, 10 targets, open to classes A and B, entrance $2; match 9, 10 targets, open to class C, entrance $2; match 10, 6 pairs targets, free for all, entrance $2.

Wednesday, June 12.—Match 1, 9 targets, free for all, entrance $2; match 2, 9 targets, open to classes B and C, entrance $2; match 3, 9 targets, open to Class C, entrance $2; match 4, class A, 12 targets, open to classes B and C, $150 guaranteed, entrance $5; match 5, class B, 12 targets, open to Class C, Class A barred, $150 guaranteed, entrance $5; match 6, Class C, 12 targets, Classes A and B barred, $150 guaranteed, entrance $5; match 7, 7 live birds, free for all, entrance $5; match 8, 9 targets, open to Classes B and C, entrance $2; match 9, 9 targets, open to Class C, entrance $2.

Thursday, June 13.—Match 1, 9 targets, free for all, entrance $2; match 2, 9 targets, open to Classes B and C, entrance $2; match 3, 9 targets, open to Class C, entrance $2; match 4, Class A, 12 targets, open to classes B and C, $150 guaranteed, entrance $5; match 5, Class B, 12 targets, open to Class C, Class A barred, $150 guaranteed, entrance $5; match 6, Class C, 12 targets, Classes A and B barred, $150 guaranteed, entrance $5; match 7, 7 live birds, free for all, entrance $5; match 8, 9 targets, open to Classes B and C, entrance $2; match 9, 9 targets, open to Class C, entrance $2.

Friday, June 14.—Match 1, 10 targets, free for all, entrance $2; match 2, 6 pairs targets, free for all, entrance $2; match 2, 10 targets, open to Classes B and C, entrance $2; match 4, 9 targets, open to Class C, entrance $2; match 5, grand free for all, 10 targets, each entry to shoot one match with every other entry; if 15 or more entries money divided 40, 30, 20 and 10 per cent; if under 15 entries divided 50, 30 and 20 per cent., first money to winner of most matches and so on, entrance $10. Sweepstake matches on targets and live birds will fill out the day. Shooting will be continued on Saturday, if desired.

NEW HAVEN, Conn., May 18.—The Elm City Gun Club held their regular shoot this afternoon with a fair attendance. The principal events being a team race of 30 birds between a team from Yale Gun Club and a team from Elm City Club, in which the Elm City came out victorious with a score of 159 in a possible 150, Yale's score being but 98, a very low one for them. We will hold a tournament Memorial Day, May 30, on our grounds, to which every one is cordially invited. Thirty-bird race between team from Yale College and teams from Elm City Gun Club, unknown angles:

	106		86

First event, 6 birds: Gould 5, Porter 5, Folsom 2, Graham 5, Rossitor 5, Ortseifer 5, Tyler 5, Pomeroy 1, Albee 5. Gould and Tyler first, Folsom second, Pomeroy third.

Second event, same as first: Gould 3, Porter 5, Folsom 5, Graham 4, Rossiter 5, Ortseifer 6, Tyler 4, Albee 6, Cooper 2. Ortseifer and Albee first, Porter second, Graham and Tyler third.

Third event, 3 singles and 3 pairs: Albee 6, Gould 9, Ortseifer 7, Tyler 5, Porter 7, Rossiter 7, Folsom 7. Rossiter first, Albee and Gould second, Tyler third.

Fourth event, 12 birds, both barrels: Albee 11, Gould 10, Folsom 11, Rossiter 11, Ortseifer 11, Tyler 11, Porter 10, Graham 10. Ortseifer, Rossiter and Tyler first, Gould and Graham second.

Fifth event, 7 straightaways: Ortseifer 6, Rossiter 7, Gould 7, Albee 7, Folsom 6, Tyler 5, Porter 7, Graham 5, Cooper 4, Dean 4, Pilkington 2, Widman 7. Rossiter, Porter and Widman first, Ortseifer and Folsom second, Graham and Tyler third.

Sixth event, 3 singles and 2 pairs: Widman 5, Ortseifer 2, Albee 5, Porter 4, Gould 6, Tyler 7, Folsom 4, Dean 7, Graham 6. Pilkington 4, Pike 5, Locke 4, Rockwell 2, Paddock 6, Morrison 4. Tyler and Dean first, Gould second, Widman, Albee and Pike third.

COLLEGE MARKSMEN.—All college teams of trap marksmen are invited to participate in the intercollegiate shooting tournament at Walnut Grove, Mass., under the auspices of the Harvard Gun Club. Prizes are to be given to the first, second and third teams, and a special prize for the best score. The shoot takes place Saturday, May 25, the same day as the intercollegiate athletic meeting at the Berkeley Oval. The principal colleges of the country have been asked to compete, and efforts will be made to organize an intercollegiate association. The Columbia College Club holds practice shoots Tuesdays and Fridays at the grounds of the Suburban Shooting Association, Claremont, N. J., and the team will probably be selected early this week.

ST. LOUIS, Mo., May 17.—Live bird match for $100 a side between J. H. Hagerty and J. L. Winston. The weather was most favorable and the birds were above an average lot. Winston shot well, whereas Hagerty did not do as well as many of his friends had hoped for. A decision of the referee on Hagerty's fourth bird caused him to "rattle" slightly and is mainly the cause of his poor showing. He had by far the worst of the birds, besides having a number of his birds which were hard hit drop dead just out of bounds. Hurlingham rules, modified to use 10-gauge guns:

J S Winston.....	2021120112211101211211011211212221111021011101 11111212021110221202121210221220211011111010110—84
J H Hagerty....	02o0s21202221202212201c210s11200001222020s2022111 00012122110122221102220222122021010110110000.1111211—69

o Dead out of bounds.

The initial medal shoot of the Excelsior Gun Club took place last Thursday afternoon. The birds were a strong lot, and several good scores were made. Medal shoot, 15 live birds, Hurlingham rules:

J H Hagerty	221211012121212—14	F Fink	001121210011121—11
J G Schaaf	011210212222212—13	T Rick	030220210212020— 9
Dr J G Parrish	211210116211022—12	F Frischer	221022220020010— 9
J Wilber	202221122221120—13	J Selzer	202021221211011—12
H Dick	200111212122211—12		

Hagerty first, medal; Dick second and Selzer third. Arrangements have been made with the St. Louis Gun Club, whereby the above club is to have the use of Compton Avenue Park every Wednesday and Saturday mornings for holding shoots.

WOODSIDE, N. Y., May 14.—North Side Gun Club of Long Island. Second average shoot. The fine weather brought out a good attendance of the members, so that Mr. Bonden who furnished the birds, ran short of them, and the match will have to be finished at the next regular shoot, June 11. Match at 7 live pigeons, 5 King's patent ground traps, handicap rise, 80yds. boundary, shot under club rules, 6 moneys:

Chevalier (25)	1101111—7	Wahlen (26)	1110011—5
Eberhardt (27)	1111111—7	Grau (25)	0100110—3
Manning (27)	0111111—6	Blanch (22)	1111111—7
Winhole (26)	1101111—6	Evers (23)	1000*—2
Barlow (26)	1111111—7	Hill (22)	101101*—4
Lyon (25)	1111010—5	Helmkeu (26)	101100*—3
Duryea (30)	1111113—6	Bohmde (24)	101101*—3
Chr Meyer (24)	0110001—3	Tapken (28)	101100*—3
Siems (26)	1111001—5	Terrett (25)	111****—3

*Short of birds.

WALNUT HILL, May 15.—In addition to the usual competition some strong shots from out of town appeared, among them Mr. Tinker, of Providence. The east wind was just strong enough to carry away the smoke without disturbing the flight of the birds. The newly adopted Keystone system of squad firing proved very satisfactory. Gold coin match, 15 clay birds and 15 Standard targets, 5 traps, Keystone squad system:

Perry	011111111111111—14		111111111111111—15—29
Stanton	111111111101111—14		111111111111110—14—28

Tinker	11111001100111101011—14		10101111111C001w.

The next shotgun meeting will be held May 29, when the regular series of matches will be continued.

JERSEYVILLE, Ills., May 14.—Only a few of the boys were out to compete for the medals this afternoon. Both the badges were shot for at singles, owing to a little dispute among the shooters. Usually one of the medals are shot for at doubles. Ten single American clays:

Tack	1110011101—7	Skelly	1000111111—7
Burleigh	1110111111—9	Hutchison	1101011111—8
Cadwallader	1111000101—6	Perrings	1111010111—8
Smith	1010110111—6		

Ten single American clays, gold medal:

Burleigh	1110111101—10	Perrings	1111110011101—10
Cadwallader	0010111111—9	Hutchison	1111111111111—12
Skelly	1000111101111— 8	Tack	1010000w.
Smith	0011111101111— 9		HAMMERLESS.

ST. PAUL, Minn., May 19.—Yesterday the St. Paul Gun Club had another good day for their weekly badge and sweepstake shooting, although it rained for a short time. It was cool, still and cloudy. The individual badge contes created great interest, the contestants being the best shots in the club, but as the score shows both were badly "rattled." Three times did they try before it was finally settled, and as each one paid $5 for each contest there was the respectable sum of $30 in the purse when the 75 birds each were shot at. Max has challenged Forbes for badge for next Saturday's contest. Among the visitors present yesterday was Mr. W. H. Fisk, of the Helena (Mont.) *Herald*, who is one of the best shots in that whole country, and who is here to take in the big tournament in Minneapolis this week. Mr. E. W. Stone, of Larimore, Dak., is here for the same purpose. Individual badge shoot, 15 single and 5 pairs Peorias, 18 and 15yds. rise, singles thrown wild and doubles from one set of traps. First contest:

Forbes	011110100110011	01 11 11 11 11—18
Pfister	111111000011101	11 11 11 10 10—18

Second contest:

Forbes	1101110111100001	10 10 11 10 11—16
Pfister	1100011100100111	10 11 11 10 10—16

Third contest:

Forbes	111111111011010	10 10 11 11 11—20
Pfister	010111101011001	11 10 00 10 11—15

First event, 10 single Peorias, 5 screened traps, 18yds., 3 prizes, all matches same conditions, entrance 50 cents: Max 5, Bennett 10, Stone 5, Fisk 9, Cummings 7, Pfister 8, Hamline 10, Chantler 10, Durant 8, Kennedy 8, Burk 6. Chantler first on shoot-off, Fisk second, Durant and Kennedy third.

Second event, 5 singles and 2 pairs: Max 6, Bennett, 9. Stone 8, Fisk 6, Cumings 4, Pfister 6, Chantler 5, Hamline 9, Durant 7, Kennedy 7, Burk 7, Forbes 9. Bennett and Hamline divide first after shoot off, Stone second and Burke third after shoot off.

Third event, 15 singles: Max 15, Bennett 12, Stone 13, Fiske 10, Cumings 10, Pfister 11, Hamline 15, Chantler 13, Durant 9, Kennedy 14, Burd 12, Kilby 12. Bennett and Hamline divide first, Kennedy second, Stone and Chantler fourth.

Club badge match, 10 singles and 5 pairs: Max 18, Bennett 15, Stone 18, Fisk 14, Cumings 17, Pfister 14, Hamlin 17, Chantler 13, Kennedy 12, Burk 17, Forbes 17, Kilby 13. Max and Stone divide first but shoot for the badge; Max wins badge. Hamline wins second after breaking 8 straight; Bennett third.

Fifth event, 10 singles: Max 6, Bennett 10, Stone 6, Fisk 7, Cumings 10, Pfister 10, Hamline 10, Chantler 9, Kennedy 8, Burke 9, Forbes 10, Kilby 7, Durant 7, Holt 9. Pfister first on shoot off, Burke second, Kennedy third.

Sixth event, 6 pairs, Chamberlin rules: Max 6, Bennett 9, Stone 8, Fisk 8, Cumings 10, Pfister 10, Hamline 11, Chantler 7, Kennedy 11, Burke 10, Holt 7. Ties divided.

Seventh event, 10 singles: Max 10, Bennett 10, Stone 9, Fisk 8, Cumings 6, Pfister 9, Hamline 9, Chantler 9, Kennedy 9, Burke 7, Holt 8. Max first on shoot off, Chantler second, Holt and Fisk third.

Eighth event, 10 singles: Max 8, Bennett 10, Stone 8, Fisk 8, Cumings 9, Pfister 10, Hamline 7, Chantler 9, Kennedy 9, Burke 8, Holt 8. Bennett first on shoot off, Chantler second, Stone third.

WILLIAMS.

NEW CASTLE, Pa., May 16.—The long talked of match between C. J. Glass, of New Castle, Pa., and Captain McClure, of Pittsburgh, at 25 live birds each, for a purse of $50, came off to-day on the West Side Shooting Grounds, New Castle, Pa. Glass used a 10lbs. 10-gauge Parker, and McClure a 9lbs 10-gauge L. C. Smith hammerless. A large crowd was present, and considerable money changed hands. The birds were a mixed lot, most of them being laggards, while a few got away from the traps in a style that tried the skill of the shooters. Glass lost the match in the start by missing 3 [illegible] can do much better shooting, and his backers [illegible] Green again in a match at $50 a side.

Glass	1011011011101— 8	Green	1111111111111—15
McClure	1100111111101— 9	Wendort	1111111111111—15
Glass	1111011111110—10	Coggswell	1111011010111101—13
McClure	1111111100101— 9	Valentine	1111001111101110—16
Glass	1101011111001— 8	Dayton	Alexander, of New
McClure	1111111101011—10	Nichols	
Glass	1111111111111—15	Morgan	

CLASS AGAINST JONES.—On Tuesday, the 21st inst., a match at 50 live birds each was shot at Erb's Park, Newark, between Frank Class, of Pine Brook, N. J., and Capt. Jones, of Jersey City. The race was for $50 a side and the championship of New Jersey, and was shot under strict Hurlingham rules. The men went to the score at a rather early hour, 1 P. M., and at that time but few spectators were present. Among those few we noticed Chas. Van Camp, C. Turford, Mahlon Fox and E. Updegrove, of Trenton, N. J., who, not having had shooting enough at their home tournament, had come on here to participate in the open sweeps which it was announced would take place in addition to the match. These events did not come off, however, owing to the scarcity of birds, of which there were barely enough necessary to decide the title of "champion." The few birds that were secured were only an average lot, and in justice to Capt. Jones it is but fair to say that he received the worst ones. Whether a reversal of luck in birds would have made any difference in the score it is impossible to say, but Class was shooting in good form, as the score, 46 to 42, shows. The Captain says he is going to have another go with the champion before long, when he will try to change the result. Along toward 2 o'clock the shooters commenced to come in one by one with guns and shells for an afternoon's sport at the traps, and great was their disgust when they found the birds were gone. The score, indicating birds lost and kills with second barrel was as follows. Class's best run was 23 and Jones's 17.

Match at 50 birds, Hurlingham rules, for $50 a side and the championship of New Jersey; Mahlon Fox, referee; John Riggott, scorer:

Frank Class (30yds.)	2011011112111211211221121 11022211021112222122111112—46
Capt. Jones (30yds.)	0101111111220102011111110 20122111212111121201111—42

ALTOONA, Pa., May 16.—Mr. Chas. L. Dick, of Johnstown, Pa., visited Altoona, Pa., to-day to shoot a match with Dr. Thornton, of Allentown. Two matches were shot and ended in a victory for Johnstown. The contest was for $100 a side, Hurlingham rules. In the first match 12-gauge guns were used, and in the second 10-gauge, 90yds. rise and 80yds. boundary, 5 traps. The contest lasted 2 hours and 15 minutes. G. G. Zeth was the referee and Frank Copely and J. M. Dodson acted as judges. One of Thornton's pigeons fell dead on the outside of the boundary. Neither of the contestants did any remarkable shooting. In the first match Thornton shot 6 birds with the second barrel and Dick shot 5, while in the second Thornton shot 4, and Dick 2 with the second barrel.

First Match.

Thornton	0020111102011122000211 2—17
Dick	1221211200111110001120111—19

Second Match.

Thornton	1110120102012011—11
Dick	1112210111111111101—15

EAST BUFFALO, May 14.—Friendly shoot at Murphy's Park, West Seneca, between members of the Independent Gun Club, of this city. The score, 10 Peorias, for a valuable smoking set, donated by Vice-President M. Duggan:

F D Kinney	1111111111—10	Capt T Fletcher	1100011111—7
J Murphy	0111111111— 9	J Duggan	1100111011—7
J Parker	1101111110— 8	J Hubbers	0110101011—6
W Elliott	1111110119— 8	L C Tripp	0111011010—6
M Wasson	0111111110— 8		

Prize awarded to Kinney. Messrs. Murphy and Parker being tie in having won the club's medal the same number of times, concluded to see who the champion was. It resulted in a victory for Mr. Parker by the following score at 15 Peorias:

Parker	111111011011111—13
Murphy	011111101011111—12

A few sweeps were then shot and every one was satisfied with his record, particularly Mr. Elliott, who missed but one bird out of 18 shot at.—K. D. F.

BROOKLYN, May 13.—The Coney Island Rod and Gun Club held its annual business meeting and election of officers at the club rooms, 155 Lawrence street, to-night. Mr. H. McLaughlin presided, and the secretary, Mr. G. L. Ayres, recorded. The secretary's report showed that there were 94 active and 7 honorary members. The club held twelve regular shoots and three special contests at Woodlawn Park, Gravesend, L. I. The Blattmacher medal is the most desirable prize contested for at the regular monthly shoots. It was won by a New York member, F. W. Quimby, who made the highest scores in July, November, December and January. The other eight monthly shoots were won by C. S. Kimball in May; Justus von Lengerke, June; C. Plate, August; C. Dotlefsen, the little Jumbo of the club, September and October; P. Ward, February; E. Magnus, March and April. Besides the Blattmacher medal, thirty-six club and twety-six individual prizes were shot for. The three special shoots were a club team match, a team match with the Glenmore Rod and Gun Club, won by the Coney Island Club with 7 birds, and the return match, which resulted in a draw. The two fishing prizes, a rod for the heaviest bass and a reel for the heaviest weakfish caught in Gravesend waters, were won by Post Van Pelt. The treasurer's report showed the club to be in good financial condition, with a surplus on hand. The Woodlawn Park Shooting Ground will be retained for another year, and H. Blattmacher will again supply the birds. The following officers were elected: H. McLaughlin, Pres.; P. Kerrigan, Vice-Pres.; John Schliemann, Treas.; G. L. Ayres, Sec.; Robert Furey and Post Van Pelt, Trustees. The handicap committee consists of Messrs. H. Blattmacher, C. Plate and F. Lanser. The club will shoot under its old rules, giving one yard penalty for every winner.

WATSON'S PARK, Ill., May 17.—Cumberland Club of Chicago, match at live birds, 5 each, 5 traps, 30yds. rise, 80yds. bound, Illinois State rules, entrance $2: Farmer 5, Hutchinson 5, Stevens 2, Shepard 4, Hanson 4, Hoffman 5, Thompson 4, Mussey 5, Lowe 5, Abe Kleinman 5, Norton 4, Griffin 4, Gaumon 5. Ties on first, miss and out: Farmer 0, Hutchinson 4, Hoffman 5, Mussey 7, Lowe 7, Kleinman 6, Gammon 4. Ties on second, miss and out: Hanson 5, Thompson 4, Norton 4, Griffin 0. Stevens wins third.

Match at live pigeons, 10 each, 5 traps, 30yds. rise, 80yds. bound, Illinois State rules: Farmer 8, Hutchinson 8, Hoffman 7, Gammon 8, Griffin 6, Stevens 5, Hanson 7, Shepard 8, Lowe 10, Mussey 10, Thompson 8, Abe Kleinman 10.

May 18.—Lake Country Club of Chicago. Match at 5 live pigeons, 5 traps, 30yds. rise, 80yds. boundary, shot under Illinois State rules, entrance $1.75: Bond 3, Cowe 5, Weis 4, Kochler 4, Lewis 3, Edbrook 5, Smith 4, Reed 4. Edbrook first, second and third div.

Match at 10 live pigeons, 5 traps, 30yds. rise, 80yds. boundary, shot under Illinois State rules, entrance $3.50: Bond 8, Cowe 7, Weis 5, Koehler 6, Lewis 5, Edbrook 9, Smith 6.

Match at 10 live pigeons, 5 traps, 30yds. rise, 80yds. boundary, shot under Illinois State rules, first and second medal prizes: A. Bond 7, C. Cave 10, A. Weis 8, Koehler 7, Nick Lewis 8, A. L Smith 8, Edbrook 7. C. Cave wins first medal.—RAVELRIGG.

DEATH OF FRANK TRUAX.—Albany, N. Y., May 19.—Francis H. Truax, the finest wing-shot, with the exception of Captain Bogardus, that Albany county ever produced, died at his residence in this city on Thursday last. Frank, as he was best known by his acquaintances, was a famous covert shooter, and few men in this region have killed more game than he during a life that had nearly reached the allotted three score and ten. Besides his ability as a skillful covert shot, he was a pigeon shooter of considerable local renown, and was a familiar figure at the New York State tournaments many years ago. In 1875 Truax attracted the attention of Parker Brothers of West Meriden, Conn., who appointed him their agent, and it was through his influence, more than any other, that the Parker gun became a prime favorite in this section. The cause of Truax's death was consumption, which has been his insidious and constant enemy for many years; and it was only his out-of-door life, supplemented by a strong will, that so long delayed the fatal summons. Truax's rich and varied experiences in shooting wild game, and his perfect knowledge of the breechloading shotgun made his companionship and advice much sought for by the younger generation of sportsmen. But by the "old sports" as well he was held in high esteem, and the sporting fraternity, generally, will sincerely regret his death.—H. B. DERBY.

NORWICH, Conn.—The Norwich Shooting Club, of Norwich, Conn., will hold a two days' tournament, Tuesday and Wednesday May 28 and 29. Events are open to all, with cash prize of $50 guaranteed each day. Mr. H. A. Penrose, of the Keystone Manufacturing Company will have full management of the traps and targets, which is considered by the club officers a sufficient guarantee to all shooters that the birds will be thrown in the best possible manner, with unprecedented rapidity, and all decisions made promptly and fairly, without distinction of person. This tournament is gotten up in order to satisfy the very urgent requests of many of the shooters who participated in our April shoot, and also to try and make amends for the foul weather we were favored with at that time. The management will use every endeavor in their power to make this the grand shoot of New England for 1889; and the comfort and enjoyment of all the participants will be specially cared for.—E. N. YERRINGTON, Pres.

Every week we are obliged to defer to the next week trap scores which come in too late for publication in the current issue. It is particularly requested that scores be sent us as early as possible.

WELLINGTON, Mass., May 18.—There was a fair attendance at the grounds of the Wellington Club to-day. The following scores were made in the merchandise match: Snow first with 15, Schaefer and Bradstreet second with 14, Perry and Bond third with 13, Dill, Baxter and Allerton fourth with 12, Stanton and Melcher fifth with 11, Webster, Warren, White, Chase and Sanborn sixth with 10. Perry and Lee tied with 14 each out of 15 and Lee won in the shoot off. The winners in the sweepstake matches were: Five clay-pigeons, Melcher and Schaefer; 5 clay-pigeons, Schaefer; 5 clay-pigeons, Smith; 5 clay-pigeons, Schaefer; 5 clay-pigeons, Schaefer; 6 bluerocks, Dill and Schaefer; 5 clay-pigeons, Everett, Baxter, Stanton and Snow; 8 clay-pigeons, Bond, Wood, Perry and Chase; 6 bluerocks, Schaefer and Short; 7 bluerocks, Stanton, Wood, Perry and Robinson; 6 clay-pigeons, Schaefer, Perry, Melcher and Field; 5 clay-pigeons, Perry, Chapin and Snow; 6 bluerocks, Stanton, Bradstreet and Schaefer.

LANSING ROD AND GUN CLUB.—Lansing, Mich., May 17.—I hand you below list of officers of the Lansing Rod and Gun Club, recently organized: Pres., E. W. Sparrow; Vice-Pres., Charles J. Davis; Sec., W. J. Raines; Treas., Jason E. Nichols; Directors, S. L. Smith; A. H. Whitehead, E. . Cooley; Captain, Launt Thompson; Lieutenant, Jason E. Nichols. The club has a membership of forty-five, meets every Wednesday at 4 o'clock, and uses five standard traps.—W. J. RAINEY, Secretary.

NEWARK, N. J., May 16.—A 10-bird match for $50 a side was shot at John Erb's on Thursday afternoon between Henry Burgesser and William Erb. The latter killed 8 and Burgesser killed 7. A 50-bird match was then made for $100 a side, between John and William Erb on one side and Henry Burgesser and James E. Wheaton on the other, to be shot on Erb's ground on Wednesday, May 22.

MATAWAN, May 18.—The May shoot of the Midway Shooting Association took place to-day. The first prize was won by Chas. Muirhead, who killed 8 straight. William Perrin won second prize by killing 19 out of 20, and Dr. Edward F. Tayler secured third prize by killing 5 out of 7. James Glynn and Frank Worrell shot a match at 4 birds, Glenn killing 2 and Worrell 1.

ST. LOUIS, Mo., May 18.—Riverside Gun Club medal shoot, 20 Peoria blackbirds thrown from 3 traps, American Association rules governed: Hospos 13, Maune 14, Seltzer 13, Kling 15, Pohlman 14, Eikhoff 14, Haggarty 18, Rosier 11, Grassom 13, Pancok 12, Schomburg 11, Hildebrand 12, Milflel 12, Bright 16, Langenbacher 16, Meusch 18, Horstmanshoff 13. Meusch first medal on shoot-off; Langenbacher second medal.—UNSER FRITZ.

BUDD vs. KLEINZ.—The date of the live pigeon shoot between J. Frank Kleinz, champion of Pennsylvania, and C. W. Budd, champion of America, has been changed to Monday, June 10.

Canoeing.

Secretaries of canoe clubs are requested to send to FOREST AND STREAM their addresses, with name, membership, signal, etc., of their clubs, and also notices in advance of meetings and races, and report of the same. Canoeists and all interested in canoeing are requested to forward to FOREST AND STREAM their addresses, with logs of cruises, maps, and information concerning their local waters, drawings or descriptions of boats and fittings, and all items relating to the sport.

AMERICAN CANOE ASSOCIATION.

PASSAIC RIVER DECORATION DAY CRUISE.—Canoeists on the Passaic are actively engaged in making preparations for the spring cruise around Staten Island, which promises to be more successful than anything yet attempted. As the early spring meets on the Hudson are no longer held it is thought that many of the New York, Brooklyn and Hudson River canoeists, as well as those from Red Bank and vicinity, will be able to join the cruise at some point, and all go in camp on May 30 at or near Cheesequake Creek opposite Amboy. In '87, it will be remembered, the Passaic canoeists held a very successful meet at Dundee Lake. Last year large numbers were in camp Fourth of July week on the shores of Newark Bay, and this year, with the desire of inducing all canoeists to join with them, the Staten Island cruise has been chosen. The Passaic canoeists will go in camp on Newark Bay on the night of May 29, and leave camp on the first of the ebb tide, about 9 o'clock the following morning (Decoration Day), putting in at Perth Amboy about 2 P. M. for dinner, after which a few races may be held. Friday and Saturday morning will be spent cruising about the Lower Bay, and the run up to New York will be made on the Saturday afternoon flood tide, the return to the Passaic or up the Hudson being made the following day. Those who cannot leave business on Friday and Saturday morning will not be prevented from joining the cruise, as they can return by train from Amboy on Thursday evening or Friday morning, and by taking the Saturday noon train from New York overtake the main body during the afternoon, and all make the run together with the tide to New York. Mr. Irving V. Dorland, Arlington C., is chairman of the Passaic Committee, and Mr. Richard Hobart, Ianthe C. C., 59 Halsey street, Newark, N. J., secretary. Members of other clubs about New York and on the Hudson River are invited to join the cruise, and will receive a cordial welcome.

OWANUX CANOE ASSOCIATION.—At a meeting held in Bridgeport, Conn., on May 14, the Owanux Canoe Association was organized. The object of the association is to unite the canoeists of Long Island Sound and adjacent waters. The association starts off with nineteen charter members, two of them being A. C. A. men. The officers are: Commodore, Jos. H. Rowland, Bridgeport; Vice-Commodore, H. L. Oriers, Bridgeport; Secretary-Treasurer, Chas. T. Gilbert, Derby. The boats are in two classes, class B corresponding to classes A and B, A. C. A., class C outside these limits but under 20ft. All boats must be canoe-shaped. The Association will hold a meet, probably at Woodmont, on Aug. 5 to 10.—C. H. GILBERT, Sec'y O. C. A. (Derby, Conn., May 15.

A. C. A. MEMBERSHIP.—Eastern Division—Fred P. Campbell, Olcott, Vt.; D. E. Miller, C. O. Buttrick, E. C. Sackett and W. C. Billings, Springfield, Mass. Central Division—H. D. McVean, Rochester, N. Y. Atlantic Division—Percy F. Hogan, Brooklyn, N. Y. Northern Division—J. Wilton Morse, W. Armour, and R. C. Matheson, Toronto.

A. C. A. MEET.—On May 16-17 a party, including Com. H. C. Rogers, Col. J. Z. Rogers and Messrs. R. M. Dennistown, G. W. Hatton and E. B. Edwards, of Peterboro, and Messrs. J. G. Edwards, R. Hopkins, T. B. Dean and E. Pitt, of Lindsay, visited the St. Lawrence and decided to locate the camp on Stave Island instead of Sugar Island, as at first proposed. Arrangements for the store, mess tent, etc., were made. The vote of the committee on the question of standing sails and sliding seats was not favorable to a change, and the rules will remain as they are this year.

IANTHE C. C.—At the annual meeting of the Ianthe C. C., held May 6, the following officers were elected: Captain, Lincoln B. Palmer; Mate, Wm. J. Stewart; Purser, Wm. P. Dodge, 37 Burnet street, Newark, N. J.; Executive Committee—Officers *ex-officio*, Geo. W. Baxter and Barron Fredericks; Regatta Committee—Geo. P. Duglass, chairman; Richard Hobart and Barron Fredericks; House Committee—Geo. E. Comyns, chairman; Geo. W. Baxter and Jos. Stewart.

BROOKLYN C. C.—The first race for the Brooklyn C. C. challenge cup was sailed on May 18, Mr. M. V. Brokaw winning in his new Ruggles canoe Brooklyn, with Mr. Percy Hogan in the Wind, second. The spring regatta will be held on June 15.

LORD DUNRAVEN AND THE DEED OF GIFT.

AS will be seen from the letters published elsewhere, the difficulties in the way of an international race appear to be entirely removed so far as the Earl of Dunraven is concerned. That gentleman accepts the conditions of the New York Y. C., making one or two minor suggestions, and mentioning the name of Gen. Paine as a referee. So far all is satisfactory to the New York Y. C., but there still remaines the Royal Yacht Squadron, in whose name the challenge comes, to be heard from, and no one can say now what the result may be. From what is thus far known it appears that the R. Y. S. is at last fully aware of the terms on which the challenge will be received, and that it is very much opposed to accepting them. At the meeting on May 11 a committee, including the commodore, the Prince of Wales, and the vice-commodore, the Marquis of Ormonde, was appointed to consider the matter.

Unlike all previous challenges, the present one involves two independent issues; the most important, in every way, being the propriety of challenging at all under the terms on which the Cup must be held in the future. The second issue, the arrangement of courses, number of races, etc., is merely a part of the regular routine in every case, and of itself would probably be arranged in a manner fairly satisfactory to the challenger by a little correspondence; in fact it has practically been thus arranged already. As every one at all conversant with international yachting knows, the main question involved is a most serious one, and must take precedence of all other matters. After the last race the terms on which the Cup was held, which had already been once altered in the past, were materially changed, in a manner at variance with both the letter and the spirit of the written document drawn up by the owners and donors of the Cup. This change was made hurriedly by a few men in the face of a challenge practically in hand, which challenge was thereby excluded. Apart from the manner in which the deed was altered, the new terms themselves were such as to provoke general and hostile criticism among yachtsmen at home as well as abroad, as being unfair, illiberal and unsportsmanlike. It being evident after a year that no foreign club was desirous of challenging under such terms, the following resolution was passed by the New York Y. C. on May 17, 1888:

Whereas, The secretary of this club has received letters dated Nov. 26, 1887, from the Royal London Y. C., and from the Yacht Racing Association, representing the principal yacht clubs of Europe, and dated Feb. 22, 1888, regretting that the terms of the new deed of gift of the America Cup presented by Geo. L. Schuyler, and dated Oct. 28, 1887, are such that foreign vessels are unable to challenge; and,

Whereas, In this deed of gift, by which the Cup is now held by this club, any mutual agreement may be made between the challenged and the challenging party; therefore,

Resolved, That the terms under which the races between the Genesta and Puritan, Galatea and Mayflower and Thistle and Volunteer were sailed are satisfactory to this club and a challenge under these terms would be accepted, but with the positive understanding that if the Cup is won by the club challenging it shall be held under and subject to the full terms of the new deed, dated Oct. 28, 1887, inasmuch as this club believes it to be in the interest of all parties, and the terms of which are distinct, fair and sportsmanlike.

As we pointed out at the time, this offer in no way affected the merits of the case, or disposed of the charge of unfairness; it simply proposed to leave the decision to chance, with the odds very materially in favor of the New York Y. C., as after Thistle's failure there was little prospect of the success of a new challenger.

With such an important matter as the whole future of the Cup at stake, and in view of the general condemnation of the new deed by British yachtsmen, it would seem that no one with any spirit or national pride would accept such terms and compromise the chances of his fellow yachtsmen in all future competitions, but from Lord Dunraven's letter it appears that this is precisely what he has done and persists in doing, in spite of the club in whose name he challenges. His statement of the case in his letter to Secretary Oddie is entirely erroneous; if the New York Y.C. retains the Cup it will by no means be in the same position as now, but in a far better one, while British yachtsmen will be placed, by their rash representative, in a very bad position for obtaining fair terms in future races. The terms of the deal under which Lord Dunraven offers his challenge are that, if he wins, the cup shall be held under the new deed, while if he loses British yachtsmen withdraw all the objections they have made to the obnoxious document and accept its terms to govern all future races, practically giving the present holders a perpetual mortgage on the Cup. Whether or no Lord Dunraven and the R. Y. S. understood the matter in this way, it is certain that Com. Gerry and his associates do, and that this race, if sailed, will be a test case, deciding on what terms the Cup shall be held until the New York Y. C. finds it desirable to alter them again. The present position of the New York Y. C. is that it has been, for the first time in four years, without a challenge, and under serious imputations of unfair dealing, and barring Lord Dunraven's kindly help, it is likely to stay in the same position for some time. After it has given him the coveted five races, however, it will be in a very different position, still holding the Cup, but with its action indorsed by the highest authority. As for the contingency of the shoe being on the other foot and the Cup going abroad, it is, all things considered, too remote to be seriously entertained for a moment.

The questions in dispute are well within the grasp of any intelligent yachtsman aided by a little legal advice. Has the New York Y. C. any right, as a trustee, to change the conditions of a trust, especially without the consent of all the donors, or of the heirs of those deceased? This question has been submitted in the past to high legal authorities, and has been decided in the negative. Com. Gerry knows that the action of the club in 1882 and 1887 would not stand in law, and Lord Dunraven's legal adviser will probably tell him the same thing. Even if such a change were lawful, it needs but a slight familiarity with yachting usage to see that the terms of the last deed are entirely one-sided and in favor of the holder, while at the same time they are absurd, impracticable, and designed to hinder and not encourage international competition of a friendly character. After reading Lord Dunraven's letters we are inclined to agree with him that he is not competent to discuss such important matters, but it seems clear that if this is the case he should not imperil recklessly the rights of his fellow yachtsmen who may some day desire to [illegible] challenge. A great deal was said on the other side about the [illegible] of Lieut. Henn to represent British yachtsmen with Galatea [illegible] PAUL, but in this case there was absolutely no principle at stake, TREAT[illegible]ce stood alone, with no influence on the conditions of future [illegible]he head. As a matter of fact, Lieut. Henn, through his conduct Lisle, Reid more to promote a friendly feeling on the part of Ameri- [illegible] N. Y. [illegible] fachtsmen than any one else has ever done, and in spite of Royal R[illegible]reats the old "tin frigate" was liked and respected by all. Ruby—[illegible]ttempt such as his, which was at least bold and sportsman- What [illegible]owever ill-judged, was repudiated by British yachtsmen, puppy R[illegible] be strange if they sympathize with the present wild and would less venture.

[illegible] mistake, [illegible]l previous instances the challengers have been fairly confined [illegible]n success, and with some show of reason, but looking at ter as [illegible]rie's chances we can see no possible grounds for predicting wish is [illegible]ory for her. In the first place, taking the most favorable T. Z., should she be met with a boat in her class, there is very sand we prospect that she could outsail the victor of the summer's found[illegible]ng. Leaving out the question of superiority of model, which the best rest on a very small margin when such craft as Katrina blood Titania are concerned, Valkyrie is a new boat, she will be *Titania* in a few races at home with craft of various sizes, but none [illegible] quite her own length, and then she will be stripped for a long [illegible]ea voyage, being rigged again at its end with a new and larger [illegible]rig, in all probability, than she has carried at home. After a few weeks of trial she will be called on to meet a yacht fully as large and powerful, designed, not to cross the Atlantic but to win races off Sandy Hook, and in perfect trim after a season of hard and constant racing with others nearly as good of her own size. Under such conditions the advantages must all be on the side of the home craft, and it is not necessary that the challenger shall be inferior in model, equipment or handling, in order that she shall be easily beaten. In spite, however, of the reiterated declarations that Volunteer is not yet chosen, and that the trial races are open to the 70ft. class, every one knows that it is a foregone conclusion that the big boat will be selected, and that she must win. Of course there is always a stray possibility that may turn up; Valkyrie may make such a poor showing at home, and on the other hand Katrina, Shamrock or Titania may show up so much above the rest here that the committee may feel perfectly safe in selecting a 70-footer; while at the same time Valkyrie may be faster than seems probable, and be able to win.

Again, it is certain that Gen. Paine will not race Volunteer, and should she fall into the hands of a syndicate, or should the New York Y. C. buy or borrow her and put her in the hands of a committee of experts, she may be made to go so slowly that Valkyrie can beat her. In the case of Genesta, Galatea and Thistle, there have been some grounds for the belief that each was as fast or faster than her adversary, but with far better grounds for comparison than in the past we fail to see that Valkyrie has the least chance of saving her time from Volunteer, or that she is by any means likely to beat a 70-footer, should she be so fortunate as to have one opposed to her. It may be that Lord Dunraven has been misled, as experts have been before, by a comparison of home boats, that he finds grounds in the performance of Yarana against Irex for supposing that Valkyrie can defeat Volunteer, but if such is the case he is likely to be greatly disappointed. All the circumstances of the case would indicate that he has rushed blindly into a mad venture, and that all he desires is the notoriety of a race for the Cup. The question of winning it, or of the injury which he does to British yachtsmen, seems to concern him but little. He boldly handles the questions of the size of flags on the turning buoys, and the method of starting the races, but declines to consider the great and important issues dependent on his challenge, dodging them with the remark that he is not competent to discuss them. If the Royal Yacht Squadron, as well as the Yacht Racing Association and the great body of British yachtsmen, are content to be represented in this way there is nothing more to be said, but the friends of fair sailing and yacht racing of all kinds have good reason to regret that such a trophy as the America's Cup was intended by its owners to become, must be lost or won in such a manner.

KATHLEEN.

THE present interest in the smaller classes about New York is apt to result in the formation of a strong and numerous class of 30-footers, a size that is in many respects a desirable one to encourage in the connection with the present 40ft. class. Without entering into a discussion as to the exact merits and defects of each size, 30, 35, 40 and 46, the fact must be recognized that the 40ft. class is now more firmly established than any class has been in the past; and such being the case, the 30ft. class is a more desirable size than 35ft., as long as boats are not called for. It has been urged that 40ft. gives better accommodations in proportion to cost than 40; and similarly that while building a 30-footer a man might as well take 5ft. more length; but until there are men enough interested to keep at least half a dozen boats in each class, the interests of the sport will be best served by encouraging each alternate class, or 30, 40 and 53ft. When good racing is permanently established in these, it will be time to think of the 35 and 46ft. classes.

Though there are a number of yachts of about 30ft. l.w.l. in the New York clubs, many of them are too large, and others too small for the 30ft. class, and there are only one or two boats that are good enough to race and of the proper size. This season, however, will see two modern boats added to the New York fleet, while the spring races will be enlivened by a visit from three of the Boston cracks, Seracen, Marguerite and Rosalind. Of the new boats one, the Tom Boy, a Burgess craft, owned by Mr. Archibald Rogers of the Bedouin, has already been described in the FOREST AND STREAM. Her home has been at Hyde Park, well up the Hudson, but her owner is identified with the leading New York clubs, and is likely to enter her in all races.

The other, the new Kathleen, made her trial trip early last week, showing very promising indications of speed. She was designed by Mr. Wm. Gardner for Mr. William Whitlock, owner of the cutter Merlin, and famous among canoe sailors as a plucky and persistent racer. Mr. Gardner is an American, a graduate of Cornell, who spent several years after his graduation in a thorough course of study under the leading British instructors, and who has lately settled in New York as a designer. This year for the first time his work will be brought in competition with that of other designers in both the 30 and 40ft classes, as in addition to the Kathleen he has a still more ambitious effort afloat in the 40ft. class in the new Liris.

The Kathleen was designed for cruising and racing, as her owner will live on board much of the time, besides entering her in the regular regattas. In order to secure the greatest possible amount of room a large displacement has been taken, but at the same time it has been so disposed of as to give a very fair form. The length on deck is 42ft., l.w.l. 30ft., beam 10ft. 6in., and draft 7ft. The boat is of the modern type, clipper stem, very long counter, moderate rake to sternpost, with greatest draft near heel of post, and reduced forefoot. In both of Mr. Gardner's boats the keel rises sharply from its deepest point until just below the water, where the stem meets it at an obtuse angle, instead of curving into it with a sweep. The midship section is similar to the new keel forties, a continuous curve from bottom of keel to plank sheer, with an easy bilge just below the water. The keel is 12in. wide on bottom, a marked difference from the latest ideas of Mr. Burgess, who has but a 5in. keel in the 40ft. Tomahawk. The construction has been very carefully planned in order to secure a light hull, and as a result the keel is very heavy.

The oak keel and stem are shaped so as to leave the least possible amount of deadwood, the stem in particular being a very neat piece of work. The frame has occasioned much comment through the small size of some of its parts, but there seems no reason to apprehend that the boat will be weaker than others of her class. The main timbers are of sawn oak, double, sided 1¾, molded 2½ to 1½, and spaced 30ft. centers. The sawn forward timbers are single, spaced 9in. Midway between each pair of sawn frames is a steamed oak frame 1¾×1½, while the remaining intervals are again divided by other steamed frames 1¼×1¼in. The planking is fastened to the double sawn frames by galvanized nails, but on all the bent frames it is copper riveted. Thus there is a frame every 9in. for the length of the boat, giving thorough support to the planking, while the sawn frames and larger bent timbers, each with an iron floor knee, make a very strong skeleton. The keel bolts set up on an inner keelson of oak. The clamp is of yellow pine, 6×1¼in., with a bilge clamp 4×1¼in. Both of these run the entire length and are well fastened, but the addition of a second bilge clamp and a shelf running the full length would have been an improvement. The deck frame, of yellow pine, with beams 2½×2½, is braced diagonally in the wake of the mast. The deck is very light, being only ⅞in. total thickness, and is double; an inner skin of ⅜in. cedar, and an upper one of ⅛in. white pine, laid in white lead, the two layers being further fastened by small brass screws between the beams, put in from below. This makes a strong and light deck, the only question being whether it is quite thick enough. The planking is of 1in. cedar, with oak garboards and braces. The plank sheer is of oak, 5×1¼, and the bulwark is of pine, solid, with a neat oak rail. The height is about 6in., tapering to nothing at the taffrail. The coamings and deck fittings are of mahogany. The partner beams are fitted with heavy iron bracket knees, with other knees for the runners, while the strain of the chain plates is distributed by an iron strap across four frames. There are no channels.

The accommodations below are better than those of many boats of much greater length. The companion leads into the after end of the main cabin, in which are two comfortable sofa berths, the cushioned backs being fitted to be shifted so as to form a double when used as a bed. The joiner work of both cabins is in oak, varnished pine, the effect being very pleasing. There are lockers, drawers, and racks overhead in the main cabin. The after cabin has two fixed berths, with dressing table, etc., and though the floor space is limited, the room is very comfortably arranged. A large skylight topped skylight gives ample headroom. There is not quite standing room for an ordinary man under the deck in the main cabin, but under the skylight there is plenty of headroom. The forecastle is large and has very good headroom for a 30ft. craft, more than many centerboard sloops of 45ft. could show. It has two hammock berths, ice chest, pantry and naphtha stove.

The sail plan is large, the mast being 30ft., deck to hound, and the spars are hollow, being made on the "cheese sandwich" plan. The jib halliards and outhaul are of flexible wire rope. The bowsprit is 29ft. extreme length, fitted to house, with legs in the bobstay and shrouds. A pump-brake windlass, by the American Ship Windlass Co., is fitted to the butts. The boat is one of the handsomest of the fleet, with white topsides, graceful clipper stem and a specially long and well moulded counter. The tails of both the 30 and 40 are distinctively different from any other American craft, being longer and finer at the end, and in connection with a rather quick sheer aft they will serve to identify Mr. Gardner's handiwork as far off as it can be seen. The yacht was built by Mr. Samuel Ayres, at his Bay Ridge yard, and though the construction is not so expensive and elaborate as the sister ship, Liris, it will compare favorably with its class of work anywhere. The sails were made by Mr. Wilson, of Port Jefferson.

TOMAHAWK.

THE new Tomahawk, designed for Mr. E. D. Morgan by Mr. Burgess, and launched at Piepgrass's yard on May 17, is in some respects one of the most notable of the new craft, as she is not only different in model, but her hull is of steel instead of wood, making her the smallest steel yacht yet built on this side of the Atlantic. She is both narrower and deeper than most of her class, being 12ft. wide by 10ft. draft, the loadline of course being just under 40ft. She has the fashionable amount of overhang at each end, being about 56ft. over all. In this boat Mr. Burgess has gone to an extreme in the way of a deep, narrow keel, the breadth on bottom being but 5in. The midship section is a fair and easy S curve from the bottom of the keel to the rail, with an easy bilge and a strong hollow to the floor. The sheer plan shows a sternpost raking about 35 degrees, from the heel of which the keel curves forward, making the greatest draft several feet forward of the post, then it rounds up into the clipper stem. Taking together the clipper stem, deep keel, rudder and counter, the outline in a general way approaches a segment of a circle, or half a barrel head. As in most of the Burgess boats the sheer is more or less a circular sweep, and quite different from the Watson and Gardner craft. The construction of the boat is very simple, the keel being a flat bar 5in. wide and 2in. deep, tapering into the siding of stem and sternpost and running out to the extreme point of the stem. The frames are of steel angles, each single and in one piece from keel to deck, being 1¾×1¾×⅛in., spaced 20in. The steel plating is of No. 8 and No. 10 gauge, with ½in. rivets spaced 5in. The garboards lie flat against the sides of the keel and are fastened by long rivets passing through it. The heads of the frames are not connected directly to the keel, but on each pair there is a floor plate of of ¼in. steel, 8½in. deep. The beams for the cabin floor are of the same size as the frames, with gusset plates where they join the latter, while at the end of each frame a similar gusset plate unites it to the deck beam. The deck is of 1½×1½in. white pine, fasted by screws from beneath. The rudder trunk is a steel tube fastened by bands to the head of the sternpost. The fittings below are simple and of light wood, pine and cherry. A wide combination skylight and companion gives light as well as access to the main cabin, which is amidships, with a good after cabin in addition. Above the sofas in the main cabin are folding berths, while forward is a toilet room. There is ample headroom for the entire length of the boat, and the steel construction gives a great deal of internal space everywhere. The deck is fitted with a long steering well, just forward of which is a coaming, shaped like a horseshoe, on which the cleats for the headsail sheets are fastened, the coils of the lines being kept inside the coaming, out of the way on deck. The yacht steers with a tiller and is fitted with a housing bowsprit. She has no hawsepipes, but the chain leads over sheaves on the sides of the gammon iron to a Providence windlass on the bitts. The deck arrangements are very neat and convenient. The bowsprit and mast are solid, of Oregon pine, the former 34ft. 6in. over all and 8in. diameter, the latter a 9⅜in. stick, 55ft. over all. The main boom is hollow, of spruce, 49ft.×9in., and the gaff is 29ft.×5½in. The topsail yards are 35 and 26ft. and the topmast 33ft.×6½in.

LORD DUNRAVEN'S LETTERS.

THE regular meeting of the New York Y. C. was held on May 16, the principal business being in relation to the proposed international races. The following letters from the Earl of Dunraven, received on May 13, were read:

LONDON, May 3, 1889.—Dear Sir: I have the honor to acknowledge the receipt of your letter of the 15th ult., and desire to tender my sincere thanks to the committee for their kind offer of assistance, also for their courtesy in acceding in many respects to my suggestions as to conditions of sailing. As regards the second paragraph in my former letter, alluded to in yours, I thank the committee for pointing out that the classification of yachts under the racing rules of the New York Y. C. does not apply to races for challenge cups held by or belonging to the club. I am aware, also, that while the various deeds of gift evidently contemplate a considerable difference in the size of vessels, no special rule is laid down for classifying them. I was, however, under no misapprehension as to the question involved. I fully recognized and recognize the perfect right of the New York Y. C. to meet me with any vessel that comes within the limits laid down in the deed of gift under which my challenge was made and accepted. My reasons for sending Valkyrie's length on the load water line were: First, as a matter of courtesy observed, I believe, by all recent challengers. Second, because all challenging yachts of late years have been met by yachts of practically the same length on the load water line, and third, because I thought it would be a convenience to the New York Y. C. to know that Valkyrie came within their third or seventy-foot class, should they think fit to class the competing vessels, and thus complete the application of the principle of sailing international matches under rules governing ordinary local races—a principle in force in all other important points, such as measurement of hull and sail area, time allowance and method of starting. Those are my reasons, and I trust the committee will clearly understand that in stating that Valkyrie was designed to come within your third class I had no intention of conveying any opinion as to the length of description of vessel against which I should have to sail. I am quite willing to accede to the request of the committee that the first race be sailed on Tuesday, Oct. 1. But, as for many reasons it is desirable that the matches should not extend over a long period of time, I suggest for their consideration that the dates be Tuesday, Oct. 1; Thursday, Oct. 3; Friday, Oct. 4; Saturday, Oct. 5 and Monday, Oct. 6, or, if Monday is an inconvenient day, Tuesday, Oct. 8. With regard to courses I am glad that the committee have agreed that the races shall be sailed outside. On my part I willingly accept their proposition as to direction of courses: First race to windward or leeward and return; second race, equilateral triangle, one side, the first if possible, to windward; third race, to windward or leeward and return; fourth race, equilateral triangle as in case of second race; fifth race, to windward or leeward and return.

I have pleasure also in agreeing to the committee's proposal that the courses be 30 nautical miles in length instead of 40, the time for making the race to be reduced proportionately. As the committee do not see their way to adopt my suggestion as to time allowance, I accept the New York Yacht Club rule. Having agreed to the committee's proposition as to direction of courses, my suggestion in paragraph 8 of my former letter becomes impracticable. I am anxious only that the compass bearings be given as long a time as possible before the start, and that the stakeboats carry a large and easily-distinguishable flag, but all these details may conveniently be left until after my arrival in America. I cannot concur with the opinion expressed by the committee as to method of starting. Whatever force there may be in the objections urged to my proposal, that the races be started at the specified time, I submit that the same apply equally to both parties, and cannot be the cause, and cannot be imagined to be the cause of any unfairness. I suggest that the time of starting be fixed by the race committee, and that it should take place at the specified time should either of the competing yachts desire it.

In my former letter I omitted to mention the question of umpire. No doubt any gentleman suggested by the New York Yacht Club would be acceptable to me, but I may say that if, as reported in the papers, Gen. Paine will not be himself afloat, I should not only be satisfied but complimented if he would consent to act. I thank you for sending me your club book for last year, and again wish to express my warm appreciation of the most kind and courteous offer of assistance from yourself and the other members of the committee. DUNRAVEN.

To James D. Smith, Chairman of Cup Committee, New York Yacht Club.

LONDON, May 4, 1889.—Dear Sir: I have the pleasure to acknowledge the receipt of your letter of the 11th inst., and would ask you to convey my sincere thanks to the New York Yacht Club for their kind offer of hospitality, of which I hope to avail myself. With regard to the second paragraph of your letter I certainly was under the impression that by your cablegram of April, in reference to Mr. Richard Grant's letter of March 19, my challenge had been accepted on the conditions governing the Volunteer-Thistle Match, and I trust there is no misunderstanding on the point that Forbes... ably give rise to any complications. I am not competent Phister... the conditions under which the Cup should be held and Third cou for in the future, but would point out if the New York Forbes..... retain the Cup their position will be the same as be- Phister..... enge. If, however, I am fortunate enough to win, First event, fi which the Cup is afterward to be held could then all matches sail the Royal Yacht Squadron. The inconvenience ... tions between the New York Yacht Club and the ... Yacht Squadron being carried on pending the sailing of the ... is so great that I venture to express a strong hope that any ... sion arising from any difference of opinion may be post- ... until after the decision of the match. I have the honor to ... ours very faithfully, DUNRAVEN.

To ... Oddie, Esq., Secretary of the New York Yacht Club.

20 ST. JAMES SQUARE, LONDON, S. W., May 31, 1889. Sir—I regret to have kept you so long without an answer to your letter of the 15th inst., but have been away in Ireland during the recess and have only just returned to town. I trust the delay has caused you no inconvenience. Yours faithfully, DUNRAVEN.

To James D. Smith, Chairman of Committee.

A meeting of the committee to prepare an answer to the letters will be held next week.

CORINTHIAN MOSQUITO FLEET.—The first annual regatta will be held on June 8, off Horseshoe Cove, Larchmont-on-the-Sound, the start to be at 1 o'clock. The mosquito craft belonging to the following yacht and canoe clubs are invited to participate: Larchmont, New Rochelle and New Haven yacht clubs; New York Athletic Club; New York, Knickerbocker and Brooklyn canoe clubs, and Pequot Canoe Association. Entries must be made in writing and sent to the regatta committee twenty-four hours prior to noon of day set for regatta, specifying the correct load waterline measurement, rig and model. All kinds of rig will be admitted. Cups will be offered in each class, and a special prize to the boat making the fastest time over the course. *Classes.*—Rule IV. of By-Laws.—"A pleasure boat of any model or rig shall be eligible to enrollment, if said boat be not longer than 20ft. at load waterline." Boats will be classified according to their rig and load waterline measurement. Class I. boats measuring 20ft. and over 17ft. 6in. Class II. boats measuring 17ft. 6in. and over 15ft. Class III. boats measuring 15ft. and over 12ft. 6in. Class IV. boats measuring 12ft. 6in. and under. Rule VIII. of Sailing Rules.—"Boats entered for a regatta shall carry not more than two persons." Rule IX. After the preparatory signal no ballast or dead weight of any kind shall be taken on board or put out. No ballast shall be shifted during a race." The Regatta Committee includes Messrs. Frank B. Jones, 40 Wall street, N. Y., Room 68, F. L. Dunnell, Thomas T. Taber. A meeting was held on May 20 at which the sailing rules were adopted and five new members were admitted. The Larchmont Y. C. has offered two cups to be raced for by the fleet on June 8. The canoe regatta is postponed to June 29.

SOUTHWARK Y. C.—The fifth annual regatta of this club will be sailed on June 17. The steamer John A. Warner will carry the guests over the course.

THE INTERNATIONAL MARINE CONFERENCE.

THE following programme of subjects for discussion by the International Marine Conference, which meets at Washington on Oct. 16, has been prepared by the American delegates, Rear Admiral S. R. Franklin, U. S. N.; Commander W. P. Sampson, U. S. N.; S. I. Kimball, Gen. Supt., Life Saving Service; J. W. Norcross, Master Mariner; Jno. W. Shackford, Master, Merchant Marine; W. W. Goodrich, Counsellor-at-Law, and C. A. Griscom, Pres. International Navigation Co. The programme covers a very wide range of subjects connected with the safety of life and property at sea, the discussion of which will doubtless result in great improvements in the rules of the road and in legislation in regard to shipping.

General Division 1. Marine signals or other means of plainly indicating the direction in which vessels are moving in fog, mist, falling snow, and thick weather, and at night. Rules for the Prevention of Collisions and Rules of the Road.—1. Visibility, number, and position of lights to be carried by vessels—(*a*) Steamers under way. (*b*) Steamers towing. (*c*) Vessels under way, but not under command, including steamers laying cable. (*d*) Sailing vessels under way. (*e*) Sailing vessels towing. (*f*) Vessels at anchor. (*g*) Pilot vessels. (*h*) Fishing vessels. 2. Sound signals, their character, number, range, and position of instruments—(*a*) For use in fog, mist, falling snow, and thick weather, as position signals. For steamers under way; for steamers towing; for sailing vessels under way; for sailing vessels towing. (These signals to show the approximate course steered if possible.) For vessels at anchor; For vessels under way, but not under command, including steamers laying cable. (*b*) For use in all weathers as helm signals only; for steamers meeting or crossing; for steamers overtaking; for steamers backing. (*c*) Whether helm signals shall be made compulsory or remain optional. 3. Steering and sailing rules—(*a*) Sailing vessels meeting, crossing, overtaking, or being overtaken by each other. (*b*) Steamers meeting, crossing, overtaking, or being overtaken by each other. (*c*) Sailing vessels meeting, crossing, overtaking, or being overtaken by steamers. (*d*) Steamers meeting, crossing, overtaking, or being overtaken by sailing vessels. (*e*) Special rules for channels and tideways, where no local rules exist. (*f*) Conflict of international and local rules. (*g*) Uniform system of commands to the helm. (*h*) Speed of vessels in thick weather.

General Division 2. Regulations to Determine the Sea-worthiness of Vessels—(*a*) Construction of vessels. (*b*) Equipment of vessels. (*c*) Discipline of crew. (*d*) Sufficiency of crew. (*e*) Inspection of vessels. (*f*) Uniform certificates of inspection.

General Division 3. Draft to which Vessels should be Restricted when Loaded.—Uniform maximum load mark.

General Division 4. Uniform Regulations Regarding the Designating and Marking of Vessels.—(*a*) Position of name on vessels. (*b*) Position of name of port of registry on vessels. (*c*) Size of lettering. (*d*) Uniform system of draft marks.

General Division 5. Saving Life and Property from Shipwreck.—1. Saving of life and property from shipwreck at sea—(*a*) Duties of vessels after collision. (*b*) Apparatus for life-saving to be carried on board ship. (Life-boats, life-preservers, life rafts, pumps and fire-extinguishing apparatus.) (*c*) The use of oil and the necessary apparatus for its use. (*d*) Uniform inspections as to (*b*) and (*c*). 2. Saving of life and property from shipwreck by operations from shore—(*a*) Organization of, and methods employed, by life-saving institutions. (*b*) The employment of drilled and disciplined crews at life-saving stations. (*c*) The maintenance of a patrol upon dangerous coasts by night, and during thick weather by day, for warning of vessels standing into danger, and for the early discovery of wrecks. (*d*) Uniform means of transmitting information between stranded vessels and the shore. (*e*) Life-boats, life-saving apparatus and appliances. 3. Official inquiries into causes and circumstances of shipwrecks and other casualties.

General Division 6. Necessary Qualifications for Officers and Seamen, including Tests for Sight and Color Blindness.—(*a*) A uniform system of examination for the different grades. (*b*) Uniform tests for visual power and color blindness. (*c*) General knowledge of methods employed at life-saving stations. (*d*) Uniform certificates of qualification.

General Division 7. Lanes for Steamers on Frequented Routes.—(*a*) With regard to the avoidance of steamer collisions. (*b*) With regard to the safety of fishermen.

General Division 8. Night Signals for Communicating Information at Sea.—(*a*) A code to be used in connection with the International Code Signal Book. (*b*) Or a supplementary code of limited scope to convey information of special importance to passing vessels. (*c*) Distress signals.

General Division 9. Warnings of Approaching Storms.—(*a*) The transmission of warnings. (*b*) The uniformity of signals employed.

General Division 10. Reporting, Marking and Removing Dangerous Wrecks or Obstruction to Navigation.—(*a*) A uniform method of reporting and marking dangerous wrecks and derelicts. (*b*) The division of the labor, cost and responsibility among the several maritime nations, either by geographical apportionment or otherwise; of the removal of dangerous derelicts; and of searching for doubtful dangers with a view of removing them from the charts.

General Division 11. Notice of Dangers to Navigation, Notice of Changes in Lights, Buoys and Other Day and Night Marks.—(*a*) A uniform method of taking bearings, of designating them (whether true or magnetic), and of reporting them. (*b*) A uniform method of reporting, indicating and exchanging information by the several maritime nations, to include the form of notices to mariners. (*c*) A uniform method of distributing this information.

General Division 12. A Uniform System of Buoys and Beacons.—(*a*) Uniformity in color of buoys. (*b*) Uniformity in numbering of buoys.

General Division 13. The Establishment of a Permanent International Maritime Commission.—(*a*) The composition of the commission. (*b*) Its powers and authority.

Proposed Grouping of Subjects for Consideration by Committees of the International Marine Conference.—1. Rules of the road and signals—General Divisions 1 and 8. 2. Saving of life and property from shipwreck by operations from shore—General Division 5, subdivision No. 2. 3. Construction and equipment of vessels, and saving of life and property from shipwreck at sea—General Divisions 2, 3 and 4, and subdivision No. 1 of 5. 4. Qualifications of officers and seamen—General Division 6. 5. Steam lanes—General Division 7. 6. Official inquiries into shipwrecks and other casualties—General Division 5, subdivision No. 3. 7. Transmission of warnings and information, buoys, etc.—General Divisions 9, 10, 11 and 12. 8. Permanent Maritime Commission—General Division 13.

BEVERLY Y. C.

THE racing among the club boats was opened on May 15 and 16 with the closest series of matches ever sailed in Buzzard's Bay. Last fall Mr. Parkinson, of the Eleanor, ordered a new boat, Eina, from Hanley, the builder of Surprise, Mucilage, etc. She was intended to beat the whole third class. At the same time Mr. Jeffries ordered a boat, Kiowa, of exactly the same length, viz., 19.10½ft. waterline, from Dunn, of Monument Beach, and a series of matches was arranged for the spring. Since the boats have been launched both have sailed exceedingly well, beating everything they met of their size and many larger boats. Great interest was felt in the match all along the shore, and the races were accompanied by nearly all the crack boats of the neighborhood. The first match was sailed on the morning of May 15, wind very light S.E., course from Tobey Island Buoy around Bird Island Light and Buoy and return, 10 nautical miles. It was a dead run to the light and a dead beat back. The starting signal was given at 11:25.

Kiowa got off with the lead, but Eina getting puffs first soon caught up; and the boats ran down very evenly, Kiowa getting a trifle the best of it, rounding buoy a little ahead. Then followed one of the closest races ever seen; Eina was a trifle ahead, but Kiowa was further to windward; they staid in the same position till within a rifle shot of the judge's boat; here Eina tacked under Nashua and stood toward Tobey Island, from which a short hitch would carry her home; Kiowa crossed her bow, but tacked a few seconds too late, so that she was in a position to be blanketed when they reached the island and tacked; there was nothing to do but to break tacks, which was done; but a flaw headed her off, allowing Eina to lead up, the latter winning by 10sec. Time of race, Eina 1:44:40; Kiowa 1:44:50.

The second match was started at 3:33 on the same day, same course and wind, Kiowa again getting a short lead at start, but Eina soon closing it and trying for Kiowa's weather; this the latter objected to, and the boats sailed a wide half circle going to the light; Kiowa rounding just ahead. Here she found an outside boat right in her way and was obliged to make a hitch to starboard, which was so much time wasted; Eina crossing her bow and tacking on her weather when they met. It looked as if she would keep her there, but in the long tack over to Scraggy Neck, Kiowa reached ahead, and when they tacked again was 50ft. to windward and exactly abreast. For a long distance they ran in this position, the wind gradually hauling till they could just lay their course. This destroyed the advantage of Kiowa's windward position, and as neither seemed to gain, the race be-

came very exciting. Off Wing's Neck, however, Kiowa began to gain and kept doing so steadily, winning by 22 seconds. Time of race, Kiowa 1:59:42, Eina 2:0:2.

The 16th opened very calm, and the third race was postponed to 1 P. M. in hopes of a breeze. At that time there was a very light southeast air, and Kiowa got rid of three-fourths of her ballast; Eina, on the other hand, replaced the ballast she had taken out the day before. The course was round Dry Ledge buoy and Scraggy Neck buoy, about 10½ miles, but only one leg was a beat. The boats got off neck and neck, with Kiowa to windward. Dry Ledge was rounded by Kiowa with Eina almost touching her; and just here a strong breeze struck in. Eina did beautifully, but Kiowa was too light, she needed ballast, and Eina took the lead, rounding Scraggy Neck buoy with a lead of 50 seconds. On the run home one was as good as the other; neither gained at all; but just as Eina reached the line the wind, which had been failing, died out almost entirely, spinning out Eina's lead to 1:35. Time of race: Eina, 1:54:29: Kiowa, 1:56:04.

Both boats sailed wonderfully well for their size in comparison with the best boats in the bay of the class above them, carrying their sail very well.

Racing in the second class promises to be lively this season, as Crawl and Mollie are now in good hands, and will be raced for all they are worth, while Dunn is building three new boats for the class. X. Y. Z.

VALKYRIE'S SIZE.

IF those yachtsmen who are so anxious over Valkyrie's tonnage dimensions will take a trip to Staten Island they may see a yacht that is still larger in proportion than Valkyrie. The new 40ft. cutter Minera, cesigned by Wm. Fife, Jr., is rated in Lloyd's Register as 48.7ft. tonnage length. Her loadline is under 40ft., so that a 70ft. yacht of the same proportions would be 85.23ft. tonnage length, or longer than Valkyrie. Those who have seen both Minerva and the new Gorilla will be able to form a pretty correct idea from the two as to whether Valkyrie can possibly be as powerful, or carry as much sail as Katrina. Katrina's beam is 20ft. 4in., while Valkyrie's is but 16, and at the same time the former is a very powerful boat of 9ft. 4in. draft. Her sail area measured by the Y. R. A. rule is 7,200ft., while Valkyrie is not likely to carry over 6,300ft. in her races here. A comparison of their measurements is also interesting.

	Katrina.	Valkyrie.
Tonnage length	81.42	85
Fore overhang	10.25	....
Rake of sternpost aft of l.w.l.	1.17	....
After overhang	12.33	....
Over all length	92.60	....
Height of side	3.25	....

Bedouin is very nearly of Valkyrie's beam and probably about the same displacement, and her after overhang is 13.25ft., but as she has a plumb stem she is but 83.25ft. over all. Valkyrie probably has a little longer stern than Katrina, or say 1ift., which added to Bedouin's length would give over 94ft. for a clipper-stem Bedouin. In Katrina the sternpost has a moderate rake, only 1ft. 2in. beyond the loadline, but Valkyrie has about the same as Thistle, or 45°, and with as high a side as Bedouin, or over 4ft., the overhang of the sternpost would be 4ft. or more. The only dimensions yet known are the loadline and length for tonnage, 70 and 85ft., and it is probable that the latter includes 1ift. of fore overhang, 70ft. loadline and 4ft. overhang of sternpost. If this is the case, her bow will be no more powerful than Katrina's nor her stern more powerful than Bedouin's. The tonnage length is a measurement almost devoid of meaning when applied to a comparison of clipper and plumb-stemmed yachts. It depends on two dimensions, which have absolutely nothing to do with the size or power of the boat; the length of the figurehead and the rake of the sternpost, the length of the counter is not included in any way. Valkyrie, as we know, has a more elaborate figurehead than is usual, representing one of the Valkyries after whom she is named, but as to the length of her counter, nothing is known.

COOPER'S POINT CORINTHIAN Y. C.

THE second annual race of the Cooper's Point Corinthians, to Reedy Island and return, 100 miles, was sailed on May 14, Com. H. King getting the fleet together early in the morning in a drizzling rain. The cabin boats Luzetta, Hesperus and Roseta, of the Quaker City Y. C., had not come down to the starting point, and the commodore put in the time with a very interesting review of the following boats: Allmond, Capt. C. Ghegan; Wilkins, Capt. James Bagly, literary editor of the *Call*; Kinsey, Capt. Will Kinsey; Item, Capt. Walter Humphries; Cook, Capt. Will Cook; Anderson, Capt. F. Lorimer. The boats got off on the young ebb at 1:45, wind fresh from S.W. The cabin boats soon took the lead, and it was observed that the Luzetta, Capt. Charles Simonds, one of the judges' boats, was drawing rapidly ahead of her cabin sisters. In the meantime the Keystone, Capt. R. G. Wilkins, had secured a lead ahead of the racing boats favorable to notice the sailing of the cabin and open boats. The wind kept freshening and the big fellows had their decks awash, the Luzetta gradually opening the gap. After a good deal of skirmishing between the Kinsey and Item the former boat finally shook off her wily opponent and left the balance of the fleet in the rear. At 5:50 P. M. a heavy squall from the N.W. struck the boats. The Kinsey came to at the Hook, the Item passing her under full sail, which she carried through the squall. Working vessels and cabin yachts anchored save the Luzetta, she went through with reefed mainsail and jib stowed. The Keystone passed Hesperus anchored below Old Man's Point at 12:40 A. M., reported that none of the racers had passed her, at least as far as they knew. The Allmond and Wilkins came to at Upper Chester in the squall and went out of the race. The Cook took refuge in Perch Creek on the Jersey shore. The Kinsey got under way after the squall, but returned to the Hook and went out of the race. The Luzetta anchored off Reedy Island Light at 2:50 A. M. on the 15th, the Item passed around her at 4:20 A. M., Keystone 5:14 A. M. Wind was S.W., dead on end from the start to the island, except during the squall, which lasted about 45 minutes.

The wind shifted to northeast shortly after the Keystone turned the stakeboat, and it was a dead beat home. The Luzetta, after waiting till flood tide at 7:25, left for home, leaving the lighthouse keeper to report the other boats should they come down. Keystone passed Item above New Castle, meeting the Cook at Deep Water Point bound down. She hauled her wind with the Item and went out of the race. The Anderson failed to get off with the race, and being handicapped returned to her mooring early in the race. Luzetta anchored off League Island with Keystone at 2:30 P. M., ebb tide and a dead calm. A breeze eventually sprung up from southeast and the Keystone got under way, arriving at Cooper's Point at 10 P. M. The Item arrived at 1 o'clock and wins a silver pitcher. All credit to young Humphries, who with a green crew saved the race, she being the only boat that went over the course. While I admire courage I like to see it tempered with discretion. It was a desperate, daring feat, and the youngster turned up on top. Probably in after years—as he is full of vim and pluck—experience will have toned him down, and the reckless young sailor will develop into a first-class yachtsman. At any rate he succeeded this time, and I hope he ever may in the future. R. G. WILKINS.

OBSERVATIONS OF OCEAN CURRENTS.—The Coast Survey steamer Blake, Lieut. J. E. Pillsbury, U. S. N., commanding, has been ordered to make observations of the currents of the Atlantic Ocean in different places. During the remainder of the month of May, as well as June and July, the Blake will anchor in the following localities: Southeast of Cape Hatteras, south of Nantucket Shoals and south of George's Shoals. When at anchor the Blake will display during the day three balls or shapes at the foretopmast head; during the night three lights—red, white, red—one above the other. Masters of vessels navigating these waters are requested to keep clear of her. In connection with this current work, Lieut. Pillsbury will set adrift a number of subsurface current floats, each consisting of a 1½in. square white-painted pine staff, about 8ft. long, projecting from 1 to 2ft. above the surface, surmounted by a simple tin wind vane, and with four galvanized sheet iron wings at the lower end to receive the impulse of the ocean currents at a depth of 6 or 7ft. below the surface, and cause it to drift with the subsurface currents and be substantially exempt from the influence of winds or surface currents. The staff carries five glass water-tight tubes, each held in a mortise by easily unfastened copper wire. Each tube incloses an envelope, addressed to "The Superintendent Coast and Geodetic Survey, Washington, D. C.," containing a leaflet printed in English, German, Spanish and French, showing the date and locality of the first launching of the float, and giving instructions to the finder as to filling the blanks with the date and locality at which he found it. Any person finding one of the floats is respectfully and earnestly requested to remove from it one of the glass tubes and immediately set the float adrift again, so that it may continue to float with currents until intercepted again and another tube removed by some other finder, and so on until it is finally lost or all its tubes removed. Each finder should break or open the tube carefully, read, and follow the directions of the printed leaflet, by writing in the proper blank spaces the date and locality at which he found it, either afloat or ashore, appending his own signature and address, inclosing it in the accompanying envelope, and forwarding it to the nearest United States Consul, or mailing it to the Superintendent of the Coast and Geodetic Survey, as addressed. In view of the importance to safety of navigation of all items of information as to the direction and velocity of ocean currents, all mariners and people along shore are urgently requested to contribute to the success of this feature of their investigation by intercepting and relaunching a float wherever seen, and carefully complying with the foregoing suggestions.—*Ed.*

THE AMERICAN SHIP WINDLASSES.—The large shops of the American Ship Windlass Co., at Providence, R. I., have been busy this spring with a great deal of yacht work, in addition to the large line of steam capstans and windlasses for the merchant marine, the navy and the fishing fleet. The line of yacht windlasses includes the Providence Noiseless Pump Brake Windlass, with Grater's friction locking gear; a simpler form of the same windlass fitted for wooden bitts, and a ratchet gypsey windlass, also for wooden bitts. The former is fitted to the deck on cast iron brackets, instead of bitts, and is a very compact and powerful piece of mechanism. Among the new yachts fitted out this year are the schooners Merlin, Constellation and Quickstep, and the steamer Jathniel, the latter having also the patent Emery & Cheney chain stoppers. The same windlass has also been fitted to the Smith yawl Montecito, and the Burgess boats Verena, Nanon, Nepenthe, Maraquita, Nymph, and the Hasbrouck and Owens boats. Tomahawk is fitted with a vertical windlass. Gorilla will have a pump brake windlass, Katidleen, the new Gardner 30, has a pump brake friction windlass. The new jet propeller Evolution will have the large windlass and locking gear, while one of the same has lately been placed on the schooner Montauk.

CORINTHIAN Y. C. OF NEW YORK.—The Corinthian Y. C. of New York has arranged a sweepstake sail, professional crews allowed, for 40-footers, at $100 each for starters, $20 if declared out by June 30, $50 if declared out by July 31, 10 per cent. to the sweepstake fund; to be sailed at Newport over a 25-mile triangular course, one leg of which must be dead to windward. The date for the race will be shortly after the New York Y. C.'s cruise date; date, time, place and course to be announced by Aug. 3. No limit of time for race. If more than two and less than six start, the winner shall receive 70 per cent. of the sweepstake in silver plate and the second shall receive 20 per cent. If more than six start, the winner shall receive 60 per cent. of the value of the sweepstake in silver plate, the second 18 per cent. and the third 12 per cent. in silver plate. Entries close June 10, and may be addressed to M. ROOSEVELT SCHUYLER, Sec'y Corinthian Y. C. of N. Y., 55 Beaver street, New York.

LARCHMONT Y. C.—The racing season for the large classes will be opened by the Larchmont Y. C. with two important races next week, the first being on Decoration Day, when a match will be sailed over the 27 knot course of the club between Shamrock and Titania, for a cup costing $750. The club offers to make the prize $1,000, if Katrina or Bedouin will enter, and it will be a disappointment to many if neither of the two turn up. On June 1 the regular spring regatta, open to members of the New York, Eastern, Seawanhaka Corinthian, Atlantic, New York Corinthian, Oyster Bay Corinthian, New Haven, New Rochelle and New Bedford yacht clubs, will be sailed over the regular club courses. Full particulars as to courses, entries, etc., may be obtained of the regatta committee, E. J. Greacen, Potter building, Park Row, N. Y., Otto Sarony, Larchmont N. Y., Chester C. Munroe, 77 William street, N. Y.

LLOYD'S YACHT REGISTER.—The last volume of this valuable work, just issued, is somewhat smaller than that of last year, as, in consequence of the yearly growth, it has been found advisable to omit the building rules, which will be published separately. The "Register" now includes a total of 5,733 yachts. Of the 4,598 that are measured by Lloyd's rule, there are 1,066 steamers and 3,532 sailing craft. Of new yachts 22 steam and 21 sailing are noted as built in Great Britain this year, of which 18 are built to class. Valkyrie is listed, but very meager details are given—Thames tonnage 94ft., length for tonnage 85ft., beam 16ft., hold 11.6ft. The convenient and attractive arrangement of flags introduced last year is continued. The value of the "Register" and of Lloyd's classification is now generally recognized by yachtsmen, and it is time that a similar scheme was instituted in America.

MEAN LENGTH.—The New York Y. R. A. should at once elect Mr. Nathaniel C. Moore, of Baltimore, an honorary member. Mr. Moore has designed a 70-footer Cup defender with but 2ft. total overhang. Mr. Moore's greatest success thus far was the sloop Baltimore, built in 1851. She was 42ft. over all, 41ft. l.w., 16ft. beam, 3ft. draft aft, 1ft. 4in. forward. Unfortunately this flyer was burned many years since by jealous rivals, or she might teach something to the new forties. Mr. Moore is evidently in accord with the new association in the matter of shifting ballast, as he announces that outside lead is a drag, comparing a lead keel to a pair of lead soles on a man's shoes.

FREDONIA.—The new Burgess fisherman left Boston on May 14 on her trial trip, returning on May 18 after a trip to Nausbon. She will be docked and painted this week, sailing about Saturday for Fayal, with the following party on board: Mrs. Edward M. Cary, Miss Hester Cunningham, Mrs. H. B. Stone, Miss Alice Stone, Miss A. H. Jones, Miss E. F. Russell, Miss Alice Dabney, Miss Margaret Forbes, Messrs. F. H. Stone, Charles Dabney, Edward Cunningham, Jr., and L. Malcolm Forbes. Capt. Harty will command her, with a crew of twelve, and she will sail under the E. Y. C. flag, being now enrolled in the club.

CHANGES OF OWNERSHIP.—Beetle, cutter, has been sold by C. A. Prince to Mr. Guild....Berma, cutter, has been sold by J. H. Hubbard to George Gannon, who in turn has sold his sloop Wanda to J. H. Brookings....The Boston schr. Dorothy Q. has been sold by Edward Quincy to Portland, Me., owners.... Royal, schr., has been sold by King Upton to G. Wallace....Lurline, steam yacht, has been sold by J. M. Waterbury to W. B. Wetmore.... Merlin, cutter, has been sold by Wm. Whitlock, and Nomad, sloop, has been sold by H. C. Wintringham.

NEPENTHE.—On May 18, the compromise sloop Nepenthe sailed from Boston to New Orleans, her owner, Mr. Richardson, of the Southern Y. C., with a friend, being on board. Her racing spars were shipped by steamer and she will make the voyage under a small rig.

A NEW STEEL YACHT.—Mr. Piepgrass has lately laid down a steel steam yacht, designed by Mr. J. F. Tams, for Gen. Butterfield, to be used for shooting in Southern waters. She will be a side-wheeler, 78. over all, 14ft. 6in. beam and but 2ft. 3in. draft.

TORONTO Y. C.—The season was opened on May 18 by a race between the four skiffs Puritan, Shamrock, Ruby and Uneasy; two rounds of a triangular course in the Bay, with a fresh east wind. Ruby won with Puritan second.

VERVE.—The second Verve, owned in Chicago for several years, has been sold to Com. Boswell, of the R. C. Y. C., and with her namesake and predecessor, Verve No. 1, will henceforth hail from Toronto.

NEVERSINK.—The Norton yawl Neversink reached Boston safely, has started to cross the Atlantic.

HELEN, the McVey 40, has had her spruce mast replaced by Oregon pine, as it proved too weak on trial.

ANSWERS TO CORRESPONDENTS.

F. D. B., who inquired for good trout fishing, will please send address to this office.

W. C. H., New York.—Will you please advise me which is the best reel to use for trout fishing, a click or a plain one without any stops? Ans. Use a click reel by all means.

J. S. L., Ottawa.—Will a slight bruise on a gun barrel make it liable to bulge or burst? Bruise shows on inside of barrel. Ans. No, not if the metal is good; it can be taken out by a gunsmith.

F. B., East Hampton, Conn.—Can some of the FOREST AND STREAM readers give me some information in regard to the trout fishing in the neighborhood of Gorham, N. H., also best time for same? Ans. There are small trout in the waters nearby, and June and July are the best months.

F. E. W., South Manchester, Conn.—Can you tell me how to transplant oak, maple or chestnut trees that are 6 to 8in. in diameter? Ans. Trees of this size growing in a forest will probably have long, straggling lateral roots, and in raising them from their beds the important point is to avoid injury to the roots and rootlets. Having raised the tree trim or prune away the small branches, leaving very few leaves, and transplant in holes about 4 or 5ft. diameter and 3ft. deep. If any of the roots cannot be bent to accommodate themselves to the space, cut them off with a clean cut. Bury the trunk to the same level as it stood at before transplanting.

S. G., Gildersleeve, Conn.—Will a brook running through a meadow from small, but constant springs freeze so as to kill trout? Would ponds alongside of this brook, if you increase volume of them by sinking artesian wells, be good and suitable water? The land is boggy and springy. Ans. 1. If the stream flowing out from the springs is shallow it will always be liable to freeze in winter and kill the trout. 2. We advise you to dig a pond, about eight feet deep in the deepest part, and let it fill from the springs, making suitable provision to prevent the escape of the trout at the overflow. Artesian wells will be unnecessary if your springs are cold enough and it is impossible to tell what the qualities of the water would be until you try it with fish.

H. R. S., Hudson, N. Y.—Fishing for weakfish I have used a 15-thread bass line, and find when it gets wet it sticks to the rod and will not render readily. Would a grass line render readily? Would it, if the spoon overruns, spring off and snarl the same as a fly line when the spool overruns? What would its durability be in salt water? Ans. We do not know a better line for bait-fishing than a small-size, hard-braided raw silk line; if the weakfish are not above the average size, use an H or No. 6 line. The retaid Japanese grass line kinks badly, and yet it is preferred by most anglers in the South and West. If you dry your line thoroughly after using it there should be no decrease of durability in salt water. We prefer a waterproof line for such fishing. You will find now also a cable-laid line of boiled silk—a very good line for bait-fishing, giving very little trouble on account of kinking.

PAUL PRYOR, New York.—In the May 2 number of FOREST AND STREAM I met a snag which I ask you to kindly answer. Under the head Kennel Notes and Names Claimed, there appears: Annie Lisle, Rosebud and Zylla II. By St. Cloud Kennel, Mott Haven, N. Y., for red Irish setter bitches, whelped March 25, 1889, by Royal Ruby out of Zylla; then, under head Sales, appears: Royal Ruby—Zylla whelp. Red Irish setter dog, whelped March 25, 1889. What I would like to know, are there two Royal Rubys or is the puppy Royal Ruby the father of his sisters? As I am interested would like to be set aright as there appears to have been some mistake. Ans. There is no mistake, the sale recorded is of an unnamed whelp by Royal Ruby and out of Zylla from the same litter as those for which names were claimed. The address you wish is Mott Haven, N. Y.

T. Z., New York.—What is the difference between blood worms, sand worms and white worms? In what localities are each to be found, and where can they be bought in New York? Which is the best bait for striped bass surf fishing during June? Ans. The blood worm is the larva of *Chironomus*, belonging to the family *Tipulidæ*, or crane flies. It is found in rain water in cisterns The name is probably also applied to some of the annelids found under stones along the seashore. Sand worm is a name used for various species of annelids, or marine worms. White worms are probably sand fleas and other crustaceans found on the shore; the name would be appropriate for the large *Hippa*, so much liked by sheepshead fishermen. See "Seneca's" articles in late issues for places in New York where these baits can be procured. For surf fishing for striped bass in June we prefer shedder crabs, shrimp and clams in the order named.

BEECHAM'S PILLS act like magic on a weak stomach.—*Adv.*

GURDON TRUMBULL'S

Names and Portraits of Birds

Which Interest Gunners; with descriptions in language understanded of the people.

Practically speaking, this is the first popular volume of ornithology ever issued from the press; a work which goes far to demonstrate that scientific accuracy may be as easily maintained in English as in Greek or Latin. Follows the game birds all over the continent and gives a glossary of all the local names in popular use. Illustrated with admirable portraits from the pencil of Mr. Edwin Shepard of the Academy of Natural Sciences, Philadelphia, which, with the clear descriptions in the text, will enable any man who can read to identify the contents of his game bag.

OPINIONS OF THE PRESS:

It is the first, so far as we know, of a class of books of which the need is felt in every department of natural history.—*Troy Press.*

The book should find its way to a choice place in every sportsman's library.—*Chicago Inter-Ocean.*

I would much rather know what this book tells me, the various names by which the people call a bird, than the Latin, Greek or Hebrew name which science gave him for the sake of cataloguing him. * * * It is more value to me to have a description of a bird in plain English which I understand than in scientific language which I do not understand.—*W., in Journal of Commerce.*

Yachts and Canoes For Sale.

Cruising Yacht For Sale or Charter.

The owner of a well-known yacht, 47ft. long, 14ft. beam, 6ft. draft, perfectly fitted out for the comfort and accommodation of four to six persons in the cabin, and three men in forecastle, patent w. c. and all modern improvements, will sell or charter her at a reasonable price on account of important business engagements preventing his leaving the port during the summer months The yacht is built upon a beautiful model, has two rigs, can be sailed as a sloop, when she is very fast, or as a yawl for cruising. She was built during the winter of 1886, of best of material, under the personal supervision of the owner, and is a staunch and excellent sea boat, well suited for cruising in the gulf of St. Lawrence, and has been so employed, where capital sea trout and other fishing can be enjoyed, and salmon may be included, seal and white porpoise hunting, duck and shore bird shooting. This is an opportunity seldom offered. Address P. O. Box 1081, Quebec City, Can. Satisfactory references in New York or elsewhere given and required.

$800. ATALANTA. $800.

The very fast sloop yacht Atalanta, winner of over forty first prizes in the last four years, is for sale till June 1 at the above low figure. She is perfectly sound and in good order, has two suits of sails and over two hundred ($200) dollars worth of lead ballast. Atalanta is 30ft. over all, 27ft. 3½in. waterline, draws 5ft. 6in. of water, and has 12ft. beam. Is a remarkably safe, fast and able yacht. Has been around Cape Cod eight times, and hove to for six hours in a southeast gale. She is a great bargain at this figure, and is sold only because the owner is going away. For further particulars address
ISAAC R. THOMAS,
60 State st., Boston, Mass.

We will deliver, free of express charges, either size, on receipt of price.

A. W. FOOTE & CO., Sole Manufacturers,
126 Maiden Lane, New York.

No Chemicals,

W. BAKER & CO.'S
Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

ANSWERS TO CORRESPONDENTS.

A NEW PARK SUPERINTENDENT.

ORDERS have been issued by the Commander of the Department of Dakota, directing the following changes: Troop K, of the First Cavalry, is relieved from duty at Fort Custer, and will march to Camp Sheridan and take station for service in the Yellowstone National Park, while Troop M, of the same regiment, will proceed to Fort Custer and take station. The result of these changes is to return Captain Moses Harris to garrison duty at Fort Custer, and to make Capt. F. A. Boutelle the Superintendent of the National Park.

The reasons which governed the Secretary of War in issuing this order have not been announced, but it may safely be concluded that they were of a purely military character. It is very probable that it was thought that Troop M had been long enough stationed in the Park, and that discipline required its return to the regiment; that too long absence would make them lose their organization, and that from being soldiers they would become mere police. While under so excellent an officer as Captain Harris there was little danger of such a change, it is readily conceivable that these and similar reasons might appeal with great force to the military mind.

All who are interested in the National Park will sincerely regret that the exigencies of the service have required that Captain Harris should be ordered back to Custer. He has made a most excellent Superintendent, and under his rule the Park has been cared for as it never was before. He has been mild but energetic, wise but inflexible. He has ruthlessly turned out of the Park the bad characters that at one time infested it, and has made his command a terror to evil-doers. He has been gentle with those who have offended through ignorance, and severe with such as have intentionally violated the regulations. In his superintendency of the Park he has served the public well, and all who have known him in this capacity will feel a genuine sorrow that duty has called him elsewhere.

Captain F. A. Boutelle, who now takes command of the National Park, will find matters there in smooth running order, and although it may take him some little time to become familiar with all the needs of the region and the details of its management, our inquiries about him lead us to believe that he will be a very efficient Superintendent.

Captain Boutelle is said to be a splendid officer, a good sportsman, and in all respects very capable. Such a man cannot fail to feel in the Park a lively interest, which will carry him far beyond what might be his purely official duties, and there is every reason to think that in the new Superintendent the friends of the Park will find a most efficient coadjutor. It seems likely that under his rule the natural wonders, the game and the forests will receive the same continuous and intelligent care and protection that they have had for the past three years under Captain Harris.

It is earnestly hoped that the Secretary of War will see fit to authorize Captain Boutelle to employ a number of additional scouts. This is especially necessary just at this time, when the force guarding the reservation is being changed. The new troops, who are ignorant of the region will find themselves unable to cope with mountaineers familiar with almost every foot of the ground in the Park, and unless the different scouting parties are furnished with efficient guides, much destruction of forests and game may result. We have no doubt that the necessity for an addition to his force of scouts will already have suggested itself to Captain Boutelle, and we hope that they may be allowed him.

"RECOLLECTIONS OF AN ANGLER."

HERODOTUS tells us that in their writings the ancient Egyptians employed two sets of characters; one which was used for ordinary subjects, and another for those things which were sacred. If in these later times there were a particular form of writing reserved for recording recollections the most cherished, that surely would be the one chosen as best suited for the chronicle of our angling days. Something of this feeling at least is manifested by those fishermen who prepare elaborate memorials of their outings, beautifying them with all that skill of artist, printer and binder can do, and making them veritable triumphs of the bookmaker's art. One of the most luxurious of these volumes, which has recently come under our notice, is that in which Mr. Dean Sage, of Albany, has recorded the incidents, pleasures and mishaps of his Canadian salmon fishing.

We have had the pleasure of looking over an angling book altogether unique. It is the work of Mr. Wakeman Holberton, of this city; and is a masterpiece of pencraft. The style of the book is that of the old manuscripts; it is done with India ink on artificial vellum, and upon it has been lavished a prodigious amount of labor. Begun in 1883 it has taken for its completion the leisure time of the years since then, as one may readily enough comprehend upon an examination of the beautiful text and illustrations. There are five full-page water color sketches, thirty-two illuminated initials, forty-eight water-colors, and 130 pen and sepia drawings, making a total of 215. The illustrations comprise portraits of the several varieties of game fish, and sketches of angling haunts in many States, Maine, New York, New Jersey, Pennsylvania and westward to Idaho; with Lake Geneva and other European waters, which have been fished by the artist-author.

Many old and classic taverns are here pictured, Jim Henry's on Broadhead's Creek, Widow Darby's on the Beaverkill, and others, whose familiar scenes awaken a flood of memories as the leaves of the book are turned; but which have now passed away or been altered, "modified and improved" past recognition. The text is made up of extracts from Mr. Holberton's fishing notebook; there are in it, as there must be in the recollections of every angler who has come to middle life, descriptions of once favorite waters now no longer rewarding one's most patient fishing, and mention of many an angling companion who has gone over to the great majority.

The volume will be bound in some suitable material, probably a fish skin, when the right one can be found. It is, as we have said, a book unique in angling literature and one which is likely long to preserve individual distinction, for in these days there are few indeed blessed with patience and diligence to perform so prodigious a task of pen work as this. The possessor, if he have anything of the spirit of the book collector, may rest content in the fond satisfaction that his bibliographical treasure cannot be matched nor duplicated; he may take a joy in its possession more perhaps than that of the American collector who paid £180 the other day for a copy of the first edition of Walton's "Angler;" for there are other copies of the first edition of the "Angler," but of the "Recollections of an Angler" only this one.

SECRETARY NOBLE AND THE INDIANS.

AT the commencement exercises of the Indian Industrial School at Carlisle, Pa., held May 22, a notable address was delivered by the Secretary of the Interior, Hon. John W. Noble. It was a speech remarkable for its deep feeling and its eloquence; a speech that stirred those who heard it and encouraged those to whom it was especially addressed. It promises much for the progress and development of the Indian during the next four years.

When Mr. Noble spoke of the importance of sobriety, truthfulness, justice and decency among agents, inspectors, traders and their subordinates, he showed a clear comprehension of one of the main difficulties of the Indian question as it stands to-day. At the present time it may safely be said that the great majority of the Indians desire to improve their material condition, and that as a race they accept the bitter conclusion that the only means by which this condition can be improved is by working as the white man works. They are then willing to work, and many of them do work, but in the case of the so-called wild tribes their efforts are feeble and desultory. Such people, still barbarians, having acquired from civilization new vices, but as yet no new virtues, are wholly dependent on the white men who are placed over them on the reservation. No matter how excellent the intentions of the Government, no matter how liberal the appropriations of food and clothing, and stock and farming implements, there is little hope of advancement for the Indians unless the man who is in charge of the agency is honest, competent and interested. During his term of office he holds in his hands the fate of the tribe that has been committed to his care.

In our dealings with the Indians no subject requires more judgment than the selection of those employees of the Indian Bureau who are brought into immediate contact with these people in their homes. That Secretary Noble understands the importance of purifying this branch of the Indian service is shown not only by his speech at Carlisle, but also by his recent action in promptly supplanting a dishonest agent against whom charges had been brought by a staff correspondent of the FOREST AND STREAM. These charges, made more than six months ago, received little attention until Secretary Noble took hold of them.

We believe that Mr. Noble, besides being genuinely interested in the Indians, has a keen scent for rascals, and it is to be hoped that the whole Indian service may be overhauled and purged of its dishonest and incompetent employees. There are certainly agents and inspectors who need looking after, and we trust they will get it.

The Secretary's ringing address, which we give below, will afford encouragement to all who hope for the improvement of the Indians. He said:

Mr. Superintendent, Ladies and Gentlemen: I am to-day here as a representative of the Government. Personally I have no claim to the distinction of addressing you or delivering diplomas to these scholars, but as the Secretary of the Interior I may be welcome to announce a policy on which men of all parties will agree. On behalf of our good President I say that he takes a great interest in the Indian schools, and that he proposes to secure justice to the Indians. He would have those who are appointed Indian agents, Indian inspectors, Indian teachers, or licensed Indian traders to understand that in the discharge of their duties under any commission that he has signed, they must practice and secure sobriety, truthfulness, morality, justice and decency within their commands. It will not be sufficient to allow Indian affairs to remain as they are; improvement is demanded and will be insisted upon.

So much I am authorized to speak for him. You will allow me a few words on my own behalf, to which I commit no man, other than myself. I believe that the practice of justice is essential not only to the welfare of each individual, but that it is necessary for the security of any government. The idea that many men possess, that we should avoid injustice chiefly because of its effect upon another, is a narrow view. The truth is, as human experience develops, injustice finds its chief victim in the author of it. It is the rule of human conduct that the deeds done return to the doer either in the way of reward or as punishment. If you will look upon the career of one who has had charity in the heart, and justice, tempered with mercy, in the conduct of life, you will find it even as exhibited in yonder picture on the wall [indicating the portrait of Susan Longstreth, of Philadelphia], or in its living original sitting with us to-day, that a long life of goodness on earth already beams from the countenance with an almost heavenly radiance; but where avarice and fraud, greed, inhumanity and licentiousness are practiced, even the countenance is affected, and the individual bears the mark of his character on his form. But in either case the result is left in the soul, and the reward of punishment is daily felt. It was remarked to me by your eminent governor [Governor Beaver] to-day, that in the faces of those who have come to this institution most recently the rudeness of the wild life was visible, but in each class preceding the expression had been changed into softer outlines. Gradually,

as these scholars are educated they are indeed refined. The savage disappears, and the man stands redeemed, regenerated and disenthralled, touched by the magic influences of mercy, humanity and justice.

These considerations have led me to-day to feel that here I am no longer, as I have been for many weeks past, to represent the Government as an appointing officer; but in the superintendent of this Indian Industrial School I may recognize, on behalf of the United States, one conferring upon all the people a great and mighty gift; a magnificent result that his tact and management has achieved and displayed in elevating these Indian pupils from the forlorn position they have held to that great equality with others, in which, indeed, they may have been born, but which can be maintained only by educated intelligence.

It has been a considerable part of my occupation lately to inspect the letters and commendations of my fellow citizens, whereby they may secure certain offices. I cannot but admire him who can present to a government such credentials of excellence as your superintendent exhibits to-day, and yet claims only your sympathy and encouragement.

Ladies and gentlemen of the graduating class, I am called upon by your superintendent to present to each of you one of these certificates of your attainments acquired in this school. I have prepared no speech, but even if I had I should ere this have become utterly disconcerted by the results I have seen, so far beyond anything I could have anticipated. Your readiness of expression in the English tongue, your general demeanor so courteous and pleasant, your habitation so clean, your rooms so well ordered, your classes so well disciplined; your own appearance so elevated and bright and cheerful, your quickness of apprehension, your scholarship so high, your industrial products so varied and so good, your general fitness to compete with the most intelligent of any of our people, lead me to say that I am not only pleased, but that I am amazed at such magnificent results.

If I may say a word more, it is to recall some of the features of your forefathers. I would not have you for one instant forget that the men who preceded you were men of exalted character in their day and generation. I would beg you never to forget, either as men or women, the fact that it was Logan who, on the one hand, would not turn upon his heel to save his life, and on the other knew not how to tell a lie. I would have you remember, too, that grand independence of character that Tecumseh had, and exhibited on a memorable occasion when once approaching a general of the United States Government in camp, in order to hold a council, and surrounded by many of his chiefs he was allowed to wait in front of the tent unnoticed. At last an aide-de-camp came and brought Tecumseh a chair, saying: "Your father sends you a chair." The chieftain drew himself up, and pointing to the sky said: "My father! The sun is my father, and the earth is my mother; I will repose upon her bosom," and threw himself upon the ground, and there remained throughout the consultation. I do not wish you to imitate all Tecumseh did. I do not wish you to return to the days of Logan, but I do wish you to bear in your hearts, both men and women, that sterling quality of independent personal liberty that brooks no oppression, and around which alone can cluster the virtues that will support you men to attain the best purposes of life, and will enable you women in your homes to be true helpmates and the benefactors of your race.

Blessed with a native love of liberty, and endowed with education, be manly, you men, and womanly, you women, and there are no heights to which you may not ascend in this free land, your country, my country, the common country of all who are free, who are intelligent and worthy of its protection.

I give you, on behalf of the institution these certificates. I hope for each of you that all that this certifies to may be a hundredfold increased as you go on your career; that you will maintain your integrity; that you will maintain your independence, and gather around it new virtues, until this will be to you merely the A, B, C, of that great lesson of life you will ultimately conquer and practice. With these words I bid you, on behalf of the Government, God-speed, and to you, my friends, I bid farewell."

The Sportsman Tourist.

THE RANCH OF THE PALMS.

RANCHO DE LAS PALMAS, Mexico.—Six weeks at the Hotel del Coronada, Coronado Beach, Cal., with almost daily excursions into the interior, with an occasional day's shooting on the numerous bays with which San Diego county is favored, the quack, quack of the ducks and the whir-r-r of the quail still resound in my ears. This southern California is certainly a great, grand country, and the lover of the forest and stream and rod and gun who fails to visit it in the near future, before civilization encroaches upon its eastern boundary, misses sport, pleasure and healthful recreation, the like of which there is not on this continent. From the small smelt and herring in the bay, taken with "grab hooks," we catch flounder, mackerel, halibut and various kinds of bottom fishes, tiring of which we jump aboard one of the numerous sailboats, and after an hour's sail down one of the most magnificent bays in the world, we round Point Lorna and the lighthouse, and cast our line for Spanish mackerel, barracuda or other game fishes. We may be in Mr. Babcock's famous catboat Teaser, or in another of the numerous boats belonging to the hotel or its management; but whatever we are in, we go spinning along before a rattling breeze, and—there! There is one on your hook! Pull him in hand over hand. Be careful, and don't give him any slack line. See him jump 10ft. out of the water! Ah, isn't he a beauty! A 10-pounder, sure. You had better hit him a bifter over the head. So it goes on all day; and please remember that this is a land of perpetual summer—no winter, no frost—and outdoor sports are the order of the day. From fishing we change to hunting, and in all the cañons and on all the mesa lands can be had quail and rabbits till you can't rest—all within five miles of San Diego. I never saw game so plentiful. Further up in the mountains, say thirty-five miles from town, we find deer—the magnificent black-tailed monarch—bear, and now and then a mountain lion, with an abundance of coyotes and small game. Of course, this cannot last forever, as civilization is even now making a marked impression upon the game of the country. But of this I shall speak again. At present I am in the republic of Mexico, and it is of Mexico that I want to speak.

During a sojourn of three months in southern California, twelve years ago, it was my good fortune to meet Señor Chanon Gilbert, one of those genial, warm-hearted, genuine old Castilians—a Spanish gentleman, bred and born—a very few of whom yet survive. Three weeks ago, in January that was, I proposed to a Mexican friend that we visit the Ranch of the Palms, and we started forthwith. At Tia Juana, the border town, and the end of the railroad, we procured a pair of ponies and a buggy, and started on a forty-mile drive. The sun was hot, and I doffed my coat. In a few moments my vest followed the coat. I unbuttoned my blue flannel shirt, dropped suspenders, cocked my Panama hat over my starboard eye to protect it and that side of my face from the sun. Still it was hot. My companion, Antonio Something—I cannot remember his name a moment—in the meantime was lolling lazily, sleepily in the buggy, smoking cigarette after cigarette, and apparently very comfortable, and the ponies jogged along with nary a wet hair. They were acclimated, probably; at least that is what Antonio said, adding the assurance that if I remained there long enough I would "get used to it," also. Our road follows the Tia Juana River, a bit of a stream, by the way, which has a peculiar knack of suddenly disappearing in the sand and remaining hidden for several miles, and just as suddenly it reappears in all its glory, as if nothing had happened; but in summer it disappears for several months, and does not show up again until the rainy season—about December. I remarked to Antonio that the river had the bulge on us, as it were, insasmuch as when its waters became so hot from the infernal rays of this tropical sun it "took a header" and down it went to cool off, appearing again at the surface when it had accomplished the object of its subterranean visit. I said other funny things, and when the usually jolly Antonio refused or neglected to laugh it not only surprised me, but I was absolutely hurt.

The sun still came straight down, red hot, the ponies jogged along noiselessly in the sand and all was quiet—and hot. I yawned, took out a cigar, lighted it and offered Antonio one. He was asleep, sound asleep, with a half-burned cigarette protruding from his brown lips. I quietly placed the fire end of my cigar to the bit of brown paper in his lips, saw it ignite and slowly burn, wondered whether or no it would burn off his moustache or just singe it a little, and finally the thought of how he would jump and howl when the fire reached his lips became so funny that it was with great difficulty I controlled my merriment. I laughed inwardly until my sides ached. Suddenly a lazy yawn, a mechanical puff at the cigarette, and my dusky friend leisurely straightened himself up and continued to smoke as if nothing had happened. Not a word was spoken. The burial of Sir John Moore was pandemonium compared with the oppressive silence that reigned for a few minutes in that buggy. I said not a word about the lighting of his cigarette and he was too lazy to ask questions. Anyhow, I had a good laugh, but it was like the Irishman and the bull. We drove on, and the sun came down red hot.

"Antonio," said I, a happy thought striking me, "do you know what the Governor of North Carolina said to the Governor of South Carolina on a certain auspicious occasion?"

"No, señor, no comprendo el Gubenor," he replied.

"Oh, I see. You don't savvy the Governor. Well, sir, on a certain auspicious occasion, too well known to every American citizen to justify me in entering upon a detailed explanation as to time and place, the Governor of North Carolina said to the Governor of South Carolina, 'It is a long time between drinks.'"

"So?" he murmured. That was all. Not a smile. Casting a withering, scornful glance upon this inanimate piece of humanity, I reached into my grip and drew forth a bottle of "Monogram." Handing it to my companion I said, "Here, take a snifter of this. It is good for what ails you."

"What eez zis?" he inquired.

"What is it? Why, man, it is whisky. What's the matter with you? Take a drink."

"Zere is nodings ze matter wiz me, but I drink ze mescal."

"Mus-kell? And what in the name of Mexico is mus-kell? I know all about pulque, but don't savvy the mus-kell."

"Mescal eez ze fine Spanish drink. Eet iz made from ze cactus—ze century plant. I have some here," saying which he brought forth from beneath the buggy seat a quart beer bottle filled with a liquid resembling water. I took a good-sized swallow of the stuff, and before my breath returned I was certain I was a goner. After a dozen or two spasmodic gasps for fresh air I finally succeeded in securing a limited supply, and felt that I was safe. But the horror and agony of the moment! I can compare it to nothing but swallowing a porcupine, head foremost, and having some one pull it out by the tail. My ears tingle yet when I think of it. Antonio watched my gyrations and evolutions, which I know would have caused the Majiltons to turn green with envy had they witnessed them, and without even a sympathetic glance at my pitiful condition he turned up the bottle and guzzled the vile stuff as if it were soda water.

During all this time the sun had not neglected its business, but came straight for us. We are now fifteen miles from Tia Juana (pronounced Tee-ah Whana) spinning along at a lively gait up and down cañons, over mesas (table lands) across fertile valleys, sending rabbits scooting hither and thither, while covey after covey of quail darts in and out of the bushes, and an occasional coyote is seen scampering away over the hills. Thus the day passes on, and I begin to wonder how much further we must go ere the Valley of the Palms is reached. Ah, here comes a sleepy old Mexican, perched away up on the seat of a rickety old wagon, driving six sleepy-looking ponies. I will not disturb Antonio, who is again in the arms of Morpheus, but will inquire of the old gentleman myself.

"Adios, señor. Can you tell me how far it is to the Ranch of the Palms?"

"No comprendo el Inglis."

"Oh, you don't understand English? Well, that's too bad; but it seems to me anybody ought to know how far it is to the Palms."

"Si, si, pero no comprendo usted," he expostulated.

"Yes, I know. That's all right. But—how—far—is—it—to—the—Rancho—de—las—Palmas?" raising my voice to such a pitch that Antonio almost jumped from the buggy.

Taking in the situation, he instituted a series of inquiries, and the way they jabbered was a caution. Now, thinks I, they will dismount and fight it out; but no, they are laughing. Then Antonio pounds his left hand with the right and *vice versa*, and then the old gent has his innings. Waltzing down the middle, figuratively speaking, he executes a series of fandangoes, salutes his partner, swings corners, chasse all, right hand to your partner, and grand change. They jabber incessantly, I light another Mexican cigar, of which I had laid in a stock before leaving Tia Juana, pick up the lines and drive on, with Antonio jabbering over his shoulder until the old fellow disappears around a curve in the road. "'E eez a fine fellow," says Antonio. "Yes, I like him very much," I replied, "and his conversation is especially edifying." And I understood not a word of what they had said.

Five o'clock and we sight the magnificent Valley of the Palms, and what a place! Think of a farm six miles wide and thirty-three miles long. That is the size of El Rancho de los Palmas—the Ranch of the Palms. Here grow to perfection all the most delicate tropical fruits. Bananas, figs, cocoanuts, oranges, lemons, almonds, nectarines, raisins, etc., can be excelled nowhere. Add to this the magnificent grazing lands over which for miles and miles roam the hundreds of fine horses, thousands of cattle, sheep, and the beautiful Angora goats; farming lands upon which can be raised everything known to man, from garden truck to the magnificent date palm, and we have a veritable Vale of Cashmere.

We are heartily welcomed to the hospitable mansion by our old friend Chanon, surrounded by a family of gallant sons and handsome, blushing señoritas, and as I shake the warm, soft hand of each, acknowledging the kind words of welcome spoken in their low, sweet Spanish accent, I feel that I have just now begun to live. For remember that these people are not Mexicans. They are thoroughbred Spaniards on their mother's side, while the usual dark hue characteristic of their race is toned down by marriage, two generations ago, with a celebrated English lord. Thus we have by this intermarriage a pleasing contrast. On one side we observe instantly the dark, keen, piercing eye, the handsome mouth and pearly teeth of the Spaniard, while English blood tones down the dark-hued skin to a beautiful, smooth velvety olive. I have sat by the hour in El Pravo, the fashionable thoroughfare of Madrid, Spain, and watched the dark-eyed beauties of that celebrated city in all their loveliness, but they were always associated in my mind with treachery and deceit. While thus sitting one beautiful evening, the thoroughfare thronged with its usual gaiety, I saw two splendidly dressed ladies meet and embrace with great enthusiasm, when, with a chill of horror, I saw one of them stealthily draw a stiletto and plunge it deep into the back of the other. A shriek, a fall, a sudden rustling of dresses as the murderess quickly mingled with the crowd, and all was over. I sat stupefied for a few moments, when the body was carried away. Since that Spaniards, stilettoes and treachery are associated together in my mind.

In this old house of Las Palmas I often find myself gazing vacantly at the magnificent faces of the señoritas of the establishment as they flit hither and thither, while my thoughts are far away among the scenes of that memorable night in Madrid, and I ask myself, "Can it be possible that these innocent, beautiful girls— but no. What nonsense! They are perfection itself, in whom there is no deceit." I cannot now remember whether or no, in speaking of our visit to New Orleans in a steam launch, I mentioned the Creole ladies. If I did not, it was an oversight, and the only excuse I can offer consists of the fact that my education and pursuits have not fitted me to discuss the characteristics of the various nationalities and incidents in general which a person of traveling propensities necessarily encounters in several years' wandering. The Creole impressed me very forcibly, and I must confess that, like the other boys, I was loth to leave New Orleans. Thus it is with these Spanish girls, and although I have been here three weeks the time seems but a day. Each night brings something new—a dance, in which all the dons and señoritas for miles and miles around participate, and on which occasion wine flows like water; or a trip to a neighboring ranch to revel in the same sport, which sometimes continues two days. The strum, strum of the guitar or mandolin is indeed music under such circumstances, and of such sport these people never weary.

We have done some hunting, but not much. There is too much work about that to please the average Mexican. They prefer to sit in the shade and leisurely smoke cigarettes, watching the curling smoke ascend through the green foliage, and think—well, I don't know what they think, but they do keep up a terrible thinking. And I? Well, I think, too. Ah, me! I must soon leave this country, as the weather is becoming rather oppressive, and again resume my flight. What a world! For twelve long years I have followed the wild geese from north to south and back again. From the everglades of Florida, up through the pines of the Carolinas, the mountains of Virginia, Maryland, Pennsylvania, New York, and so on to the White Mountains. I have wandered along the shores of that tideless sea, the Mediterranean; have spent weeks and weeks on the Nile, in Egypt, ancient Egypt, the truly wondrous land, where Isaiah prophesied, and whose shady palms gave shelter to the Holy Family when fleeing from the wrath of Herod, and whose extent is dotted over with the ruins of many cities, tombs of a buried civilization. Away north of the Arabian Sea, beyond the Ganges and Bramapootra, hidden away mid hill and dale in that remote and dreamy land, I have witnessed sufferings similar to my own, but intensified ten thousandfold by lack of proper sanitary surroundings and proper care. Well might Jeremiah cry out, "Is there no balm in Gilead? Is there no physician there?" Returning to our own country, I stood on the shores of Lake Minnetonka one pleasant morning, and thanked God for this glorious, health-giving America.

> "Breathes there a man with soul so dead,
> Who never to himself hath said
> This is my own, my native land?"

This is a rambling letter, and is not what I intended it should be. I wanted to talk of Mexico and Mexican manners, but these thoughts kept crowding in upon me, and, like Banquo's ghost, they would not down. I shall leave here in another week (perhaps), and after a week or two more at Coronado Beach, will hie me eastward. The time is near at hand when my naphtha launch will be finished

and I anticipate an unusually pleasant time this summer. I have traveled thousands and thousands of miles, but am sorry to say I never kept a note-book. I now regret it exceedingly, and hereafter I intend to jot down everything of interest, that it may benefit those of my fellow sportsmen who are so situated that they can not spare the time to wander all over the earth. PACIFIC.

THE BEAUTIFUL OZARKS.

KANSAS CITY, Mo.—Where shall I go? This question presents itself to our Eastern friends with more weight and gravity than to us Westerners. Distance, requiring necessarily time and expense, cuts a very considerable figure. A half day or one night's ride from our city and we are in some of the finest game regions in the United States. It is not to be inferred by this that numbers alone should be considered, for the true sportsmen dislike to bring in game or fish simply to see it spoil. I enjoy having and getting plenty of game, but how much more is this enhanced when one knows it is not killed in wantoness.

Friends have told me this past summer of the hundreds of bass taken by parties fishing in some of the far northern lakes where they had camped or stopped at some farm, and that their party could not eat half there were caught. "What did you do with them?" was asked. "Threw them away."

The expense to get there is large, the accommodations in these frontier sections poor, in the North the mosquitos are simply terrible, and after summing it all up I see very little pleasure as compared with another section, and that the Ozark Mountains of southern Missouri and northern Arkansas.

My favorite spots are the streams and country contiguous to Cabool, Mountain Grove, Thayer, Mammoth Springs in Missouri, and Afton in Arkansas and Mammoth Springs on the line, or in both States. The Kansas City, Fort Scott and Gulf Railway gives easy access, and once upon the ground a variety of amusement can be obtained from Mountain Grove to Black River. Such bass, pickerel, salmon (jack), channel catfish and croppie; and one never knows what the next fish will be. Some of our fly anglers may smile at catfish being a game fish, but of the gamiest fights I have ever had some have been with a five or six pound channel catfish. The most beautiful natural fishing ground in every respect that it has been my fortune to try, however, is Spring River, below Mammoth Springs. Afton being a convenient point and only ten miles from Thayer, Mo. This stream is as clear and cold during the seasons for angling as can be desired, and at every half mile or so are natural reefs or dams running diagonally across the stream, just enough water so one can wade with hip boots, fishing below and above the falls, a convenient log caught on the edge will afford a place to tie the minnow bucket, as well as the live net, and plenty of fish will be found in working the falls back and forth. Thayer is the best place to stop, there being a nice hotel there. One day can be spent looking the ground over and catching minnows. The next morning the early train will land you at Afton in season for good fishing, and you can return to Thayer or Mammoth Springs that night, and so on, for a couple of weeks. March, April and May are the best spring seasons, and any time after August for fall. And the fall go prepared to hunt and fish all to your heart's content.

The Gasconade is not far, and Black River and White River, all game fish rivers. Then there are bear and deer in the woods, and turkey, chickens and quail, coon, possum and squirrels until you can't rest.

The scenery is grand, those mountains just high enough, the valleys just deep enough. The natives as a rule are somewhat rude, but very hospitable, and will do all in their power to make it pleasant.

The only bad feature is that sometimes when hunting for deer you will run across one of those animals that has no place in or among mammalia as far as any researches of mine own, "the Arkansaw razorback," lank, lean, long-legged, with a snout half the length of his body, and bristles 6in. high standing straight up. My, my! but how they can run. One is liable to meet them miles and miles from the farm, and it is a puzzle to me how they ever catch them to butcher.

Let some of our Eastern friends try this section for game and I will guarantee them a good time. I have fished and hunted in New England, Colorado and Minnesota, and yet have to find better sport and as large variety, together with the magnificent scenery, the conveniences and every thing desirable that I have found in the beautiful Ozarks. TILE.

Natural History.

THE CARNIVORA.

BY R. W. SHUFELDT, M.D., C.M.Z.S.

(Concluded from Page 335.)

IN treating these pinnipeds, it was my intention to present views of skulls of the leading genera, but while thinking this matter over, and still adhering to the idea, I came to the conclusion that it would be far better to submit all such illustrations in one paper, for then their value is at once much enhanced from the fact that they appear side by side for comparison. I selected the present contribution as the most fitting article for these illustrations, and very instructive figures they are, as will be appreciated by a glance at the plate. As we would naturally expect, the skull of the walrus is widely different from that of any of the seals, aside even from its prodigiously elongated canine teeth (Fig. 5); while the skull of the ordinary harbor seal (*Phoca vitulina*, Fig. 9) is seen to be quite different from either that of a sea bear (*C. ursinus*), or even others of its own family, as, for instance, the hooded seal (*C. cristata*) or the California sea elephant (*Macrorhinus*).

When we come to study the forms of the individual species of many of the land *Carnivores*, I hope to present other figures of their skulls, and then the reader will be enabled to appreciate, better than by any other method, the real kinship which exists among these marine and terrestrial representations of the order.

Regarded as a whole and as at present restricted, the *Carnivora* constitutes a group quite sharply defined among the class to which it belongs. Adopting the classification of such an eminent authority as Prof. Flower, the following scheme will present the reader with a very good idea of the *Carnivora* in their entirety:

Order.	Suborder.	Section.	Family.	Examples.
CARNIVORA.	Fissipedia.	Æluroidea.	*Felidæ*,	Lions, Tigers, Cats, etc.
			Viverridæ,	Civets, Genets, etc.
			Hyænidæ,	Hyæna.
		Cynoidea		Dogs, etc.
		Arctoidea.	*Mustelidæ*,	Otters, Weasels, Skunks, etc.
			Procyonidæ,	Raccoons.
			Ailuridæ,	Panda.
			Ursidæ,	Bears.
	Pinnipedia.		*Otariidæ*,	Sea Bears.
			Trichechidæ,	Walrus.
			Phocidæ,	Common Seal.

By comparing this scheme with the list given above, it can easily be ascertained which families we have represented in our own United States fauna. The land *Carnivora* may be either strictly terrestrial, as the dogs, foxes, etc., or arbo-terrestrial, as bears, raccoons and others, or marine, as the seals and walruses, which latter frequently come ashore for certain purposes, but only for very limited distances. None of the order have less than four well-developed toes on each foot, which in the vast majority of species support sharp and curved claws, but the inner toes are never opposable to any of the other digits. All have teeth of three kinds, viz., incisors, canines and molars; the first usually numbering six in either jaw, while the canines are conical and pointed, and the tuberculated molars vary considerably, though they are generally broad, with pointed cusps, and are well formed for the uses to which they are put, the cutting of flesh.

Among many species the mechanism of the jaw and associated parts, so constructed as to enable the animal to hold on with the greatest possible tenacity, is a subject of great interest. This is well exemplified in the skull of an old badger (*Taxidea americana*), which I have in my hand.

Here we find a powerfully constructed skull, roughly conical in form, with its base the occiput, and its apex the muzzle. The base is notably broad, and is roughened for the insertion of those great muscles, by whose aid the necessary strength is imparted to the remainder of the mechanism.

Passing beyond this, anteriorly, we next note the extensive lateral surfaces devoted to the origin of the temporal muscles, the power of which in the present instance must be enormous, and capable of closing the jaw like a vise. But this is not all, for turning to the joint composing the "hinge" of the jaw, a most remarkable structure is presented to us. We find the "sockets" (glenoid cavities) to be transverse, deep, and, measured on their transverse diameters, 2.3 centimeters long (about $\frac{7}{8}$ of an inch), while the outer half of the anterior lip of either one is curled backward, and the inner haives of the posterior lips are curled forward. When the lower jaw, now, is articulated in such cavities as these, with its own transverse condyles, its retention there is eminently insured, for I find in the dry skull before me, it cannot be "unlocked" without moving the jaw from right to left, when it may be detached from the cranium. But by opening the jaws, as the animal in life opens its mouth, I find that it cannot be detached by means of a direct pull, whatever the angle of opening may be; and this could only be accomplished by applying sufficient force to break off the lips or edges of the sockets (glenoid cavities), described above. Supplementing such a structure as this, we find the badger possessing a powerful armature of teeth, where the incisors fit closely together, the long canines cross each other, and the cusps of the rear upper molars fit into depressions of the teeth below, one upper molar, the next to the last one, even engaging, in this way, two of the lower molars, thus doubling the strength of the lock. No wonder a badger can hold on, when his teeth are once well in! Others of the larger and more powerful *Carnivora* show much the same arrangement of these parts, and the mechanism in the jaw of an old African lion is a subject worthy of study.

Another very interesting and well-known structure is the retractile claws of the cats (*Felidæ*), and of that as yet little-known animal of Madagascar, the largest carnivore of her fauna, the *Cryptoprocta ferox*. This arrangement, which is evidently intended to prevent the points of the claws from becoming blunted, is thus tersely described by an authority at my hand: "The last or claw joint of each toe is drawn back by ligaments attached to the penultimate joint until it assumes a perpendicular position, when the claw, which it supports, is completely retracted within a sort of sheath, and is entirely concealed by the fur. This is enected by the elasticity of the ligaments, and without any exertion on the part of the animal. But, when a cat is about to strike its prey, the claw joint is pulled down by the flexor muscles, and the formidable talons are then protruded, ready to be buried in the flesh of the victim."

As to their method of locomotion, *Carnivora* may be digitigrade, or the toes alone coming in contact with the ground; plantigrade, or where the entire anatomical foot is applied; and finally semi-plantigrade, or where only a portion of the foot, or rather the sole of it, is applied to the ground. Then of course there are the seals, which in their waddling means of progression while on shore may possibly at times combine all three of these modes of locomotion, but these last animals are more naturally swimmers, and but poorly adapted to terrestrial movement. The seals have been designated as the *Pinnigrada* by some authorities. Members of this order possess abdominal mammæ, which vary considerably in the several families, and as interesting points in their osteology, we are to note that the bony orbits in the skull are never complete, and the collar bones are frequently absent, and when present are but feebly developed.

Most of the *Carnivora* are typical flesh eaters, but Professor Flower speaking of this says that "The large majority of the species comprising this order subsist chiefly upon some variety of animal food, though many are omnivorous, and some few chiefly, though not entirely, vegetable eaters. The more typical forms live altogether on recently-killed warm-blooded animals, and their whole organization is thoroughly adapted to a predaceous mode of life. In conformity with this manner of obtaining their subsistence, they are generally bold and savage in disposition, though some species are capable of being domesticated, and when placed under favorable circumstances for the development of such qualities, exhibit a very high degree of intelligence and fidelity."

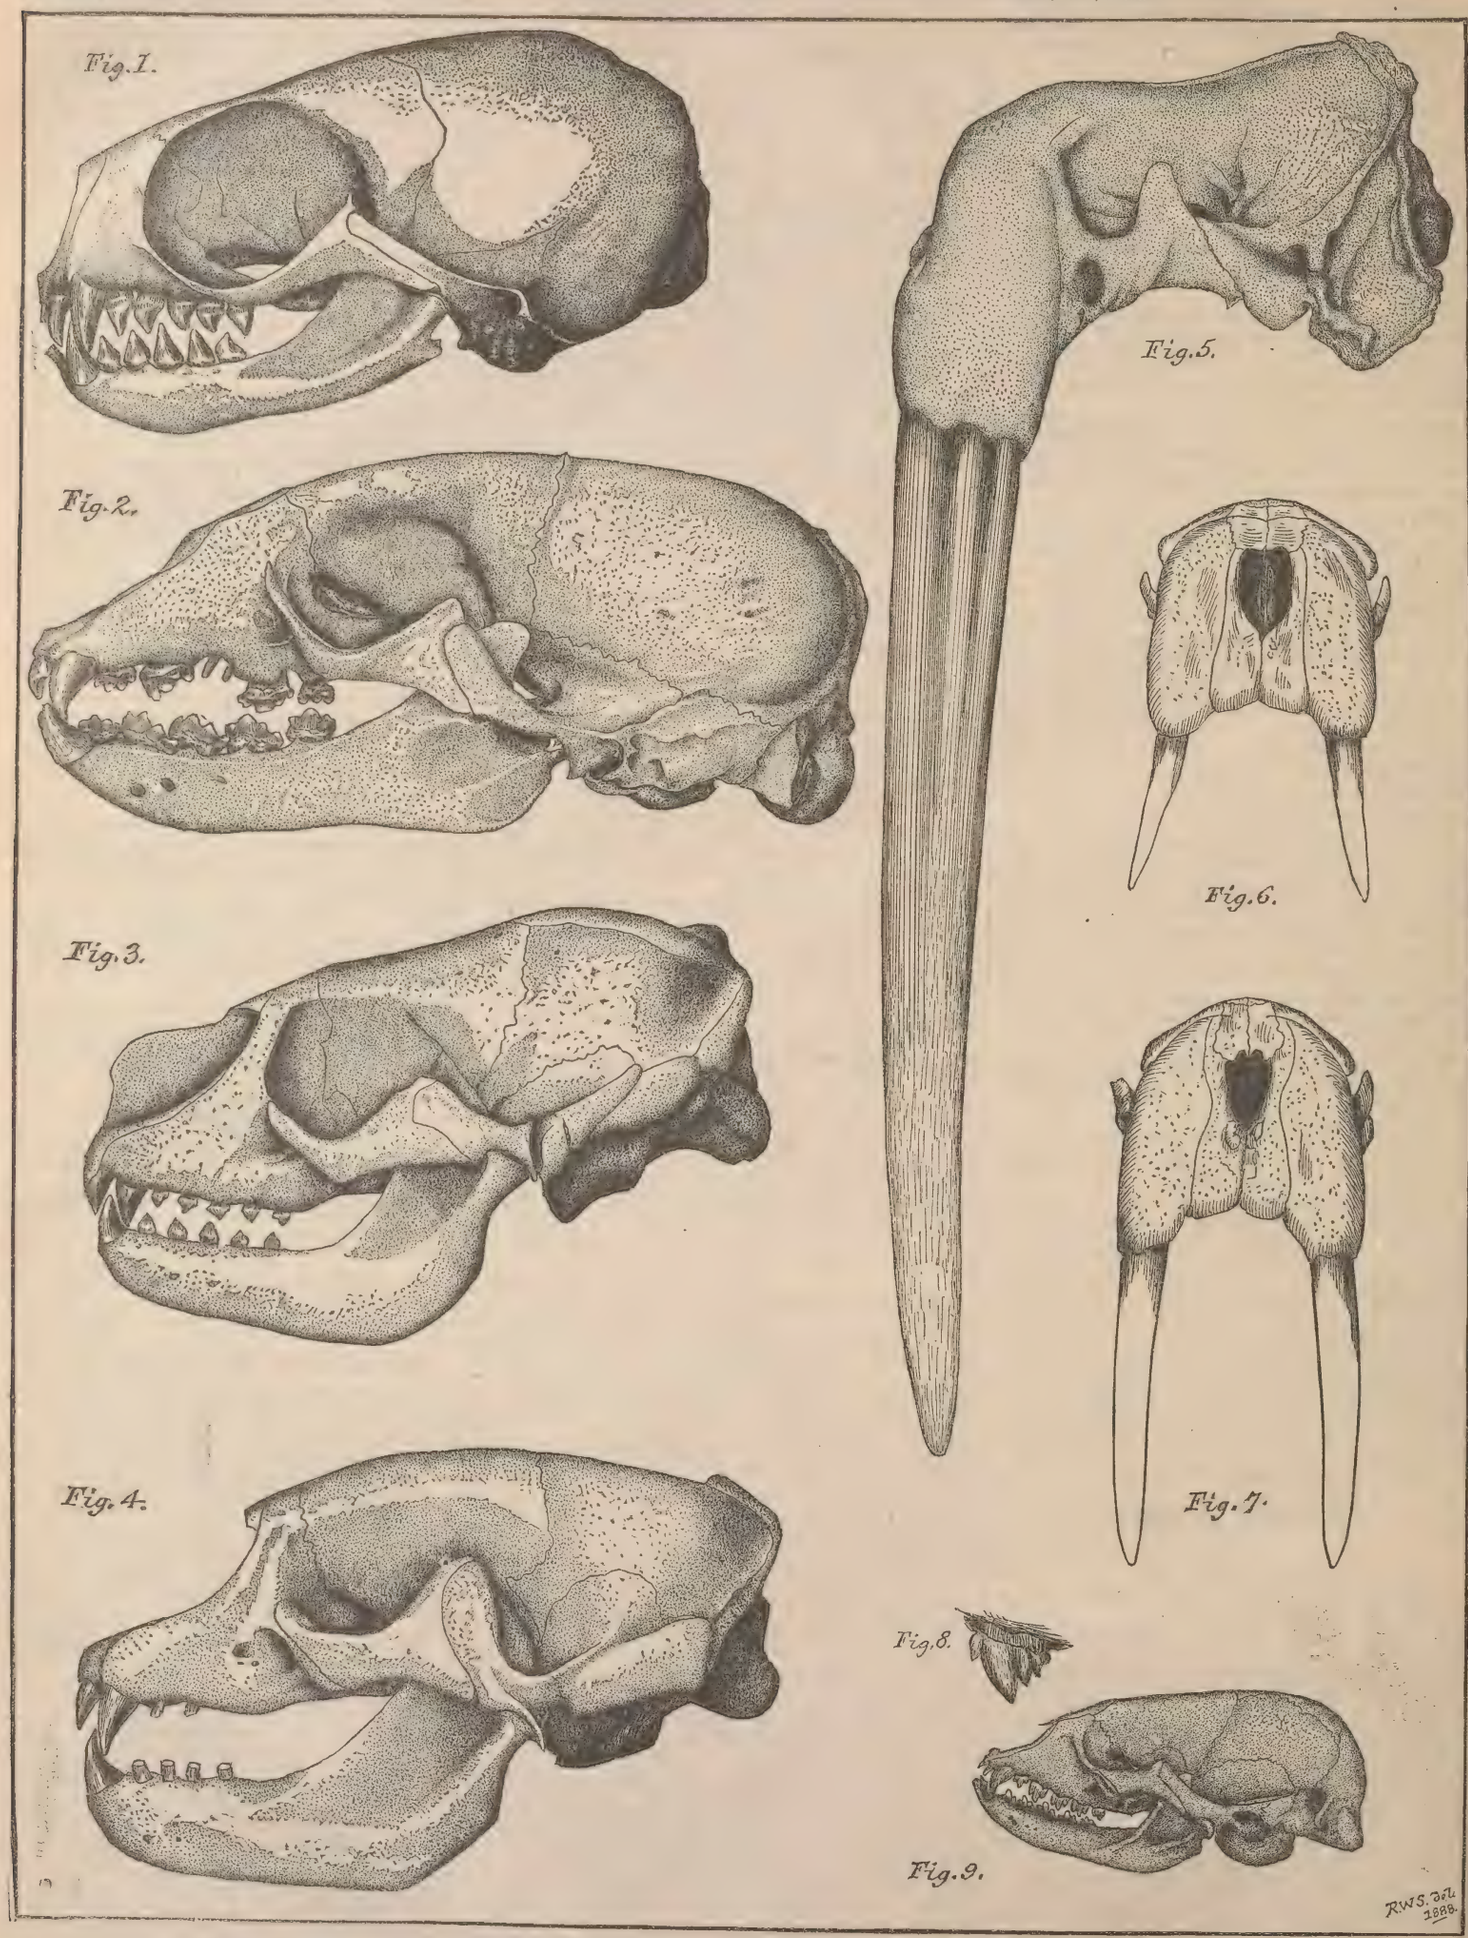
In studying the *Fissipedia* one must pay especial regard to the teeth, as they constitute highly important characters; for instance, it is an interesting thing to know that the dental formula, or the number of teeth in the jaws of an adult European badger (*Meles*) is different from that in our own species (*Taxidea*).

Carnivora, agreeing with the vast majority of existing mammals, are with respect to their teeth, diphyodont, or they develop and shed a "milk set." Now, taking the jaws of this American badger before me, a thoroughly matured animal, and consequently in possession of its full set of permanent teeth, we find in the upper jaw in front a row of six small teeth, the larger ones being at either outer end of the row. They are the "upper incisors," and in writing a dental formula are designated by the letter *i* (in italics). Passing around this upper jaw on either side, we find next quite a considerable interval wherein there is no tooth, and into which fits, when the jaws are closed, the canine of the lower jaw. This interval is called a *diastema*. Next come, on either side, the long curved and pointed canines or "laniary" tooth of the *Carnivora*, which in the dental formula is designated by the letter *c*. Immediately behind this canine tooth in the upper jaw, is a small pointed tooth, the first premolar, followed by another one behind it, about double its size and much the same in form—the second premolar. Glancing at the lower jaw we find two similar teeth there also. Now, behind these in the upper jaw, on either side, we find a third premolar, consisting of a very large tooth with its crown raised into two inner points and a broad outer double point. The third premolar of the lower jaw is a very much smaller tooth and is raised into only two fairly well defined points on its crown. These points are termed cusps, and the ridge encircling them at their bases, the *cingulum*. In the dental formula, the premolars are designated by the letters *pm.*, and in our *Fissiped Carnivora* these last premolar teeth are known as "sectorial" or "carnassial" teeth, being the last teeth in the jaw which have predecessors in the milk set. As they differ markedly in the different families and genera, much study has been given them. Now, the last tooth in the upper jaw of this badger, is a great broad tuberculated molar tooth, while we find two smaller molar teeth on either side in the lower jaw. This completes the dental armature of an adult American badger. But it becomes very convenient for us to write out these teeth for the various species of animals, in order that we may appreciate them at a glance; such abbreviations are known as dental formulæ, and the dental formula in our badger would stand thus:

$$i.\frac{3-3}{3-3}\ c.\frac{1-1}{1-1}\ pm.\frac{3-3}{3-3}\ m.\frac{1-1}{2-2}=\frac{16}{18}=34 \text{ total.}$$

Here the upper line of figures give the number of teeth in the upper jaw, and the lower the lower, and adding these together we find 16 in the upper jaw and 18 in the lower, or a total of 34 teeth in the skull of the animal under consideration.

Sometimes such formulæ are simplified by writing them thus: $i.\frac{3}{3}$, $c.\frac{1}{1}$, $pm.\frac{3}{3}$, $m.\frac{1}{1}=\frac{8}{8}$, and $\frac{8}{8}\times 2=\frac{16}{18}=34$ total. Written in this way, of course, only one side of the jaw is given, and we must multiply by two to get our total. It is hardly necessary to say that the teeth of either jaw are the same for either side of the jaw.



In properly studying the number of teeth in mammals, and formulating them in this way, we should have before us skulls of the very youngest specimens, and the series complete to include the skulls of adult males and females.

The hints I have been enabled to give above briefly indicate some of the more salient structural features of our *Carnivora;* and in future papers, upon seals, walruses, sea lions, bears, raccoons, the weasels and their congeners, the dogs and the cats, I hope to be able to enlarge a little upon such important matters.

As for fossil *Carnivora*, we find in recent geological formations the remains of forms which are the immediate ancestors of existing types, and the array of species is a large one, taking into consideration all these countries where the geology has been looked into. Passing still deeper, and into the older strata, these types soon begin to show in their fossil remains the evidences of generalization, so that typical *Carnivores* begin to disappear by insensibly shading into such groups as the *Insectivora*, and, no doubt, certain marsupial forms and others. Cope has grouped the entire lot, including our modern *Insectivora*, into his one order *Bunotheria*, a suborder of which, the *Creodonta*, seems to be most nearly related to our modern *Carnivora*. Fossil seals have also come to light from both the Miocene and Pliocene formations of this country and Europe; but thus far the types are only such as are closely connected with modern species, and aid us very little in ascertaining the origin of the suborder. What we hope for in this line is soon to meet, as some day we undoubtedly will, with those generalized phocine types which were the connecting forms standing between the ancestors of our existing eared seals, and those generalized carnivorous extinct types, from which the seals and walruses arose. No such remains have as yet rewarded our researches, and the forms that we have met with have a closer kinship with the true seals (*Phocidæ*) than with the eared seals (*Otariidæ*). It was probably from some time in the Tertiary age that these marine *Carnivores* date their birth.

BIBLIOGRAPHY OF THE CARNIVORA.—The bibliography of this order is very large, and it will be impossible here to more than allude to a few works which the student will find of great advantage to peruse in a general reading upon the subject. I present them without any special arrangement as to subject matter, or date of publication. Fuller, D., "Report on the Period of Gestation of the Puma (*Felis concolor*)," P. Z. S., 1832, p. 62. Martin, W. C. L., numerous papers on Carnivora in P. Z. S., 1830-42. Ogilby, W., numerous papers in P. Z. S. on carnivorous mammals, 1833-45. Owen, R., numerous list of memoirs in P. Z. S. touching upon the anatomy of Carnivora, 1830-1846, also "Anat. and Phys. of Verts.," Vols. I.-III., and many other works by the same authority. Waterhouse, G. R., memoirs on the order in P. Z. S., 1836-46, such for example as "On the Skull and Dentition of the American Badger," P. Z. S., 1838, p. 153. White, A., "Dissection of *Felis leo*," P. Z. S. 1844, p. 54. Gray, J. E., Mem. in P. Z. S. on Carnivora, 1848-70, pp. 21-430. Turner, H. N., Jr., "Obs. on Some Foramina at the base of the Skull in Mamm., and on the Classification of the Order Carnivora," P. Z. S. 1848, p. 63. Abbott, Captain C. C., "On the Seals of the Falkland Islands," P. Z. S. 1858, p. 189. Murie, James, "Notice of a Memoir on the Anatomy of the Walrus," P. Z. S. 1870, p. 544, and "On *Phoca grænlandica*, Mull.; its Modes of Progression and Anatomy, op. cit., p. 604. Huxley, T. H., "On the Cranial and Dental Characters of the Canidæ, P. Z. S. 1880, p. 238. Straus-Duckheim, "Anat. descrip. du Chat," 4to, 2 vols., Paris. Flower, W. H., "On the Value of the Characters of the Base of the Cranium in the Classification of the Order Carnivora," P. Z. S. 1869, p. 4. Mivart, St. Geo., "On the Classification and Distribution of the Æluroidea," ibid, 1882, p. 135; also his "Cat." Cope, E. D., "On the Extinct Cats of America," Amer. Nat., 1880, and other papers by same author. Allen, J. A., "History of North

American Pinnipeds," 1880. Van Beneden, P. J., "Ossements fossiles d'Anvers," pt. 1, 1877. Coues, E., Fur-bearing Animals," 1877. True, F. W. and Lucas, F. A., "On the West Indian Seal" (*M. tropicalis*), Smithsonian Rep., 1884, pt. II., p. 831. True, F. W., "On the Skeleton of *Phoca fasciata*," Proc. U. S. Nat. Mus., 1884, p. 417. Elliott, H. W., "A Monograph of the Seal Islands of Alaska," 1882; also by same author parts treating of seals and walruses, in "The Fisheries and Fishery Industries of the United States," 1884, 2 vols.

PROFILE AND OTHER VIEWS OF THE SKULL OF NORTH AMERICAN PINNIPEDIA.—DRAWN BY THE AUTHOR.

Fig. 1.—Left lateral view of the skull of the Northern fur seal or sea bear (*Callorhinus ursinus*); ♀, rather young, about ¾ natural size; after Allen.

Fig. 2—Same view of the skull of the West Indian seal (*Monachus tropicalis*); ⅔ natural size; after True and Lucas.

Fig. 3.—Same view of the skull of the hooded seal (*Cystophora cristata*); ½ natural size; after Allen.

Fig. 4—Same view of the skull of the California seal-elephant (*Macrorhinus angustirostris*); ⅛ natural size; after Allen.

Fig. 5—Same view of the skull of the Pacific walrus (*Odobænus obesus*), considerably reduced; after Allen.

Fig. 6.—Direct anterior view of the skull of the Atlantic walrus (*O. rosmarus*); very much reduced; after Allen.

Fig. 7.—The same view of the skull of the Pacific walrus (*O. obesus*); similarly reduced; after Allen. Figs. 3 and 7 go to show certain facial differences in the skulls of these two walruses, th Atlantic and Pacific coast forms.

Fig 8.—Shows form of tooth in the common harbor seal (*Phoca vitulina*); after Flower.

Game Bag and Gun.

BRANT SHOOTING AT CAPE COD.

THE past winter in New England was a very mild one, and migratory birds were seen earlier in the spring than usual. Brant made their appearance on the Massachusetts coast about March 1. The first one was shot at Monomoy March 12. About one-third of those killed later on were young ones, which gave promise of a good season's sport. The work of putting down boxes and building bars progressed finely, and before the middle of the month each of the four was in its proper place. It must be understood that boxes and bars are each a part of the same contrivance, the one being of no value without the other. Then came the great storm of March 16, that strewed our shores with wrecks, cast down trees and telegraph poles, devastated sandbars and beaches, and also utterly ruined our brant works, which sent dismay into the hearts of the branters. They struggled on, however, from day to day with a diligence known only to the busy bee and the bar builders. A box is planted in the flats today, wheelbarrows and shovels are industriously plied through the whole of low tide and a neat bar constructed around it. To-night the easterly gale continues and forces the tide high up over the box, and the big waves dash against the bar, and lo! in the morning not a vestige of it is left. It again simply forms a part of the great flats. The second day is merely a repetition of the first, with the same result. "Certainly," the men say, "to-morrow will end the strife—the storm must cease," but

> "To-morrow and to-morrow and to-morrow,
> Creeps in its petty pace from day to day,"

and for six wearisome days did the local members of the club with lusty sinews buffet the flood, each day losing ground, till at last all the boxes—except the mud hole—were out of the flats and had to be filled with sand to prevent their going ashore or to sea, as wind and tide might favor. So strong was the current that rushed through "Uncle Sol's drain" that the south box had to be anchored to save it.

The great Nauset high beach, which for generations has stood as warder of the channel, is now removed by the huge waves, and for more than a mile up and down, east of the club houses, each high tide makes a clean breach over the entire distance. From day to day the tide moves more or less of the sand westward, as the tide runs from east to west. Again, our heaviest of gales, which produce the highest tides, are from the east, and it is these sweeping tides that break up and move these immense sandbars and dunes. Nor can we predict where the end will be. If sand, like "the star of empire westward holds its way," then, wherever those powerful moving agents—wind and water—are found, all the sand and silt on the eastern portion must drift westward till it reaches some permanent island or continent. Any one familiar with the seaboard of our Southern States knows very well that all the land between the Blue Ridge and the sea has been formed in this way, and that the accretions are much greater on the eastern than on the western side of a continent.

But the sand is not destroyed. It has only been moved further westward, and being deposited in the channel has ruined that fine feeding ground, which is now graded nearly on a level with the great flats. The fishing ground, which extended from nearly abreast the club house to Chatham Light, a distance of about three miles, proved so attractive to the brant that every day they would be drawn across the flats to the rich repast. All these miles of eel grass are now buried under this same sand, and the brant have no place to feed, except in the bay or on the common flats, more than a mile to the westward of the boxes. A patch of feeding ground is still left to the northward of the flats, and in passing from the bay to this the birds are liable to come within sight of the decoys, giving some hopes of a continuance of a portion of the sport hitherto so liberally vouchsafed when the brant have to cross the flats to reach the channel. And then the brant, finding their feeding ground destroyed, have sought others at Nantucket, Muskeget and elsewhere, which have drawn away many of the birds that formerly fed here. Still, about the usual number have passed this point, and many of them have stopped in a friendly way to inspect their old haunts.

As soon as the storm ceased the hummock box was replaced and a bar thrown around it. On the 27th of March, eight men with wheelbarrows and shovels were employed to put in place the north box and build the bar, which was covered with heavy canvas. This is supposed to hold the box in place against ordinary tides and winds. Still we doubt if a canvas cover has so winsome a way, so easily beguiles the birds, as a natural or artificial sand bar. They seem to view it with suspicion, nor do they ever fraternize with our live decoys in that degree of confidence they would on a natural bar. On the 29th the south bar was planted and sand wheeled around it to form the bar. This completes the placing of boxes. Not so the work of keeping in repair the boxes. Every high tide and wind cuts them away more or less, which damage must be repaired before they can be used. The mudhole alone survived the great gale.

The Manchester, Providence and Monomoy clubs have this season, as for several years past, united as one club, each assuming control of the property and privileges for a definite period. By this plan we have avoided unpleasant antagonisms. The records of the three clubs are kept on the journal of the Monomoy Branting Club just the same as if it were one club, and this may stimulate a little pleasant rivalry to see which of the parties is the best shot.

We may indulge possibly in a just degree of pride at having been one of the originators and organizers of the M. B. C., that we believe we have the most perfect club journal in the United States. Here are two volumes and part of a third, containing about 800 folio pages in manuscript, covering a period of more than a quarter of a century, embracing minute details of the doings of the club, with all the names of the persons present at the club house, with portraits of many of them, the box each lay in, the number of birds killed at each box, the condition of the weather, winds, tides, mercury, prospects and probabilities, together with any remarkable incident that occurred, such as wrecks or vessels ashore, great flight or scarcity of birds, or any other item that was brought forward and discussed. The endeavor has been to keep so perfect a record of the doings of the club that our successors may be able to compare the shooting of their day with that of ours—the results of the past with those of the future. We should be very glad if any person or club having a more perfect journal than ours, or one covering a longer period of time, would kindly inform the editor of FOREST AND STREAM.

The first regular weekly party went to the club house March 20. Previous to that date 23 brant had been killed. As the havoc of the great storm had not been repaired, only two boxes being available, the party killed only a dozen brant. The second party, March 27, found the south box still anchored on the flats. Although there were a goodly number of birds in the bay, they did not shore well, and the week footed up only 22 brant. The third party was more successful, bagging 61.

The Providence Club came in April 3 as the fourth party with a bag of 51. The last regular party was the Manchester Club, which had the good fortune to beat the Providence 8 birds. Between the departure of the fourth and arrival of the fifth the local members killed 22 brant and made two decoys.

This matter of keeping up the supply of live decoys requires skill and tact. The club wants about fifteen live decoys, in addition to some hundreds of wooden ones. But in the course of events each year, many of the live decoys sicken and die. To make good this loss, care must be taken to save any brant that is wounded in the wing near the carpus, and a portion of the wing is amputated; then, if it survives, it will be counted as a decoy. Sometimes such a wounded bird gives his pursuer a long chase, especially when wind and tide are in his favor. Before breechloaders were so common such cripples must be captured alive or lost. Not so now. As soon as a shot is made, the occupants of the box rush out, breechloader in hand, and if it is found the cripple can keep pace with his pursuer he is shot and lost as a decoy. Particularly is this done where the pursuit is long and the water on the flats grows deeper. But with proper pains we have been able to keep our stock of decoys fairly up to our needs.

Our season for shooting usually ends about the 25th or 26th of April. There are many people whose business cares weigh heavily upon them as the warm weather approaches who are glad of an opportunity to escape for a week's rest or recuperation. We know of no place where this can be accomplished more rapidly than in the pure air of Cape Cod. Forty years ago one could find fair shooting almost anywhere along our shores in spring. Not so to-day. The brant shooting is about all that is left for the sportsman. There was a supplementary party made up of such individuals for April 24, but we do not presume this will materially change the results of the season's work, which foots up 250 brant. This is a little less than the average for the past twenty-five years, but when we consider the rapid decrease of all sorts of game, it may be regarded as quite satisfactory. Then again these birds for several years have been shot in winter on their feeding grounds at Hatteras Inlet and Pamlico Sound. One man from Chatham last year killed over 1,300. The birds before they arrive at Cape Cod have been educated to keep clear of all suspicious objects. If a Northerner can go down there and make a few hundred dollars each winter it will set the natives, who are not a wealthy class, all crazy. As they are all good gunners, they will not be likely to let the opportunity slip to take a hand at that game. W. HAPGOOD.

BOSTON, Mass.

HOLLOW BULLETS.

Editor Forest and Stream:

Absence from home has prevented my writing sooner, with reference to a letter by Mr. Stark in your paper for Feb. 28, respecting the behavior of hollow bullets in his Winchester rifle.

It is evident, from his description, that the hollow is too small for the charge of powder and hardness of the bullets. Any required degree of either smashing or penetration can be obtained by modifying the hardness of lead, the depth and diameter of the hollow or the proportion of powder, always remembering that penetration decreases as smashing increases.

Mr. Stark might find his bullets act more satisfactorily if the hollows were filled with beeswax instead of copper tubes, and no doubt making them of pure lead would have a still greater effect; but perhaps the accuracy would be slightly decreased, as the proportion of tin which he mentions is that recommended by the Winchester Company for their rifles. Their 300grs. hollow bullet is made for 125grs. of powder, and if it act properly with that charge, the size of the hollow ought to be increased when only 100grs. are used, in order to obtain the same degree of expansion.

The .45 express bullets used with British rifles generally weigh from 260 to 280grs., and are hardened with $\frac{1}{16}$ to $\frac{1}{9}$ of tin. The hollow is of such a size that with 110 to 125grs. of powder the fore part of the bullet, shortly after passing through the skin of an animal, breaks into pieces which tear a terrible wound, the base, in shots behind the shoulder, generally penetrating to the opposite side of the chest. For side shots at that part nothing can well be more deadly, but as it is often necessary to fire at the point of the shoulder, or at the space between the hindquarters when animals are running straight away, it is better to have the hollow of such a size that the bullet, instead of breaking up, will expand into a mushroom shape. It will thus give great striking surface, and at the same time penetrate deeply.

With the large hollow generally used I have had a bullet from my own rifle tear out a great mass of flesh from the inner side of both hindquarters of even a small-sized deer, and not penetrate any further. Of course in such a case the game is unable to get away, but a second shot is necessary to put it out of misery; and besides spoiling the meat, a disgusting smash of that kind is not satisfactory to a true sportsman. I once shot a spoonbill duck at 120yds., and the bullet carried clean away the whole of the chest and abdomen with the skin which covered them.

The hollow in bullets is generally reduced by diminishing its depth; but for rifles with a slow twist it is better to diminish the diameter and leave the depth unchanged. The accuracy is thus maintained for long shots, because the proportion of weight at the base of the bullet is not increased. When the old English rifles of the British army were converted into Schneider breechloaders, bullets with a hollow in the center were substituted for the solid kind previously used. These were found to give greatly increased accuracy at long ranges, doubtless through keeping up their spin on the principle of the flywheel. The grooves of the rifle had only one turn in 6ft. 6in., which was not enough for the solid bullets.

Mr. Stark speaks of trying the expansion of his bullets in wood or sand, but this will not give a correct idea of their behavior upon game. There is, I believe, no way of testing it except firing into the carcass of some animal. The 100grs. which he uses are quite sufficient for an express charge. Mr. Selous, the celebrated African hunter and explorer, uses .45 rifles with only 90grs. of powder and bullets of 360grs. As he states that these are perfectly satisfactory upon various large animals, including lions, there is no doubt but that the bullets expand properly. J. J. MEYRICK.

DUBLIN, April 5.

DEER HUNTS IN BRITISH COLUMBIA.

CACHE CREEK, British Columbia.—We were blessed with an abundance of game through the season, and with exceptionally fine weather for hunting it in. The rifles in general use here for deer and other large game are the Martini-Henry, and the .45-90 and .40-82 Winchester, model '86. They are all good rifles for the business, the timber being open, and long-distance shooting having frequently to be adopted. I use a Martini-Henry, and I find it more difficult to hit the broadside of a deer, at a distance of 100yds., than to knock over a grouse at the same distance. There is a glorious uncertainty about that ridge of furze along a deer's back, that makes him appear taller than he really is, sometimes, and causes the hunter to feel sick as he notices that his bullet has ranged too high, and instead of penetrating the animal's heart has torn a tremendous hole in the snow at some distance beyond.

On Thanksgiving Day I secured a cayuse, and shouldering my rifle, started off for a mountain, the base of which is about two miles from here. The ascent was easily made, and scarcely had I reached the first bench when certain sounds indicated the presence of deer, a little to the north of me. Steering in that direction I had the pleasure of seeing a fine buck standing on the side of a gentle rise that led to another bench a short distance above me. I judged him to be 20yds. away, and getting off the horse I adjusted the sight, and was about to call him when I noticed a still larger one standing to the right of me, under a large fir tree, whose branches nearly touched the ground. The background was so dark that I could scarcely make him out, but from some cause or other I turned and blazed away at him. Not a move did he make, and after blessing myself for shooting at a lump of mud when a real deer was in sight, I remounted, when what was my surprise, to find the supposed lump of mud bounding gaily out of sight over the ridge. I pushed on up the hill and had nearly reached the bench, when a great snort caused me to look up, and there stood my friend, looking straight at me, not 50yds. away. The cayuse was blowing so with climbing that the rifle was carried from one side to the other, and in spite of all my efforts to pull at the right time I scored a clean miss.

Seeing that this would not do, I threw the bridle over the horse's head and started to follow up the deer on foot. I had not gone far when I saw a doe standing on the top of a rock about 100yds. in front of me. Taking aim at her shoulder, I had the satisfaction of seeing her fall backward off the rock, but the next minute over the rock came a doe, and directly towards me. A snapshot failed to connect, and the deer sped down the hill in the direction I had come. Going up to the rock to investigate, I found the snow painted red in all directions, and that the deer that had passed me was the very one I had wounded. Following down the mountain, on her trail, it led into some thick undergrowth, in which I found her, but she hustled off so lively, at sight of me, that I failed to get a shot. Seeing open ground a little way ahead, I hurried along, and reaching it, the next snapshot proved successful, and the doe was my victim.

Hastily bleeding her, I started back for my horse, and as I was about to hitch the deer to the pommel of my saddle, I saw a buck coming down a small gully toward me. My gun was standing about 10ft. away, and while I was getting it, he saw me and stepped behind a tree, from the side of which I could see one eye and about half his head as he watched me. I mention this, as I frequently have seen deer doing it, and have not noticed any of your correspondents mention it. They glide from tree to tree so quietly, and show so little of their heads past the side, that they may easily be gone by without being seen. Fortunately for me, the next tree was smaller, and his ribs were in sight on both sides of it. Taking aim, I blazed away. At the crack of my rifle he ran up the brush, apparently unhurt, but I afterward found that the bullet had passed under three of his ribs. Hurrying along, I soon came to an opening, where a good view could be had. Sitting down, I fixed my rifle sight for 200yds., and had got a breath or two to steady me, when out came my deer and turned broadside to me. Laying the gun over my knee, I succeeded in planting the bullet through both his front shoulders, thus completely disabling him.

I had now secured plenty of meat, but the next thing was how to get it home. The cayuse is a very uncertain animal, and mine proved no exception to the rule. He refused either to draw the deer or come without them, in spite of my persuasive powers (a spur and a fine switch). Finding that I could neither ride nor lead him, I got him backed up to a tree, where I tied and left him, going home on foot. There I secured a better animal, and a friend coming along, we succeeded in getting the cayuse, as well as the deer, safely home before dark.

On other occasions, which I may write of again, I have made better shooting, and got larger deer, but the sport and exercise combined on that occasion were about the best I have experienced during the season. No very large antlers have fallen to my rifle, though other hunters in the neighborhood have secured some fine specimens, but there is no kick coming to me, for all my deer have been very fat, and their meat very tender. C. C.

OHIO.—Ironton, May 20 —I was out on the old camp ground this week and found game in the greatest plenty; never saw the like of quail, rabbits and squirrels. We look forward to a splendid hunt next fall. Wild turkeys are plenty; I saw five gobblers in one bunch; the hens were out on business—laying eggs.—J. D.

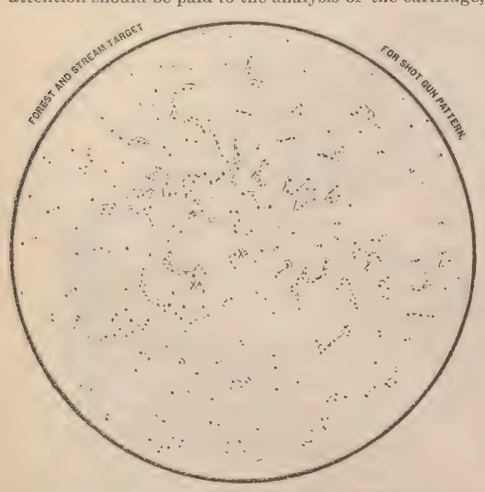
THE "FOREST AND STREAM" GUN TEST.

PATTERN AND PENETRATION.

No. 1 Remington 16-Gauge Hammer Gun.

THE test of the various makes of guns now on the American market, which has been undertaken by FOREST AND STREAM, has made sufficient progress to show that just such a trial is greatly needed. It is not to be a grand tournament test, in which each manufacturer will bring out his crack gun carefully made and bored for fine targeting, but it is to be a continuous trial, with appliances ready at any time to be utilized in trying one or another of the myriad questions which are popping up in gun practice.

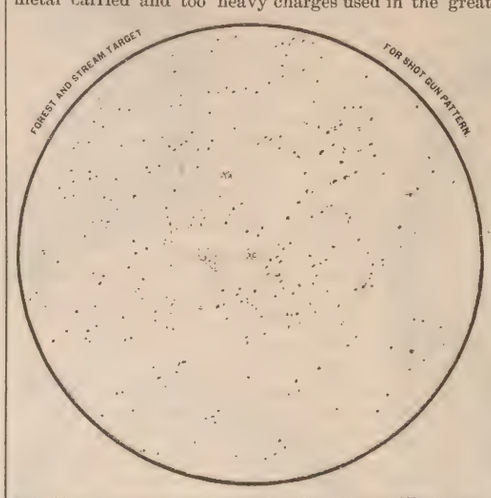
Already several weapons have made their mark, and the makers of the more popular styles of arms are specially anxious to have their wares put through the trial. The fashion of testing is very simple. At Claremont, on the convenient range of the Suburban Shooting Grounds Association, FOREST AND STREAM had erected



REM. 16-GAUGE, SCHULTZE POWDER, RIGHT BARREL, 290 PELLETS.

for its use a stout screen. It is not put up for a day or a season, but for many seasons, and is ready to withstand the peppering which the testing of a thousand guns would subject it to. The gun to be tested has its pedigree taken, what its shop number is, what length of barrel, what weight, what make, etc., etc. Then the conditions of the weather are noted, and then with five shots from each barrel taken at once for pattern at a fixed 30-inch circle, and for penetration at a pad of Dennison paper, a good average may be reached. To get the maximum effort of the gun, three shots at large sheets are taken with each barrel, and the 30-inch circle struck where the pellets lie thickest. All this is done at 40yds. and again at 60yds., and then with three cartridges for examination at the office the performances of the gun in its entirety may be very well judged.

This is the programme for each and every gun, and it was this which a neat Remington, gauge 16, of the original Ilion output, went through on May 17. E. A. Summers was the owner of the handy little weapon, and he fired it himself over the fixed rests provided. He knew the gun was a long and hard hitter, for in company with Mr. Lorillard he had enjoyed capital sport with it. He was particularly desirous of trying it with his favorite Schultze powder as against the best black powder, and so the double trial was made under the same weather conditions, giving not only a basis for judging the gun, but the comparative merits of the two powders as well. The Schultze cartridges were loaded by Mr. Summers, while the black powder charges were made up by Von Lengerke & Detmold, without any knowledge that they were to be used in any formal test.



The trial passed off without incident, and the detailed formal report annexed will show just what the two varying charges of powder did under the careful aiming of the gun owner. In estimating for pattern performance, attention should be paid to the analysis of the cartridge,

REM. 16-GAUGE, SCHULTZE POWDER, LEFT BARREL, 326 PELLETS.

since this shows the average charge of shot used, and of course the percentage reaching the 30-inch circle is the proper criterion of performance. In the same way the sort of shot used in connection with the kind and quantity of powder must be regarded in judging of the penetration showing.

The cuts show the distribution of the pellets on the circle, *A* being the point of aim and *C* the center of the struck circle. In one case the best showing of one of the barrels was upon one of the fixed circles. It would be easy to generalize upon the first exhibit of a gun in the FOREST AND STREAM series, but it will be safer and more satisfactory to draw conclusions after a hundred or more weapons have been tested, and this we hope soon to make. The present published report is interesting as showing what a small-gauge gun can do, and in this time of tendency toward smaller caliber in rifles it is only fair to ask whether there is not too much heft of metal carried and too heavy charges used in the great

REM. 16-GAUGE, DEAD SHOT POWDER, RIGHT BARREL 208, PELLETS.

bulk of shotgun work. In taking the centers for the maximum effort circles, the distances between the centers fired at and the centers used in striking the circles are carefully noted, as they go to show what may be termed the average aberration of the weapon. In this test they ran as follows:

CHOICE OF RIFLES.

Editor Forest and Stream:

The .25cal. rifle is called for. I rise to second the motion. I am now "on the fence" between getting a rifle of .22cal. or one of .32. Neither exactly suits me. The .22 gets foul easily and is so difficult to clean, and worse still, allows so much well-hit game to escape to a lingering death, that its most ardent admirers must admit its defects. The last is a serious matter here, where one may find unexpectedly a deer, coyote or turkey. But the .32cal. tears a destructive hole in birds, and sends a dangerously large slug of lead through pastures and fields where may be people or stock. Now that the small-bore agitation is lively, let some enterprising firm bring out a .25cal. Why not? AZTEC.

MEXICO, May 15.

Editor Forest and Stream:

"Happie Go Luckie," a letter from whom appears in your issue of Feb. 7, has been my chosen companion in many a shooting expedition in which the amount of game bagged has been small, very small, in comparison with the amount of work done. But what would you? We had a good as well as fast rowing boat under us, the to me unequalled beauties and glories of Long Island Sound, ever changing but always attractive to look upon, a multiplicity of old wives, etc., to cause consumption of a great quantity of ammunition, a pleasant home to return to when tired, and I think we were fortunate.

In my opinion the Winchester single-shot rifle, with its .22-15-45 cartridge, seems to be slightly ahead of the many other .22cal. rifles I have seen used. Of course, if you have more than one barrel you practically have more than one rifle. I am speaking entirely of outdoor shooting, most of mine having been done upon the water, or at least at objects upon the water. The distances were in many instances, in fact generally, beyond what would be considered possible with the "short," which we generally used at that time. Then came the U. M. C. long rifle cartridge, and though there was an increase in penetration and range, there was also an increase in the report; and there is much to be said in favor of the short cartridge on that account.

If you are shooting on the water, as a rule, the less noise you make the better, and if you can also reduce the

report of your rifle, you will in all probability obtain considerably more chances than you would otherwise. As to length of barrel, I think the 26in. to be an advantage over the 24. There can be no doubt that a rifle made with a stock similar to that of your favorite shotgun would be an improvement upon the ordinary stock such as you see upon the majority of rifles. There can be no reason why your rifle should not come to the shoulder as smartly as your gun.

In the last catalogue of the Winchester Co. mailed me, they advertise the fact that they will put "shotgun stocks" upon rifles purchased from them, if desired. This seems to me a step in the right direction. HAL.

Editor Forest and Stream:

The very able article by W. D. Zimmerman in your issue of May 2, meets my most hearty indorsement.

Every one fond of rifle shooting at small game has doubtless felt the need and necessity of a little larger caliber than .22 and one not so large as .32.

The improvement of late years both in make of rifles and in ammunition have made the .22 a most desirable gun, but really it is out of its sphere outside of a shooting gallery, and the objections to it are many.

I use the Frank Wesson rifle, and a few years ago I had him make me a .25cal. barrel. It was just what I wanted and had been wanting for a long time, but the only cartridges I could obtain for it were so unsatifactory that I had to abandon it, and I had my barrel rebored to .32.

As Mr. Zimmerman suggests, I would be glad to hear from others on this subject, and I think there will soon be made such a general demand for .25cal. rifles that the manufacturers will readily turn out ammunition with the improvements of both the .22 and .32 to meet the demand.

And further, I predict that the .25cal. rifle, "a happy medium between the .22 and.32," will meet with a wonderful sale. MACN.

A GOOD DAY WITH THE DUCKS.

I HAVE been very much interested in the articles in your good paper from the pen of Mr. Hough, of Chicago. I have read accounts from Mr. H. in other papers, and he always seems to master what he undertakes. In his decriptions of the different clubs in and around Chicago, their grounds, houses, boats, he proves very distinctly what money can do. A man gets in his boat with a pusher, has his decoys, goes to a good place, gets into a blind with his decoys in shooting distance; the ducks come, and the man shoots until his gun burns his fingers, unless he takes time to cool it. After shooting this way all day, and loading his boat, he is rowed back to the club house, and says he has had tolerable good luck. If he has been out half a day and killed 25 ducks he kicks and says there is no game.

This is very different from my experience in duck shooting, which has been confined to central Missouri. There is a place in Charito county, where, when the season is good, ducks come in great numbers, and I have spent many a happy day in this place. We had no boats, no decoys, no blinds.

There are three or four lakes, some of them half a mile wide, and a small river runs through this bottom. When the birds are not on the lakes they are on the river, when some good sport is had; a good gun will kill a duck across this river, but it is very essential to have a dog that will retrieve.

On one bright November morning in 1882 a friend and myself at an early hour started for this bottom. I was armed with a No. 12 Parker, and he had a No. 10 muzzle-loader. I had fifty shells and he had a pound of powder and three pounds of shot. It was 8 o'clock when we reached the ridge on the south of the bottom, and such a sight I have never beheld before nor since. The ducks were flying south in great swarms of 25 to 300. My heart sank as they passed over us too high to shoot. We hurried to the bottom, hoping to get a few shots before they all left. As we entered the timber my companion discovered that he had lost his shot. Hadn't enough to load one barrel. We drove on to a little horseshoe-shaped lake. I got out and left him to mind the team, and as I crept up and peeped over the bank I found the lake perfectly alive with mallards and teal. With each barrel I got a duck.

We had an old setter that a friend in town had insisted on our taking. He was very old and almost deaf, but he was a good one. He retrieved both of these and I moved on a short distance to the river, which was also full of the birds. It was no trouble to kill them in the river if we could see them before they saw us, in which case we would locate the place by a tree or log, and go around and come up to the river at this point; this would most always bring us within forty yards of the game. That day is one that I will never forget, as it was the biggest duck day I ever had. At about 4 P. M. I was standing by a lake when a mallard came along about thirty yards from me over the lake. I let her down and the old dog started after her. As he reached to pick her up she flew and went diagonally across the lake, struck a tree on the opposite side and fell. The dog, instead of coming back to me, started across the lake after her. He had been in the water twenty times that day, sometimes breaking the thin ice around the edges. When he reached the center of the lake he stopped and lay down in the water with only his head visible, some 200yds. from the shore. I walked around, picked up the dead duck, and for the next hour tried to call the dog out, but he wouldn't budge. I shot three or four ducks as they flew over, but he still remained. There was one thing sure, I couldn't go back without that dog, so I built a big fire close to the bank, got a pole, broke the ice at the edge of the water, and began to undress. By the time my feet touched the cold ground, to my great delight, I saw the dog start, he wiggled along slowly, and I met him at the water's edge, took him in my arms and carried him up the bank to the fire, wrapped him in my overcoat, and in twenty minutes he was shaking like an aspen leaf. In about an hour he was ready to get in the buggy. It was then dark and we had eight miles to drive. We counted seventeen ducks after we got back to town, before we had given away any; four of these I took home. I was more than satisfied with this day's hunt, and have never had another one as good. MISSOURI.

SEDALIA MO.

INCIDENTS IN MY HUNTING LIFE.—I.

IN 1863, the first week in May, my brother, home from Australia on a visit, and myself, visited my traps over a line, out and in, of sixty miles, about the Rangeley Lakes. We had secured some fur pelts, gathered some nice spruce gum and caught some fine trout; also had shot some ducks and other birds, all of which we had loaded into our birch canoe at the headwaters of the Cambridge River, which empties into the Umbagog Lake in the town of Upton, in Oxford county. As we floated down the river in our frail shell, we natually felt proud of our week's hunt among the lakes and mountains of old Maine.

The river had just opened after a hard winter, and ice was running freely, and the banks were full, as is usual when the ice first goes out. We took turns steering and paddling the canoe, so we occasionally changed seats, the one in the bow sitting on his knees with gun in hand, ready to shoot any game that might present itself, and as we swiftly turned sharp bends in the river, we often got a shot at a duck or a muskrat or mink or other game.

Toward night of our last day, and when we were within a few miles of the lake, as I sat in the bow with gun in hand, and my brother was paddling, as we shot through a straight open space in the woods, I saw three wild geese very near and almost directly over my head. I drew up instantly and snapped. The cap did not explode. I cocked the gun again, keeping my aim on the geese as they passed over me, and bending backward over the edge of the canoe I pulled again.

I did not hear the report of the gun, but I saw the fire issue from the muzzle, as we were soused into the icy water, and the canoe, bottom up, went swiftly down around a sharp point into a large eddy out of sight. So suddenly were we capsized that I took in a whole mouthful of water, which strangled me so I could not speak, but made a hoarse gurgling noise trying to get a breath. I struck out at once on coming to the top, and soon reached the shore and got hold of the bushes and dragged myself out and ran across the point, and way down in the center of the eddy saw my brother swimming away for dear life, which was hard work, he having his overcoat on. The canoe came ashore on the side we were on, but we had lost most of our plunder.

My brother declared the gun did not go off, as he did not hear it, but I knew it did, for I saw the fire, probably the water was between my eyes and ears when I saw the fire but did not hear the report.

"Did you kill the geese?" Well, everybody asks that.

My brother went back to Australia soon after; but first made me promise to write him after I had found the gun, if it was empty or not. That summer after the river got down to low water mark I went up and fished up my gun and some traps. I found the gun empty and so wrote to him. It was a curious sight to see the fire belch forth from the muzzle of that gun and not hear a sound. J. G. RICH.

NOTES FROM OHIO.

SEVILLE, Ohio.—*Editor Forest and Stream:* I am of the opinion that spring shooting ought to stop, in fact should have stopped years ago; but unless adopted by other States north and west such a law will make little difference here. The supply of ducks in this section has decreased rapidly in the last ten years. What causes are at the bottom I am unable to say; probably the constant clearing up of the country and the consequent drying up of the marshes have much to do with it, but more than all else, the merciless slaughter wrought by improved arms and appliances in the hands of the host of shooters from Maine to California. I do not believe that there is one duck in existence to-day where there were a hundred ten years ago. In some localities the difference in numbers then and now may not be so noticeable, but taking the country over, one will find that the rule holds good. Fifteen years ago the green-winged teal was very plenty in this section, then suddenly they disappeared and the blue-winged took their place; what the cause was I never knew, all I know is that greenwings are among the rare ducks with us now, while the bluewings are as plenty as any that visit us, with the exception of the ruddy ducks perhaps.

I understand that the different varieties have been quite plentiful this spring at the lake, and I have noticed quite a number of pintails, mallards and other marsh ducks on the overflowed fields along the outlet; no one seems inclined to violate the law to any extent, so the ducks quack and grow fat in places where in former years they had to keep a sharp lookout. I suppose it is all right, but it is a little hard to read of such good shooting as the boys are enjoying in other States and not have any yourself, even if the game comes right into your back yard.

Quail and ruffed grouse wintered well, and prospects for next fall are first-class, as but few birds, comparatively, were killed last season. CHIPPEWA.

CHICAGO AND THE WEST.

CHICAGO, Ill., May 21.—Mr. W. B. Leffingwell, author of the widely-known book, "Wild Fowl Shooting," is in town to-day visiting with his many friends. He returns to his home at Clinton, Iowa, soon.

The Western Arms and Cartridge Co.'s doors were closed last Saturday by the sheriff. At this writing it is hard to speak definitely, but it is thought that arrangements will be made for a continuation of the business. This is sincerely to be hoped.

Barring any laudable and legitimate game shooting at this date, our boys are shooting inanimates now, and in a most singular place. They have a set of traps arranged out on the Government pier, on the lake front of the city, and therefore accessible by a few minutes' tug ride. The birds are thrown so they fall in the lake. The boys seem to think it is a lot of fun to go out there and shoot, and the only wonder is that no one has thought of this before.

The adjourned special meeting of the Grand Calumet Heights Gun Club will be held at Grand Pacific Hotel, Wednesday, May 22, at 1 P. M., to ratify action of the board of directors in making purchase of twenty acres of additional land, and to consult upon further improvements in the matter of buildings and grounds.

Friends from Omaha say that sporting matters never had more interest in that wonderfully live and growing town than to-day. The trap especially is booming. Nebraska remains one of the best game States in the Union. E. HOUGH.

BUCKSHOT LOADING AGAIN.—Mexico, May 15.—Two queries in your issue for April 25, show that others besides myself are interested in this question. In W. W. Greener's interesting little volume, "Modern Shotguns," p. 147, is the following: "To select buckshot which will suit a particular gun, put a wad in the muzzle of the gun about ½in. down, and fit the shot in perfect layers. There is no need to try them in the case, as it is immaterial how they may fit there. Buckshot which will average 9 pellets to the 1¼oz. will generally fit a full chokebored No. 12 gun, 3 shot to the layer." Now as I have just such a gun I should gladly try the experiment but can't get the shot in this country. Will some one more fortunately situated try it and report? The hunting here is of such a character that it is of the utmost importance to have a few cartridges loaded for large game. Mr. Greener says also that good results may be had from firing a ball from chokebored guns, provided the ball fits the muzzle. This I hope to try.—AZTEC.

MARYLAND.—Sandy Springs, May 17.—We have had a very superior winter for all sorts of game, and will have an abundant supply next fall.—J. C. B.

MINNESOTA GAME LAW.

Chapter 443. An act to amend chapter 374, of the laws of 1887, entitled, an act to secure the better preservation of game.

Section 1. It shall be unlawful to take, catch, kill or have in possession when killed or taken, any woodcock, between the fifteenth day of December and the succeeding first day of August.

Sec. 2. It shall be unlawful to take, catch, kill or have in possession when killed or taken, any quail, partridge, pheasant or ruffed grouse, prairie hen or prairie chicken, sharp-tailed grouse or grouse of any other variety, snipe, plover or wild duck of any variety, or wild goose or brant of any variety, or any aquatic fowl whatever, or any squirrel of any kind whatever, between the fifteenth day of December and the succeeding first day of August.

Sec. 3. It shall be unlawful to kill or take by any means, contrivance or device whatever, or pursue with intent to kill or take or worry, any deer or buck, doe or fawn, between the first day of December and the succeeding fifteenth day of October, or to hunt deer, buck, doe or fawn with dog or dogs at any time. And it shall also be unlawful for any person or persons to sell or expose for sale, or have in possession for the purpose of exposing for sale, any of the kind of game, birds, animals or venison protected by this act after the expiration of eight days next succeeding the time limited and prescribed for the killing of any such birds or animals.

Sec. 4. It shall be unlawful at any time to take, catch or kill, or attempt to take, catch or kill, any of the animals or birds mentioned in the first three sections of this act, by means of any snare, net, trap or spring-gun or any other contrivance; and it shall be unlawful for any person or persons to place, spread or set anywhere, or permit to be placed, spread or set, any net, trap or snare for the purpose of catching, taking or killing any of the animals or birds mentioned in the first three sections of this act; and any game warden, deputy game warden, sheriff, coroner or constable having reason to believe that any violation against the provisions of any of the sections of this act has been, or is about to be committed, may enter upon any land in search of evidence thereof and shall seize, confiscate and remove any net, trap or snare, which shall be found so placed, spread or set as to indicate the purpose of taking, catching or killing of any of the animals or birds mentioned aforesaid, and take the same before any justice of the peace, police court or magistrate of the county, and if it shall be established on the trial to the satisfaction of such magistrate that such net, trap or snare was so placed, spread or set with the design to make use of the same for catching, taking or killing any of the animals or birds mentioned aforesaid, contrary to the provisions of this act, such magistrate shall enter as part of his judgment a finding to that effect, and shall order and cause such net, trap, or snare or device to be destroyed by the game warden, his deputy or sheriff, or any other official; and it shall also be unlawful at any time to use in pursuit of any such animal or bird any pivot or swivel gun, or any other firearm not habitually held at arm's length and discharged from the shoulder.

Sec. 5. Section 5, of chapter 374, of the laws of 1887, is hereby amended by inserting after the words "wild pigeon," where the same may occur in the third line of said section, the words "kingbird, robin, thrush, bluebird, swallow, catbird, woodpecker, flicker, pigeon, dove, wren, finch, lark, plover, oriole, hummingbird, bunting, grackle, grosbeak, warbler, flycatcher, swift, waxwing, creeper, chickadee, goatsucker, tanager, or whippoorwill," or to wantonly disturb or molest the nesting places of any such bird or pigeon, or to kill, wound or take any wild pigeon within three miles of the pigeon roost.

Sec. 6. It shall be unlawful to use in the pursuit of any duck, goose, brant or other aquatic bird, any sneakboat or scullboat, or any boat impelled by scull oars, sail boat, steamboat, or floating raft or box, or any similar device, and it shall also be unlawful to construct or use any blind in the open water outside the natural growth of grass or rushes then and there projecting above the water.

Sec. 7. Is hereby amended by adding at the end of Sec. 6 a new section, to be known as Sec. 6a, which shall read as follows: Sec. 6a. It shall be unlawful for any person or persons to use or employ, or cause to be used or employed, in the pursuit, taking, hunting or killing or worrying hare or rabbits of any kind, any ferret, or ferrets, nets, traps, snares, sticks, dogs or clubs, or any other means or contrivance whatever, except a firearm habitually held at arm's length and discharged from the shoulder.

Sec. 8. Section 11, of chapter 374, of the laws of 1887, is hereby amended * * * so that said section when amended shall read as follows: Sec. 11. Any person who shall violate any provision of Sec. 1, Sec. 2, Sec. 4, Sec. 5, Sec. 6, Sec. 6a, Sec. 7, Sec. 8, Sec. 9, Sec. 10, of this act, shall be guilty of a misdemenor, and shall be punished by a fine of not less than $5 and not exceeding $25, or by imprisonment in the county jail not more than sixty days, or by both such fine and imprisonment; and any person who shall violate any provision of Sec. 3 of this act shall be guilty of a misdemeanor and shall be punished by fine not less than $25 and not more than $100, or by imprisonment in the county jail not less than sixty days nor more than six months, or by both such fine and imprisonment.

Sec. 9. This act shall take effect and be in force from and after its passage and publication.

Approved April 16, 1889.

FISH AND GAME WARDENS.

Chapter 414. An act to amend Chapter 453 of the laws of 1887, relating to game and fish.

Section 1. It shall be the duty of the Governor, upon the passage of this act, to appoint four persons to be known as game wardens, whose duty it shall be to secure the enforcement of all statutes of this State for the preservation of fish and game; to bring or cause to be brought actions and proceedings in the name of the State of Wisconsin, to recover any and all fines and penalties, and to punish all violations of said statutes. Such game wardens shall hold their office for the term of two years from the date of such appointment and until their successors shall be appointed and qualified, and any vacancy during such term shall be filled by the Governor. Such game wardens may appoint one or more deputies for each county, who shall have all the authority of the game wardens, except as herein otherwise provided. Such deputies shall receive no salary, but shall be entitled to the same fees as constables now receive in criminal cases for like services and paid in like manner. Such deputies may be removed at any time and their places filled by the game warden who appointed them. One-half of the fines collected for any violation of any law of this State relating to the preservation of fish, game or birds, shall be paid to the county treasurer of the county in which said fines may be collected, and such treasurer shall pay the same into the school fund. The remaining one-half of such fines shall be paid to the informer.

Sec. 2. Any such game warden or any such deputy shall have full power and authority to serve and execute all warrants and process of law issued by the justices of the peace, police magistrate or any court, under the provisions of this chapter or any other law relating to the preservation of game, fish or birds in this State, in the same manner as any sheriff or constable might serve and execute such process, and may arrest any person or persons by them detected in actually violating any provisions of the laws of this State relating to the protection of fish or game or birds, and may take such person or persons so offending before a justice of the peace, police justice or other magistrate having jurisdiction, who shall proceed with such cause in manner and

form as provided by law. It shall further be the duty of such game wardens, or one of them, upon receiving information that any such law has been violated, to immediately cause a thorough investigation to be made of such complaint and to cause proceedings to be instituted if the proof at hand will warrant a conviction. For which purpose and for all purposes of this chapter as aforesaid, and in the apprehending or securing of any person or persons for the violation of any of the game, fish or bird laws of this State, and for the purpose of confiscating any nets, snares, traps or other contrivances of any kind, or of any dog or ferret used in violation of any of the game, fish or bird laws of this State, they and every sheriff, coroner and constable may call to their aid such persons or power of the county as they may deem necessary, and it shall be the duty of every sheriff, coroner or constable of any county of this State, whenever required by such game wardens or any of their deputies to forthwith assist them in the execution of process and the confiscation of any contrivance or animal used in the violation of said law. Said game wardens and the said deputy game wardens shall have the power, and it shall be their duty, to take and confiscate any and all nets, snares, traps, ferrets, dog or dogs and every other means and contrivance whatsoever used in the violation of any of the game, fish or bird laws of this State. Any and all such property, means or contrivance or animals taken and confiscated as aforesaid, shall, upon the conviction of the offender, be destroyed or killed by such game warden or his deputies or the sheriff, coroner or constable of any county, by and under the direction of such justice of the peace, police magistrate or court before whom or in which the conviction may be had.

Sec. 3. Sec. 4, of Chapter 456, of the laws of 1887, is hereby amended * * * so that said section, when amended, shall read as follows: Sec. 4. Such game wardens shall have an annual salary of $600 each, payable monthly out of the State treasury, and actual disbursements while traveling in the line of duty; such disbursements to be audited by the Secretary of State and paid out of the State treasury as other salaries and disbursements are paid, upon sworn vouchers and receipts as other accounts are audited, and also necessary printing and stationery and postage; and in no case shall a game warden appointed under this act receive a sum in excess of $250 per year for disbursements, while traveling in the line of duty and for printing, stationery and postage

Sec. 4. Any justice of the peace or other magistrate upon receiving proof of the probable cause for the believing in the concealment of any game, fish or bird during any of the periods prohibited by any of the laws of this State, shall issue his search warrant and cause search to be made in any house, market, boat, car or other building and for that end may cause any apartment, chest, box, locker, crate, barrel or other device to be broken open and the contents examined.

Sec. 5. This act shall take effect and be in force from and after its passage and publication.

Approved April 16, 1889.

Camp-Fire Flickerings.

"That reminds me."

268.

NOT long since that genial sportsman and expert angler Dan D. of Newton Falls, O., was made the victim of a practical joke that afforded much amusement to those in the secret, and an allusion thereto was a corker on Dan whenever he got off a good one, as is his custom, on some one else. Dan is an inveterate joker and enthusiastic fisherman, and during the season his leisure time is spent in angling for bass in the waters of the Mahoning River, or in convenient lakes and ponds not too far removed from his place of business, and frequently he goes into camp for a week or two during hot weather for a more thorough enjoyment of outdoor sport, and like a true sportsman he takes his wife and daughter along on such occasions.

When bass were "off their feed" or taking bait gingerly, in order to have a nice fresh fish for breakfast, Dan would occasionally put on an extra large and lively minnow just at the close of day, and with long bamboo rod equipped with reel and float, make a cast at some favorable spot on the river, and then securely fastening his rod, but in a position to allow the line to run off the reel under pressure of the drag, retire to his peaceful slumbers; and not infrequently in the early morning he would thus secure a prize. A friend, unknown to Dan, saw him thus set his trap one evening, and, after Dan had withdrawn to the shades of private life, reeled up the line, and taking off the minnow, fastened the hook into the ring at the larger end of a large tin funnel, and then taking it down into the current let out the full extent of line, and adjusted the rod in position as Dan had left it.

A select few were on the lookout for Dan's début next morning, and followed him to witness operations. As Dan approached the locality of the rod his spirits were bouyant on observing the twitching of the line and the springing of the rod, that indicated the action of a bass of some pretensions. He took up the rod and commenced carefully to reel in, when one of the conspirators approached, and then another, and another, and congratulated him on having hooked something worth handling carefully. Dan asserted that he had at least a four-pound bass in tow, and proceeded to show the group how an expert would handle such in a strong current. He did so skillfully, notwithstanding the fact that frequently the current would send the funnel at full speed transversely across and down with such force that Dan was fain to "give him a little more rope," and then again "work him up," until fully a half hour had passed and the catch was within 20ft., and Dan had directed one of the party to be in readiness with the landing net, when suddenly it took a turn and a rise; and he discovered "what kind of a beast the fish was," and the laugh was of course on Dan. It was too good to keep, but never would have got into print had not Dan in a moment of facetiousness given away the facts in regard to the manner in which he and a friend caught, with silver bait, from a more successful fisherman, the best string of bass that was brought into a camp last year, and forgetting through lapse of time that he was "in the same boat," figuratively and literally, and a party to the transaction, gave the friend full credit. The friend, on being rallied in regard thereto, owned up, and related to us the foregoing. GREY EAGLE.

THE revised and abridged edition of the A. O. U. Check List of North American Birds, including the additions and changes made in the supplement, will be sent post free on receipt of 50cts.—*Adv.*

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price $2.50. For sale by FOREST AND STREAM.

FOREST AND STREAM, Box 2,832, N. Y. city, has descriptive illustrated circulars of W. B. Leffingwell's book, "Wild Fowl Shooting," which will be mailed free on request. The book is pronounced by "Nanit," "Gloan," "Dick Swiveller," "Sybillene" and other competent authorities to be the best treatise on the subject extant.

Sea and River Fishing.

THE ANGLERS' TOURNAMENT.

THE seventh annual anglers' tournament of the National Rod and Reel Association was held at Harlem Mere in the Central Park, New York, on Thursday and Friday last. On both days the sun was toiling away a long way to the south of southeast before the first fly raised bubbles upon the surface of the wind-rippled Mere.

Perhaps city life is not conducive to early rising, or the fishermen had to tramp in many a weary mile from the remote woodsy rivulets and sequestered lakes where the trout love to hide; but be that as it may, the only meeting which took place on the grounds at 9 o'clock was between your reporter and the secretary of the Association, who until then had the field to himself and his henchman, who was assisting him in laying out the line of floats.

The position of the platform on the east shore of the Mere admitted of the line being laid out nearly due north and south, but with very little variation from that course, and if the wind had been blowing anywhere north or south of west, the line might have been so laid out as to insure a favorable wind for extending the casting lines, but the wind was due west, and was blowing pretty strong too; still it came in puffs succeeded by momentary lulls, leaving each contestant to hope that if he did his best fortune might favor him with a propitious wind eddy at the right moment.

About half past nine the contestants and officers of the Association began to put in an appearance, and after the first cordial greetings had been exchanged, each in turn proceeded to anathematize the wind, but it was all done very genially and philosophically, as becomes the brotherhood of the angle. This word genial is very properly applicable to fishermen. One found evidences of it on all hands as one after the other reached the ground and saw the gladness of his own heart reflected in the beaming countenances of his friends. In the younger men the geniality of expression was sufficiently characteristic, although its more pronounced phases were evanescent; but with the older fellows the genial look had become stereotyped; with use it had become second nature; the countenances were but the reflection of the souls within, perfected by long culture of the angler's many virtues. Why, there were two or three old boys at the tournament whom we delicately forbear to name, whose faces fairly beamed with geniality. Perhaps if we could penetrate the secret of this sublime content with themselves and with things as they are, we should find that not a little of it is due to the simple faith with which the chronicles of their wonderful fish stories has been received by all but a few constitutionally incredulous people. Nature has her compensations, and every man who reaches 60 years bears on his countenance the stamp of the emotions he has most indulged.

There was a goodly but not a numerous gathering—the kind and courteous president of the Association, Henry P. Wells, with a score or more of vice-presidents and members of committees, all decorated with ribbons of the Association, and Mr. Poey being the most noticeable. As the wind could not possibly be more unfavorable than it was for the direction in which the measured line was extended from the platform south, the only course open to the committee was to extend the line to the north. This was done, and although it made matters no better, it left the officers of the Association in the enjoyment of the satisfaction that they had done all that mortal could do, in and about the premises.

By 10 o'clock most of the competitors were on the ground, but it was 10:30 before the entries were closed for the first event, the single-handed fly-casting for amateurs.

The prizes were in each event: First, gold medal; second and third, silver medals; fourth and fifth, bronze medals; sixth, subscription to FOREST AND STREAM or other journal.

SINGLE-HANDED FLY-CASTING—Class A (Amateur).—Judges: C. H. Mauri, Rev. H. L. Ziegenfuss; referee, Capt. Wm. Dunning. Open to amateurs, under Rule 2. Rods not to exceed 11ft. 6in. in length. Scale of points—Distance actually cast, and accuracy, 40 points. (If a contestant cast 60ft. and is awarded 15 for accuracy, his score will be 75:

	Length of rod. Ft. In.	Weight of rod. Oz.	Distance cast. Feet.	Accuracy.	Total.
P. C. Hewitt	10 05	8¾	73	27	100
Jas. L. Breese	10 10	10¼	71	20	54
G. Poey	11 00	8¾	71	19	90
W. E. Blackford	11 01	10½	71	10	81
*R. B. Lawrence	11 00	10	54	..	54

* Lawrence withdrew before his time was up.

The wind was blowing strong and tolerably steady, but not without occasional variation of a few points. At one moment it would veer a little to the south, and afford an opportunity to the contestant to extend his casting line, the next minute it would veer to the northward, and catching the half extended line, would cause it to fall in a great circle with the tail fly within perhaps thirty feet of the caster. The difficulty of recovering the line after such a cast, and extending it backward to secure proper vantage for the next cast is familiar to the initiated. It was a mishap that fell not once, but frequently to each contestant in turn, in this and subsequent contests, and in their several modes of meeting the difficulty they afforded fair tests of the measure of their experience. The least experienced, recognizing that time was short, made strenuous but vain efforts to recover their line, wasting both time and effort without effect, while the more experienced either recovered their lines by a dexterous twist, or failing, drew in the slack, and crept upward again *de novo*. But on the whole the casting was very good. The style of most of the contestants was high for amateurs. P. C. Hewitt especially handled his rod with skill and address.

The casting for accuracy was little better than a farce, the wind occasionally catching a dropping tail fly and whirling it from 5 to 10ft. aside, even to the extent of baffling the eyes of the judges, who, losing sight of the fly, would excitedly ask each other, "Where's that?" But in spite of all this, and the element of chance in casting due to variations of the wind, the results reached afforded a pretty fair test of their best work under favorable conditions.

SALMON FLY-CASTING.—Judges, John A. Roosevelt, A. N. Cheney; C. R. Miller, referee. Open to all. See Rule 14. No limit as to rods. Distance only to count:

	Length of rod. Ft. In.	Weight of rod. Oz.	Distance cast. Ft.
R. C. Leonard	18.00	37	112½
P. C. Hewitt	18.00	37	105
J. L. Breese	18.00	37	101
Archibald Mitchell	18.00	37	97
T. B. Mills	18.00	37	94
Ed. Eggert	15.09	32	86

In this event Leonard took the lead, distinguishing himself by the address with which he husbanded the strength of his sinewy arm for the critical point of the cast, instead of distributing it over the whole action. Eggert was outclassed. The other contestants all got in some very good work, in spite of baffling winds, but the average of the casts was very low. Hardly one of them came within 10ft. of his maximum half a dozen times in the course of his allotted ten minutes.

MINNOW-CASTING FOR BLACK BASS.—Judges: A. N. Cheney, Jas. L. Vallotton; John A. Roosevelt, referee. Open to all. (See Rule 15.) Scores—Average distance cast in feet. Accuracy 40 points. Casts for accuracy to be made at a stake or mark, distant 60ft. A stand 12in. high in front, 9in. in rear, and of suitable size was provided to be used at the option of the caster. The sinker used weighed ½oz.:

	Length of Rod. Ft.	Weight of Rod. Oz.	Distance. Ft. In.	Accuracy.	Total score.
R. C. Leonard	8	8	119 08 149 03 144 05 112 03 132 04 Av. 131 7/10	40	171 7/10
G. Poey	9	8¼	78 03 91 09 114 05 87 01 91 01 Av. 92 8/10	23	115 8/10
T. B. Mills	8	8	99 00 83 01 81 04 89 03 103 01 Av. 90 6/10	20	110 6/10
P. C. Hewitt	9	8¼	85 07 89 02 70 00 66 02 66 04 Av. 74 8/10	Did not cast.	74 8/10
Ed. Eggert	8	8	44 08 47 04 70 06 44 00 70 04 Av. 55 4/10	9	64 4/10

Leonard was the only one of the contestants who made any good show, whether for distance or direction. His best cast was 149ft. Excepting Poey the others appeared all unpracticed.

SINGLE-HANDED FLY-CASTING—Expert.—Judges: Fred Mather, Dr. Geo. Trowbridge. Referee, Dr. S. M. Nash. Open to all. Distance only to count. Rods not to exceed 11½ft. in length.

	Length of Rod. Ft. In.	Weight of Rod. Oz.	Distance. Cast. Ft.
P. C. Hewitt	11 03	10¾	83
R. C. Leonard	11 05	10¾	82½
T. B. Mills	11 00	10¼	75½
Arch. Mitchell	11 00	10¼	67
Ed. Eggert	11 06	10¼	66
G. Poey	11 00	8¼	64½

The wind was very strong and puffy during this contest, so that the performance offered no fair criterion of the relative merits of the contestants. This ended the programme for the first day.

The second day was all that the contestants could wish for as regards the weather. It was almost a dead calm at 9 o'clock, and throughout the day it never exceeded a light breath. The direction was still nearly from due west as on the preceding day. There was some delay in getting to work as on the previous day, a delay in this case partly due to time lost in the effort to draw out amateurs for the opening event. The jousts of the first day's event had disqualified most of the performers for further appearance as amateurs, and there being but one entry the worthy president, anxious to provide for the greatest enjoyment of the greatest number, took counsel with his officers and substituted an open-for-all contest, as in the following programme:

SINGLE-HANDED FLY-CASTING.—Open to all. Judges: E. G. Blackford, Hon. H. P. McGown; referee, Hon. Daniel O'Reilly. Rods not to exceed 11½ft.:

	Length of rod. Ft. In.	Weight of rod. Oz.	Distance cast Feet.
R. C. Leonard	10 11	9¾	97½
P. C. Hewitt	11 00	10¾	96
T. B. Mills	11 00	10¾	90
Jas. L. Breese	10 11	10½	90
R. B. Lawrence	11 00	10	89
W. E. Blackford	11 00	10½	85
Ed. Eggert	11 00	10¾	79
G. Poey	11 00	8¾	79
A. Mitchell	10 11	9¾	76
R. F. Mayhew	11 08	11¾	68

Casting off tie: J. L. Breese 90, T. B. Mills 100. Eggert and Poey agreed to decide theirs in black bass fly class.

This event brought out ten competitors, six of whom made a very creditable exhibition of their skill. Of these Breese and Mills tied at 90ft., and in throwing off Breese reached 96ft. and Mills 100ft. A better test of skill would have been afforded by limiting the leaders to 9ft. With the light breeze on the quarter it was only rarely and by chance that the 18ft. leaders could be extended.

Early in this contest Judge Blackford's heart was warmed and his eye kindled by the very creditable performance of his son, who showed himself a worthy chip of the old block, standing fourth in the order of casting. He laid down his rod with a very respectable lead, but there were strong casters to follow, and one by one the judge saw the five medals disappear, but the more practically valuable prize of a year's subscription to FOREST AND STREAM was saved from the general wreck of his hopes.

SINGLE-HANDED FLY-CASTING—Light Rod Contest.—Judges: R. F. Mayhew, W. J. Cassard; C. H. Mauri, referee. Open to all. Rods not exceeding 5oz. in weight

nor 11½ft. in length. All rods with solid reel seats allowed ½oz. Distance only to count:

	Length of rod. Ft. In.	Weight of rod. Oz.	Distance cast. Feet.
R. C. Leonard	9 09	5	90
T. B. Mills	10 00	5	86
J. S. Breese	10 00	5	86
P. C. Hewitt	10 00	5	85½
R. B Lawrence	10 00	5	85

Casting off the Mills 85½ft.. Breeze 80ft.

HEAVY BASS CASTING.—Judges: Hon. H. P. McGown, W. H. Word; Capt. Wm. Dunning, referee. Open to all, as per Rule 16. A stand 12in. high in front and 9in. in rear was provided, to be used at the option of the contestant:

	Length of rod. Ft. In.	Weight of rod. Oz.	Distance cast. Ft. In.	Average cast. Ft.
John A. Roosevelt	7 05	20	180 04 202 00 188 09 193 00 179 00 943/10 162 05 176 00 166 04 190 05 185 07	188 3/10
John Warneck	7 11	12½	881 01 135 60 155 02 166 06 155 02 183 06 795 9/10 145 00 162 05 170 00 150 00	176 2/10 159 1/10
D Harris	7 07	21		
W L Andrews	7 04	22½	627 05	125 5/10

This event was contested on the Polo Grounds while the light rod contest was in progress on the Mere, an arrangement which limited the competitors to four.

FLY-CASTING FOR BLACK BASS.—Judges: L. Dinwiddie Smith, A. P. Van Gieson, D.D., Dr. James A. Henshall; Wm. C. Harris, referee. Open to amateurs under Rule 2. Single-handed rod, not to exceed 11¼ft. in length. Only one fly required, to be furnished by the committee, and to be tied on a No. 2 sprout hook; distance only to count:

	Length of Rod. Ft. In.	Weight of Rod. Oz.	Distance Cast. Ft.
Jas. L. Breeze	11 0	10¾	90
P. C. Hewitt	11 00	10¾	87
R. B. Lawrence	11 00	10	83
A. Mitchell	10 11	9¾	81
Ed. Eggert	11 06	10¼	80
G. Poey	11 00	8¼	77½
Lt. S. M. Nash	11 02	10½	77

This ended the seventh tournament of the Association, which as a social gathering was eminently successful. The officers were untiring in their efforts to make the meeting a success, and the contestants were cordially appreciative of these efforts, and animated by a spirit of generous rivalry toward each other, such as is rarely exhibited other than by the angling fraternity when engaged in contests of skill.

The public evinced no unusual interest in the meet. Hundreds perhaps had seen the announcement and let memory fondly conjure up the features of some bygone outing, including a mental photograph of the reader in appropriate fishing costume with basket at back and rod in hand, but the business of life claimed them and they went on their several ways to the haunts of Mammon. But the Mere was not wholly deserted of all save the members of the Association; before the first day was well advanced a crowd of men and boys had assembled sufficient at any rate to block the water front, and in the afternoon a number of nurse maids with their charges endeavored to thread their way through the throng.

The crowd appeared very deeply interested in the proceedings, although by no means well informed as to the objects of the meeting. One thing appeared evident to them, that the men who severally went on the platform and commenced whipping the waters, were very much in earnest about the work in hand, whatever it was, and gradually it was whispered, and spread from mouth to mouth, that they were trying to hook the measuring floats with the highest numbers on them.

Perhaps the general public was not much benefited by the meeting—who knows? but for the contestants, at least, it was a period of unalloyed enjoyment. To the president and secretary, and other officers of the Association, although the proceedings may have been wearisome, they were followed by a comforting sense of duty done, and of the achievement of the desired ends without friction or shadow.

WINNERS AT PREVIOUS TOURNAMENTS.

LIGHT ROD CONTESTS, 1882.

Class A, Rods to be 5¼oz. or less—H. W. Hawes, rod 4½oz., distance 82ft.

Class B, Rods not to exceed 4½oz.—H. W. Hawes, rod 4½oz., distance 78ft.

1887.—Rods not to exceed 5oz.—R. C. Leonard, rod 5oz., distance 88ft.

1888—Rods not to exceed 5oz.—R. C. Leonard, rod 5oz., distance 95ft.

B. F. NICHOLS CONTEST, 1882.

All contestants to use the same rod, 10ft., 6½oz.—H. W. Hawes, distance 71ft.

SINGLE-HANDED FLY-CASTING, AMATEUR.

Class A, 1882—H. W. Hawes, rod 11ft., 9¾oz., 81ft. (R. C. Leonard cast 85ft., but failed in delicacy and accuracy).

Class B, 1882—R. C. Leonard, rod 11½ft., 10oz., 85ft.

Class A, 1883—H. C. Thorne, rod 11½ft., 8½oz., 80ft.

Class B, 1883—W. E. Hendrix, rod 11½ft., 10oz., 78ft.

Class C, 1883—Thomas Pritchard, rod 10ft., 4½oz., 80ft. 8in.

Class A, 1884—C. A. Rauch, rod 11½ft., 10oz., 80ft.

Class B, 1884—Ed. Eggert, rod 11ft., 7½oz., 75ft.

Class A, 1885—Samuel Wilhemus, rod 11½ft., 9oz., 74.6ft. (W. H. Goodwin cast 76ft. but failed in delicacy and accuracy).

Class A, 1887—Gonzalo Poey, rod 10ft. 11in., 8¼oz., 77ft. (Dr. Geo. Trowbridge cast 81ft., but failed in delicacy and accuracy).

Class B—C. G. Levison, rod 11ft. 1½in., 10oz., 83ft. (Dr. George Trowbridge cast 85ft., but failed in accuracy).

Class A, 1888—R. B. Lawrence, rod 11ft., 10oz., 85ft.

Class B, 1888—Prof. J. P. Silvernail, 80ft.

SWITCH FLY-CASTING, DISTANCE ONLY TO COUNT.

1887—H. W. Hawes, 102ft.

1888—H. W. Hawes, 94ft.

SINGLE-HANDED FLY-CASTING, EXPERT.

Class C, 1882—Harry Pritchard, rod 10½ft., 8oz., 91ft.

Class D, 1882—H. W. Hawes, rod 10½ft., 4⅞oz., 85ft.

Class E, 1883—R. C. Leonard, rod 11½ft., 12oz., 87ft.

Class D, 1884—H. W. Hawes, rod 10½ft., 5oz., 76ft. (R. C. Leonard cast 78ft. with a 5oz. rod, but failed in delicacy and accuracy).

Class E, 1884—R. C. Leonard, 83ft.

Class E, 1885—R. C. Leonard, rod 11ft., 9oz., 92ft.

1887—R. C. Leonard, rod 11ft., 9oz. 97ft.

1888—R. C. Leonard, rod 11 5/12 ft., 10¾oz., 103½ft.

SALMON CASTING.

1882, open to all—H. W. Hawes, rod 20ft., cast 116ft.

1883, amateur—Ira Wood, rod 18½ft., cast 98ft.

1885, exper.—R. C. Leonard, rod 18ft., 21lbs. 12oz., cast 124ft.

1884, open to all—H. W. Hawes, rod 18ft., 34oz., cast 131ft.

1885, open to all—R. C. Leonard, rod 18ft., 37oz., cast 125ft.

Class A, 1887—R. C. Leonard, rod 18ft., 37oz., 132ft.

Class B, rods not to exceed 16ft. in length.—Harry Pritchard, rod 15½ft., 26½oz., cast 113½ft.

1888—H. W. Hawes, rod 18ft., 37oz., 138ft.

MINNOW CASTING FOR BLACK BASS.

1884, open to all—Prof. A. M. Mayer, rod 8ft. 9¼in., 8½oz., 97ft.

1885, open to all—A. F. Dresel, 127ft.

1887, open to all—A. F. Dresel, average of 5 casts, 111ft. Hayden's contest, 5 casts, longest to count. G. Poey, 126½ft.

1888—A. F. Dresel, average of 5 casts, 137ft. (Sidney Fry made an average of 145¼ft., but failed in accuracy).

STRIPED BASS CASTING (LIGHT).

1882—J. E. Williamson, 2 casts, in lane 20ft. wide, averaged 83 5/6 ft.

1883—H. W. Hawes, 4 casts, in lane 25ft. wide, averaged 100 4/6 ft.

1884—H. W. Hawes, 5 casts, in lane 35ft. wide, averaged 129 8/10 ft.

STRIPED BASS CASTING (HEAVY).

1882—J. A. Roosevelt, 4 casts, in lane 20ft. wide, averaged 127 1/6 ft.

1883—J. A. Roosevelt, 5 casts, in lane 25ft. wide, averaged 157 2/5 ft.

1884—J. A. Roosevelt, 5 casts, in lane 35ft. wide, averaged 201¼ft.

1885—W. H. Wood, 5 casts, averaged 204 3/5 ft. (no lane).

1887—W. H. Wood, 5 casts (no lane), average 216 5/10 ft.

1888—A. F. Dresel, 5 casts (no lane), average 181 8/12 ft.

STRIPED BASS CASTING (HEAVY).—DISTANCE ONLY TO COUNT.

1884—John A. Roosevelt, longest cast 214½ft.

1885—W. H. Wood, longest cast 250ft.

FLY-CASTING FOR BLACK BASS.

1887—C. G. Levison, rod 11ft. 1½in., 10oz., cast 80ft.

1888—Jas. L. Breese, rod 11ft., 10¼oz., cast 79ft.

KENTUCKY WATERS.

CHICAGO, May 21.—A little while ago I had occasion to comment on the fact that Indiana has no State sportsmen's organization. After returning from a visit at the annual shoot of the very strong and efficient State organization of sportsmen in Iowa, I am sorrier than ever for Indiana, and wish she would move further away from Illinois, or else reform her ways, which would be easier and pleasanter. And now comes Kentucky. Indiana's neighbor on the south, and on Wednesday, May 15, organizes at Louisville the Kentucky Sportsmen's Association, a union of some of the strongest business and professional men of the State. Following is the call. Indiana please copy:

"Every fisherman and hunter in the State, who takes an interest in the protection of fish and game, is earnestly requested to be present, take part in the proceedings, offer suggestions and join the organization. The prime object of the formation of the body will be to take steps for the rigid enforcement of the existing laws, and the enactment of such measures as will afford a better protection in Kentucky for the long-neglected inhabitants of the forests, fields and streams. It is proposed to establish a permanent fund, to be used as rewards for the prosecution of persons who violate the game and fish laws, and to select a good man to take charge of the money. It will also be suggested that game wardens should be appointed by the Governor, to the number of four or five, each to have his district and be a man who is so interested in the prevention of the wanton destruction, which has heretofore been so universal, that he will see that the laws are enforced. It is understood that the Association will urge this step, and a proposition will probably be made that a small remuneration be paid each warden out of the funds of the organization. Other matters of great interest to sportsmen, and the citizens generally, will be taken up by the Association from time to time."

From notes made on my trip of a week ago to Kentucky and from Kentucky papers I discovered, too late to classify, that fishing is now good pretty much all over that State, except in the once noted waters about the Cumberland gap, which have been ruinously dynamited by railway hands. Fishing at Spottsville, on the Green River, has been good. Sinking Creek, near Stephensport, is so much visited by Louisville fishers that the railway makes a special train to accommodate them. Barbourville and Worthville report good fishing. Lost River is being well patronized. A whole carload of Louisville fishers got off at Fisherville the day I went through there, and they said the "bachelors" were biting well. Silver Creek gives a good account of itself. Beach Fork, although a beautiful and much visited spot, has lately disappointed the anglers. The Highland Camping and Fishing Club, of Louisville, will pitch camp June 1 on the Ohio River, near Goose Creek. Squirrel shooting near Fairfield is good, if one keeps along the running branches. The dryness of the season has driven the squirrels out of their most accustomed haunts. Sunrise along the water catches them. Three squirrels were killed lately near Fairfield, Ky., which were singular. They were all young fox squirrels and had tails of unspotted white, being normal otherwise. This is a freak of albinism which would interest our Chicago albino collector, Mr. Deane. I presume their tails turned white in a single night from sudden fear or grief.

Out in Iowa the fishing is only ordinary. The Des Moines River is very low, but rose a foot last Saturday. Skunk River has not been out of its banks for three years, and it always takes high water to make good fishing there. A few Newton fishermen are taking some bass and catfish, but not many. They are having a wet spring in Iowa, and may have a good "June rise," in which case the fishing will be good for bass, pike, catfish, croppies and goggle-eyes as soon as the waters settle. Numbers of ducks are reported breeding in northern Iowa this year. The wet weather is not favorable to the breeding of the prairie chickens. Nothing is more destructive, indeed, to the pinnated grouse than just such a wet spring.

E. HOUGH.

BLACK BASS IN VERMONT.—In your answers to correspondents you have made a mistake in the time of the opening of the black bass season in Vermont. The opening season begins June 1. You were no doubt misled by an error in the printing of the laws of 1884, since which time no change has been made in the time. If this comes to the eye of F. D. B. in season it may save him a disappointment. You may also tell C. L., of New York, with confidence, that there is no better bait for mink than a bit of muskrat.—AWAHSOOSE.

FOR TROUT.

THEY have been out twice—Uncle Kellup and Old Tom. The first trip was too early. There were signs of spring, indeed, but mostly in shop windows. They did meet one pedestrian in spring overcoat, accented with flowering buttonhole, but he wore a belligerent expression, as if defying expected criticism. In the suburbs there were boys with tops and marbles, and an urchin with distended cheeks, blowing sounds from a coarse grass blade; there were more of them in the exposed fence corners. But outside everything was still brown and cheerless, and in a sheltered valley they discovered the soiled, decaying remains of a great snowdrift. "Skeleton of winter," said Kellup.

This time, however, all was propitious, and Kellup drove round at half-past six, and found his friend waiting with all the paraphernalia, a pair of high rubber boots and a very bad hat.

"Where's your tackle, K.?"

"Oh, I'm going to let you play the trout this time. I've got the gun under the seat."

"What for? You haven't got the law repealed, have you?"

"No; but they say the law's off crows and hen hawks and targets on trees."

Then Tom discovered the dog under the seat, and this was like to make a rupture. He "knew that dog—knew him well. He'd gallop up and down that brook from source to mouth. He'd wallow in it and shake all over everybody and bark. Talk about trout!"

And Dodger under the seat simply wriggled and thumped and whacked his tail against the boards and looked amiable—and stayed.

The first two or three miles passed along in silence, possibly because both were smoking, but by and by, getting out into the "real country," they thawed out and joined their voices in maligning the man who had stripped the wood lot they were passing. They told each other how they would do if they had a farm; how they would only thin out the woods from year to year and yank out the rocks. And they said they would plant trees. Tom wondered if anybody ever loaded up, on the quiet, from the stacks of cord-wood along the road, and Kellup wouldn't blame them if they did, and entered on a dissertation on the habits of trees, how felled wood was followed by a growth of another variety; the evergreens of northern New England, for instance, being succeeded by the supar maple, and how firing a wood lot brought up the blueberries, but he became entangled when Tom inquired what came after the sugar maple, and pointed out a growth of chestnut, springing from the ancient stumps. Kellup said he would get FOREST AND STREAM to write it up some time.

Shortly after this, while Tom was berating the folly of driving a narrow track wagon over a wide-gauge road, his companion suddenly reached for the gun and pointed at a hawk, poising far above, with the slightest motion gained from leaning gently now on this, then on the other pinion.

"Hold up, Kellup," said Tom, shaking the reins, "till I put you underneath and you can drop him into the wagon."

When the smoke had cleared away—and the hawk—Kellup said the gun wouldn't carry so far. They reached the farm about 10 o'clock and the brook shortly after, but Tom looked so truculently at the dog, while he was tackling up, that Kellup called him off, and they went on till they found a nice, lonesome spot in a sunny intervale, with scattered clumps of bushes and the woods just far enough for a background. The brook came along with its monotone, just like other brooks, now lurching into this bank then gliding under the other, where it has scooped a well and comes out with a reeling motion, to joggle over some rocks and make a little uproar among the rotten logs, where a bridge might have been. A little further on it strikes a point and separates among a paradise of little boggy islands, green with skunk cabbage, blue with violets, and white with stars of Bethlehem. There are paths worn smooth to the water by some small animals, and an empty turtle shell brought in by Dodger suggests a possible connection between the two.

Long before they come up with Tom, they can tell by the tense, serious expression that he has no fish; but just as they approach he promptly lands one, and looks on with disgust as Kellup carefully unhangs the little fellow and contemplates him in the palm of his hand.

"Well, Tom, the strawberry marks are all there. He's a 'speckled beauty,' if that's what you want."

"Oh, throw him back."

After Dodger has had a smell Kellup quietly drops him in, but he floats away, keel up, with a little wake of blood.

"Ah, Tommy my boy, you played him too hard. You've tired him all out."

To change the subject Tom remarked, "What did you get?"

"Oh, I just sat there and listened to a quail on a fence. Did you ever notice what a full, rich, wild melody it is, with a sort of contralto flavor?"

Tom said he had, but he hadn't. He cared no more for birds than Sidney Smith for dogs.

They figured on getting into town quietly after dark, and avoided all but two acquaintances who fired the salutation, "What did you get?" They drove on fast.

When Kellup and Dodger had settled themselves, the one on the hearthstone and the other in the armchair, to see what Susan would produce for supper, the good woman, by way of saying something pleasant inquired, "Well, what did you get?"

"Oh, 'what did I get!' 'What did I get!' Why will you always ask that question whenever I take a quiet ride in the country?"

This was said with a petulant tone and a frown, but he thought better of it and changed to a benevolent smile.

"Well, I'll tell you what I got. I got a hawk, that is, I got a shot at him and he went off to die, or to get another chicken, I don't know which. Let me see, what else did I get? Well, I got mad with Tom; and I got acquainted with a charming brook; and got the rheumatism lying on the bank; and got wet washing the dog; and got a turtle shell, and I've got it now, and a bunch of violets, they're withered. And I got sunburnt and tired.

JEFFERSON SCRIBB.

CATALOGUES OF FISHING TACKLE have been received from C. F. Orvis, Manchester, Vt., and A. B. Shipley & Son, Philadelphia.

FISHING NEAR NEW YORK.

V.—LONG ISLAND SOUND.

LONG ISLAND SOUND in the vicinity of New York is a favorite fishing ground for many city anglers, although for sport with rod and reel it can hardly be said to rank with Staten Island and New Jersey waters, or the bays on the south shore of Long Island. A great point in favor of Long Island Sound, however, is the fact that its resorts are within easy reach of the city, and the cost of a day's fishing is comparatively small. The Harlem River Division of the New York, New Haven and Hartford Railroad, starting from the Harlem River station just across the Harlem from the northern terminus of the Second Avenue Elevated Railroad, runs along the shore of the Sound to New Rochelle, where it connects with the main line of the same road (Grand Central Station at Forty-second street) and runs near the shore through Mamaroneck and Port Chester, N. Y., and Greenwich, Cos Cob, Riverside, Sound Beach and Stamford, Conn.

On Long Island the trains on the Long Island Railroad (north shore division) run from Long Island City to College Point, Whitestone Landing and Great Neck. Take ferries from James slip (foot of New Chambers street) and from foot of East Thirty-fourth street. There are also several steamboats which make regular trips to points on the north shore of Long Island, but as most of these boats run for the convenience of dwellers in the Long Island towns rather than the denizens of New York city, they leave their city piers in the afternoon, so that a New York city passenger would be compelled to pass a night at any of their ports in order to enjoy a day's fishing.

Long Island Sound, especially between Hell Gate and Mamaroneck, is the flounder fisherman's paradise. These little fish are caught earlier in these waters than in any other about New York; they run larger in weight, are more numerous, and the season lasts longer. Striped bass are also caught in considerable numbers in the same waters, and in the fall they are of large size. Blackfish are very plenty, and some big ones are caught on the reefs and over sunken wrecks, a blackfish weighing 8lbs, or a little over being about the heaviest of which any record can be obtained. The blackfishing has begun now near New Rochelle and in Pelham Bay, and last week there were some large catches of these fish at City Island bridge and on the rocky shoals in the vicinity, weight running from ¾lb. to 5lbs. "Fiddlers" are the best bait for blackfish, and after fiddlers hard clams ("rock clams" they call them at City Island) are most generally used. Fish for them near the bottom, with sinker below the hooks. Weakfish are caught in Pelham Bay after July 1, on shedder crab, shrimp and sandworm bait. They are not so plenty here, however, as at Prince's Bay, S. I., Jamaica Bay, L. I., and Perth Amboy or Boynton Beach (Sewaren), N. J. Bluefish do not run in the Sound any nearer New York than Stamford, Conn., and those caught there are small. Bergalls, tomcods or frostfish, bonitos and porgies are also caught in the Sound.

The trains of the Harlem River Division of the N. Y., N. H. & H. R. R. leave Harlem River station week days at 12:10, 6:40, 7:50, 9 and 10 A. M., and on Sundays at 7 and 9 A. M. and 12:01 P. M. Take the Second Avenue Elevated road to the Harlem end of the route, then walk across the bridge over the Harlem River to the station.

The first stopping place for the angler is West Farms (fare, round trip, 20 cents), or West Farms may be reached by horse car from Third Avenue and 130th street for five cents. If the train is taken it is best to get off when the legally required stop is made just south of the Bronx River drawbridge, as West Farms station is several hundred yards north of the drawbridge, and it is at the bridge where boats must be hired. There is little fishing here, however, except for eels, tommies and an occasional striped bass in the river, but at the mouth of the Bronx, a two-mile row from the drawbridge, there is good striped bass fishing in season.

At Van Nest station, the next stop (round trip fare 24 cents), stage may be taken for the "Iron Bridge" on Westchester Creek, where some heavy and not particularly substantial boats may be hired at 50 cents a day. (Stage fare, both ways, 40 cents.) In the spring, if there are striped bass anywhere, they may be found near the mouth of this creek, but it is a two or three-mile row from the iron drawbridge, and a nasty sort of a creek withal, as I know from bitter experience, having been hung up on its mud flats for hours waiting for a flood tide. There are also flounders, eels and tommies in the creek.

The best place of all for the angler to go along the Sound is at Bartow (round trip fare 40 cents), from which station all the fishing grounds of Pelham Bay can be reached. Just before the train gets to Bartow station it crosses Eastchester Creek, an arm of Pelham Bay, which is an excellent spot for striped bass. Here for forty years old Captain Lawrence has kept a fisherman's resort. He has boats to rent at fifty cents a day on week days and a dollar a day on Sundays (the prevailing rate all along this shore), and the visiting anglers would do well to take the Captain's advice as to the best spot to drop a line. The Grand View Hotel here (J. Elliott proprietor) also lets boats, and meals and lodgings can be obtained at reasonable rates. Both places always have bait on hand.

At Bartow station a line of horse cars connects with City Island (fare 10 cents). About half way to City Island on this route is M. Secor's place, where a dozen boats are for hire. It is a long row from Secor's to the best blackfish grounds, although striped bass are caught within easy distance.

At the western end of the bridge which connects City Island with the mainland is Philip Flynn's place, which has been running for eighteen years and is well known to all Pelham Bay fishermen. Flynn has seventy boats for hire, he says, and when I visited him one recent Sunday every one of them was out. Meals can be obtained here, and bait.

At the City Island end of the same bridge, which is dotted for its whole length with anglers on Sunday, is the well kept resort of the Stringham Brothers. The principal hotel of the place (rates $2 a day and upward) is close by Stringham's, and offers good accommodations for lodgers or boarders. The Stringham Brothers have forty good boats, always keep bait, and their cook knows how to get up the right sort of clambakes and clam chowder.

A little beyond the bridge is the boat house of Pell & May. Fifteen well-cared-for rowboats are kept here for hire, and a staunch and pretty catboat, the Maybe, can be hired by sailing parties. Pell & May always have bait on hand, and from them much valuable information can be had about the fishing. Locust or Rodman's Point, just opposite their boat house, is good ground for striped bass and weakfish in season.

Paul Sell, just beyond Pell & May's, has ten good boats to rent and is building more. He keeps bait on hand, and serves a good clam chowder lunch.

A little further along shore H. Walthers and J. Gruse have thirteen boats, and keep bait.

I believe blackfish anglers would do well to bring with them "fiddlers" for bait, as they are better than either sandworms or clams, the baits supplied by the resorts at City Island. The best places to go for blackfish are well out in the Sound. The vicinity of Hart's Island is a good place, or Rat Island, between City Island and Hart's Island, opposite City Island Point. Tom's Reef Rock and the "Chimney Sweeps" are other good places, and there is always a chance to do well at the Four Rocks, the Hog's Back, Hoyt's Point (Twin Islands), and other places which the boatmen will point out.

On Sundays the Pelham Bay fishing grounds may be reached by the steamers Baltimore or Philadelphia from New York to City Island bridge (round trip fare 40 cents). They leave Pier 27, East River (foot of Dover street), at 7 A. M.; Thirty-first street, E. R., at 7:25 A. M., and Morrisania steamboat dock, 133d street and Southern Boulevard, at 8:30 A. M.

A striped bass weighing 13½lbs. was said to have been taken by one Hop Heddy recently along the Eastchester shore, but a thorough investigation which I made into the matter proved that the fish was caught in a fyke and sold to Mr. Heddy. Its weight was over-estimated, too, according to those who "hefted" it.

At New Rochelle, the terminus of the Harlem River branch of the N. Y., N. H. & H. R. R. (round trip fare 50 cents), horse cars (fare 10 cents) may be taken for the shore of the Sound opposite Glen Island. The fishing in these waters is like that at Pelham Bay, and there are many favorite points for blackfish, striped bass, weakfish, etc., which will be pointed out by either Thomas Odell, who lets boats at the lower harbor, close by the Glen Island ferry, or by Theodore Kissam, who keeps a fisherman's resort at the Upper Harbor. Bait may be had at both places. New Rochelle may also be reached by the main line of the same railroad from the Grand Central Station at Forty-second street (fare, round trip, 70 cents). Trains runs every hour.

It is not worth the angler's time to go further up the Sound than Bartow or New Rochelle. The fishing is no better, and accommodations and conveniences are not so easily attainable.

From the shores of Long Island there are few places which the angler can reach in the Sound proper, because the Long Island Railroad does not touch the north shore except at rare intervals. If we may consider all the waters beyond Hell Gate as Long Island Sound, however, there are several place where a visit will pay, although most of the Long Island fishermen cross to the other side of the Sound to do their fishing.

The bass fishing in the waters of Hell Gate and vicinity was fully described in the first of this series of papers, so it will be sufficient here to give a directory to resorts near Hell Gate on the Long Island shore where boats may be hired.

The only place at Astoria where boats may be hired is Dennis Hayes's, one block south of the ferry landing. Take Second Avenue Elevated to Eighty-sixth street, thence horse car to ferry at foot of East Ninety-second street. Or steamer Morrisania from foot of Fulton street at 11:30 A. M., fare 10 cents.

Bowery Bay is near the bass grounds about Riker's and Berrian's islands and Lawrence Point. There is also good flounder fishing here. Take steamboat from Harlem River Bridge at Third avenue every hour during the summer for the excursion resort, Bowery Bay Beach, where boats may be hired at $1 a day. It may also be reached from East Ninety-second street ferry to Astoria, thence horse cars to the beach. Round trip fare, either route, 25 cents. Bring your own bait.

In Flushing Creek there are flounders, tommies, eels, and now and then a bass. And if the angler can find the little fresh-water creek that empties into Flushing Creek near its head, in the direction of Harry Hill's pavilion, he will be able to catch good-sized striped bass off its mouth or just within the "gut" at high water slack. Take trains of the Long Island Railroad at Long Island City for Bridge street, Flushing (round trip fare, 35 cents). Captain Bill Sands rents boats at the bridge near the station at 50 cents and $1 a day, and will give valuable points to his patrons. Captain Bill always keeps bait on hand.

Another good place to go is Whitestone Landing, reached by the same route (round trip fare, 60 cents). Blackfish are now being caught near there, Sunday's haul being a good one. Row to Fort Schuyler or to the "Stepping Stones" beyond Fort Schuyler, or to the reef of rocks off College Point. C. Watts has 11 nice boats for hire at his boat house and restaurant, which is three minutes' walk from the station, for 50 cents a day. Further along shore boats may be hired at the same rate from Frank Boerum or William Reilly. Bring your own bait.

Weakfish are caught in Flushing Bay and all along shore, but they are never numerous.

I have understood that a law is in existence to prevent the dumping of oil and other refuse into the East River, but I am sure the law is not enforced, as the water on the Long Island side of the Sound from Hell Gate to Little Neck has been thick with greasy filth for the past week, and all the 'longshore people I interviewed attribute the scarcity of fish to the condition of the water. SENECA.

DRUM FISHING ON THE VIRGINIA COAST.—Exmore, Va., May 21.—*Editor Forest and Stream:* The steamer Manatee with Col. Quay's party arrived at Chincoteague Island May 14, and on the 15th went to the point of Assatigue beach, where the party caught sixteen drumfish, some weighing as high as 55lbs., the Colonel catching two at a time. The next morning being the 16th the Manatee started for Exmore station, where we took on board Mr. Hamilton Disston, Thomas South and Sheriff Leeds, of Philadelphia. I then took the steamer to the north end of Hog Island beach, where the party had excellent drum fishing and snipe shooting. If any of your yachtsmen want an elegant trip they can have it at this point. —CAPT. I. W. STILES, Pilot of the trip.

THE RANGELEY TROUT SUPPLY.

Editor Forest and Stream:

I was greatly pleased to see in your issue of May 9 an answer to the remarkably unfair statements in reference to the Rangeley Lakes which appeared in that otherwise pleasant little book, "Where the Trout Hide." I wish to add my protest. It has been my custom to make a yearly pilgrimage to the Rangeley region for the past eight years, and though I have never fished on the big lakes myself, I have met many an angler who has. I have yet to meet one, though, whose experience does not condemn Kit Clarke's absurd assertions. Why he should misrepresent, as he most certainly does, this delightful region, does not satisfactorily appear in his reply to your correspondent which is contained in the last issue of your paper. On the contrary, his ill-natured remarks about "gang-hooks" only strengthens the impression that he is endeavoring to boom a region in which he has an interest of some kind, at the expense of one which anglers have hitherto at least preferred.

One can spend a very pleasant hour reading his little book about the Lake St. John country and finish it with the impression that I did, that he has been reading about a virgin country, a fisherman's paradise, and where the skillful angler with his alluring fly is as yet almost unknown. To such a person "The Land of the Winanishe," *Scribner's Magazine* for May, is a revelation. "Where the Trout Hide" is conspicuously lacking in detail, but in this article the authors give us a plain account of their experiences at Lake St. John, before which, with their statements of old-established fishing clubs and preserves, our pleasant allusions of an angler's paradise painfully fade away.

Kit Clarke also paints in his book the charms of Lac de Grand Iles, and well he may, as I see by the papers that a well-known fishing club, of which he is a member, has either completed or is building at this lake an elaborate club house for the use of its members. I venture to predict that the little inns of the Rangeley Lake region, so dear to many a fisherman, will continue to be his accustomed haunts from year to year, until the trout have as nearly disappeared from Kit Clarke's Canadian paradise as he alleges they have from the Rangeley Lakes.

D. IVES MACKIE.

NEW YORK, May 20.

Editor Forest and Stream:

The Rangeley Lakes are right here in the same place they have been for years, and in spite of the misrepresentations in regard to the fishing that have been quite freely published in the FOREST AND STREAM for two years, the good old fishing of our boyhood days is here too.

Those who have been here up to the present time have had good fishing, catching more small trout than they cared for, I mean fish running from 1 to 2lbs. and not your 6 or 8oz. fingerlings of the brooks.

Among the visitors to this camp since its opening have been L. A. Derby, Will Lamson, S. H. Jones, E. A. Smith, S. L. Sawtelle and E. W. Lovejoy of Lowell, Mass. Mr. Smith while here caught one trout weighing 8lbs., one of 4lbs., and numerous smaller ones. Mr. Derby caught one of 8lbs., besides numerous others of fair size. Mr. Jones caught one of 6lbs., one 4½lbs., and one 4¾lbs., besides a lot of smaller ones. Mr. Lovejoy caught one weighing 3½lbs., and one weighing 4¼lbs., besides plenty of smaller size. Mr. Sawtelle caught three trout weigh-4¼, 4¼ and 8½lbs., a landlocked salmon weighing 6¾lbs., one of the handsomest fish I ever saw, and plenty of small ones. Sid speaks very contemptuously of 1lb. and 1½lb. trout, and says he throws the most of that weight back into the water, only keeping a few of them to eat. This party left for home yesterday, going out across Umbagog Lake.

Mr. Thorndike and wife of Boston, Messrs. W. Coburn and F. Wellman of Lowell, B. B. Mitchell, W. C. Rowley and A. King of Detroit, Mich., and T. A. King of Portland, Me., have been stopping at this house a few days. D. B. Hempstead and Dr. Farnsworth of New London, Conn., J. Flemming, A. Flemming and Geo. S. Clark of Portland, Me., are among the more recent arrivals.

Mr. Hempsted is not only one of the best fishermen who come here, but is one of the veterans. This is his thirtieth year, having made his first trip in 1859, and he has only missed one year during that long period, this being his twenty-ninth annual trip. He has fished almost everywhere in this country, and in many places in Canada, including Lake Edward and Lake St. John, and he says that there is no place that he has ever visited that furnishes as good fishing as the Androscoggin waters, or that has given him the same satisfaction. A great many of your readers are personally acquainted with Mr. Hempsted and know that his statements may be relied on. I give his opinion with his permission, and call the attention of fishermen who are looking for an easily accessible place for good sport to it. His opinion is certainly more worthy of credence and respect than that of the Bombastes Furioso, who takes every opportunity to tilt his broken lance at the Rangeley Lakes, and who has recently been unhorsed by W. G. Stebbins in a late number of your paper. Mr. Hempsted has celebrated his twenty-ninth visit to the Middle Dam, in a modest way, by capturing on his second day of fishing a trout weighing 6½lbs., and he will no doubt leave his usual good record behind him, as he takes many trout each trip. Dr. Farnsworth, his companion, has taken one trout of 3¾lbs. since his arrival, but intends doing better before he leaves.

A well known angler of New York city who has fished about all the waters that are worth fishing in New England and Canada, including the over-puffed Lake St. John and Lake Edward, whom I met within a year at Young's Hotel, in Boston, told me that no place he had ever visited for trout fishing would compare with the Middle and Upper Dams of the Androscoggin waters.

At this writing we are having a cold rainstorm, which the boys say will stir up the trout, and I shall probably be able to send you a record of more "big uns" next week. As Kit Clarke has asserted that all the large trout that have been captured in the Androscoggin waters were taken somewhere back in the middle ages, and that there are no large trout in these waters now, I give you a list of trout whose pictures adorn the walls of the office in the camp, all taken within the past three years: One trout caught by C. F. Chaney, June 1, 1886, weight 6lbs.; three trout caught by E. H. Foote, Aug. 17, 1886, weight 5¾lbs., 7lbs. and 7¼lbs.; two trout caught by E. W. Curtis first, Sept. 6, 1887, weight 8½lbs.; second, Sept. 11, 1887

weight 7¼lbs.; one trout caught by G. S. Whittaker, May 29, 1887, weight 7¾lbs.; one trout caught by C. M. Stark, June 2, 1888, weight 8lbs.; one trout caught by L. A. Derby, June 4, 1888, weight 8lbs., one landlocked salmon caught by R. N. Parish, July 6, 1888, weight 5lbs. These are only a few of the larger ones that have been taken, no complete record of a season's fishing having ever been kept here.

A very desirable piece of information to many fishermen is that Mr. John B. Straw is no longer the agent of the Union Water Power Company, and that this season, and in future seasons, there will be no more fooling with the gates of the Middle Dam, but that a sufficient stream of water to insure good fishing will constantly flow through the dam. CAPT. FARRAR.

ANGLERS' RETREAT, Middle Dam, Maine, May 21.

CHICAGO AND THE WEST.

CHICAGO, Ill., May 24.—Should the question of the weight of the small-mouthed black bass ever come up, there is interesting evidence now on exhibition at Spaldings', in this city, in the form of a stuffed small-mouth black bass which weighed when caught 10lbs. 3oz. This fish is a marvel. It was taken on a light rod, with a live frog, by Mr. Isaac Hendershott, of this city, at Gun Lake, Barry county, Mich., May 11, 1889. Witnesses to the weighing of the fish are Wm. T. Brown, E. C. Baud, and R. A. Turtle. The measurements on the stuffed specimen are length 26in., half-girth, belly to back fin, 10in. I presume the full girth would be 21in. Skeptics can easily convince themselves about the size of this fish, for it is here, in all its big and ragged ugliness.

Mr. L. T. Moore has gone to Northonie, Minn., for a fishing trip. He is just back from successful tarpon fishing in Florida. There are few more ardent anglers.

Mr. Fred Taylor and friends are back from a lucky Wisconsin trout trip. Dr. Buechner has also been in our North Woods, and got 136 trout, scoring also the largest fish of the stream he fished in. There are numbers of our anglers absent now in Wisconsin and Michigan. Indeed it is quite impossible to keep track of them, for they go in flocks. Many are going into Wisconsin after mascallonge. Now is the time for that, and the fish are rising. Several good ones have come down, but none larger than that of 45lbs., mentioned earlier.

Twin Lakes, near at home, are looming. One angler took 65 black bass there one day last week, weighing 125lbs., one of over 4lbs.

Lake Maria is showing up well also, and parties there are constant. Fox Lake too has been generous, and plenty of the boys have had fun there. John Gillespie laid aside his shell loading last week long enough to catch a good "mess."

Mr. J. M. Clark, of the Wilkinson Co., Mr. C. Owen, of Owen & Co., Mr. Chas. Porter, and perhaps other friends, start to-morrow for Channel Lake. These are bait-casting anglers. That feature of the sport is growing here.

Now is the best time to go out fishing. The water is still cold, and the fish have more life. Besides, now is always the best time to go fishing. It may rain if one does not go. Those who do go now can hardly go amiss at any of the localities above named, while up beyond, the teeming waters of Wisconsin are fairly in an agony to be fished.

Col. O. Lippincott is requested to come to the front with a good Fox Lake mascallonge story as soon as possible. E. HOUGH.

LARGE FLORIDA BASS.—Indianapolis, Ind., May 17.—In connection with Mr. Hough's mention in last week's FOREST AND STREAM of a newspaper account of two large bass said to have been caught in a Missouri lake, I notice that he refers to 12lbs. bass having been caught on St. Clair Flats, and to having pretty fair authority for some of that weight taken in Florida. I can assure him that his authority as to the latter was correct, for I have seen bass of that weight in that State. In the month of December, five years ago, I saw one that weighed a little over 12lbs., caught in the Upper St. John's River, a few miles from Sanford. I have also seen two bass that weighed a little less than 10lbs. each caught in the same locality. These were, of course, the large-mouth black bass, and weights were determined by scales. They were caught with spoon hooks, trolling with rod and line, and were the largest I have seen, though, no doubt, others of equal weight have been caught in the many interior lakes of that State. In the portions of succeeding winters, since then, spent in the State, I have preferred the Gulf and the Atlantic coasts for fishing, as giving better sport, with more gamy fish than the bass, which are dull and sluggish, especially those of large size, in the warmer inland waters.—D. L. W.

FISHES OF THE LOWER POTOMAC.—We are indebted to Mr. Thomas Lee for recent notes on fishes observed by him in brackish water of the Lower Potomac River. At Point Lookout very few weakfish, shad and herring were taken in the pounds. Top minnows (*Gambusia patruelis*) were nearly ready to bring forth their young. A small species of anchovy (*Stolephorus*) was present in large numbers and almost ripe. The same anchovy was noticed also in the Big Wicomico. Silversides (*Menidia*) were abundant and gravid at both places. One sea horse (*Hippocampus*) was caught at Point Lookout. In the Big Wicomico young striped bass, from three inches to six inches long, were very common. One of the pounds at Cornfield Harbor had two river catfish, a species which is never caught except when the Chesapeake becomes largely fresh; the water at the time was reported to be 1.005, whereas its ordinary specific gravity is 1,022.

FALLS OF THE POTOMAC.—Sandy Spring, Md., May 17.—Fishing at the beautiful falls of the Potomac is better than for years for bass. Some fine strings have been caught; and several weighing 5lbs. have been taken. There being no fish ladder at the falls all sorts of large fish stop there, and carp weighing 30lbs. are taken with the common fishing worm. Upon my last trip I saw a man take some beautiful shad with a dip net of not over three feet in width. His companion put a rope around his body and he stood on the slippery rocks in the rapids below the falls and dipped down stream. Only the very largest fish can climb the lower falls six miles below.—J. C. B.

A NEW INDIANA ASSOCIATION.—New Albany, Ind., May 18.—At a meeting of those interested in the gentle art of angling, held Friday night, an association was formed on a permanent basis. It is designed to include the counties adjacent to Floyd and to take supervision of the principal streams in this part of the State. An initiation fee of $1 and annual dues of $2, payable quarterly, were fixed to cover the expenses of the club. The following persons were chosen as officers for the ensuing year: Pres., J. P. Applegate; Vice Pres. for Floyd county, Henry Terstegge; Sec. and Treas., J. O. Endris; Executive Committee, N. T. DePauw, R. F. Fuller, R. M. Boardman, R. E. Burk and Dr. G. H. Cannon. The treasurer was authorized to prepare card posters offering rewards for conviction of violators of the fish laws, and distribute abstracts of said laws. Vice-presidents are to be elected for the surrounding counties at as early a day as practicable. It is expected that an all-day meeting will be held at some central point during the summer or fall, at which all persons interested in the association will be invited to be present. Persons desiring to become members can do so by calling at the store of Mr. Endris, in New Albany, and signing the articles of association.

THE HERETIC EXPLAINS.—Ferrisburgh, Vt., May 18.—Let me assure my friends "Von W." and "Kelpie" that I am quite aware that my heretical views concerning trout fishing are due to ignorance and lack of opportunity for gaining personal knowledge of the sport, and that no doubt if I had been favored as they have been, I would now be as devoted to it as they are. In my day there have been no trout in this part of the Champlain Valley, though according to old men's tales they once abounded in the upper waters of Little Otter and in Lewis Creek, which was a famous salmon stream one hundred years ago. So my first fishing was not in clear, swift streams for trout, but in the sluggish waters of the "Slang," for bullheads, perch and pumpkin seeds, for the trout brooks of the hill country were too many miles away for a boy's short legs to compass the distance, and when the boy's legs had grown long enough the big trout were all gone. —AWAHSOOSE.

SALMON NETS IN CANADA.—Fredericton, N. B., May 18.—I have just received from the Minister of Marine and Fisheries of the Dominion of Canada the inclosed copy of an act passed at the recent session of Parliament: "1. Subsection 5 of section 8 of 'The Fisheries Act,' is hereby repealed and the following substituted therefor: 5. The use of nets or other apparatus for the capture of salmon shall be confined to tidal waters, and any fishery officer may determine the length and place of each net or other apparatus used in any of the waters of Canada: provided, that no one shall fish for or catch salmon with swing nets in any of the waters of Canada." As this act has a most important bearing upon the salmon angling on our rivers it will doubtless be welcome news to many of your readers.—J. HENRY PHAIR.

A CHANNEL CAT OBSTRUCTIONIST.—Charleston, Ill.—At the water works, three miles east at the Embarras River, the other day the water supply stopped very suddenly, and the engineer, Cooney Scheytt, was frightened. A channel catfish weighing 14lbs. entered the water pipe, thought it had struck a hollow log, and went to the plunger in the suction pipe and had to halt.—OFFICE BOY.

THE ELGIN WALTONIAN CLUB, of Elgin, Ill., will hold its fifteenth annual meeting the first week in June, beginning June 4, at the club grounds, Fox Lake.

SAYBROOK POINT, Conn., May 16.—Four salmon were caught here the last week in the traps.

IPSWICH, Mass.—John A. Blake caught a trout weighing 1lb. in Egypt River.

CHICAGO, May, 21.—Everybody has gone fishing.—E. HOUGH.

SEINES, NETS of every description. American Net & Twine Co., Mfrs., 34 Commercial st., Boston, or 199 Fulton st., N. Y.—*Adv.*

Fisheculture.

NOTES ON FISH COMMISSIONS.

THE appropriation for the Nebraska Commission for 1889 and 1890 is $16,000. For the same years New York has $30,000 for fish hatching, $20,500 for protection of fish and game, $5,000 for engineer, $4,000 for clerk, and $1,750 for work in connection with oysters. A violent opposition to this commission was developed among certain associations, some of whose members were fined for violation of the game laws notwithstanding their activity in demanding the punishment of offenders against the laws relating to the preservation of fish.

Ohio is to expend $11,500 during the current year.

Pennsylvania has $35,000 for two years. Opposition to fish protection in this State now comes almost wholly from city members; country members have almost without exception favored it.

In Pennsylvania the fish wardens are now vested with police powers and when they make arrests the magistrates must hear the cases at once. New York has the same provision.

SAWDUST IN STREAMS.—"Piscator" still sticks to his figures, but they do not prove that sawdust is not injurious to fish. He states that the evidence I gave in my last is not the kind that counts in this discussion, but nevertheless it clearly proves that sawdust does not kill fish. He further states that it goes without saying that such a sight as described as the result of sawdust never was seen or occurred in any river on this planet. Now what I described in my last actually occurred, not only once, but several times on the river, and to verify what I have written, I can bring as proof several of the leading men of this county. I have no doubt there are others of your readers who could produce evidence similar to that written by J. M. D.—SPORTSMAN.

OYSTER CULTURE IN FLORIDA.—Rose Hill, Fla.—*Editor Forest and Stream:* Are there any works or reports obtainable covering the culture of the oyster? Citrus county has fine oyster fields and desires to take such steps as will develop the industry and get it under control, in order that it may be carried on with some system rather than as it is now—every one for himself. We propose to organize a company to control some of the best waters, and want to be posted as much as possible and to take advantage of the experience of those who have gone before us in these matters. We want all the information we can get. Can you give us the address of the American Fisheries Society? Anything you can do for us will be appreciated.—CHAS. G. WILSON. [The corresponding secretary of the American Fisheries Society is Fred. W. Brown, 1020 Arch street, Philadelphia, Pa. The president is E. G. Blackford, 80 Fulton Market, New York, who can furnish reports on oyster culture. Numerous papers on this subject have been published within the last few years, chiefly in the reports and other publications of the U. S. Fish Commission and the reports of Maryland, New York, Rhode Island and Connecticut Fish Commissions. Address Col. Marshall McDonald, U. S. Commissioner of Fish and Fisheries, Washington, D. C.; G. W. Delawder, Oakland, Md.; John H. Barden, Rockland, R. I.; Dr. W. M. Hudson, Hartford, Conn. Dr. A. Oemler read an address on the oyster before the Georgia Historical Society; price, 25 cents, from J. Gardner, 30½ Bull street, Savannah, Ga. The above reports will give you references to other works.

FROG CULTURE.—Quarryville, Conn.—*Editor Forest and Stream:* I intend to experiment on bullfrog culture to the extent of satisfying myself as to whether the business can be made to produce satisfactory results or not. I have one piece or plot of eighty acres of finely located meadowland, which is a very natural place for frogs to breed, and I think that by flowing this to a suitable depth for breeding purposes and at the same time not so deep but that it will allow the bogs and bunches of grass to remain above water, it will afford the frogs a suitable place to sit upon and obtain their insect food. If flowed too deep it will drive the frogs to the shore and thus reduce the capacity of the pond. As the enterprise progresses I will inform you of its success. I did not intend to have anything concerning the "bullfrog plant" published in the papers until I had achieved success or it had proved an entire failure.—NATHAN S. MAINE. [Mr. Maine will find it advantageous to follow the suggestions given in FOREST AND STREAM of Feb. 14. A place must be provided for the winter hibernation or the frogs will leave A central pond with a good spring are absolutely required. The system of ditches works admirably, for the insects collect on the strips of land between them and then fall or jump off into the water, where the frogs secure them. The necessary elements of a successful frog farm are a shallow pond for the tadpoles, a deep pond for the frogs to hibernate in, a good spring and a series of ditches.]

FISH FOR NEW JERSEY WATERS.—The Passaic Water Company stocked the reservoirs several years ago with perch, pickerel and other fishes; additional supplies have been added also by pumping fry into the reservoirs. The object in keeping fish there was to maintain the purity of the water; but the number became much greater than was necessary for this purpose and the surplus fish were of no use to any one except a few persons who had permits to fish. Mr. Chas. A. Shriner, the fish warden of Passaic county, obtained permission to remove some of the fish for stocking other waters. At a single haul of a seine about 700 or 800 perch, pickerel and other fish were obtained and transferred to Little Falls and Haledon. Greenwood Lake received a considerable number of small bass and some perch. This lake is already stocked with the species, but the introduction of fresh blood will probably improve the breeds now in the lake. With this object in view young pickerel will be transferred from the lake to waters nearer Paterson.

The Kennel.

FIXTURES.

DOG SHOWS.

Sept. 10 to 13.—Sixth Annual Dog Show of the London Kennel Club, at London, Ont. C. A. Stone, Manager.

Sept. 10 to 13.—Dog Show of the Central Canada Exhibition Association, at Ottawa, Can. Capt. R. C. W. MacCuaig, Secretary.

Sept. 11 to 13.—First Annual Dog Show of the Toledo Kennel Club, Toledo, O. T. B. Lee, Secretary.

Feb. 18 to 21, 1890.—Fourteenth Annual Show of the Westminster Kennel Club, New York. James Mortimer, Superintendent.

March 11 to 14, 1890.—Second Annual Dog Show of the Rochester Kennel Club, at Rochester, N. Y. Harry Yates, Secretary.

FIELD TRIALS.

Nov. 4.—Third Annual Field Trials of the Indiana Kennel Club. P. T. Madison, Secretary, Indianapolis, Ind.

Nov. 18.—Eleventh Annual Field Trials of the Eastern Field Trials Club, at High Point, N. C. W. A. Coster, Secretary, Saratoga Springs, N. Y.

Dec. 2.—Inaugural Field Trials of the Central Field Trial Club, at Lexington, N. C. C. H. Odell, Secretary, Mill's Building, New York, N. Y.

Dec. 16.—Second Annual Field Trials of the Southern Field Trial Club, at Amory, Miss. T. M. Brumby, Secretary, Marietta, Ga.

COURSING IN KENTUCKY.

CHICAGO, Ill., May 22.—*Editor Forest and Stream:* My visit of a week ago to Lexington, Ky., was something of a surprise to me, in that it showed that the sport of coursing is rapidly becoming known and being largely practiced in that part of Kentucky at least. I presume no one is to be credited with this more than my host, Mr. Roger D. Williams, resident owner of the Rookwood-Landseer Kennels, which, it will be remembered, took about all there was hung up for greyhounds at the Mascoutah Kennel Club's show here. Mr. Williams will be further remembered as one of the judges in the American Coursing Club meet at Great Bend last fall, in which position he achieved the difficult feat of making no enemies. He seems to have grafted his own enthusiasm upon the natural Kentucky love for a fast race, and has accomplished so much, in connection with his younger brother, Mr. G. W. Williams, that Kentucky is now fairly to be classed as one of the coursing States, and one which will send a delegation to Great Bend next fall.

There are no hares in Kentucky, and there is hardly a level place big enough for a mile race track anywhere about Lexington, yet in spite of this, and in spite of the fact that the country is fenced and walled to the last degree, the Lexington men manage to get a lot of fun out of coursing. They have a good-sized "woods rabbit," besides the ordinary cottontail, and these are often found out in the middle of the big blue grass pastures. They are started up by the ladies and gentlemen both riding upon these hunts, in good numbers. The rabbits have room for quite a little run before they get to the first fence, and then the fun begins. If a dog is not a good fencer he never would catch one of these rabbits, for they turn in and out so fast that a greyhound can hardly pick one up on open ground. As it is, about one rabbit out of every two or three is caught, most of them getting away into the woods. This is not rabbit-baiting by any means, and the rider who follows the greyhounds across country, taking fences and walls in approved Kentucky style, does not need complain of the tameness of this novel sort of sport. It is good exercise for the dogs, and as a sport it seems to be held in good favor at Lexington.

Old Snowflight—known as Dandy at Lexington—is now turned out to grass on one of the big farms in the country. He is getting fat, but still shows his vast frame and mus-

cular development. It is said of this dog that it was unsafe to train him hard for a racer, as he got muscle-bound from over-development. Snowflight has whipped about all the dogs in Fayette county, and has retired on his laurels.

Rich and Rare, a greyhound about 12ft. long, at whom I have had a shot or so in these columns on account of his inability to turn around in a forty-acre field, was lately the cause of a most unfortunate affair on one of the horse-breeding farms near Lexington. Some five yearling colts were in paddock, and their owner hallooed at them and clapped his hands to start them off. Rich and Rare thought it a signal for him. He ran in, caught and killed one of the colts, a fine young Longfellow yearling, and very valuable.

Master Rich and Minnie were alive and wagging when I saw them, and so was Catchfly, of whom Mr. Geo. Williams thinks more than the FOREST AND STREAM reporter did at the Chicago show. Will Parsley I did not see, and Mercedes was also out in the country. Black Bess had twenty or thirty puppies, and looked more like a snake than anything I ever saw that wasn't a snake. Miss Rare and Minnehaha are with Dr. Van Hummel in the West, but I saw White Socks—the dog which a slip of the type in the programme made us all call "Locks" last fall at the coursing meet. Speed, a Balkus puppy out of Bonfanti, and Tuxedo, were property of this kennel; the latter dog has been sold to a dog show troupe as a trained high jumper. Josephine II. has been sold to Mr. John L. Lincoln for the ignoble purpose of being bred to a collie; Mr. Lincoln wants a lurcher it seems. I don't know anything about Allie Hunt, but in Gracie, a light two-year-old, they have a bitch which ought to be a speedy turner. By far the purest greyhound type in these kennels, however, and I believe as good a greyhound bitch as I have seen, was Creole Belle, who will make trouble at Great Bend next October as sure as she is run, if in condition. She has wonderful quality in head, neck, forelegs and feet, is above serious fault in hindlegs, and barring too long a coupling, which is bad for her, would be well nigh a model. She ought to run. She was troubled with a horrible case of mange when I saw her, but even through that she showed her style. I hope she will run next meet.

Mr. Williams just had news from New York of the arrival of two new greyhound importations from England. I am not at liberty to give the names, but the dogs are good ones, a pair of rare good blood. If they show out well they will be entered at the American meet next October. There is going to be fun at that meet if it don't rain.

I saw the beautiful stock farm and extensive kennels of Mr. Chepu, owner of Meadowthorpe Kennels, about four or five miles out from Lexington. It is a lovely spot, and a dog which couldn't grow up sleek and good-looking there would be a poor sort. Mr. Chepu was absent at Louisville races, and Mr. Boillie, his kennel manager, was called away to New York by a telegram bearing news of his wife's illness. We went through the kennels and passed the time of day with all the dogs. Meadowthorpe is not strong on greyhounds, Douglas Fleming being about all we saw of note.

I left Kentucky feeling as though that were the early home, starting point and breeding place of fine animals of all kinds. Kentucky has set the pace for all sorts of horse contests at speed, and if we do not watch, she will make trouble in the dog records too.

I would like to add, for the benefit of Mr Geo. Bird Grinnell, who once was asking for authentic information of a single greyhound catching a single uninjured antelope, that Mr. Williams told me that early in the seventies, when he was in the West, old California Joe had a greyhound of the Custer stock which he, Mr. Williams, frequently saw catch and kill antelopes under the above conditions. California Joe always starved the dog two or three days before such a chase. If he was not so starved, he could not catch the antelope, but when gaunt and hungry he could, nearly every run. The name of this dog is not known. E. HOUGH.

AMERICAN KENNEL CLUB MEETING.

THE regular quarterly meeting of the executive committee of the American Kennel Club was held at the office of the club May 23. In the absence of the president the vice-president, Mr. Thomas H. Terry, called the meeting to order at 1:35 P. M.

Following is a list of the members represented: Associate Members, Dr. J Frank Perry, E. H. Moore and H. W. Huntington. Beagle Club, A. N. Lewis. Collie Club, Thomas H. Terry. Cincinnati Sportsman's Club, P. C. Ohl. Michigan Kennel Club, Major J. M. Taylor. New England Kennel Club, F. Blackwood Fay. New Jersey Kennel Club, A. Clinton Wilmerding. Philadelphia Kennel Club, J H. Winslow. St. Paul and Minnesota Kennel Club. H F. Schellhass. Southern Field Trials Club, J. L Anthony. Virginia Field Sports Association, Hon. John S. Wise.

The minutes of the last meeting were read and approved. The report of the secretary was accepted and ordered placed on file. The treasurer's report showing a credit balance of $965.35 was accepted. The report of the advisory committee was approved. The committee appointed to investigate the charges of the Michigan Kennel Club in relation to the St. Paul and Minnesota Kennel Club employing Mr. Chas. Weil as superintendent after his expulsion from the former club reported that in their opinion the A. K. C. had no jurisdiction. Report accepted and ordered placed on file.

The complaint that the catalogue of the St. Paul Club contained A.K.R. instead of A.K.C. registration numbers was referred to the Advisory Committee.

The Pointer Club of America, German Mastiff or Great Dane Club and the Long Island Fair Association were admitted to membership.

The application of the Southern California Kennel Club was laid over, under the rules, until the next meeting, and the secretary was instructed to advise the club that when admitted, wins at their show to be held next month would be recognized.

It was voted to grant the request of the Canadian Kennel Club that wins at the London, Ont., show of 1888 be recognized.

A letter was read from Mr. T. O. Hall, Atlanta, Ga., in which he states that his disqualification by the A. K. C. was unjust, inasmuch as he was never the treasurer of the National Poultry and Bench Show Association, as stated. Referred to the Advisory Committee.

Charges were preferred by Mr. J. S. Isgrig against Mr. P. T. Madison, of Indianapolis, Ind., for wrongfully claiming in an advertisement that his dog Rush Gladstone was a champion and for publishing a ficticious pedigree. Referred to the Stud Book Committee.

The charge of Mr. J. S. Hudson against Mr. Geo. W. Ewing, for exhibiting the English setter bitch Miss C. at the Chicago show with wrong pedigree, was also referred to the Stud Book Committee.

The request of the Great Dane or German Mastiff Club, that the registration rule requiring authenticated pedigree be modified, was not granted.

The appeal of Mr. James Watson against the decision of the Rochester Kennel Club, upon his protest that the collie bitch Metchley Surprise was not eligible to compete in the challenge class at their show, as her fourth win in the open class was not made until after the advertised time of the closing of the entries was sustained, and the decision of the Rochester Kennel Club was reversed.

Mr. J. L Anthony charged the Board of Control of the American Field Trials Club with witholding prize money won by his pointer dog Lad of Bow, at their field trials of 1887, and it was voted to allow the club thirty days to show cause why the prize had not been paid, and that the matter be then referred to a committee.

Mr. Wm. Graham, of Belfast, Ireland, through Mr. R. F. Mayhew, preferred charges against Mr. Lorenzo Daniels in regard to accounting for the sale of the St. Bernard dog Visp II., which Mr. Graham sent to this country for sale in 1887. The complaint states that Mr. Daniels sold the dog for $150, and several months after wrote Mr. Graham to this effect and sent a statement of account showing a balance due Mr. Graham of $50.10; and that still later he wrote another letter, stating that two weeks after the sale he had been obliged to take the dog back, and that he again sold him for $89, and that Mr. Graham owed him a balance of $54.80. Mr. Daniels, in reply, said that everything could be satisfactorily explained, and the matter was referred to the Advisory Committee.

The appeal of Miss Anna H. Whitney, of Lancaster, Mass., against the Worcester Kennel Club for disqualifying her St. Bernard dog Monte Rosa for mange was sustained and the decision of the Worcester Kennel Club was reversed.

The bench show rule regarding the admission of dogs with contagious diseases was amended by providing that a duly qualified veterinary shall examine the dogs, and that any animal suffering from any contagious disease shall be removed from the show before 6 o'clock P. M. of the first day. It was voted that a "duly qualified" veterinary is one who has a diploma granted by an institution entitled to bestow it, or one who has had five years of experience.

It was also voted to add to Rule XXVIII.: "The date of closing of entries shall not be changed or extended. Any club receiving an entry after the original date of closing shall be expelled."

The Advisory Committee reported that in their opinion the rule allowing free registration to all dogs registered in the A. K. R. previous to Jan. 1, 1888, should be rescinded, as owners had had plenty of time to avail themselves of it. Upon motion the rule was rescinded.

The secretary was instructed to notify the Rensselaer Kennel Club that if they did not pay the balance due for registration fees within 30 days, the club would be dropped from membership.

Major J. M. Taylor requested that action be taken in regard to the reports of the committee on standards. The matter was laid on the table until the next meeting.

Mr. James Watson brought up the matter of the protest lodged by him against his collie dog Clipper winning a prize for an American-bred dog at Philadelphia. Mr. Watson stated that he entered the dog as he considered him eligible, but learning that the secretary of the Collie Club thought otherwise, upon the ground that the dam of the dog was sent to England to be bred, he decided to withdraw him; but as he had already been awarded the prize, Mr. Watson protested the award in order to have the matter officially decided, and by mutual consent of him and the Philadelphia Club it was brought before the A. K. C. After a brief discussion it was decided that the dog was American-bred, and the protest was not sustained. The meeting then adjourned.

GRIT.

Editor Forest and Stream.

The article recently published in FOREST AND STREAM over the signature of S. Reicnaf entitled "Grit," caused my thoughts to revert to the past and call up some of the dogs I have known that carries out the idea advanced in the article.

I suppose there are very few sportsmen who can not recall instances where dogs of inferior looks and sometimes breeding, have proven themselves crack dogs in the field.

One of the most notable ones was Burriss' Troop, who seemed to be the embodiment of all the bad points (judged by the bench show standard) that foxhounds are subject to, yet that same old dog was the leader in one of, if not the best, pack of foxhounds in the State. He was about the last dog a hunter would have chosen as having a good tongue, nose or staying qualities, yet he had each of these requisites in a marked degree.

His scenting powers were remarkable. He would give tongue on a trail so cold that few dogs could find it. And such a voice! It was long and tremulous and gathered force as it neared the finish, reminding one of the last tremulous wail of a lost spirit. But how that tremulous, despairing wail thrilled the heart of the fox hunter as it sounded out on the crisp morning air, telling as it did in unmistakable tones that sly reynard had been passing that way.

Troop was a great dog for independent hunts. It was no uncommon thing for him to gather the pack two or three times a week and get up a fox race on his own responsibility, thus leading the pack to the kill in many a hard contested chase.

His speed was not marvelous, but he could be counted on to be "in at the death." Faster dogs might lead the race for a while at the start, but that long wail could always be heard as it rose in swelling cadences as the pack topped a hill or circled through the valleys.

Troop had the shortest ears I ever saw on a hound and looked very much like the proverbial "yaller dorg," but many a finer looking dog was distanced in the general round up by this bad-looking dog.

Not long since I received a letter from an ardent fox hunter in an adjoining county, asking me if I could furnish him with dogs that could kill red foxes. He said his dogs run fast enough, but could not hold out long enough to catch a red fox. (Foxes are caught and not shot in this country. A hunter considers it a grave offense to shoot foxes).

It appears to my mind that some valuable characteristics of the hound have been sacrificed to speed, and this is showing itself in the production of dogs deficient in bottom or staying powers. While I would not lay discredit on the standard for judging, or on bench shows, still the real value of a sporting dog lies in his ability and determination to do work.

A dog combining bench show and field qualities is to be desired, but is there not danger of depending too much on a dog's show record to the overlooking of field qualities? Especially is this likely to be the case with foxhounds and beagles. The champions of greyhounds and bird dogs seem to me to be ahead of the others in regard to field trials.

A few instances are recorded of field trials for foxhounds where points were given for the most desirable qualities in the field, but I do not call to mind an instance of such trials being held with beagles, nor am I aware that a "standard" for judging field work has ever been formulated for beagles.

May we not hope at no distant day to have field trials for beagles, where the proper value shall be given for nose, tongue, hunting, speed, bottom, etc.?

I notice with pleasure the account in last FOREST AND STREAM of the formation of the New York Fox Hunting Club, where they have purchased forty beagles to be used in the sport. This is a move in the right direction.

Wishing them and FOREST AND STREAM much success I will close. BLUE RIDGE.

DENVER, S. C.

PHILADELPHIA SHOW.—May 24.—*Editor Forest and Stream:* In the marked catalogue of the Philadelphia show the Wyoming Kennels' St. Bernard dog Plinlimmon, Jr., was through an oversight not recorded absent, and therefore appears to have been there and not to have taken a prize. As this is an injustice it is right that the true facts of the case should be stated.—H. I. IRELAND, Supt.

DOG TALK.

WE are constantly in receipt of letters containing inquiries in relation to dogs of all breeds. In many cases we are unable to furnish the information desired owing to the vague manner in which the inquiries are made. Correspondents will serve their own interests and save us valuable time if they will plainly state all the facts in their possession that bear on the case in question. "My dog is sick, what shall I give him?" is too much of a tax upon the skill of our veterinary. "Please give the pedigree of my dog Jack?" is a little better, as there is something to start from, but as there are over 20,000 dogs registered in this country and among them are many Jacks, even this is a hard one. If you wish us to prescribe for a sick dog, write a full description of all the symptoms. If you wish a pedigree, or any information, give all the facts that will enable us to identify the animal, and we will cheerfully do the best we can to answer your inquiries.

Fanciers' Gazette has this to say of some of our recent importations: "American buyers have been again busy among the English setters. Only a few days ago Sir Tatton followed Count Howard out, and now Mr. Cockerton's celebrated Monk of Furness, who is probably the best English setter we have had in England for some time, has journeyed across the Atlantic. The drain upon English setters will most probably stop now, as the three above mentioned are about the best we had, and, until a new one is found, they are not likely to be beaten."

Mr. A. C. Wilmerding has had the misfortune to lose by death the well-known field spaniel bitch champion Newton Abbot Lady. She died April 7, from what cause we are not advised. She was well known to the public as she has won upward of 20 prizes on the show bench. In addition to her show qualities she was an excellent brood bitch and among her offspring are a number of well-known winners on the bench.

Mr. Jacob Pentz's well-known white and liver ticked pointer dog Fashion has strayed or been stolen from his home near Newark, N. J. He is about 3 years old with liver colored head and ears with white blaze, body white and thickly ticked with small liver spots. He can be readily identified as he has no eye lashes. Any information that will lead to his recovery will be thankfully received by his owner, Mr. Jacob Pentz, Fanwood, N. J.

We clip the following from the *Stock-Keeper*: Jones (an exhibitor): "Well, Brown, hang it all, I thought you would have given me more than 'second prize,' and a pal, too" Brown (the judge, apparently surprised): "Well, that is good. What more could I do for you? The dog I gave first to is my own!"

We learn that Mr J. F. Campbell, of Montreal, Can., will dispose of his entire kennel of black and tan terriers and that in future he will devote his time exclusively to Yorkshire terriers.

The secretary of the Indiana Kennel Club writes that judging from present indications, there will be over 100 entries for their third annual Derby.

We are pleased to learn that the New England Kennel Club can show balance on the right side of the books for their last show.

KENNEL NOTES.

Notes must be sent on prepared blanks, which are furnished free on receipt of stamped and addressed envelope of large letter size. Sets of 200 of any one form, bound for retaining duplicates, are sent for 30 cents.

NAMES CLAIMED.

☞ **Notes must be sent on the Prepared Blanks.**

Lad of Kent and Lass of Kent. By Geo. Jarvis, New York, for liver and white pointer dog and bitch, whelped March 28, 1889, by champion Bracket (champion Graphic—champion Bloomo) out of Renie (Tammany—Erie).

Golden Wedding. By Eberhart Pug Kennels, Cincinnati, O., for apricot fawn pug dog, whelped Feb. 26, 1889, by Joe I. (champion Joe—Pudgie) out of Mandie I. (Ellis's Jim—imported Cute).

DEATHS.

Newton Abbot Lady. Liver and tan field spaniel bitch, whelped July, '83 (A.K.R. 2691), owned by A. C. Wilmerding, New York, April 7.

KENNEL MANAGEMENT.

☞ **No Notice Taken of Anonymous Correspondents.**

C. V. Y., Appleton, Wis.—A cocker spaniel bitch has some kind of skin disease, a spot on each cheek about as large as a nickle. The skin thickens and exudes a gummy substance with constant itching. The hair does not fall out as yet; has been troubling her about three weeks. What can I do for her? Ans. Wash the affected parts twice daily with warm water and soap; dry, and rub in gently the following:

℞ Ung. diachylon.
Ung. zinc oxid āā ʒi.
Mix. Sig. External.

Feed low diet if the bitch is very fat. Keep the bowels free by teaspoonful doses of syrup of buckthorn morning and evening.

Rifle and Trap Shooting.

RANGE AND GALLERY.

SYRACUSE, May 23.—The fourth shoot for the Everson & Co. medals took place at the Onondaga Rifle Club's range at the Valley, Wednesday. There was a fair attendance. 200yds., off-hand, standard American target. C. J. Dudley won the gold medal with a score of 75 against A. O. Zischong's 53. C. H. Remer still holds the silver medal. Having won it three consecutive times he will be handicapped at the next shoot. Following is the score in full:

C H Remer	5	5	4	6	3	5	7	10	5	5—55
A O Zischong	6	4	10	7	7	6	7	6	5	5—63
L C Tabor	2	2	7	7	6	3	7	6	6	5—51
C J Dalley	10	10	8	5	5	9	8	8	5	7—75
C D Lathrop	6	4	5	2	6	3	4	1	6	1—38
W B Bucklin	2	4	2	7	2	9	8	2	4	2—42
R D Knapp	4	4	2	6	5	0	1	5	4	2—33
W C Durgan	1	2	2	1	0	1	4	0	0	3—14
J N Knapp	3	7	7	6	4	8	9	7	9	9—69
M B Fairchilds	5	4	6	5	4	3	3	6	3	6—45

In the rest match A. A. Stillman made the highest, his score being 100. Following is the full score:

C H Remer	9	11	8	11	9	8	8	9	9	9—91
A O Zischong	6	12	9	10	8	10	11	9	9	11—95
L C Tabor	8	9	11	6	9	7	8	6	11	12—87
C J Dalley	10	6	8	9	9	8	7	9	11	10—87
*C D Lathrop	6	1	1	9	6	5	3	7	4	6—48
W B Bucklin	8	8	10	8	8	8	9	11	8	9—87

W C Durgan	7	5	6	11	7	9	8	7	9	6—75
*J N Knapp	3	2	9	11	9	6	9	5	5	2—60
M B Fairchild	6	7	9	8	9	11	9	8	8	8—84
A A Stillman	9	9	10	9	11	8	12	10	12	10—100

*Off-hand.

The next contest for the medals occurs Wednesday, June 5.

TACONY, Pa.—At the Tacony Driving Park, Wm. H. Wolstencroft will to-day give an exhibition of fancy shooting with the rifle and shotgun. He will use a Winchester rifle and a 12-gauge shotgun, and the shots attempted will be as follows: First, shooting at 1 ball; second, shooting at 2 balls; third, shooting at 2 balls, holding the gun with one hand; fourth, shooting at double bluerocks; fifth, shooting at 3 bluerocks sprung at one time; sixth, shooting at 5 single balls thrown with the right hand; seventh, shooting at five single balls with the left hand; eighth, shooting single balls, holding the gun in the right, changing it and shooting from left shoulder; ninth, shooting at 10 pennies thrown in the air; Tenth, shooting at single balls thrown in air with back turned to thrower; eleventh, shooting at single birds, rolled on the ground; twelfth, using 44cal. Winchester shooting a solid ball, and cutting a piece of common sewing thread at a distance of 30ft.

BOSTON, May 25.—At the regular rifle shoot of the Massachusetts Rifle Association to-day the shooting conditions were unfavorable, there being a bad fishtail wind from 12 o'clock. Mr. Clarke won the champion gold medal, and Mr. Monroe won the gold medal in the 20-shot rest match. Mr. Howe won the bronze victory medal. Following are the best scores made to-day:

Twenty-shot Rest Match—200yds.

J R Munroe	10	7	12	12	12	9	11	12	12	11

F O Martin	7	7	9	8	5	3	6	5	7	—56

The bronze victory medal was won on the following 10 scores of 75 or better by J. S. Howe: 78, 75, 78, 76, 81, 81, 75, 77, 80, 81.

WILMINGTON, Del., May 20.—Owing to the unpromising weather there was a small attendance at Healdmoor range. The wind made a complete revolution and blew alternately from all points of the compass with variable force from a zephyr up to a hurricane. The weather changed with amusing capriciousness from mild sunshine to a thundering storm, then to a "norther" with hail, and back again, to warm showers and sunshine. The purpose of the day was to take part in the Bullard champion telegraph match, which is being shot by individual riflemen throughout the United States and Canada this week. Three local riflemen competed in the match. Dr. Knight stopped over between trains to meet old friends and enjoy a fascination for the favorite. The match requires scores of 50 shots for each competitor, and those made are as follows, standard American target, at 200yds.:

Dr R Knight	2	5	7	8	4	4	6	7	7	7—55
	5	8	7	4	6	4	3	5	4	5—51
	6	10	6	6	9	9	7	8	5	7—73
	5	3	3	2	10	9	4	9	10	5—60
	10	6	4	3	5	5	7	6	6	5—57—296
A Carlisle	4	5	5	5	2	6	8	3	6	8—51
	7	7	6	3	7	8	6	8	9	3—64
	4	5	5	7	4	7	0	7	7	6—60
	8	6	6	5	3	10	6	5	6	5—58
	8	6	7	7	2	3	5	10	6	8—62—295
H Simpson	10	7	5	5	4	4	7	3	7	6—58
	3	5	7	6	5	4	7	5	3	8—53
	6	4	5	6	8	10	6	5	8	6—64
	2	6	9	7	7	7	7	6	2	8—62
	10	5	5	5	4	5	5	5	3	3—50—287

Revolver Match—50yds., S. A. Target.

H Simpson	6	6	5	4	6	6	7	10	4	4—58
J K Woodward	10	3	9	4	4	5	4	6	4	4—53
W H Hartlove	5	3	3	2	10	4	3	8	7	8—53
A Macklem	0	5	3	7	6	4	4	6	1	8—45

ST. LOUIS, Mo., May 25.—The St. Louis Pistol Club won the first of a series of three friendly telegraph team matches with the Cincinnati Club last Tuesday night. This club has a lead of 85 points, and is confident of ultimate victory. Teams of 10, 10 shots at 12½yds., standard American targets, any .22cal. pistol with 3lb. trigger pull:

E Mohrstadt	9	8	10	10	6	10	10	9	7	9—88
M Summerfield	9	10	7	10	7	9	8	9	10	8—87
L V D Perret	9	9	8	10	7	9	8	8	9	9—86
G Dunn	6	9	9	10	8	8	9	8	9	10—86
G Alexander	7	8	8	10	10	9	8	7	8	9—84
F A Fodde	7	9	8	10	6	9	10	8	10	7—84
M Billmeyer	5	10	10	5	8	10	8	9	10	6—81
O Neuhaus	8	7	8	7	9	7	9	9	7	9—80
W Bauer	5	5	10	10	8	7	9	9	6	8—79
W J Lord	8	9	7	8	6	6	9	9	7	7—76—831

Wednesday night the medal was captured by Summerfield. He made 98, which is the highest score ever made by any one in this city. A 20yds. standard American target and Stevens .22cal. pistols:

M Summerfield	10	10	8	10	9	9	10	10	10	10—96
F A Fodde	10	8	8	9	7	8	9	9	9	9—86

UNSER FRITZ.

MASSACHUSETTS SPRING MEETING.—The spring meeting of the Massachusetts Rifle Association will be held at Walnut Hill, May 30, 31 and June 1. Five matches will be shot, as follows:

Off-hand Match.—Standard American target, open to all comers. Conditions: Distance 200yds., position standing, rounds seven, rifle, any within the rules, five scores to count, entries unlimited at 50 cents each. Members of the M. V. M. using a Springfield rifle, as issued by the State, throughout the match, will be allowed a handicap of five points on each score. Military rifles must be shot without cleaning through each score. In this match there are forty prizes, ranging from a Maynard rifle valued at $50, down to a quarter keg of powder valued at $1.50.

Rest Match.—Standard American target, rest, bullseye, open to all comers. Conditions: 200yds., rounds seven, rifle without restriction in regard to weight, sight or trigger pull, except that hair triggers must be provided with safety lock, and rifles with telescopic sights and weighing over 12lbs. will be handicapped seven points on the aggregate of five scores. Any position or rest allowed, provided the rifle be shot from the shoulder. Five scores to count. For this match there are twenty prizes, from a cash first prize of $20 down to a cash prize of $1.

Revolver and Pistol Match.—Standard American target, 200yds., open to all comers. Conditions: 50yds., rounds seven, rules of the M. R. A. to govern, except that revolvers and pistols will be admitted on equal terms, and blowing into the barrel, and any ammunition will be allowed. Entries unlimited at 25 cents each. Prizes will be 65 per cent. of entry fees, divided into four cash prizes.

Military Match.—500yds., open to members of the M. V. M. Conditions: Rounds seven, rifle, any used by the State of Massachusetts, trigger pull 6lbs., to be tested, cleaning only between scores, "prone" position. Five scores to count. Entries unlimited at 50 cents each. For this match there are eight prizes. The first five are silver medals, and the last three steamer chairs.

A directors' match will also be shot. These matches will be shot under the usual rules.

NEWARK, N. J., May 22.—The Shooting Park was well patronized to-day, upward of a score of society members being present, along with a number of visitors. The wind was blowing at the rate of twenty-five miles an hour during the entire afternoon, making good scores hard to get, but, nevertheless, some succeeded in rolling up big ones. In the fourth trophy match H. Williams was the victor, with a score of 224. Other scores were: Otto Krauss 220, John Coppersmith 214, F. W. Campbell 207, F. A. Freiensehner 205, J. A. Boyken 157, G. D. Weigman 155, Ferd Freiensehner 178, J. H. Huegel 174, C. H. Townsend 170, F. A. Schmitt 170, C. E. Derivaux 170, F. Felshery 155. In the expert match F. W. Campbell captured a silver medal with scores of 64, 62, 64, 65, 64, 66, 66, 62, 63. J. A. Boyken also won a silver medal, his scores being 62, 64, 63, 63, 65, 62, 63, 62, 62, 68. B. Walther made two gold medal scores of 68 and 69, the latter also giving him first money for the day. Second money went to J. A. Boyken on 68, third to Williams on 67, fourth to Coppersmith on 66, fifth to F. A. Freiensehner on 64, sixth to Campbell on 63, and seventh to Weigman on 57. F. A. Freiensehner has one more 57 to make to win the bronze medal. The only one to win a gold medal thus far is Williams. Walther has five scores to make to get his gold one.

SAN FRANCISCO, May 19.—The members of Company E, Second Artillery Regiment, N. G. C., held their regular monthly shoot to-day at Shell Mound Shooting Range. A match was shot between two teams for a dinner, with the following result; Creedmoor target, ten shots per man:

Capt J H Flynn	36	Sergt J O'Connor	32
Sergt T J Cunningham	37	Pvt W Bonney	27
Pvt J Solomon	27	Pvt J Laurino	30
Pvt G Davidoff	25	Pvt J Wrin	26
Pvt J Heilmann	35—160	Corp W Gerkin	29—144

REDUCED CALIBERS.—The regulations for the Wimbledon meeting of 1889 provide that the minimum bore of sporting rifles be reduced from .4 to .36, and the minimum charge of powder be 50 grains.

DOLAN VS. WALTHER.—A 300-shot match is shortly to be shot between T. J. Dolan and B. Walther. It will come off at the Newark Shooting Park.

THE TRAP.

Scores for publication should be made out on the printed blanks prepared by the Forest and Stream, and furnished gratis to club secretaries. Correspondents who favor us with club scores are particularly requested to write on one side of the paper only.

Secretaries of clubs and managers of tournaments are requested to keep us advised of the dates of their shoots, so that we may give due notice in our column of fixtures.

FIXTURES.

May 29, 30, 31.—South Side Gun Club tournament, Milwaukee, Wis. C. W. Hilbrath, Secretary.

May.—Nebraska State Sportsmen's Association's fifteenth annual tournament, Norfolk. B. B. Locke, Secretary.

June.—Annual tournament Sportsmen's Association of the Northwest, Tacoma, Washington Territory.

June.—Ninth annual tournament Southern Illinois Sportsmen's Association, Belleville. C. P. Richards, Secretary.

June.—Kansas City tournament.

June 3, 4, 5, 6, 7.—New York State Association for the Protection of Fish and Game tournament, Albany, N. Y. Horace B. Derby, Secretary, Albany, N. Y.

June 6, 7, 8.—Southern Illinois Sportsmen's Association's ninth annual tournament, Belleville, Ill.

June 10, 11, 12, 13, 14.—First tournament of the American Shooting Association, at Cincinnati, O.

June 12, 13.—Springfield (Mass.) Gun Club. M. W. Bull, Sec'y.

June 18, 19, 20, 21.—Illinois State Sportsmen's Association's tournament, Grand Crossing, Ill.

Aug. 13, 14, 15.—Second Tournament of the American Shooting Association, Boston, Mass.

Aug. 20, 21, 22, 23.—Second annual tournament of the Keystone Manufacturing Co., of Corry, Pa. Traps will be pulled by a new electric apparatus.

Sept. 17, 18, 19, 20.—Central Illinois Sportsmen's Association's eleventh annual tournament, Jerseyville, Ill.

Oct. 8, 9, 10.—Middlesex Gun Club Tournament, Dunellen, N. J. W. F. Force, Secretary, Plainfield, N. J.

THE DOMINION TOURNAMENT.

OTTAWA, May 24.—To-day's celebration of the Queen's Birthday by the St. Hubert Gun Club brought out the finest representation of shooters which the Dominion has ever witnessed. The day, which at first looked threatening, cleared off and was strongly favorable. The number of shooters was large and came from Toronto, Montreal, Cote St. Paul and Carleton Place. The judges were Messrs. Morton and E. O. Champagne; referee, A. H. C. Walpole, and official scorer, Alex. Jaques. First came a sweep at 15 birds each, 18yds. rise, 5 traps, 28 entries:

A H Troop	15	T S Glover	14
F Emond	14	S Glover	14
W J Johnson	14	R Lucas	13
P Trudeau	13	J Locke	12
C H Wallace	12	J Deslauriers	12
V Henrishon	11	W M Donald	11
R Glover	11	C K Riggs	10
G Harrison	10	L C Trotter	10
J Allen	10	Dr Martin	10
R G Dalton	10	Jos Cook	10
W L Cameron	10		

Several others also shot. In shooting off ties at 14, they finished in the order in which they are placed.

For the champion team match, 5 men each, 15 birds, 18yds. rise, there were 6 clubs entered. The Mississippians, of Carleton Place, with fine feather weights, made a bold dash. The Dominions, of Montreal, who held the Lord Lansdowne's cup and gold badges in 1888 for 56, did not catch on as well as last season. The Stanleys, of Toronto, fell off, while the Cote St. Paul, of Montreal were below regulation standard, as also the No. 2 Club, of St. Hubert. No. 1 Club led the way to victory, and now holds the cup and the champions' title for 1889:

St. Hubert No. 1.		Stanley, of Toronto.	
J Deslaurier	14	W McDowall	12
Ed White	12	F Mallet	6
W J Johnson	14	F Emond	12
Geo White	13	C H Riggs	10
A H Throop	14—67	W Harrison	10—50
Mississippi, Carleton Place.		St. Hubert No. 2.	
J Lock	15	O G Dalton	13
R Glover	11	Dr A Martin	10
S Glover	14	W P Lett, Jr.	4
R Slater	11	S White	12
T Glover	13—64	P Trudeau	9—48
Dominion, of Montreal.		Cote St. Paul, Montreal.	
L J Trotter	10	B Aubin	12
E O Champagne	12	F Henrishon	9
C H Wallace	11	E Truesdale	7
T W Lesage	7	Jos Cook	9
J Alle	11—51	R Lucas	7—44

For the prize sweepstake, 15 birds, 18yds. rise, $1 entrance and $1 added for sweep, birds included, there were 28 entries with 15 prizes: J. Locke 15, first; W. McDowall 15, second; four ties at 14, and after a three-tie shoot Ed White got third, S. Glover fourth, L. Glover fifth, J. Emond sixth; three tied at 13, and on the shoot-off R. G. Dalton got seventh, J. Allan eighth, A. Throop ninth, three tied at 12; the shoot off gave tenth money to T. Glover, Dr. A. Martin eleventh, C. H. Wallace twelfth, Geo. White thirteenth, J. De laurier fourteenth, and L. T. Trotter fifteenth.

May 25.—The tournament closed with big scores and a triumph for home team for second day.

First match, individual, 28 entries, 15 prizes, 25 birds, 18yds. rise, Saints captured for 22 each, first 3, sixth, fourteenth and fifteenth, Mississippians 2 at 21, the Stanley 2 at 21 and the Dominion 3 at each.

The shooting off of the ties did not close until 24yd. limit was reached.

The 3 men team, 5 clubs, Mississippians won first with 42 out of 45. Nos. 1 and 3 teams of the Saints got second and fourth for 39 and 38. The Stanleys tied at 38 and outshot on tie by 3 birds. The wind-up match, 5 singles and 5 doubles, 18 entries, 6 moneys: Tom Glover and P. Trudeau tied at 14, Glover won the tie. C. H. Riggs and A. H. Throop tied at 13 and had three ties off before closing, the captain of the Stanleys won. W. J. Johnson and S. Glover tied at 12, and after exhausting ammunition in ties, divided.

The mercantile match, 9 birds each, 300 entries, 25 prizes—Huberts got ten.

THE MINNEAPOLIS TOURNAMENT.

MINNEAPOLIS, Minn., May 24.—*Editor Forest and Stream:* The great Minneapolis tournament is over and it was a "blooming success." All the guaranteed purses and cash averages were paid and the club has a handsome surplus, thanks to President Harrison, Treasurer Cutter and Field Captain Fred Lawrence. Everything passed pleasantly, not a hitch nor an unpleasant word during those three days of pleasure. Every one is pleased and satisfied, except with their own poor shooting. The wind howled a hurricane for the whole time, including a rainstorm the first day The shooters faced to the east; a strong northwest wind blew the first day; the second a little stronger wind blew from the southeast around to the southwest, and yesterday it got around to the northwest again and blew harder than ever. There was a frost the first night, and the whole time was so chilly that it was uncomfortably cold in the shade, even with a winter overcoat, and this in the latter part of May.

The attendance was large, ranging from seventy-five to fifty. Many prominent sportsmen were present from abroad, among whom were A. E. Fisk of the *Herald*, Helena, Mont.; E. H. Young, Hutchinson, Kas.; W. A. Van Saun, Greene, Ia.; J. H. Balsom, Hudson, Wis.; J. Benson and J. H. Rensler, Fargo, Dak.; Capt. Mayne, Devil's Lake, Dak.; W. E. Bremer, Baraboo, Wis.; H. J. Tyler, Bismark, Dak.; Capt. Gove, Creston, Ia.; besides the following from out of town in our own State: J. H. Block, St. Peter, H. W. Jones and "Lee," Atwater; P. E. Hanson, Litchfield; J. A. Ruble, Albert Lea; "Wing" and Stearns, Wabasha; Tuttle, "Newton," Westerson and Noreen, Hastings; "Barnes," Stillwater; "Dunlap" and "Huston," Crookston; "Stone," "Daly," "Chantler," "Catamaran" Kenedy, Skinner, "Bennett," "Hamlin," "Holt," "Benke," "Bonte," "Forbes," St. Paul; E. W. Bird, the great rifle shot, Fairmont; I. E. Paine, Bird Island; Ahlstrom, Litchfield; and Hull, of Atwater.

J. H. Balsom ("Parker") who shoots a splendid Parker gun) won first average, $60, and first money, $60, under peculiar circumstances. He had been shooting well but in "hard luck" in being shot out in the ties. Once he fell to third place, but on the last day he braced up, and in that fearful gale only missed one bird in the entire day. At the last match, $150 guaranteed, 9 singles and 3 pair, he got his 9 singles straight, and there were only three in the forty-five who did. Great interest was manifested in his doubles as he was two in the lead for first average. He had the misfortune a few years ago while at the trap to the victim of a "didn't-know-it-was-loaded" fool who picked up a gun to examine it (which the owner had carelessly left loaded), and pointing it fairly at Balsom's leg from the rear it was discharged, cutting the leg off just below the knee as cleanly as if done with an axe.

As he limped to the score with his wooden substitute, the other day, nearly every one ceased talking and watched every motion. He smashed the three pairs straight amid the applause of the large crowd of shooters and spectators, and captured $120 at the same time. J. H. Block, of St. Peter, sheriff of Necollet county; second, $50; H. W. Jones, Atwater Minn., third, $45; B. F. Schurmeer ("Hamlin"), St. Paul, fourth, $40; W. H. Skinner, St. Paul, fifth, $35; Charles Thompson ("Bennett"), sixth, $30; "Catamaran" (H. C. Lawrence), seventh, $25; Ruble, Joslyn and Kennedy, eighth, $20. Others scattered through, so every one got something. There was no claimant for $25 average or the $20 gold or pair of crutches in the consolation shoot. The crutches were put in a special shoot for poorest score, which were won by Henry Elliott, of Indianapolis. Peoria blackbirds were used, 18 and 15yds. rise, Minneapolis rules (now called "Keystone" by some), governed. Traps 5yds. apart. Two sweepstakes were shot each day. All purses divided, 40, 30, 20 and 10. The following are the scores made each day:

First Day.

First sweep, $1.50 entrance, 7 single Peorias:

Skinner	1121101—6	Dunn	1101011—5
Block	1111011—6	Brewer	0011110—4
Newton	1001111—5	Hanson	1011111—6
Bird	1100111—5	Murphy	1110110—5
Stokes	1010111—5	Paine	1111111—7
Marshall	0010111—4	Moran	1101111—6
Fisk	1111111—7	Wood	0110110—5
Jones	0010011—3	Cutter	1110110—5
Lawrence	1011111—6	Chantler	1110111—6
Benson	0100111—4	Catamaran	0011111—5
Renseller	1111111—7	Westerson	1111011—6
Dalton	1110111—6	Ahlstrom	1110001—4
Stearns	1111113—7	Boyland	1010001—3
Lee	1010001—3	Hamlin	1111001—5
Van Ess	1101001—4	Bennett	1111111—7

Ties on 7 div. first, Lawrence, Noreen and Westerson div. second, Newton and Hamlin div. third, Benson wins fourth.

First event, 10 singles, $1.50:

Catamaran	1010111111— 8	Kelly	0010001000— 2
Skinner	1100110111— 7	Noreen	1111111111—10
Pratt	0110111011— 7	Dalton	1111111111—10
Marshall	0111111111— 9	Warwick	0111101101— 7
Dunn	1011000010— 5	Lawrence	1100111011— 7
Block	1111011111— 9	Cummings	0101101111— 7
Paine	0111111101— 8	Ensign	1111111110— 9

WILLIAMS.

ILLINOIS SHOOT ANNOUNCEMENT.

CHICAGO, Ill., May 22.—The programme for the fifteenth annual tournament of the Illinois State Sportsmen's Association, June 4, is out to-day, and is a very creditable piece of work, of which the publisher, Mr. Al. W. Knox, need not be ashamed. Besides the list of shoots and prizes, it contains the Illinois State rules, the new American Association rules, the English rules, and brief explanations of the Keystone, Loyd and Tucker systems.

The list of prizes, abbreviated below, should be enough to interest almost any shooter:

Shoot No. 1. Board of Trade diamond badge, individual State championship, value $500; second prize, 12-gauge Parker hammerless, 100 fine cigars added; third prize, Louglas boat, silk hat and Mackintosh added; fourth prize, $25 cash from Mussey & Winchester shotgun, hunting shirt and subscription to FOREST AND STREAM, best sporting paper on earth, added.

Shoot No. 2. L. C. Smith cup, value $500; second prize, cash $60, split-bamboo rod, 200 cartridges and subscription to *Inter-Ocean* added; third prize, cash $40, one corduroy suit, subscription to a Western paper and 200 cartridges added; fourth prize, cash $25, one reel and box, 200 cartridges, subscription to sporting journal added.

Shoot No. 3. Team shoot for club teams of four, non-members of association barred, one diamond ring, value $100; four diamond rings, one to each member added; second prize, cash $50, wall tent from E. C. Cook & Bros. added; third prize, cash $30, 200 cartridges added.

Special Prizes. For best average in shoots Nos. 1, 5 and 7, a Lefever hammerless, value $100; same conditions, Chicago *Herald* medal for State championship; same conditions, adding shoot No. 9, a Colts lightning rifle, offered by Spaldings; for second best score in tie birds for diamond badge an elegant shooting trunk, offered by Haskell Bros; for best team score in team shoot, 100 fine cigars, offered by M. W. Diffley.

The open tournament holds 12 shoots, live birds and Keystones, entrance $2 to $5; two-men team shoot, $15. Any number of sweepstakes.

The convention will be held at the Palmer House, Tuesday evening, June 4, at 8 o'clock.

The grounds are at Watson's Park, Grand Crossing. Shooting will begin at 9 A. M., June 4, and the tournament will continue throughout the week.

The Chicago and Illinois shooters want to see every shooter, East or West, North or South, on hand for the week. This is going to be a shoot to talk about, and everybody wants to bear that in mind and come to it.

E. HOUGH.

NEW YORK SUBURBAN.—New York Suburban Shooting Grounds, Claremont, Jersey City, May 25.—Lefever trophy, 25 birds, 25 cents entry:

NEW JERSEY ATHLETIC CLUB.—Arrangements have been completed by the Gun Committee of the New Jersey Athletic Club for holding a summer tournament at clay-pigeon shooting for prize medals costing over $100, on the organization's grounds at Bergen Point. The tourney will only be open to members of the club. It will include six matches, in each of which each entry will shoot at 20 birds. The events will be shot at intervals of a fortnight, the first contest being selected for Thursday afternoon, June 6. The privilege of selecting the scores of the best five of his six matches to place in competition for a prize for the best score at 100 birds will be accorded each entry.

BROOKLYN, May 2.—Hillside Gun Club third monthly shoot, Dexter Park. We had three sweepstakes after the shoot for medal, H. Quinn and Geo. Koch dividing first in the first sweep, H. Bergen second. Second sweep, Geo. Koch first, H. Knebel, Jr., second. Third sweep, H. Knebel, Jr. first, John Kessler second. Match at 25 bluerocks, 16yds.. Chamberlin rules, for gold medal:

MIDDLESEX GUN CLUB.—Plainfield, N. J., May 27.—At a meeting of the Middlesex Gun Club, Saturday evening, May 25, it was decided to hold the club's annual tournament at Dunellen, Oct. 8, 9, 10 and 11 next. Among other interesting events a guarantee purse of $1,000, 50 live birds each, $112.50 entrance fee, will be offered.—W. F. FORCE, Secretary.

CLEVELAND, O., May 24.—There was the usual large attendance at the regular weekly shoot of the Sherman Gun Club this afternoon, but the shooting was not up to the average. The only fair score made by the class A shooters was that of Hugo, who won the badge on a score of 20. Walters made a good score for a new beginner, and won class B badge. The cloudy weather and high wind was accountable for most of the poor shooting. The club have arranged for a special shoot on Decoration Day. Score:

Hugo.....1111011111101111111010101—20
Williams.....1110011111001101011101111—18
Sprigg.....1011110101001100010111017—15

J J Ryan (21).....2100100001— 4	M W Murphy (25)....2201220010—7		
L C Gehering (30)..2121111211—10			

Use of both barrels allowed; 2 means used second barrel. In the ties second barrel counts half a bird. Ties on first prize, 20yds.: C. Grainger 0, L. C. Gehering 2, wins first prize second time. T. P. MacKenna wins second prize for first time. John J. Ryan wins third prize for third time and now owns it. The club will hold its annual excursion on Tuesday, June 25.—T. P. MACKENNA, Recording Secretary.

SAN FRANCISCO, May 18.—A few members of the Bluerock Gun Club assembled at Alameda Point to-day to shoot up back scores and have a little practice at the artificials. The traps were strong and a breeze blew from the marksmen to the traps, so that the birds gained good headway the result being poor scores. Messrs. H. Golcher, Fenno and Campbell shot as guests of the club. The first match was at 20 singles, and resulted as follows:

Kittle .....01000001100011001011— 8
S Golcher.....0101100001000101010000— 6
Abbott .....1100100001101001101—10
H Golcher.....1111101110101101101—14
Fenno .....1100101010101001110—11
Campbell .....1110010100111111101—13

The second match was at 5 pairs and resulted as follows:

Kittle .....10 10 01 10 11—6	H Golcher.....10 10 10 11 11—7		
S Golcher.....00 10 00 00 10—2	Fenno.....10 11 11 01 10—7		
Abbott.....11 10 10 10 10—6	Campbell.....10 10 10 10 10—5		

Several pool shots followed, in which the shooting was somewhat improved.

NEWARK, N. J.—The South Side Gun Club, of Newark, N. J., will hold the second shoot of the summer season on Wednesday, June 5, at 9:30 o'clock. The programme includes: 1. Ten clays. 2. Five pairs clays. 3. Ten bats. 4. Five pairs bats. 5. Fifteen bluerocks. 6. Five pairs bluerocks. 7. Ten bluerocks. 8. Twenty bluerocks. 9. Ten clays. 10. Ten clays. All will be class shooting under club rules. Prizes divided 40, 30, 20 and 10 per cent. Targets three cents each. Rain or shine. An extra set of traps will be provided where novices will not be compelled to compete with the more expert.

BROOKLYN, May 23.—The New York German Gun Club held its annual shoot at Dexter Park, on the Jamaica Plank road, yesterday afternoon. It was the ladies' day of the club, and the fair sex was well represented. Shooting began at 11 A. M. and lasted until late in the afternoon. The first event was a sweepstakes at 5 bluerocks each, in which Messrs. Schlicht, Sauter, Bonden, Hassinger and Carwein carried off the honors. The next contest was at 10 live birds for the club medal, in which J. Baesnecker, 25yds., and J. Carwein, 21yds., tied for first place on 9 birds each; A. Lucas and Dr. Cartrell on 8 birds for second place; J. Schlicht P. Hassinger, P. Garmes, Jr., for third place, on 7 killed, and P. Garmes, Sr., F. Sauter, M. Border, Dr. Von Loemer and J. Dannefelser on 6 birds for fourth place. The team captain, Mr. Sauter, congratulated Mr. Carwein, who won the shoot-off and is a new member of the club, and presented him with the club medal. Mr. R. Spregrade, who made the lowest score, 5 killed and 5 missed, received a special medal of a pasteboard dish. The score of the shoot-off for the club medal was as follows:

J Carwein.....110—11111—7 J Baesnecker.....101—11110—6

Another sweepstakes at 10 bluerocks finished the tournament. A. Duryea, of the North Side Gun Club, acted as referee, and E. H. Dellar as scorer.

Every week we are obliged to defer to the next week trap scores which come in too late for publication in the current issue. It is particularly requested that scores be sent us as early as possible.

NEXT WEEK'S SHOOTS.—The coming week will see a great smashing of clays and slaughter of live birds. The Illinois and New York State shoots will each gather a brilliant company of shots. The Western men holding the 15th State shoot at Grand Crossing, Ill., and the Eastern men the 31st State shoot under the auspices of the Elm Grove Club, of Albany. Besides these large shoots dozens of clubs announce attractive programmes.

TORONTO, May 18.—The fifth competition of the Stanley Gun Club for the President's gold watch took place on McDowall & Co.'s grounds this afternoon. The day was magnificent—a better trap day could not be desired. F. Mallet won the watch this time with a score of 21 out of 25, at 19yds. rise. Four different members have also a claim on it. They are: W. McDowall, 19 out of 25; J. Rice, 20 out of 25; W. Felstead, 23 out of 25; T. Sawden, Jr., 22 out of 25. In a sweep at 10 birds for three prizes, Beatty broke 7, McDowall 5, Draisey 4, T. Taylor 4.

Canoeing.

Secretaries of canoe clubs are requested to send to FOREST AND STREAM their addresses, with name, membership, signal, etc., of their clubs, and also notices in advance of meetings and races, and report of the same. Canoeists and all interested in canoeing are requested to forward to FOREST AND STREAM their addresses, with logs of cruises, maps, and information concerning their local waters, drawings or descriptions of boats and fittings, and all items relating to the sport.

AMERICAN CANOE ASSOCIATION.

OFFICERS, 1887-88.

Commodore: H. C. ROGERS.....
Secretary-Treasurer: GEO. W. HATTON } Peterborough, Can.
Vice-Com. *Rear-Com.* *Purser.*
Central Div..W. R. Huntington. E. W. Masten.....T. H. Stryker, Rome, N. Y.
Atlantic Div. W. P. Stephens.....L. B. Palmer.....F. L. Dunnell, 186 Jerolemon St., Brooklyn.
Eastern Div..H. E. Rice, M. D....Maxton Holmes.....H. D. Marsh, Springfield, Mass.
N'thern Div..Robert Tyson.....S. S. Robinson.....Colin Fraser, Toronto.

Applications for membership must be made to division pursers, accompanied by the recommendation of an active member and the sum of $2.00 for entrance fee and dues for current year. Every member attending the general A. C. A. camp shall pay $1.00 for camp expenses. Application sent to the Sec'y-Treas. will be forwarded by him to the proper Division.

Persons residing in any Division and wishing to become members of the A. C. A., will be furnished with printed forms of application by addressing the Purser.

WESTERN CANOE ASSOCIATION.

Commodore—J. R. Bartlett, Fremont, Ohio.
Vice-Commodore—D. H. Crane, Chicago, Ill.
Rear-Commodore—C. J. Stedman, Cincinnati, Ohio,
Secretary-Treasurer—O. H. Root, Cleveland, Ohio.
Executive Committee—C. J. Bousfield, Bay City, Mich.; T. P. Gaddis, Dayton, O.; T. J. Kirkpatrick, Springfield, O.

FIXTURES.

MAY.

May 27 to June 1. Delaware River Meet, Delanco.
May 30 to June 2. Passaic River Cruise.

JUNE.

8. Ianthe. Spring, Newark.
15-17. Puritan, Annual Meet, Nantasket.
15. Brooklyn Annual.
16-17. South Boston, Local Meet, Petticks Island.
16. Puritan, Record Races, No. 2.
17. Puritan, Record Races, No. 3.
22. N. Y. C. C. Annual, Staten Island.
29. Corinthian Mosquito Fleet, Larchmont.

JULY.

4. Puritan, Record Races, No. 4.
10-22. Atlantic Division Meet.
13-29. W.C.A. Meet, Ballast I'd.
27. Yonkers, Annual, Yonkers.

AUGUST.

—. Pequot Meet, Thimble Islands.
7-23. A. C. A. Meet, Sugar Island, St. Lawrence River.

SEPTEMBER.

8. Puritan, Record Races, No. 5.
14. Ianthe, Annual, Newark.

PHILADELPHIA C. C. SPRING REGATTA.

THE spring regatta of the Philadelphia C. C. was held on May 18. The prizes consisted of ten handsome silk flags, made under the direction of and from designs furnished by the regatta committee, and in addition the silver trophy was awarded to the winner of the sailing race. This beautiful cup, designed and made by J. E. Caldwell & Co., was presented to the club last year, and under the terms of the gift is awarded once in each year to the member who wins the sailing race in which sail area and ballast are unlimited. The cup was won last year by J. Percival Warr, Jr., in the Water Witch.

The order of the races and the result are given below.

Tandem paddling race, with turn:

Muriel, J. A. Inglis and S. H. Kirkpatrick	1
Pappoose, W. S. Grant, Jr., and H. R. Wray	2
Water Witch, J. P. Warr, Jr., and Lightner Witmer	3

Single paddling race, with turn:

Antic, S. H. Kirkpatrick	1
Imp, J. A. Inglis	2
Water Nixy, H. R. Wray	3

Sailing race, course around Petty's Island (say 6 miles); wind light S.W.:

Pappoose, W. S. Grant, Jr	1
Antic, Lightner Witmer	2
Nourmoosha, S. H. Kirkpatrick	3
Muriel, J. A. Inglis	4
Water Witch, J. P. Warr, Jr	5
Midge, Russell G. Hubbard	6

Paddling upset race, with turn:

Muriel, J. A. Inglis	1
Nourmoosha, S. H. Kirkpatrick	2
Alys, W. S. Grant, Jr	3
Antic, W. J. Haines	4

Judges, W. J. Haines and Francis Thibault. 1490.

A PREHISTORIC CANOE.

A DISCOVERY of extreme archæological interest has been made upon the Barton section of the Manchester Ship Canal. While the excavators were at work in what is known as the "Salt Eye" cutting, the steam navvy brought to light a prehistoric canoe. It was imbedded in the sand about 25ft. below the surface. With some difficulty the canoe was removed to a shed in the vicinity of the engineer's office and examined. It was found to consist of a portion of an oak tree roughly hewn and fashioned. In length this relic of a long past age is 13ft. 8in. from end to end, with a width of 2ft. 6in. Notwithstanding the lapse of centuries the marks of the axe are distinctly visible in the interior of the canoe, the width of the blade of the implement used—whether of flint or iron—being apparently about 3in. Unfortunately the vessel sustained some damage in the ruthless grip of the "navvy," the bottom having been cut through at the bow end, while a portion of one side is broken in. But for this mishap the canoe would have been recovered practically intact. The bow is shaped so as to leave a projecting block, through which a hole is driven, evidently for the purpose of fastening it by means of a rope. At this point the grain of the wood indicates that the ancient workmen had cut through the heart of the tree, and that a portion had broken away. Another piece of wood appears to have been fitted into its place and fastened with two stout wooden pins. The piece itself is gone, but it is easy to pass the finger into the holes left by the pins. At the opposite end the canoe has been strengthened by the fixing to it of a species of gunwale, consisting of the naturally bent arm of a tree, also held in position with pegs or pins of wood.

It is impossible to fix the precise period of the canoe, but the circumstance that it bears no trace of a nail or any other ironwork may perhaps aid the formation of an opinion upon this point. The wood, particularly of the bottom, is for the most part quite sound. A portion of one side, however, which has apparently been at some period more exposed than the rest, has commenced to crack, and to prevent the spread of this process of decay, now that the relic has been brought into contact with the air, measures will at once be taken. The canoe rested in a bed of sand and leaves, among which hazelnuts were found. In the immediate vicinity several large trees have been discovered, leading to the conclusion that the bed of the canal is being cut through what was once a forest. The ultimate disposition of this interesting link with the remote past has not been decided upon; but it is hoped that it will be added to the archæologic treasures in the museum at Owens College, Manchester.—*Manchester, Eng., Guardian.*

PADDLING RACES AT THE MEET.—*Editor Forest and Stream:* It is a pity that the regatta committee have decided to have no special race for the paddling championship. We have had a sailing championship race now for several years; then why not have one for the paddlers, too? Last year it was thought that such a race ought to be in fair sailing canoes, and also subject to the one man one canoe rule. The result was as might have been expected. Two canoes, Narka and Maggie, were built specially for the race, and were only sailing canoes in name (Narka weighed 52lbs.). Even such a canoe as Eclipse, the best all-round boat ever built, did not think it worth while to enter. It would be absurd to call such a race as No. 8 this year a championship race. It reminds me forcibly of the menagerie race they have at military sports: one man may enter in a 16×28 canoe weighing 20lbs., with a single paddle, while the double men can enter in any kind of decked canoe from a Narka down. What is such a race as this going to prove? One might as well pit a running horse in a road wagon against a trotter in a sulky and call it a horse championship race. Why not have two fair out and out paddling races, one for the single, the other for the double paddle championship, both races excepted from the one man one canoe rule, which merely prevents a sailor from competing in paddling races because a fair sailing canoe cannot be built to compete against boats of the Narka class. I would suggest two races such as the following: I. Double paddle championship: any canoe 16×28, one mile, double paddle. II. Single paddle championship: any canoe 16×28, single paddles. 16×28 is merely suggested as the best size for paddling races and the most popular racing size in the past. If we had these two classes we would definitely know who our paddling champions were. It has been admitted for a long time that the double is faster than the single; then why make them compete against one another again? We would also not see the ridiculous sight of men putting light paddling canoes with all the necessary appliances for sailing at a large cost. The "one man, one canoe" rule is all well enough for the record and sailing races, but if applied to the races for the paddling championship it merely prevents sailors from competing for the paddling championship.—W. A. LEYS (Toronto, May 23).

A CANOE MEET AT BOSTON.—The first canoe meet in the vicinity of Boston will be held by the South Boston and Sagamore clubs at Pettick's Island, near Hull, in Boston Harbor, on June 15, 16 and 17, and an invitation is extended to all canoeists, club members or unattached, to be present. On June 16 a cruise will be made to the Weymouth River, and on June 17 the following races will be sailed under A. C. A. rules: Sailing, 3 miles, triangular course; sailing and paddling, half mile sides alternately, 3-mile course; sailing upset; paddling, Class 1; paddling, Class 2. Canoeists and clubs intending to be present are requested to send their names to John J. Martin, Sec. South Boston C. C., Box 1707, Boston, Mass.

IANTHE C. C.—The spring regatta of the Ianthe C. C. will be held on June 8, at Woodside, N. J., at 2:30 P. M. The programme includes 11 events, and the races, under A. C. A. rules, are open to all canoeists. The Ianthe C. C. is now in a very flourishing condition, with 25 active and 3 associate members.

NEW JERSEY ATHLETIC CLUB, CANOEING ANNEX.—The Canoeing Committee of the New Jersey Athletic Club, at Bergen Point, will hold an open regatta on July 6. Mr. W. H. Mitchell, Bergen Point, is chairman of the committee.

EASTERN DIVISION A. C. A.—A meet will be held on June 5-18 at Calla Shasta Grove, near Springfield.

Yachting.

FIXTURES.

MAY.

30. Yorkville, Opening, Oak Pt. Montreal.

29. St. Lawrence, Montreal.
30-July 1. St. Lawrence, Cruise, Montreal.

SPRING FASHIONS.

WE lately saw at a wharf in Boston a vessel of nearly 100ft. loadline that from a close inspection would not only be pronounced a yacht, but a handsome and well equipped yacht at that, something so far ahead of the schooners of the great schooner period, from 1865 to 1880, that no one would think of classing them. The model was a handsome one, clean lined and well proportioned from stem to taffrail, showing speed and power, and in no way betraying any relationship to the great coasting or coaster family, with modern clipper stem, fair sheer, and a counter long enough for the demands of beauty and not too long for real use at sea. The spars were tall sticks of clean bright Oregon pine, the iron work was light and well proportioned, the rigging was of steel wire throughout, and finished in the neatest style, while the blocks, of lignumvitæ and like woods, were the best that could be made, each with the name of the vessel on a metal plate. The deck fittings, such as cleats, bitts, cavels, etc., were all of neat design, nothing heavy and clumsy, but all the same time strong and evidently intended for use. Had such a craft ranged up alongside the fleet of schooners that raced for the America's Cup in 1870, or even half a dozen years later, she would have attracted general attention by her superior style and finish below and aloft. While yacht-like in form and finish, the deck arrangements bore evidence that she was intended for other purposes than mere pleasure, and as a matter of fact she was not a yacht, but only a fishing smack, one of the new Burgess craft that have lately done so much to improve the fishing craft of Gloucester and Boston.

When mere working craft, in which the question of dollars and cents must always take precedence, are fitted out in this manner, one would expect to find a proportionate improvement in the pleasure fleet, and a trip through the New York and Eastern yards will show that such is the case. The time when a small yacht could be built with only a broad axe and a maul, and fitted out from any longshore ship chandlery; when a square balk of timber was made into a bowsprit by chamfering off the edges, and then fastened by a big bolt into the stem head, and when a bit of rough scantling was spiked down and planed off to form a rail, has passed away forever; and to-day nothing is too costly and elaborate for the wants of the yachtsman. Among the many new devices there may be some which savor of over refinement or finish, but without discussing the special merits of each we propose to run over the list of fads or foibles which are at present agitating the minds of many owners of prospective "hull-downers" this season.

While the models of the new craft are based mainly on sound practice and accepted theories, at the same time fashion is an important factor, and never so much as now. The decree has gone forth that clipper stems and correspondingly long counters are the proper thing, and they will be worn by all yachts which aspire to be rated among the leaders of the *ton*. No one would think to-day of being seen in good society in a plumb-stemmed boat, unless she were built at least two years since. How much real good there is in these long ends remains to be seen; there is gain in deck room and also in structural details, but as far as model goes the advantages are likely to be overrated. The absurd claims now made that a 70ft. can be designed so as to sail at a length of 80ft. or more must be laid either to ignorance or dishonesty, as the result of the races at home will show. No one supposes that her long overhang alone will enable Katrina to beat Titania, or that the longest of the new forties has a certainty of winning on that account. The contrary is proven by the races of last year, in which, to say nothing of Xara, little Pappoose, with a plumb stem and 3ft. less length than the newer boats, held her own very creditably. The advantage on the score of appearance is obvious; in fact, with the huge sail plans now in vogue, 90ft. from bowsprit end to boom end, compared with 40ft. waterline, the length on deck is a necessity. The most extreme craft in this respect are the two Gardner boats, Liris and Kathleen, in both the ends being the longest yet seen. The fore overhang of Liris is 7ft. and the after overhang nearly 12ft., making an over all length of 59ft. The rest of the class, Chispa, Maraquita, Tomahawk, Helen and Gorilla, run from 54 to 56ft. The excess is made by carrying both ends out to a fine point, far beyond the length where any gain may be had in sailing; but the only disadvantage is a little weight in the ends, and this is reduced by a very light but well braced stern of hackmatack and spruce, the length forward being only in the form of a white pine figurehead.

Another point in the sheer plan in which fashion holds sway is the outline below water, the whole fleet shows the influence of Thistle in the absence or any indication of forefoot. The rake of sternpost is much less than in that notable craft, being perhaps nearer to 25 degrees than 45 in most cases, but the depth is held well aft, near the heel of the post, in all cases; the keel then rising sharply to the loadline at the stem, with very little or no indication of a forefoot. In most cases the keel preserves a fair sweep from the sternpost up into the stem and so on to the trail board, but in both of the Gardner boats this line is broken by an elbow or angle just below the water. It is not apparent, however, that any special benefit is derived from this form, as the lateral plane is much the same, in area and outline, as in boats like Chispa, where the angle is rounded into a curve.

If there is one point more than another in which fashion has greatly changed, it is that of draft. It is not so many years since men were wont to boast of the few inches that their yachts drew, and three or four feet was considered enough for almost any length. As the crinoline and bustle have given way to the trimly rigged figure of the tailor-made girl, so the sterner sex has carried its vagaries from one extreme to the other, and where men at one time could not get head room sufficient to stand erect on a cruising yacht, even with a huge herreshoff deck, they are not content now with anything less than flush decks, high ceilings in the cabin, and a basement and cellar underneath. We have preached the advantages of depth and draft longer than any one else, but when a draft of nearly 11ft. on 40 is reached it is time to call a halt. Nine feet is a good deal to carry in the waters where most of our yachting is done, but it is necessary to the success of a keel boat, as well for speed as for suitable accommodation, and its disadvantages can be borne with at times for the sake of a staunch, roomy and safe little ship that can do any sort of coasting work in safety. More draft than this, however, is likely not only to prove of little benefit, but to bring its own penalty in the shape of increased difficulty in navigation. However, it will be well tried this year, and the laps by the end of the season the owners of even the more moderate boats, like Chispa, Maraquita and Liris, may be able to furnish valuable notes on the obstacles to navigation in Long Island Sound, while Messrs. Morgan and Prince will no perfect sailing encyclopedias of nautical information up to 11ft. of draft.

Whatever their draft, whether 7 or 10ft., the new boats are much alike in midship section. While the beam varies from 12 to 14ft., the favorite figure being about 13ft. 6in., the sections all show the same high bilge, hollow floor, and the absence of any visible rabbet or junction of keel and hull proper. In some cases the deep keel is chopped off to make a centerboard boat, as in Verena and Gorilla, but at the same time all of the new craft show a strong leaning toward one type, the wineglass section, with wide, full body and high bilge and very deep in.

This year is a notable one in the matter of construction, as in addition to the great improvements made in this direction in wooden craft of the usual build, two methods have been tried for the first time in small craft, the steel and the composite. The improvement made is simply wonderful, the amount of material has been reduced, its quality improved, a very much better distribution of the various parts of the frame has been introduced, while the methods of fastening would surprise any of the old builders. The finish throughout is far better, especially in the fittings about the deck, including rail and hatches. The origin of much of this change may be traced directly to the imported cutters, and the same may be said of the many changes in iron work and rigging. The new Burgess boats, of which Lawley has turned out so many, are very good specimens of the regular wooden construction, vastly better than the old craft, as they are strong rather than light, from a racing standpoint, but are all the best and serviceable craft. The best specimen of the wooden boat we have yet seen is the new Gorilla, designed and planned by Mr. A. Cary Smith, and built at Poillon's yard, under the direction of Mr. John Driscoll. She is a single-skin boat, with wooden frames, and by no means an expensive craft, but the material has been carefully selected, the parts are well arranged, and all details very carefully planned. See promises to be very light, and at the same time strong and handsome in appearance. The two Gardner craft at Ayer's yard, Bay Ridge, can hardly be compared with the other new boats, as their construction is very different, especially in the case of the larger. The smaller, Kathleen, described last week, is a single-skin boat, but the deck is double. Her construction has been specially planned with a view to lightness, and her trim shows that it has been done successfully, but at the same time she is a costly boat, with a large amount of lead, and copper fastening. The 40-footer, Liris, is the most elaborate piece of yacht work yet attempted here, and the planning and execution do credit both to the designer and builder. The frames are of angle steel and steamed oak, while the bottom and deck are both double, the former with an inner skin of cedar and an outer one of mahogany, the latter all of white pine. The two skins are thoroughly fastened with screw bolts of yellow metal through the frames and copper rivets elsewhere. The workmanship is as fine and neat as on a canoe or sheli boat, every part being perfectly fitted. Of course such work is very costly, but whether it pays or not cannot be known until the boat has been well tried beside her fellows, both as to speed, strength and durability. The composite build is not entirely new here; the Herreshoffs have used it successfully for some years in steam craft, nor is the double skin a novelty; life-boats and navy launches have been built for a long time; Mr. John Harvey has designed several very fine double-skin craft which Piepgrass built, and now and then a sailing yacht, as the Smith schooner Harbinger, has a double skin. At the same time the Liris is the first light racing craft of composite build and with double skin that has yet been built in America, and her success or failure will be a matter of more than ordinary interest.

Though steel has become a common material for large yachts, it is only this season that it has been tried on small craft in the two boat Piepgrass has turned out, Montecito and Tomahawk. In the case of the former, a cruising craft 53ft. long, it is likely to prove successful, but with the 40 it is yet an experiment. How she will compare with the ordinary construction in respect to weight, strength, durability and speed remains to be seen, but it is certain that, while there is a gain in room over the wooden craft, she is a very expensive boat. It goes without saying that Mr. Piepgrass has done excellent work on both, and the little fellow especially, the more difficult job of the two, is finished like a piece of jewelry.

The stroller about the yards will notice various steaming pots of a black substance, with a not unpleasant odor. This is the English marine glue, used everywhere this season for paying decks. No yachtsman with any regard for the proprieties would think of having anything else to walk on. One point is worthy of notice in looking over the interiors of all the yachts of the last two or three years, the cretonnes, plushes, hangings and incrustrawalton that were once considered a mark of taste on even the smaller boats, have disappeared, giving place to plain finish in light woods, pine, cherry, and a little mahogany. This change is a good one on the score of weight, cleanliness and general comfort, and may be credited in a great part to the cutters, in which a plain, serviceable finish is the rule. Some of the new craft, notably Chiquita and Nymph, are very handsomely fitted out below, but gaudy fittings and superfluous upholstery have given place to better things. Chispa and Baboon are very plainly fitted, Tomahawk has a neat and handsome cabin of cherry, Kathleen is finished very comfortably and cosily in California redwood, Liris will have the lightest of mahogany joiner work below, but of very neat design, Montecito is finished in very good taste, pine and mahogany moulding and a light tint on the panels, with white deck. Of course the large craft, Constellation and Merlin, will come in for more elaborate fittings and furnishings, but the prevailing styles, for large as well as small craft, are based on good taste rather than mere showy effects.

If fashion reigns beneath the water and below decks she will be none the less omnipotent aloft, and some of her latest vagaries would startle the ghost of any old-time skipper who should wander around a crowded anchorage. Not only would he find Oregon pine everywhere, but hollow at that. No racing owner with any regard for the finer feelings of his skipper and crew would ask them to go shipmates with a solid mast or bowsprit. In every spar yard of New York and Boston one is reminded of Bunthorne's lament, "Hollow, hollow, hollow," as the whip saw or band saw cuts its way from end to end of clean bright sticks of spruce and Oregon pine, and the adze and gouge are kept busily at work scooping out the centers of the divided sticks. There are various methods of making a hollow spar, but perhaps the most fashionable just now is the "cheese sandwich" plan. The spar is roughed out from end to end, leaving it in two halves, and the heart or core is then cut out with adze and gouge. The size of the hollow depends on the diameter of the spar, Titania's new boom, of Oregon pine, is 14in. in diameter at the slings, and the hollow in the center is 8in., leaving 3in. walls. For the first 4ft. next the mast it is solid, to take the jaws of the gooseneck, and it is also solid at the slings. Other solid spots, termed bulkheads, are generally left at intervals of 5 or 6ft. After a spar is hollowed the two halves are united by a cement made by mixing lime with pot cheese, which mixture hardening very rapidly into an insoluble mass. The gist of it is to bring every part of the opposite surfaces into contact as soon as the cement is laid on, a difficult matter with a mast or boom of 50ft or more. If this is not done the union is not perfect, and the owner will be able to sympathize with one unhappy yachtsman who could not sleep at night because, though his boat was all that a boat should be in every other respect, the builder had not put enough cheese in his sandwich and there were open places in the joints of the mast. Bolts are sometimes used to reinforce the cement, but if the joint is properly made this should not be necessary. Mr. Piepgrass made a "cheese sandwich" bowsprit for Cinderella in 1887, and so far it has stood perfectly. Liris and Kathleen will have all their spars, mast, bowsprit and spinaker boom included, made in this way. In some cases, as in Chispa, the spars are hollow and merely bolted together without cement. Many yachts will this year use the Mansfield spars, especially for topmasts, top-sail yards and spinaker booms. The spar is first sawn and hollowed, then glued together with a special glue, after which it is wrapped with two spiral layers of strong burlaps, one wound right hand and the other left, laid in glue. Over these two layers of specially made manilla paper are glued, making a strong light spar. Of the many new fads in rigging the latest is flexible steel wire rope, which is used for quarter lifts, jib haniards and outhauls, heel rope for topmast and similar gear. Chispa is fitted with an elaborate arrangement of jibstay, it being set flying by means of flexible wire halliards. The intention is to use the jib on the movable stay in cruising, but to set it flying in racing.

There is no detail of the modern yacht which has received more attention, or been brought to greater perfection, than the blocks. Year by year since the first outfit was made for Puritan the size and weight have been reduced, the strength has been increased by the introduction of better metal for pins and sheaves, the power has been increased by improved bearings, while an infinite number of new attachments and fittings have been introduced. Each block of the entire outfit is now specially made for its particular duty, the shape and proportion are matters of careful study, costly woods and elaborate nickel plate are used to improve the appearance, and the modern yacht block is a work of art that will bear the closest inspection.

Rumor says that, following the fashion set by Boston last year, spinaker booms will be worn very long and cut with an extension joint, by which they may be shut up like a jack knife when not needed. Grayling already has one, and other craft among the seventies will be fitted with them. Headyards will also be worn on spinakers this year, and one club, the Seawanhaka, has already taken steps to restrain a probable extreme in this respect by limiting the length to 1-20 of the loadline. What we could tell of surprises in the way of sails and new fads of all sorts in gear and riggings, of silk sails, of huge spinakers with gaffs, like the old "snadow" sails that preceded the modern spinaker, and of similar devices, would make a most interesting chapter, but we do not dare to reveal such deep secrets, the penalty would be too great, and our readers must wait a few weeks more, by that time there will be plenty of surprises, some of them on the part of the owners of various canny devices, as well as the spectators.

SEAWANHAKA CORINTHIAN Y. C., JUNE 15-17.

THE two days racing of the Seawanhaka C. Y. C., on June 15 and 17, promises to be the most important of the spring regattas, as special inducements are offered to the 40-footers, which will be sailed on the first day by Corinthian crews and on the second by their regular paid crews. The full programme is as follows:

First Day, Saturday, 19th Annual Corinthian Race,—Open to yachts of the Atlantic, Beverly, Corinthian of Marblehead, Corinthian of New York, Dorchester, Eastern, Knickerbocker, Larchmont, New Bedford, New Haven, New Rochelle, New York and Oyster Bay yacht clubs, to be governed by the racing rules and time allowances and under the direction of the race committee of the Seawanhaka Corinthian Y. C.

CLASSIFICATION AND VALUE OF PRIZES.

Schooners.—90ft. class.—All over 75ft. and not over 90ft. l.w.l., $175. 75ft. class—All over 63ft. and not over 75ft. l.w.l., $100. 63ft. class.—All of 63ft. l.w.l. and under, $75.

Sloops, Cutters and Yawls.—70ft. class.—All over 61ft. and not over 70ft. l.w.l., $150; if four start, $200. 61ft. class.—All over 53ft. and not over 61ft. l.w.l., $100. 53ft. class.—All over 46ft. and not over 53ft. l.w.l., $100. 46ft. class.—All over 40ft. and not over 46ft. l.w.l., $100. 40ft. class.—All over 35ft. and not over 40ft. l.w.l., $100; second prize, if six start, $50. 35ft. class.—All over 30ft. and not over 35ft. l.w.l., $50. 30ft. class.—All of 30ft. l.w.l. and under, $50. Any yacht which shall have been launched prior to June 1, 1888, exceeding the higher limit in any class by not over the fraction of a foot, will be included in that class. In case of a walkover in any class, the value of the prize will be reduced one-half. Personal prizes will be given to the members of the winning Corinthian crews.

Special Prizes.—The Leland Corinthian Challenge Cup, open for competition to members of the Seawanhaka Corinthian Y. C. only, for this season is put up for contest in the 40ft. class. The following special conditions attaching to the said cup accompany this programme:

Sec. 1. The contests for the possession of this cup shall be open to members of the Seawanhaka Corinthian Y. C. only, and shall be confined to yachts in the 53ft., 43ft., 40ft., 35ft. and 30ft. classes of sloops, cutters and yawls.

Sec. 2. All contests shall be governed by the racing rules and time allowances, and shall be under the direction and control of the race committee of the Seawanhaka Corinthian Y. C.

Sec. 3. The race committee shall announce at the beginning of each season the class to which contests shall be confined during that season, and the first contest in each season shall take place in the annual Corinthian race in June.

Sec. 4. The race committee shall have power to name the course to be sailed over in every contest subsequent to the first one in each season, and all such subsequent courses shall be of the same length as the club course for the class, but the holder and challenger may mutually agree upon any course of not less than the stated length, subject to the approval of a flag officer or any two members of the race committee.

Sec. 5. If a contest is arranged to take place away from the waters of New York during the club squadron cruise, the flag officer in command shall, in the absence of any members of the race committee, appoint one or more judges to conduct the contest.

Sec. 6. The holder of the cup shall be subject to challenge during the season ending October 15 in each year by any yacht in the same class, and not more than ten day's notice of challenge shall be required by the holder.

Sec. 7. The challenger shall give due notice to the chairman of the race committee of the day agreed upon for the contest.

Sec. 8. The winner of three successive contests in the same season shall have the privilege of declining any further challenge during the remainder of that season.

Sec. 9. A prize, recording the names of the competitors, will be given by the club to the winner in each contest.

Sec. 10. The holder of the cup at the end of each season shall retain possession until the opening of the following season, when the cup shall be returned to the club through the chairman of the race committee, and the holder shall be responsible for the safe keeping of the cup while it remains in his possession.

Sec. 11. The trustees of the club shall have power to modify the special conditions attaching to the cup, excepting between May 15 and October 15 of each year.

A prize of the value of $100 is offered by Wm. Whitlock, Esq., in the 30ft. class, on condition that three yachts start and that the start be from "One Gun." In consequence, the yachts in this class will receive no time at the start for this prize, but will be timed in the usual way for the club prize. A prize of the value of $50 is offered by Vice-Commodore Robert Center, to the helmsman of the schooner, sloop or cutter, irrespective of class, making the best corrected time over the Sandy Hook Lightship course

schooners to receive their allowance for rig. Entries must be made in writing, and filed with the chairman of the race committee, J. Beavor-Webb, Esq., 45 Broadway, N. Y., by 12 o'clock noon on June 15, accompanied by the the S. C. Y. C. measurement of the yacht, certified to by her owner or by the measurer of the club from which she is entered, together with a list of the proposed Corinthian members of the crew, their several occupations and addresses. Blank forms of entry, with the club rules for measurement, will be furnished on application to the secretary. A register of Corinthians is kept at the club house. Yacht owners may complete their Corinthian crews by applying to J. F. Tams, Esq., 48 Exchange Place, or T. C. Zerega, Esq., at the club house, 7 East Thirty-second street, of the committee on Corinthian crews. All protests must be made in writing, and filed with the chairman of the race committee, before 6 o'clock P. M., on the second day of the race. The owner of each winning yacht must deposit with the secretary of this club her lines accurately taken off and drawn upon paper by the measurer of this club, or approved by him and their correctness duly certified. This drawing will remain the property of the club. Prizes cannot be delivered until this rule is complied with. No copies of these lines will be allowed without the written permission of the owner of the yacht. Each yacht must be steered by a member of this club or by some other amateur. Crews must be composed of amateurs except as hereinafter provided: In all classes and without exception, sailing masters, if carried, must remain below and must not direct or assist in any way in the management or working of the yacht. The term "crew" in the following paragraphs includes all others on board except that stewards and cooks, if they take no part in handling the yacht, will not be counted as members of the crew. There are no restrictions whatever as to number or nature of crew in the 90ft. class of schooners and the 70ft. class of sloops, cutters and yawls. In the 75 and 63ft. classes of schooners, and in the 61ft. class of sloops, cutters and yawls there are no restrictions as to total number of crew, but the professionals must be limited to one man for each 9ft. or fraction thereof of l.w.l. In the 53, 46, 40, 35 and 30ft. classes of sloops, cutters and yawls, crews must be limited to one man for each 4ft. of l.w.l. or fraction thereof. The helmsman is not included in this number. Two of the crew in the 53ft. class, and one in the 46, 40, 35 and 30ft. classes may be professionals. Each yacht must have on board, during the race, a member of this club, or of the club from which she is entered. Before the owner of a winning yacht can receive any prize, he, or in his absence, the club member representing him on the yacht, must sign a declaration, stating that all the racing rules were complied with during the race. There are no restrictions as to sails, except that in the 75 and 63ft. classes of schooners, and in the 61, 53, 46 and 40ft. classes of sloops, cutters and yawls, topsails which extend above the truck or beyond the gaff end shall not be carried. No club or head yard on spinaker shall exceed in length 1 20.h of the l.w.l. of the yacht, and no foot yard or club shall be carried. In the 90 t. class of schooners a serviceable round-bottomed boat with oars and thole pins or rowlocks lashed in, measuring at least 14ft. in length, must be carried. In the 75 and 63ft. class s of schooners and the 70 and 61ft. classes of sloops, cutters and yawls, a boat at least 12ft. in length, and in the 53ft. class of sloops, cutters and yawls a boat at least 10ft. in length must be carried. Each yacht must carry on deck two serviceable life-buoys ready for immediate use. Each yacht must fly her owner's private signal at the main peak, and must be distinguished by a number, to be securely fastened on both sides of the mains il about the middle of the sail and above the reef points. Numbers will be sent by mail to the owners of yachts entered, or may be had on application to the chairman of the race committee. These numbers must be returned by mail to the club house, 7 East Thirty-second street, after the race. A flying start will be made as near 11 o'clock A. M. as practicable, and the time of each yacht will be taken as she passes between the committee steamer and Buoy 18, off Bay Ridge in the Upper Bay. Signals will be given from the committee steamer as follows: 1st. Preparatory. First whistle (long blast). The club signal will be lowered on the steamer. (There will be an interval of five minutes between the first and second whistles.) 2d. Start for all classes of schooners and for the 70ft. class of sloops, cutters and yawls. Second whistle (long blast). A white ball will be hoisted on the steamer. (There will be an interval of five minutes between the second and third whistle.) 3d. Start for all other classes. Third whistle (long blast). A red ball will be hoisted under the white ball on the steamer. Any yacht failing to cross the line within five minutes after the starting signal for her class, will be timed as if she had passed at the expiration of that time. A short blast of the whistle will be given, if possible, as the time of each yacht is taken. In the 30ft. class the time of each yacht as she crosses the line will be taken, and the five minutes limit will be allowed in starting for the club prize, but not for the special prize of $100, the start for which will be a "one-gun start" (namely, from the starting whistle for the class).

Courses.—For all classes of schooners, and for the 70, 61, and 53ft. classes of sloops, cutters and yawls, from an imaginary line between the committee steamer and buoy 18, to buoy 10 on the S.W. Spit, keeping it on the port hand; thence to and around buoy 8½, keeping it on the port hand; thence to and around Sandy Hook Lightship, keeping it on the starboard hand, and return over the same course to buoy 15, keeping to the eastward of buoys 9, 11, 13 and 15, on the West Bank, and outside of buoy 5 on the point of Sandy Hook, going and returning. For the 46 and 40ft. classes of sloops, cutters and yawls, from the same starting line to buoy 10, on the S.W. Spit, keeping it on the port hand; thence to and around buoy 8½, keeping it on the port hand; thence to and around the Scotland Lightship, keeping it on the starboard hand, and return over the same course to buoy 15, keeping to the eastward of buoys 9, 11, 13 and 15, on the West Bank, and outside of buoy 5 on the point of Sandy Hook, going and returning. For the 35 and 40ft. classes of sloops, cutters and yawls, from the same starting line to buoy 10, on the S.W. Spit, keeping it on the port hand; thence to and around buoy 8½, keeping it on the port hand; thence to and around buoy 5 on the point of Sandy Hook, keeping it on the starboard hand, and return over the same course to buoy 15, keeping to the eastward of buoys 9, 11, 13 and 15 on the West Bank, going and returning.

The finish must be made across an imaginary line between the committee steamer, a station boat, and buoy 15. A station boat, with a competent person on board, will be anchored to the eastward of buoy 15, to take the time of each yacht at the finish, in the absense of the committee steamer.

Second day, Monday, special race for the 40ft., 35ft. and 30ft. classes of sloops, cutters and yawls. The race will be open to the same clubs and will be governed by the same racing rules, time allowances and special regulations specified for the first day's race, with the following exceptions: Full professional crews may be carried and no restriction is placed on their number, but the helmsman must be an amateur, as provided in the rule for the first day's race. Sailing masters may be carried as mates. Club topsails may be carried.

Classification and value of prizes: 40ft. Class: All over 35ft. and not over 40ft. l.w.l., $100; if five start, $150; if seven start, $200; if nine start, $250. Second prize if seven start, $75. 35ft. Class: All over 30ft. and not over 35ft. l.w.l., $75. 30ft. Class: All under 30ft. l.w.l. $75; if five start, $100. In case of a walk-over in any class no prize will be given in that class.

A flying start will be made as near 11 o'clock A. M. as practicable, and the time of each yacht will be taken as she passes between the committee steamer and buoy 18, off Bay Ridge, in the Upper Bay. Signals will be given from the committee steamer as follows: First. Preparatory. First whistle (long blast), the club signal will be lowered on the steamer. (There will be an interval of five minutes between the first and second whistles.) Second. Start for the 40ft. class. Second whistle (long blast), a white ball will be hoisted on the steamer. (There will be an interval of five minutes between the second and third whistles.) Third. Start for the 35 and 30ft. classes. Third whistle (long blast), a red ball will be hoisted under the white ball on the steamer. Any yacht failing to cross the line within five minutes after the starting signal for her class, will be timed as if she crossed at the expiration of that time. A short blast of the whistle will be given, if possible, as the time of each yacht is taken. The courses will be the same as for the first day's race, namely, Scotland Lightship course for the 40ft. class, and buoy 5 on Point of Sandy Hook for the 35 and 30ft. classes.

The race committee consists of J. Beavor-Webb, Chairman, 45 Broadway, N. Y.; Francis D. de Luze, M. Morris Howland, Jules A. Montant and George P. Upham, Jr.

LORD DUNRAVEN'S CHALLENGE.

NO answer has yet been sent to the letters received by the New York Y. C. on May 18, nor has anything further been heard from the Royal Yacht Squadron in regard to its objections. The sub-committee of the plan and scope committee has drawn up a reply, which will be made public shortly.

CORINTHIAN MOSQUITO FLEET.—Proposals for membership by G. G. Clapham: Harold Goodwin and Geo. Eastman, Brooklyn, L. I. By D. F. M. Wilson: C. M. Foster, Bridgeport, Conn.

THE NEW YORK Y. C. AND THE Y. R. A. RULES.

THOUGH at most it is probably but a matter of seconds, Lord Dunraven's proposal that a mean of the allowances of the New York Y. C. and the Y. R. A. be taken to govern the races with Valkyrie has given rise to a great deal of intricate figuring, in one case at least with an amusing result. One zealous volunteer who started out to defend the New York Y. C. by proving that such a proposition was actually to Lord Dunraven's disadvantage, and that the club acted most generously in declining it, has fallen outside the breastworks, where he now lies buried under the rules and allowance tables of the two parties.

Lord Dunraven's suggestion, as generally understood here, was the same as that previously made by Mr. Webb in the case of Genesta, that the allowance in minutes and seconds be computed separately by the New York and the Y. R. A. rules, and that an average of the two results be taken; thus if one allows the other say 3min. by New York rule and 5min. by Y. R. A. rule, the mean of the two allowances, or 4min. be adopted. The proposition is a very fair one, and certainly is simple enough, but the ambitious expounder alluded to above is not satisfied to accept it, but interprets it to mean that instead of the final results being taken the two rules themselves are to be combined in one incomprehensible formula. He then goes into some absurd calculations in which Valkyrie is compared with an imaginary Katrina, with the result that the latter would allow the former some 3min. more under the New York than under the Y. R. A. rule, which assumptions and calculations are entirely false and erroneous, as was shown by the *Field* of May 11. The attempt to answer the *Field*'s criticism is a most laughable failure, and results in an astonishing display of ignorance. The rating of Volunteer by the Y. R. A. rule, 146 approximately, is taken; and an attempt is made to calculate her time by applying the New York table of allowances to a rating rule, in absolute innocence of the fact that yacht's length in feet is a different quantity from the imaginary unit of rating. This is frustrated, however, by the discovery that while the rating is 146, the New York table only goes to 130ft.

The following table will show very closely the comparison of several representative yachts under the New York and Y. R. A. rules. The figures marked * are not official, but carefully estimated; the others are official. Volunteer has never been measured by Y. R. A. rules, but Thistle has been officially measured by both New York and Y. R. A. rule. Some time since, in connection with her designer, we measured Katrina's sail plan very carefully according to the Y. R. A. rule, making it 7,205sq. ft., or 210 t. greater than by the New York rule, so that her actual rating would be 83.21. Valkyrie's rating is 78; the measurements are not yet known, but her length cannot exceed 70ft., which gives 6,689ft. by Y. R. A. rule, or 200ft. less by New York rule, dependent somewhat upon the proportions of the sail plans. This disposes of the fiction that she is larger than, or even as large as, Katrina.

COMPARISON OF NEW YORK Y. C. AND Y. R. A. RULES.

*Figures marked thus are not official. Allowances for 40-knot course.

Yarana.....	66.08	*5300	5148	*63.32	60.00	16 47	17 16	17 01

Katrina allows Valkyrie 9sec. by N. Y. rule, 1m. 20sec. by Y. R. A.; average 45sec. Volunteer allows Valkyrie 11m. 43sec. by N. Y. rule, 11m. 47sec. by Y. R. A.; average 11m. 45sec.

Lord Dunraven's proposal, if carried out in a match between Katrina and Valkyrie, would benefit the latter to the extent of 44s. The full official measurements of Valkyrie in addition to her rating will soon be known, when an exact calculation can be made.

The proposal to use a mean of two systems of time allowance in Cup races is a far better solution of the vexed question of time allowance than the adoption of a length rule, as provided by the last deed of gift. Every change in the methods of measurement of late years has tended to bring the large clubs of America and England more closely together, and as shown in the above table the differences now are reduced to a matter of seconds. The probabilities are that in the future they will coincide still more closely. It will hardly be possible to-day for a club winning the America's Cup to change its rules so as to favor the retention of it; for instance, for the Y. R. A. to abandon its present rule and resurrect the dead tonnage rule for the purpose of keeping out wide yachts. The present rule must stand as it is until 1891 at least, unless changed by a two-thirds majority, and if it were changed in such a manner it would shut out Yarana and Valkyrie, as well as Volunteer and Katrina.

GORILLA.

WHILE the keel will be well represented in the 40ft. class by such new boats as Chispa, Liris, Tomahawk and Maraquita, to say nothing of the older craft, the centerboard-keel branch of the family will, though smaller in numbers, be represented by three very fine new craft, to aid Chiquita, Banshee and Nymph to wrest the honors from the keels pure and simple. Two of these were designed by Mr. Burgess, Verena for Mr. Beebe, of Boston, and one unnamed tor Mr. Hasbrouck, of Providence, and the third was designed by Mr. A. Cary Smith for Mr. Royal Phelps Carroll, of New York. The Gorilla, as the latter boat is named, was launched from Poillon's yard, South Brooklyn, on May 25, and will shortly be in commission, though hardly in good shape for the early races; she enjoys the distinction of being the first flush-deck centerboard boat in the 40ft. class. Two years since Mr. Smith designed the Banshee, a cruising boat of 40ft. l.w.l., a present from a New York gentleman to his two young sons.

The new 40ft. class was not then dreamed of, and Banshee was designed and built without any thought of racing; but when, in the same season, the new Pappoose began to attract attention, Banshee's owner became inoculated with the racing fever and was seized with a desire to try conclusions with the new and successful keel. To this end the sail and spar plans were enlarged, more lead added to the keel, and last year the Banshee entered the lists as a racer. By this time the 40ft. class had grown to a fair size, with such boats as Baboon, Xara, Chiquita and Nymph, all built for racing. Banshee made a very good showing in the rather inconclusive races that were sailed, sufficiently so to encourage her designer to stick to the same general type, which he has done in the new 40 that will represent him, in company with Banshee, in the season's races. It may say in passing that Banshee, with some improvements, including more lead on her keel, made last winter, will be in the races this year, being handled by Mr. Bryan Alley and some others of the old Oriva's crew.

In dimensions and general form the new boat does not differ greatly from Banshee, except in the possession of a clipper stem, but as in this case speed was the main consideration, the model has been carefully revised, while great attention has been given to the construction in order to save weight. Her leading dimensions are: Length over all 54ft., l.w.l. 39ft. 9in., beam 14ft. 3in., draft 7ft., with 11 tons of lead in keel. The sacer pian shows a clipper stem of medium length and a shapely but by no means extravagant overhang aft, with a modern sheer, rather straight, especially forward. The sternpost rakes about 30°, the keel rounding up a very little aft, with its greatest draft a couple of feet forward of the heel of post. The forefoot is rather more marked than in other of the new boats, while there is more depth just under the mast, the keel not rising quite so quickly from its deepest point to the waterline at bow as in some of the others. The midship section has a light bilge and great hollow in the floor, the depth being greater than in the Burgess boats of the same type. The wood keel is 2ft. wide on bottom, and the lead keel, about 18in. deep, is 15in. wide on bottom and well strung out fore and aft.

The hull is of wood throughout, single skin and deck, built in the ordinary manner, but the details are so far superior to this class of work about new York that they deserve careful notice, especially in view of the fact that the cost of the boat has been kept within moderate limits. The keel is of oak, sided 26in. and moulded 10in., with a 4in. slot for the board. The stem is sided 1½-in. and the sternpost 6in. at tuck, tapering to heel. The frames are in part double sawn and part bent, the former, with the 8 single sawn frames in bow and all the frames from the transom aft, being of hackmatack, the latter of oak. The sawn timbers are sided 2 in. and moulded 2½ at heel and 2in. at heads, each pair bolted together with ⅝in. galvanized screw bolts, the spacing being 4ft. Between each pair of double frames are 3 single bent timbers, each sided 2in. and moulded 2½ to 2in., the spacing being 12in. The floor knees are also of hackmatack, sided 2½in., two to each sawn frame, one to port and one to starboard; no iron floors being used.

This method was used with success by Mr. Smith in the cutters Wilful and Rajah and the schooner Carlotta. The clamp is 5½×1⅝, tapering at the ends, with the shelf, 3¼×2in., set inside of it, with copper bolts through both and the wales. There are three bilge clamps—one on the flat of the floor, one above at the turn of the bilge, and one below along the hollow of the floor over the heads of the knees, each 6×1⅛in. All the fore and aft stringers, clamps, shelves and bilge clamps are of clear selected yellow pine in single lengths, tapered at the ends, and through-fastened on every frame. The deck frame is of hackmatack, beams sided 3in., moulded 2½in. and spaced 24in. The partner pieces are of hackmatack, 20in. wide, with 13in. hole for mast, the beams between which they are fitted being moulded 4in. and sided 3in. An iron hanging knee, 2¼×9½in., is bolted to each beam, four knees in all, with a similar knee aft under the runner plate on each side. The partners are further reinforced by hackmatack knees, sided 2½in., worked under the deck, four in all.

The centerboard trunk is of 2in. white pine, with oak bedpieces and headledges, the latter 3×5in.; and the top of the trunk is 4ft. above the floor. The board is 2½in. thick and 13ft. 4in. long on lower edge. The arrangement of the butts is peculiar; there are two sets, one well forward to take the heel of the bowsprit when run out, and the other, 5ft. 3in. further aft, carrying the windlass and also taking the bowsprit when reefed, thus doing away with a fid hole near the gammon iron. Each pair of butts is made of two oak knees sided 3in., the lower arm of the knee resting on two deck beams, while the upper or vertical arm forms the butts proper. The upper arm also extends downward below deck, where it is bolted to a 4×6 carlin or to the deck beam. Under the forward butts a pair of hanging knees are worked, strengthening the entire overhang of the bow. The chock, quarter timbers and archboard are all of white pine, for the sake of lightness, while the deadwood about the stem is well trimmed away, the planking being carried out to the gammon iron. The planking is of a very good quality of yellow pine, with very few butts, the garboards being of oak, the planksheer is of white pine 1½ 4½, and the deck of white pine 1½×2in., fastened with galvanized screws and paid with marine glue. The rail is worked solid, of white pine, 4in. high at stem and 2½in. aft, with a piece of oak set in on each side for the jib sheets to lead through. The chainplates are bolted outside the plank, being set in flush, with no channels. There are two plates with lugs for the bowsprit shrouds on each side, one being used when the horn is run out, and the other, about 5ft. further aft, when it is housed, the turnbuckle on the shroud being shifted. As in all the modern boats, the bowsprit is rigged to take one reef in bad weather, the bowsprit shroud and bobstay tackles being replaced by a bar bobstay and turnbuckles.

The presence of a centerboard trunk above the floor interferes somewhat with the room below, but the cabin plan, though inferior to Chiquita's and some of the new keel boats, gives very fine accommodations for the length. The forecastle is 14ft. long from the hanging knees under the bitts to the after bulkhead, with 5ft. 10in headroom for the whole length. The next 3ft. is taken up with a toilet room to starboard and an icebox to port, the latter opening on the passage beside the trunk. Abaft these is the owner's room on the starboard side and a stateroom to port, the length of each being 6ft. 8in. The main cabin is aft, 9ft. 3in. long, with a wide sofa locker on each side, back of which is a permanent berth, thus sleeping four in the cabin and two in the staterooms. The headroom is 5ft. 10½in. The finish is of white pine, as light as possible but of neat design. The berths in the staterooms are large, the space back of each being divided into six small lockers. The deck fittings are of mahogany. The topsides are painted black. The rig will be a large one, designed for racing. The work has been done under a shed at some distance from the water, the boat being built without the lead keel. The latter was cast near the water and the boat moved on to it, then the holes, already bored through the wood keel, were continued down through the lead by means of large ship augers, and the bolts driven and set up. The work has been neatly and quickly done and the boat is probably the best ever turned out at the yard.

VALKYRIE'S FIRST RACES.

THE season in England begins rather earlier that usual this year, and up to the time when we go to press Valkyrie has sailed six races, four of which she has won. The various races in which she will take part in May and June are: May 22, New Thames; 23, Royal London; 24, Royal Thames, all from the Lower Hope, around the Mouse Lightship, and back to Gravesend; 25, Junior Thames, Southend to Harwich; 27, Royal Harwich; 28, Royal Harwich, Harwich to Southend; June 1, Royal Thames, Nore to Dover; 3, Royal Cinque Ports, Dover. Valkyrie left Southampton early on May 19, reaching Beachy Head on the morning of May 21, where a tow was taken, Gravesend being reached in the afternoon after an unpleasant passage, with heavy fogs. The course and times for her first race in the New Thames Y. C., on May 22, were as follows:

Match for yachts of any rig or class exceeding 9 rating; first prize £50, second £25, third £15; course, from the Lower Hope, round the Mouse Lightship and back to Gravesend; Y. R. A. rules and time allowance for 50-miles course:

Irex, cutter, Mr. J. Jameson	Rating	98
Valkyrie, cutter, Earl of Dunraven	"	78
Yarana, cutter, Mr. P. A. Rain	"	60
Mohawk, cutter, Col. Villiers Bagot	"	40
Deerhound, cutter, Mr. C. A. Nottage	"	40
Foxglove, yawl, Mr. W. F. Paget	"	40—32
Foxhound, cutter, Mr. H. North	"	30
Vreda, cutter	"	20

Deerhound is a new Watson boat, about 63ft. l.w.l. by 13ft. 5in. beam. Yarana is 60.08 l.w.l. by 11ft. 8in. beam. Her outside ballast has been increased by 4 tons since last season, with a sail plan that brings her up to 60 rating in place of 58. Irex is 83ft. l.w.l by 15ft. beam. The allowance for a 50-knot course would be Irex allows Valkyrie 5m. 29sec., Yarana 12m, 19sec., Monawk and Deerhound 23m. 27sec., Foxhound 31m. 57sec., Vreda 44m. 49sec. The weather was very light all day, and the course was reduced to 36 knots, with allowance in proportion. The cabled reports of the race were as follows:

At the start, at 11:45 A. M., both Deerhound and Yarana led Valkyrie, the latter being in light air. Irex cut the wind out of Valkyrie, but missed Yarana. When the yachts were off Tilbury Haven the breeze freshened up a bit, and Valkyrie passed Yarana. Yarana tacked to clear, but Valkyrie followed and luffed out on the weather of Yarana, which was unable to pass Valkyrie afterward; though she kept very close to her.

After passing Yarana, Valkyrie followed Deerhound and headreached and stayed across her, but when the yachts were off Lehigh Deerhound was still vanquished. Suddenly the breeze veered from east to southeast, and Deerhound fluked at Medway. Valkyrie had dropped Deerhound astern, but the wind became lighter and Yarana began to close up on Valkyrie again. At Southend she had reduced Valkyrie's one mile lead to a quarter of a mile. When the yachts rounded the club steamer anchored off the Nore for the turning point the wind was very soft, and it began to look as though both Yarana and Deerhound were going to pass Valkyrie.

The yachts went round the steamer as follows:

Valkyrie	1 56 44	Deerhound	2 00 07
Yarana	1 57 49	Irex	2 07 52

It was a dead run home with spinakers set to Gravesend, Yarana running on Valkyrie, but falling behind when the wind grew stronger. The times were:

	Prize.	Start.	Finish.	Elapsed.
Deerhound	1	11 45 00	4 47 48	5 02 42
Vreda	2	11 45 00	5 01 24	5 19 24
Yarana	3	11 45 00	4 42 21	4 57 21
Valkyrie		11 45 00	4 37 35	4 52 00
Irex		11 45 00	5 00 00	5 15 00

The next day's race was over the same course, shortened as before to 36 knots, in similar weather, but Valkyrie made a better showing, beating Yarana by 25m. 30s., Irex withdrawing. The times at the Nare were:

Valkyrie	2 10 20	Irex	2 25 18
Yarana	2 1s 06		

On May 24, in the Royal Thames race, the full course was sailed, the yachts beating out to the Mouse and running home under spinakers. Valkyrie won easily, the times at the Mouse being:

Valkyrie	2 22 55	Irex	2 34 18
Yarana	2 27 26		

The finish was timed:

Valkyrie	5 03 47	Irex	5 14 40
Yarana	5 14 20		

The historic Southend to Harwich match of the New Thames Y. C. was sailed on May 25, with the following entries: Valkyrie, Irex, Yarana, Deerhound and Amphitrite, the latter being an old schooner renovated this winter, with a lead keel and, it is said, a centerboard. Again the wind was light and variable, Irex

leading at the start, but finally being badly beaten by Valkyrie. Yarana went on the wrong side of the mark boat at the finish, and so was disqualified. The finish was timed:

Valkyrie	6 11 12	Deerhound	7 13 15
Irex	6 38 11	Amphitrite	7 16 19
Yarana	7 12 11		

The Royal Harwich regatta was sailed on May 27, again in light weather, the wind being moderate from E. Valkyrie led all day, while Yarana led Irex for a good part of the race. The yachts were timed at the Sunk Light:

Valkyrie	2 31 10	Irex	2 42 20
Yarana	2 38 40		

From here in a close reach of 8 miles Irex passed Yarana and gained on Valkyrie. The finish was very slow and tedious, being timed:

Valkyrie	4 10 03	Yarana	4 29 29
Irex	4 22 55		

Over the 35 mile course Irex allows Valkyrie 3min. 50sec. and Yarana 8min. 37sec. This race in particular would indicate that Valkyrie, with brand new canvas and untried gear, was in very poor form in the first races, but is improving rapidly.

The return race to Southend was sailed on May 28, Irex beating Yarana by 21min. 9sec., and Valkyrie by 22min. 8sec. No particulars are yet to hand, but the times indicate that the race was sailed in a strong breeze.

While from such meagre reports of fluky and light weather races with larger and smaller boats it is impossible to form any correct idea of Valkyrie's speed; it would appear that she was under the ordinary disadvantages incident to a new boat, and that some of these are disappearing under trial, and also that she is by no means a failure, but a very fast yacht. How she will be with the 70ft. class here is another matter. Her sail plan, if her length is not over 70ft. would be from the above rating, 6,686ft. or 520ft. less than Katrina's. This is a very large sail plan for so narrow a craft, but still small compared with the American yachts of her class.

BEVERLY Y. C., BUZZARD'S BAY.

THE owners of Eina and Kiowa, both dissatisfied with the light wind on which their races of May 15 and 16 were sailed, made a match at that time to be sailed over the same course in the first double reef southwester.

On May 22 it was blowing a three reef southwester and the boats prepared for the race; it was however late before they could meet and after the start the wind moderated somewhat, still there was a good breeze and the sea, though not heavy, was much rougher than on the previous days.

The starting signal was given at 2:58, Kiowa leading off under three reefs, Eina having in only two. Kiowa soon shook out one reef and Eina got the lead while she was doing so; Kiowa began to gain however and passed Eina off Pine's Buoy. She kept on gaining on the long tack to the Bird Island shore; she seemed to her crew three minutes ahead; here Eina got a slant and gained half the distance; as the wind was a little lighter here, both shook out a reef.

Kiowa rounded Bird Island Buoy with a lead of 1min. 15sec. shaking out her last reef as she did so; Eina in shaking out her reef tore the sail at the reef cringle. From Bird Island the boats were dead before it. Eina gained but could not catch Kiowa, who won by 48sec. Course, 10 nautical miles, 5 of them dead to windward. Time of race, Kiowa 2:03:04, Eina 2:03:52. X. Y. Z.

PHOTOS OF NEW YORK YACHTS.—Mr. N. L. Stebbins has met with such success in his useful little volume "The Yachtsman's Souvenir," that he proposes to publish a larger book, including about 300 New York yachts. His plan is to visit New York, the Sound and the Hudson in his yacht Galatea, about June 10, remaining for several weeks, during which time he will be glad of any opportunities to secure good views of yachts.

YONKERS CORINTHIAN Y. C.—This energetic young club will soon be in possession of one of the handsomest houses about New York. The opening reception in the new club house will be held to-night, and to judge from the hustling the entertainment committee has been doing for some time past the members and their friends are bound to have a "bery large time, sah."

Answers to Correspondents.

☞ No Notice Taken of Anonymous Correspondents.

S. S. H., Creighton, Pa.—1. Deer shed their horns annually. 2. C. R. Tinan.

L. F., Pasadena, Cal.—It cannot be done with good results by an amateur. You should send the arm to a regular gunsmith.

T. Z., New York.—1. See issue of April 18 for "Seneca's" paper. You can buy sandworms also at the Catherine street market. 2. Use shrimp, soft crab or clam.

C. F., Salem, Mass.—Pride of the Border was liver and white. He won first at Springfield, Mass., and second at Watertown, N. Y., in 1875. Diana II. was black and white.

H. E. M., Hazleton, Iowa.—Please give me the name of the bird described below. Length from end of bill to tip of tail about 2ft.; legs 1ft. long; bill 3in. long, black; legs yellow; eyes black with a red ring around them; top of head and back green; a narrow white band across base of bill forward of the eyes; throat and under part of body nearly white, fading to a light drab on the back of neck and wings; three narrow white feathers 7in. in length extend from the back of the head; the middle toe nail is serrated like a duck's bill. It is evidently of the bittern or heron family. Ans. The bird is a night heron, also called "qunwk," or qua bird. Its scientific name is *Nycticorax nycticorax navius.*

A READER, New York.—Kindly inform me of the nearest lake in Canada where good fishing is to be had. Please state the route on which it is located, the car fare and also the address of some hotel close by. Ans. A correspondent recommends Lake Seymour, in Quebec, one of the lakes on the east branch of the Mastigouche River. The trout fishing is said to be of the best. The route is by the Canada Pacific Railway from Montreal (5 P. M.) to St. Gabriel de Brandon (9 P. M. same night), stop there over night, and leave for the lake (15 miles) next morning. The Mastigouche House, on the lake, is kept by E. M. Copeland (P. O. address, St. Gabriel de Brandon); board $1.50 per day, boats 50 cents, guides, when wanted, $1.50.

L. P. N., East Randolph, N. Y.—We have a creek here with lots of trout in its headwaters and the first mile of its length, but there are seven ponds below where the trout are in which they will not stay on account of sawdust. Is there any way of stopping their putting the dust in the ponds? If so, how, and whom shall I see? There are salmon and speckled trout here and lots of them, but they are growing less every year. The owners of the ponds would clean them out and make room for the fish if they can stop their being filled up. If it can be stopped, how much will it cost? Ans. According to the fish laws, sawdust cannot be thrown into any of the waters of the State except in streams which form the motive power of the machinery or manufacturing establishments when it is absolutely necessary for the manufacturing purposes carried on in such establishments to run the refuse matter and material thereof into such stream. Write to S. A. Roberts, game and fish protector, Buffalo, N. Y., stating the case to him. If this does not come under the exception mentioned you should have no difficulty in stopping the deposit of sawdust without any cost to yourself.

ROUND MOUNTAIN LAKE.
A New Trout Fishing and Hunting Resort.

KENNEDY SMITH, so long and favorably known to sportsmen and summer tourists who have visited the Dead River Region, has within the past year built the best set of camps in Maine. All are neatly furnished and will be kept in a first-class manner; plenty of very nice boats. Trout are plenty and rise well to a fly. Large and small game very plenty. This camp has no equal for lake and mountain scenery in Northern Maine. High up among the mountains over 2,000ft. above sea level. Pure air; no hay fever. For any other information address
KENNEDY SMITH, Eustis, Me.

The Tomahawk Lakes & Trout Lake

Are the very best fishing grounds in the State of Wisconsin. These lakes are located in Oneida county, along the newly completed line of the Wisconsin Valley Division of the *Chicago, Milwaukee & St. Paul Railway*, and the whereabouts is just being made public. Muscallonge, bass and trout in abundance.

During the season of 1889, necessary hotel and camping facilities will be provided for all sportsmen who are looking for "greener fields and pastures new."

Buy tickets to Minocqua, Wis., via the Chicago, Milwaukee & St. Paul Railway.

For further information address A. V H. Carpenter, General Passenger Agent, Milwaukee, Wis.

An Illustrated Pamphlet

Descriptive of the Las Vegas Hot Springs, New Mexico, prepared for the information of tourists, tired people, invalids of all classes and those who seek a summer and winter resort with the benefit to be derived from Medicinal Baths and Mineral Water, can be obtained by addressing C. D. SIMONSON, General Eastern Agent Santa Fe Route, 261 Broadway, New York.

Yellowstone National Park

Tourist or Hunting Parties to the adjacent game country furnished with saddle and pack animals, guides, cooks, packers and camp outfits. Correspondence solicited. Address
E. HOFER,
Mammoth Hot Springs, Y. N. P., Wyoming, or Gardiner, Montana.
Refer by permission to Forest and Stream.

Hotels and Routes for Sportsmen.

GRAND TRUNK RAILWAY.

When planning your summer piscatorial tour remember that this company controls over 4,100 miles of railway, equipped in the most approved modern style, and passing through a magnificent country, noted for its unsurpassed facilities for sport.

A FEW OF THE PRINCIPAL RESORTS.

PORTLAND, ME.—For salt water fish.
RANGELEY LAKES (via Bryant's Pond or Bethel, Me.)—For brook trout, pickerel, yellow perch, rock bass.
THE WHITE MOUNTAINS (via Gorham, N. H.)—For pickerel, trout, bass, cusk.
THE SALMON RESORTS of Quebec, New Brunswick and Nova Scotia (reached via Quebec).
LAKE ST. JOHN DISTRICT.—For Ouinaniche (reached via Quebec).
THE RIVER ST. LAWRENCE (in the neighborhood of the line for 400 miles).—For mascalonge, pike, bass, whitefish, pickerel, perch.
THE THOUSAND ISLANDS (via Gananoque or Kingston).—For pickerel, black bass, mascalonge, pike.
MUSKOKA LAKES (the best place on the continent for fishing, shooting and camping, reached from various points on Northern and Northwestern Division).—For brook and salmon trout, black bass, mascalonge pickerel.
PARRY SOUND AND GEORGIAN BAY.—For pickerel, mascalonge, black bass.
LAKES ONTARIO, ERIE, HURON AND MICHIGAN, (via stations at all principal ports).—For the varieties of fish for which they are noted.
LAKE SUPERIOR (via Collingwood, Wiarton, Sarnia, in connection with steamship lines).—For lake trout, etc.

The charges for hotels, guides, and camping at many of the fishing waters named above, are extremely low. Full particulars of same, with many valuable hints as to baits, best months and general facilities are published in a pamphlet entitled "Fishing and Hunting Resorts of the Grand Trunk Railway," which will be furnished gratuitously on application to any of the company's principal agents, or of the General Passenger Agent, Montreal, P. Q.

WM. EDGAR, Gen. Pass. Agent. JOSEPH HICKSON, Gen. Manager.

TAKE THE
Grand Rapids & Indiana Railroad,
The "FISHING LINE,"
THE DIRECT ROUTE TO
TRAVERSE CITY, PETOSKEY, MACKINAC, MARQUETTE, and Other Delightful Health and Summer Resorts of
NORTHERN MICHIGAN
And the Celebrated Trout and Grayling Streams, Beautiful Lakes and Grand Forests of this Famous Country.

The waters of Northern Michigan are unsurpassed, if equalled, in the abundance and great variety of fish contained.

BROOK TROUT abound in the streams, and the famous AMERICAN GRAYLING is found only in these waters.

The TROUT season begins May 1 and ends Sept. 1.

The GRAYLING season opens June 1 and ends Nov. 1.

BLACK BASS, PIKE, PICKEREL and MUSCALONGE also abound in large numbers in the many lakes and lakelets of this Territory.

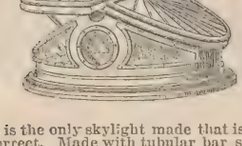
TAKE YOUR FAMILY WITH YOU. The scenery of the North Woods and Lakes is very beautiful. The air is pure, dry and bracing.

THE CLIMATE is peculiarly beneficial to those suffering with HAY FEVER and ASTHMATIC AFFECTIONS.

New hotels with all modern improvements have been erected, as well as many extensive additions to the older ones, which will guarantee ample ACCOMMODATIONS FOR ALL.

The Grand Rapids and Indiana Railroad in connection with the Duluth, South Shore and Atlantic Railway at Mackinaw City, forms the most direct route to Marquette, Sault Ste. Marie, Negaunee, Houghton, Hancock, and all points in the Upper Peninsula of Michigan.

During the season ROUND TRIP EXCURSION TICKETS WILL BE SOLD AT LOW RATES, and attractive train facilities offered to tourists and sportsmen.



For Tourist's Guide, Time Cards and Folders, giving full information, address

Yachts and Canoes For Sale.

Cruising Yacht For Sale or Charter.

The owner of a well-known yacht, 47ft. long, 14ft. beam, 6ft. draft, perfectly fitted out for the comfort and accommodation of four to six persons in the cabin, and three men in forecastle, patent w. c. and all modern improvements, will sell or charter her at a reasonable price on account of important business engagements preventing his leaving the port during the summer months. The yacht is built upon a beautiful model, has two rigs, can be sailed as a sloop, when she is very fast, or as a yawl for cruising. She was built during the winter of 1886, of best of material, under the personal supervision of the owner, and is a staunch and excellent sea boat, well suited for cruising in the gulf of St. Lawrence, and has been so employed, where capital sea trout and other fishing can be enjoyed, and salmon may be included, seal and white porpoise hunting, duck and shore bird shooting. This is an opportunity seldom offered. Address P. O. Box 1081, Quebec City, Can. Satisfactory references in New York or elsewhere given and required.

$800. ATALANTA. $800.

The very fast sloop yacht Atalanta, winner of over forty first prizes in the last four years, is for sale till June 1 at the above low figure. She is perfectly sound and in good order, has two suits of sails and over two hundred ($200) dollars worth of lead ballast. Atalanta is 30ft. over all, 27ft. 3½in. waterline, draws 3ft. 6in. of water, and has 12ft. beam. Is a remarkably safe, fast and able yacht. Has been around Cape Cod eight times, and hove to for six hours in a southeast gale. She is a great bargain at this figure, and is sold only because the owner is going away. For further particulars address
ISAAC R. THOMAS,
60 State st., Boston, Mass.

FOR SALE.—THE JIB AND MAINSAIL open boat Professional, length 21ft. 6in. Address FRANCIS BURRITT, So. Norwalk, Conn.

FOR SALE.—THE CELEBRATED SINGLE-handed yawl Windward. Can be seen at the foot of Spring st., Newport, R. I. Address C. F. L., 14 Walnut st., Boston, Mass.

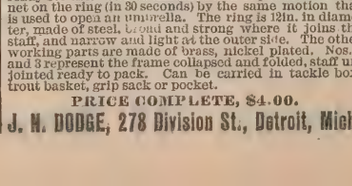
CANOE FOR SALE.
Address W. B. DAVIDSON, Hartford, Ct.

FOR SALE—BARK CANOE, NEW, NEVER been used; extra good quality bark and made to order; capacity four persons and baggage. A bargain. Address B., care Forest and Stream, New York.

SPORTSMEN SMOKERS

SHOULD ALL SMOKE OUR CELEBRATED

Hand-Made Havana Cigars.



MADE IN TWO STYLES AND SIZES.
LONDRES PERFECTO, 5in. long @ $7.00 per 100
CONCHAS ESPECIALS, 4¼in. @ 6.00 "

The favorite cigar of Rod and Gun Clubs generally. These cigars are made of the choicest tobaccos grown, and selected with the greatest care. They cannot fail to suit the taste of all lovers of the fragrant weed. Each cigar has the brand impressed on it, and every box has a label, facsimile of the title of the popular journal, and our firm's signature, without which none are genuine. We are the only authorized manufacturers of the above brand, and to insure the smoker of the genuine we would ask you to send us your orders direct. We will deliver, free of express charges, either size, on receipt of price.

A. W. FOOTE & CO., Sole Manufacturers,
125 Maiden Lane, New York.

DODGE'S PATENT

Collapsing, Folding, Landing and Minnow Net Frame.

No. 1 represents the frame unfolded and expanded, ready for use. Can be unfolded and expanded with the net on the ring (in 30 seconds) by the same motion that is used to open an umbrella. The ring is 12in. in diameter, made of steel, round and strong where it joins the staff, and narrow and light at the outer side. The other working parts are made of brass, nickel plated. Nos. 2 and 3 represent the frame collapsed and folded, staff unjointed ready to pack. Can be carried in tackle box, trout basket, grip sack or pocket.

PRICE COMPLETE, $4.00.

J. H. DODGE, 278 Division St., Detroit, Mich.

No Chemicals.

W. BAKER & Co.'s Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

W. Baker & Co., Dorchester, Mass.

GURDON TRUMBULL'S

Names and Portraits of Birds

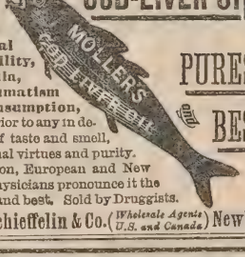
Which Interest Gunners; with descriptions in language understanded of the people.

Practically speaking, this is the first popular volume of ornithology ever issued from the press; a work which goes far to demonstrate that scientific accuracy may be as easily maintained in English as in Greek or Latin. Follows the game birds all over the continent and gives a glossary of all the local names in popular use. Illustrated with admirable portraits from the pencil of Mr. Edwin Shepard of the Academy of Natural Sciences, Philadelphia, which, with the clear descriptions in the text, will enable any man who can read to identify the contents of his game bag.

OPINIONS OF THE PRESS:

It is the first, so far as we know, of a class of books of which the need is felt in every department of natural history.—*Troy Press.*

The book should find its way to a choice place in every sportsman's library.—*Chicago Inter-Ocean.*



I would much rather know what this book tells me, the various names by which the people call a bird, than the Latin, Greek or Hebrew name which science gave him for the sake of cataloguing him. * * * It is more value to me to have a description of a bird in plain English which I understand than in scientific language which I do not understand.—*W., in Journal of Commerce.*

ANSWERS TO CORRESPONDENTS.

LAKE CONEMAUGH.

BY the terrible calamity in a Pennsylvania valley the South Fork Fishing and Hunting Club, of Pittsburgh, has been precipitated into such melancholy notoriety as no other sportsmen's club has ever had. The flood in the Conemaugh Valley was caused by the bursting of the dam which held the club's artificial lake.

The South Fork of the Conemaugh flowed through a lovely vale, high up amid the mountains; the spot was one specially favored by nature; its beauties had long been known to artists and anglers, who resorted thither. More than fifty years ago, when the valley was dammed to furnish a reservoir to supply the old South Pennsylvania Canal, the trout stream was broadened into a lake. Then the Pennsylvania Railroad supplanted the canal; there was no longer any use for the reservoir; the mountain dam was practically demolished, and the lake shrank again to the stream bed. In 1879 the property was acquired by a number of Pittsburgh sportsmen who formed the South Fork Fishing and Hunting Club, rebuilt the dam on a grander scale than before, and formed a vast artificial lake, three miles long, from one-half to three-quarters of a mile broad, and in some parts ninety feet deep. This was Lake Conemaugh; and with generous expenditure of money, the club members, all of whom were wealthy, converted the lake into a luxurious pleasure home for themselves and families during the summer season. A magnificent club house was erected; with numerous costly cottages on the shores, and there were steam yachts, sailing craft, canoes, and all the appurtenances of outdoor life. Our issue of March 1, 1882, reported the stocking of the waters with six hundred black bass transported from Sandusky Bay, a successful enterprise which attracted much attention.

But all this time the tremendous volume of water, held in place up on the mountains by its man-made barrier, was a menace to the valleys below with their villages and towns of tens of thousands of inhabitants. There were constant forebodings and apprehensions, and repeated warnings of peril and disaster. Capitalists who had their millions invested here in steel and iron works, and who were responsible for the safety of thousands of employees, sought to have the peril removed; but legal measures to that end only brought out a mass of testimony from engineering experts certifying to the impregnable character of the dam, and giving assurance of its safety. More than this, if the reports be true, at the instance of the club the structure was regularly inspected by the civil engineers of the Pennsylvania Railroad, and by them pronounced to be safe. And in truth for those who owned the lake it may have been difficult to see in its crystal waters any hint of its tremendous potency for disaster. To them it was a pleasure lake, bright with the glint of the sunlight, reflecting in its pellucid depths the fleecy clouds of heaven, its surface gay with fairy sail and pennant and streamer; it was associated only with recollections of days of recreation and joyous pastime; and so the warnings were unheeded; the menace was unnoted.

Now that the end has come, the dam has given way, the floods have devastated the valleys, obliterated villages and towns, overwhelmed in an hour with awful death unnumbered thousands of human beings, and filled the whole civilized world with horror at the magnitude of the ruin and woe of last Friday—it is simple enough now to pen paragraphs hot with indignation and cutting with words of crimination of the owners of the dam; and to turn a sentence with satire of the wealthy Pittsburg sportsmen who maintained the Lake Conemaugh reservoir for their summer pleasure. And yet, when sober reflection shall succeed the hasty comments of the hour, it will be realized that the blame for the disaster, wherever it may be laid, can in no wise be made more severe because of the purpose for which the fatal dam was built. To spend one's vacation in outdoor recreation is perfectly legitimate and honorable; to gather in families, as these Pittsburg people did, on a mountain lake, is among the ideal modes of summer life; to provide means and facilities for such vacation outings is not less praiseworthy. To maintain a dam to form a lake for pleasure purposes is an enterprise no less legitimate than to build a dam for running a mill wheel. If the construction be a sham, if the artificial reservoir be a death trap, if ruin and horror ensue, the builders and owners are culpable in an equal degree, whether they are bass fishermen or cotton manufacturers.

Amid the great burst of sympathy which is to-day awakened by the reports of the Pennsylvania calamity, there should be no other feeling than of like compassion for the members of the South Fork Fishing and Hunting Club, for we may be sure that their hearts have suffered not the least among all the multitude upon whom the shadow of the disaster has fallen.

SUMMER CAMPS FOR BOYS.

IT is not generally believed that the average boy studies hard enough at school to do himself very much harm. Perhaps he does not, but there are many boys, who, whether above or below the average, spend too much time over their books and far too little in active outdoor exercise. This is especially true of the boy brought up in the city, where there is little to interest or attract in the streets, unless it be when with a number of his fellows he can join in some active game. One characteristic of the small boy is his perennial energy. His mind is ever active. He insists on having something to do. If he cannot find an adequate vent for this energy in action, he will resort to books; and reading of the adventures of others, he will throw himself into their lives, and work off his mental energy without physical action. The habit of omnivorous and continuous reading is too common among American boys. It is often formed at just the age when the child's physical rather than mental development needs cultivation. It is likely to keep the boy in the house when he ought to be out of doors, tearing across fields, wading in the puddles, climbing trees, and generally letting off steam. It results too often in nearsightedness, in stooping shoulders, in hollow chests, in exaggerated nervousness, in consumptive tendencies. The perfect man must be physically complete, and in the race for life the man with superb physique will be likely to distance the physically weak even though the latter's mind may be more fully furnished. The healthy mind in the healthy body is what is needed, but we must first take steps to secure the healthy body which is to contain the mind.

In a recent examination held in this city by an Army examining board, out of fourteen candidates for positions, five—more than thirty-five and one-half per cent.—were rejected for physical disability. These were professional men and students. If it is true as indicated by this examination that one-third of the men belonging to the educated classes in America are physically deficient, there is small hope for the race of native Americans. Probably it is not true, yet no one who looks over the men that he meets day after day can doubt that the proportion of men who would fail to pass a physical examination is far larger than it ought to be. Too often the pride that parents take in their children and the ambition that they feel for them lead to a mental forcing process which not only destroys their physical health, but reacts on their brain, and a boy who at ten was a marvel of precocity is found at eighteen to be hopelessly dull.

There must be a remedy for this tendency to an overdevelopment of brain and nerves in the American people, and this remedy will be found in part in the physical education of the young and growing boys. The movement now being made toward the outdoor occupation and education of boys during the summer vacation is a long step in the right direction.

There are several summer camps for boys in New England, one in Massachuseetts, one in New Hampshire, and, we believe, one in Maine, and while their methods all differ, their purposes are the same, keeping the boys away from books. At some of these camps boys are taught rowing, swimming and other outdoor exercises, the use of arms, and certain mechanical trades, if they have a bent that way, and are carefully looked after all the time. In others the course is broader, and includes woodcraft, observations in natural history, and such other instruction as will best fit them to enjoy their temporary camp life.

This is as it should be. Physical culture has been too much neglected, and where not neglected has been unintelligently pursued by the bustling hurrying people of America. A boy, if he exercised at all, has felt that he must row in a four-mile race. As a broad proposition it is no doubt true that excess in anything is harmful. To exercise too much may not have the same baneful effects as to drink or to smoke too much, but it is harmful. So is excessive study. So is excessive reading. In summer, then, take the boys away from their books. Make them spend their time in the open air. Teach them to fish, to shoot, to ride, to row, to swim, and above all to study nature. In teaching them all these things they will be taught also something that no one can ever learn from books, that is readiness, judgment, self-reliance, independence. Their health will be benefitted; the weak and delicate ones will grow rugged, the stout ones will become young giants. By cultivating their powers of observation, they will be taught to see nature's beauties and so to love her. Thus will their views be broadened, their resources multiplied, and the possibilities for the happiness of their lives infinitely increased.

THE SEAL FISHERIES.

FROM London, from Washington and from the Northwest coast comes the news that war vessels are being dispatched by the United States and the British governments to the Behring Sea. These vessels are sent on the one hand to prevent depredations on the seal fisheries claimed by the United States; and on the other to protect the rights of the British Columbia sealers, who annually destroy great numbers of seals and whose depredations, if not checked, will unquestionably end in the extermination of the fur seals and will render the only important sealing grounds of the United States valueless. The dispute over the fishery rights of North America between Great Britain and the United States seems no nearer settlement now than when it first arose, but there certainly must be some common ground on which an amicable understanding might be reached, which should be fair to both countries. The shouts for war which are heard from some quarters are unworthy of attention.

With a view to securing accurate information on this subject, the FOREST AND STREAM some time ago dispatched a staff correspondent to British Columbia with instructions to investigate this killing of the fur seals in the open sea. This he has done in a very thorough manner.

We shall next week begin the publication of his report on this subject, and this paper will give our readers a very clear idea of the methods employed in taking the fur seal, whether in the legal way upon the land, or illegally in the water. The question of the rights of nations in the premises is one to be settled by international lawyers and diplomats. That it should be settled promptly and peacefully all will agree.

The report of our correspondent will extend over several numbers of the FOREST AND STREAM and will, we are confident, have great interest not only because of its timeliness, but by reason of the special advantages enjoyed by our staff correspondent in gathering his information.

The Sportsman Tourist.

JAMES RIVER TALES.—II.

TURKEY SHOOTING IN SURRY COUNTY, VIRGINIA.

"COME here, Dan, you old fatty, while I introduce you to the readers of FOREST AND STREAM. You were with me at the death of many a noble Virginia turkey, and I think you deserve some recognition in print. If, as Mr. Weller says, 'Width and visdom always goes together, you should be a wise dog; but I fear if you keep at it much longer, one or the other will be the death of you. I sometimes imagine when I see you asleep before the fire, kicking out your legs and wagging your tail, that you are dreaming of some turkey hunt in which you took a prominent part. Am I not right, sir? I dream of such scenes myself, and why should not you? You cannot boast of the bluest of blue blood, even though your father was a royal red Irishman, for these short ears indicate a plebian strain; but you possess what is of far more value—a most excellent disposition. And what a time I had to teach you even the rudimentary principles of your profession, yet did you repay manifold all my trouble and patience. At first how you would draw most beautifully on every cow and razorback hog that presented itself, laboring, perhaps, under the laudable impression that I could not hit anything smaller or wished to fill the game bag without loss of time. Also that first duck. It was not quite dead, you remember, and every time the thing would give a kick back to the shore you would come, just as if the duck was going to bite off an ear. In time you outgrew all these weaknesses and mastered the art of finding game. You were quite as necessary as the gun when I went for summer duck, for no dead bird fell but that you retrieved it, and no cripple could long remain hidden from your good nose. On quail you were fairly good, though not a flyer, and as for turkeys, I think you knew almost as much as the birds themselves. Now, sir, take a nap while I spin a few yarns about Surry county turkeys.

The river front of Surry county for a mile or more back is little less than a succession of ravines, some deep, some shallow, some with a gentle slope, others with almost perpendicular sides, and nearly all of them with a small stream dancing down the center on its way to the James River. Occasionally you might strike a cleared piece of ground where some negro had built a hut of pine logs plastered within and without with mud, and was endeavoring to raise a crop of peanuts and corn, or else an old field that had been neglected for years; but for the most part it was all woods on the high ground, oak, hickory, beech and pine, the latter predominating to a large extent, while the swamps were filled with cypress.

These ravines were excellent feeding grounds for turkeys, and aided materially in hunting them, as you could approach from either side with little fear of alarming them. The turkey makes a great noise in feeding, especially if the leaves are dry, and can be heard a long distance, provided there is no wind. But while he scratches away at the leaves in search of juicy worms that dissolve in his mouth and hard three-cornered beech nuts that look as though they never would dissolve, he is constantly raising his head to admire the scenery, so that if the woods are open and level the odds are against you every time. It is useless to follow a flock thus flushed, for the chances are that every blessed turkey is watching for you from the thick top of some fine tree. Now is the time to put to practical use your knowledge of the hunting ground and the habits of the birds. Make a detour for a point in the direction you think they will take when feeding is resumed, and station yourself behind a tree, bush or log. It is now a game of wait, and if you have patience enough you are very apt to get a shot.

I shall never forgot my first turkey. I had been up the creek after ducks and was returning through an old field, when my dog flushed a flock of some ten or fifteen and off they went for the woods. Whew! how the sight of those birds did electrify me. I was soon after them on the jump, and more by good luck than skill started a turkey at the mouth of a small ravine. Great smoke! what a flopping of wings before that bird could clear the bushes, and when he did come out he seemed to fill the air and shut out the very sky from sight. I don't know whether I fired from my hip or shoulder, but down came the turkey and I had my hands on him almost the second he touched the ground. What a beauty, and how I admired him and executed a war dance over his carcass while the dog capered around and barked his delight.

I was using a No. 12 Parker and No. 4 shot. I know it is more artistic to shoot a turkey through the head with a rifle bullet, and besides it reads so pretty in print, but fresh meat was too scarce in that section for me to practice on turkeys with a rifle. I did invest in a Winchester and tried it several times, but as it always happened that I got nothing but wing or moving shots when I left the Parker at home and the salt meat was growing salter every day, I soon dropped the rifle for the shotgun.

Returning one morning from an unsuccessful still-hunt after deer I entered the same old field mentioned above, and while crossing it Dan began trailing and came to a stand. Quail, says I, and having nothing smaller, my beauties, I shall have to feed you a few No. 6's, and up I walked. Instead of the expected quail a big gobbler came out of the weeds from under Dan's very nose, and dropped to the report of the gun. He was so close when I pulled on him that I think he must have stopped the entire load.

This was the first intimation I had that turkeys would lie for dogs. One afternoon I started up the creek to get a shot at some geese. I had rowed a short distance when I saw a turkey attempt to fly the creek, but it was one too many for him, and into the water he went within a few yards of the shore. I returned in a hurry, scrambled up the bank and sent Dan after that turkey, knowing he would come my way when the dog struck his trail. In a few minutes I heard a rustling in the bushes to my right, and turning spied Mr. Turkey taking a birdseye view of me through the leaves. Looking carefully for Dan, and seeing no signs of him, I blazed away. Over went the turkey, and likewise Dan, who had been standing a few yards behind him. I thought the poor dog was done for that trip, and with a heavy heart lugged him home. Inside of a week that dog was as good as ever, and stood another turkey not 500yds. from that very spot.

Sometimes I found a turkey call very useful, a small piece of reed about 6in. in length making the very best kind of a call, although on one occasion, having left my call at home, I cleaned out my rifle and decoyed a hen turkey to her death. But a hen turkey or a year-old gobbler is a simpleton in comparison to the old gent of the flock, who dangles a 10in. whisker from his glossy front. No hollow reed or turkey bone, however artistically manufactured, will prevail with him. He will cock his head to one side and thoughtfully listen and then answer as polite as can be, with possibly a tinge of sarcasm in his note, which I took to mean, "Come and see me if you want me." He will answer just as often as you call, but not a step will he move in your direction. I wasted considerable time before I "tumbled to" this trick, and after that I always started to hunt his royal highness without indulging in any further duet business.

Keouk! Keouk! Keouk! How the music of that call electrifies the whole body. Carefully now, the turkey calling is not more than 200yds. off and a false move may alarm him. A few minutes and I hear his step quite distinctly. So does Dan. We started that turkey some distance back and struck for the ravine to head him off. I am crouching behind a pine stump with Dan at my side; the dog is all of a tremble with excitement. Patter, patter, patter in the dry leaves, and out of the bushes he comes down the side of the ravine. What a noble specimen, and how magnificently his bronze coat shines and glistens in the sunlight—50yds., if it's a foot, but he will never come nearer, and snap goes the plunger into a faulty cap. Up he rises. The brown barrels follow him for an instant, and then the other shell speaks. He is limp and motionless when I pick him up and heavy enough to show 18lbs. on the scales.

Once I had an opportunity of watching Dan after a turkey on the marsh. To an uninterested party who did not eat turkey doubtless the spectacle would have been both instructive and amusing. To me it was galling, for I was over a hundred yards off, and with no earthly show of getting nearer. There he stalked through the grass, not ten yards ahead of the dog, seemingly without fear and as dignified and majestic as you please. Every few steps he would halt. Dan would follow suit and turn his head to look for me, as much as to say, "Come on with that gun." Oh! the pain that procession gave me. It was worse than watching the triumphant parade of your opponent after the election returns were all in. Reaching a stream the turkey flew off and Dan returned to me, the most disgusted looking dog I ever saw.

After consoling myself over a pipe we started in again. In a short while Dan began trailing. Thinking he was after quail, for we had hunted that piece of ground not half an hour before, and seeing him come to a stand on the side of a hill where the bushes grew scattering, I yelled at him to go on. Much to my surprise, up rose a flock of turkeys. One chap bore around in my direction and I gave him both barrels, just to let off some of the mad. He appeared to shake as the shot struck him, but kept straight on. I followed his line of flight and hunted for him until it began to grow dark. At last, giving up in despair, I whistled for Dan and turned my face homeward. Hearing a commotion behind me, I looked to ascertain the cause, and, bless me! there was Dan with the turkey in his mouth.

Turkeys emit a strong scent, and a dog with a good nose can wind them further than he can a flock of quail. I was out with a party of three one day looking for turkeys that we had never succeeded in running across. We were all together, the dog at my side. I saw Dan elevate his nose several times and sniff the air. We stopped and listened. Not a sound. Everything as quiet as the grave. "Turkeys," said I, and was laughed at by my companions. The woods was very open and afforded a clear view, but not a sign of turkey. I was left to follow the dog. He led me across a stretch of meadow and up into the woods on the other side to the mouth of a ravine, all the time in a slow walk. Then I heard the birds feeding, and one of them went home with us. After that Dan's nose was a good enough turkey indicator for any of that crowd.

OLD MAN.

A BERKSHIRE BROOK.

IT was a beautiful afternoon in July. A soft, mild breeze crept up from the southwest. Ever and anon a bank of fleecy clouds swept over the sun; in the distance they seemed resting on the mountain tops, and the shadows swept slowly down their distant blue-green flanks. There was a softness, a freshness, an effect of far distance and clearness in the atmosphere. The verdure and the foliage under the genial sunlight, washed and refreshed by the rain of the previous day and night, seemed soft and green as June. The voices of the haymakers and the lowing of distant cattle came faintly from the fields, borne on the sweet, still country air. I sat on the hotel piazza, smoking a post-prandial cigar, in that satisfied, at-peace-with-all feeling that comes after a good dinner, eaten with a healthy appetite. The drowsy peace of the country quiet swept over me and my unopened book dropped to the floor. I fell to watching the cloud castles as they swept across the blue sky, column after column, stately and sure.

Suddenly, as a new thought struck me, I sat bolt upright. "Jove! what an afternoon to fish the Anthony Brook; not a drop of rain before in three weeks; how the old veterans of the stream will be dancing this afternoon." A southeast wind it was and that decided it. I looked at my watch; half past two, and I thought "If I get ready now and start I will be on the stream at half past three." I start at once, quite forgetting Rider Haggard and his tale of "Three Lions," all resting on the floor. In a few minutes I am in old clothes, a stout suit of a red, gray, brown color, which had quite allured me at the tailor's by its possibilities as a fishing suit when old. Heavy wading shoes well laced; and now for the tackle. Split-bamboo drawn carefully from its case, lovingly inspected and laid on the bed. Reel in one pocket, pipe and tobacco bag in the other. Now for the fly-book, open it and out with several leaders, which go into the leader box, a dash of water from the pitcher on the felt and the comforting thought of their softness when needed. Before that wrinkle came I used to cram a leader into my mouth at the beginning of the last half mile before approaching the stream and talk in a disjointed fashion with an occasional gag for the next quarter of an hour. Better that though than a coiling serpent of gut falling on the stream with a plash or a bit of India rubber that frays the gut and only half does the business. (I never knew a man with sufficient strength of mind to sit with his leader in the water, patiently waiting by the brookside until it became pliable. I tried it once, and the long suspense was maddening). Now for a few odds and ends, including the match box and also— "where the dickens is my creel? Ah! I know. I left it in the kitchen last time when I came home, and according to custom, the cook has hung it to a nail outside the window to air." I poke my head out of the window and look down. "Yes, there it is, sure enough, and a precious good soaking it had last night, too. Never mind, it will be clean and sweet." So up rod, and down and around the house for the creel. That on, and then a moment's pause while the mind takes a rapid inventory of the duffle to see that nothing is forgotten. (It's no joke to drive to a distant lake and find you have forgotten your rod, as I did once.)

Everything is on board, and then I go down the pasture, into the road and down the hill to the wood. How sweet and fresh the air is! A woodchuck runs out into the road in front of me and then back again in a startled way. A thrush glares at me as I pass from the bush by the rail fence with a half startled, half saucy twist of his head.

Now I pass the two spectral white birches that stand as guardians of the wood, and am under its leafy canopy through which the afternoon sun sends his lances of light, making a quivering, dancing pattern of lacework on the roadway. I hear the brook in the glen below, and I note with satisfaction its voice deeper, fuller than the last time I heard it. The brook, too, has gained by last night's rain.

Where a little spring trickles down the bankside and oozes into the brook below there is a spot of vivid green, and standing by it, erect and tall, a clump of mint, whose fragrance scents the air. I sniff it, but hurry on, for I am eager to reach the bridge where the brook crosses the road, for there, just above in the wood, a mass of springs gush into the brook, sweetening its water and making it clear and cold as crystal; and at this point I always commence fishing. Soon I see its gray and lichen-covered timbers in the green gold woodlight at the foot of the little knoll I am standing on. I breathe a sigh of satisfaction, and taking my rod from its bag I commence carefully jointing it. Now, on with the reel, and laying it handle up carefully on a grassy spot where no gravel will get into its gear, I commence reeving the line through the rings. What a satisfaction these enameled lines are! How beautifully they cast, and how smoothly they slip! I note that latter particularly, for in my hurry I let the end drop twice in reeving it, and it slips back each time through half a dozen rings. Ah! this impatience piscatorial, how it lurks in the blood! Nothing, not even age, can subdue it. Now for a leader. Our fish, though plenty, are shy and wary as hawks; and, according to custom, I will choose one of drawn gut, a strand of gossamer web, fine as a lady's hair. I tied this myself with one or two heavier strands at the top to make it cast truer. Now for the flies. I glance at the pages of my book, then at the water and then at the sky. My mind is made up and I select a governor, one I tied during the winter on a strand of drawn gut for just such an occasion. I tie them with a slimmer body and less hackle and wing than the hackle makers, and I think them better so for these clear-water brooks where trout are shy, than the more bulky ones we get in the shops. Hook, a No. 12. This fly is the same practically as Thad. Norris's brown hen, except for its little tag of red, which I think improves it. It is practically a winged brown-hackle, and a pattern on which many good flies are made by varying the wing. On with it for a stretcher. And now for my dropper, that old reliable killer, a brown-hackle on a No. 14 hook; and now, after putting some of these ferns in my creel to keep the fish from the basket, we are ready. I step down carefully beside the bridge and glance down the little glen. Ah! what a sight. The brook is bankful and the water clear with a strong brown tint. It is running down rapidly, clearing all the while, and by to-morrow will be too low. In the genial air I note a myriad of dancing insects on the surface of the water. The stream swirls down amid the mossy rocks, with here a pool and there a rapid, overarched by tall trees, through which the afternoon sunlight vainly struggles to reach the water.

I creep down the bank and step into the stream. Ugh! how cold the water is where this spring comes in. Then, with a glance over my shoulder to see that the back cast is clear, the line straightens out and the flies light on the dancing, rippling water where it pours into the first pool. Ah, you little darling! A six-inch trout in his eagerness had jumped clear out of water, and missing the flies in his haste, goes down head first. I let out a little line and cast still further down, where that patch of foam circles round by the rock. Whew! a splash, a mad rush down stream, a heavy "thug" on the flies, and, alas! he is gone and also six feet of my gossamer leader and both flies.

If that is the way they are feeding no need for drawn gut. Why, I didn't have time to strike before he had carried off the whole affair. He must have weighed a pound, at least.

So, on with a heavier leader and try again. The same flies as before. Again they light on the pool and again I have a rise, and this time strike my fish and in a moment it is mine. Alas, though, it is not my friend of a moment before, but a comparatively insignificant 8-inch trout. Never mind, he is the first, and is not the first better than the last! He has taken the brown-hackle. Again I try but in vain, and then I wade through the edge of the pool and cast into the one below. Another here and in the one below two more, and in the pool below that two more, and then in the rapids below still another, and when I come to the edge of the little glen and look out into the broad pasture beyond, through which the brook winds a devious way, I think with satisfaction that there are eight trout in my basket.

Just where the brook pours out into the field from the woods under the fence is a large pool. In it are good fish, portly and aldermanic in proportion, but oh! how shy. Well do I recall how some years since, while chasing a hopper through the grass in the field beyond, I was startled by a yell of triumph from the Professor, and beheld him executing a war dance his students would have traveled far to see, with rod in one hand and a 13in. trout in the other. He had just convicted one of the aldermen of taking a bribe. Let us see if there are any susceptible ones now. Carefully I skirt the pool, and getting below it, I crawl under the big tree, standing at

its foot and concealed by its shadow, and with its trunk for a background, I slowly raise my head and study the pool. In spite of the volume of water running in the brook its surface, as usual, is still and glassy. I never had much success in this pond until I began to use the dry fly on it, and fished from below upward. After noting the look of the pool and deciding where I will put my fly—a serious consideration in this still and somewhat shallow water, for if the first cast is not properly made and in the right spot, it is rare that a rise comes to a second one. I first see that the fly is dry and the hackle well spread, and then crawling forward a little on hands and knees and keeping the hemlock between me and the sky line until I come to a point where I have room for the back cast.

I take a preliminary cast or two in the air to get my line of the proper length, and then light as a feather I drop it just at the edge of the little fall and let it float into the pool as though it were an insect caught by the water and floating with outspread wings unable to rise. It has scarcely gone six inches before there is a tawny flash and I strike with a quickness that makes the line sing. Instantly there is a rush across the pool and a pull that puts a good deal of a strain on my 6oz. split-bamboo, but after a turn or two it slackens, and I haul gently to the edge, not the alderman I had hoped for, but still a respectable trout of some 6oz. in weight. As I rap his head sharply against the metal heel plate of my rod to mercifully kill him and be able to extract my fly at leisure without mangling it, I reflect he is not much, so far as size goes, like the monsters I have taken after hard fought struggles from the icy flood of the rushing Nepigon, while my sweating Indians held the canoe with quivering poles against the arrowy flood; but after all I think sport is not to be measured by mere size alone, and these trout, with the delicate tackle required to kill them and the extreme caution and skill required for success, give the angler the highest phase of intellectual enjoyment the art can afford. It is like a game of chess, the pitting of brain against brain. You know the fish is there, and provided you use enough skill and intelligent planning to overmatch his fishy cunning he is yours. And this I apprehend is the greatest pleasure to be derived from the exercise of our art. I venture to assert that the angler who has received his education and becomes a successful fly-fisher on the well-fished brooks of Connecticut and Massachusetts, will rank respectably on any American water and have little trouble in becoming an expert on them, while repeatedly I have seen and fished with men who have been very successful on the waters of the North Woods, the Adirondacks, or of Canada, but who have given up the fishing on such streams with disgust, declaring that they contained no fish. I have been able on several occasions to give an ocular demonstration of the falsity of this with great pleasure.

Well, the alderman's heeler is in the basket and I saunter on down the stream. Never before have I seen the water in this meadow in better condition. The fish are feeding strongly on the top, for insect life is in full swing. Usually the meadow is not a fruitful place until sundown and after, as the sun shines on the water and it is open and clear. But the sport this afternoon is magnificent. By fishing "fine and far off," I take them one and often two from every pool, returning many fingerlings, which must be handled carefully with a wet hand. In the middle of the meadow I come on a small pond, clear and shallow. Here we repeat the up stream, dry fly tactics, and four fine fellows are basketed. In the old times while a youngster, before I became a fly-fisherman, I took many a trout from this pool by crawling on my knees and elbows carefully to the bank and dropping a lusty grasshopper over the edge, by the bush.

The trout in the meadow are small, there are no large pools save this; they run from 7 to 9in. in length, but what they lack in size they make up in shyness and in toothsomeness on the table. More delicious fish than these fellows, told by their silvery sides and vivid spots and coloring from their dark-lined brothers of the wood above, cannot be imagined. Fat and lusty are they, fed by the myriad insect life from the tall grasses of the meadows around them.

In places a bush growing beside the bank leans over into the water. Under the shade are the haunts of fine fish. However, one cannot cast for them; so, standing back, I practice with the fly a plan every grasshopper angler well knows. Shortening my line and keeping it taut, I let the running stream carry it down, and strike all unseen at the slightest touch. In this way I take several; not as many as I would by the bait, for the fish does not carry my fly, and the interval of striking the unseen fish is of the shortest. Several times a flop in the water and the straightening of my rod tells me of my non-success; while at others I have to wade in and unfasten my fly from a twig. However, by this plan I am able to fish these spots with a fly, which otherwise I could not do without bait.

Now I come to a place where the stream, broadening out, flows downward over a long stretch of fine gravel. It is remarkably even, and the water, though broad, but a few inches in depth. At its bottom is a long, clear, still pool, and as I look downward I see with regret a fine fish rush hastily down from the foot of the rapid, through the pool to a secure hole under the bank. Had I done as I should, I would have made a wide detour, struck in at the bottom, and fishing it carefully from the end upward, as he lay with his head up stream, I might have had him. In streams of this character both up and down and often cross stream fishing must be employed, according to locality. I find the best plan to be to fish in a general direction downward, but employ them all as needed.

Speaking of this rippling shallow and pool below, I recall an absurd adventure that happened to me once at this spot. As I approached it I saw a fine trout nearly at the head of the shallow and trying to gain the top. The water was rather low, and he so large his back fin and part of his back were out, while he was wriggling and worming himself along. The sight was too much for human nature, and into the stream I dashed and endeavored to bear him ashore *vi et armis*. Instantly he turned and began to wriggle swiftly downward. I dropped on hands and knees and hunted him all the way down. Sometimes I had him and sometimes I did not; my hands were wet and he so slippery I could not retain him in my grasp. Finally, with one supreme effort he splashed into the pool below, and in his haste and fright described literally one black line to his retreat at the lower end, while I in my haste went souse at full length into the pool below—a very proper lesson for endeavoring to catch a trout in that style.

Still on I wander, taking them by pairs from the clear water. The stream runs straight against the sun and my shadow falls in the water behind me, a very great advantage and quite offsetting the fact that I have to cast against the southwest wind. However, in this deep valley there is but little air, just enough at times to nicely curl the still reaches and not enough to bother me in putting my flies where I wish.

Now I come to a large, fine-looking pool, from which in all the many times I have fished this stream I have never been able to take a fish, nor, indeed, have I ever seen one in it, and I have finally come to the firm conclusion it is avoided by the trout. Perhaps it has a fishy ghost and is uncanny, though it does not appear so to me. At least, I can see no earthly reason why it should not hold trout or why they should not be seen and caught like in the pool above and below. But so it is, and no doubt every angler can recall some similar spot he has wondered at.

Now as I fish downward I approach the rail fence that divides the long meadow from the copse wood. I sit down to take a drink of the sparkling water, and as I take my creel off it feels heavy, and I pour the trout out on the soft greensward to admire and count them. I have three dozen, and I reflect I have enough and to spare. I have enjoyed the finest sport I have ever had in the meadow; the sun is just sinking beyond the trees on the distant hill, a chill falls on the air. Why should I be a pig when I have had enough both of sport and fish? Enough. I pack my fish carefully in the creel, fill and light my pipe, and wend my way homeward amid the gathering twilight, hearing ever and anon the distant sound of cowbells and the voice of the farm boy as the herds gather to the farm yards. Many goodly pools and stretches and some spots lie below me on the stream, in its course of half a mile before it joins the river, but these we will leave to some later day, and not soon will we forget our afternoon when we took thirty trout from the big meadow.

PERCYVAL.

Natural History.

WILD PETS.

I.—A TAME MOUNTAIN SHEEP.

IT is very seldom that the Rocky Mountain sheep, or bighorn, is seen in captivity. Tame deer are common enough; tame elk are sometimes seen, and so are tame antelope, but tame mountain sheep are very rare.

I think that I have heard of only half a dozen cases where these animals were kept in a state of semi-domestication. One of these was many years ago in Salt Lake City, and I know nothing about it beyond the bare fact of its existence. Another I learned of from my friend Capt. Chas. E. Bendire. This was a young lamb, six weeks or two months old when seen by Captain Bendire, in the spring of 1876 or 1877 at the home of a ranchman named Davidson in Baker county, Oregon. The little animal had been caught after its mother had been killed in the lava beds on the head of Crooked Creek in Baker county, and was perhaps a week old when captured. Captain Bendire wrote me that "it ran loose about the house and seemed to delight in getting on the kitchen table, cooking stove or on shelves and running along the edges of them, keeping as close to the edge as it could without falling off. It was badly burned while running on the hot kitchen stove once, and died shortly afterward I was told."

Another living specimen, and the only adult that I have seen in confinement, is the one captured a number of years ago by "Bony" Ernest in the mountains of Wyoming, and which afterward passed into the hands of "Buffalo Bill," and for a year or two and perhaps longer formed a part of the Wild West Show. This one, was reared on a ewe in a flock of domestic sheep, and he grew to be a large ram. When I saw him several years ago, he was apparently five or six years old, and was very tall with a fine heavy head of horns. He was then miserably thin and in wretched condition. This was explained to me as the result of ill-usage, for it was said that he was so cross that the only way to handle him when he escaped from his pen, as he often did, was to rope him and drag him back again.

There were some years ago two of these animals for a short time at the Cincinnati Zoölogical Gardens during the period when Mr. Frank J. Thompson was its intelligent and successful superintendent. These did not belong to the gardens, but to the traveling menagerie and circus known as the Robinson Show. This show had made a tour west of the Rocky Mountains, and in its wanderings had picked up these two sheep. One of these animals survived nearly two years confined in a close traveling cage.

No doubt there have been other sheep in confinement, but I have never heard of them. The last one that has come under my notice is the one now at Washington, D. C., in the collection of living animals belonging to the National Museum, and in charge of Mr. W. T. Hornaday, the well known taxidermist of the Smithsonian Institution. The history of that specimen is as follows:

Early last summer I learned that a Piegan Indian named "Took-Gun-in-the-Night" had in his possession a young female mountain sheep. The little creature was said to be very healthy, perfectly tame, growing finely and likely to live and do well in captivity. From the beginning, the collection of living animals now being got together by the Smithsonian Institution has greatly interested me, and as soon as I learned of the existence of the little sheep, I communicated with Mr. G. Brown Goode, Assistant Secretary of the Smithsonian Institution, who expressed a strong desire to secure it for the national collection, and urged me to obtain possession of it if possible. It was not difficult to do this. "Took-Gun-in-the-Night" is an old friend of mine, and when I sent him a message that I desired to purchase the sheep, if he wished to sell it, he replied that he would keep it for me, and that when I wanted it I could come or send for it.

Last autumn I found myself in Montana, and my route led me past my friend's cabin. There I saw the little sheep, sturdy, well-grown, healthy and fearless. By day and night it cropped the grass of the prairie near the house, loafing about the door, or even pushing its way into the kitchen at meal times, in the hope of getting a crust of bread or a handful of potato skins, of which it was very fond. I had quite a long talk with Took-Gun-in-the-Night—whose short name is John—about the creature, of which he seemed very fond, but at which also he swore with some bitterness on account of the amount of glass which it had broken. With a sheep's usual fondness for lofty places and insecure footing, this little animal had taken to jumping on to the ledges of the windows in John's house, which ledges are about five feet above the ground. As they are extremely narrow, the animal each time it jumped up would strike the glass with its nose or shoulder, and either crack or wholly break out the panes.

That the animal was in good condition except in one point, was evident; that it was entirely tame was equally so. At the call "Seep, seep, seep!" it would come deliberately toward me, and, walking up to my side, would thrust its cold muzzle into my hand in search of a bit of bread. If it did not find this, it would try to get a finger into its mouth, and suck on this as long as was permitted.

John told some amusing stories of the sheep's doings. One day in summer, while it was yet a little thing, it was standing just outside the door near the corner of the house. Close to the door stood a large pan containing dough, which had been set aside to rise before the bread was baked. This pan was covered with a newspaper to keep the flies out of the dough and the dust from blowing into it. The sheep was standing near the pan half asleep, when suddenly one of the dogs rushed around the corner of the house close to it. The sheep, startled by the dog, bounded high into the air and came down squarely on the newspaper covering the bread pan. Of course its feet went through, and it was fairly "mired down" in the soft dough. Some one saw the absurd occurrence and helped the animal out of the pan and on to *terra firma*, and for the next day or two it lunched off the dry dough which clung to its legs.

The sheep seemed to be on excellent terms with every living creature about the house. The hens walked about its legs without paying any attention to it, and the dogs did not notice it, except now and then the puppies, which constantly tried to play with it, chasing it about and nibbling its hind legs. It enjoyed its games with them greatly, but when it got tired, or when they hurt it, it would make an effort to stand them off with lowered head and threatening gestures. The puppies, which were perhaps about the same age as the sheep, were often, when they became excited, very rough with it, and occasionally drew blood. On one occasion the animal was made seriously lame by a bite high up on the inside of the thigh.

The only point about the condition of the sheep which was unsatisfactory was the excessive growth of its hoofs. It is well known to most people that the mountain sheep spends its life among the rocks on high mountains, and as it is constantly running over these rough surfaces, its feet are subjected to a constant and very severe wearing, which wearing is compensated for by a very rapid growth of the hoof. The little sheep at John's, however, had no opportunity to wear down its hoofs. Its life was passed on the prairie, and it had never trodden the rough rocks of the mountains thirty miles away. So its feet grew out so long that at times it became lame, and it had several times been necessary to pare down the surplus horn, a proceeding which the sheep did not at all relish.

The little animal seemed to realize that the life it was leading was not altogether a natural one, and to long for exercise. Although John tried hard to keep it about the house as much as possible, yet it would seize every opportunity to follow him on his hunting excursions or when he was out looking up cattle, and although he was usually able to drive it back or tie it up, yet sometimes it would circumvent him and not make its appearance in his wake until he had got so far from home that he could not well return. It would trot or gallop along behind his wagon or his horse in most sedate and business-like fashion, and even if its jaunt led it over twenty or thirty miles of country, it was always fresh and ready to go further.

My journey led me on, and it was six weeks before I again found myself at John's, and had an opportunity to talk with him further about the sheep. I then heard in detail the story of the animal's capture.

It was in the month when they plant potatoes (May) that John and two other men drove their wagons up to the mountains, to cut timber for fence posts and poles. The prairie was bright and green and the young leaves of willows and aspens were growing, but upon the range the far-reaching fields of snow seemed scarcely to have begun to grow smaller, and the nights were still cold. The men worked hard, chopping and hauling, but one day John, thinking that fresh meat was needed, left his axe in camp, and taking his gun instead, started out to hunt.

It was still early in the day when he reached the foot of the great buttress-like shoulder that juts out from the range on the south side of the stream. As yet he had seen no game, and no very fresh sign, but here he suddenly came on the tracks of two mountain sheep, which had passed along late the day before, after the surface of the snow, softened at midday by the rays of the sun, had, as night drew on, begun to freeze again. He followed these tracks for some little distance, and at length as he looked over a low ridge, saw far ahead of him on the upper edge of an extensive snow field two sheep, and at their feet two tiny dark objects, which he knew must be two young ones. They were too far off to shoot at with any reasonable prospect of hitting them, and over the smooth white snow there was no possible means of approaching nearer without their taking the alarm. More in order to see what they would do than with any idea of hitting them, he guessed at the distance and fired a shot.

The two old ones ran off and were soon high up on the rocky ledges, looking back anxiously now and then, but always going higher and higher, but the very young ones remained where they had first been seen. Then it occurred to the hunter to see if he could catch one of them. He toiled along over the snow and was soon close to the little lambs. One of them was lying down, but the other was on its feet, and seemed to regard the strange object that was approaching with some fear. John had no difficulty in placing his hands on the one that was lying down, but all his endeavors to get hold of the other were futile. It did not seem greatly alarmed, but was too shy to be touched. After tying the feet of the captive with his neckcloth, John made up his mind to attempt to run down the little tottering creature, hardly larger than a rat, which insisted on keeping just out of

"SEEP"—YOUNG MOUNTAIN SHEEP IN THE NATIONAL ZOOLOGICAL PARK, WASHINGTON.

of his grasp, but run as fast as he might, the lamb avoided him, and presently, when it got among the rocks, it showed such activity that John in despair gave up the pursuit, and returning to his starting point, took up the captive lamb and started for camp.

John was sufficiently interested in the matter to go back over the tracks of the sheep, and he satisfied himself that these lambs had been born either that morning or the preceding night. On both the little ones the umbilical cord was soft and dragging. The tracks that he had been following, and which had been made the night before, were those of the two mother sheep, whose little ones had not then been born.

The little sheep was reared on cow's milk diluted with water, and was weaned about Sept. 1. In nature the lambs suck up to Nov. 1, but not much after that. John told me that the sheep ate "anything," but on questioning him more closely I learned that after she was weaned her main dependence was the dry prairie grass, although she was fed with more or less regularity at the house on bread, crackers, oats, the peelings of boiled potatoes, and the uncooked scrapings of dough from the pan in which the bread was mixed.

I took her away with me shortly after this, and hauled her by wagon nearly 150 miles before I could turn her over to the express company to be shipped to Washington. She was an affectionate little thing, and before I had had possession of her twenty-four hours quite won my heart. Her journey was made in a crate partially filled with hay, but the jolting of the "bad ax" wagon in which she rode was so severe that she could not lie down, but made the whole drive standing up, only lying down at night. During the time she was in my hands I fed her hay, boiled potatoes, bread, crackers and oats, all of which she seemed to enjoy. Oddly enough, she seemed not to know how to drink out of a vessel, and would only do so when sucking a finger held in the liquid. One night I gave her some milk. She enjoyed it immensely, kneeling on the floor of the bar-room where I had her, sucking my finger, butting vigorously with her head and wiggling her short tail from side to side precisely after the manner of a domestic lamb. She was a greedy little thing, and her incisor teeth were so sharp that she wore out several fingers before she got to the railroad. Like domestic goats and sheep, and like tame antelope and deer, she enjoyed picking up papers or rags and chewing them, and this night spent in a bar-room was rather an anxious one for me as long as she was at liberty, for she wanted to eat the cigar and cigarette stumps and the discarded playing cards with which the floor was strewn.

Often at night, after the long day's drive was over, my good-natured comrades and I would take turns standing out in the cold wind under the clear moon so that "Seep" might have an opportunity to graze, and might go to bed with a full belly. I did not dare to picket her out on a rope, for I was not sure that she might not get frightened and break her neck, and besides this, the country was full of coyotes and gray wolves, and a single snap of a pair of savage jaws would have made an end of little "Seep." So we all of us took turns shivering out in the darkness and listening to the howling of the wolves while she fed. It made me feel quite miserable to part with the little creature when at last I got her in; but at the same time a great deal of anxiety was lifted from my mind when I had delivered her over to the express company. If anything happened to her from this on, the responsibility would not be mine.

She reached Washington in admirable condition, and when I learned of her arrival, I took the liberty of making a number of suggestions to the authorities of the National Museum as to her care.

The great need of any wild animal which is kept in confinement is exercise. Therefore this sheep ought to have as large a paddock as possible, and the greatest possible facilities and inducements to keep moving about. Let any one familiar with the habits of the mountain sheep think for a moment of the enormous amount of climbing over the rocks that one of these animals does in the mountains during a single twenty-four hours, and he will realize that the health of a sheep closely confined will be very likely to suffer. Now that the collection of live animals in charge of the National Museum are to have room and suitable surroundings, which will be afforded by the proposed Zoölogical Park at Rock Creek, I hope to see little "Seep" live to be the mother of a considerable band of mountain sheep, for I am not without an idea that in the future I may be able to obtain for her a mate and possibly a number of additional specimens of her kind. Until the collections at Washington have more room, however, she must get along in her present quarters. It is intended before long to give her a companion to play with, either a domestic lamb or two or a young Angora goat. This society will undoubtedly be of great benefit to her. Every convenience which the surroundings admit of will be furnished her at Washington. Her paddock of perhaps 20×15ft., is to be provided with a rock pile for her to climb on, and Mr. Hornaday adopted my suggestion of making a path of rough broken stone all around the fence on the inside, over which the animal will naturally walk, and which will tend to keep her feet worn down and in proper shape.

When this little sheep reached Washington its shoulder height was 22½in., its length from nose to tail 3ft. 6in., and its weight 51lbs. On April 15 last it was found that its height at shoulder was 30⅝in., its length from nose to tail 4ft. 7in., and its weight 90lbs. In sending me these measurements Mr. Hornaday writes: "Her appetite is much better than during the first two months of her stay here, and now she is as much at home as any domestic sheep. She is very playful at times and fond of attention. When visitors approach her she meets them half way and immediately proceeds to investigate their buttons, watch chains and other salient points, and if let alone she would carry off many a trophy."

For a time it was found impracticable to keep her in her paddock. The fence is 8ft. high, but when she was put in the yard, she managed to go over it while the keeper was passing out through the barn, and to his intense astonishment would meet him at the door. So for the most part she was tethered out on the lawn where she picked away at the grass or fought with the rope, for she does not like confinement.

I visited "Seep" in Washington one day last winter and was told about her constant escapes. Familiar as I have been for years with the agility of the mountain sheep, I could not believe that this little creature had actually made a clear bound over an 8ft. fence. On going inside and examining the wire fence her mode of procedure was made plain. On one of the four sides of her paddock and close to the corner of the fence is a gate leading into an adjoining paddock. The gate is of wire netting, but its frame is of 2in. pine and projects so far out from the wire in the sheep's pen. A cross bar about 4ft. from the ground joins the two uprights of the frame. Here was the ladder by means of which the sheep had scaled the fence. She jumped up 4ft. to the crossbar—2in. wide mind you—and from there 4ft. further up on to the top of the fence, which is 2in. wide, and from there 8ft. down to the ground.

Although so impatient of confinement, this lamb has not the slightest desire to run away. She wants to be free but not to escape. She likes to be petted, to have her head rubbed and scratched, but what she likes best of all is to play, and this she cannot do in her present cramped quarters.

I hope with all my heart that she may live and do well for many years, and I believe that there is every prospect that she may survive in captivity. The mountain sheep is a hardy creature. "Strong lived more than any animal except the buffalo." G. B. G.

Game Bag and Gun.

MONTANA GAME LAW.

AN act for the better protection of game and fish. Be it enacted by the Legislative Assembly of the Territory of Montana: Sec. 1. That any person who shall wilfully shoot or otherwise kill, for the period of ten years from and after the passage of this act, any bison, buffalo or quail, or who shall wilfully shoot or otherwise kill for the period of six years, from and after the passage of this act, any moose, elk or beaver within this Territory, shall be deemed guilty of a misdemeanor, and be fined not less than two hundred dollars nor more than five hundred dollars, or be imprisoned in the county jail not less than two months nor more than six months, or both such fine and imprisonment for each offense committed, in the discretion of the court, and the possession of the skin or meat of any of the above mentioned animals killed during said period shall be presumptive evidence that the person having either in his possession, killed the same in violation of this section. The provisions of this section shall not be deemed or held to apply to persons who raise or own buffalo.

Sec. 2. That any person or persons who shall wilfully shoot or otherwise kill or cause to be killed any white-tailed deer, black-tailed deer, mule deer, mountain sheep, Rocky Mountain goat or antelope, between the first day of January and the fifteenth day of September of the same year, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not less than twenty dollars nor more than fifty dollars for each offense committed.

Sec. 3. That a fishing tackle consisting of a rod or pole, line and hook or spear shall be the only lawful way that fish can be taken in any of the rivers, streams, lakes and ponds of this Territory. That said hook shall not be baited with any poisonous drug or substance, and that it shall be unlawful for any person or persons to make any dams or use any fish traps, grab-hooks or similar means for catching fish, or to use any drugs or poison or giant powder or other explosive compound, intending to catch, kill or destroy fish of any species; but nothing herein contained shall prevent the use of any seine or other catch net used to catch fish in any river or stream below 200 miles from the head of any such river or stream, provided that such seine or catch net shall have a mesh not less than one inch square.

And any person or persons, company or corporations, offending against this section shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not exceeding $250 or shall be imprisoned for a period not more than six months and shall pay the costs of prosecution.

Sec. 4. All laws and parts of laws in conflict with this act be and the same are hereby repealed.

Sec. 5. This act shall take effect on and after its passage.

APPROVED Feb. 28, 1889.

INCIDENTS IN MY HUNTING LIFE.—II.

I WAS camping one night late in the fall of 1849, at the head of Mollychunnkemunk Lake, near a stream which runs from the ponds known as Richardson Ponds, and within ten rods of the lake. It was a dark and windy night, threatening a storm, so I put my night wood inside my shed camp and reloaded my gun, standing it in a convenient place, built up a cheerful fire outside, ate a hearty supper of broiled trout and other fixings and lay down for the night. How long I slept I cannot tell, but when I awoke I was on my knees peering out into the darkness, the rain was pouring and the fire was just about gone. And just then a tremendous yell or screech saluted me in the direction of the lake, not over a gunshot away. My hair stood on end. The situation was alarming and my nerves crystallized. But I did not lose my presence of mind. But holding on to my gun I at once set about kindling a fire, and of the few coals in sight I soon got a blaze with my kindling wood and birch bark. I consider a fire in a dark night the best protection against wild beasts. I heard several more of these fearful screeches, but the animal evidently did not like my fire, for he steered eastward toward the mountain, giving me a stunner of a good-bye yell.

There was no more sleep for me that night and as soon as day broke I went to the lake, and there deep in the sandy shore were the foot prints of a large panther, with toe nails or claws full 2in. long, and the creeping tracks near to each other when he passed my camp showed that he was wicked. When he came to the stream he leaped across some 25ft., sinking his feet deep into the sand, showing that he was a heavy animal.

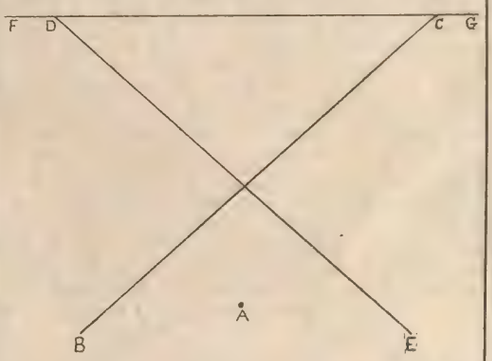
I have no doubt this was what hunters term the Indian Devil, a creature with which a man in the woods alone has no business. I have tracked a creature like this since, but never heard his voice and never want to.

After 1840 for nearly twenty years, moose were abundant in Maine, and it was lawful to kill them with dogs or at any time of the year; so almost everybody laid in a supply of moose meat each winter for the year, which was saved by smoking, drying or salting. Those farmers who did not care to hunt them, usually had enough given them by their neighbors or bought it cheaply.

At one time four of us were chasing a moose on the side of a mountain west of Rangeley Lake, when, on coming out into an open place in the woods, the moose stopped and "sulked" as we termed it. In our party was a 16-year-old boy who was a brave lad and liked to show off pretty well, so when the old bull stopped, this fellow, Dan, ran into the open place near the moose to get a better look at him. But no sooner had Dan showed himself to the moose than the moose started for him. There was about 4ft. of snow and we all had on snowshoes. Only one of the party carried a gun, and he was a few paces back, just coming up. We all sung out, "Bring the gun! Bring the gun, quick!" So the gun soon got there, but not so quick as the moose, for four or five good strides brought the moose and boy too near together. The boy was not idle for he turned and made for a big knole or hillock of snow a few yards away, and seeing the moose upon him he dove into the snow bank, out of sight, but not until the moose had trampled a beat where the lad was last seen, and in less time than I can write it had a standing place as hard as frozen ground, and under his feet we could see one of the boy's snowshoes.

As soon as it was possible that moose was shot and fell in his tracks, and we all ran to pull the dead body of the boy out from under the moose, where we expected to find him. We soon got the snowshoe, but the boy's foot was not in it; and while digging away the snow searching for him we heard him cry out. We all looked in the direction of the sound, and along the bank of snow about 100ft. the boy stuck up his head through the snow. The bank of snow was formed by a tall tree, blown up by its roots, the snow covering it out of sight, and under the tree was an open space, as the tree lay up from the ground, and under this the boy dove, as the moose reared to crush him down, just coming down on his snowshoe, which in the struggle broke loose from the boy's foot.

That was a scared boy, but he was a wiser boy. Much of his conceit had left him. J. G. RICH.



BETHEL, Me.

CROSS SHOOTING.

Editor Forest and Stream:

"Novice" appeals to the ancients to take up the parable formulated by "Sinkbox" and expound it. "Sinkbox" argued as a matter of demonstrated fact that a cross shot may be secured first by covering the bird, holding on to it in its flight, and pulling trigger while holding on, or secondly, by covering the bird, throwing the muzzle of the gun round some few feet ahead of it, and pulling trigger, so that the charge aimed ahead will traverse a line which the bird's line of flight will intersect. His explanation of the apparent irreconcilability of the two assumed facts is that in the first the barrel being in motion at the time the trigger is pulled, the shot does not leave the muzzle in a straight line, but in a slight curve, the deflection being due to the sweep of the barrels, while the charge is traversing them.

This is an ingenious method of providing a theory to

square with the assumed facts; the simplest and safest way to meet it is to deny the facts.

A gun placed in a revolving machine and fired while the machine is making a thousand revolutions a minute would impart centrifugal force to the shot during its passage through the barrels, but even assuming that a gun in a man's hands is fired while being swept round, the deflection of the direction of the shot, if it can be theoretically contended for, is so slight as to be inappreciable.

"Sinkbox's" mistake originated in the false assumption that a bird crossing the sportsman at a given angle and distance could be dropped both by throwing the muzzle of the gun ahead of the object, holding it stationary and firing, and by firing while holding on to the bird with the gun in motion.

We have to deal with facts, and the first fact for consideration is that a bird flying sixty miles an hour, as some ducks do, will go two yards while a charge of shot of fair initial velocity is traversing forty yards. That rate of speed on the part of the bird must be allowed for in every cross shot, to bring the bird into the center of the charge, but as the charge may cover a surface of two feet diameter with occasional stray shots beyond, the gunner has to that extent an allowance for error.

Whether the gunner should hold much or little ahead of a crossing bird depends both upon the angle at which the bird is crossing him and the distance. In illustration, the gunner standing at *A* in the diagram sees a bird rise at *C* (40yds. distant) and fly toward *B*. It will not be necessary to hold much ahead to drop the bird on its way, for along that course the width of the charge will almost equal the distance the bird can cover while the shot is en route. At the nearest point, *C*, the gunner fires at right angles to the bird's line of flight, and is more apt to shoot behind; but the distance is short, and the bird must fly sixty miles an hour to get half a yard ahead. Nevertheless, at any point of this line the gunner should aim a little ahead. The same rule applies if the bird's flight be from *B* to *C*, and in either direction between *D* and *E*, bearing only in mind that right-shouldered gunners are much more apt to fire behind a bird crossing them from right to left than from left to right. In this latter case, in trying to hold on to the bird in its flight they hold ahead unconsciously when pulling the trigger.

But if a bird cross the gunner along the line *F G* at a least distance of 30yds., it may traverse a yard and a half or two yards while the shot is spanning the distance, and would, of course, escape if the trigger were pulled while the bird was in a direct line with the barrel. The gunner who does not hold well ahead under these conditions will get left, unless he have the luck to shoot at the drake and kill the duck.

The rule for cross shooting is consequently always to hold ahead of your bird, letting the distance ahead be regulated both by the distance of the bird and the angle at which he is crossing you. The gunner who tells you that standing at *A* in the diagram he can bring down a bird crossing from *G* to *F*, a distance of 30 to 40yds., with the bird in line of fire while he pulls the trigger, asserts what is practically impossible, although he may in that way make fair bags with birds traversing the lines *B C* and *D E*. ANCIENT.

A WEAPON FOR THE VACATION.

Editor Forest and Stream:

I am moved to submit a hint for the benefit of those whose inexperience might lead them to procure a heavy shotgun, or large calibered rifle or revolver.

A young friend purchased an outfit recently, for a three weeks trip to the Blue Ridge Mountains in Virginia. I have hunted all over the district where he expects to camp, and never killed anything larger than an inquisitive skunk. Yet he had bought a 10lbs. 10oz. shotgun, with 500 loaded shells, a .40-90 Winchester repeating rifle and 200 rounds of ammunition, a Colt's army revolver, and 100 rounds, and a 9in. sheath knife. He was very proud of his armament, and allowed that he was prepared for bear, deer or catamount. I mildly suggested that he would find none of these, but he smiled innocently and remarked: "But supposing I did see one of the other where would I be then?" Now, that young man will pack his mule load of ammunition into camp, and if I were a betting man, I would wager high that nine-tenths of it will be wasted on trees, or kindred inanimate targets, in all probability he will not enjoy himself, and on his return will swear camp life is an unmitigated bore. Had he but used a little common sense, and ordered his equipment to suit his surroundings, or better yet, sought advice from an experienced woodsman, he would have saved money, time, exertion, and gone prepared to properly enjoy his camp life.

Do not, brother outers, burden yourselves with heavy weapons of any kind, a shotgun when it is no trouble to carry is useful; but unless certain to find large game leave rifle and revolver of any larger caliber than .32 at home. Buy yourselves a Stevens pistol either for .22 short or .22 long rifle cartridge and be happy. You can carry several thousand of these little cartridges in the space of a few hundred of the longer caliber, their cost is normal, their accuracy perfect, and they are deadly to almost all small game you will be likely to find during the close seasons. You will have choice of four models, viz.: Lord, Conlin, Gould and Diamond. The first named weighs 3lbs., the two next 2lbs. and a fraction over, the last 12oz. The accuracy of these dainty weapons is simply wonderful, and choice of model is simply a matter of preference; for my own liking the Lord model, being the heaviest, is the king, with the Gould a close second. The Diamond is a little gun, but it "gets there just the same" if held straight. The writer lives in the country, and has little time or inclination to take a vacation beyond such incidental tramps as his professional work allows, but during the season he rarely leaves the house for an extended ramble without a Stevens being with him. I have a broad leathern belt, from which hangs on the right hip a specially made holster containing the weapon, upon the other side, near the buckle, hangs a pouch, such as were at one time issued to the army to carry caps in, and this holds over a hundred .22 shorts or about seventy-five of the long rifle. In this way one's hands are free and the weight is hardly noticed, yet a weapon is handy which is very nearly as deadly up to 50yds. as a rifle. With the .22 long rifle, fairly good target shooting can be done at 200yds., using the Gould model pistol, but I take it, few of us desire a longer range at small game than 50yds., especially if the pot is empty. With both Lord and Gould models I have killed ground hogs, squirrels, doves, hawks, snakes, chickens (my own), rats, such living objects as one naturally takes for targets in lack of something better.

I remember several years ago being one of a crew of a yacht which sailed down the Delaware River on a pleasure trip, to be gone a week. Another member of that jolly crew had with him a "Lord," which added as much to our enjoyment as almost anything in our equipment. When nothing else could be done, or everything else palled upon our hands, the pistol was produced, matches were shot, the principal stakes being cartridges. At one place we tied up for supplies; one genius of the party procured about two bushels of empty yeast powder bottles. These he corked, and when becalmed or at anchor one would be thrown over the side and shot at as it slowly drifted with the tide; or, tied to a long string, a bottle was thrown up in the air to be shot at, and retrieved for another shot if missed.

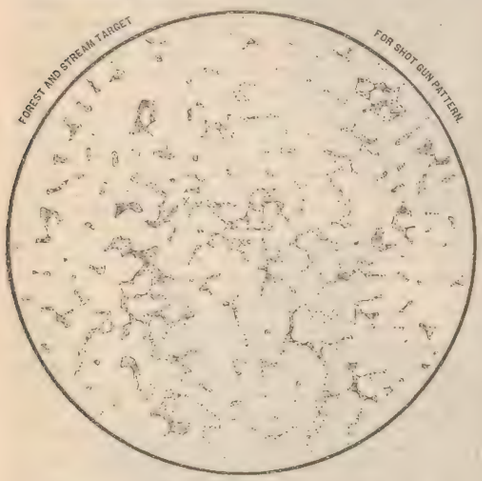
Try the experiment, brothers, if you have not had the experience I mention. Take a Stevens into your camp, canoeing, bicycling, yachting or pedestrianizing; it costs little for the vast amount of enjoyment you can get out of it. You can, by expending a few thousand cartridges, become a good shot, and will then, I trust, be one more added to the ranks of the ever-increasing number of those who enjoy the use of revolver or pistol at the target, a sport second to none, with a weapon like the rifle to be used by manly men. PICUS.

SIZES OF TRAP SHOT.

TAKING the catalogues of a majority of the shot-making companies of the country as authority, there would seem to be a wide variation in the number of pellets to the ounce of the various sizes of trap shot. The figures for the five sizes generally used at the trap stand as follows:

	No. 6.	No. 7.	No. 8.	No. 9.	No. 10.
Tatham, N. Y.	218	338	472	688	1056
Le Roy, N. Y.	209	337	473	698	1052
Colwell, N. Y.	218	291	399	568	848
Sparks, Phila.	245	305	426	615	950
San Francisco Shot Co.	215	303	420	592	874
Pittsburgh Shot Co.	222	301	408	575	854
Chicago Shot Co.	246	323	434	596	854
Cincinnati Shot Co.	241	318	445	590	820

According to this showing two shooters, each using the American standard measure of 1¼oz. on No. 8 shot, might have a difference of 93 pellets in their cartridges; while on No. 10 shot the variation might rise to 295 pellets in a 1¼oz. charge. W.



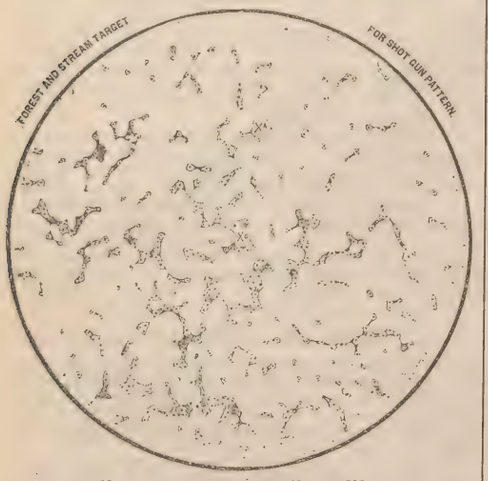
NEWTON, Ga., May 31.—Our bird hunting last season was poor; very few birds; where we usually have thousands only few; they were killed off by the Texas flea or some disease.—B. F. H.

THE "FOREST AND STREAM" GUN TEST.

PATTERN AND PENETRATION.

No. 2.—Parker Hammer and Hammerless Guns.

IT was entirely proper that the series of tests of shotguns now on the American market which the FOREST AND STREAM is engaged in conducting should open with such a well known and typical arm as the Parker. The Parker gun has been known well and widely for a quarter of a century, and the aim of its makers has been from the start to have it second to none and one entirely worthy of the confidence of the American sportsman. There are probably more Parkers out in the hands of the shooting men of this country to-day than of any other one make of shotguns. The works at Meriden, Conn., are among the most extensive and expensive of any of the private armories of this country or in the world, and a tour through the works will enable the visitor to see the whole process of manufacture, from the rolled rods of steel used in bunching together for the laminated barrels to the completely finished weapon all prettily carved and engraved. The Parker gun now on the market is of the top-action type and claims all the essential qualities of a perfect gun, which are simplicity of construction, excellence of workmanship, beauty of proportion, balance, shooting qualities and capacity to resist the strain of long continued use. The greatest objection to breech-loading shotguns in the past has been their getting loose, caused by constant opening of the barrels, which fall with their weight upon the hinge joint. This objection

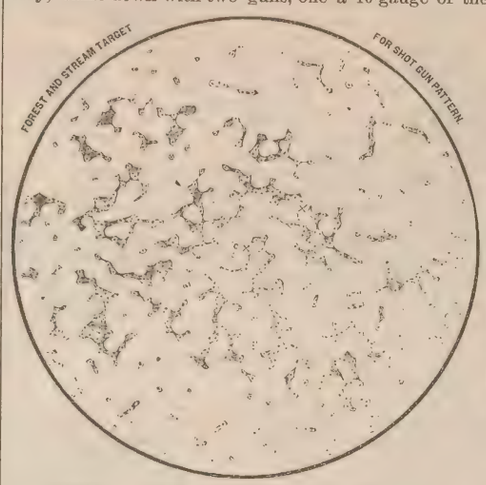


PARKER 12-GAUGE, RIGHT BARREL, 40YDS., 407 PELLETS.

is entirely overcome by means of an improved check hook and pin, which sustains the weight of the barrels, preventing any strain upon the hinge joint, and thus adds many years of usefulness to the guns. The locking bolt holds the barrels positively firm, and being of taper shape, allows the locking of the gun, even when a little dirt is in the way. This locking bolt is supplemented by the top fastener upon the end of the extension rib, which prevents the springing of the breech from the barrels and any lateral motion of the barrels at the time of discharge. The fastener has its sides cut upon the arc of a circle, with the hinge joint as a center, which gives a perfect bearing along its entire surface when the gun is closed.

It is the result of experience, that in order to enable sportsmen to use heavy charges, the hinge pin must be removed from the breech a greater distance than formerly. The length of the frame therefore has been materially increased. The Parker gun was the first to use low hammers, which admit of rapid sighting along the top rib of the gun.

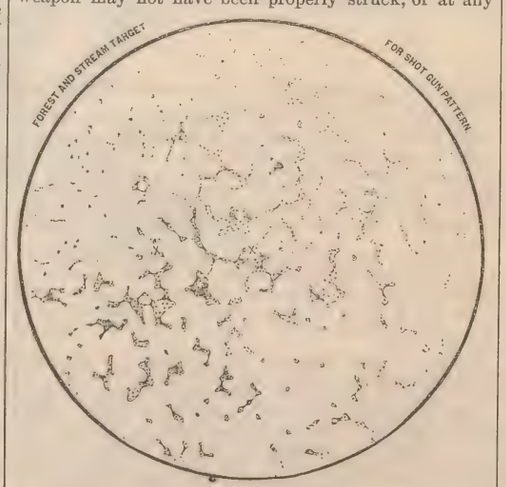
From the beginning a system of boring was followed that aimed at the best results in both pattern and penetration, and the Parker gun has made a remarkable record



PARKER 12-GAUGE, LEFT BARREL, 40YDS., 386 PELLETS.

for close, hard shooting. All guns are thoroughly tested, and each one bears a tag when it leaves the factory, giving its record at the target.

The Parker gun, as a distinctively American production, has all the advantage of the American system of manufacturing, by producing an interchangeable gun, the parts of which are all made to gauge, fit accurately, and are readily duplicated, which is not the case with guns of foreign manufacture. The different parts are made by special machinery, and by workmen who make a specialty of one part only. No metals but the best cast steel and wrought iron are used in its construction. No decarbonized or plain iron barrels in which the grain of the metal runs lengthwise are used. The cheapest guns have genuine twist barrels of good quality, and the fine ones, ranging in price from $75 up, have fine Damascus or laminated steel barrels. Rebounding locks, so essential to the safety and convenience of a breechloader, are applied to all the guns.



At the suggestion of the FOREST AND STREAM that a test of a good all-round gun of the Parker output would be desirable, Mr. L. J. Gaines, an expert from the factory, came down with two guns, one a 10-gauge of the

PARKER 10-GAUGE, LEFT BARREL, 40YDS., 442 PELLETS.

ordinary hammer type, and the other a 12-gauge of the hammerless style. They were beauties of their class. Ammunition came with the guns, and a short ride brought Mr. Gaines and a representative of the FOREST AND STREAM out to our testing screen on the range of the Suburban Shooting Grounds Association, at Claremont, N. J.

The plan for testing was of the simplest. A table, with a bag of soft earth upon it, formed the rest, and was placed just 40yds. from the screen. Seated in a chair behind the table, Mr. Gaines had no trouble in taking deliberate aim at the conspicuous 30in. circles as they were spread upon the shutters swung in by Range Supt. Moss. It was not that calm, still sort of a day that one would like for a careful trial. In range parlance the wind came with varying force from the 9 o'clock quarter. A few shots into the soft boggy soil and the 10 gauge was warm and dirty for the trial. Five shots from each barrel were fired at this range and each charge not only made a pattern on the large sheet but such pellets as went into the black center passed through the pattern paper into the penetration pad, and made there a record for hardness of hitting. With ten shots so made a record was secured of the entire work of the gun under these conditions; but perhaps the holding was not good, or the proper allowance was not made for wind, or the sighting line on the weapon may not have been properly struck, or at any

PARKER 10-GAUGE, RIGHT BARREL, 40YDS., 433 PELLETS.

rate shooting at a fixed circle is a test of both man and arm, so in order to get the best possible exhibit of the gun's ability for pattern a large sheet of paper 48×52in. was put up and a mark fixed in the middle of it. This was repeated until three shots from each barrel had been taken. Now came the repetition of all this at 60yds., and the trial of one gun was over. While the shooting was going on and as Mr. Gaines took cartridge after cartridge from the box containing them, the FOREST AND STREAM also took five, and of these when brought to the laboratory in our office three were opened for weighing up and counting, with the result shown in the test certificates. How essential this is was shown in the very next gun, for in giving the charge of the 12-gauge weapon Mr. Gaines said he had 1¼oz. of shot in each cartridge, the count, etc., of the opened cartridges shows that he had but 1⅛oz. of the No. 8 shot he was using.

In selecting the circle for the best performance of the guns when fired at the large sheets of paper, the distance of the center of the circle taken marked *C* in the diagram from the center of the temporary bullseye fired at *A*, was taken and they go to show that the guns, especially the 10-gauge, were very closely sighted. The greatest variation between the two centers was 7⅛in. in one of the 12 bore's left barrel shots at 40yds., and the least distance 1in. from the same barrel at 60yds. The averages stand:

		40yds.	*60yds.*
10-gauge	Right barrel	4⅜in.	3in.
	Left barrel	4 in.	3in.
12-gauge	Right barrel	5 in.	5in.
	Left barrel	5⅛in.	4in.

At the opening of the several hours consumed in the careful test the atmosphere was hot and dry, and the guns showed it in the hard ring of caked powder which formed far up the barrel near the muzzle. When the readings on the wet and dry thermometers told that the percentage of humidity was rising, a look into the gun barrel found there a corroboration of this in the disappearance of the hard ring, and the appearance instead of the uniformly mottled interior. In these two weapons the barrels, right and left, were the same build, and they were each of them tried with the same sort of cartridges, and no trial was made of different cartridges from the same gun. At future dates other tests will be made of the Parker gun, and under conditions which will permit it to make a clearer exhibit of both its pattern and penetration abilities. The figures as given in the reports below do not do full justice to the capacity of the weapon as thousands of shooters know it. Yet now, and here at the very opening of this series of tests, we venture to express this opinion, and expect to find it fully substantiated in the returns as they are gathered, that shooters need have no fear of buying any gun sent out from a

PARKER 10-GAUGE HAMMER GUN.

reputable house, so far as shooting qualities are concerned. There are differences of result from various guns and various charges, and these are interesting enough to be worth searching for in careful tests, but

PARKER 12-GAUGE HAMMERLESS GUN.

this leaves the general fact remaining, that the gun in accuracy is in advance of the shooter in ability in ninety-nine cases out of a hundred.

PARKER HAMMER GUN, 10-GAUGE.

CLAREMONT, N. J., April 11, 1889.

TEST MADE AT FOREST AND STREAM GUN-TESTING SCREEN.

Gun—Parker Hammer, Damascus steel barrels. Cost, $85. No. of gun, 55,254. Weight, 10¼lbs. Length of barrels, 32in. Gauge, 10. Right barrel, full choke. Left barrel, full choke.

Weather—Clear. Direction of wind, 9 o'clock. Force of wind, 12 miles per hour. Thermometer, dry, 59°. Do., wet, 49°. Humidity, 52°. Barometer, 29.95in.

Charge, as given by holder of gun:

The second trial took place on May 30, and the early morning gave promise of a damp, misty day. The fog at 10 o'clock, when the firing opened, was heavy enough to give a very high percentage of humidity to the atmosphere, and the conditions were favorable to good results. As the day went on the wind, which had been sluggish from the 6 o'clock quarter, swung around to the 10 o'clock point, and increased up to a sharp, spanking breeze, in which it was necessary to hold over some to get anywhere near the point aimed at. The shooter was fully competent, however, and how well the man and his weapon worked together is shown in the fact that, in selecting four targets showing the best pattern for arm and barrel respectively, no less than three are at the targets whose outlines were fixed in advance of the shot being fired.

The test progressed without any special incident, and the results are interesting as showing what may be fairly

PARKER HAMMER GUN, 10-GAUGE, RIGHT BARREL, 406 PELLETS.

termed a standard degree of excellence. In shotguns as in other things it is not always safe to predict that the best preparations will always bring the best results, and old shooters may recall how on occasion a despised bit of cheap gunnery has distanced the finer grade of arms in pattern and penetration, yet it is safe for any one purchasing a gun to go to a reliable maker, pay a fair price, and then having given the arm a FOREST AND STREAM test so that they may be sure that they are not getting the occasional "duffer" gun which creeps into every large lot, go out to the field with the assurance that the arm is a good deal better than the marksman in the great majority of cases.

In taking the figures for the selected circles from the large sheets, the distances between the point aimed at and the point taken as the center of the struck circle were carefully noted, and show the mean aberration of the gun or the marksman, as the case may be, to be very slight. They stand as follows:

	10-Gauge Gun. 40 Yds. Right Barrel.	40 Yds. Left Barrel.	60 Yds. Right Barrel.	60 Yds. Left Barrel.	12-Gauge Gun. 40 Yds. Right Barrel.	40 Yds. Left Barrel.	60 Yds. Right Barrel.	60 Yds. Left Barrel.

SMOKING FIREPLACES.—Gardiner, Me., May 25.—One trouble with "Keouk's" fireplace may be that he does not give it time to get thoroughly hot. My experience has been that when fireplaces are left for a long time without use, especially if on the shore of a lake or pond where there is much dampness, the best of them will smoke until they get warmed up. I would advise him to give his a good hot fire as an experiment before tearing this one down. At the same time, I inclose a photograph of the cottage containing this fireplace, and where the FOREST AND STREAM is often read. It is owned by a party of four and was built on the shores of Cobbossee Contu Lake. The lake is full of black bass; last year the fishing was not up to the average, but we look for better results this season, as they are now taking the fly readily, fully three weeks earlier than I have ever known them to before.—W. B. N.

DAYTON, O., June 1.—This is the first day of the open season for squirrel, and the woods are full of them, but the weather is so cold that the hunters met with only indifferent success. Captain L. K. Stroup is here to-day from Anglaize county and says that there will be great squirrel shooting this season.

IN ALBERTA.—Hamilton, Ont.—*Editor Forest and Stream:* I have just read in your very interesting journal a letter signed "W.," which amuses me. It is headed "A Hunt in British Columbia," and yet it all took place place in the Northwest Territories; in Alberta, in fact, and not within two or three hundred miles of the province named. "W." says he had an officer of the Northwest Mounted Police in his party. If so, it seems to me extraordinary that they neglected to take some firewood with them; no one who knows anything of that treeless country ever goes out on the plains so unprovided; a small sheet iron cooking stove and a few armfuls of chips or small dry branches are always taken. Over hundreds of square miles here there is not as much wood as would make a match, and no water fit to drink except in a few little springs, which "W." was not likely to find. Yet they started without wood and without even a keg of water! I do not know anything much nastier than tea made with alkaline water; but when Providence, overlooking their improvidence, sent them plenty of good water for tea making in the form of snow, why did they not use it? The fact is, if people without experience go into the wilderness and through their own simplicity suffer hardships, I think they deserve it; and I hope "W." will pardon me when I say that, for their own sakes, it would be better to say nothing about it. I know the scene of his adventure; in fact, I surveyed a great part of that country for the Dominion Government. "W." is quite right about the ducks, but I do not think that he can tell us much about prairie chickens there. A disconsolate-looking jack rabbit was the only thing in the way of game on land I ever saw, excepting herds of antelope in the sandhills; they are the real game of the country now; but I was not there for sport and so cannot say much about it, though I have seen them in great numbers. I never heard of canvasback ducks there, but as "W." says they shot them, I suppose we must have partaken of that delicacy unawares.—L. S.

MARAUDING INDIANS AND THE PARK.—The evidence regarding the Yellowstone National Park which has been collected by the FOREST AND STREAM proves that the forests of the Park are most seriously endangered by the fires kindled by Indians. The magnitude of the evil will be apparent upon a little consideration. The vast region known as the Yellowstone Park contains the headwaters or important tributaries of rivers which irrigate vast tracts of country. It is the obvious remedy that these marauding Indians should be kept away from the Park, and this remedy might be applied if the miserable reservation life offered any inducements superior to those of vagabondage. As a matter of fact, the danger of the situation has been explained to the Indian Department and the Indian Bureau, and it is just to say that a desire has been shown to keep the Indians under control. But that this is not done is plain even from the cautious report of Captain Harris, Superintendent of the Park, and from the reports of the Indian agents at Forts Lemhi and Hall. The latter attempt to deny the depredations of the Indians, but any denial is made impossible by the sworn affidavits which FOREST AND STREAM has carefully collected from reliable persons living near enough to the Park to have personal knowledge of the unrestrained wanderings of the Indians. Now that the attention of the Indian Department has been directed to this danger, we trust that agents may be promptly found who can control the Indians, and that an adequate police or military force may be furnished for the Park and for reservation duty.—*Christian Union, May 23.*

THE BEAUTIFUL OZARKS.—Kansas City, Mo., May 31.—*Editor Forest and Stream:* In issue of May 30, page 375, "The Beautiful Ozarks," is a very bad blunder either on my part or the types. A correction is necessary, as you will quickly see. Unless there is one made it would never be safe for any one having a copy of FOREST AND STREAM to sojourn there. "The natives," say the types, "as a rule are somewhat rude, but very hospitable." I think crude must be meant in copy. Do me the favor of keeping those excellent friends in good nature by making correction; they are far from being rude.—TILE.

FISH CREEK VALLEY.—Glacier House, B. C., May 14.—In a former letter I mentioned the beauties and magnificent scenery of the Fish Creek Valley, which lies five or six miles south of this house. A new and easy trail will within a few weeks be opened into this valley, and a good camp built for the accommodation of tourists. Plenty of big game in that valley. In my last week's letter I should have mentioned the fact that it is, during the open season, unlawful to kill the does or fawn of the blacktail deer.—STANSTEAD.

NORTH DAKOTA PRAIRIE CHICKENS.—Galesburg, Dak.—This is going to be a great year for prairie chickens in Dakota. We had a mild winter and very little snow. Then the birds had plenty of feed, there being a great deal of frosted wheat which was never cut. The prairie is alive with them now. Reports say that they are even more plentiful in South Dakota. I expect great sport about Sept. 1.—J. P. W.

A gun and a wagon. Here is food for thought. Jim Long sold a big road wagon and a single-barrel gun at auction Monday. The gun was about six feet long and brought three times as much as the wagon, the latter selling for $1.—*Concord (N. C.) Times.*

The cats, dogs and poll parrots of England having been properly provided for, a hospital for fish has now been established. Fish are much exposed to dampness, and pulmonary diseases would naturally be most common.—*Detroit Free Press.*

THE revised and abridged edition of the A. O. U. Check List of North American Birds, including the additions and changes made in the supplement, will be sent post free on receipt of 50cts.—*Adv.*

NAMES AND PORTRAITS OF BIRDS, by Gurdon Trumbull. A book particularly interesting to gunners, for by its use they can identify without question all the American game birds which they may kill. Cloth, 220 pages, price $2.50. For sale by FOREST AND STREAM.

FOREST AND STREAM, Box 2,832, N. Y. city, has descriptive illustrated circulars of W. B. Leffingwell's book, "Wild Fowl Shooting," which will be mailed free on request. The book is pronounced by "Nanit," "Gloan," "Dick Swiveller," "Sybillene" and other competent authorities to be the best treatise on the subject extant.

Sea and River Fishing.

THE SUNSET CLUB.—IV.

TWO quick raps with a bethabara mallet upon a solid slab of live oak called the club to order, and after the president was satisfied that those present were entitled to seats, the opening exercises were hastened, the regular business followed in rapid succession. The usual discussions touching scientific problems and outing experiences were, with the reports of committees, postponed. The members understood the object, for upon the rostrum, with the president, sat a gentleman whose face was familiar, particularly among the yachtsmen.

"The Keeper of the Keys will see if the three candidates—the passenger agents—are in waiting," said the president in a rapid semi-tone. The officer retired to the ante-room, and after a few moments' absence returned.

"The candidates—Sherman, Brown and Smith—are in evening dress, and have been waiting since sunset."

"The attendants will assist the Grand Conductor in properly preparing them for initiation. See that they are supplied with copies of the Inter-State Commerce Law, and a Burlington Route Directory, that they may be able to decipher the law in accordance with public opinion, and to inform us whether there is a clause that could be construed, technically, to debar them from landing fish by way of the long haul, if it is accomplished according to the art, as quickly as by the short haul. Am I understood?"

"Your orders are 'fully understood,'" replied the conductor, bowing low and bringing his hands together over his head. In this position he backed out of the room.

"Brethren," said the president, facing the members, "We will omit the regular order of business. I take great pleasure in stating that we have with us to-night a true yachtsman, a friend to all lovers of outdoor sport and recreation and whose name is familiar to the fraternity all around the great chain of lakes. [Continued applause, during which the gentleman rose and gracefully bowed]. Way back in 1834 the good people of the then beautiful town of Cleveland, Ohio, were awakened by a 'squall' which continued to increase to a

COMMODORE GEORGE W. GARDNER.

moderate breeze as the years rolled round, until to-day we are in the center of the storm, and the great Forest City, teeming with original life and activity, honors her distinguished son by placing him upon the highest seat within the gift of a generous public." Hear! Hear! came from every quarter of the well-smoked room. The clapping of hands and the stamping of feet became loud and deafening. It was the greatest speech the president ever attempted; his face became red, then pale, and he nervously took a drink from the water pitcher instead of the glass, and when the noise died down to a whispering breeze he again resumed. "As I said, in a metaphorical sense, he was born in 1834. His early education was not neglected, he was a boy like the rest of us, but he loved to hear

'The rush of wind, the romp and roar,
Of great waves climbing a rocky shore.'

"And every pleasant afternoon he ran away from school to play upon the beach or climb to the masthead of some vessel anchored in the harbor. He graduated with honors and mastered the classics as taught in those days, but the love of the sea continued, and when he arrived at that age when he was an unhappy land rover, he made application among the vessels for a position. Fortune favored him; he was employed by a healthy-looking skipper of a small schooner in the honored position of cook. Little cared he how the wind blew, for faithfully below he did his duty, and so well did he meet the wants of his fellow sailors and his employer that he was promoted to the office of assistant clerk, and then to clerk, which position he filled with honor to himself and credit to the vessel until he had saved enough money to start a bank in the town of Cleveland. In the interest of yachting and canoeing we find him entering the field as charter member of the Ivanhoe Boat Club, and with their 36ft. ten-oar barge he considered it a pleasant pastime to row to Rocky River, some eight miles away, and return, for an evening's exercise. Among the first movements to introduce yachting on the lakes was his purchase of the sloop yacht Ravenna, from New Haven, Conn., which won every race she entered in the Canadian waters, then quickly followed numerous clubs with winning yachts, and the interest began in earnest. Ballast Island, Lake Erie, one of the jewels of the Put-in-Bay group, he purchased, and exciting regattas followed, bringing together yachtsmen from Buffalo, Erie, Cleveland, Detroit and Toledo, and the best yachts that ever sailed on fresh water; in time from this sprung the great Inter-Lake Yachting Association, comprising the Michigan Yacht Club, Toledo Yacht Club, Put-in-Bay Yacht Club and the Ohio Yacht Club of Toledo. The gentleman I now take pleasure in introducing is the commodore of this gigantic association, and the respected mayor of Cleveland, Ohio."

Mid uproarous applause the gallant commodore arose and stood expectant until the complimentary clamor had sufficiently subsided for him to speak.

"Fellow yachtsmen and anglers, from the earliest ages we have records of men, and women too, enjoying outdoor recreation, whether in the untrampled forest or in the busy streets of our chief cities. I am pleased to be associated with men who are connected with an institution so widely renowned as the Sunset Club, the object of which is to promote the interest of outdoor amusements. No one can doubt for an instant the utility and importance of yachting and angling in promoting health, and this alone ought to be sufficient to cause their encouragement. In an age like the present, when in a struggle for precedence in the halls of Congress, the bar, or the haunts of commerce, time is considered as of equal value with money, it can scarcely be wondered at that many of the competitors in the race lose health, both of body and mind. Nothing more enfeebles and lowers the bodily and mental tone than an entire giving up of all the energies to one single pursuit. The over-worked lawyer, or merchant, however, has only to bestow an occasional day upon any one of the various sports within reach, and he speedily recovers himself, and instead of losing way in the course which he is pursuing, he is enabled to do more than make up the lost time which his absence has occasioned by the increased vigor that his change of scene and occupation have given him. Many of the happiest hours of my life I have spent upon the water, either riding upon the surging billows or drifting with the placid stream in a light canoe; memorable events come thick and fast before me as I recall hundreds of incidents connected therewith. In my younger days I sailed and paddled a canoe, a boat 22ft. in length and 20in. in width, embarking at Cincinnati, O., and sailing, drifting, paddling down the Ohio and the Mississippi rivers, camping upon the verdant shore during the nights, and arriving in good time at New Orleans. In this same canoe I paddled from my native city, following the steamboat course, in mid-lake, to the islands of Lake Erie, arriving just in time to cut a watermelon on board the sloop yacht Marietta, which the boys had stowed away under the cockpit seat. It is well understood in our American cities that many of our first merchants make a regular practice of devoting a day or two to some kind of outdoor amusement. Some take to hunting, others to fishing, while many of us love

"'To hear the sea and the splash of rain
And the roar of the northeast hurricane.'

"All these act upon the principle of unbending the bow to enable it to regain its spring, and are attended with the same happy result in various degrees. As to angling, I often recall what Walton says of a Dr. Nowell, Dean of the Cathedral of St. Paul, and author of the present church catechism, who lived in the reign of Henry VIII. He is represented as a good man, a constant practicer of angling, and as employing the tenth part of his time in that sport. In an ancient picture he is represented as leaning with one hand on a desk holding a Bible, while at his side lie his lines, hooks and other tackle. Underneath is written, 'Died in 1601 at the age of 95 years; that age had neither dimmed his eye nor weakened his memory, and that angling and temperance were the causes of these blessings.' Sir Henry Wotton, who lived about the same time, says, ''Twas an employment for his idle time, which was not thus idly spent, for angling was, after tedious study, a rest to his mind, a cheerer to his spirits, a calmer of unquiet thoughts and a moderator of passions.'

"The occasional absence from the scene of toil and care, the breathing of the fresh and healthful air of the country, the lake. I can truthfully state that I have been inspired with the most devout and grateful emotions of the heart in contemplating the beauties of creation, my meditations of Divine goodness and grace have been exalted. In conclusion, let all those who belong to the fraternity having the great, the learned, and the good for example, follow in the footsteps of your illustrious predecessors, may you enjoy many a day of delightful pleasure and happiness. If you love the healthful art of angling may your lines always fall in lucky places, and if yachting,

"'When the dangerous rocks are passed,
And the thundering tempests cease,
May you rest in a silent port of peace.'"

Long and continued applause followed, after which the commodore was elected an honorary life member of the club. The usual business was then resumed.

"Mr. President," said a member from Put-in-Bay, "I move you that Ernest Radder, the genial secretary of the Cleveland Yachting Association, and, in honor of his being a truthful angler, be elected by acclamation an honorary member of this club." The motion was unanimously carried.

"Are the passenger agent candidates still in the closet?" asked the president, "and if so, have they separated into component parts the Inter-State Law, that in their examination they may be able to satisfactorily explain the bearing upon worm fishing, the long and short haul?"

"Mr. President," said the grand conductor, with a peculiar wave of the hands, "I regret to state that the candidates cannot agree among themselves upon the law, and the last time I was at the door Mr. Shearman was entertaining the other candidates with a song entitled 'The Bulgarian Pin.'"

"As the hour is late, and it is as difficult to catch a passenger agent as a muskalonge in an interior Kentucky stream, you will keep the candidates in the closet until our next regular meeting, when I hope to see as many of you present as can possibly attend."

The club adjourned. J. E. GUNCKEL.

GEORGIA.—Newton, May 31.—We are having some sport now catching rockfish; eighteen have been captured weighing from 7½ to 30lbs. I would like to see one killed with a 10oz. rod.—B. F. H.

MAINE JIGGING is not so popular as it used to be.

SAIBLING AND BROWN TROUT HYBRID.—3 YRS. OLD. ABOUT ⅝ NATURAL LENGTH.

SAIBLING AND BROWN TROUT HYBRID.

THE finest and largest series of hybrid trout which we have seen belongs to the United States National Museum, and is the result of crosses between the saibling and the brown trout of Norway, artificially produced at one of the fishcultural stations in Norway some years previous to the Centennial Exposition at Philadelphia in 1876. These hybrids were exhibited in the Norwegian section at the International Exhibition, and were presented to the National Museum at the close of the Centennial. The collection contains individuals ranging in age from one year to six years, and includes the result of crossing both ways between the two species.

In no instance does the hybrid resemble either parent in general appearance. In shape there is a compromise between the two parent forms. The saibling has a forked tail, while the brown trout has the tail nearly truncate when expanded. In the hybrid, until five years old at least, individuals all have the tail more forked than in the brown trout, and less so than in the saibling. One of the largest six-year-olds has the tail fin truncate, about as it is in the brown trout.

The proportions of the hybrid have already been hinted at above; the height of the body equals more than the length of the head, and is contained four and two-thirds times in the length of the fish measured to the end of the scales. The head is one-fourth of this same length and contains the diameter of the eye about six times. The snout is half again as long as the eye and one-half as long as the upper jaw. The maxilla extends far behind the eye, the length of the upper jaw being somewhat more than one-half the length of the head.

The vomerine teeth are invariably similar to those of the brown trout. In all but six individuals of this large series teeth are present and well developed on the base of the tongue, their absence occurring in both crosses and in specimens five and six years old, although it is more common in yearlings.

The peduncle of the tail is one-third of the length of the head. The first dorsal fin is somewhat in advance of the middle of the total length, its anterior two-thirds being in front of the belly fins. The base of the first dorsal is nearly as long as its longest ray. The anal fin is very long; its longest ray is much longer than the length of its base and somewhat longer than the longest ray of the dorsal fin. The short and stout adipose dorsal fin is placed over the end of the anal. The belly fin reaches almost, or quite, to the vent when laid backward. Its appendage is one-third to two fifths as long as the fin. The breast fin is about three-fourths as long as the head. A six year old hybrid, produced by fertilizing saibling eggs with milt of the brown trout, has the breast fin of the right side produced into a long tip, ⅜in. longer than its fellow of the opposite side. There are 142 scales in the lateral line, of which 122 are tube-bearing. There are 14 rows of scales from the end of the anal fin obliquely upward and backward to the lateral line; 16 rows from the end of the adipose fin obliquely downward and backward to the lateral line; 23 rows from the end of the dorsal obliquely downward and backward to the lateral line.

The branchiostegal membrane is supported by 12 rays, the dorsal fin has 10 divided rays, the anal 8, the breast fin 12, and the belly fin 8. The number of gill-rakers is 21, of which 13 are below the angle; the longest raker is nearly one-half as long as the eye. There are 58 pyloric cœca in one individual and 60 in another example crossed the opposite way, that is, by fertilizing saibling eggs with milt of brown trout. The brown trout has 42 cœca and the saibling 42 to 45 in specimens examined.

The general color is vandyke brown, the lower parts lighter. The sides are profusely vermiculated with narrow, pale markings and with small blotches of the same color, the vermiculations or blotches, and sometimes both, extending on the head. The fins are usually pale; occasionally the dorsal and anal have several faint, band-like, brown markings, and the tail fin is inconspicuously banded

Hybrids one year old, between female saibling and male brown trout, are 4in. long; between female trout and male saibling they are 3⅞in. to 4¼in. Two-year-olds vary from 6¾in. to 8⅝in. Three-year-olds, produced by fertilizing saibling eggs with brown trout milt, measure 9½in.; the opposite cross of the same age varies from 10in. to 10⅝in. Four-year-olds (saibling mother and brown trout father) range from 11¼ to 11¾in.; those crossed the other way are 11in. long. Five-year-old hybrids, between male saibling and female brown trout, run from 13in. to 14in. in length. Six-year-olds, between male saibling and female brown trout, measure from 17 to 19½in.; those between male brown trout and female saibling are 17 to 18in.

The figure accompanying this description is from an original drawing made for me by Mr. S. F. Denton; it is about two-thirds of the actual size of a three-year-old fish.

None of the specimens examined by me show any development of the reproductive organs, and it is probable that this hybrid, although a large and beautiful animal, is uniformly sterile. T. H. BEAN.

FISHING NEAR NEW YORK.

VI.—NEW YORK BAY.

EVERY kind of fish that anglers can catch in the salt waters of bays in these latitudes can be taken in New York Bay, but unfortunately not in large numbers. Striped bass are taken at Liberty Island, which is but a short row from the Battery. Weakfish, bluefish, blackfish, sheepshead, plaice, sea bass and other varieties are caught in and about the Narrows, and such small fry as eels, tomcods and flounders may be taken almost anywhere in their respective seasons. For the larger and most gamy fish, with the exception of the striped bass, it is necessary to go some distance down the bay from the city. On the Brooklyn or eastern side of the bay there is little sport fishing anywhere above Bay Ridge, and from this place a row of a mile or two is necessary to reach remunerative fishing grounds.

Taking the eastern shore of New York Bay first, the nearest place to rent boats for a day's good fishing is Fred. Wardell's, along the shore just south of the steamboat landing at Bay Ridge. One can go from foot of Whitehall street to Bay Ridge by boat for 20 cents the round trip, and climb over a rocky road to Wardell's place. Boats leave 8:10, 9:10, 10:10 A. M.; 1:10 P. M. Sundays, 10:10, 11:10 A. M.; 1:10 P. M. The better way to reach this resort, however, is via ferry from foot of Whitehall street to Thirty-ninth street, South Brooklyn, thence a walk of two blocks to the dummy cars which run to Fort Hamilton, and ride to Bay Ridge avenue, from which it is six minutes' walk to the beach. Round trip 30 cents, or 10 cents may be saved by getting off the dummy cars at the city line and walking three blocks extra to Bay Ridge avenue. Wardell has fourteen boats, at $1 week days, $1.50 Sundays. Boatman, 25 cents an hour extra. Wardell always keeps clams and sandworms for bait, and will direct fishermen to the best grounds in the vicinity. Blackfish and eels are the only fish caught there now, but there will be fair weakfishing during the latter part of this month. In the fall bluefish (snappers) are quite plenty, and take squid or shedder crabs with avidity. Meals can be obtained in a restaurant near Wardell's.

Ten minutes' walk below Wardell's place is Henry Stillwell's resort, at what is called Owl's Head, on the shore road. Get off the dummy cars at Seventy-ninth street and walk direct to the beach. Stillwell has a sloop in which he takes out fishing parties, and he is generally successful in securing good sport for his patrons.

At Fort Hamilton, the terminus of the dummy car route (round trip fare, 30 cents), there are three resorts within a stone's throw of each other. The one nearest New York is kept by Robert H. Hegeman, who has twenty one boats for hire at $1 a day both week days and Sundays; boatmen, $2 a day extra or 50 cents an hour. Hegeman keeps shrimp fresh caught every day, skimmers, clams and sandworms, and he provides tackle for those who do not bring their own. Paul Sieger, one of Hegeman's patrons, caught a six-pound blackfish on Tuesday of last week off the "Wreck," a famous angling spot in the vicinity, and the anglers have been very successful in taking sea bass as well as blackfish. Weakfish will be plenty in the vicinity after the middle of this month.

P. and M. Gates keep the fishing resort just below Hegeman's. They have fourteen boats for hire at $1 every day in the week; boatmen $2 a day or 25 cents an hour. They keep bait for sale, fiddlers, skimmers, shrimp and sandworms. Fiddlers are 35 cents a hundred, shrimp 20 cents a half pint. Gates recommends the mussel beds or a point to the southeast of Fort Lafayette as the best ground in the vicinity for weakfishing. His patrons have caught plenty of blackfish recently.

Just below Gates's place the angler will find a resort kept by the oldest fishermen in these parts. Adrian Stillwell, who has been forty years in the business of renting boats to fishermen and giving them points about how to fish. Mr. Stillwell is three score years and ten, but he is as hearty as a man of half his age, and there isn't a man along these shores whose advice is of more value to the angler. Mr. Stillwell says he has found that the best all-round bait for these waters is shrimp. Every kind of fish will take shrimp, and take them eagerly, if the bait is properly used. The old gentleman has forty-three boats to let, and as he himself says, "Anybody can rent 'em any day for a dollar, except on the Fourth of July." On the day of Independence Mr. Stillwell celebrates it by charging double. He will provide a boatman, if desired, at $2 a day or 50 cents an hour, and furnish bait of all kinds except shedder crabs and sandworms at the prevailing prices. On Sunday, May 19, Marcy Finney, one of Mr. Stillwell's customers, caught three sea bass and ninety pounds of blackfish, and used only one hundred fiddler crabs for bait. Mr. Stillwell favors squid for weakfishing.

To show what the fishing in these waters was some years ago Mr. Stillwell points to the record he made on July 17, 1856, when he caught 104 weakfish in seventy minutes, just about as fast as he could bait his hooks, throw them over and haul in.

At Connolly's, Fort Hamilton, good board can be obtained at reasonable rates.

Taking the western shore of New York Bay we get our first fishing at the vicinity of Liberty Island, where large striped bass are caught both in spring and fall. "The Pot," about half a mile south of the island, is a favorite place, and there is sometimes fair sport angling from the shores of Liberty Island itself. To reach it take steamboat from the Barge Office, foot of Whitehall street, every hour, from 9 A. M. to 5 P. M. Round trip fare, 25 cents. The best way to fish these waters, however, is to hire a boat at the foot of Montgomery street, Jersey City, or take the Central Railroad of New Jersey from foot of Liberty street, to Communipaw station (fare, round trip, 14 cents). A short walk from the station there are boats which may be hired at $1 a day. Bait should be brought from New York. Near Communipaw in the Bay there are also weakfish, bluefish and blackfish. Trains either way every half hour.

The next point at which to stop on the western Bay shore is Greenville, same route, round trip fare, 17 cents. Walk over to the Idle Hour Hotel, on the banks of the canal. W. H. Durkin, the hotel proprietor, has twelve boats for hire at 50 cents a day; Sundays, $1. Boatman, $2 a day extra. Durkin also has three jib and mainsail centerboard skiffs for those who like to sail. Just now fishermen are catching sea bass and blackfish in the vicinity, but the catches are small in numbers. There is good crabbing in front of the hotel in summer and fall. The Idle Hour clambakes, served at 75 cents a head, are famous. Fifty guests can be accommodated at the hotel, and meals obtained at half a dollar. Bait (clams and sandworms) is always kept on hand. One of Durkin's customers caught a sea bass weighing 12lbs. off Robbin's Reef Light two weeks ago. This is on the authority of Mr. Durkin.

There are no boats now to be hired at Pamrapo, the next station along this route. At Bayonne, however, Alexander Ledoux has twenty-four boats to let right opposite the station. He charges $1 a day, and does not keep bait, so fishermen must bring their own. It is an easy row from here to Robbin's Reef Light fishing grounds, where blackfish, weakfish and an occasional striped bass may be caught now. Fish to the northward of the Light above the nets set by market fishermen. Ledoux will be found a reliable man, who doesn't exaggerate the size or numbers of fish caught near his place. Round trip fare 20 cents.

Some of the resorts in New York Bay can be reached to advantage from Staten Island. The Staten Island Rapid Transit Railroad on both north and east shores of the Island runs through all the shore towns. The round trip fare is 20 cents to any point, *via* boat from foot of Whitehall street to St. George, thence cars. At Clifton there are several boatmen who make a business of taking fishermen out to the fishing grounds near the "Monument" in the Lower Bay. John Fence of Clifton has an open sloop carrying ten or twelve persons at $1 each. He will not take out a party of less than five. Other owners of sailboats here that carry anglers to the Lower Bay are Dan Mullan and Harry Nolan. John Sanford has eight or ten boats for hire at $1 a day, and a propeller carrying twenty-five people which he charters to fishing parties to go to the Monument or to the Fishing Banks. Fence keeps all kinds of bait, but I am not sure that the others do. The best fishing grounds, besides those at the Monument, are on the mussel beds in the Swash Channel, and at the "Wreck." They are catching sea bass at these places now averaging over a pound in weight.

H. Hanson, at Clifton, has a catboat in which he takes out parties at the same rate as charged by Fence.

Adam Hemmes, 16 New York avenue, Clifton, has an open catboat 25×10.3, the Adele, in which he will take out a party of ten or under for $6 a day, Sundays $8, this price including bait, which he supplies. Adam generally fishes the Sandy Hook wrecks, and has the reputation of always bringing in fish.

Edward Hemmes, 46 New York avenue, Clifton, takes out fishermen in his 30ft. cabin centerboard sloop at the same rate as charged by Adam Hemmes above. He also fishes the Sandy Hook wrecks and goes out to the banks. His parties have recently made good catches of sea bass and blackfish.

Michael Lynam, Clifton, has four or five boats to let. When I asked him what his charges were he said that he charged a well-dressed dude $3 a day, and a poorly-dressed honest man 50 cents a day. Those contemplating

hiring boats of Michael should have a care as to their apparel.

At Stapleton, next station north of Clifton, John Wahlen has fifteen rowboats for hire at $1.50 a day. He also has two catboats, one of 18 the other 20ft., and two centerboard cabin sloops, one 28 the other 32ft. long. Price for catboats $8 and $10 a day, and for sloops $10 and $12 a day. The large sloop will accommodate twenty people very comfortably. Wahlen visits all the best places in the lower bay, and furnishes lines and bait free. One of his hosts caught thirteen weakfish of small size last week, Tuesday.

At Tompkinsville, next station north of Stapleton, Ex-Sheriff Denyse rents seven rowboats at $1 a day week days, $1.50 Sundays, boatmen 25 cents an hour or $2 a day extra. He also has two catboats for hire at $5 a day, which includes a man to sail them. He also keeps bait (clams). Denyse takes lodgers at $1 a night, and furnishes meals *à la carte*.

At New Brighton, S. I., the first station below St. George on the north shore railroad, Patrick Donovan keeps a place convenient to the Robbin's Reef fishing grounds. Donovan has three rowboats for hire at 50 cents week days, $1 on Sundays. He also keeps four cat-rigged open boats at $4 for week days and $5 for Sundays. One of Donovan's customers caught three bluefish last week Sunday off Robbin's Reef Light.

SENECA.

CHICAGO AND THE WEST.

THE Fox Lake country is giving good account of itself. Camp Lake last Saturday showed several fair strings of bass. Mr. J. M. Clark took six, one of 4½lbs.

Mr. F. P. Taylor says he and his party fished on the Oconto, leaving the railway at Ellis Junction. Their luck at the trout was all they could ask. Mr. Frank Arrowsmith, of the C. & A. R. R., a Syracuse angler who wears a medal won for fly-casting, took ninety-two trout in one day with the fly. Mr. Arrowsmith can stand with his back against a wall and cast a rolling cast straight out in front of him to a good distance, and it was the ability to do this which so much increased his catch along the brushy Wisconsin streams. Mr. Arrowsmith tied his own flies and used on the day above mentioned nothing but very small brown-hackles and black-gnats, sometimes using a small wing on the brown fly. For those who contemplate going into Wisconsin woods for trout, the above is worth remembering. It seems the consensus of opinion of anglers who go in there that the bulk of flies should be dark and small. I presume that if one stuck to brown and black hackles, or brown hackle and a small, dark-winged fly, he would do as well as though he took a bookful, although he might strike a capricious stream. But ninety-two trout is too many.

Dr. Buechner, also mentioned earlier as having had a good trip, was at the Gaylord club house. He reports that the fly was not being taken well in their vicinity, although they had fair luck on the whole. He caught his 2¼lb. trout in a lake which is fairly alive with black bass. This is a very common feature of Wisconsin waters—to find trout and bass dwelling in harmony together. I leave it to the imagination of Eastern readers to picture what sport these deep, cold lakes would afford; and once more I say to all Eastern men who want to go fishing and catch some fish, that they should send their wives home, or bring them along, and start at once for this place, right here, and then go north.

I was walking down Wabash avenue one evening last week with a friend, when we saw a man stop a buggy and take out from it a fish which he could hardly drag clear of the ground. It needed only a look at the clean yellow sides to show that the fish was a mascallonge in prime order. We walked straight over to the buggy. "Where on earth did you get that fish, and who are you, anyhow?" I asked of the gentleman.

Well, I didn't steal him," said he, "but I caught him in Lake Vieux Desert, above Eagle Waters. This is a little one. It only weighs 31lbs. We caught twenty-eight of 'em altogether."

Later I learned that this gentleman's name is Mr. Winans, of the Wabash Railway, and that his companion was Mr. Cameron, of this city. They had royal sport, if ever two men did. Mr. Winans killed one mascallonge which weighed 37½lbs., and which was subsequently placed in banquet before certain Wabash railway magnates. When Mr. Winans got back and began to tell the boys about this fish, he got wild, and could hardly keep down on the ground at all. He caught the big fish and killed him in worthy style, using a Clark 8½oz. lance mascallonge rod, a No. E Mansfield raw silk line, and an Abbey & Imbrie double multiplier reel with the old Foster drag. He says that outfit suited him, and Jim Clark, of the Wilkinson Co., who is the designer of this rod, is consequently tickled pretty near as much as Mr. Winans.

The Eastern anglers who want to go fishing and catch some fish had better come right out here and start soon. In a very short time now the bloom will be on the lakes, and then no more mascallonge till October. We have got fish out here as is fish. The air is full of them. Two fishers on Fourteenth street pier yesterday caught a string of lake perch which dropped on the ground from a pole between their shoulders. Sam Booth caught 25lbs. of pike and bass in the Grand Calumet near the club house. Another angler, whose name I forgot, caught twenty black bass in the Little Calumet near Liverpool. Ira Pease, keeper of Mak-saw-ba club house, writes up beseechingly for the boys to come down and catch some of the bass out of the Kankakee, as they are biting so much as to be fairly dangerous. There are fish anywhere around Chicago, from the city building out. The atmosphere here is gradually assuming a lurid, dark purple hue, as the fishing season draws on apace and the anglers come in with their creels full of lies. The stories I may tell in the columns of FOREST AND STREAM of these successes will all be true. I would not tell any other kind. But much as I should like to tell a real good fish lie, it would be difficult to exaggerate the actual excellence of the fishing lying—I mean the fishing which lies or is situated—in our new North Woods. This country is open to gentlemen. I sincerely hope that any one who goes in there and kills all the fish he can will fall out of his boat and be drowned and devoured.

Speaking of that. The best hated man in all Wisconsin lake country is Dr. Robert Hunter, of Chicago. Not a guide, hotel keeper or woodsman who ever knew him but execrates his name, and throughout that whole district his reputation is anathema. Dr. Hunter is the man with the record. To acquire his record he had to stack up fish on the shore and let them rot in heaps. To acquire record and reputation Dr. Hunter invented a little machine, consisting of a good stout spring coiled in a box, to which he attached his trolling line. When a mascallonge struck the spoon, the worthy Doctor could fold his hands and sit and watch the spring kill the fish. He couldn't catch them fast enough with rod and reel—not so fast as was consistent with his idea of the size of the pile of fish rotting on the shore. Dr. Hunter gained his reputation this way some little time ago. He got his reputation. He got into the railway guide books as the man with the record. He got into the papers out here. He has gotten into FOREST AND STREAM; and as quick as I can get time to go up into that country and get some more facts—which are not more facts than these alleged, be sure—he is going to get into FOREST AND STREAM a lot more. He ought to get into every sporting paper in this wide land, and be so held up in all the glory of his success that when the final curtain shall be rung down on his drama, his fellow countrymen shall not say merely in grave reverence, "This was a man!" but shall whisper with bated breath, "This was a champion!" I don't want to be told that I am too severe on such a man, for that is impossible. An example cannot be made too quickly and too surely of any such man and of all such men. Those fish are up there for all of the round table of anglerdom. There is enough for all. It is the business of any man fit to sit at the round table to see that they are sent round in a fair and square divide. Moreover, I do not think that twenty-eight mascallonge is too large a catch for two men, although this may be a first offense. For those who hereafter come to my notice with stories of boat loads of mascallonge I propose to do all I can, in my feeble way, to make them wish it was a first offense, or make them prove a h'alibi if it wasn't. They say those waters can't be fished out. That's all nonsense. Go to the fish dealers of our great lakes. They will tell you that our whole inland seas will be and fairly have been fished out. No amount of game was ever so great it couldn't all be killed, and no amount of fish can swim that cannot all be caught. The time to weep is now, not after the ruin has been wrought. E. HOUGH.

BRIEF NOTES FROM ANGLESEA.

ANGLESEA, N. J., May 30.—Yesterday three fishermen here, from Philadelphia, bagged ten black drum averaging 30lbs. apiece. The birds have been thick, and Chas. W. Barnard, secretary of the West Jersey Game Protective Society, bagged 100 yellowlegs in two days' hunting last week on Seven Mile Beach, which is divided by Hereford Inlet from Five Mile Beach, where four years ago the wild cattle monopolized the right of way in the Holly Woods.

During all the month of June there will be fine fishing for black drum for those who revel in big fish, caught after a gamy fight in the deep sea. But the weakfish, too, have come, and run larger than at any season before in ten years. On the Fishing Banks Chris Ludlam reports that "Holy Joe," Ludlam's boat—his name is familiar to FOREST AND STREAM readers—caught last week 1150 black bass, so called, in three hours, water 30ft. deep, and the largest bass kicked the beam at 8lbs. and a fraction! Good board can be had at the Hereford House, Andrew Weeks, or J. J. Sturmer's, $6 a week. A sportsman's wife, who don't cry for furbelows, or require *pâté de foie gras* at $1 a day board, can be happy here. You can hit the Inlet with a stone from the Hereford Hotel porch, and one can get out in the schooners, which go to the banks every morning 6 A. M., when the wind is not "no'theast," for $1 apiece, and the fisherman has all the fish he can catch. "A ducat to the beggarly denier," to the sportsman who cannot be happy for a month or a week at Anglesea; and I am unselfish enough to wish that my fellow craftsmen with double-barreled Greeners, or rod and reel, or unromantic handline, may enjoy as much, and have as many happy days past, present and to come as I have had and hope to have in angling down by the sea at Anglesea. When a man gets to Philadelphia he need only ask for the West Jersey R. R., and he is within two hours of a sportsman's paradise. J. M. S.

BLACK MOSQUITO NETTING.—Auburn, Maine.—I desire to give my brother anglers a point, which, put in practice during a recent brook-fishing trip, was of much comfort to myself and friend. It was simply a bag of black mosquito netting. I had used white and pink netting on previous trips; but as all know who have tried the light colors or even blue it is at times as imposible to see through as a thick cloth in the sunlight and in thick bushes. The black netting offers no such objections, but it is security against mosquitoes. The small black fly, or "no-seeums," would of course crawl through. The angler must wear a moderately wide hat, with brim sufficiently stiff to hold the netting away from his face and neck. Take of the black netting a strip of sufficient length, so that when stitched up on the short side the hat will pass readily through it. Then with a darning or tape needle run a string through the interstices of the netting below the reinforced edge, so that the edge may be gathered loosely around the crown of the hat at the band, and the thing is complete and ready for use. When on the head it should hang down on the shoulders far enough to be folded under the coat collar and upon the breast in front, It may occasionally double in against the neck, but I had no trouble whatever on that account, though fishing in thick brush a part of the time. I am not claiming originality in this matter, except in the simplicity of the thing and the use of black netting. All arrangements of this sort I have ever seen use white netting or gauze, which interferes very much with the vision, while the black presents no such objection.—NOR'EAST.

SALMON IN THE HUDSON.—Recent captures of salmon in the Hudson River were: By D. Perkins, in a net, near Poughkeepsie, weight 21½lbs.; one of 17lbs. by Charles Harkins, off Hyde Park; one of 12¾lbs. by Wm. Albertson, of New Hamburg.

SAWDUST.—Hingston, N. B.—In my letter published in your last issue, where it reads, "Nevertheless it clearly proves that sawdust does not kill fish," it should read, "Sawdust does kill fish."—SPORTSMAN.

POSTED BROOKS IN CONNECTICUT.—A case of peculiar interest to sportsmen in Connecticut has just been concluded in Wallingford. Dr. Edwin Tabor was prosecuted for trout fishing in Muddy River, which had been "posted" by a Wallingford syndicate, in some cases with and in others without the consent of the owners. It is said that there has been a great deal of this kind of posting of streams in this State this season. The signs are bought at any job printer's for next to nothing, and it has been a common thing for persons to place them along a brook, sometimes with the assent of the owner, but more often without, for the purpose of keeping other persons off their brook. So common has this become, and the trick so well known to Connecticut sportsmen, that the signs are disregarded unless they bear the name of the landowners. In the Wallingford case Dr. Tabor fished on the land of a farmer named Hall, who had given him permission to do so. Hall had previously allowed the syndicate to post his land, but claimed and exercised the right to allow a personal friend to fish there. Consequently the prosecution against Dr. Tabor failed, and he was discharged. It is probable that some united action will be taken against tricksters throughout the State who post brooks without authority, and do not dare to affix a name to their sign.—*Waterbury American, May 31.*

CARP IN OPEN WATERS.—Rock Creek, a tributary of the Potomac River, and boundary between Washington and West Washington, or Georgetown, D. C., is one of the streams which have received a supply of escaped carp from the Government ponds. We are indebted to the Commissioner of Fisheries, Col. Marshall McDonald, for the accompaning letter of Mr. G. Brown Goode, assistant secretary of the Smithsonian Institution, containing information about the number recently taken by a single fisherman at one locality: "WASHINGTON, May 23, 1889. —*Dear Colonel McDonald:* I bought a lovely 12lbs. mirror carp this morning, taken in Rock Creek by my neighbor, Dennis Jones. It was one of seven—all mirror carp —caught last night in a dip net below the dam at Lyon's Mill, one weighing about 14lbs. Jones tells me that he has caught at least one hundred in this place, and that they have been abundant there ever since the big freshet. Yours truly, G. BROWN GOODE." Carp from open waters have become a feature of the fish supply in Washington markets and the demand for them is constantly increasing.

HERE IS SOMETHING NEW about fishermen as truth tellers. A Toledo, Ohio, man was recently stricken with paralysis, and is just beginning to speak again. A reporter, calling on him, was talking about fishing, when reference was made to our "Sunset Club" contributor, Mr. John E. Gunckel, of whom the reporter ventured to remark that he could catch more fish on paper than with rod and line. Thereupon the paralysis-stricken man rallied to the defense of his angling friend and, in a more natural tone than he had yet used since his prostration, retorted, "I'll just bet you $10 that John Gunckel can take you out in his boat, do your baiting, take your fish off the hook, and then catch three fish to your one."

MORTALITY AMONG FISHES.—Another serious epidemic among fishes is reported from Iowa, and, as usual, the cause is not ascertained, although pollution from glucose works is suspected to be at the bottom of the trouble. The destruction from Marshalltown down has been wholesale, and the State Board of Health has begun to investigate the matter. The water has been full of dead fish and the banks and eddies are reeking with them. The Musquakie Indians claim that the water has killed some of their ponies, and other deaths of stock from drinking the river water are reported. The poison must have been in the river water alone, for fish transferred to pure water quickly revived.

MICHIGAN TROUTING.—A correspondent writes that there is capital trout fishing in Elliott's Creek, four miles northeast of Cheboygan. Here William Elliott has expended nearly $5,000 in cleaning out the stream and its branches, in building dams and establishing a hatchery. He owns the stream and having expended money generously in putting the stream in shape and keeping it stocked with fish, charges a nominal fee for the privilege of the stream, but when that has been paid the expense is the least for the quality of the sport of any place in the country.

PENOBSCOT SALMON.—*Editor Forest and Stream:* A gentleman quite recently from the Penobscot reports salmon fishing at Bangor as very poor now and he and some of his friends up there attribute this fact largely to the existence of acid and pulp factories that were started last year above the dam. What a pity that that fine pool cannot be spared.—BIG REEL.

Fisheulture.

RESULTS OF COD HATCHING.

IT is very gratifying to know that the patient and persistent efforts of the U. S. Commission to sustain and improve the supply of commercial fishes are likely to be crowned with success in the case of the cod—the most valuable of the marine fishes of the world—as will appear from the letter given below. When the first attempts were made to hatch the floating eggs of the cod, about a decade ago, it was soon manifest that none of the apparatus then in use would answer for eggs of that kind, and the ingenious members of the Commission set to work to devise something suited to the new requirements. The history of the experiments culminating in the Chester-McDonald box and Jansen's device for preventing the accumulation of air bubbles, will be found in the publications of the Commission, and we will not relate it here. The anglers are profiting by the increase of cod along the shores, and they well know how to appreciate a species which is far superior in flavor to most of the other fishes taken on their hooks. Capt. Martin particularly mentions the color of these fish and identifies them as ocean cod, and not the brilliantly colored, but somewhat insipid, algæ fish or rock cod of the New England shores. We are sure that the captain's claim to speak as an authority in this matter will not be questioned.

U. S. COMMISSION OF FISH AND FISHERIES, Washington, D. C., May 24.—Dr. T. H. Bean, Ichthyologist, U. S. Fish Commission: In a letter which I have just received from Captain S. J. Martin, dated at Gloucester, Mass., May 22,

he makes substantially the following statements regarding the occurrence of young codfish in Gloucester Harbor and vicinity: For some weeks past there has been an abundance of young cod from 7 to 10in. in length in Gloucester Harbor and vicinity. Captain Gill, a well known expert fisherman, states that they are so plentiful on the shore grounds three or four miles from Eastern Point that they cause the hand-line fishermen considerable trouble, as these young fish nibble the bait off the hooks almost as fast as it is put down, sometimes compelling the fishermen to pull up anchor and shift to other localities. Parties who have been fishing for cunners from the rocks at Eastern Point and vicinity have caught as many cod as other fish. Captain Martin had seen nineteen young cod that were thus caught two or three days before he wrote. He says that these were the true ocean codfish, and not the darker colored variety commonly called the rock cod, which are sometimes found near the shores feeding among the algæ. Some boys have also caught young codfish from the pier at Ten Pound Island. It is the general opinion that these young fish are some of those which have been hatched at the Ten Pound Island station.—J. W. COLLINS, Assistant, in charge of Division of Fisheries.

LET HIM LEARN TO READ.—"Livingston Stone, in FOREST AND STREAM, writing about fishculture, makes great gains in the different food fish. He rates shad as weighing 31 pounds each. If Mr. Livingston Stone's other figures are no nearer correct than his estimate of the weight of shad, they are certainly not to be trusted. A 31-pound shad!" So says the Havre de Grace *Republican* of May 24. We should not refer at all to this unwarranted sneer on one of our esteemed correspondents were it not for the pernicious effect which a false statement of this kind may have upon some intelligent people who have no means of detecting the error of the would-be critic of Havre de Grace. The fact is, Mr. Stone rated the shad at three pounds each, and in this journal, as elsewhere, we express this quantity by the symbol 3lbs. If the *Republican* does not know this we give it the information cheerfully and without cost, but we cannot help thinking that it is "certainly not to be trusted" to write English until it learns to read it.

STRIPED BASS IN CALIFORNIA.—Red Bank, N. J., May 20.—In the Fishculture columns of May 16, speaking of striped bass in California, you mention two large bass being taken, weighing 27lbs. and 17lbs. I think these fish are of the plant of 1880, when the fish were shipped from here by Livingston Stone. These fish may have been full of spawn, and I would suggest to the Commissioners that a reward be offered for females in spawn, and that when caught they be returned to the water, and if taken by responsible parties the reward be paid on receipt of a proper affidavit. I would be pleased to receive from the Commissioners a record of the large bass taken during the last five years, their sex and weight, when caught and manner of capture. Having been instrumental in the taking of the plant of 1885, I am interested as to the success.—GEO. H. WILD.

FISHWAY FOR THE CHITTENANGO.—A law enacted by the last Legislature of New York provides for a fishway in the dam across Chittenango Creek, near Bridgeport, in Madison county.

The Kennel.

FIXTURES.

DOG SHOWS.

Sept. 10 to 13.—Sixth Annual Dog Show of the London Kennel Club, at London, Ont. C. A. Stone, Manager.

Sept. 10 to 13.—Dog Show of the Central Canada Exhibition Association, at Ottawa, Can. Capt. R. C. W. MacCuaig, Secretary.

Sept. 11 to 13.—First Annual Dog Show of the Toledo Kennel Club, Toledo, O. T. B. Lee, Secretary.

Feb. 18 to 21, 1890.—Fourteenth Annual Show of the Westminster Kennel Club, New York. James Mortimer, Superintendent.

March 11 to 14, 1890.—Second Annual Dog Show of the Rochester Kennel Club, at Rochester, N. Y. Harry Yates, Secretary.

FIELD TRIALS.

Nov. 4.—Third Annual Field Trials of the Indiana Kennel Club. P. T. Madison, Secretary, Indianapolis, Ind.

Nov. 18.—Eleventh Annual Field Trials of the Eastern Field Trials Club, at High Point, N. C. W. A. Coster, Secretary, Saratoga Springs, N. Y.

Dec. 2.—Inaugural Field Trials of the Central Field Trial Club, at Lexington, N. C. C. H. Odell, Secretary, Mill's Building, New York, N. Y.

Dec. 16.—Second Annual Field Trials of the Southern Field Trial Club, at Amory, Miss. T. M. Brumby, Secretary, Marietta, Ga.

SAN FRANCISCO DOG SHOW.

THE second annual bench show of the Pacific Kennel Club was held on May 22, 23, 24 and 25 in the Mechanic's Pavilion, San Francisco, Cal. The total number of entries amounted to 229. The show was in every way very successful, except, I believe, financially. The Pavilion is one of the best buildings for holding a bench show I have seen, with ample room to accommodate 2,000 dogs. The arrangements were everything that could be wished for, and all the members of the club seemed to work with an interest for the success of the undertaking. It was one of the cleanest dog shows I have ever seen. With reference to the dogs, speaking generally, the sporting dogs were good, while the non-sporting dogs were not up to what we see at English shows. Dandie Dinmonts, Scotch terriers, Irish terriers, bloodhounds, and bulldogs were conspicuous by their absence.

The first class brought into the ring was mastiff dogs. The winner, Dick, is a good upstanding dog with good feet and legs, but is plain in head. Noble, second prize, is small, has a short face, yellow eye and badly carried ears. Third prize went to another dog called Noble, a large dog, but with no mastiff character. There was only one entry in bitches, Actress, a good sized animal with good feet, legs and body. This bitch, if possessed of more wrinkle, would be difficult to beat in any company. In dog puppies first prize, Tim, is a good, promising young dog—short in face, of good size, good feet and legs, wants wrinkle and character; his color of head was deficient. Bitch puppies were a poor lot. Gypsy arrived too late for competition. She is too large in ears, but she is good in head, good in wrinkle and body, and a very typical young bitch. She would certainly have won had she been in time to be shown.

St. Bernards were a very indifferent lot. I only awarded second prize in the open dog class to a very nice coated and colored animal, but of small size. He was a long way the best of anything in the class.

Newfoundlands had only two entries and the prizes were withheld. Second prize was awarded to a moderate young black Newfoundland puppy, Mr. Schule's Nero.

In Great Danes first went to Cæsar, a good blue dog, not so large as some I have seen. Second to Dora, a good medium-sized brindle bitch. Lea, third prize, good in size, body, feet and legs, but too weak in muzzle.

Only one deerhound was brought into the ring, I understand one turned up afterward too late to be shown. Ossean was given second prize, he is a very moderate animal, shown in bad condition and walking very stiff. The first prize puppy Vaughn is a nice puppy wanting in size and bone.

Greyhounds were a good collection and competition was keen. The winner, a black and white perhaps not so good in neck as the second, but much the best in quarters with grand well bent stifles. Second went to a white not so good in stifles but a dog possessing a great deal of quality. Monarch, third, is of the same type and color as the second, but not so fine in neck and shoulders. Benelon II., another white, is a good dog more loaded in shoulders than those placed over him. In bitches Jennie June, a black, is a very level made animal showing quality all through, she would be better if possessed of more bone. Brunette, second, is another black, she pressed the winner very closely. In dog puppies Chronicle, first, is a level true well-proportioned young dog perhaps too light in bone. Examiner, second, is the same stamp as the winner but moved with his elbows turned in. Rake, placed third, is a stronger dog than the winner but not so fine in shoulders. In bitch puppies Menlo Maid, first, is a brindle in good condition. Second went to a black and white very much out of condition.

No English foxhounds were shown. In American foxhounds first went to Roy. He possesses good feet and legs, good long folding ears with good wrinkle; he is a trifle short in face. Nip, second, is a strong, powerful dog, broader in head than the winner, with no wrinkle and ears not so long. In bitches, Echo, a very handsome black and tan with long, lean head, good peak, plenty of leather in her ears, good feet and legs, with the best of long, sloping shoulders, possessing at the same time bone and substance. Kate, second prize, is the same stamp as the winner only not so good in feet and legs. Fleet, third prize, has bad feet and legs, is of small size and out at elbows. Puppies had only one entry, Elsie, a good specimen of the same stamp as the first and second prize bitches.

Pointers were a very good collection, Pat P., lemon and white, has good feet and legs, beautiful neck and shoulders, with good body well ribbed up, but was shown a little out of condition. Professor, second, a liver and white, is a good mover, with good bone and quarters, and is typical, but not quite so good in neck and shoulders as the winner. Dick II. and Rush T. are larger than those placed over them, and do not possess the general quality of the winners. In bitches over 50lbs. first went to Blossom, a lemon and white of good character, with good head and ears, neck, shoulders, feet and legs; in fact, a very handsome animal, perhaps the best pointer in the show. Donna Sensation, second, is another of the same type, not quite so good in head as Blossom, but yet an animal of more than usual quality. Manzanita is a good bitch, but considerably behind the winners. In small dogs first went to a liver and white, Wade Hampton. He has a good head, is full of character and is good in feet and legs. He might be better ribbed up and is rather leggy. Matchless and Climax, both small liver and white dogs, are good in body but short in head, the latter being rather dark in color of nose for a lemon and white. Patti Croxteth T., the winner in the next class, a very typical liver and white, with good head, feet and legs, and with plenty of bone, might be better in shoulders. Cora and Wanda, both liver and white, are not so good in bone as the winner. Ponto, the winning dog puppy, is a level-made, well-matured puppy. Rob T. and Tennis are good liver and whites, and both likely to furnish into dogs of considerable merit, and will no doubt render a good account of themselves next year. In bitch puppies, Manzanita, first, won third in open bitches. She wants character in head, but possesses good feet, legs and body. Donna Blanca is leggy, rather light in bone and carries her tail too high.

In English setter dogs the winner, Rover H., is a grand, level-made dog with good feet and legs, well ribbed up, and his head is good and typical; he might be better in tail. Bruiser and Rector are both good typical dogs; shown thin, owing to which they appeared flat-sided and deficient in body beside the winner. In bitches Florine, the winner, is a very handsome animal; I would prefer her a size larger. She is a very truly formed animal and possesses quality and moves well. Beezy is a long way behind the winner. Ophelia is a strong, typical animal with a bad carriage of tail. The winning puppies, Peerless and Gypsy Queen, possessed considerable quality, but are rather light in bone and short of feather.

In Irish setter dogs first went to Mike T., a good strong-bodied dog, good in coat, full dark enough in color and plain in head. Sport and Grouse are fine upstanding dogs, but leggy and light in bone compared with the winner. In bitches Lady Elcho T., the winner, is a large fine bitch, possessing quality all through, good color and coat. Taken altogether she is an animal fit for any company. She won the special for the best setter in the show, being closely pressed by the English setter bitch Florine. Lena I., second prize winner, is a fair animal, a long way behind the winner. In dog puppies Dash T., the winner, is a good dog, but coarse. There was nothing striking in bitch puppies.

Black and tan setters were poor. Second prize went to Dorr, the remains of a good type of Gordon setter. The Irish water spaniel bitch Nora P. won first with no opposition. A good specimen not in the best of coat.

In cocker dogs first went to Giffie, a nice little black with a wavy coat and tail too high. Woodstock Belle is a nice typical cocker bitch, better in coat and tail than the winner in the dog class. In cocker puppies the winner Budge is a moderate liver, and likely to be oversized and leggy.

Retrievers and collies were very indifferent.

In beagles Bannerman, Jr., looks old and worn. He is hollow behind the shoulder, and a bad mover. Daisy II. is a nice little bitch of correct type; perhaps, just leggy enough.

No bulldogs were shown, and the bull-terriers were a very poor collection; none possessed any merit for the show bench.

The fox-terrier dog Tromp, placed first, is a very good specimen; good feet and legs, good style and good coat, a little full in eye. Second prize, Regent Jock, is a wonderfully compact, well made dog, too long and soft in coat. Schneider, third prize, is also a good stamp, full in eye, dropped below eye and light in bone. Golden Gem, first in bitches, is above ordinary merit and fit for keen competition.

Black and tan terriers were a very indifferent lot. Only one Airedale was shown, Mr. Kingsley's Nip, a very good specimen fit to be shown successfully in any company. Skyes were poor, and the same remark applies to pugs, Yorkshires, poodles and the remaining classes.

WM. GRAHAM.

Mr. Graham judged all classes. Below is a list of the

AWARDS.

MASTIFFS.—*Dogs:* 1st, R. Scott's Dick; 2d, J. Stutz's Noble; 3d, C. B. Polhemus's Noble. *Bitches:* 1st, Mrs. E. F. Preston's Actress. —PUPPIES—*Dogs:* 1st, F. Smith's Capt. Sennett. *Bitches:* 1st, withheld; 2d, C. B. Polhemus's Flora; 3d, Jas. E. Watson's Nellie.

ST. BERNARDS.—ROUGH-COATED—*Dogs:* 1st and 3d, withheld; 2d, A. W. Manning's Judge. *Bitches:* Withheld.—SMOOTH-COATED —No entries.

NEWFOUNDLANDS.—*Dogs:* Withheld. *Bitches:* No entries. *Puppies:* 1st, withheld; 2d, F. A. Schule's Nero.

GREAT DANES.—1st, 2d and 3d, P. W. Nahl's Cæsar, Dora and Lea. *Puppies:* 1st, Mrs. Annie J. Nahl's Leda.

DEERHOUNDS.—*Dogs:* 1st, withheld; 2d, B. Wertheimer's Ossean. *Puppies:* 1st, C. H. Jouett's Vaughn.

GREYHOUNDS.—*Dogs:* 1st, J. E. Watson's Saturday Night; 2d, T. J. Cronin's Snow Ball; 3d and very high com., J. F. Carroll's Monarch and Benelon II. *Bitches:* 1st, J. F. Carroll's Jennie June; 2d, J. E. Watson's Brunette; 3d, C. Auerbach's Uno.—PUPPIES—*Dogs:* 1st and 2d, P. F. Canavan's Chronicle and Examiner; 3d, J. F. Carroll's Rake. Very high com., E. O'Connell's Tralee Boy. *Bitches:* 1st, M. B. McGowan's Menlo Maid; 2d, E. O'Connell's Maud S.

FOXHOUNDS.—ENGLISH—No entries. *Puppies:* Withheld.—AMERICAN—*Dogs:* 1st, F. V. Savage's Roy; 2d, R. E. Wilson's Nip; 3d, J. Zammitt's Music. Very high com., A. L. Maass's Manco. *Bitches:* 1st, J. T. McCarthy's Elcho; 2d, C. Roos's Kate; 3d, J. E. Lucas's Fleet. *Puppies:* 1st, W. S. Kittle's Elsie.

POINTERS.—LARGE—*Dogs:* 1st, B. F. Naphthaly's Pat P.; 2d, C. M. Osborn's Professor; 3d, C. A. Haight's Dick H. Reserve, A. B. Truman's Rush T. High com., T. J. Pinder's Scout Croxteth. Com., H. H. Briggs's Laddie. *Bitches:* 1st, G. W. Bassford's Blossom; 2d and 3d, H. R. Brown's Donna Sensation and Manzanita. High com., Mrs. F. H. Fancher's Queen Bess.—SMALL—*Dogs:* 1st, B. Power's Wade Hampton; 2d, H. Spencer's Matchless; 3d, E. W. Briggs's Climax. *Bitches:* 1st, A. B. Truman's Patti Croxteth T.; 2d, G. P. Polhemus's Cora; 3d, G. H. T. Jackson's Wanda. Reserve, G. W. G. Canavan's Lady Emma; wire-haired fox-terrier, J. E. Watson's Antrim; black cocker spaniel dog, Giffie; large black and tan terrier dog, Dandy Jim.

MR. ANTHONY'S CHARGES AGAINST THE AMERICAN FIELD TRIAL CLUB.—Cincinnati, O., June 1.—*Editor Forest and Stream:* I hand you herewith copy of letter addressed to the secretary of the A. K. C. which will explain itself.—W. B. SHATTUC, Pres. A. F. T. Club. Cincinnati, O., May 27.—A. P. Vredenburgh, Esq., Secretary American Kennel Club, 44 and 46 Broadway, New York. Dear Sir; I have the honor to acknowledge receipt of your favor of the 25th inst., advising me that at the regular quarterly meeting of the executive committee of the A. K. C., J. L. Anthony asked for the disqualification of myself and others for reasons stated, and I also note the resolution of the Hon. John S. Wise. I beg to inclose you herewith correspondence between Anthony and myself on this subject, which fully explains the matter. The American Field Trial Club has not yet acted on the matter and until it does I am unable to advise your club what its decision may be. Anthony would make it appear that the American Field Trial Club had declined to pay the prize. He knows such to be false. A check for the amount he claims was offered him and he declined to take it and said he never would take any money from the club and he has so since stated to others. Anthony has changed his mind and now wants the money. His wishes will be made known to the club at its next meeting and Anthony will be advised of its decision. You will note that the club is not at fault at all. Had Anthony's requests been declined, his actions in making charges to your club might have been excused (though he knows very well he relieved the club from payment), but in view of the fact that the club had not considered his request, his actions in making the charges he has are infamous. I shall be glad to give you and your club any further information concerning this matter. Yours truly, W. B. SHATTUC, President American Field Trial Club.

EASTERN FIELD TRIALS CLUB DERBY.—*Editor Forest and Stream:* I send you an additional entry for the E. F. T. C. Derby that was mailed April 29, but only reached me May 26.—W. A. COSTER, Secretary.

BEPPO IV. (E. L. Mayer, Norfolk, Va.), liver and white pointer dog, April 2, 1888 (Beppo III.—Lass of Bow),

SALISBURY'S PEDIGREE.

I THINK I have waited long enough for an answer to my challenge to show anything wrong in the above pedigree, and now comes the live question, Who was it that put the English correspondent, Mr. W. Huscroft, up to this piece of rascality? This has a present and permanent interest, for none but a rascal or somebody criminally negligent could have "stuffed" a novice with such a yarn, evidently with the intention of having it published. Here are the facts: The pedigree of sire and dam is given, "By Monarch ex Duchess. Monarch by Dickenson's Lion ex Empress; Duchess by Victor ex Beldam (sister to champion Turk)," etc. Dickenson's Lion was then owned in Halifax, Mr. Robt. Exley, of Bradford, owned Victor, Mr. F. Heinzman (then of Leeds) owned Beldam and also bred the Victor—Beldam litter. Mr. J. Anderton, of Bingley, owned one of the litter, Tiger, 2,442. Victor was then the crack stud dog of the North, as his owner writes: "He was getting more bitches than all other stud dogs in the north of England."

Now, strictly for the sake of the argument, let us suppose that Mr. Carr was anything that may be imagined, would anybody with a grain of sense stick the names of the prominent dogs of his district right in the beginning of a pedigree he was forging? Would he not have selected dogs from a distance to lessen the chances of detection? Furthermore, Messrs. Exley, Dickenson, Heinzman and Swithenbank were masters of mastiff pedigrees, and knew every dog of note in their neighborhood. Mr. Heinzman was particularly careful as to pedigrees, being more minute as to trifles than even Mr. Wynn. Mr. Anderton owned the brother of Duchess.

Exact on the merest trifles, would not some of these gentlemen have picked up such a fraud? Would Mr. Exley have bred his choicest bitch, Venus, dam of Bosco, to Salisbury if there had been a doubt of his pedigree? Would Mr. Swithenbank have submitted to having that crack, Bosco, beaten by Salisbury had there been a suspicion of the pedigree? Would Mr. Portier have pointed out the value of Salisbury's blood as a source of size and vigor if the pedigree had been suspicious?

Do not all these things "authenticate" the pedigree?

Now, Mr. Huscroft has put himself in a most unenviable position. A beginner as a public writer, he signalizes his off-start by being made a tool of by somebody to ventilate a base insinuation, and one that the promoter either must have known was a lie, or could have so ascertained by the most trifling investigation. The correspondent's having made a mistake is no serious matter; we are all liable to that; but the serious part is that he admits he derived his "information" from what he considered a trustworthy source; and I assert that facts, as I give them, clearly demonstrate either that his "source" was criminally negligent or viciously untruthful. No man has a moral right to make such charges public until he has used reasonable care to see whether they are approximately true. While I do not wish to set up as an example for anybody, I can say that I could have made such charges four years since, when I was bitterly hostile to Mr. Mason, but it stared me in the face that I would be doing it on very insufficient grounds. I am not fighting Mr. Mason's fight; he is able to take care of himself, and in this matter he needs no defense; but it *is* a matter of concern to all of us to know who the cowardly assassin was that did this dirty trick, and it is worth while to point out to Mr. Huscroft that his personal innocence of wrong intent will not save him from a share of the blame as long as he conceals the identity of the guilty source of this unclean stream. Again I say that it is the duty of everybody in doggy affairs to press the hunt for the author of any such public shame as the publication of this cowardly lie, that the paths of such offenders may be made so thorny that future adventurers may be warned off.—*W. Wade, in the Stock-Keeper.*

CENTRAL FIELD TRIAL CLUB DERBY ENTRIES.

NEW YORK, June 1.—*Editor Forest and Stream.* The total number of Derby nominations received by our club was 131, 37 of which we were compelled to refuse, owing to irregularities. Our club has been so fortunate as to secure the services of Mr. N. Wallace, of Farmington, Conn., for judge, to take the place of Mr. J. M. Tracy, who will be unable to attend the trials this year.

As a number of your readers appear not to have seen the list of our judges as previously published, we take the liberty of again announcing the complete list as follows: The Pointer Derby and All-Aged Setter Stake will be judged by Mr. John Davidson, Mr. William Tallman and Col. Arthur Merriman. The Setter Derby and All-Aged Setter Stake, deciding heat between winner of Pointer Derby and winner of Setter Derby; also deciding heat between winner of All-Aged Pointer Stake and All-Aged Setter Stake will be judged by Mr. John Davidson, Mr. William Tallman, and Mr. N. Wallace. C. H. ODELL, Sec. and Treas.

Following is a list of the nominations, 94 in all, 52 pointers and 42 setters. All were whelped in 1888:

POINTERS.

A. C. (Bang Bang—Lalla Rookh), C. H. Odell.
B. D. (Bang Bang—Lalla Rookh), C. H. Odell.
BRYN MAWR MONA (Bang—Vandalia), Bryn Mawr Kennels.
BUCK (Naso of Kippen—Virginia), Lebanon Kennels.
CARLGROVE (Lon—Neno), W. B. Meares, Jr.
CHARLOTTE CORDAY (Bang—Vandalia), Bryn Mawr Kennels.
CONCAVE (Consolation—Graceful), Luke W. White.
CONTRAST (Consolation—Graceful), Luke W. White.
CONVEX (Consolation—Graceful), Luke W. White.
CYCLONE (Shot—Virginia), W. C. Lindsay.
DEXTER II. (Dexter—Volunteer), E. H. Haight.
DUKE OF TAMMANY (Tammany—Juno), S. S. Banks.
FANCY FREE (Donald—Lady Bow). W. Hoyt.
F. F. V. (Flockfinder—Ion), J. R. Purcell.
FLIRT (Mainspring—Merry Legs), O. W. Donner.
GEM OF KIPPEN (Kent Cob—Magpie), F. R. Hitchcock.
GRAPHIC'S CLIP (Graphic—Lass), J. R. Daniels.
GRAPHIC'S TOPIC (Graphic—Lass), J. R. Daniels.
GROUSE (Tammany—Jennie), Adolph Dill.
HEINEKEN (Flockfinder—Ion), J. R. Purcell.
HOCKANUM (Match—Lill), R. C. Cornell.
JOLLY GIRL (Donald—Underhill's Jane), Chas. Heath.
JOY, JR. (Flockfinder—Ion), W. B. Meares, Jr.
KIPPENCLIFF (Naso of Kippen—Virginia), Lebanon Kennels.
KIPPENDALE (Naso of Kippen—Virginia), Lebanon Kennels.
KIPPENLEL (Naso of Kippen—Virginia), Lebanon Kennels.
LAD OF BANG (Lad of Bow—Lady Belle), J. B. Wallace.
LADY HESSEN (Duke of Hessen—Lemon), Thos. Bond.
LADY TAMMANY (Tammany—Juno), F. E. Lewis.
LEBANON LASS (Lebanon—Virginia), Lebanon Kennels.
LEBANON LADY (Lebanon—Virginia), Lebanon Kennels.
MAMIE BANG (Devonshire Sam—Nellie Bang), W. H. Hyland.
MAY (Mainspring—Fly), J. P. Swain, Jr.
MET (Lumbryer's Phil—Tell), Cashman & Meeker.
MIKE (Mainspring—Fly), J. P. Swain, Jr.
MISS MEALLY (Graphic—Meally), H. P. Dortch.
MOONSHINE (King of Kent—Hops), Chas. Heath.
NASO PESHALL (Nick of Naso—Jipsy P.), Wm. Hepsley.
NAT H. (Springbok—Jennie), J. M. Hawley.
NYE (Naso of Kippen—Virginia), Lebanon Kennels.
RIP RAP (King of Kent—Hops), Edward Dexter.
ROMOLA (Graphic—Meally), Chas. Heath.
SALLY P. (Graphic—Meally), Chas. Heath.
SAMOA (Randolph's Guy—Rita Croxteth), N. W. Lumpkin.
SCOUT (Dexter—Volunteer), E. H. Haight.
SING SING (King of Kent—Hops), Edward Dexter.
SNOWFLAKE (Tammany—Juno), Miss H. Wooster.
SUSIE S. (Ajax—Warwick Rose), W. R. Stinett.
TORY TANNER (Naso of Kippen—Kate VIII.), F. R. Hitchcock.
TOUGH NUT (Consolation—Grace), C. H. Odell.
UNDERWRITER (Tammany—Juno), S. S. Banks.
UNNAMED (Mainspring—Fly), J. P. Swain, Jr.

ENGLISH SETTERS.

ALBERTA (Royal Albert—Diana), Lebanon Kennels.
ALICE (Cassio—Allie James), P. Lorillard, Jr.
AMORET (Cassio—Allie James), P. Lorillard, Jr.
ANNIE F. (Roderigo—Juno A.), Memphis and Avent Kennels.
ARMADA (Roger—Chintz), E. W. Durkee.
BELMORE (Regent—Belle of Bridgeport), John White.
BESSIE M. (Count Noble—Fate Gladstone), C. E. Metzger.
BLUE RIDGE (Count Noble—Belle of Piedmont), E. Dexter.
BRAXTON BRAGG (Roderigo—Lufra), N. B. Nesbitt.
BUCK N. (Count Noble—M'liss C.), G. W. Ewing.
COUNTESS RUSH (Count Noble—Belle of Piedmont), R. V. Fox.
COUNT V. (King Noble—Queen Vashti), J. I. Case, Jr.
DEE (King Noble—Elsie Belton), J. I. Case, Jr.
DASHING CAMBRIDGE (Dad Wilson—Dolly S.), C. P. Ranney.
DENVER (Bridgeport—Miss Elsie), E. F. Thomas.
DRACO'S MARK (Roderigo—Princess Draco), B. Crane.
ERIE (Jean Val Jean—Shuna Van), N. B. Nesbitt.
HARRY C. (Roderigo—Countess House), Memphis & Avent Kennels.
JOLLY GATH (Young Gath—Jolly Flirt), C. P. Ranney.
KATE MILLER (Roderigo—Lufra), N. B. Nesbitt.
KING LEO'S LAD (King Leo—Flossie Gladstone), E. F. Thomas.
LADY JEAN (Jean Val Jean—Shuna Van), N. B. Nesbitt.
LADY KATHERINE (Roger—Chintz), E. W. Durkee.
LATH (Cassio—Allie James), F. R. Hitchcock.
LETTY LYNN (Roderigo—Countess House), Memphis & Avent Kennels.
LILLY BURGESS (Gath's Mark—Esther), G. N. Whitely.
MARQUIS N. (King Noble—M'liss C.), G. W. Ewing.
MONTICELLO (Count Noble—Belle of Piedmont), E. Dexter.
NANNIE B. (King Noble—Queen Vashti), J. I. Case, Jr.

ZULU (King Noble—Nellie Belton), J. I. Case, Jr.

IRISH SETTERS.

GARRYOWEN (Avondale—Dora), G. H. Covert.

DOG TALK.

ASSOCIATIONS intending to hold dog shows should make early announcement of dates in our column of fixtures. In almost every instance where a show is to be held it is possible to give notice of the date in advance and thus practically secure a claim for the week desired that will be respected by other associations. New York and Rochester have already announced the dates of their shows for the spring of 1890, and other organizations would do well to follow their example.

The well known greyhound bitch champion Lancashire Witch died suddenly May 25, from rupture of the aorta. She was imported in 1887 from England where she had done a lot of winning at some of the most important shows and in the best of company. In this country she was also a noted winner, and had no less than 45 prizes to her credit in all. She was owned by Mrs. Sarah Leggett Emory, of this city, who writes of her, "All who have known her will concede that she was a rare creature, of fine intelligence, superb strength and courage and of a disposition that was invariably gentle and obedient, but the many prizes that she has won in England and the United States will testify more forcibly to her worth than any words of praise that I can utter. Her sudden taking off has caused me sincere sorrow."

Dr. M. H. Cryer has placed all of his stud pugs in the hands of the Associated Fanciers, 237 South Eighth street, Philadelphia.

There is considerable talk of a dog show at Cleveland, O., next fall.

MASSACHUSETTS KENNEL CLUB.—*Editor Forest and Stream:* At the annual meeting of the Massachusetts Kennel Club, Lynn, Mass., held May 6, the following officers were elected for the current year: President, H. Y. Emery: Vice-Presidents, C. S. Hilton and A. J. Hoitt; Secretary, D. A. Williams; Treasurer, Chas. H. Williams. Executive committee, H. Y. Emery, Benjamin Phillips, W. H. Beede, F. A. Frazier and W. H. Walton. Membership committee, D. A. Williams, W. H. Beede and H. A. Marks. Finance committee, W. B. Phinney, G. P. Berry and H. F. Caswell. Delegate to A. K. C., R. Leslie. Veterinary, Warren H. Beede.—D. A. WILLIAMS, Sec'y.

KENNEL NOTES.

Notes must be sent on prepared blanks, which are furnished free on receipt of stamped and addressed envelope of large letter size. Sets of 200 or any one form, bound for retaining duplicates, are sent for 30 cents.

Starlight—Hinks. F. F. Dole's (New Haven, Conn.) bull-terrier bitch Starlight (champion Grand Duke—champion Maggie May) to his Hinks (White Fawn—Duchess III.), May 20.

White Daisie—Hinks. F. F. Dole's (New Haven, Conn.) bull-terrier bitch White Daisie (Bendigo—Rose) to his Hinks (White Fawn—Duchess III.), May 26.

WHELPS.

☞ **Notes must be sent on the Prepared Blanks.**

Skippy. Geo. W. Proctor's (West Gloucester, Mass.) beagle bitch Skippy (Riot—Skip), March 8, five (two dogs), by his Tony (imported Ringwood—Schellhass's Trinket).

Spangle. Geo. W. Proctor's (West Gloucester, Mass.) beagle bitch Spangle (Spottie—Nina), March 24, six (two dogs), by his Tony (imported Ringwood—Schellhass's Trinket).

Uno. G. W. Proctor's (West Gloucester, Mass.) beagle bitch Uno (Little Ned—Spangle), May 6, eight (four dogs), by his Tony (imported Ringwood—Schellhass's Trinket).

Dick's Darling. D. C. Luce's (Great Bend, Kan.) greyhound bitch Dick's Darling, May 14, five (four dogs), by imported Trales.

Say. Fleet View & Reading Pointer Kennels' (Lynn, Mass.) pointer bitch Say (Bang—Belle Rita), May 30, seven (five dogs), by C. Heath's champion Graphic.

Polka. Toledo Kennel Club's (Toledo, O.) pointer bitch Polka (Bang Bang—Countess), April 13, five (two dogs), by Westminster Kennel Club's Naso of Kippen.

Rosa II. Col. R. J. Hamilton's (Springfield, Mass.) pug bitch Rosa II. (Dot—Rosa), June 1, five (four dogs), by his Toodles (Dot—Judy).

Lady Thora. Eberhart Pug Kennels' (Cincinnati, O.) pug bitch Lady Thora (Santa Claus—Almah), May 23, eight (seven dogs), by A. E. Pitts's Kash (Bradford Ruby—Lady Cloudy).

Maud. C. Kammerer (South Boston, Mass.) St. Bernard bitch Maud (Hector—Bernie VI.), Dec. 19, seven (six dogs), by Weiner & Lincoln's Gruss Bayard (Bayard III.—Cadess).

Hilda. T. N. Vail's (West Roxbury, Mass.) St. Bernard bitch Hilda, May 12, ten (eight dogs), by Weiner & Lincoln's Gruss Bayard (Bayard III.—Cadess).

Abbess. Wm. Housman's (Boston, Mass.) St. Bernard bitch Abbess (Guard—Josephine), May 31, fourteen (seven dogs), by Weiner & Lincoln's Gruss Bayard (Bayard III.—Cadess).

SALES.

☞ **Notes must be sent on the Prepared Blanks.**

Toney. Black, white and tan beagle bitch, age not given, by Riot out of Skip, by H. L. Hayden, Plymouth, Mass., to Geo. W. Proctor, West Gloucester, Mass.

Little Dandy. Fawn pug dog, whelped Nov. 14, 1888, by Toodles out of Rosa, by Col. R. J. Hamilton, Springfield, Mass., to Mrs. Wm. H. Brooks, Holyoke, Mass.

Yale. Fawn pug dog, whelped March 13, 1887, pedigree not given, by Col. R. J. Hamilton, Springfield, Mass., to Mrs. Thos. Park, Cheshire, Conn.

Pride of the Plains—Minka whelp. Orange belton English setter bitch, whelped Dec. 30, 1888, by Jas. K. Boyd, Hempstead, L. I., to R. B. Hamel, Bellport, L. I.

Pride of the Plains—Minka whelps. White and black ticked English setter dog and orange belton bitch, whelped Dec. 30, 1888, by Alfred B. Forsyth, Morristown, N. J., to Jas. K. Boyd, Hempstead, L. I.

Pebble. Blue belton Laverack setter bitch, whelped December, 1881, by Count Noser out of Maple, by Warwick Kennels, Bridgeport, Conn., to A. R. Cornell, Dorchester, Mass.

Czar. White bull-terrier dog, whelped January, 1889, by Grabber out of Nell, by W. J. Henry, Jersey City, N. J., to A. F. Kelly, New York.

DEATHS.

Donald. Blue Skye terrier dog, whelped May, 1885 (champion Jim—Queen Mab), owned by L. Timpson, Red Hook, N. Y.

Lancashire Witch. Fawn and white greyhound bitch, whelped January, 1881 (Dresden China—Colleen Bawn), owned by Mrs. Sarah Leggett Emory, New York, May 25, from rupture of an artery.

KENNEL MANAGEMENT.

☞ **No Notice Taken of Anonymous Correspondents.**

O. R. S., Rockland, Mass.—I have a female hound pup about 8 mos., and weighing 35-40lbs., that is sick with what I call dog ail. The first I noticed of it she couldn't use her hindlegs well and drooled at the mouth, and had spells of half a minute or so when she would roll on the ground and kick; seemed like a fit. For about ten days she didn't get up, and had at any appetite, the next ten days she has been at a standstill. She has a good appetite, but if she starts to turn round quickly or run fast she tumbles over. The trouble is in her hind parts, and she has been in this condition for about a week. What had I better do for her and what are the chances for her recovery? Ans. A sequel to distemper. Give 5 grains quinine in pill form night and morning. Give 10 drops tincture of nux vomica in a little water in the middle of the day. Gentle friction with some stimulating liniment morning and evening over the hind parts and legs. Electricity would benefit.

"Sam Lovel's Camps; Uncle Lisha's Friends Under Bark and Canvas." The present collection of sketches has the same entertaining qualities, and carries most of the odd characters of its predecessor into interesting fishing and camping excursions on river and lake. As before, also, the Vermont and French Canadian dialects are faithfully—though sometimes a trifle too minutely—reproduced. There is a decidedly wholesome, outdoor air, and a kindly, hearty fun about these tales, which makes them eminently entertaining reading.—*The Teacher and Examiner.*

FOREST AND STREAM.

SUPPLEMENT NO. 4——TRAP TOURNAMENTS.

THE TRAP.

Scores for publication should be made out on the printed blanks prepared by the Forest and Stream, and furnished gratis to club secretaries. Correspondents who favor us with club scores are particularly requested to write on one side of the paper only.

Secretaries of clubs and managers of tournaments are requested to keep us advised of the dates of their shoots, so that we may give due notice in our column of fixtures.

FIXTURES.

June 6, 7 8.—Southern Illinois Sportsmen's Association's ninth annual tournament, Belleville, Ill.

June 10, 11, 12, 13, 14.—First tournament of the American Shooting Association, at Cincinnati, O.

June 12, 13.—Springfield (Mass.) Gun Club. M. W. Bull, Sec'y.

June 17, 18, 19.—Tournament of the Sportsmen's Association of the Northwest, Tacoma, W. T. A. W. McNaughton, Secretary.

June 17 and 18.—Tournament of the Massachusetts State Shooting Association, on Jamaica Plain Gun Club Grounds, Clarendon Hills, Mass.

June 18, 19, 20, 21.—Illinois State Sportsmen's Association's tournament, Grand Crossing, Ill.

Aug. 13, 14, 15 —Second Tournament of the American Shooting Association, Boston, Mass.

Aug. 20, 21, 22, 23.—Second annual tournament of the Keystone Manufacturing Co., of Corry, Pa. Traps will be pulled by a new electric apparatus.

Sept. 17, 18, 19, 20.—Central Illinois Sportsmen's Association's eleventh annual tournament, Jerseyville, Ill.

Oct. 8, 9, 10.—Middlesex Gun Club Tournament, Dunellen, N. J. W. F. Force, Secretary, Plainfield, N. J.

COMPTON HILL.

ST. LOUIS, Mo., May 23.—The Compton Hill Gun Club's tournament was a grand success, with a good attendance of strangers and local shooters. Keystone targets and the popular walk-around rule for all shooting. The weather, with the exception of the opening day, was favorable.

UNSER FRITZ.

MISSOURI STATE TOURNAMENT.

KANSAS CITY, Mo., June 1.—The twelfth annual tournament of the Missouri Fish and Game Protective Association was held on May 27, 28, 29, 30, 31 and June 1, in this city, at the Exposition Base Ball Park. Barring Tuesday, on which it rained very hard the greater part of the day, the boys were favored by the weather. Live birds were used principally, and they were, with few exceptions, a really fine lot. Matters dragged somewhat in the forepart of the shoot, but finally the managers awoke to a realization of the fact that to handle a lot of shooting cranks driving was necessary, and they proceeded to put their suddenly-acquired knowledge into practice. For all live-bird shooting five traps were used, and all had to be filled before a person was allowed to shoot. A trap-pulling indicator was used, and a person shot at five birds before leaving the score.

A boundary somewhat similar to the one prescribed by the rules of the American Shooting Association was in force, but 60 instead of 80yds. This caused many birds to be scored lost which would otherwise have been scored dead. Considerable kicking was indulged by the sportsmen present regarding two of the rules. One was to score lost bird if shot on the ground with first barrel and the other was compelling the butt of the gun to be held below the armpit until the bird is on the wing. Many birds that were killed were scored lost because in the judgment of the referee or judge the gun was not properly held.

One year from now the tournament will be held in Cameron, Mo., and the officers for the coming year are as follows: P. D. Watson, of Cameron, President; Paul Frank, of St. Joseph, Vice-President; C. W. Schnieder, of Cameron, Corresponding Secretary; J. R. Parks, of Cameron, Treasurer. Board of Directors: J. E. Riley, of Kansas City, W. Q. Dallmeyer, of Jefferson City, J. C. Bates, of Palmyra, and J. G. Parrish, of St. Louis.

Mr. A. J. Meade of this city acted as referee during the entire meeting and Mr. James Whitfield as scorer. The scores in detail are as follows:

May 27.

Shoot No. 1, open to the world, 10 birds, 26yds., use of both barrels, ties at 3 birds, 30yds, entrance $5 including birds, $75 cash added:

Ties on 10 agreed to divide the purse at the next shoot, to be held at Cameron. The shoot-off for possession of medal resulted as follows. The tie was shot at 15 birds, miss and out and wait: J. G. Schaff 5, J. Batchellor 8, G. Mock 0, Kentuck 12, W. Anderson 12, J. H. McGee 14.

Ties on 9 for $50, donated by W. M. Anderson, 3 birds, miss and out and wait: Bingham 1, Dallmeyer 2, Elliott 1, J. Smith, Mensing and Irwin 9 each and divided.

Ties on 8 for a Colt's hammerless shotgun: Riley and Savage 6 each and divided, C. Holmes 5, F. G. Smith 3, Robinson 3, Mumma 2, Akhurst 3, Rieger 1, D. Underwood 2, McDonald 2, Hickman 2, Hagerty 2, Anderson 0, R. J. Holmes not present when called.

Ties on 7 for an Ithaca shotgun; Vories 12, Hayson 11, Hill 7, Thomas 5, Franke 4, Clark 3, Borden 2, Waggoner 0, Combe 1, Puck 1, Scott 1.

Ties on 6 for a Winchester repeating shotgun: Lockridge 6, Halliwell 5, Watson 4, Bombeck 2, Owen 2, C. Guinotte 1, Porter 1, W. Q. Dallmeyer 1, Boyd 1, Longsdale 0.

Ties on 5 for a corduroy hunting suit: Staiger 41, Atkinson 39, Yeoman 7.

Shoot No. 9, 10 Peoria blackbirds, entrance $2: Batchellor 7, Tracey 8, Kelly 7, Hespos 8, Tommy 10, Moore 6, N. Kelly 8, Chouteau 9, Foley 9, Lone Jack 8, Long 8, Eichoff 6, Hampton 9, Rickner 8, Beck 7, Evringham 8, J. Guinotte 4, Marshall 5, E. Argo 9, Merrill 7, Scott 8, Callahan 7, Hudson 7, St. Cloud 9, Allison 5, Hayson 9, F. Smith 8, Hinze 7, Kaller 8, Dukeman 3, Scoville 0, Younge 8, Holly 4, Mensing 10, Knay 6, Stice 10, Crabill 8, Hagerty 7, Budd 9, Parks 8, McGougan 6, J. Underwood 7, Porter 6, West 7, Karl 7, Head 7, Thomas 8. Ties on 10 divided first, ties on 9 divided second, Younge and Crabill third, West fourth.

Shoot No. 10, 10 Peoria blackbirds, entrance $2; Alderson 8, Holmes 5, Coover 6, Crabill 10, S. Hill 8, Kaller 8, Beck 8, Coley 9, Chouteau 9, Tommy 10, Stice 9, Hespos 8, Eichoff 8, Long 8, Crabill 6, Karl 6, Moore 5, Dukeman 10, Hampton 6, Hayson 9, Greneger 9, Younge 8, Orange 7, Riley 9, Holly 8, Argo 7, Lone Jack 10, St. Cloud 10, Elliott 8, Scott 6, Hudson 8, Marshall 3, Budd 9, Rickner 8, Head 7, Hinze 8, Mensing 10, Hagerty 8, J. Anderson 10. Tommy, Dukeman and Anderson first; Chouteau, Grencger and Budd second, Holly and Rickner third; Argo fourth.

Shoot No. 11, 10 Peoria blackbirds, entrance $2: Stice 10, Crabill 9, Dallmeyer 9, Hagerty 7, C. Guinotte 8, Waggoner 5, Budd 10, Lone Jack 8, St. Cloud 10, Hespos 8, Younge 4, Eickoff 4, Holly 8, Mensing 8, Long 9, Tommie 9, West 9, Beck 9, Cosby 9, Chouteau 10, Rickner 9, Santa Claus 7, Riley 7, Evringham 8, Scott 10, F. Smith 8, Self 6, Wasson 7, Deuser 8, Doak 7.

Friday, May 31.

Shoot No. 12, open to the world, 6 single live birds at 26yds., one barrel, and 2 pair live birds at 21yds. rise: ties, 2 singles at 30yds., one barrel, and 1 pair at 24yds.; entrance $7.50, including birds; $75 added:

Ties on 8 and 7 divided first and second respectively, Watson and Anderson third, Reeves and Smith fourth.

No. 18, open to members of the State Association only, $150 donated by the Kansas City and Independence (Mo.) gun clubs, 10 birds, 30yds., entrance $2.50, the price of birds only: Wiggans 6, Kentuck 10, F. J. Smith 6, Ed. Bingham 10, Hickman 8, Reeves 7, Caldwell 6, Parks 9, Kinmouth 7, J. S. DeLong 4, C. Guinotte 8, Mumma 6, W. T. James 9, J. Guinotte 8, C. F. Holmes 1, Mensing 8, Robinson 7, Riley 8, Hudson 3, Thomas 9, Watson 7, Schneider 7, Porter 7, Halliwell 4, Scott 9, West 4, Savage 8, Elliott 9, L. Porter 7, Deuser 9, Mock 6, C. Koller 5, Baehr 9, D. Underwood 6, Chouteau 9, Orr 5, Longstadt 5, Franke 8, Bombeck 5, Frescher 7, J. Anderson 8, W. Anderson 8, Rieger 8, Millett 7, E. Bingham 7, W. Stem 5, Yeoman 5, Johnson 6, S. Underwood 6, R. Proctor 8, M. Courtney 5, W. Peters 5, McGee 8, McEvans 1, Francis 4, Bassett 4, J. Underwood 9, B. Holmes 6, Knarf 7, Owens 5, Cogswell 5, Van Brent 7, Western 5. Four moneys and all ties were divided.

Shoot No. 19, open to the world, 10 live birds, 30yds., use of both barrels, ties at 3 birds, 30yds., entrance $7.50, including birds, with $50 added: Knocher 5, C. Guinotte 9, S. Porter 7, Rieger 7, J. Anderson 9, W. Anderson 8, F. Smith 6, Deuser 6, Baehr 6, R. Holmes 5, Riley 10, Halliwell 3, Wasson 10, C. Holmes 7, Murphy 6, D. Underwood 6, Orr 8, Kentuck 7, Dock 5, Thomas 6, Elliott 7, J. Underwood 6, Ed. Bingham 9, Reeves 6, J. E. Guinotte 8, Robinson 9, Scott 6, James 8, Peters 3 Chouteau 6, Hickman 4, Kinmouth 9, McGee 8, Wiggins 9, Baehr 7. West 6, Vories 7, Williams 5. Ties on 10, 9 and 8 divided first, second and third respectively. In shoot off, ties on 7, Elliott, Underwood and Porter divided fourth.

Shoot No. 20, 10 Peoria blackbirds, entrance $2: Crabill 8, Beck 8, Kentuck 6, Keene 6, Cally 8, Budd 10, Frank 5, C. Holmes 8, Murphy 7, Deuser 8, Young 7, Savage 8, Hudson 9, Hinze 8, Mensing 9. Ties on 10 and 9 div. first and second, Crabill third.

Shoot No. 21, 10 Peoria blackbirds, entrance $2: Rieger 5, Holly 7, Crabill 10, Colly 7, Beck 8, Kinmouth 8, Mensing 10, C. Holmes 2, J. Anderson 10, Budd 9, Riley 8, Deuser 8, Murphy 6, Hudson 8, F. Holmes 3, Keene 7. Three moneys, all ties were div.

Shoot No. 22, 10 Peoria blackbirds, entrance $2: Deuser 8, Budd 9, W. Anderson 9, Meade 6, Kentuck 8, Mardis 5, Koller 7, Mensing 8, Murphy 7, Riley 5, Kinmouth 10. Kinmouth first, Budd second, and Deuser third.

Summary of the winners of special average prizes: J. A. R. Elliott won a handsome medal donated by Pollock Bros. of this city. Ed. Bingham won a gold medal donated by James Whitfield of the *Referee*. E. Bingham and Elliott tied for an L. C. Smith shotgun. They will settle the ownership at some future time. $25 for best average in the two double bird shoots was won by D. Underwood. Basket champagne for the second best average in the two double bird shoots was tied for by Parks, E. Bingham and Budd. Parks purchased the interest of the other two, and took the wine home with him. A case of imported Rhine wine for the third best average in the two double bird shoots was tied for by Riley, Ed. Bingham, C. Guinotte, Lucas and Watson. By the turn of the dice Watson became the owner. W. M. Anderson became the owner of a Parker shotgun by virtue of his having made the highest average in certain specified shoots. Mr. C. P. Fairman carried home a split-bamboo fishing rod for the lowest scores in three specified events on the programme. A Blanchard loading machine was tied for by Holmes and Dozier, and the ownership is still to be decided. Messrs. Franke, Hickman, W. Anderson and Murphy broke even for a set of pearl handle table knives, and the ownership is still in doubt. UNSER FRITZ.

The figure 2 denotes killed with second barrel, the o dead out of bounds.

WESTERN PENNSYLVANIA MATCHES.

COLUMBIA, Pa.—The past three weeks were fortunate ones for our small but prosperous club. Arrangements had been made with the gun clubs of Marietta, Lancaster and Mountville, in the order named, for team contests, the first of which took place at Marietta on May 17. Shooting on this occasion was remarkably poor owing to a very high wind.

The scores at 15 birds each stood—Columbia Club: AC. Krueger 11, C. Franciscus 10, W. G. Taylor 7, J. Broom 7, F. Heckel 5, S. Wayne 1, T Crownshield 1; total 42. Marietta Club: H. Riale 3, G. Buchanan 3, H. Musselman 4, R. King 3, G. Herbst 4, F. Ruby 10, Sergen 8; total 35.

Second match, at 5 pair doubles—Columbia: Krueger 5, Taylor 5, Franciscus 4, Broom 4, Heckel 3, Stevens 2, Crownshield 1; total 24. Marietta: Riale 3, Buchanan 4, Musselman 2, King 5, Herbst 5, Ruby 4, Sergen 3; total 26.

Third match, 11 singles—Columbia: Krueger 8, Broom 8, Taylor 7, Stevens 7, Franciscus 6, Heckel 6, Crownshield 2; total 44. Marietta: Riale 7, Buchanan 3, Musselman 6, King 6, Herbst 3, Ruby 8, Sergen 5; total 38.

The next match took place at Lancaster on the 24th of May. Only two matches were here intended, but a third was necessary owing to there being a tie. The following are the scores on this occasion: First match, 12 singles—Columbia Club: A. C. Krueger 11, C. Franciscus 9, Heckel 10, Taylor 7, Broom 7, Stevens 6, Crownshield 6, Fendrich 4; total 60. Lancaster Club: W. Fieles 9, Snyder 9, Dr. Ilyus 5, Reynolds 8, Cummings 7, Anderson 6, Miller 6, Wiley 5, total 58.

Second match, 3 pair doubles—Columbia: Franciscus 5, Fendrich 4, Heckel 4, Stevens 4, Krueger 3, Taylor 3, Broom 3, Crownshield 1; total 27. Lancaster: Anderson 5, Snyder 5, Fieles 5, Ilyus 4, Cummings 3, Wiley 3, Reynolds 3, Miller 1; total 29.

Third match, 6 singles—Columbia: Krueger 6, Heckel 6, Fendrich 5, Taylor 4, Broom 4, Franciscus 3, Stevens 3, Crownshield 2; total 33. Lancaster: Miller 5, Fieles 4, Anderson 4, Snyder 4, Wiley 4, Ilyus 3, Reynolds 3, Cummings 2; total 29.

On May 31 the last match was shot, namely, with the Mountainville Club. A heavy rain was falling while the match was being shot, which prevented a full attendance from either club. The match was shot at Columbia, and resulted in a decided victory for the home club, and as the Mountainville has of late claimed the championship of Lancaster county, that title is now Columbia's.

First match, 15 singles—Columbia Club: A. C. Krueger 14, C. Franciscus 14, F. Stevens 13, W. G. Taylor 11, T. Crownshield 11, Fendrich 7; total 70. Mountainville Club: H. O. Leachey 12, J. Pennypacker 12. T. Crane 10, W. Yohn 9, H. Kauffman 8, E. B. Kready 6; total 57.

Second match, 5 pairs doubles—Columbia: Franciscus 10, Krueger 8, Stevens 7, Fendrich 7, Taylor 6, Crownshield 3; total 41. Mountainville: Kaufman 8, Pennypacker 7, Yohn 6, Kready 4, Leachey 4, Crane 2; total 31.

BANNERMAN.

CLEVELAND, O., May 31.—The West End, Locksley, and Rockport gun clubs met on the Rockport grounds to-day to contest for the badge offered by the Standard Target Company. The club winning the badge at three successive shoots is entitled to keep it, and as the Rockports were victorious at the last two shoots, they naturally put forth every effort to win to-day. It is claimed that they took in three or four of the best shooters of the Berea Club as "honorary" members to help them out. The West End Club protested vigorously, but as there was no rule governing the case, the Berea contingency were allowed to take part. The controversy seemed to have a salutary effect on the West End, however, for they shot better as a club than ever before, and when the totals were added it was found that they were 13 birds ahead. Everything considered, the scores made by all the clubs were good, the rain came down in torrents part of the time and the smoke hung like a curtain between the shooters and their targets all day. The conditions were 25 single standard targets, at 18yds.:

SPRINGFIELD, Mass.—The Springfield Shooting Club will hold a two days' tournament on Gunn's lot, on June 12 and 13. The events both days will be open to all, and $150 will be offered in prizes. There will be used eight new Keystone traps, and the Keystone rules will govern the proceedings. The committee of arrangements consists of M. W. Bull, secretary; Paul N. Demau, F. Le Noir and H. L. Keyes. All events with 12 entries or more will be divided into "fours," and all under 12 will be divided into "threes."

TORONTO, June 1.—The watch and gun trophy shoot of the Stanley Gun Club took place on McDowall & Co.'s grounds this afternoon. The weather was not at all bad, but could not be counted a good field day. The scores are in some instances not up to the aveeage. T. Sawden, Jr., the club's youngest shooter, in all appearances proves himself the best, winning both watch and gun, with scores of 19 and 22 respectively, out of 25, at 21yds. rise.

THE MILWAUKEE SHOOT.

MILWAUKEE, Wis., May 29.—The fourth annual tournament of the South Side Gun Club, of Milwaukee, began as per programme to-day, some thirty shooters showing up at the scores in spite of the forbidding and thoroughly dispiriting weather. The day was cloudy, cold and gusty, and the cold wave which has been prevalent in the Lake region for the past few days seemed on the point of culminating in frost and snow.

The club grounds are located at National Park, about three miles out from the center of the city. This park is beautiful and beautifully situated, and is the prettiest place for a tournament struck yet on the circuit. It is the recreation ground of the city, and the races and ball games are also held there. The track is a half mile, and lies in a natural amphitheater, the slope back of the stands being luxuriantly covered with trees and shrubbery. There is a pretty little lake; and on the whole the spot would be restful and inviting in any May but this one. The South Side Club has leased the privilege of shooting on these grounds, and has put up itself a very tasty and commodious club house just inside the track, with proper walks, stands, trap covers, etc. The traps are set facing from the club house door, the birds being thrown toward the center of the track. It is but a step from the warm club house room to the scores, so nobody really suffered very much to-day.

South Side Club is eight years old, having been organized March 1, 1881. It was incorporated in 1888, and of its ten charter members five are still with it. Mr. W. C. Holtz has been the president from the first; Mr. C. W. Milbrath has been secretary since 1882; Mr. Henry Manegold is treasurer. No wonder the club does not change its officers often; the ones it has are surely good enough to keep. The club now numbers 65, and includes the cream of the Cream City, itself a very notable city of sportsmen, and lying in one of the best sporting States of the Union. Not contented with its admirable home facilities, the club is bent on acquiring property further north, in the wilderness of the new North Woods, and but this week a committee has returned from a prospecting trip which will probably result in the purchase of acreage in the upper portion of the lake region of Wisconsin. Milwaukee, like Chicago, has a vigorous club system, and like Chicago, is reaching out after some untouched nature. Following is the full list of the South Side Club: P. H. Archer, Geo. L. Anderson, F. C. G. Brand, Hugo Broich, John F. Burnham, Chas. Cornillie, John Cowley, P. H. Davern, Chas. Daumling, John Dickens, George L. Dieter, Geo. Faehrmann, Chas. Fricker, A. W. Friese, T. A. Hanson, Albert Hambach, W. C. Holtz, F. G. Holtz, Wm. Holtz, John Graf, Frank Grand, Chas. H. John, Henry Koenig, John B. Koetting, Louis Kreischmar, Robt. Kretschmar, C. H. Kroeger, John Kurtz, Henry Kelling, Edward J. Wagner, Wm. Hake, P. H. McCarthy, Emil Ludwig, B. Leichendorf, C. W. Milbrath, Henry Manegold, Lorenz Moschauer, John Meunier, Oscar Mohr, Geo. R. Nash, James J. Ormsby, Robt. Pickhardt, L. G. Petit, Henry Richter, Ed. F. Richter, Ed. Richards, Henry Rolfs, Julius Roehr, H. F. Seefeld, F. F. Seefeld, R. Seidel, Wm. H. Split, Robt. Stewart, John Strassburger, Fred Stuth, Robt. Tabert, H. J. Van Ryn, Ed Voss, J. L. Williams, J. E. Warner, W. A. Haig, J. E. Wagner, F. P. Stannard, H. F. Bosworth, H. C. Apel.

The professionals are not out in great force at this shoot, and that is all the better for the shoot so far as a general happiness is concerned. Such as may fairly be called professionals were held mighty level by the home shooters, who are strong. Low scoring prevailed on account of the weather, not from lack of skill. Stice, Budd and Parmalee are not here. J. A. Ruble has blown in from Minnesota in the red shirt. Mr. Tucker, of the Parker Gun Co., as fine and gentlemanly man as walks, has arrived to-night and will shoot to-morrow. C. E. Cahoon and Dan Burrell, of Freeport, Ill., are hopin'. J. H. Brewer, of Fairbault, has cause to hope. D. Starin, one of the best known duck hunters about Lake Koshkenong, although he is deprived of all of both legs below the knees, is none the less plucky and manly and shoots well. Dick Mertz, of Gladstone, Mich., is here for business, and so is B. Anderson, of Eldorado, this State. Other visitors are Ed Foster and J. Gault, of Waukesha; F. Bowe and A. Sharratt, of Eldorado; R. Godfrey, of Whitewater; E. C. Sherwin, of Brandon; M. M. Anderson, of Fond du Lac; G. Anderson and J. C. Lamb, of Waukesha; G. W. Sperbeck, of Chicago; J. H. Hutchins, of Minneapolis.

F. P. Stannard of the home club is a trap shot far above the average. Geo. L. Dieters has been mentioned in these columns as having come down from Chicago and done the boys up for their own medals two or three times. They are a jolly lot of fellows, too.

The bulk of the tournament will be devoted to inanimates. Of these a local paper gravely speaks as follows: "Peoria blackbirds, be it understood, are inanimate birds—saucers in fact, fashioned out of a composition resembling tar, and are propelled upward into the air by a trap constructed for the purpose. Two of the traps are located a short distance in front of the club house, a boy being placed by each one to load it. A clothesline connects the trigger of each trap with a contrivance in a small tent where a man alternately springs one trap and then the other as the shooters called out their commands." With this description it should be fairly clear to all shooters what was going on to-day. There was but one live bird match, the birds a fairly good lot. The first shoot of the day was an extra, a little sweep, ties not shot out, but divided. The score:

J H Brewer	11111—5	Jas Ormsby	11101—4
R H Merts	11111—5	B Anderson	11101—4
H F Bosworth	11111—5	H Seefeld	11110—4
G T Eli	11111—5	F C G Brandt	11010—3
G T Anderson	11111—5	E Sharatt	01110—3
M M Anderson	10111—4	E C Sherwin	01110—3
E Foster	11110—4		

The programme shoots followed in order. The scores:

Match No. 1, 10 single Peoria blackbirds, 5 traps, 18yds., entrance $2, including birds, 50, 30 and 20 per cent.:

E C Sherwin	1001011101—6	D W Burrell	1110011111— 8
C E Cahoon	0011110111—7	E Foster	1100000111— 5

A Sharratt	11011 00 11 11— 8	A W Friese	11010 10 10 10— 6
H F Bosworth	01111 01 11 00— 7	R Godfrey	11101 10 10 11— 8
H F Seefeld	11110 01 01 01— 7	D Starin	11110 01 10 11— 8
D W Burrell	10111 10 11 10— 8	B Anderson	11011 11 10 11— 9
F C Brand	00101 10 01 01— 5	C W Milbrath	01001 11 11 11— 8

Brewer and M. M. Anderson div. first, $23.25; Sherwin second, $17.50; Ruble and B. Anderson div. third, $11.50; Ormsby shot and won fourth, $6.

Match No. 3, 30yds., 5 ground traps, entrance $10, including birds, 40, 30, 20 and 10 per cent., no restriction as to gauge of gun:

J A Ruble	1110111110— 8	H Bosworth	1111110111— 9
C E Cahoon	0101011111— 7	H Seefeld	1011111111— 9
F C Sherwin	1101101011— 7	D W Burrell	1110111111— 9
R H Mertz	1111011011— 8	S Meunier	1111110111— 9
W C Holtz	1001010101— 5	B Anderson	1001111101— 7
T Hanson	0001111010— 5	G Anderson	1011101011— 7
D Starin	1010101111— 7	J C Land	0111100111— 7
Dr Eli	1110011101— 7	F T Stanard	1111111110— 9
Jas Ormsby	1001111111— 8	F G C Brand	1110110110— 7
M M Anderson	0001110111— 6		

Bosworth, H. Seefeld, Burrell, Meunier and Stanard divided first, $66. Mertz, Ormsby and Ruble divided second, $49.50. Cahoon, Sherwin, Starin, Eli, B. Anderson, G. Anderson, Land and Brand divided third, $33. M. M. Anderson won fourth, $16.50.

A miss-and-out sweep at $1, followed, and was shot down to six, Starin, Bowe, Eli, Tucker, Cahoon and Ormsby.

Second Day, May 30.

A most abominable day. The wind was a gale, and whipped the birds around so that there was no calculation possible for them. It was very cold. Frost had blackened the leaves on the trees, and crops to the north of here are by the morning despatches reported frozen to the ground, ice forming on some waters an eighth of an inch thick. In spite of all discomforts the sportsman fire never flagged, and in the midst of as bad a day as ever blew over a trap the crack of the gun kept on. The score: Match No. 4, 10

single bluerocks, 3 traps, 18yds. rise, entrance $2.50, including birds; 40, 30, 20 and 10 per cent.:

J A Ruble	0110111011— 7	B Anderson	1101111011— 8
C E Cahoon	0111010011— 6	Chas John	1111100000— 5

W A Haig	1010111001— 6	J F Eli	0111111101— 8
I A Hanson	1001001110— 5		

Brewer and Stannard divided first; Sherwin, M. M. Anderson and Burrell divided second; Ormsby, Mertz, B. Anderson, Dieter, Oscar, H. F. Seefeld and Eli divided third; Godfrey shot out and won fourth.

Match No. 5, 5 pairs Peoria blackbirds, 15yds. rise, entrance $3, including birds, 4 moneys, 40, 30, 20 and 10 per cent.:

G T Eli	1110111110— 8	F P Stannard	1111111111—10
J Strassburger	0111100100— 5	C E Cahoon	1110101011— 7
G L Deiter	1101001111— 7	H F Bosworth	1000111110— 6
J Ormsby	1100101110— 6	A Sharratt	1010101100— 5
R H Mertz	1110011101— 7	C F Ford	1000111100— 5
E F Richter	0111101011— 7	H F Seefeld	0100011111— 6
D W Burrell	1111011010— 7	J W Oscar	1110110001— 6
A C Mayer	1010111010— 6	Chas John	0110101101— 6
J H Brewer	1110101011— 7	Fred Martin	0101000111— 5
E C Sherwin	1110011001— 6	D Starin	1101100010— 5
M M Anderson	1111011111— 8		

Stannard won first, Eli and Anderson div. second, Brewer shot out and won third, ties on 6 all div.

Match No. 6, team shoot, 10 single Peoria blackbirds. 18yds., 5 traps, entrance $10 per team, including birds and 4 gold medals, one for each man in winning team. Teams competing for above medals to consist of four members in good standing of any organized gun club in Wisconsin. Second prize $10, third prize $5:

South Side Gun Club No. 1.		Whitewater Team.	
E Voss	0001011111—5	R Godfrey	0000101110—4
W E Haig	0000000010—1	D Starin	1011010111—7
C M Milbrath	1011000001—4	Malcolm	1001110110—6
F C G Brand	0111111010—8—18	Sperbeck	1011000101—5—22
Eldorado Team.		South Side Gun Club No. 2.	
A Sharratt	1100111001—6	W C Holtz	1010000011—3
B Anderson	0100111011—6	Robt Stewart	0011110100—5
M M Anderson	1001111101—7	Hy Manegold	1000110010—4
C E Sherwin	0110010001—4—23	Chas Johns	1001000000—2—14
South Side Gun Club No. 3.		South Side Gun Club No. 4.	
Dieter	1111101111—9	H F Bosworthy	0000101011—4
J Strassburger	1111101110—8	H F Seefeld	0111101111—8
Will Eli	1111100011—6	T P Stannard	1001110110—6
Ed Richter	0010001101—4—27	J Ormsby	1010111111—8—26

Dieter, Strassburger, Eli and Richter, of South Side Gun Club No. 3, won first, and each man therefore was soon wearing his medal. The medals are very tasty and appropriate, and make trophies of which the winners and wearers may well be proud. South Side team No. 4 won second, $10, Eldorado team won third, $5.

A number of sweepstakes followed the programme shoot, some of which were not recorded in such manner as to permit report in full. Below are results of most important:

Sweep No. 1, entrance $2, 23 entries: Stannard, Brewer and Burrell div. first, $14.25; Tucker won second, $10.70; Strassburger third, $7.15, and Ruble fourth, $3.55.

Sweep No. 2, entrance $1, 19 entries: Seefeldt won first, $5; Burrell and Schmidt div. second, $3.50; Brewer third, $2.50, and the fourth was divided between Hambach, Zass, Ruble and Strassburger.

Sweep No. 3, entrance $1, 23 entries: Tucker, Brewer, Ruble and Schmidt div. first, $7.25; Cahoon won second, $5.50; ties on 7 div. $3.50; Deiter and Lewis div. fourth, $2.

Sweep No. 4, entrance $1, 18 entries: Burrell won first, $5.85; Richter and Ruble div. second, $3.50, and F. C. G. Brand carried off third, $2.35.

In a minor sweep Mr. F. C. G. Brand (known as Alphabet) shot and won first, to his own infinite delight. Mr. Brand is a gray-haired gentleman, but by no means old, and is nothing if not lively. He is lessee of National Park, and a privileged character with the boys.

Memorial Day had passed pleasantly, the weather, like most other things, proving not bad when faced boldly. A discussion on guns, which lasted an hour and fifteen minutes, closed the day, and it was dark and drizzly when the shooters arrived in town.

Third Day, May 31.

Snow fell over northern Wisconsin to the depth of 4in. on this morning, and melted ice and sleet were visible on the sidewalks of Milwaukee. The weather was fearful for the season. At the grounds the outlook was dismal. The rain blew across the score in sheets, and the birds fell with a soggy squash into the shallow grassy sea which now represented the level turf. In spite of all this, however, the club house was full all day, and the merry crack of the gun never ceased. Waterproof, India rubber trappers were secured, and the shooting progressed regularly. In the citizens' purse the use of the five traps was discarded, and only two were employed, the screen being now erected. This saved the old delay of the trappers running out to load the traps. Squad shooting was not followed during the tournament, and was hardly possible in such weather, although it would have fired three shots to one of the method used. Everybody was good-natured all day long, a pluckier or gamier crowd of shooters, or a better natured one, never met at the trap. They deserve credit, for they made a happy and successful shoot where others would have made a failure. A glance at the number of entries will show that the last day had a better showing than the Iowa State shoot, under a rain far worse than that which knocked Des Moines out on the last day of her shoot. The score:

Match No. 7, 10 single Peoria blackbirds, 18yds., entrance $2.50, including birds, 40, 30, 20 and 10 per cent.:

E C Sherwin	1101111101—8	A C Mayer	0111111011—8
G W Atwell	1100010111—6	A W Friese	1010010111—6
E F Richter	1101101101—7	D W Burrell	1111111101—9
B Anderson	0110111011—7	H F Seefeld	1111010110—7

Friese	1101001111—7—13	J F Holtz	0100001000—2— 7
Brewer	1111111010—8	Meunier	1101011000—5
Anderson	1110011101—7—15	Tucker	0001011111—6—11
Meyer	0111111011—8	Burg	0000000100—1
Sherwin	0111101110—7—15	Haig	0111100111—7— 8
Seefeld	0110110111—7	Strassburger	1000111111—7
Ormsby	1111010101—7—14	Stuth	0110000111—5—12

All ties were divided, the moneys being $12.50, $9.25, $6.15 and $3.05.

The main interest of the day centered in the citizens' purse, holding 22 guaranteed prizes in cash and merchandise, and 49 men rapidly paid in their entrance fees for the chance of winning something.

Match No. 10—Citizens' Purse, 25 Peorias, entrance $3:

C H John	0010101010010000100100010— 9
E Sherwin	1001001100110010011110110—13

J E Warner	0000011100000011000110010— 8

Ruble's score of 24 out of 25 was pretty good for an amateur, and good enough to take first, $25, and a portrait of himself, life-size, and wearing a pleasant smile. Stannard won second, the rod and $20, and was a favorite for first. He shot hard all through the shoot. Mr. Stannard is late from Janesville, Wis., and is now with the popular sporting goods house of A. W. Friese, in Milwaukee, where the boys go when they wish to soak themselves full of sportsman lore and shooting news. Burrell, of Freeport, Ill., won third, the reel and $15. He was one of the better shots present. J. H. Brewer, of Faribault, won fourth, and left with his medal and $15 cash for Madison. Prize 22, for lowest score, a

$2,000 Fidelity accident policy, value $15, was won by Apel, on the truly remarkable score of 2 out of 25.

The tournament now ended. The club deserves compliments for its success under very trying conditions. Many of the shooters present promised to be at Illinois State shoot, the following Tuesday. E. H.

COLT GUN CLUB TOURNAMENT.

HARTFORD, May 31.—The Colt Gun Club held a fine tournament here yesterday and to-day. The class of shooters present was the best in New England, and included Streeter, Perry and Dickey, of Boston; Lee, of Providence; Whitney, Sherman, Savage, Longdon, Widman, Bristol, Merriman and E. Folsom, of New Haven; Manley, of Danbury; Yerrington, of Norwich; Brown and Avery, of Meriden; Thomas, of Springfield; Watkins, of Manchester; Sierry, of South Windsor, and many of the best known shots in the home club.

The weather was against good shooting on both days, the wind being strong and rain falling heavily during parts of both days. Nevertheless the scores were very good, and it should be said to the credit of the less prominent shooters that when such men as Stanton, Perry, Dickey, Manley and Yerrington and others did not make almost clean scores, that to be "in with them" means exceptionally good work. In fact, a number of dark horses made big records, which class them way up among the big shooters.

The shoot was managed by President Burbridge, assisted by F. H. Whittlesey, S. B. Douglass, W. H. Nichols and Secretary Willey, and was a financial success to the amount of over $200. All the visiting trap-shots expressed themselves as highly pleased with all the arrangements. On the first day Mr. H. A. Penrose, of Corry, Pa., representing the Keystone traps and birds, conducted the traps and managed the shooters. He did splendid work, and every shooter was highly pleased with the system, traps and birds. More birds can be shot on the Keystone system than on any other and better satisfaction obtained. The results of the two days' shoot was as follows:

First Day.

First event, 10 Keystones, 5 angles: Yerrington 10, Culver, Perry, Whitney, Merriam 9 each, Hill, Harvey, Gould, Lee, Ross, Brown, Avery 8 each.

Second event, 10 kingbirds, 3 angles: Whitney, Sterry, Longdon, Sherman 10 each, Stanton, Hill, Yerrington, Avery, Brown, Capen, Saunders, Bristol, N. Folsom 9 each, Gould, Perry, Whittlesey, Johnson, Webb, E. Folsom, Lee, Savage, Manley 8 each, Willey, Wildman, Higby, Merriman, Ross 7 each.

Third event, 20 birds from 5 traps: Yerrington 20, Webb, Stanton, Manley, Brown, Longdon, Whitney 19 each, Sherman, Saunders, Dickey, Folsom 18 each, Melrose, Johnson, Savage, Widman, Hill, Bristol 17 each, Ross, Thomas 16 each.

Fourth event, 4 pair clay-birds: Stanton, Perry, Whitney, Henry, Longdon, Savage 8 each, Merriman, Hill, Avery 7 each, Webb, Dickey, Alpaugh, Brown, Saunders, Sterry 6 each, Manley, Sherman, E. Folsom 5 each, Harvey, Thomas, Johnson, Widman, Bristol 4 each.

Fifth event, 10 Keystones, 5 angles: Yerrington, Stanton, Whitney, Manley 10 each, Langdon, Saunders, Avery, Brown, Capen, Henry, Perry, E. Folsom, Savage, Harvey, Widman, Bristol 9 each, Merriman, Thomas, Dickey, Lee, Willey, Sterry 8 each, Webb, Jounson, Ross 7 each, Hill, Vibberts, Alpaugh 6 each.

Sixth event, 10 Keystones. 5 traps: Savage, Whitney, Brown 10 each, Perry, Sterry, Stanton, Dickey, Ames, Sherman, Willey 9 each, Burbridge, Brown 8 each, Longdon, Widman, Yerrington, Merriman, Bristol, Webb, Watkins, Hill 7 each.

The great event of the first day was the $100 guarantee race at 50 birds. In this race some of the best shots in New England entered, and although a strong wind together with rain prevailed, fair scores were made under rather harassing conditions. The scores were: Whitney 49, Perry 48, Stanton, Savage, Longdon, Sherman 47 each, Brown 46, Avery, Yerrington, Bristol, Widman 45 each, E. Folsom 44, Manlen 43, Dickey 42, Sterry, Webb, Henry, Watkins 41 each, Merriman, Melrose 40 each, Wiley, Hooper 39 each, Thomas 32, Hill 28.

The ninth event of the day was 10 birds on 5 traps: Savage, Longdon, Bristol, Stanton 10 each, Widman, Saunders, Webb, Perry, Sherman, Merriman, Yerrington, Lee 9 each, Wiley, Harvey, Hooper, Ames, Dickey, Thomas 8 each, Manley, Watkins, Hill, Whitney, Sterry 7, Johnson 6.

Second Day.

The weather for the second day was bright and clear in the morning and the sweeps opened with all the "big ones" on hand. The first event was a little sweep at 10 straightaways, resulting: Sterry 9, Dickey, Stanton and Manley 8 each, Yerrington 7, Perry and Whittlesey 5 each, Webb 4.

The second event was 12 standards from 5 traps: Savage, Dickey, Ridge and Stanton 12 each, Sterry, Albee, Perry, Longdon and Yerrington 11 each, Porter 9, Stone 8, Manley, Folsom and Carney 7 each.

The third event was at 20 standards, 5 angles: Perry, Stanton and Dickey 19 each, Ridge 18 each, Yerrington, Sterry and Carney 17 each, Longdon, Savage and Porter 16 each, E. Folsom and Albee 15 each.

The fourth event was at 10 standards on 5 traps: Stanton and Ridge 10 each, Yerrington, Dickey, Sterry, Albee, Savage, Longdon and Stone 9 each, Perry 8, Manley, Porter and Carney 7 each, Webb 5.

The fifth event was at 30 standards, the $50 guaranteed race of the day, was next shot. The wind was high and the birds flew with great uncertainty as is shown by the fact that some of the best shots in New England dropped 3 and 4 birds out of 30. The scores follow: Savage 28, Stanton and Dickey 27 each, Perry 26, Longdon 25, Willey, Burbridge, Ridge and Risley 24, Manley, Thomas and Yerrington 23 each, Sterry 22, Melrose 21, Carney and Whittlesey 19.

The sixth event was the two-man team, 10 birds to each man in the team:

Stanton	10	Sterry	6
Dickey	9–19	Ridge	8–14
Perry	9	Carney	8
Yerrington	9–18	Porter	9–17
Longdon	8	Manley	8
Savage	8–16	Stone	7–15

Twelve clays was the seventh event. The result: Perry, Dickey, Ridge 12 each, Willey, Stanton, Porter 11 each, Savage, Sterry, Manley, Ensign 10 each, Longdon, Yerrington, Burbridge 9 each, Golden 7.

The eighth event was 10 standards at 5 angles: Willey, Sterry, Dickey 10 each. Stanton, Yerrington, Longdon, Savage, Perry, Porter Ensign 9 each, Higby, Ridge, Carney 8 each, Golden 5.

The ninth event was the 20 standard race, first prize a fine Colt repeating rifle presented by the Colt Fire Arms Company. This was won by Mr. Manley on a score of 19. Other scores: Willey, Ridge, Dickey 18 each, Stanton, Perry, Risley 17 each, Sterry, Yerrington, Burbridge, Savage 16 each, Longdon, Ensign 15 each, Thomas 12.

The tenth event was 5 pair of clay birds: Dickey, Stanton, Ridge, Savage, Carney 9 each, Golden 8, Longnon, Perry, Sterry, Albee, Porter 7 each, Ensign 5.

The eleventh event was 10 standards, 5 traps: Willey, Perry, Risley 10 each, Dickey, Savage, Burbridge 9 each, Thomas, Longdon, Sterry, Yerrington, Douglas 8 each, Stanton 7, Golden 6, Melrose, Holt 5 each.

The same sweepstake repeated for the twelfth event: Dickey, Thomas, Hooper 10 each, Burbridge, Perry, Sterry, Willey 9 each, Stanton 8, Whittlesey 7, Risley 6, Lenoir 5.

Another 10 bird sweep was shot for number 13: Burbridge, Dickey, Stanton 10 each, Perry, Yerrington, Risley 9 each, Savage, Longdon, Melrose 8 each, Thomas 7, Whittlesey 6, Golden, Willey 5.

MINNEAPOLIS, May 31.—The Minneapolis Gun Club's shoot at the club grounds to-day was an enjoyable event, and the usual number of sportsmen were present. The scores follow. Club badge shoot at 10 singles and 5 pairs: Skinner 10, Lawrence 16, Boardman 16, Marshall 16, Stokes 16, Pratt 14, Webley 12, Osmer 12, Griffin 14, Brady 12, Kennedy 15, Warwick 17, Shott 10, Swanman 16, Baegel 15, Whitcomb 11, Daniels 10, Whitcomb, Jr. 10, Ensign 14, Cutter 14, Murphy 12, Sewall 10. Warwick wins senior badge, Kennedy junior badge and Boardman the amateur badge.

Tribune badge shoot at 9 singles and 3 pairs: Ensign 10, Warwick 8, Brady 10, Stokes 13, Lawrence 10, Murphy 12, Cutter 11, Shott 11, Marshall 13, Boardman 12, Skinner 9, Webley 10, Kennedy 9, Swanman 7, Sewall 8, Pratt 9, Bader 8, Whitcomb 9, Coleman 8, Osmer 8, Goosman 8. Marshall won the badge.

ERIE, Pa., May 31.—The Presque Isle Gun Club was formed about two months ago by several young gentlemen, and its growth has been good, it now having about 20 members. All the members are improving in wing-shooting since the first shoot, which was held April 30, and to-day proved that they were not afraid of bluerocks thrown from either right, left or center traps. To-day's shoot was checked somewhat on account of rain, and the high wind caused the birds to fly wild. The score was as follows: H. Abell 5, F. Ball 8, J. D. Heydrick 8, R. Howell 6, W. S. Hunt 9, Chas. Hirt 9, Chas. Siegel 9, Geo. Russell 9, Wm. Siegel 10. Wm. Siegel first, Chas. Siegel second, and James Heydrick third on shoot-off.

NORWICH TOURNAMENT.

THE two-days' tournament of the Norwich, Conn., Shooting Association, held May 28 and 29, was not so largely attended as the management had hoped for. The storm of Monday kept many shooters from a distance at home, and the large number of tournaments occurring about the same date was probably the cause of keeping many more away. On the first day about 30 shooters were in attendance, and 18 events were rattled off. The second day only a bare dozen faced the traps, but managed to have a very enjoyable time; the programme was not finished and the shooting ceased at noon. The weather throughout the shoot was all that could be desired, but on the opening day a strong wind made the shooting quite hard. Mr. H. A. Penrose, of Keystone target fame, had entire charge of the shoot, and he threw about 8,000 Keystones during the tournament. The shooting was done under Keystone rules from one set of 5 traps. The following table of shooters, arms and charges shows the weapons and their loads used in the tournament:

NORWICH TOURNAMENT ARMS AND CHARGES.

All guns full choke barrels.

NAME.	GUN AND BORE.	LOAD.	CARTRIDGE.
F. H. Whittesey, Hartford, Conn.	Parker, 12-g.	33ds. Hazard's FFFG., 1½oz. Tatham's No. 8 Soft	Climax.
E. W. Yerrington, Norwich, Conn.	L. C. Smith, 10-g.	33½ds. Hazard's No. 2, 1½oz. Leroy's No. 8½ Chilled	Climax.
C. H. Burbidge, Hartford, Conn.	Colt, 12-g.	33½ds. Hazard's No. 1, 1½oz. Tatham's No. 8 Soft	Climax.
J.S. Macfarlane, Willimantic, Conn.	Lefever, 10-g.	44ds. Oriental, 1½oz. Tatham's	Club.
Jas. H. Hill, New London, Conn.	Colt, 10-g.	35ds. Hazard's No. 1, 1½oz. Tatham's No. 8½ Chilled	Club.
Archibald Mitchell, Norwich, Conn.	Colt, 10-g.	35½ds. Dead Shot FFFG., 1½oz. Tatham's No. 8 Chilled	Climax.
J. W. Webb, Willimantic, Conn.	Colt, 10-g.	44rs. Hazard's No. 2, 1½oz. No. 8 Soft	
Chas. B. Bristol, New Haven, Conn.	L. C. Smith, 12-g.	35½ds. Dead Shot FFG., 1½oz. Leroy's No. 8 Chilled	Rival.
John H. Gould, New Haven, Conn.	Parker, 12-g.	35½ds. American FFF, Dead Shot, 1½oz. Cincinnati	Rival.
N. D. Folsom, New Haven, Conn.	L. C. Smith, 12-g.	38ds. Schultze, 1½oz. Leroy's	Rival.
J. B. Baldwin, Willimantic, Conn.	Colt, 10-g.	40rs. Hazard's, 1½oz. Tatham's No. 7	Climax.
Geo. E. Albee, New Haven, Conn.	Winchester, 10-g.	35½ds. American Rifle No. 4, 1½oz. Tatham's No. 8 Chilled	Winchester.
F. E. Watkins, So. Manchester, Conn.	Colt, 12-g.	38ds. Schultze, 1oz. Tatham	Climax.
L. C. Smith, 10-g.	L. C. Smith, 12-g.	44rs. American Wood, Special Trap, 1½oz. Tatham's No. 8 Chilled	Rival.
"Tee Kay," Plainfield, N. J.	W. & C. Scott & Sons, 10-g.	44rs. American Wood, 1½oz. Trap No. 7 Chilled	Climax.
E. W. Tinker, Providence, R. I.	L. C. Smith, 10-g.	35½ds. Dupont's, 1½oz. Leroy's No. 8	Climax.
Oscar Palmer, Norwich, Conn.	L. C. Smith, 10-g.	40rs. Dead Shot FFG., 1½oz. Tatham's No. 8	Club.
L. H. Houghton, Chepatchet, R. I.	Lefever, 10-g.		

Event No. 1, 10 Keystones, 75 cents entrance, four moneys:

Burbridge	1111010101— 7	McFarlane	1011110011— 7
Whittlesey	1101101111— 8	Tee Kay	0111101101— 7
Conner	0000011110— 4	Pattison	1010110110— 6

Strong	1101111111— 9		

Yerrington and Strong first, Penrose second on shoot off, Beard third. TEE KAY.

MONTREAL.—The Montreal Gun Club are in luck again. The competitions for the two Greeners gave rise to a good deal of enthusiasm and caused large turnouts of the members. There is another valuable prize now open for competition. Mr. David Burke, the secretary of the club, has presented a fine D. B. Scott gun for the members to scramble after, and it is calculated the scramble will be a lively one.

NEW YORK STATE ASSOCIATION FOR THE PROTECTION OF FISH AND GAME.

THE thirty-first annual convention of the N. Y. State Association for the Protection of Fish and Game was held at the Delavan House, Albany, N. Y., on Monday evening, June 3. The convention was called to order by the president, Thos. N. Speer. That interest in the State Association has revived was evidenced by the attendance, which was unusually large. The following clubs were represented by delegates:

Audubon Club, Buffalo: John Meheshner, Theo. Flack, Ph. Stellwagen, Dr. H. C. Frost and Geo. R. Vine.

Lakeside Gun Club, Geneva: Henry B. Whitney, J. S. Barnes, J. G. Stacey, E. H. Kniskern and O. J. Whitney.

Spencer Gun Club, Lyons: W. S. Gavitt, R. J. Marshall, J. W. Putnam, J. B. Stoll and J. O. Meyers.

Northern Wayne Gun Club, Williamson: W. C. Hadley, E. K. Barnum, E. C. Delano, Jas. Kirk and Will McIntyre.

Onondaga Gun Club, Syracuse: Geo. C. Luther, H. McMurchy, E. J. Hudson, Dan Lefever and W. H. Cruttenden.

Johnstown Gun Club: F. W. Partiss, J. A. Banta and J. D. Peirson.

Auburn Gun Club: S. H. Devitt, J. A. Carr, J. E. Bridges, H. V. Kipp and B. Doan.

Queen City Gun Club, Buffalo: F. D. Kelsey, B. Falsama, E. Andrews, O. Besser and W. D. Moore.

Homer and Cortland Gun Club, Cortland: A. M. Schemerhorn and E. C. Rinidge.

Oneida County Sportsmen's Association, Utica: W. H. Beckwith, H. L. Gates, F. A. Elliott, A. S. Hunter and W. H. Booth.

Rome Gun Club: Thos. H. Stryker, Albert H. Golly, W. R. Huntington, W. P. Rayland and L. E. Bertraud.

Steuben Sportsmen's Association, Pultney: Alderman Baker.

Elm Grove Gun Club, Albany: W. G. Paddock, Geo. Knowles, Holly Gardner, F. K. Wood and Chas. L. Gove.

Twenty-four new clubs applied for membership and were unanimously elected. The majority of them were represented by delegates, but a few were not; we give the list below:

Rochester Rifle Club: W. C. Hadley, H. B. Hooker, A. Rickman, Geo. W. Crouth, Jr., and A. D. McMaster.

Union Gun Club, East Aurora: F. D. Kelsey, W. B. Moore and E. Andrews.

Lyons Fish and Game Protective Association, Lyons; Henry Killick, J. C. Myers, Burton Hammond, D. P. Chamberlin and Geo. Kent.

Bradley Gun Club, Waldin: W. Herbert Dupree.

Union Gun Club, Brunswick: W. T. Ford.

South Side Gun Club, Watertown: O. M. Paddock.

Valley Falls Gun Club: John F. Cunningham.

Trojan Gun Club of Troy: A. Paul, G. Zuessen, John Hancock, H. Durffee and S. Goggin.

North Side Gun Club of Woodside, L. I.: Saml. Lyon.

Greenbush Gun Club: S. G. Williams, W. G. Paw, A. P. Cady, J. T. Cappe and E. E. Williams.

New Berlin Gun Club: Wm. Armstrong, D. Carlton, J. P. Hill, C. P. Cushman and J. L. Dykes.

Catskill Gun Club: Louis P. Schutt, Thomas Beach and Wm. Mattice.

Independent Gun Club, Hoosic Falls; N. Y. Suburban Shooting Grounds Association, New York city. Red Hook Gun Club, Little Falls Gun Club, Olean Sportsman's Assn., Saratoga Gun Club, Gloverdale Shooting Club, Chatham Gun Club, Clarksville Gun Club, Lake Ontario Gun Club of Irondequoit, Fountain Gun Club of Brooklyn and the Batavia Gun Club.

There was no new business to come before the convention, so the question of a place to hold the next tournament was taken up. Mr. W. S. Garritt, of the Spencer Gun Club, spoke in favor of Lyons. He mentioned the fact that Lyons had on three previous occasions asked for the convention, and each time had been put off with the promise that they should have it the following year, and now he thougut they were justly entitled to it. He spoke of Lyons's capabilities for giving a good shoot and properly entertaining the visitors, and wound up with an eloquent appeal to the Association to fulfil their promises and give Lyons the convention. His associates, W. C. Hadley and J. D. Meyers, ably seconded his appeal. Syracuse put in a bid in the person of Mr. Ed. Hudson, and Rome also advanced W. P. Rayland and A. H. Golley as orators in the effort to secure the prize. After much discussion a ballot was taken, which resulted in 38 votes for Lyons, 22 for Syracuse and 10 for Rome. This vote was then made a unanimous one for Lyons, where the convention for 1890 will be held. The following officers were then elected for 1890: President, Wm. S. Gairth, of Lyons; First Vice-President, Geo. C. Luther, of Syracuse; Second Vice-President, Thos. H. Greer, of Albany; Recording Secretary, John B. Sage, of Buffalo; Corresponding Secretary, Ross Parshall of Lyons; Treasurer, Dan Lefever, of Syracuse.

The King bird was adopted by the Association as the standard target for all matches, and the American Shooting Association rules were also adopted. The convention then adjourned till 8 o'clock Tuesday evening.

Tuesday, June 5.—The first day of the tournament opened with very unfavorable weather, frequent hard showers doing their best to drown the enthusiasm. The shooting is done on the grounds of the Elm Grove Gun Club at the Fair Grounds on Troy Road. The attendance was very good, about 75 or 80 shooters taking an active part. Two events open to members of State Association only were shot. In both these events, the shooters were classified into three classes, 90, 80 and 70.

The first event was at 9 kingbirds, entrance $4, 4 moneys to 90 class, 5 moneys to 80 class and 6 moneys to 70 class. The winners in 90 class were: First, H. McMurchy, J. D. Kelsey, M. C. Smith and H. B. Whitney with nine straight; second won by Geo. C. Luther alone; third divided by H. Gardner and O. Besser, Jr.; fourth divided by J. E. Brigden and J. B. Webelhoer. The 80 class winners were: First, J. Koch after shoot-off; second, L. P. Schutt, J. F. Cunningham, C. A. Johnston, C. M. Felton and J. D. Pierson; third, W. S. Gavitt, C. L. Gove, J. P. Hill and J. A. Elliot; fourth, Dan Leiever, T. A. Peacock and G. Guinodde; fifth, H. M. Candee and W. T. Lord. The 70 class were: first, J. Eames after breaking 17 straight in shoot-off; second, J. T. Carr and Geo. Mosher; third, M. J. Kinsley; fourth, L. G. Carr; fifth, A. Rickman and sixth E. H. Kruskern.

Event No. 2, at 9 kingbirds, entrance $4; four moneys to 90 class, six to 80 class and six to 70 class. First in 90 class were T. D. Kelsey, J. Koch and H. Gardner; second, H. McMurchy, M. C. Smith, H. B. Whitney and O. Besser, Jr.; third, Brigden and Luther; fourth not awarded in this class. In the 80 class the winners were: First, Dan Lefever, after shoot-off; second, J. Porter and E. Hudson; third, L. P. Schutt, H. Candee and E. M. Felton; fourth, E. Andrews; fifth, J. D. Pierson and sixth, W. D. Ford. Seventy class: First, A. Baker; second, E. Hudson, Jr., and A. Paul; third, O. M. Paddock, Geo. Mosher, S. Lyons and W. Mattice; fourth, Eames and Stacey, after breaking 23 out of 24 in shoot-off; fifth, G. Buesser; sixth unawarded.

Four events open to all were also shot. No. 1, at 10 kingbirds from 5 traps, Keystone rules, $1 entrance, four moneys, had for the winners: First, C. W. Yerrington, F. D. Kelsey, W. Collins, Carr, Beach, Gardner, Hudson and Whitney; second, Tee Kay, E. D. Miller, W. C. Smith, Mosher, Luther, Heikes and Bessin; third, Quimby, Brigden and Stockwell; fourth, H. P. Kipp, Richmond, Andrews and Albee. Second open event at 10 kingbirds, same as No. 1: First, Miller, Albee, Lindsley, Brigden, Gavitt, Yerrington, Heikes and Collins; second, Collins, McMurchy and Apgar; third and fourth not decided.

Third open event, at 5 kingbirds, 5 traps, entrance $1.50, three moneys: First, Heikes, Smith, McMurchy, Collins and Choate, after breaking 15 straight in shoot-off; second, Hudson, Baker, Lefever, Schut and Johnson; third, Devitt and Buesser.

Fourth open event, at 9 kingbirds from 3 traps, $1 entrance, four moneys: First, Quimby, Miller and Luther; second, Choate, Hill, Lindsley and Livingston; third won by Carr on shoot-off; fourth shot off and won by Buesser.

Full scores of all events will be given in our next issue.

FRANK MASON.

SOUTH MANCHESTER, Ct.—The Manchester Gun and Game Club will hold a tournament June 20 with the following programme: 1. Five clays, entry 25 cents. 2. Five standards, entry 50 cents. 3. Ten clays, (all divide), entry $1. 4. Five pairs standards, entry 50 cents. 5. Ten clays, (shoot to a finish), entry $1. 6. Fifteen standards, (all divide), entry 75 cents. 7. Four pairs clays, entry 50 cents. 8. Seven standards, (straightaway), entry 75 cents. 9. 15 clays, entry $1.50. 10. Three pairs standards, entry 50 cents. 11. Ten clays, (straightaway), entry 75 cents. 12. Ten standards, (shoot to a finish), entry 75 cents. 13. Five pairs clays, entry $1. Event 9, divided into halves, each half divided in two moneys of 60 and 40 per cent. The rise on doubles will be 14yds. for 12-bores and 16yds. for 10-bores. The rise on singles will be 16yds. for 12-bores, and 18yds. for 10-bores. Straightaway matches will be at 18yds. for 12-bores, and 20yds. for 10-bores.

Every week we are obliged to defer to the next week trap scores which come in too late for publication in the current issue. It is particularly requested that scores be sent us as early as possible.

THE CORRY GUN CLUB held their weekly shoot on May 23. W. E. Lewis won the gold medal, Dr. Waggoner the silver medal, and Bentley the leather medal. Keystone targets:

May 30.—The shoot to-day commenced in a driving wind, which made very difficult shooting, but the cracks were equal to the occasion, as the scores will show. The club shoot of 600 targets was shot off in one hour and eight minutes, and with several new men that had never before shot at the trap. Keystone rules and targets were the order of the day, and sweepstakes closed the afternoon's sport: Lewis 24, Laurie 24, Blydenburg 18, Arnold 18, Wetmore 17, Edwards 16, Starbird 16, Wilson 15, Ward 14, Mead 14, Oliver 13, Austin 13, McCray 12, Duffy 11, Dunbar 11, Hammond 11, Blair 10, Marsh 9, Newman 9, Blydenburg, Jr., Waggoner 9, Jacobson 7, Eastman 5, Ellis 4. The gold medal was won by Will Lewis, silver medal Blydenburg, leather medal Ellis.

BONE HOLLOW.—Beaver, Pa., May 25.—The Bone Hollow Shooting Club, of this place, held its fourth weekly shoot to-day. The reader is respectfully requested in his criticisms of our score to make due allowance for our youth (as a club) and inexperience, none of the members having shot at bluerocks before we organized, and one at least has always shot the rifle. The attendance of members was not what it should have been. The usual crowd of spectators were on hand, and we had four visitors from Industry, Pa. The day was dark. Match No. 1, 10 bluerocks, 3 traps, Keystone rules:

W Atkins	0001011000—3	W Humm	0000110100—3
Aughenbaugh	1100011110—6	Doc Ewing*	1010011111—7
G A Scroggs	1100111011—7	Knight*	1000001100—3
F Wilson	0000010100—2	Campbell*	1001000101—4
Dr Wilson	0001010010—3	Marker*	1010000100—3

Match No. 2, as above:

W Atkins	1000001000—2	G Q Wolf	1010010101—5
Aughenbaugh	0101110101—5	Doc Ewing	1001111011—7

*Visitors.

ELMSFORD, N. Y., May 30.—Irvington Gun Club, 5 glass balls, 18yds. rise:

Lefurgy	00000—0	Conklin	01010—2
Menzies	11001—3	Rowley	11011—4
Acker	11011—4	Lawton	10000—1
Ward	10111—4	Wilseas	00110—2
Hughes	00010—1		

On shoot-off, Rowley first, Menzies second, Conklin third. Five glass balls:

Hughes	00000—0	Rowley	00010—1
Menzies	01101—3	Taylor	01100—2
Acker	11101—4	Cameron	00010—1
Conklin	11010—3	Ward	10110—3
Lefurgy	01101—3	Strickland	00110—2
Wilseas	10111—4		

Wilseas first, Menzies second, Taylor third. Five bluerocks:

Ward	00111—3	Lawton	01111—4
Acker	10111—4	Conklin	01011—3
Wilseas	01101—3	Lefurgy	00000—0
Rowley	00111—3		

Acker first, Ward second.

Match at 5 bluerocks: Ward 3, Rawley 2, Lawton 2, Acker 3, Wilseas 2, Conklin 4, Lefurgy 2, Strickland 1. On shoot-off Ward second.

Four of the club shot 5 live birds each for practice, 25yds. rise: Acker 3, Menzies 3, Wilseas 1, Conklin 5.

Same as above: Wilseas 3, Menzies 2, Acker 3, Conklin 3.

Match at 5 bluerocks: Ward 3, Rawley 1, Lawton 2, Acker 2, Wilseas 1, Lefurgy 3, Conklin 0.

Match at 5 bluerocks: Rawley 5, Menzies 4, Acker 2, Wilseas 4, Ward 2, Taylor 1, Strickland 1. On shoot-off Menzies 2d, Ward 3d.

Match at 5 bluerocks—Rowley 4, Acker 1, Ward 2, Menzies 2, Lawton 2, Strickland 3.

Match at 5 bluerocks—Rowley 4, Menzies 2, Acker 2, Taylor 0, Wilseas 0, Ward 3.

In a match at 5 bluerocks, Rowley and Menzies scored 3 each, total 6, against Ward 2 and Strickland 1, total 3.

Match at 5 bluerocks—Rowley 5, Menzies 3, Ward 4, Lawton 2, Acker 1, Wilseas 2, Taylor 1, Strickland 2, Conklin 2, Lefurgy 0, Hughes 1.

WARSAW, Ill., May 23.—The regular shoot of the Northwestern Gun Association, representing prominent sportsmen from Missouri, Illinois and Iowa, was held at the fair grounds in this city to-day. There was a good attendance. Clay and live pigeons were used, with National and Illinois rules, respectively, to govern. Ties divided. The scores:

Shoot No. 1, 10 single clays, 18yds. rise:

Worthen	1111011111—9	Britenstein	1101010111—7
D Conover	1100011111—7	John Conover	1110111111—9

No. 2, 10 singles, two moneys:

Worthen	1100001110—5	John Conover	1111111110—9
Britenstein	0011101111—7	L P Conover	0110110111—7
Landis	1111100011—7		

No. 3, 10 singles, two moneys:

Sargent	1111111111—9	Worthen	1111011110—8
Britenstein	1110011111—8		

No. 4, live birds, 21yds. rise, Illinois rules:

No. 8, 5 singles, two moneys:

Britenstein	11011—4	John Conover	10011—3
Worthen	11101—4	Feuhling	11111—5
L P Conover	01000—1		

The wind was high and the birds were too tame for good shooting. Heavy rainfall put an end to shooting at 6 o'clock.

BROOKLYN, May 28.—The Diana Sportsman's Club were well represented to-day at their fifth monthly shoot of the season at Koch's Bay View Park. Eighteen members went to the traps to shoot for the gold medals of the club, nine in each class. The first shoot was at 5 glass balls, the highest average for six months to win the special prizes given by the club. D. Sullivan, M. Brown and A. Botty scored 5 each. The next competition was for the first and second class club badges, each member to shoot at 10 bluerocks, club handicap. J. Scharff 22yds., M. Brown 18yds., and D. Robinson 18yds. tied with 8 each, and, on shooting off, Scharff won with 3 straight. H. Lorey, 18yds., won the second class medal with 7 out of 10. The following is the score of the first class:

D Froligh	0101110110—6	M Brown	1111011110—8
J Scharff	0011111111—8	J Koch	01011 w—3
D Sullivan	0111010011—6	D Robinson	1110111101—8
C Koch	0000111011—6	A Botty	0011111001—6
H Brower	1001011011—6		

Second Class:

P Adamsky	1011011000—5	J Hartman	0010101111—6
A Meyer	1100011001—5	H Baden	1101011001—6
H Grimm	0010111000—5	F Gutberlet	1001101010—5
C Medler	0111010110—6	H Lorey	1010011111—7
C Ring	0101011001—5		

Referee, Mr. D. Froligh. Scorer, Mr. C. Medler. After the regular shoot some sweepstake shooting took place.

ST. PAUL, Minn., May 25—*Editor Forest and Stream:* The St. Paul Gun Club had its usual badge and sweepstake shoot to-day at the fair grounds for the last time. The new grounds close to Hamlin station are nearly completed and will be ready for use next week. The attendance was smaller than usual, as many who shot through the Indianapolis tournament did not come out. The day was perfect, bright, and little wind, just enough to remove the smoke. Peoria blackbirds, 5 screened traps, 18 and 15yds. rise, 10 singles, 75 cents entrance, three moneys:

Bennett	1111111111—10	Forbes	1011110111— 8
Hamlin	1101111011— 8	Pfister	1111111111—10
Dandy	1011001011— 6	Chantler	0110101111— 7
Max	1111111011— 9		

Industrial challenge badge, 15 singles and 5 pairs, entrance $5:

Forbes	0011111111111	11 10 11 11 10—21	
Max	1011110111111	10 10 11 10 11—20	

Forbes wins badge the second time.

Fifteen singles, $1 entrance:

Bennett	111110111111111—14	Pfister	111110111111111—14
Hamlin	111111111111111—15	Chantler	011101111111110—12
Dandy	010011111001111— 9	Skinner	111111111111111—15
Max	101101111100111—11	Cumings	111011101110111—12
Paul	111110011111111—13	Johnston	001011000010010— 5

Ties div.

Five singles and 3 pairs, $1 entrance:

Bennett	11111 01 11 11—10	Pfister	11101 10 10 10— 7
Hamin	11111 11 11 10—10	Chantler	00111 10 11 11— 8
Dandy	11101 11 00 11— 8	Skinner	11110 11 11 11—10
Max	01101 00 10 00— 4	Cumings	10101 11 11 10— 8
Forbes	01111 10 10 10— 7	Johnson	10010 10 10 10— 5

Skinner first on shoot-off, Chantler second, Forbes and Pfister third.

Same conditions:

Bennett	11110 01 11 10— 8	Pfister	11111 11 11 10—10
Hamlin	11100 10 11 01— 7	Chantler	10100 10 11 10— 6
Dandy	10111 11 10 11— 9	Skinner	11111 01 11 11—10
Max	01001 10 10 11— 6	Cumings	11111 10 10 11— 9
Forbes	11111 11 11 11—11		

Ten singles, $1 entrance:

Bennett	1101111101— 8	Chantler	1111111111—10
Hamlin	0011011101— 5	Skinner	1111101111— 9

Max	1111111111— 9	Johnson	1010001000— 4
Forbes	1110111111— 9	Field	0111111101— 8
Pfister	1111010011— 7		

All ties shot off. Chantler first, Skinner second, Field third.

Club badge shoot, 10 singles and 5 pairs, $1 entrance:

Bennett	0111110111	11 11 10 11 11—17	
Hamlin	1111111111	11 11 10 11 10—18	
Dandy	0101110111	01 10 11 11 01—14	
Max	1011111111	11 11 10 10 10—16	
Forbes	1111010111	10 10 01 11 11—15	
Pfister	0010010111	10 10 10 10 11—11	
Chantler	0111111101	11 10 11 01 00—14	
Skinner	1101111011	10 11 11 11 11—17	
Cummings	1101111111	10 01 10 11 10—15	
Field	1111110101	10 10 10 10 11—14	
Blake	0001001111	10 10 00 10 01— 9	

Hamlin takes badge and first, Bennett and Skinner div. second, Max wins third.

Last event, 5 pairs:

Bennett	11 11 10 11 01—8	Pfister	11 00 11 11 10—7
Chantler	11 11 10 11 10—8	Pants	10 10 00 10 10—4
Dandy	11 01 10 10 01—6	Cummings	11 11 11 11 10—9
Hamlin	11 10 11 11 11—9	Field	10 11 11 10 11—8
Max	10 10 11 11 10—7	Blake	00 11 11 10 10—6
Forbes	11 10 10 11 11—8		

Hamlin wins first, Forbes second and Max and Pfister third.—WILLIAMS.

SAN FRANCISCO, May 19.—The Lincoln Gun Club held its second medal shoot for the present season at Alameda Point to-day. This club is the oldest and largest in the State. It was organized first in 1877, and commenced shooting at glass balls in Colma. When the Ligowsky clay-pigeon was introduced the club at once gave up the glass balls and adopted the clay discs. Four years ago the grounds were changed to Alameda Point, as the pious Colma folks objected to the noise on Sundays. Last season the Lincoln Club kept pace with the times and took to the Cleveland bluerocks, which appear to give very satisfaction. The match to-day was for the first and second class medals at 20 single bluerocks, 18yds. rise, International rules to govern. In the first class the scores were plentifully sprinkled with duck eggs, the shooting on the whole being away below the usual average. Scovern won the first class medal. Richter took the leather medal with 7. C. Mellish won the medal last month with 15 breaks.

C Cate	11001111010101011110—13	Richter	01110001110000000100— 7
Wentzel	00110111111010000011—12	J Foster	10101010001010111100—10
Karney	01011101010100000101—10	Bruns	10111110010101010010—12
Campbell	11100000010011111011—11	Scovern	10011111111110011011—15
Potter	11011000011010010001—10	Parks	11011100000011111011—12

In the second class six men shot, the match ending in a tie between Venker and Quinton. They shot off at 3 pairs, Venker winning for the second time with two breaks. The medal shoots commenced at 10 A. M. sharp, all coming later being barred out by the rules of the club:

Venker	11010001010010011010—10	Bovee	11010010000001000010— 6
Holmes	00001011110101000010—10	Cohen	01060000010001000000— 3
Quinton	11010101001011000110—10	Horber	00000000010110011001— 6

The Blue Rock Club has made arrangements with the Lincoln to have the use of its grounds for three days in each week. The grounds are hard to shoot on as the background is bad, and the shiny dust, composed of broken shells, is very apt to dazzle the eye. After the medal shoots had been decided, pool shooting was in order, and a 10 bird sweepstake, $2 entrance, was started with 11 shooters. Cate and Campbell divided first and second money, and Bruns and Scovern third. The day was extremely hot up to about 4 o'clock, when a light breeze sprung up and made things a little more pleasant. The Lincoln Club held a election of officers last week, when the following were elected: Pres., F. C. Quinton; Vice-Pres., S. R. Holmes; Treas., R. Wentzel; Sec., F. J. Cohen, and Sergt.-at-Arms, J. Karney.

SHARP TEAM MATCH.—Great excitement has prevailed for the past month or more among trap shooters of western Pennsylvania, over a live-bird match which was made between James Clark, Francis Reinoehl, and Winfield Bock, all of Lebanon, Pa., against A. C. Krueger, of Wrightsville, Pa.; Wm. Fieles, of Christiana, Pa., and Chas. Franciscus, of Columbia, Pa. The match was made for $75 a side, and forfeits were posted a month ago. The match came off on Decoration Day at Mount Gretna. The entire match was shot and finished in two hours, and no dispute occurred to mar the pleasantness of the affair. The match was at 25 birds each, Rhode Island rules to govern with exception of boundary. There was no boundary, three minutes to gather birds. The birds were an excellent lot for this time of year. Mr. Krueger used a 10-gauge L. C. hammerless, and 24 of his 25 were hard, clean kills; only one flew a short distance after being shot. Mr. Fieles commenced with his own gun and ammunition, a 15-gauge Greener hammerless, and wood powder shells, and lost four birds out of his first six, and then changed off and shot Mr. Krueger's $80 gun and ammunition, and killed his next 19 straight. The result cannot be attributed to any luck on the part of the winners, for the losers were rather favored by a majority of easy birds, incomers, etc. Difficult shots were made by all, but especially fine shots were made by Krueger, Bock and Franciscus. The following are the scores in total:

A C Krueger	25	James Clark	21
W R Fieles	21	F Reinoehl	20
C Franciscus	19—65	W Bock	22—63

BANNERMAN.

WILMINGTON, Del., May 30.—The regular monthly shoot of the Wawaset Gun Club was held to-day on the grounds of the club. The high wind interfered with the shooting, but some good scores were made. The shooting was at standard targets. The badge was won by R. Miller. The scores were as follows:

R Miller	1111111111111—15	11 11 11 10 11—9—24	
L Fox	1111111101111110—13	11 11 11 01 10—8—21	
W H Hartlove	1111111101111—14	11 11 00 10 01—6—20	
G M Buckmaster	0100011101111111—11	11 11 11 00 11—8—19	
P Ambold	1100011101011111—10	10 11 11 10 11—8—18

J Green	1110111011111—13	10 10 00 00 10—3—16	
A R Stout	0011010111101111— 9	10 10 11 00 11—6—15	
D Buckmaster	1101010101011110— 9	10 01 10 10 10—5—14	
N B Hill	1101010011001101— 8	10 01 10 00 01—4—12	
J Brown	1011011010100101— 8	01 00 01 00 11—4—12	
T Weldon	1110000110011111— 9	00 00 10 00 10—2—11	
J Colwell	1010100001010110— 6	10 11 00 10 00—4—10	

CAMDEN, N. J., May 30.—The Camden Gun Club had a tournament at their grounds at Stockton Park to-day. The first prize in the first class was won by John F. Armstrong, who killed 27 birds out of 30. I. V. Pancoast won second prize, killing 24 birds. In the second class Joseph Ridgway killed 22 and won the first prize. J. W. Chalmer killed 21 and came in second. Henry Warrington was the winner in the third class with 19 dead birds. A. J. Millette came in second, with 18. Geo. K. Oregian was judge and R. T. Miller, referee.

LEONIA, N. J., May 30.—The Eureka Gun Club of New York city came out for a set-to with the Leonia Club on the ground here and enjoyed a good time and a beating. The scores stood:

Leonia.

Capt H R Goesser	01111101111111101100– 15

WILMINGTON, Del., June 1.—The Wawaset Gun Club visited Kiamensi to-day and shot a return match with the Gun Club of that place. The Kiamensi have good grounds and a suitable club house. The club contains some good shots. The match proved an easy victory for the Wilmington Club by a score of 209 to 144. The shooting was at clay-pigeons from five traps at 18yds. rise, 15 singles and 5 pairs:

Wawaset Gun Club.	S.	D.	Kiamensi Gun Club.	S.	D.
C Buckmaster	13	10–23	W Allen	8	6–14
A H Stout	8	4–12	W Ruth	6	2– 8
J Ryan	13	7–20	G Lancaster	5	4– 9
G Miller	12	6–18	W Deighton	9	4–13
W Buckmaster	11	5–16	J H Crouch	8	4–12
W Sillitoe	10	4–14	E Riley	5	2– 7

W McKendrick	12	7–19	T Gray	7	4–11
R Miller	13	10–23	F Mann	8	4–12
	209				144

The match was shot in the presence of 300 spectators, many being ladies.

BROOKLYN, May 30.—The members of the Fountain Gun Club extended to the several shooting orgaizations in this vicinity the invitation to join them in a team shoot at Woodlawn Park, Gravesend, to-day, but although there were a large number of wing shots present they did not seem to care about shooting. Sides were chosen by Captains Eddy and Wingert, seven on each team. Following is the score 25yds.:

Eddy's Team.		Wingert's Team.	
A Eddy	1110110011–7	C W Wingert	1111110111–9
Dr Shields	1111011111–9	W A Stuart	0011111101–7
C A Seddons	1110111101–8	H Thorpe	1111111011–9
A Nason	0001111001–5	G L Ayers	1101111111–9
A Crook	1111101111–9	J Beacham	1011100010–5
E K Morris	0000111101–5	J A Carney	0100000000–1
H Blattmacher	1001011101–6–49	H Blitz	1011011011–7–47

Referee and scorer, Mr. C. A. Dellar.

CHICAGO, May 28.—The trap shooting on the Government pier was not very well attended to-day, probably on account of the cold weather. Mr. Deiter was somewhat handicapped by shooting a new Lefever gun which he had just purchased. Following are the scores made by Messrs. Sherman and Deiter at two strings of 25 Keystones:

Deiter	1100110000111111101101110–16
Sherman	1011101110101100111111011–18
Deiter	0011111010110111110101111–18
Sherman	1011111111111111111111111–24

WORCESTER, Mass., May 24.—At this week's meet, at Coal Mine Brook Range, of the Worcester Sportsmen's Club, the classification contest was renewed. There were six events in the classification, with a possible 30 birds, and in the prize score a possible 10. The work in detail follows:

Class A. Classification. Prize			Classification. Prize		
Geo Sampson	23	10	C H Howe	26	7
M D Gilman	27	9	A R Bowdish	24	6
E T Smith	26	9	Class B.		
G J Rugg	23	9	A L Gilman	21	10
E F Swan	22	9	C R B Claflin	19	7
Dr Bowers	24	8	E S Knowles	20	6
W D Dean	22	8	F Foreham	13	4

BROOKLYN, June 1.—The Crescent Gun Club, which has been in existence but a short time, held its second shoot at Dexter's Park. There was a large turnout of club members, of which five only took part in the shoot. There were two contests, the first of which was for the club badge at 23, 24, 25 and 26yds. Each man shot at 7 birds each. W. Gilman (28yds.) won the badge by killing 5 out of 7 birds. H. Hubbell killed 4 birds. The following is the score:

J Matthews	0000001–1	W Gilman	1011011–5
L Hopkins	0101010–3	H Hubbell	1001101–4
H Skidmore	0010011–3		

After the regular shoot a match for sweepstakes between the same team took place. The match was at 3 birds each, with a 25yds. rise, and resulted as follows:

W Gilman	110	111–5	L Hopkins	011	110–4
H Hubbell	111	001–4	J Matthews	100	110–3
H Skidmore	110	010–3			

DAVENPORT, Iowa, May 30.—The Forester Gun Club met on Decoration Day for a holiday shoot. Owing to the cold and unpleasant weather the attendance was low. The following were the two principal shoots. Shoot No. 1, at 10 Keystone targets:

Shado	1111110101–8	Davis	1110111100–7
Emerson	1011111010–7	Brannigan	0001101111–6
Grey	1101101110–7	Maser	1010100101–5

Shoot No. 2:

Brannigan	1110111111–9	Van Horne	1010011110–6
Emerson	0101111111–8	Culins	0011011110–6
Davis	1111011011–8	Shado	1001110001–5

R Peet	1011101111–8	W Hall	1010101110–7
F L Briggs	0110011010–5		

A ZIG-ZAG TARGET.—Speaking of trap matters reminds me of another Chicago invention, which ought to be added to the mention made earlier of sporting inventions and appliances which have been the product of Chicago men. A South Chicago young man has invented, and will soon have patented an artificial target which is said to be truly a corker. It has a pasteboard rim or wing molded into it at such an angle that it imparts to the bird an erratic zig-zag, which discounts a jacksnipe. The bird flies 80yds., and if the shooter doesn't break it at once and promptly it is liable to come around and hit him the back of the neck. This bird is calculated to remove from artificial target shooting all imputation of its being a mechanical and monotonous pursuit.—E. HOUGH.

COLLEGE SHOTS.—The Harvard Shooting Club defeated the Yale Shooting Club at Cambridge, Mass., May 25, by a score of 121 to 98. The Harvard Gun Club has challenged the Columbia Rod and Gun Club to an inter-collegiate gun match at Watertown, Mass. The University of Pennsylvania will also be represented.

MONTREAL, May 30.—A 50 bird match was shot off on the Dominion Gun Club's grounds this afternoon between two of the club's rivals. There was nothing in the way of stakes up; it was just a friendly match. The day was a bad one for good scores, as it was blowing a gale from the northeast, and from No. 1 and 4 traps the birds were beaten down to the ground before they went 20yds, while the other birds took all sorts of queer directions. Mr. Hackland came off victorious with 37 broken out of 50, while Mr. B. Gustay got 26 out of his 50.

WORCESTER, Mass., May 21.—This week at the regular meet of the Worcester Sportsmen's Club, at Coal Mine Brook Range, the principal event was the second contest for the Norcross trophy, which at the first contest was secured by M. D. Gilman, he making a total of 28 out of a possible 30 clay-pigeons. The birds are thrown from open traps. The wind was very strong and the flight was very irregular and deceptive. The work in detail follows: E. T. Smith 27, G. J. Rugg 26, C. R. B. Claflin 24, E. F. Swan 24, M. D. Gilman 23, E. S. Knowles 22, C. Crompton 22, H. D. Jourdan 21, E. B. Burbank 20, A. L. Gilman 20, C. H. Howe 20, Dr. Bowers 20, Geo. Sampson 19, F. Forehand 16, H. Colvin 16, C. H. Morse 15, C. Forehand 14.

NORFOLK, Neb., May 21.—The Nebraska State shoot, which was to open here to-day, is a fizzle. Stice and Parmalee came up and the local shooters got scared apparently, and a baker's dozen was all that could be got for the first few matches, and the programme was not carried out. Everybody went home after the first day. This is unfortunate and to be regretted, and we must hope the Norfolk boys will have better luck next time. Do they read FOREST AND STREAM? Have they seen the Loyd system.—E. H.

MASSACHUSETTS STATE SHOOT.—The tenth annual tournament of the Massachusetts State Shooting Association on June 17 and 18 will probably attract the largest crowd of this year. All the association badges will be contested for, and the Jamaica Plain Gun Club, on whose grounds the sport will take place, are now making preparations for the event.

AMERICAN SHOOTING ASSOCIATION.—As it does not seem to be thoroughly understood that all persons attending and shooting in the tournament given by the American Shooting Association must qualify by filling out one of their classification certificates and sending it to the association's office in New York, and get a card in return, it has been determined that the manager shall receive all certificates properly filled out and presented to him at Cincinnati, the place selected for their first tournament, where he will issue necessary cards. This action is taken that no one who may attend will be deprived from shooting in his proper class. It is further decided that any shooter may have a *nom de plume* added to his name on his card, which may be used in his shooting.—J. M. TAYLOR, Gen'l Manager.

STOUGHTON, Mass., May 30.—The Port Rosaway Gun Club had a good day's sport on their grounds at Stoughton to-day, in sweepstake shooting, and a close match between the youngsters and the veterans. The winners in the sweepstakes were: Lamb, Harrison, Francis, Belcher, Francis, Gage, Belcher, Francis, Henry, Loring and Francis, Henry, Loring, Morse, Gage and Bird, 16 events. The challenge match resulted in a victory for the youngsters as follows: Youngsters—Henry 9, Morse 8, E. Gage 7, F. Gay 6, H. Bird 7, total 37. Veterans—W. White 4, H. Loring 8, H. Belcher 6, G. Lamb 9, H. Francis 9, total 36.

C. J. PENROSE of the Keystone Target Co. passed through the city one day last week *en route* for home after the tournaments at Norwich and Hartford. The Illinois shooters will have the pleasure of his company at their shoot next week. "Pen." says the Keystone tournament to be held in August next will astonish some people. It is to be held on new grounds, which are being fitted with several new wrinkles in the trap-shooting line, and it is expected that, with their aid, the events can be run off even more rapidly than before. We understand that the diamond ring, which is annually put up for competition to become the property of the winner, has been ordered.

ST. LOUIS, May 29.—The Orange Special Gun Club has organized with the following members, and they will shoot exclusively at Peoria blackbirds and Keystone targets on every Sunday: G. W. Steininger, President; C. Reddicker, Vice-President: Charles Kunz, Secretary and Treasurer; Aug. Ruff, Field Captain; Chas. Barton, A. H. Laflin, Theo. Runzle, C. H. Prior, H. Wolf, J. Hunckler, J. Ruff, John Kern, Wm. Holtkamper, Wm. Lidderwirth, F. Pitz, J. Pfeiffer, G. B. Reid, Wm. Meler.

CONNECTICUT TRAP EVENTS.—The Manchester Gun and Game Club will give a tournament on the 20th....The Parker Club, of Meriden, hold a tournament on the 18th... It is the intention of the Colt Gun Club, of Hartford, to give a two days' tournament in September, and in every respect it will surpass the one just held. From now out there will be only the ordinary medal shoots until the next tournament.

TACONY, Pa., May 30.—William H. Wolstencroft, of the North End Gun Club, gave an exhibition of fancy shooting at the Driving Park to-day. Among other curious feats he broke 3 bluerocks sprung at one from 3 traps, with a Winchester repeating shotgun.

MASSACHUSETTS ASSOCIATION.—The annual tournament of the Massachusetts State Shooting Association will be held June 17 and 18 on the Jamaica Plains Gun Club grounds at Clarendon Hills.

AMERICAN SHOOTING ASSOCIATION.—The American Shooting Association makes no charge for its trap-shooting rules, or any blanks that are sent out on application of any one. There seems to be an impression that a charge is made. Our trap-shooting rules, programmes for tournament, and all blanks for classification and for registry of clubs will be mailed free to any one making application for them.—J. M. TAYLOR, Gen'l Manager.

RANGE AND GALLERY.

MASSACHUSETTS STATE SHOOT.

BOSTON, June 1.—The spring meeting of the Massachusetts Rifle Association closed to-night after a very successful three days' shoot, and the result shows that the members of this club hold their ground well against all comers. Below will be found the detailed scores and prize winners, each winning on his five best scores in each match. All-comers' off-hand match, 7 shots per score, 200yds., possible score 70, possible aggregate 350, military rifle allowed 25 points:

A C White(mil)	60 59 58 57 56–315	A E Knowlton	59 58 56 57 57–289
W Charles(mil)	62 61 58 54 54–314	A Edgerly	60 58 57 56 56–287
C M Hill	63 63 63 62 61–312	A L Brackett	57 57 57 56 55–282
E F Richardson	65 63 63 61 60–312	G H Pierce	59 59 56 54 54–282
W O Burnlie (m)	63 57 57 56 56 309	W E Smith (mil)	53 51 50 50 49–278
W M Farrow(m)	61 56 55 55 55–307	F Daniels	57 57 56 54 51–275
O M Jewell	63 62 61 61 59–306	J W Bean	57 57 55 52 50–271
E T Stephens	62 62 60 60 60–304	Z C Talbot (mil)	51 50 48 46 46–266
J S Howe	62 62 60 60 58–302	J H Jenkins	57 56 52 51 49–265
Johnston, Jr.(m)	61 57 55 53 51–302	F B Edgell	55 54 53 51 49–262

S Wilder	77 75 75 75 74–376	W P Stevens	69 68 65 64 61–327
J N Eames	81 77 72 70 70–370	H A Perkins	65 64 63 62 60–314

500Yds. Military Match— shots, Creedmoor target:

M Winthrop	32 32 31 31 29–155	A McCarthy	29 29 29 27 25–139
T Bond	32 31 31 30 30–154		

50Yds. Pistol Match—7 shots, decimal target:

H E Tuch	68 66 66 65 65–330	Z C Talbot	64 62 62 59 59–306

BELLEVILLE, Ont., May 29.—The Forest and Stream Club held their second rifle match to-day under unfavorable circumstances, there being a heavy wind at the range. The following is the score out of a possible 100, 10 shots at 100yds.:

	Score.	Hdcp.		Score.	Hdcp.
W H Biggar	53	16–69	J Jenkins	17	25–42
W Mills	50	17–67	J T Bell	31	20–41
J H Mills	51	15–66	R S Bell	28	12–40
R A Davis	40	12–60	E G Porter	19	17–36
R Day	43	19–59	H Tammadge	17	18–35
T S Clark	27	25–52	J H Bell	18	15–33
G Twining	37	7–44	W P Clarke	10	20–30
G F Thompson	26	17–43	E Cronk	12	17–29

THE BULLARD RIFLE MATCH.

SPRINGFIELD, Mass., June 3.—Inclosed please find scores in the match shot May 20 to 25 last. The match is the fifth one in the series. The prize a gold medal, to be won three times by the same individual before it becomes his property. The match has been won three times by Mat Gindele, Cincinnati, O., and he is awarded the champion marksman's badge. The first and second matches were won by Mr. Gindele in 1887, Geo. H. Wentworth, Dover, N. H., in May, 1888, and J. A. Huggins, Pittsburgh, Pa., October, 1888. Mr. Gindele third time in May last. The match has brought out the leading marksmen, and as the match progressed the scores have been increased until the magnificent score of 447 wins the prize. The score of Dr. A. J. Marling, Greenville, O., 200yds. off-hand at American standard (Hinman) target, is worthy of special mention, 95, possible 100

THE CREEDMOOR PROGRAMME.

THE directors of the National Rifle Association will hold a 10-days' shooting during the three summer months with matches especially for National Guardsmen according to the following programme:

The Qualification Match of 1889.—Members of the N. G., S. N. Y. being in uniform, may count scores as qualifying them to shoot for the N. Y. State marksman's badge, 100 and 200yds., 5 shots at each range, Remington rifle, .50cal. (N. Y. State model), standing at 100yds., kneeling or sitting at 200yds., entrance fee 25 cents each, competitors allowed re-entries in each competition at the discretion of the executive officer.

The Marksman's Badge Match.—Open to all members of the N. G., S. N. Y., 200 and 500yds., 5 shots at each range, Remington rifle, .50cal. (N. Y. State model), standing at 200yds., lying prone at 500yds., entrance fee 25 cents each. Members of the N. G., S. N. Y. in uniform may record their scores in this match and be qualified for the N. Y. State marksman's badge, provided that if ordered they have attended (or do once during the season attend) general practice, and provided they have previously qualified or do subsequently so qualify in the second class (100 and 200yds.). See qualification match.

The Sharpshooter's Match.—Conditions as to distance, weapon and position same as in the marksman's badge match, entrance fee 50 cents each or three for $1, if taken at one time and in one name, but only one score to count, open to members of the N. G., S. N. Y. and N. R. A., members of the N. G., S. N. Y. in uniform may record their scores in this match as qualified for the N. Y. State marksman's badge, provided that if ordered they have attended (or do once during the season attend) general practice, and provided they have previously qualified or do subsequently so qualify in the second class (100 and 200yds.). See qualification match; first prize 10; second, 8; third, 6; fourth, fifth, sixth and seventh, 4 per cent. of entrance money.

The competitor making the highest score in each match will be awarded a gold marksman's badge for 1889, offered by the National Rifle Association, to be held by him until the next succeeding match, the badge to finally become the property of the competitor who shall win it the greatest number of times prior to Nov. 5, 1889. In case of a tie it will be decided in favor of the competitor having the next highest total score (or scores) made on a date other than on which he was a winner, and only the highest scores made on any day to count.

Any prize winner making a score of 45 or over may, if he so elects, receive a silver medal in lieu of cash, and a winner making a score of 43 or better may receive a bronze badge in place of a money prize, but any winner of a medal or badge cannot afterward compete for a money prize.

Extra Prizes.—Any winner accepting a cash prize may in any subsequent match win a silver medal by making a score of 45 or over, or a bronze badge by scoring 43 or over, and any winner of a bronze badge may, in any match, by making a score of at least 45 points, be entitled to exchange the same for a silver medal.

No competitor can win both a badge and a medal or more than one cash prize.

Winners of medals and badges of 1887 and 1888, who make scores entitling them to again receive such prizes may, if they so prefer, receive a bar for the year 1889.

Messrs. A. B. Van Heusen, Wm. Robertson, J. L. Price, C. H. Eagle, T. J. Dolan and E. T. Lockwood, winners of the champion marksman's badge for the year 1876, 1877, 1878, 1879, 1880, 1881, 1882, 1883, 1884 and 1885, and G. W. Munson, J. S. Shepherd, J. F. Klein, S. C. Pirie and G. S. Scott, Jr., winners of the gold marksman's

badges of 1883, 1884, 1885, 1887 and 1889, also members of the National Rifle Association, are not eligible to win the principal prize in this match.

The shooting days for the several matches are as follows: June 8 and 15, July 4, 13 and 27, Aug. 3, 10, 17 and 24, and Sept. 2, commencing at 9:30 A. M., except July 4, when shooting will begin at 8:30.

WILMINGTON, Del., May 30.—Healdmoor rifle range was open all day to-day and riflemen were on the ground early prepared for a full day's sport. The threatening weather prevented many from coming who were expected, but there was a good attendance, and Decoration Day was pleasantly celebrated. In spite of the blustery east wind, which blew directly in the faces of the marksmen and made good holding difficult, some good scores were made. Revolver and pistol practice is steadily growing in popularity, and with the rifle partakes of about an equal share of the fascination of target shooting. Following are the scores in detail, standard American target, off-hand:

Revolver Match, 50yds.

E J Darlington	10	10	6	4	4	10	8	10	8	10—80
H Simpson	10	4	8	8	6	8	7	6	8	8—73
E Jackson	5	9	7	6	8	6	7	6	8	8—70
D Evans	8	7	5	8	10	5	7	4	6	5—65
H Johnson	5	6	5	5	6	8	5	5	5	4—54

ST. LOUIS, Mo.—The St. Louis Pistol Club has again met the enemy and again is the enemy ours, but by a much smaller margin than the first match. The Cincinnati Club pulled up wonderfully, making a gain of 54 points. The most noticeable gain was that of Wicks, who in the first match was low with 51, and in the second was high with 87. It is rumored here that he did not sleep at all during the week, but spent all of his time practicing, and in consequence got there all O. K. For St. Louis, two of its best shots were absent, but still they dropped only 3 points below the first score. The last match of the season will take place next Tuesday, but as the St. Louis Club has a lead of 113 points, it will be easy to pick the winner. Below will be found the score on the standard target, 12½yds., Massachusetts Rifle Association rules for pistol shooting governed the contest:

St. Louis Club.

L V D Perret	8	8	10	10	8	9	6	9	9	9—86
M C Billmeyer	9	8	7	7	10	5	6	10	10	9—81
W H Hettel	8	10	4	10	8	8	7	7	9	7—78
O Neuhaus	8	8	10	10	9	8	10	7	9	10—89
E C Mohrstadt	10	6	9	10	9	10	9	8	9	10—90
G W Alexander	8	9	9	7	9	6	8	8	8	7—79
W Lard	9	6	8	7	7	7	7	10	8	8—77
W Bauer	10	8	7	9	8	5	7	10	10	6—80
O Wallace	10	8	5	5	7	7	10	7	9	7—75
M Summerfield	10	10	10	10	10	8	10	8	9	8—93—828

Cincinnati Club.

H Goodman	74	E Wilson	75
Wick	87	C Wellinger	87
Al Bandle	82	B Copeland	84
G Hopkins	74	B J Robertson	83
G Kaufman	82	J Beiser	82—800

Bad weather interfered with the attendance at the regular weekly shoot of the St. Louis Pistol Club. Below will be found the scores on the 30yds. standard target reduced to 20:

M Summerfield	7	10	9	9	10	8	8	10	7	10—88
O Wallace	10	8	8	8	7	9	10	8	7	10—85
L V D Perret	5	9	8	9	8	8	10	8	9	10—84
E C Mohrstadt	9	8	9	8	9	7	7	8	8	10—83

A E Bengel	6	4	4	8	8	0	6	7	4	0—47

UNSER FRITZ.

HARTFORD, May 30.—Opposing rifle teams from the Franklin Rifle Club, selected by W. W. Tucker and D. Stuart, contested at the range this afternoon for a supper. The shooting was very close and resulted in a victory for Mr. Stuart's team:

W. W. Tucker's Team.		D. Stuart's Team.	
S J Lyon	70	T H Britton	74
T W Fahy	64	D Stuart	70
W W Tucker	61	H M Pope	61
P K Rand	56	L Robertson	46
Otto Klett	43—294	Frank Covell	46—297

The shoot for the medal was won by T. H. Britton. Following is the score: T. H. Britton 74, S. J. Lyon 70, D. Stuart 70, T. W. Fahy 61, W. W. Tucker 61, H. M. Pope 61, F. K. Rand 56, L. Robertson 46, Frank Covell 46, Otto Klett 43, Geo. Faxon 31.

WORCESTER, Mass., May 30.—Members of the Worcester Rifle Association had a meet on Memorial Day at Broad Meadow Range. The shooting was off-hand, distance 200yds. The work of each man follows:

Sporting Rifles.

Thomas	10	8	10	8	8	8	8	10	8	10—88
White	8	9	9	6	9	10	9	9	6	8—84
Maynard	9	8	8	9	4	7	8	8	7	8—76
Bullane	8	9	7	8	9	7	9	6	9	8—80

Military Rifles.

White	5	5	4	4	5	5	5	5	5	4—47
Logan	4	5	4	4	3	4	5	5	5	4—43
Thomas	4	4	4	4	4	5	4	4	4	5—42
Ferguson	4	4	4	4	4	4	5	4	4	4—41
Smith	4	5	3	4	4	5	4	3	4	5—41

BRIDGEPORT, Conn., May 30.—The weather at Readmoor was all that could be desired to-day for fine target practice and some good scores were made. That of W. H. Beardsley was of the highest order, surpassing his record of 21 consecutive bullseyes made at Newark last summer, by making 25 consecutive. An unfortunate bursting of a shell in the 26th shot broke the record. Continuing the scores for a 60 shot record the same fine holding was continued and in the 60 shots 52 were bulls. As will be seen by the shots there are two clean scores in success, second and third:

7 7 10 10 10 7 10 10 9—88	9 9 10 9 9 9 8 9 8 10—90
8 8 8 8 10 8 8 9 8—83	8 8 7 8 8 9 9 10 9 10—86
7 8 8 10 6 9 9 8 10 8—83	9 9 10 8 9 9 7 7 10 10—88

LINDSAY, Ont., May 29.—The semi-annual spring match of the County of Victoria Rifle Association was held over their range here to-day, with the following participants securing prizes. Wind continuous fishtail:

All-comers' match, 200 and 500yds., 7 shots at each range: M. Thompson 65, W. Gamble 63, Capt. E. H. Hopkins 63, N. S. Young 61, J. H. Sand 60, Capt. Russell 60, Staff-Sergt. Williamson 60, Capt. W. H. Hill 56, J. H. Brandon 56, M. Howie 55, Major S. Hughes 54, D. Sinclair 45, J. H. Oliver 53, Dr. Kenny 51, J. Blackwell 51, J. Goodall 50, Capt. Brown 50, Robt. Sylvester 49.

Association match, ranges 400 and 600yds., 7 shots at each range: Wm. Gamble 57, W. H. Sand 54, Capt. W. H. Hill 52, Major S. Hughes 50, N. S. Young 49, Robt. Sylvester 48, Capt. Russell 46, Staff-Sergt. Williamson 46, Mr. Howie 44, D. Sinclair 42, Dr. Kenny 42, H. Austin 40, J. H. Oliver 40, J. Goodall 39, M. Thomson 39, W. Paine 37, J. H. Brandon 36, J. H. Southeran 35.

Extra series, 200yds., 5 shots, two highest scores to count: R. Strathern 48, Capt. Russell 48, Staff.-Sergt. Williamson 47, M. Thomson 46, Wm. Gamble 46, J. H. Sand 46, N. S. Young 45, Capt. W. H. Hill 45, Major S. Hughes 44.

Major S. Hughes, of Lindsay, won the County Council Cup, while R. Strathern, of Orillia, won the silver cup, being first prize in the extra series.

ARMY SHOOTING.—The competition of distinguished marksmen in the army will take place this year at the Bellevue Rifle Range, near Omaha, Neb., commencing Aug. 27, and will be conducted by Major Guy V. Henry, Ninth Cavalry. The commanding officers of the different departments have been ordered to select the participants, numbering 20 in all. The cavalry rifle competitions will take place Aug. 12, at Fort Robinson, Neb., for the departments of Dakota, the Platte and the Columbia; at Fort Leavenworth Aug. 26, for the departments of the East, Missouri and Texas; at Fort Wingate, N. M., Aug. 20, for the departments of California and Arizona.

SAN FRANCISCO, May 26.—To-day was the greatest day for shooting and enthusiasm that Shell Mound ever saw. The weather was almost perfect, and the crowd was enormous—so great, in fact, that the range had to be partitioned in places to keep the spectators from interfering with the shooters. The event of the day was the twenty-men-a-side match for $100 between Companies C of the Second Artillery and B, First Infantry. The match was the outgrowth of C's defeat at B's hands about a month ago, when 10 men constituted the team. C thought that by increasing the teams to 20 men each it would be able to retrieve its lost laurels. Therefore Captain Huber issued a challenge, and to make it an object put up $100. Each set to work and practiced assiduously for a month. The shooting was far better than could be expected under the circumstances. A strange light played about the targets and the haze and smoke hung lazily around the butts. Throughout the score was very close, and each team took the lead at times, only to lose it again in a moment. Company B, however, retained four of its most steadfast shots until the end, and C having exhausted its able men, was compelled to put inexperienced novices in the boxes and they broke down considerably. Springfield rifles, with 6lb. pull of triggers, and regulation Sin. Creedmoor targets were used. The distance was 200yds., off-hand. Following is B's score: Burdick 45, Shula 44, Unger 43, Ramm 43 Wessen 41, Cook 40, Goetjen 40, Smith 39, Lovett 39, Lundquist 38, Townsend 38, Burdick 38, Bloxome 38, Bone 37, Satzer 37, Cazes 36, Buckbee 34, Sturdivant 31, Taylor 30, Nounan 28—759.

Company C—Capt. Huber 42, Boxton 33, Huber 40, Viebrock 42, Koch 43, Petrie 41, J. Ringen 39, L. Ringen 38, Brooks 34, Tobin 36, Woodall 40, Drieschmann 39, Hustedt 33, Siebe 31, Ruth 36, Repenn 32, Will 38, Menke 35, Wiegmann 40, John Smith 27—739.

The Bay City Rifle Club, which won the gold medal in the recent match open to the different shooting teams of the country, shot for the third time for individual ownership of the medal. According to the rules of the club, six contests will be held, and the member winning it the most number of times will be entitled to its perpetual ownership. Thus far, in two contests, Messrs. Johnson and Hovey have won. The distance was 200yds., each contestant fired 30 shots off-hand, and was permitted to use any kind of a gun under 10lbs., telescopes barred. H. R. Brown, who won it after an animated struggle, deserves great credit for his remarkable performance. He is a young shot, and takes great pains in his work. His score, according to the Creedmoor count, was 46 48, 45—139, in a possible 150.

Then in order came F. Kuhnle 140, J. E. Klein 137, A. Johnson 130, E. Hovey 138, H. Carr 137.

WESTERN RIFLE RANGES.—The future Creedmoor of the Northwest will be at Camp Douglas, Wis., where there is a military reservation of 600 acres. This little village is at the intersection of the two great railway systems. The State Legislature has liberally recognized the present needs of the Wisconsin National Guard by appropriations, and Gov. W. D. Hoard the future needs. The Secretary of War was applied to to allow Army "shoots" here. Mr. Proctor said yes, and Gens. Schofield and Crook, who were present, warmly concurred. So the future competitions of the Division of the Missouri may be looked for here. Apprehension is felt that injunctions will be served on Gen. Ruger preventing further shooting at Fort Snelling. The Commanding General, Dept. Dakota, expects in such case to have his competition at Fort Keogh, M. T., 761 miles west of St. Paul, on the old 5th Infantry rifle range. Lieut. Reade, who has been there, condemns the individual ranges, ten in number, because requiring ten separate targets and markers, shelter, and increasing the dangers. A marker of the 5th Infantry was killed there, and on Monday, May 13, a man of Capt. Mott Hooten's company, 22d Infantry, was wounded at the butt during company practice at fixed distances. Both casualties were due to the butt system, which is unfit for use anywhere except at some little two company post, certainly unfit for Department competition. When the money required to build a secure continuous pit ($400) is allotted, Col. Peter T. Swaine will put Lieut. O. M. Smith, 22d Inf., formerly Inspector Small Arms Firing, Texas, in charge. Lieut. Reade reports to Gens. Ruger and Crook against using Fort Keogh range. Camp Douglas rifle range is only 183 miles from St. Paul. It has good wells, magnificent natural bullet stop, perfect drainage, dry, level, sandy soil and salubrious climate. On this range only the Service military rifles and ammunition will be used.

THE TEAM FOR ENGLAND.—The Massachusetts Rifle Team, that starts for England June 10, had a full practice over the ranges of Fort Warren, Boston Harbor, on Decoration Day. The weather was quite unpleasant with rain and mist, the scoring, as much as could be learned of it, was not up to the standard desired. This can be accounted for, as the team had to shoot from the top of the fort across the main channel over to another island, and with no flags for windage, it was impossible to keep in the four ring. There is but little change from the Creedmoor team of last year. The shooting men will probably be Major Hinman, Lieuts. Bumstead, Eads, Johnson and Hussey, Sergts. Merrill, Bull and Doyle, Privates Huddleson, Farrow, Farnsworth, Bull. Over $5,000 has been subscribed, and there is no doubt about the balance. The first match of the team will be on July 2 with the Berkshire County Team, with London Rifle Brigade on July 3, with South London Team July 4, Sussex County Team July 5, and with the team of the Honorable Artillery Company on July 6. This completes the series, the team then goes to the Wimbledon meeting.

TORONTO, May 29.—The Off-Hand Rifle Association have arranged a series of ten matches. There are eleven clubs. On stated dates each club is supposed to fire over their own range or face to face with some other club. Each club competing can win ten matches or lose ten matches. Any club neglecting to shoot for three matches in succession is dropped from those competing for the championship. The last and final match will be shot at Aurora, Oct. 10, 1889, when all clubs will meet face to face. In recognition of the honor conferred on Aurora, the town has kindly donated $100 in prizes. The first match of the series was shot May 28, and resulted as follows: Orillia 761, Aurora 717, Scarboro 709, Newton Brook 701, King City 691, Tottenham 680, Alliston 620, Point Edward 591.

SPRINGFIELD, Mass., May 31.—Two teams from the City Guard contested in a shooting match yesterday, making a remarkable score and giving a sharp contest. Following is the score:

Johnson	4544454—30	Bowers	5544445—31
Sterling	5444444—29	Merrick	4444444—28
W E Hosmer	4544443—28	Wilcox	4444444—28
Dean	3435544—26	Taft	3434434—24
S E Smith	3343353—26	H J Smith	3443434—24
F L Hosmer	4433433—24	McDonald	4044344—23
Meinerny	2033444—20—183	Davis	4233352—22—180

WORCESTER, Mass., May 30.—Members of the Worcester City Guards, Co. A, 2d Regiment, M. V. M., went out to Peat Meadow Range on Memorial Day. The shooting was with a military rifle, it was off-hand, distance 200yds., and the result follows:

Lieut M H Tisdale	4545444444—42	Pvt McIntosh	4454454444—42
Sergt A Jefferson	5445454544—44	Pvt Bryden	4444434452—38
Corpl W E Wilkins	4444434444—38	Pvt Thompson	54433—19

Canoeing.

Secretaries of canoe clubs are requested to send to FOREST AND STREAM their addresses, with name, membership, signal, etc., of their clubs, and also notices in advance of meetings and races, and report of the same. Canoeists and all interested in canoeing are requested to forward to FOREST AND STREAM their addresses, with logs of cruises, maps, and information concerning their local waters, drawings or descriptions of boats and fittings, and all items relating to the sport.

AMERICAN CANOE ASSOCIATION.

OFFICERS, 1887-88.

Commodore: H. C. ROGERS. } Peterborough, Can.
Secretary-Treasurer: GEO. W. HATTON }

Vice-Com.	Rear-Com.	Purser.
Central Div.	W. R. Huntington.	E. W. Masten, Rome, N. Y.
Atlantic Div.	W. P. Stephens.	L. B. Palmer, 186 Jerolemon St., Brooklyn.
Eastern Div.	H. E. Rice, M. D.	Maxton Holmes, Springfield, Mass.
N'thern Div.	Robert Tyson.	S. S. Robinson, Colin Fraser, Toronto.

Applications for membership must be made to division pursers, accompanied by the recommendation of an active member and the sum of $2.00 for entrance fee and dues for current year. Every member attending the general A. C. A. camp shall pay $1.00 for camp expenses. Application sent to the Secretary will be forwarded by him to the proper Division.

Persons residing in any Division and wishing to become members of the A. C. A., will be furnished with printed forms or application on by addressing the Purser.

WESTERN CANOE ASSOCIATION.

Commodore—J. R. Bartlett, Fremont, Ohio.
Vice-Commodore—D. R. Crane, Chicago, Ill.
Rear-Commodore—C. J. Stedman, Cincinnati, Ohio,
Secretary-Treasurer—O. H. Root, Cleveland, Ohio.
Executive Committee—C. J. Bousfield, Bay City, Mich.; T. P. Gaddis, Dayton, O.; T. J. Kirkpatrick, Springfield, O.

7-23. A. C. A. Meet, Sugar Island, St. Lawrence River.

SEPTEMBER.

8. Puritan, Record Races, No. 5.
14. Ianthe, Annual, Newark.

THE PASSAIC RIVER CRUISE.

THE Passaic canoeists left the Ianthe C. C. at 10 P. M. on May 20, and by midnight were encamped on the old site in Newark Bay, where a sound sleep was enjoyed before the bugle call at 6 o'clock. Breakfast was cooked on the beach, and the fleet was under way by 8:30. At the New Jersey Athletic Club, members of the Bayonne C. C. and of the Pastime C. C., of Red Bank, met the main body, and with a fair breeze and all sail set the canoes fairly flew across the bay to Elizabethport and through Staten Island Sound to Amboy, which the first made by 2 o'clock. The last were in before dark, and all were royally entertained by the members of the Ompoge C.C., at whose club house the cruisers remained until Sunday morning, when with a strong tide and fair wind the Passaic was soon reached.

The regatta committee called the unlimited sailing race at 4 P. M. on Saturday, there were but four entries: Geo. P. Douglas, Ianthe C. C., canoe Nenemooska; Mr. Peterson, Ompage C. C., Naiad; Winfield Scott, Essex C. C.; L. B. Palmer, Ianthe C. C. Idlemere.

There was a reefing breeze and wet sea throughout the race. Mr. Scott upset before the start and withdrew, and Mr. Peterson withdrew after the first round, the course being twice around a triangle. Nenemooska led until the last beat to windward when she was passed by Idlemere, which was ruled out for fouling the buoy at the finishing line. The prize was a beautiful releasing anchor presented by the Ompage C. C., and was awarded to Mr. Douglass.

YONKERS C. C.

THE annual spring regatta of the Yonkers C. C. was held on May 30. The paddling races were:

Single canoes ¾ mile:

Alpha, Everett Masten	1
Golden Rod, Edgar Henriques	2
Day Dream, Louis Simpson	3
Dark Horse, Gabriel Reevs	4

Mr. Reevs broke his paddle at the start.

Tandem canoes, ¾ mile:

Evangeline, H. C. Quick and L. Simpson	1
Nesta, T. L. Oxholm and Talbot Simpson	2
Woneda, A. B. Pattou and J. W. Simpson	3

The final event was a tournament with Masten as spearman and Reevs as paddler in Woneda, and T. Simpson and Henriques in Lanark, the latter team being victorious. An "unclassified" sailing race was won by Evangeline, H. L. Quick, and also the maneuvering race. In the evening an illuminated parade to the new house of the Yonkers C. Y. C. took place, 30 canoes turning out.

IRRAWADDI C. C.—The Irrawaddi C. C. elected the following officers recently for the ensuing year: Com., S. B. Lafferty; Vice-Com., E. S. Hammatt; Sec. and Treas., Joel M. Parker. The club was organized April 25, 1883, and ended the first year of its existence with 7 members. They built a tasty club house in 1884 on the bank of the Mississippi, just below the Government bridge between this city and Rock Island. The house cost $5,000. Putting in improvements this spring amounted to nearly $100. When first organized they devoted their time to races and cruising, but lately they have given up racing and devote their spare time exclusively to cruising about the Government Island and up and down the Mississippi and its smaller tributaries. At present there are only nine members: S. B. Laferty, canoe Ounaway; E. S. Hammatt, Lotus; Joel M. Parker, Naiad; M. C. Smith, Isis; L. E. Knocke, Lucille; M. Bunker, Ishkoodle; T. Q. Wilkinson, Solitaire; C. E. Copeland, M. N. Richardson.

TORONTO C. C., May 24.—The Queen's birthday, May 24, was duly celebrated by the Toronto C. C., a three days' cruise to the Etobicoke River being made by a party of 25, together with 15 members of the Tammany Hall Boat Club, of Toronto. Camp was reached about noon, the day being passed with a ball match and a tug of war. The contestants in the latter were Mason and T. G. Elgie in one canoe and Shaw and R. B. Elgie. The latter gentleman carried a long oar, which he drove into the mud unknown to his opponents, securing a victory for his craft. The two following days were spent pleasantly in camp, returning on the evening of the 26th. The club has just received from the Ontario Canoe Company a new canoe 30ft. long and 50in. wide, for 16 paddlers. Mr. D. B. Jacques is captain, with first and second mates and a purser. Her name is Unktahee, or "God of the waters," and she will be taken to the meet in August.

PEQUOT CANOE ASSOCIATION.—The Pequot C. A. held the closing camp-fire of the "out-of-commission" season at New Haven, on May 27. The attendance was large and the evening passed very pleasantly. The music was furnished by the Pequot Glee and Banjo Clubs, and the programme included speeches, toasts, yarn-spinning and discussions on rig, models, etc. The coming meet in July is promising to be a very successful one. A large race schedule for canoes and cruisers, separate classes, has been arranged, and prizes will be offered for races among all types of boats comprising the club list. Nine members have been admitted since May 1.—F. P. LEWIS, Sec.-Treas.

MONTREAL C. C.—The first regatta of the new Montreal C. C. was held at Pointe Claire, on May 24, the following races being held: 1. Single paddle, half mile with turn, for men who do not own a canoe—Entries: C. Fairbanks, Lachine; Louis Gordon, W. Harrison and Colin Drew, Pointe Claire. Won by Fairbanks; prize, a canoe, presented by Mr. W. H. Cottingham. 2. Tandem paddling, half mile with turn—First, E. A. Nash and E. A. Grissett; second, F. Stewart and C. Fairbanks; third, L. Gordon and W. Harrison. 3. Single paddle, half mile with turn—First, E. A. Nash; second, E. A. Grissel; third, F. W. Stewart.

CORINTHIAN MOSQUITO FLEET.—Proposals for membership: Harold Goodwin, Geo. Eastman, Roslyn; C. M. Foster, canoe, Bridgeport; Levin Huntington, 15ft. centerboard yawl, New Rochelle; Chas. Coughtry, 18ft. cutter; O. H. Chellborg, 18ft. sloop; John S. Harris, 18ft. cutter; C. J. Dunn, C. L. Weyard, 19ft. centerboard yawl.

A. C. A. MEMBERSHIP.—Atlantic Division: D. A. Nash, New York; P. Halstead Scudder, Glen Head. Northern Division: Wm. Maynard, Jr., Stratford, Ont.; A. McKenzie, Gananoque, Ont. Eastern Division: T. Erskin Hamilton, Paul R. Hawkins, Springfield, Mass.

STORMBOUND CANOEISTS.—It is reported that four Washington canoeists who were camping on Analostar Island were caught by the flood in the Potomac and made prisoners for forty-eight hours, until rescued by their friends.

OUTLINES OF LESSONS IN BOTANY.—For the use of teachers, or mothers studying with their children. By Jane H. Newell. Illustrated by H. P. Symmes. Boston: Ginn & Co. This thoughtful little work is quite a new departure in the method of teaching botany. Rudimentary works confine themselves mainly to instruction in classification, but Miss Newell, pursuing a more logical method, begins with vegetable physiology, aiming to teach the students what plants are, what their essential characteristics and mode of growth, before entering on the study of specific distinctions which are the basis of classification. The instructions conveyed in this little work are rather for the teacher than for the student, the author's method being not so much to impart information to the pupil direct as to appeal to the wider intelligence of the teacher to direct the pupils' minds into channels of observation, and make them exert their faculties to discover for themselves. The methods employed are practical *id est* experimental. Seedlings are raised in the school-room by teacher and pupils, that the wonderful though common process of evolution from the seed to the leaf becoming matter of daily observation may stimulate the pupils' faculties, arouse their interest, and thus bring them into that receptive state of mind so favorable to the pursuit of knowledge of the common things around them. We think very favorably of the plan of the work, and of the author's treatment of it, and have no hesitation in recommending it as a text book.

Yachting.

MEMORIAL DAY, MAY 30.

IN spite of a heavy fog about New York and the Sound, and light airs about Boston, Memorial Day was generally observed by the clubs as the formal opening of the season, either by a race or review of the fleet, followed by an entertainment on shore in the evening.

LARCHMONT Y. C., TITANIA—SHAMROCK.

"LARCHMONT LUCK" was rather at a discount up to noon on Thursday, an east wind, a dense, chilly fog, and a more or less persistent drizzle made a melancholy outlook for a race, and the club members and their guests wandered disconsolately about the piazzas, speculating as to when the race would be sailed in the future. About 1 o'clock, however, a shift of wind to the southward changed the aspect of affairs, driving off the fog and letting a bright sun through the clouds, at the same time promising plenty of wind for a quick race. Every good Larchmont man at once declared that *he* had known all along just what would happen, that fog and drizzle had not thrown a shade of doubt over *his* mind, at least, and that *he* had been perfectly confident from the first in "Larchmont luck." The occasion was one of more than usual interest, not only the first important match of the year, but the rivalry between the two combatants, and the knowledge that each was perfectly prepared for an extended series of close matches, made this first meeting of special interest. The racing of 1887, when both Titania and Shamrock were in their first season, left the yachting world much in doubt as to the superiority of either, each boat having some very strong partisans. Last year, as Titania was not in commission, they did not meet, but this season each is owned by members of the clubs, both the regular club events and private matches with members of the 70ft. class. The possibility of the class being called on to meet Valkyrie later in the season, for the Paine cup and in private matches, if not the America's Cup, has also done much to center the attention of yachtsmen on the boats. The present match was for a cup to cost $750, one-third being paid by each of the owners and one-third by the Larchmont Y. C. for these two boats, with an offer by the club to make it $1,000 if either Bedouin or Katrina entered too. Neither of these turned up, and the spectators were treated to a most interesting and exciting duel, in which the capabilities of the two yachts could be carefully studied.

Each has been improved greatly since the last meeting, Titania's sail area being somewhat greater, her steel bottom in better condition than during the first season, while with Capt. Haff and a crew picked from Volunteer's, she was far better handled than ever before. Shamrock too had been improved in sail plan since she first came out, besides being materially stiffer through alterations in her ballast and a reduction of weight inside in the cabins. She had also the benefit of last season's experience, which counted for something, though few races were sailed. She was sailed by her owner, Mr. J. Roger Maxwell. On board of Titania were Mr. Iselin, her owner, and Mr. Burgess.

During the delay of the morning both yachts were towed into quiet water inside Flagler's Point, and accurately measured by Mr. Hyslop. When the clear weather finally came, the committee boat, the tug Dalzell, took her load of guests on board and steamed out to the line, marked by two oyster sloops, each with a large blue and white ball at the mastheads, anchored just off the harbor. It was blowing a pretty strong breeze over the Sound, with very heavy puffs over the hills and down Hempstead Harbor when the first signal was given. Both of the yachts carried lower sail and working topsails, Titania showing a beautiful mainsail, stretched nearly to the end of the huge boom, and without a wrinkle or pucker in its snowy expanse. Shamrock too had a new sail, but by no means a good one, being badly wrinkled at the start. A batten was run in the leech above the second reef points, and before the start a hand was sent up the leech, and after some difficulty he succeeded in putting a second batten in a pocket lower down. Both were potleaded, with white topsides from the water.

After tacking about for a time between the line and Pagoda Point, neither in a hurry to be first, Titania made for the line on starboard tack, trimming in sheet as she crossed for a close reach over the 4 knots to the first mark, in the mouth of Hempstead Harbor. Shamrock followed some 300yds. in her wake, the time of the start being:

Titania.....1 28 08 Shamrock.....1 29 17

The wind at first was fairly steady, but strong enough to heel both boats pretty well. There was little difference apparent in the angle, Shamrock standing up a trifle straighter. Soon, however, Titania began to feel the Hempstead zephyrs coming in chunks, and down she went, rail out of sight, luffing up all right without losing ground. She had gained from the start on Shamrock and continued to do so after the squalls struck her. The latter soon began to catch them as well, and both were very luffing. A short hitch was necessary to clear the mark, and at 1:48 Titania went about, Shamrock following a couple of minutes later. Titania made a very neat turn, tacking around the mark at 1:53:50, setting a balloon jibtopsail and easing the boom off over the port quarter for the reach across to Stamford Harbor mark, about nine knots. Shamrock was timed at 1:55:14, after making a very wide turn. She, too, sent her jibtopsail partly up, but thinking better of it, lowered it before breaking out and set a small jibtopsail in its stead.

Shamrock had lost a couple of minutes, and it promised to be more before the next mark was reached, as Titania steamed away at a great pace, perhaps three-quarters of a mile ahead. Off Greenwich at 2:30 Shamrock lowered her topsail, soon after sending down jibtopsail also. When near the mark Titania took in her balloon jibtopsail, making a very neat turn, but just as she came on the wind a puff struck her and heeled her further, it is safe to say, than she has ever gone before. One of her crew, at the lee runner, was washed off the deck as the rail went down under his feet; fortunately he had a firm grasp of the runner, and though at first he swung some distance away from the boat he was safely taken aboard. The times were:

Titania.....2 45 13 Shamrock.....2 49 15

When at the turn it was discovered that Shamrock had water over her cabin floor, and she sailed home in this condition. The accident was due to leaky ventilating plugs in the planksheer, ten on each side, and as one rail was constantly in the water during the race a great deal leaked in.

The next leg was back to Hempstead, a close jam to windward, and as the race was practically settled, there was little to interest the spectators except the manner in which the leading boat was sailed. In spite of the strong wind, by this time tumbling up the Sound into white caps, she carried her working topsail all the way home, though it is doubtful whether she gained anything by it. With a sure race, a rattling breeze and smooth water for a boat of her size, Captain Haff was evidently making the most of an excellent opportunity to try the boat before the coming matches outside Sandy Hook. He sailed her hard, the water at times fairly up to the companion, but she stood the test well, working out to windward and going steadily ahead, even when heeled the worst. Many times on the way over, especially when nearing Hempstead, she lay down at an alarmingly sharp angle, but the spars and gear stood the strain well, and the boat herself seems amply able to carry her sail safely and effectively. As it proved, however, she narrowly missed coming to grief at the height of her victorious career, for just at the mark the end snapped off the bowsprit, the cranse iron and bobstay going into the water. The jib being lashed was held on the spar. By great luck she had passed the mark so far as to be able to bear away instantly and to ease the head sheets, thus saving a disastrous wreck.

The last leg was quickly run with the wind off the quarter, and Mr. Burgess's triumphal handspring was timed at exactly 4:17:45⅘, as the mast cut the line. Shamrock had carried her topmast all the way home in expectation of the wind falling, though she would have been far better off without it. After she turned the last mark she set her working topsail and hurried after her rival, being timed at 4.25.50. The times at the Hempstead mark were:

Titania.....4 01 22 Shamrock.....4 09 18

The full times were:

	Start.	Finish.	Elapsed.	Corrected.
Titania	1 28 08	4 17 43	2 49 35	2 49 35
Shamrock	1 29 18	4 25 50	2 56 32	2 55 43

The time is the fastest ever made over the course.

After the race Titania was taken in tow by the Whisper steam yacht for City Island, where she will have a new bowsprit. The broken spar was a fine, clean piece of Oregon pine. Shamrock took a tug for Bay Ridge. The result is in a measure due to the excellent handling of Captain Haff, and also to the difference in the sails, Shamrock suffering from a poor mainsail, but at the same time the race was a perfectly fair one, and Titania evidently won on her merits.

On Friday there came a gale from the south, which blew all the night and through Saturday morning. As a consequence no boats were able to reach Larchmont. Clara came up on Thursday evening, making the run in three hours from Staten Island, Chispa left the same night for Bay Ridge, not intending to enter, and Nymph went out on Piepgrass's ways to prepare for Saturday. She was unable to get off, the sea being too high; Kathleen did not reach Larchmont, while nothing was seen of Maraquita, due from Boston. On Saturday morning Clara, Banshee, and a lot of smaller craft were putting their bowsprits under in Larchmont Harbor, but there were not enough in any one class to make a race. The regatta committee, Messrs. E. J. Greacen, Otto Sarony, and C. C. Munroe, were ready with a tug, but the only thing to do was to postpone the race, the date being June 8. Only one craft was visible under sail, a flat-bottomed skiff with a spritsail, manned by two boys of 15 or so, which put out from the other shore, beat across to the club float, tacked and ran back, being skillfully handled by her daring young crew. None of the waiting yachtsmen were tempted by her example, but were content with the shelter of the club house.

In the afternoon Madcap and Agnes were in danger of dragging down on the steam yacht Narwhal, but the judges' tug, Dalzell, after some difficulty, took both in tow for Whitestone. The agent of a rubber bag for distributing oil was on hand, and with some difficulty rowed out to the Clara with his apparatus, which was finally attached to her bows. The oil calmed the seas perceptibly and allowed the yachts astern to ride easier.

SOUTH BOSTON Y. C.

THE opening regatta was sailed in poor weather, the wind being light S. E. at the start, with rain, after which came a calm and light N. wind. The following official summary is not complete, as a number of yachts started and withdrew:

Pink, George Corbett	14.04	2 02 03	1 42 32
Lucy, W. H. Ransom	14.06	2 03 37	1 44 15

The judges were G. F. Clark, J. P. Bullard, Thomas Christian, Hubert Pope, William H. Godfrey, J. V. Young. The regatta committee were Commodore Arthur Fuller, Vice-Commodore C. F. Morrill (*ex officio*), A. Henry Hall (chairman), Henry L. Roberts (secretary), J. W. Sherman, Jr., Frank N. Isham, F. G. Cooley, George A. Crawford, Otis A. Ruggles.

Flora Lee was protested for fouling a mark, and Echo and Veto will be remeasured.

KNICKERBOCKER Y. C. SPRING REGATTA.

IN spite of the weather the Knickerbocker Y. C. sailed a very successful regatta on May 30 over the regular course, from Port Morris around the Gangway Buoy, the return being against a very strong breeze. The times were:

	Start.	Finish.	Elapsed.	Corrected
CLASS 1—CABIN SLOOPS AND CUTTERS, 32FT. AND OVER.				
Dora	10 48 55	2 35 57	3 46 42	3 46 52

Mascot	10 48 40	2 57 26	4 09 22	4 00 04
CLASS 2—CABIN SLOOPS AND CUTTERS, UNDER 32FT. AND OVER 25FT.				
Rover	10 49 55	3 37 35	4 47 40	5 47 40
Vision	10 49 18	3 51 00	5 01 40	5 01 39
Yolande	10 50 00	2 51 05	4 04 05	4 13 27
Black Hawk	10 50 00	Not timed.		
Paula	10 50 00	4 26 00	5 36 00	5 23 05
CLASS 3—CABIN SLOOPS, 25FT. AND UNDER.				
Truant	10 48 35	Not timed.		
Wave	10 50 00	Not timed.		
Roamer	10 48 22	Not timed.		
Nanita	10 46 30	3 39 24	4 53 04	4 47 34
Marvel	10 50 00	Not timed.		
Ianthe	10 48 45	Not timed.		
CLASS 4—CABIN CAT-RIGGED YACHTS.				
Idalia	10 41 28	4 03 40	5 22 12	5 22 12
Rosetta A	10 31 40	2 54 33	4 12 53	4 11 10
Fannie	10 45 00	Not timed.		
CLASS 5—OPEN SLOOPS, 23FT. AND OVER.				
Zena	10 42 12	No competitor; not timed.		
CLASS 6—OPEN CAT-RIGGED YACHTS, 23FT. AND OVER.				
Frolic	10 42 50	Not timed.		
Surprise	10 43 20	3 08 18	4 24 58	4 24 18
Alice	10 45 00	Not timed.		
Roi	10 44 40	Not timed.		
Edna	10 43 50	2 33 59	3 50 09	
Mayotta	10 43 28	3 18 05	4 34 37	4 32 09
CLASS 7—CAT-RIGGED YACHTS, UNDER 8FT.				
Torino	10 42 10	Not timed.		
Grimalkin	10 32 40	3 29 20	4 56 40	4 55 25
Maggie	10 41 06	3 36 40	4 55 36	4 49 06

Class 1, Dora wins; Class 2, Yolande; Class 3, Nanita; Class 4, Rosetta A.; Class 5, Zena; Class 6, Surprise; Class 7, Maggie.

Yolande, the little cutter, won easily in her class, and Nanita, another cutter, in hers. Edna, a new sandbag catboat with a very large rig, made the best time over the course.

ATLANTIC Y. C., OPENING SAIL.—The weather sadly disarranged the programme of the Atlantic Y. C., as but few of the fleet started in the scrub race arranged for Decoration Day. The fleet saluted the flagship, Com. Hogan's schooner Cavalier, and then started down the Bay, the larger yachts around the S.W. Spit and the smaller around Buoy 11. The times were not accurately taken and no prizes were offered, but Clara disposed very satisfactorily of Anaconda, while the little Wona did some remarkable sailing. The catyawl Empress, though not starting with the others, did good work to windward with the fleet in the strong S.W. breeze. Fearless lost her maintopmast.

QUAKER CITY Y. C.—The opening cruise of the club to Delanco was a success. The yachts Consort, Juanita, Venitzia, Rosita, Vesper, Osceola, Pearl, Lucetta, Arethusa, and the steam yachts Lilly, Anita and Camera, following Com. Middleton's flagship Helen up the river, where the Anita, Minerva and Alexia of Trenton joined them. The afternoon was spent in watching the canoe races at the camp near Delanco, the fleet returning at 6 P. M.

NEW JERSEY Y. C.—The fog and succeeding rough weather discouraged the tars of the New Jersey Y. C., and the opening sail did not take place.

YORKVILLE Y. C. OPENING REGATTA.

THE spring regatta of the Yorkville Y. C. was sailed over a course from Oak Point around the Gangway Buoy, 18 miles, for Classes A, B and C, and around the Stepping Stones for the smaller craft. The wind was moderate when the race started at 11 A. M., but was blowing a small gale from S.W. on the return. The times were:

	Length.	Start.	Finish.	Corrected.
CLASS A—CABIN BOATS, OVER 30FT.				
Emma & Alice, D. McGlynn	33.06	11 07 30	3 00 50	3 06 52
CLASS B—UNDER 30FT.				
Forsyth, Alex Roc	29.08	11 08 30	2 59 00	3 50 30
CLASS D—JIB AND MAINSAIL.				
Florence Tate, Robt Tate	23.11	11 02 00	3 08 15	4 06 15
CLASS G—CAT-RIGGED, 22FT. AND OVER.				
Jessie, John O'Brien	22.00	11 04 00	2 56 30	3 52 30
CLASS H—CAT-RIGGED, 18FT. TO 22FT.				
Bessie R., J. B. Thompson	19.03	11 11 15	2 26 00	3 14 45
CLASS I—CAT-RIGGED, 16 TO 18FT.				
Mollie McCarthy, McMann	16.01	11 11 00	2 12 00	3 00 30
CLASS J—CAT-RIGGED, UNDER 16FT.				
Harry C., H. Porter	14.10	11 14 00	2 23 00	3 00 09

No boats finished in Class C, and Class F was not represented.

The judges were Daniel Bell, of the Pastime Athletic Club, and Com. Lalor, of the Harlem Y. C.

Twinkle capsized near Baretto's Point, and the owner of the Surprise walked overboard while trimming the main sheet, just after the finish, but was fished out by his crew.

KING PHILLIP Y. C.—The annual regatta was sailed in Mount Hope Bay, the first class sailing 18 miles, the others 13. The summary was:

	Corrected.
FIRST CLASS.	
Mignon, C. G. Bloomer, Pawtuxet	2 12 56
Mabel F. Swift, C. W. Anthony, Fall River	2 14 13
Kelpie, Charles F. Jaynes, Providence	2 16 42
SECOND CLASS.	
Climax, E. C. Stetson, Mattapoisett	2 23 56
Windward, D. J. Burdick, Fall River	2 28 21
Madeline, George S. Fields, Fall River	2 28 58
Kickemut, disabled. Gluck Auf withdrawn.	
THIRD CLASS.	
Faust, Edward B. Wright, Fall River	1 54 14
Fleetwing, Mark Phillips, Taunton	1 54 32
Barbara, Fred W. Macomber, Fall River	1 53 31
Victoria, E. V. Bowen, Providence	1 58 00
Greta, H. C. Root, Newport	1 55 23
Jessie withdrawn.	
FOURTH CLASS.	
Nora, A. S. Almy, Bristol	2 03 34
Unknown, Elmer B. Young, Swansea	2 04 55
Rankek, T. H. Shurtleff, Providence	2 13 16
Harper, T. Haggerly, Providence	2 02 25
Florine, L. P. Davis, Somerset	2 03 37
Iola, John Dexter, Mattapoisett	2 08 03

Reba and Rena did not finish.

First class—First prize, silver cup, Mabel F. Swift; second, $25. Kelpie. Second class—First prize, $40, Climax; second, $20, Windward. Third class—First prize, $30, Barbara; second, $15, Greta. Fourth class—First prize, $20, Nora; second, $10, Florne.

CAPE COD Y. C.—A race of first class boats was sailed in a strong south wind, the course being 6⅜ miles, triangular. The summary was:

	Elapsed.
Ariel, Sears Bros	1 34 45
Madge, Cummings and Howes	1 36 19
Nobscusett, F. Tobey	1 37 26
Puritan, J. Penniman	1 44 29

YONKERS CORINTHIAN Y. C.—The principal event of the day was the reception and opening of the new $7,000 club house, just completed. The fleet dressed ship in the morning, after which the club house was opened for inspection, the reception being held in the evening. The Yonkers Canoe Club fleet, thirty canoes decorated with Chinese lanterns, paddled down in the evening, and serenaded the new club.

CANARSIE Y. C.—The opening sail of the club was held on the afternoon of May 30, the yachts Orient, So Ho, Gelert, Ethel, Edda, Gertrude, Nifty, Ajax, Amaranth, Clara, Aurora, Syren, Growler, Wave and Jessie sailing over a triangular course of 10 miles. In the evening a large number of guests was entertained at King's Hotel.

BROOKLYN Y. C.—A reception was held at the club house at Gravesend Bay in the afternoon of May 30, many ladies being present. The foggy weather prevented a review of the fleet, but all hands enjoyed themselves ashore.

PAVONIA Y. C.—The only competitors for the Fulsome cup, over a course from Communipaw around Fort Lafayette, were the Avalon and Aunt Jenny, the former winning, but being protested.

SING SING Y. C.—The pennant regatta of the Sing Sing C. C. was postponed on account of the rough weather on the river. The club's new house was formally opened in the evening.

NEW HAVEN Y. C.—The spring race took place as per programme, 12 yachts sailing to Brantford Point, where dinner was eaten on shore, followed by a scrub race home.

JERSEY CITY Y. C.—Fifteen yachts of the Jersey City Y. C. took part in the opening sail to the Narrows, a dinner being served in the club house afterward.

DAUNTLESS Y. C.—Only two yachts, Jessie L. and Irene, ventured over the course of the Dauntless Y. C., the former winning.

THE OBJECTIONS TO THE DEED OF GIFT.

IT was a singular circumstance that in 1887 the daily papers of New York and Boston, which had for a year been publishing news of all kinds about international yachting by the column, should stop at once as soon as the revision of the deed of gift was made public, avoiding all criticism and discussion, and contenting themselves with the stereotyped indorsement of the fair play and liberality of the New York Y. C. Whether from a fear of offending the New York Y. C. or from the inability to discuss the technical points at issue, there was but one paper except the FOREST AND STREAM which pretended to discuss carefully the various conditions of the new deed, in spite of the great importance of the subject.

Now, however, that the question of the fairness of these conditions has arisen, these same papers are to the fore as usual in defense of the New York Y. C. The statement is made by them that the objections to the deed of gift are but general, and that no specific charges have been made against it.

In November, 1887, immediately upon the publication of the document, the FOREST AND STREAM took it up in detail, showing the unfairness of many of its provisions, and again early in the following year they were discussed by us in a controversy with two leading dailies. The charges we then made against the deed have never been disproved, and it is now in order for some of these zealous partisans to take them up. No less a person than Mr. Schuyler, the "surviving donor," is lately quoted in an interview as making the same statement, that no specific objections had ever been presented.

Leaving out the two very serious counts, that any change of the original and only deed made by the five donors was illegal, and also that the last so-called revision, even if it had been legal, was hurried through in a secret and underhand manner, and never submitted to an open vote of the club; there were specific objections made to the conditions themselves. These briefly summarized were as follows: That they limited the competition to but two sizes of yachts, and these of classes not in existence, and in every way undesirable. That they demanded too long a notice of challenge, which same was unnecessary. That they compelled a designer practically to make known the lines of his boat to his opponents nearly a year in advance, giving him no information in return and no security that he would not be outbuilt in size. That they limited the designer in a manner hitherto unknown in legitimate changes of trim or dimension. That they establish practically an obsolete rule, that of length, for the government of the Cup races. That by means of the provision as to no time allowance they enabled the holders to force almost any terms they might see fit to make on the challenger.

The above specific objections have been indorsed by both the *Field* and *Land and Water*, and yachtsmen who care to read the deed of gift for themselves can easily form an opinion as to their correctness.

It has lately been stated that the sole objection of the Royal Yacht Squadron and of British yachtsmen is to the clause which compels the admission of centerboard vessels to the Cup races; but this very condition has been favorably commented on in the past by the *Field*, and is again mentioned in the last issue to hand

as follows: "The only thing in connection with the new deed and the Valkyrie's challenge which has cropped up since last week, is the fact that the last plea for the new deed is that, if it is not accepted, centerboards may be barred out by a foreign club. The 'new deed' has certainly a clause enjoining that centerboard yachts shall be allowed to compete; but then the original and only authentic deed has no clause saying that they shall not be allowed to compete; and no club rules could interpolate such a clause. Beyond this, the British Yacht Racing Association has abolished the rule against centerboards, and did it with the express approval of practically the whole of the British yacht clubs. Thus we are afraid the New York Y. C. must find yet another plea to justify the new deed. But no matter how it may be justified; it cannot be legalized."

The *Field* also publishes the new deed, commenting severely upon it, concluding as follows:

"So far as we can see, there is only one way for the members of the New York Y. C. to extricate themselves from the disagreeable difficulty they have created, and that is to burn the new deed and revert to the original, which, we repeat, is the only document under which the Cup can be legally held. It would be quite proper, and in accord with common sense, if the club, profiting by the experience of the matches already sailed, drew up certain regulations or explanations to be attached to the original deed; and this they could do in conjuncture with a challenging club or not as they pleased; but for obvious reasons these regulations or interpretations should be agreed upon before the matches are sailed."

It has been plainly apparent that the small clique which has constituted itself the chosen guardian and trustee of the Cup ("We America's Cup people," to adapt an expression that has lately become famous and just fits the case) has sadly blundered in the revision of the deed of gift. To mention only one instance, the clause relating to time allowance was inserted as a compromise in the belief that the troublesome question of measurement was entirely avoided. Instead of this, by laying down a length limit, which, as Valkyrie's case proves, must be built up to, the committee has practically adopted a length rule, with all the bad features accompanying it. There is one other way out of the dilemma beside that suggested by the *Field*, and that is through the complaisance of the Royal Yacht Squadron in connection with Lord Dunraven's generous attempt to help the New York Y. C. at the expense of his fellow yachtsmen.

LENGTH AND SIZE OF VESSELS.

Editor Forest and Stream:

The readers of your paper might more generally appreciate your efforts to bring it about that the English yacht challenging for the Cup shall be met by a yacht of her class, rather than by the Volunteer, if attention should be called in a forcible manner to the actual difference in the size of vessels, not varying materially as to length. To ordinary readers there may not appear to be a great difference in size between yachts 70 and 88ft. on the waterline. They probably, if requested to state mathematically their conception of this difference, would give it as 70 to 88. Now the size, the carrying capacity, displacement of the smaller yacht is to that of the larger one, assuming that their models are not materially different, not as 70 is to 88, but as the cube of 70 is to the cube of 88, that is, as 343,000 is to 781,472, say 34 to 78. The longer yacht is more than twice as large as the smaller one. She may carry more than twice as much ballast and may bear a very much larger sail area.

Further, to appreciate the advantages which the larger boat possesses, it must be borne in mind that the relative resistance offered by the water to these yachts may be said, with a near approach to accuracy, to be in proportion to the areas of their (immersed) midship sections. Now, the midship section of the smaller vessel is to that of the larger one, not as the cube of 70 is to the cube of 88, but as the square of 70 is to the square of 88; not as 34 is to 78, but as 49 is to 77. That is, while the capacity of the larger yacht is double that of the smaller one, the resistance she meets with from the water is only, say, one and four-seventh times as great.

These statements may be made plain in this way: Let the complex yacht lines be discarded, and let the principles set forth above be applied to a simple mathematical figure. Instead of the boats we will consider two rectangular blocks from which we may suppose, for instance, that a designer contemplates cutting models of the yachts in question. In their length these blocks are respectively 88 and 70in. The breadth and thickness (beam and depth) have also the relation one to the other of 88 to 70. Thus, for the larger block let the dimensions be, length 88in., width 15in., depth 10in. Then the dimensions of the smaller one would be (in proportion of 88 to 70), length 70in., width 12in. nearly), depth 8in. nearly). The solidity (displacement) of these blocks in cubic inches will be determined by multiplying together their length, breadth and thickness. The larger block then contains $88\times15\times10=13,200$ cubic inches; the smaller block contains $70\times12\times8=6,720$ cubic inches. That is, the larger block is (about) twice the size of (has twice the displacement of) the smaller one.

Again: The resistance offered to the blocks dragged through the water (fully submerged) may be represented with sufficient accuracy by the relative areas of the sections against which the water impinges. The area in square inches of the end ("midship section") of the larger block, found by multiplying its width by its thickness, is $15\times10=150$sq. in. The area of the smaller block is $12\times8=96$sq. in.; that is, the resistance offered to the larger block is that offered by the smaller one as 150 is to 96, or say as 77 is to 49.

While, then, the capacity of the larger model would be double that of the smaller one, the resistance it would have to overcome would be to the resistance presented to the smaller model as 150 to 96.

It may be seen then that a yacht 88ft. on the waterline may be twice as large as one 70ft. on that line, and that it has physical advantages over the smaller vessel which may be represented roughly in figures as 77 to 49. B.

THE CRUISE OF THE SARACEN.

THE Burgess 30, Saracen, owned by Mr. W. P. Fowle, Corinthian Y. C. of Marblehead, reached Whitestone on May 31, at 5:50 P. M., after a very rough passage around Cape Cod from Marblehead, her sailing time being 50 hours 43 minutes, and the distance 276 nautical miles; an average of 5.4 knots per hour. She comes here to race in three or four regattas, bringing all her racing outfit on board; spinaker boom, topsail yards, racing canvas and tender. She sailed from Marblehead for Newport at 2:35 P. M. on May 24, with Messrs. W. P. Fowle, F. M. Wood, Geo. A. Stewart, F. C. Newhall, and one paid hand, Martin Johnson. It was necessaary to leave her at Newport, returning to Boston for business, resuming the cruise after a few days. Under lower sails, with a moderate breeze, the Saracen crossed Massachusetts Bay, passing the Fredonia bound for Fayal, and at 10 P. M. she had the Highland Lights abeam. Off Chatham the wind came in fresh from south, making a dead beat to Pollock's Rip, under lower sails and working topsail. The buoy off Pollock's Rip was passed at 5:15 A. M. on Saturday. From the Shovelful to Cross Rip Lightship the wind was fresh and dead ahead, but before the Cross Rip was reached a heavy squall from N.N.E. struck us, and the mainsail was stowed and reefed trysail set, and carried through a heavy sea until the East Chop was reached. At 2 P. M. the anchor was dropped in Tarpaulin Cove. The run of 114 miles had been made in less than 24 hours, the latter part showing 12 miles in 1½ hours under trysail and jib.

The weary tars were glad of a night's rest, but at 5:45 next morning all hands were on deck in brief and airy costumes, a S.W. wind blowing hard into the anchorage and the yacht dragging on to a lee shore. The anchor was weighed, and under headsails and the peak of the mainsail the staunch little ship made a safe offing, then the topsail was once more set and she hammered away in a half gale from N.E. with heavy rain for Newport. A heavy sea was met between the Vineyard and Brenton's Reef, but under trysail and jib the Saracen went along easily, finally beating into Newport and anchoring at 11:55 A. M. Thus the 36 miles had been covered, under storm canvas, in six hours. The crew went by rail to Boston, returning on Wednesday evening, but with Mr. Arthur D. Foss in place of Mr. Wood.

A start for New Haven was made at 4:25 A. M. on May 27, the wind being then moderate from S.E., so the topmast was sent up again and jibheader and jibtopsail set. Point Judith was abeam at 6:11 A. M., and under spinaker the run was made to Watch Hill very pleasantly. Cornfield Light was passed at 1 P. M., the wind, now blowing quite fresh, shifting to south, the yacht being under three lower sails. At 5.13 P. M. the yacht was inside the New Haven breakwater, making the run of 76 miles in 12h. 48m., an average of 5.9 knots.

On Friday morning there was a very strong breeze from S.S.E., but at 9:55 Saracen was clear of the Breakwater, under whole mainsail and headsails, but with topmast housed, running across to the Long Island shore, and making good weather for an hour or so, when the wind increased greatly, coming from the south, so the trysail was again set and foresail stowed. The sea was very heavy and a moderate gale blowing, but the little ship was kept on her way, until finally both topsail and jib were stowed and she was run under bare poles, keeping as close as possible to the Long Island shore. After a while the staysail was set and then the reefed trysail, and she was headed more on her course, making Eaton's Neck at 2 P. M. The worst of the trip was over, the wind and sea were less violent under the lee of Long Island, and at 5:50 P. M. the hook was dropped at Whitestone near the Kathleen, her class rival. The run of 50 miles had been made in 7 hours 35 min. The whole performance was a most creditable one for the little boat and her Corinthian crew. Saracen is 30ft. 1.wl., 10ft. beam and 7ft. draft, built by Lawley last year.

VALKYRIE.

AS briefly noted last week, Valkyrie was beaten by both Irex and Yarana on the return race from Harwich to Southend on May 23, the first race in a strong breeze. The course was fifty miles. Irex allowing Valkyrie 5m. 29s., and Yarana 12m. 19s. The wind was strong from the west, making a reach out over the first quarter of the course, and a beat for the remainder, with a heavy sea in places. The start was made at 8 o'clock, the order over the line being Deerhound, Yarana, Valkyrie, Irex, Amphitrite, Mohawk and Vreda. For a time Yarana and Valkyrie held the lead, but before the Cork Lightship was passed Irex had caught the two, going through their lee to first place. Coming on the wind at the Lightship Irex gained steadily, being about ¾ mile ahead at the Cork Sand Buoy; Yarana being then on Valkyrie's lee quarter. A heavy sea was met in the East Swin, Irex being reported as making much the best weather of the three.

When off Gunfleet Head the iron cross through the deck, to which Valkyrie's jib halliard was belayed, drew out, the jib going over the side. She was hove to for some time while the jib was reset, it of course being thoroughly soaked. Meanwhile Yarana had left her astern. In addition to this mishap the mainsail was badly stretched and the lanyards stretched, while the eyes of the main rigging drew down on the masthead, so that the boat had to be sailed very cautiously. Finding smoother water when past the Swin Middle Lightship, the two smaller boats came up a little on Irex, Valkyrie gaining considerably on Yarana but never catching her. Over the last few miles there was more wind again, but the position of the three was not materially altered. The times at Southend pier were:

	Elapsed.	Corrected.
Irex	3 03 44	3 03 44
Yarana	3 25 33	3 13 04
Valkyrie	3 26 22	3 20 53

Irex wins £50, Yarana £30, and Valkyrie £15. The times of the others are not reported.

On June 1 the Nore to Dover match of the New Thames Y. C., 60 miles, was sailed in a strong wind and smooth water, the times being:

	Elapsed.	Corrected.
Valkyrie	6 21 05	6 14 30
Yarana	6 35 55	6 21 08
Irex	6 25 50	6 25 50

Mohawk, Deerhound, Amphitrite and Vreda also sailed, but their times are not given.

The Royal Thames Ports Y. C. regatta, off Dover, was sailed on June 3, the course being a triangular one of 22 knots, two rounds, or 44 knots in all. Valkyrie, Irex and Yarana started at 10:30 A. M. in a strong W. wind with some sea, all carrying jibheaders. Irex won easily with Yarana second. Valkyrie came to grief again with her rigging. The times were: Irex 3:55:51, Yarana 4:09:07, Valkyrie 4:09:58. It is impossible to say from the brief cabled reports just how fast Valkyrie really is with the other two, and how much of her failure in strong winds is due to bad rigging. Both Irex and Yarana have been altered since last year, Irex being lightened as much as possible to suit the hull to her present reduced sail area, while Yarana has had 4 tons of lead moved from inside to the keel, with an increase of sail.

It is practically impossible for anyone who does not see all the races and is not fully conversant with all the alterations in each boat to form a correct idea of the relative speeds. Irex alone is sailing under such different conditions from those under which she met Genesta and Thistle that all estimates of Valkyrie's speed are but rough guesses, and it is certain that little will be known here until she is seen in American waters. Some rash critics have already pronounced her a success or a failure, but they are not to be depended on. From her performances thus far it would seem that she is very badly rigged and was hurried into races without proper preparation and trial; and that with sails and gear in good shape she will be at least as fast as Genesta, Irex and Thistle, Lord Dunraven is reported as determined to come out and meet the 70ft. class, even though his challenge for the Cup is withdrawn. Had he left the Cup alone in the first place and merely come out here with an open challenge to all yachts of his size, he would have stood much higher in the estimation of many fair-minded yachtsmen on both sides of the water.

HAMILTON Y. C.—The first race of the series was sailed by the Hamilton Y. C. on May 24, in a light wind, the summary being:

20FT. CLASS.

	Start.	Finish.
Schemer	10 30 00	1 27 30
Adeline	10 30 00	1 28 00
Comet	10 30 00	1 38 00

Adeline won by 4m. corrected time.

25FT. CLASS.

Stella	10 35 00	... ...
Greyhound	10 35 00	1 27 00
Iapyx	10 35 00	2 11 00

The Greyhound won, but the Iapyx was not given second on account of not rounding the finishing buoy properly, passing on the wrong side. Stella capsized off Huckleberry Point.

30FT. CLASS.

Surge	10 45 00	1 15 00
Alert	10 45 00	... ...
Echo	10 45 00	1 22 09

Surge won, with Echo second. Alert was disqualified for putting back and assisting the capsized Stella. The crew of the Alert have put in a protest to the sailing committee, asking that the race under the circumstances be resailed.

MONTGOMERY SAILING CLUB.—Third race, May 26. Course, Norristown to Indian Creek and return; distance 5 miles:

	Length.	Corrected.
Playford, tuckup	15.00	1 59 50
Gracie, skiff	12.00	2 03 35
Starlight, canoe	16.00	2 04 08
Volunteer, tuckup	15.00	2 05 15
Nellie, tuckup	15.00	2 06 05
Lever, tuckup	15.00	2 06 55
Pennsylvania, hiker	16.00	2 09 50
Frith, tuckup	15.00	2 10 30
Iola, ducker	15.00	2 10 40
Igidious, tuckup	15.00	2 14 15
Priscilla, tuckup	15.00	2 21 00
Stranger, sharpie	15.00	2 23 35
Vesuvius, tuckup	15.00	Withdrew.
Emma L., tuckup	15.00	Withdrew.

The wind was light easterly, making it a run to the buoy and a beat back. Timer, Wm. Alcorn.

ATHLETIC YACHTING.—We understand from reliable sources that there are some novel surprises in store for yachtsmen of an athletic turn of mind, contingent only on the success of the new boats. Moved by a laudable spirit of emulation excited by Mr. Burgess's world-famous handspring, one amateur designer is now practicing daily in a Boston gymnasium, and promises a thrilling and exciting diversion on the gaff end in the event of the possible success of his racing ventures. Another designer has been for some time assiduously engaged in practicing standing on his head on the main boom, but has as yet not reached a sufficient degree of proficiency, and will not undertake the feat in the early races unless he can rig a safety net. Mr. Smith cannot be persuaded to say what he has in contemplation in the event of Katrina's success in the private matches this month, but it is safe to say that he will rise to the occasion. Mr. Watson's plans in this respect are as usual enveloped in a most unjustifiable amount of mystery, and it is confidently asserted by a prominent yachtsman who does not desire his name to be mentioned, that the long overhang ascribed to Valkyrie is but a blind to distract the vigilance of Ex-Com. Smith and the Plan and Scope Committee from Mr. Watson personally.

ELIZABETH Y. C.—Though Elizabeth, N. J., boasts but little water she is not to be left astern in aquatic matters, and has lately organized a yacht club with the following officers: Com., Patrick Sheridan; Vice-Com., John P. Binzen; Admiral, Thos. F. McCormick; Captain and Sailing Master, Capt. Cory; First Lieutenant, John Driscoll; Second Lieutenant, Excise Commissioner Drum; Surgeon, Joseph H. Grier, M.D.; Chaplain, Peter O. Dyke; Steward and Treasurer, John A. Staats.

ABEONA.—A new steam yacht by this name, built for Mr. A. E. Gooderham, by M. Simpson, was launched at Toronto on May 22. She is 81ft. long and 16ft. beam.

GREAT HEAD PENNANT REGATTA, JUNE 1.—The annual pennant regatta was sailed on June 1 in a good S.W. wind, the courses being: First and second classes—From judges' boat to Sculpin Ledge, red buoy No. 2, leaving it on starboard, to black buoy No. 7, leaving it on starboard, to red buoy No. 6, leaving it on port, back to judges' boat, 7½ miles. Third class—From judges' boat to red spar buoy No. 2, leaving it on starboard, to red spar buoy No. 8, leaving it on starboard, to Apple Island red buoy No. 6, east of Apple Island on port, then to judges' boat, 5 miles:

FIRST CLASS.

	Length.	Elapsed.	Corrected.
Clio, Goodwin & Merrill	23.00	1 59 00	... ...

SECOND CLASS.

E. A. C., G. H. Worcester	21.04	1 59 39	1 36 29
Etta May, A. H. Lawrence	21.08	2 10 05	1 47 07

THIRD CLASS.

Modoc, B. W. Belcher	15.08	Withdrew.	
Scud, L. S. Eestan	17.02	Withdrew.	
Evelyn, L. T. Harrington	18.03	1 12 30	5 01 55

The judges were: Messrs. J. S. Cushing, F. H. Haley and Harry Hutchinson.

QUINCY Y. C., JUNE 1.—The opening regatta of the Quincy Y. C., on June 1, was partly spoiled by a buoy in the course for second and third classes going adrift, so that the boats, Hester, Hebe, Pet, Mabel, Diadem, Mirage, Racket and Psyche were obliged to give up the race. The course for first class was from a line between judges' yacht and flagboat, off club house, passing between Sheep and Grape islands to red buoy, between Bunkin Island and Downer Landing, leaving it on port; thence leaving Bunkin Island on starboard, to red buoy off Hull, leaving it on port; thence leaving Sheep Island on port to Channel Rock buoy, leaving it on starboard; thence leaving barrel off Raccoon Island on port, to judges' yacht, passing between it and a flagboat; distance 8 miles. The summary was:

FIRST CLASS.

	Length.	Elapsed.	Corrected.
Posy, R. G. Hunt	22.02	1 34 45	1 06 25
Moondyne, W. H. Shaw	24.08	1 34 55	1 08 59
Erin, John Cavanagh	26.00	Disabled.	

The wind was moderate south. Erin sprung her boom when leading off Bunkin Island. Posy wins $10 and Moondyne $5.

MCINTYRE'S PATENT SKYLIGHT.—The skylights and companions invented by Mr. Jas. McIntyre, of South Boston, have met with well-deserved favor from yachtsmen and are now in general use. The following new yachts have been fitted with them: Montecito, Yawl, Chispa, Tomahawk, Maraquita, Nepenthe, Nanon, Merlin, Quickstep, Constellation, Gorilla, Verena, Alice, Chrystal, Lotowana, Elfrida, Jathniel, and the unnamed boats for Messrs. Owens, Hasbronck and Boggs. The U. S. Revenue bark, Chase, has tested the skylight lately, and Capt. D. B. Hodgson, her commander, has recommended its adoption for other vessels of the department.

EASTERN Y. C.—A meeting was held on May 28 at which a number of amendments to the sailing regulations and constitution were adopted. Rule 12 of the sailing regulations was changed to read: "During a race, first class yachts shall carry a serviceable, non-fold ng boat, not less than 12ft. in length. Second class schooners and second and third class sloops shall carry a similar boat, not less than 10ft in length. These boats shall not be carried below deck. Each yacht shall also carry two serviceable life-buoys, ready for immediate use, within reach of the helmsman." July 15 has been set for the annual regatta.

LORD DUNRAVEN'S CHALLENGE.—There is nothing new to chronicle on either side; the reply of the sub-committee of the "Plan and Scope Committee" to Lord Dunraven, sent last week, was made public yesterday, and we will publish it next week, and nothing has been heard from the Royal Yacht Squadron. One very important detail has been settled, however, and ex-Com. Smith has announced that the committee will view the races from the bridge of the Electra, and will partake of the plain and simple fare always found on the flagship. Such being the case, it will be extremely unfortunate if any trifling questions of fair play and honest dealing should arise to interfere with the enjoyment of the committee.

A CHALLENGE FOR AMERICAN YACHTSMEN.—Mr. P. A. Ralli, owner of the Yarana, has expressed his willingness to sail with that yacht the American champion 70-footer Shamrock, a match for £5,000 a side, although giving away nearly 5ft. in length. —*Land and Water, May 25.*

CAPSIZE OF A CENTERBOARD YACHT.—The Malta, a 35ft. cabin sloop owned in Philadelphia, capsized off League Island in the Delaware River on May 30, and nearly drowned her crew of seven. They were rescued by two boats from the navy yard. Five of them were in the cabin when the capsize took place, and had a very narrow escape.

CORINTHIAN Y. C. OF NEW YORK.—The annual regatta of this club will be sailed on June 19. The following forties have entered for the sweepstakes in August: Gorilla, Liris, Tomahawk, Maraquita, Minerva, Pappoose, Alice, Helen.

COMMODORE GEORGE W. GARDNER, of the Inter-Lake Yachting Association, is the subject of the Sunset Club chapter in our angling columns to-day.

LIRIS, the new 40, built at Ayres's yard for Messrs. Wetmore & Hoyt, from Mr. Gardner's design, was launched on June 2 with great difficulty, owing to the shoal water in the Atlantic Basin. Her sails and gear are all ready, and she will be fitted out in time for the races next week if possible, though she will be heavily handicapped by the lack of any trial in advance.

RHODE ISLAND Y. C.—The following dates have been selected for the season's races: June 13, opening regatta; June 22, ladies' day; July 16, cup regatta; Aug. 5, club cruise; Aug. 26, open regatta.

FREDONIA.—On May 24 the new fisherman Fredonia sailed for Fayal with the following party on board: Mrs. Edward M. Cary, Miss Hester Cunningham, Mrs. H. B. Stone, Miss Alice Stone, Miss A. H. Jones, Miss E. F. Russell, Miss Alice Dabney, Miss Margaret Forbes, Messrs. F. H. Stone, Charles Dabney, Edward Cunningham, Jr., and J. Malcolm Forbes.

OYSTER BAY Y. C.—Officers, 1889: Com., J. A. Weeks, Jr.; Vice-Com., Alfred Roosevelt; Sec'y, E. M. Townsend, Jr.; Treas., Wm. Trotter, Jr.; Meas., R. C. Townsend. The commodore appointed Messrs. F. T. Underhill, F. D. Weeks, and R. C. Townsend to serve as regatta committee.

AUGUSTA, steam yacht, has been sold by her builders, the Herreshoff Mfg. Co., to the State of Texas, to be used by the quarantine officers of Galveston.

MONTECITO.—The new steel yawl, Montecito, designed by Mr. A. Cary Smith for Mr. Ronald Thomas, was launched at Piepgras's yard on May 27. We must defer a description of her until after the spring races, but she is good enough to have been given a more euphoneus and less cumbersome name.

NORMA.—A new sloop by this name has been built by W. Robinson, of Kingston, Ont., for J. C. Strange. She is 33ft. 5in. over all, 25ft. l.w.l., 9ft. beam and 3ft. draft.

MYRA.—At Marvel's yard, Newburg, a steel steam yacht 70ft. long and bearing the above name, has been built for Mr. W. E. Bartlett, of Newburg. She will have a triple expansion engine, 6, 10 and 16×10in., with a coil boiler.

A FATAL CAPSIZE.—Messrs. John A. Lyons, a reporter of the Boston *Globe*, with his cousin, J. F. Kenneff, were capsized in a catboat off Spectacle Island, Boston Harbor, on May 25 and both were drowned.

QUICKSTEP.—Col. Grinnell's new schooner was launched at Piepgrass's yard on June 3.

PLEON Y. C.—The race announced for May 30 did not come off owing to a mistake.

MESSRS. RAND, MCNALLY & CO., of Chicago, announce that they have in press a book by the well-known author and magazine writer, Mr. G. O. Shields ("Coquina") entitled "Cruisings in the Cascades." It is a record of an extended hunting tour made by the author in the Cascade Mountains in Oregon, Washington Territory and British Columbia, and contains many thrilling descriptions of adventures and incidents of travel encountered by the author in his explorations. He carried with him a detective camera, and the work is handsomely illustrated from instantaneous photographs and from drawings. The book contains also special chapters on hunting the buffalo, elk, grizzly bear, Rocky Mountain goat, antelope and deer, and will no doubt prove intensely interesting to general readers as well as to sportsmen.

Answers to Correspondents.

L. M. P., Mahanoy City, Pa.—The address is 280 Broadway, New York.

S. V. P., Providence, R. I.—We should advise a 12-bore, modified choke and cylinder barrels, and as light as your build will permit you to use with comfort.

M. C., Middletown, Conn.—Does Trumbull's new book "Names and Portraits of Birds" describe all of the common species of this section, or game birds only? Ans. Game birds only.

VENATOR.—Can the Springfield rifle be procured except for army or militia use? If so, of whom? Is it sighted for the 405grs., or the 500grs. bullet, or is it suited to both? Can the regular Government ammunition be procured, and if so, by whom? Ans. 1. It can be had through any dealer. 2. Both, if of later model. 3. Of any dealer.

R. T., Victoria Hotel.—Please let me know through the columns of your paper where I can purchase the game laws of New York and New Jersey. Ans. The New Jersey law was published in our issue of May 9, which will probably answer your purpose, but a full compendium of the laws revised to 1888 is for sale at this office, price 25 cents; one of New York same price.

W. C. L., Richmond, Va.—I am anxious to purchase a good gun, but do not know what weight and bore would suit me best. I want a gun for hunting quail. I have a very long neck and short arm and weigh about 135lbs. Please advise me as to the weight, bore, length and drop of stock, length of barrel. Ans. Choose a 12-bore, 7lb., with short stock, and much drop. To determine what will best fit you go to a gunstore and experiment with different arms.

G. N. R., Montclair, N. J.—Ans. 1. There are no reports of fishing yet, but the water is low, the season early and indications are favorable. 2. The upper Delaware offers as good black bass fishing as you can find and there is no better place than Egypt Mills, Pike county, Pa. Almost any point on the river, in Pike and Wayne counties, will give you superb fishing, from Hancock down to the lower boundary of Pike. Lake Hopatcong, N. J., is noted for its black bass and pickerel. Reached by Philadelphia and Reading R. R.

CONSTANT READER, Allentown, Pa.—1. Has a property holder the privilege of granting certain parties the right of fishing a stream that contains brook trout with a seine. This question relates to persons or property holders that claim the stream whether the fish are distributed by commission or not. 2. Has the property owner himself the right to fish his stream which he claims with a seine or seines. Ans. It is unlawful to net trout anywhere save for the purpose of propagation, that is a person may only catch trout with a net in waters owned by himself to stock other waters.

J. E. S., Brooklyn.—Please inform me what kind of fishing and shooting are to be had in Hancock, Delaware county, N. Y., in open season? Are there any public trout streams in the immediate vicinity? Are there any black squirrels in the State of New York? If so, where? In what month do black bass bite on bait the best? Ans. 1. Black bass, brook trout, ruffed grouse, woodcock, rabbits, etc., are to be had in the region. 2. Trout streams at Colchester and Lordville. Northeastern part of county is said to have bears and foxes and an occasional deer. 3. There are some black squirrels in Lewis county, but they are more plentiful along the south shore of Lake Ontario. Lockport is a favorite locality for this game.

C. A. B., London, Ont.—Few of us have leased a trout pond, about a quarter of an acre in extent. It is fairly stocked with trout now. About what fry should we put in the pond each year to keep it well stocked? We intend putting 5,000 in this fall that were hatched in April, next year nothing, the following year 2,000, and third year 1,000. We have an eight-year lease on the pond. Do you think this proportion will keep it well stocked? Ans. The number ought to be sufficient if your adults do not destroy the fry. The usual way in keeping ponds stocked is to build a small hatchery conveniently situated, and keep the fry in it until able to take care of themselves; 20,000 fry can be kept until three months old, receiving food during the last two months, in a trough 16ft. long, 18in. wide and 8in. deep. These are fed on beef liver reduced to a fine pulp and sometimes varied with curds. If you cannot build hatchery get fry three months old and feed them morning and evening on liver. Feed adult about every other day or twice a week. If your pond contains plenty of natural food your trout will require less care.

H. V. S., Dublin, N. H.—When shall we get a full report of your shotgun test, and will it be printed in book form? I notice an article in the Supplement of April 4 in regard to Dublin pond trout. The writer states that they inhabit other small lakes of New Hampshire. Will he please tell us in what town and lake in New Hampshire those trout can be found except Dublin? The people here claim there are no fish like them in this country. The pond in many respects is different and the fish also. The water of the lake is so clear that on looking down 10 or 15ft. you would think it but 3 or 4ft. deep. Last May a trout was caught that weighed 1¼lbs., and in the stomach was found a trout that weighed almost ½lb. The hook was attached to the small trout only. Some fine strings of trout have been taken here this spring. Ans. 1. We begun the reports last week. They will be reprinted in pamphlet form. 2. We have followed Prof. Garman, the describer of the Dublin pond trout, in stating the distribution of the species. He says "it is apparently restricted to the small lakes in the neighborhood of Dublin, and names Center Pond as one of the bodies of water in which it occurs (see 19th Annual Report, Commission on Inland Fisheries of Massachusetts).

New Publications.

AUSTRALIA, NEW ZEALAND AND NEW GUINEA.*

THIS is a highly entertaining book of travels, and we regret that it is not more extensive; we should have been especially delighted to learn more about New Guinea—a country whose geography and natural history are so incompletely known. Mr. Denton went to Australia to assist his father in lecturing and in making collections in various parts of the countries visited. Both the lectures and the collecting were highly successful, but the father unfortunately lost his life through his desire to study the unexplored interior of New Guinea.

The publishers have done their part to give the book a lasting value, the paper and presswork being all that could be desired. The illustrations are true to nature, the subjects interesting, and their reproduction admirable. Many of the objects have never before been represented.

The author rapidly sketches the incidents of the overland journey to California, which involved an unusual share of adventure, the long voyage to the antipodes broken only by a brief call at Honolulu and a compulsory sojourn at Quarantine Island, near New Zealand. The misery of seasickness was never more clearly expressed than in the following soliloquy of one of Mr. Denton's shipmates: "I can't see whatever put it into your head to go away from home. You may do well enough in Honolulu, but oh! you'll die before you get there. Charlie, you fool, if you ever get home again you stay there." Early in the narrative the author introduces descriptions of plants and animals characteristic of the countries visited—a charming feature which grows in interest as the chapters progress. At Auckland the Maoris were first met, and the opportunity utilized to secure some excellent portraits. At Oamaru was found the cream-colored limestone, which can be cut from the quarry with a saw and chisel, but hardens on exposure like the coquina of Florida, so that a building made of it becomes a solid mass of stone. Birds were so numerous at Motenau that very little time sufficed to collect more than could be cared for. The Maori hens were such inveterate thieves that they ran off with the tools whenever they had the chance. Remains of the extinct *Moa* were obtained, and with them were parts of a gigantic eagle which must have lived at the same period. Evidence was not lacking to prove that fire had driven these birds to the scene of their destruction. Near Nelson the notorious flesh-eating parrot was obtained—a species which, by some strange freak, has abandoned its natural food of nuts and fruits and now devours the flesh of living sheep. In the Collingwood caves and at Takaka *Moa* bones were again discovered, at the latter place associated with skeletons of small birds and parts of a large lizard. In Australia the naturalists were soon busy with the gorgeous birds and insects, the opossums, pouched cats, Australian bear and the duck-billed platypus. The exquisite song of the lyre bird was often heard, and the difficulties of securing the songster were fully appreciated. The native method of throwing the boomerang is graphically described. The curious jumping fishes (*Periophthalmus*) were at first mistaken for frogs. "They frequently leaped upon stones and even mangrove roots, where they seemed to hang on by means of their pectoral fins. In jumping they doubled the tail up and then suddenly straightened it out, thus propelling themselves one or two feet each time." Colonies of migratory crabs were seen at MacKay, tens of thousands marching in compact company.

The ravages of the white ant and the feeding habits of the ant lion were investigated at Townsville, Australia. On Friday Island we are introduced to the rich fauna of the coral reefs and to the methods of diving for the pearl oyster. It is interesting to note that in a depth of 30ft. of very clear water Mr. Denton could see the boat like a dark shadow overhead. The appearance of the New Guinea natives is briefly, but clearly set forth. Their limited wardrobe, implements and ornaments are described, and, in many instances, figured. The native houses, both ordinary dwellings and tree houses for defensive purposes, are beautifully illustrated. The Papuans of the high tableland, occupying the towns of Narinuma, Shugary and Gidiaruma, were found to be very pleasant and agreeable companions, perfectly honest, upright and industrious. Many interesting accounts of expeditions for birds, kangaroos, wild pigs and other animals are recorded. Conversations with chiefs about foreign countries showed the wonderful shrewdness of the Papuan leaders. Descriptions of scenery, trees and their fruits, gorgeous birds of paradise and butterflies of prodigious size alternate with accounts of native games, a savage battle, native methods of hunting, a burial cave, tribal meetings, the personal characteristics of the people, and many other interesting topics. The Coyaries first ask a stranger his name, next whether he is hungry. They appear to have no idea of a soul or a land of bliss after death, yet they are strict moralists in the best sense of the word. New Guinea is a land of surprises, and in no particular is this better demonstrated than with regard to its fruits. "Some of them were exact representations of fruits I had seen at home, and I was tempted to take the peaches, oranges, apples, plums, pears, cherries, blueberries, grapes and chestnuts that covered the ground in the greatest profusion. Red peppers and cucumbers, too, grew on small bushes, and could easily be mistaken for the genuine. But how different were the insides of these fruits, both in appearance and flavor! The cucumber was full of little nuts; the red pepper, looking ready to blister one's tongue, was a pleasant, juicy fruit, mild enough for a baby; the chestnut was as hard as a stone; the grapes, poisonous; the blueberries, sour as limes; the cherries, tough, fibrous, bitter and full of small seeds; the plums were plums of some kind, I think, but not very good; the apples, which closely resembled our Baldwins, had a large nut for a core; the oranges had skins an inch thick; and the peaches, though looking ripe and juicy, were nearly as hard as billiard balls." T. H. B.

*Incidents of a Collector's Rambles in Australia, New Zealand and New Guinea, by Sherman F. Denton, Artist to the U. S. Fish Commission, Washington, D. C., with illustrations by the author. Boston, 1889: Lee & Shepard. Pp. 272, pls. 15, figures in the text 40.

Yachts and Canoes for Sale.

Cruising Yacht For Sale or Charter.

The owner of a well-known yacht, 47ft. long, 14ft. beam, 6ft. draft, perfectly fitted out for the comfort and accommodation of four to six persons in the cabin, and three men in forecastle, patent w. c. and all modern improvements, will sell or charter her at a reasonable price on account of important business engagements preventing his leaving the port during the summer months. The yacht is built upon a beautiful model, has two rigs, can be sailed as a sloop, when she is very fast, or as a yawl for cruising. She was built during the winter of 1886, of best of material, under the personal supervision of the owner, and is a stanch and excellent sea boat, well suited for cruising in the gulf of St. Lawrence, and has been so employed, where capital sea trout and other fishing can be enjoyed, and salmon may be included, seal and white perpoise hunting, duck and shore bird shooting. This is an opportunity seldom offered. Address P. O. Box 1681, Quebec City, Can. Satisfactory references in New York or elsewhere given and required.

$800. ATALANTA. $800.

The very fast sloop yacht Atalanta, winner of over forty first prizes in the last four years, is for sale till June 1 at the above low figure. She is perfectly sound and in good order, has two suits of sails and over two hundred ($200) dollars worth of lead ballast. Atalanta is 30ft. over all, 27ft. 3½in. waterline, draws 5ft. 6in. of water, and has 12ft. beam. Is a remarkably safe, fast and able yacht. Has been around Cape Cod eight times, and hove to for six hours in a southeast gale. She is a great bargain at this figure, and is sold only because the owner is going away. For further particulars address
ISAAC R. THOMAS,
60 State st., Boston, Mass.

FOR SALE.—THE CELEBRATED SINGLE-handed yawl Windward. Can be seen at the foot of Spring st., Newport, R. I. Address C. F. L., 14 Walnut st., Boston, Mass.

FOR SALE.—THE CRUISING STEAM launch Midge, length 28 ft., beam 6ft., draft 3ft. One barrel of oil runs 22 hours; two years old; the most perfect boat ever built of her size. Cost $1,500. Owner having purchased a larger yacht would sell to an immediate purchaser for $800. Address HUGH L. WILLOUGHBY, Newport, R. I.

FOR SALE.—A 15FT. CENTERBOARD SAILboat, at half price. Sharpie model.
A. S. GUILD, Lowell, Mass.

Post Mills, Vt.
(Mention this paper).

No Chemicals.

W. BAKER & CO.'S Breakfast Cocoa

Is Absolutely Pure,

and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

W. Baker & Co., Dorchester, Mass.
